No. 88

GOLD COAST.
1892.

GOLD COAST.

Sir W. B. GRIFFITH to the MARQUESS OF RIPON.

(Extract.) Government House, Christiansborg Castle,
Accra, July 8, 1893.

I HAVE the honour to transmit to your Lordship a report—sent to me on the 4th instant—which has been written by the Colonial Secretary on the Blue Book of this Colony for the year 1892. As, through unavoidable circumstances, no report on the Colony has been written since that for the year 1888, Mr. Hodgson has embodied in his paper, as far as he has been in a position to do so, references to, and comparison with, the transactions of the intervening years.

His report affords evidence of the great care, pains and research he has bestowed upon it, and whilst to a considerable extent blending the transactions of four years—1889 to 1892—in one paper he has still kept them, and especially those of the last year, so distinct from each other that they can easily be distinguished. The report appears to me to be complete, exhaustive, and satisfactory, and it brings the history of the administration of the Colony up to the 31st December last, whilst the report is also valuable as containing much useful and interesting information relating to the Colony generally.

GOLD COAST.
1892.

REPORT UPON THE BLUE BOOK FOR THE YEAR 1892.

REVENUE AND EXPENDITURE.

Revenue.

The revenue of the colony is almost entirely derived from a specific duty of 1*s.* a gallon (old wine) on wines and malt liquors and 2*s.* 6*d.* a gallon (old wine) on spirits, and from a 10 per cent. ad valorem duty which has been imposed upon the principal imports since the 1st January 1890. There are also specific duties on tobacco, cigars, gunpowder, cartridges, lead, percussion caps, and guns; stamp duties; and a tax upon the sale of liquors.

Until the 1st January 1888 there was an ad valorem duty of 4 per cent. upon all imports with but few exceptions other than wine, malt liquors, spirits, tobacco, gunpowder and guns upon which specific duties were levied, but Ordinance No. 2. of 1877, imposing those duties, was repealed by Ordinance No. 5 of 1887, the chief feature of which was the abolition of the ad valorem duty of 4 per cent. and an increase in the specific duties on wine, malt liquors, tobacco and cigars. The revenue at once fell from 122,350*l.* 10*s.* 6*d.* in 1887 to 97,806*l.* 19*s.* 5*d.* in 1888, and although in 1889 it rose to 111,386*l.* 6*s.* 7*d.* or more properly, excluding the sale of the Government steamer "Governor Maclean," which realized 6,000*l.*, to 105,388*l.* 6*s.* 7*d.*, it became patent that the fiscal change was unlikely to provide sufficient revenue to admit of works for the development of the Colony being undertaken, and that it was on that account not a success. Hence the reversion to, and an increase of, the previous ad valorem duty from the 1st January 1890.

In that part of the Protectorate which lies to the eastward of the River Volta the duties upon spirits, tobacco, gunpowder, and guns was, from the 1st May 1890, considerably reduced, and at the same time all merchandize which elsewhere was subject to the ad valorem duty of 10 per cent. was then entirely exempted from duty. It was found that trade was being attracted to the neighbouring Colony of Togoland in consequence of the comparatively low import duties levied in that Colony, and the reduction of the duties eastward of the Volta was therefore a measure of self-defence. It has answered all expectations, the trade at the ports of Ada and Kwitta, and more especially the latter, having increased enormously since the step was taken.

From the 28th June 1892, the duty upon gin, which from the 1st May 1890, had eastward of the River Volta been 6*d.* per old wine gallon, was reduced to 5½*d.*, while the duty on brandy and other spirits was increased from 4*d.* to 5½*d.*

For the better prevention of fraud and embezzlement all fees and fines have since the 1st October 1889 been paid by means of stamps.

The total Revenue of the Colony in each of the undermentioned years was as follows:—

	£	s.	d.
1889 - - - - - -	111,388	6	7
1890 - - - - - -	156,449	0	10
1891 - - - - - -	186,020	11	9
1892 - - - - - -	183,074	11	1

The items of Revenue for each year can perhaps best be shown as follows:—

Items of Revenue.	1889.			1890.			1891.			1892.		
	£	s.	d.	£	s.	d.	£	s.	d.	£	s.	d.
Duties on Wines, Spirits, Tobacco, Guns, &c. (Specific).	95,371	2	9	110,619	5	6	133,550	3	8	133,448	1	10
Duty on General Merchandise (ad valorem).	—			22,728	18	7	32,445	17	9	28,322	15	0
Liquor licences - -	4,000	0	0	3,905	0	0	5,185	0	0	5,597	10	0
Stamps (Postal, Telegraph, and Revenue).	2,769	10	6	5,564	17	4	3,410	5	5	6,686	9	5
Other items - - -	*9,247	13	4	†13,630	19	5	‡8,430	4	11	§9,019	14	10
Total Revenue £	111,388	6	7	156,449	0	10	186,021	11	9	183,074	11	1

* Includes 6,000*l.* for sale of s.s. "Governor Maclean" and 1,890*l.* 13*s.* 0*d.* interest on investments.

† Includes Fines, Forfeitures, and Fees of Court 4,221*l.* 11*s.* 10*d.* and 1,910*l.* 7*s.* 3*d.*, interest on investments.

‡ Includes Fines, Forfeitures, and Fees of Court 1,760*l.* 3*s.* 0*d.* and 2,652*l.* 10*s.* 11*d.*, interest on investments.

§ Includes Fines, Forfeitures, and Fees of Court 1,833*l.* 9*s.* 5*d.* and 4,095*l.* 18*s.* 11*d.*, interest on investments.

It does not appear that the imposition of a 10 per cent. ad valorem duty has in any way hampered the trade of the Colony in goods subject to that tax. The tax is a very proper tax, because it reaches every person in the Colony in a manner which is not felt. A man has to pay only a few more pence upon the cloths or other articles which he purchases for himself and his family, and his contribution to the maintenance of peace, order, and

good government is accomplished, unless of course he desires to contribute further by purchasing articles paying specific duties which are not necessities of life. There is no other way by which the native can so easily be reached. Direct taxation in this Colony is impossible excepting in the towns. There such taxation lies ready for municipal purposes when the time arrives for the formation of municipalities.

The population of the Colony being 1,473,882 and the Revenue from taxes in 1892 being 178,978*l.* 12*s.* 1*d.*, that is to say, 183,074*l.* 11*s.* 1*d.* less 4,095*l.* 18*s.* 11*d.* the interest on invested moneys, it follows that the taxation amounts to 2*s.* 5*d.* per head. It is clear, therefore, that the natives of the Gold Coast have, in comparison with the population of other countries all over the world, a very light burden of taxation, and are wholly without any just grounds for complaint in that respect. In Sierra Leone and Lagos the taxation per head is very much higher, in the former nine times, and in the latter seven times, as high.

Expenditure.

The total expenditure in each of the undermentioned years has been as follows:—

	£	s.	d.
1889 - - - - -	125,002	12	8
1890 - - - - -	117,899	4	6
1891 - - - - -	133,406	13	10
1892 - - - - -	158,103	16	9

The following table gives the Revenue and Expenditure since the separation of Lagos from the Colony in 1886:—

Year.	Revenue.	Expenditure.	To Credit of Colony.	To Debit of Colony.
	£ s. d.	£ s. d.	£ s. d.	£ s. d.
1887 - -	122,350 10 6	139,443 2 3	—	17,092 11 9
1888 - -	97,806 19 5	133,467 16 11	—	35,660 17 6
1889 - -	111,388 6 7	125,002 12 8	—	13,614 6 1
1890 - -	156,449 0 10	117,899 4 6	38,549 16 4	—
1891 - -	186,021 11 9	133,406 13 10	52,614 17 11	—
1892 - -	183,074 11 1	158,103 16 9	24,970 14 4	—

On the 1st January 1891 there was a sum of 75,181*l.* 4*s.* 4*d.* standing to the credit of the Colony which was increased to

127,796*l.* 2*s.* 3*d.* on the 1st January 1892 and to 152,766*l.* 16*s.* 7*d.* on the 1st January 1893, as shown by the following figures :—

				£	s.	d.
Balance to the credit of the Colony on the 1st January 1891 - - -				75,181	4	4
	£	s.	d.			
Revenue 1891 - -	186,021	11	9			
Expenditure - -	133,406	13	10			
Balance to carry forward - - -				£52,614	17	11
Balance to credit of the Colony on the 1st January 1892 - - -				127,796	2	3
	£	s.	d.			
Revenue 1892 - -	183,074	11	1			
Expenditure - -	158,103	16	9			
Balance to carry forward - - -				£24,970	14	4
Balance to the credit of the Colony on the 1st January 1893 - - -				£152,766	16	7

Public Debt.

The Colony has no public debt.

Local Revenue.

None. Hitherto there has been a general consensus of opinion on the part of the native population against the imposition of local taxes. An Ordinance (No. 4 of 1889) was passed to admit of the formation of municipalities at Cape Coast and other towns where the adoption of a municipal system of local government might appear to be desirable ; but in this direction no action has as yet been taken, on account of the objection to local taxation.

MILITARY EXPENDITURE.

The Imperial troops were withdrawn from the Colony at the end of the year 1890. There is a large constabulary force in the colony consisting of—

(a.) The military, or Hausa, constabulary the authorised establishment of which is 940 of all ranks and

(b.) The civil police with an authorised establishment of 442 of all ranks.

The headquarters of both branches are at Accra, and the whole force is under the control of the Inspector-General.

The cost of Constabulary has been as follows :—

	£	s.	d.
1889 - - - - -	33,308	0	10
1890 - - - - -	31,466	12	8
1891 - - - - -	35,515	2	2
1892 - - - - -	35,550	16	6

The Hausa Constabulary is almost wholly composed of natives of the Hausa country, a territory which forms part of the empire of Sokoto, situated some 500 miles north-east of the Gold Coast. They are armed with Martini-Henri rifles, and 94 of the men have been instructed in the use of seven-pounder R.M.L. guns as well as the Maxim, Nordenfelt and Gatling guns. A detachment of the force under Colonel Scott, C.B., the Inspector-General, took part in 1892 in the expedition against the Jebus, a tribe in the hinterland of the Colony of Lagos, and behaved, as they have always done, with great bravery and efficiency. For this well-conducted, cheap, and expeditiously carried out campaign Colonel Scott was made a Knight Commander of the Order of St. Michael and St. George. Detachments of the force are quartered at Elmina, Kwitta and Prahsu.

The civil police are armed with long Snider rifles. They are, however, employed almost entirely on civil duties in the towns and villages of the Colony.

A volunteer corps consisting of 100 men was during 1892 formed by the Government in the town of Accra. It consists principally of the Native clerks in the Government and merchants' offices and is armed with the Snider carbine. It is proposed to obtain and issue to them Martini-Henri rifles. The annual expense of the Volunteer Corps is estimated at 324*l.* 10*s.*

PUBLIC WORKS.

The total expenditure on Public Works of all kinds during the last four years has been as follows:—

	£	s.	d.
1889 - - - - -	11,655	11	11
1890 - - - - -	8,946	7	11
1891 - - - - -	14,105	13	2
1892 - - - - -	16,608	16	3

In 1889 and 1890 the streets of the town of Saltpond were placed in thorough order and drained, and the construction of a large reservoir for the storage of fresh water for the use of the inhabitants is in hand as well as the erection of a Queen's warehouse.

In 1892 the Public Works yard and store at Accra, which has been constructed for the purpose of concentrating stores and the preparation of timber and forage work for Public Works, was completed; and corrugated iron market sheds were erected in the town of Accra.

LEGISLATION.

There has been a vast quantity of legislation of an important character during the last four years. The principal Ordinances are the following:—

1889.

No. 2. To provide for the collection of judicial and other fees and fines by stamps.

No. 4. To provide for the establishment of town councils in the towns of the Colony.

No. 7. To provide for the construction, regulation, and protection of telegraph lines.

No. 9. To demonetize gold dust and nuggets.

No. 12. For granting certain stamp duties.

No. 19. To provide for the more speedy and effectual punishment of perjury.

No. 20. To provide more effectual means for preventing and dealing with certain frauds upon insurers.

No. 23. To amend the Towns Police and Public Health Ordinance 1878.

No. 25. To amend the Customs Tariff Ordinance 1887.

1890.

No. 1. To reduce for the time being the duties of customs payable on certain imports into those parts of the Colony and Protected Territories lying to the eastward of the River Volta.

No. 10. To prevent the disclosure of official documents and information.

1891.

No. 3. To reduce for the time being the duties of customs payable on certain imports in those parts of the Colony and Protected Territories lying to the eastward of the River Volta.

No. 9. To amend the law relating to burials and the regulation of cemeteries.

1892.

No. 3. To carry out the general Act of the Brussels Conference, 1890, and to regulate the importation into and the storage and disposal of firearms, ammunition, and gunpowder in the Gold Coast Colony.

No. 4. To regulate dealing in firearms, arms, and gunpowder.

No. 5. To change the duties of Customs payable on certain imports into those parts of the Colony and protected territories lying to the eastward of the River Volta.

No. 9. To restrict the loading and unloading of cargo on Sundays in the waters of the Colony.

No. 11. To amend the law relating to native customs and the exhibition of company flags and tribal emblems.

No. 12. To establish a code of offences punishable on summary conviction and on information.

No. 13. For better regulating towns and promoting the Public Health.

No. 14. To regulate the dispensing and sale of drugs and poisons.

No. 16. To amend the Cemeteries Ordinance 1890.

No. 17. To amend the Gold Coast Volunteer Force Ordinance 1884.

No. 19. To establish a Public Officers' Guarantee Fund.

The passing of Ordinance No. 20 of 1889 was rendered necessary by the practice which had sprung up among certain unprincipled natives of insuring bogus exports and representing that such exports, said to consist of gold dust, ivory, rubber kola nuts, or other consignments of a marketable value, had been lost in the surf in transit from the beach to the ship, the certificate of loss being signed by the interested parties or their friends. In this way many frauds were committed on insurance companies in England. Several were detected, and the guilty parties are now undergoing various terms of penal servitude.

Ordinance No. 23 of 1889 gave more extended powers to the Government in the matter of the sanitation of the towns and villages of the Colony, and the opportunity was taken of requiring the owners of dogs to take out annual licenses. Ordinance No. 13 of 1892 consolidates this and the Ordinances which have been passed in connection with the enforcement of sanitation.

Ordinance No. 25 of 1889 is the Ordinance imposing the ad valorem duty of 10 per cent.

Ordinance No. 1. of 1890, No. 3 of 1891, and No. 5 of 1892, refer to the reduction of Customs Duties with respect to imports into that part of the Protectorate lying eastward of the River Volta.

Ordinance No. 9 of 1891 affects the law of burial, and gives power to require the chief of any town or place to establish a cemetery for the use of his people. The main object of the Ordinance is to prevent the heathen custom of the burial of bodies inside dwelling houses. This practice probably owes its orgin to the fact that it was, and in the less civilised portions of the Protectorate still is, the practice to bury with the bodies many of the

costly gold ornaments owned by the deceased during lifetime than to the prevailing belief that the spirit of the departed hovers round the abiding place of its earthly body, and ought, therefore, to be housed and looked after.

Ordinance No. 4 of 1892 is a corollary to Ordinance No. 3 of 1892, passed for the purpose of carrying out the General Act of the Brussels Conference, 1890, with regard to the importation of arms of precision, ammunition, and gunpowder, within the zone specified in the 8th Article of the General Act.

Ordinance No. 9 of 1892 is a step towards making Sunday an universal rest day. In this Colony the Mohammedans' rest day is Friday, and the heathen fishermen rest on Tuesdays.

Ordinance No. 11 of 1892 puts down by law the abominable customs of the country of Krobo in which murder and vice had prominent places. At the customs, in honour of the Fetishes Kotoklo and Nadu, it was a mark of honour to produce a human skull or thigh bone, and in order to obtain these strangers passing through the country were frequently murdered. The skulls were used during the custom as drinking cups for rum and palm wine. These Krobo customs are in process of being stamped out—the sacred groves and shrines having already been broken down and the priests dispersed.

Ordinance No. 12 of 1892 provides a complete criminal code for the Colony and was drafted on the lines of the code already at the time in force in the West Indian Colony of St. Lucia.

Ordinance No. 14 of 1892 prevents the compounding and sale of drugs and poisons by incompetent persons.

Ordinance No. 17 of 1892 was passed to meet the requirements of the volunteer corps started in Accra during the year.

Ordinance No. 18 of 1892 gets over the difficulty experienced by Native public officers in obtaining security for the faithful performance of their duties. The Government will in fact henceforth guarantee the credit of its own officers.

POLITICAL FRANCHISE.

There is no political franchise The Governor nominates two unofficial members to the Legislative Council.

COUNCILS.

During the year 1892 the Legislative Councils sat during 38 days.

On the 23rd April 1891 the Inspector-General of Constabulary was appointed a member of the Executive Council and an official member of the Legislative Council in place of the officer in command of the Imperial Troops.

CIVIL ESTABLISHMENT.

The following deaths of Government Officials have occurred during the last four years.

1889.

26th February, Dr. Robert English, Assistant Colonial Surgeon

3rd March, at sea, while proceeding to England on leave, Mr. L. C. Kiernan, Assistant Inspector, Gold Coast Constabulary.

15th March, Mr. J. J. P. Moran, Assistant Inspector, Gold Coast Constabulary.

7th December, Mr. A. K. Whitton, Local Auditor for the Gold Coast Colony.

26th December, Mr. William Lee, Foreman of Works, Public Works Department.

1890.

1st June, Dr. Sylvester John Cole, Assistant Colonial Surgeon.

29th July, Mr. William Griffith, Foreman of Works, Public Works Department.

1891.

3rd March, Captain Ben Johnson, Assistant Inspector Gold Coast Constabulary.

4th March, at sea, Mr. John Snowley, Foreman of Works, Public Works Department.

9th April, Mr. John P. Bagwell, Assistant Inspector, Gold Coast Constabulary.

12th June, at sea, the Honourable Lieutenant Colonel Cash, Inspector-General of the Gold Coast Constabulary.

28th June, at sea, Captain Gordon Dermer Travers, Inspector, Gold Coast Constabulary.

9th August, the Honourable Charles Pike, C.M.G., Treasurer.

1892.

11th January, Mr. D. B. Yorke, late District Commissioner.

12th April, Mr. Arthur Walter Macdonald Kirkham, District Commissioner.

15th May, Dr. Nathaniel Ingham Edghill, Assistant Colonial Surgeon.

1st June, Captain J. H. Ovens, Assistant Inspector, Gold Coast Constabulary.

4th July, The Honourable John Sarbah, member of the Legislative Council.

12th October, in England, from the effect of malaria contracted in the Colony, Mr. Fairfax Francklin, Assistant Colonial Treasurer.

19th December, Mr. Charles B. Simmons, Clerk in Charge, Telegraph Department.

Several officers were invalided each year to England or the Canary Islands.

During the last four years nearly every Government Department has been reorganised and, by the compilation and issue of rules and regulations for the guidance of the Staff in each Department in the performance of their work, greater efficiency has been secured.

In the year 1891 the Telegraphs, which had hitherto been worked as a part of the organization of the Post Office Department, were separated and formed into a distinct Department under an officer with the title of the Director of Telegraphs, the appointment being conferred, on the 1st June 1891, upon Mr. M. S. Andrews, who had for some time filled the post of Superintendent of the African Direct Telegraphs Company's Office at Accra. The change has been most beneficial, because it has resulted in the staff receiving more individual attention and in the whole telegraph system being more carefully supervised, a matter of imperative importance in the successful working of telegraph lines.

Besides the Telegraph Department several other new departments have either been initiated or formed.

In 1890 a Roads Department was commenced by the appointment of an Inspector of Trade Roads on the 15th February in that year.

An Education Department, under the controlling hand of the Director of Education (an officer who was appointed on the 10th September 1890, when it was decided that the Colony should have its own Inspector of Schools instead of sharing one with the Colonies of Sierra Leone and Lagos), has sprung into existence.

The appointment, on the 25th April 1891 of an officer as Sheriff who should also have the management of the prisons of the Colony has resulted in the formation of a Prisons Department which cannot fail to work incalculable benefit in organizing the several prisons of the Colony and bringing all the arrangements into harmony and order. Under the auspices of Mr. J. R. Phillips, who received the appointment, the mark system for convicts undergoing sentences of one year and upwards has been introduced, and other changes beneficial alike to organization and the treatment of convicts have been made.

A Sanitary Department under the Chief Medical Officer has, since 1888, been in gradual progress of formation and as it extends

must necessarily be of benefit in promoting a better sanitary condition of the towns and villages of the Colony and thereby improving the health of the people.

The formation of a botanical station at Aburi in February 1890 is practically the formation of a new Department. Started for the purpose of educating the natives to turn their attention to the production of other articles of export than the staple articles of palm oil, palm kernels, and rubber, by the cultivation of products of economic value, it has already been the means of stimulating the cultivation of coffee and cotton.

POPULATION.

Until the year 1891 no well-determined efforts had been made to ascertain the population of the Colony and protected territories with any degree of exactitude, but special steps were then taken to get as correct a census as posible. The 5th April 1891 was the date fixed for taking the census, and as far as practicable that day was universally regarded.

Exclusive of the countries of Kwahu nd British Krepi, the returns received for the whole Colony showed that there was a population of 768,882, made up as follows:—

Males - - - - -	357,584
Females - - - - -	409,511
Unclassified - - - -	1,787
	768,882

while as regards most of the principal towns along the littoral and some of the adjacent countries the returns sent in by the enumerators may be regarded as fairly accurate. The difficulty of getting at the people in the interior parts of the Colony, the great reluctance of the natives to be enumerated, and other causes, led to inaccuracies elsewhere. The Census Committee calculated that an addition of 205,000 should be made to the returns as representing persons unenumerated. This brings the total population of the Colony up to 973,882, to which figures are added 500,000 for the countries of Kwahu and British Krepi, making a grand total of 1,473,882 inhabitants of the Colony and protected territories.

The population of Accra is recorded as -	16,267
of Cape Coast - - - -	11,614
and of Elmina - - - -	10,530

Of the total population about 37,500 are professing Christians and are classified as follows:—

Wesleyans	24,700
Lutherans (Basel Mission)	9,029
Roman Catholics	2,165
Church of England	800
Other denominations	806
	37,500

The influx of Mahommedans into the Gold Coast has been very noticeable in recent years. In Accra alone, irrespective of the Hausa constabulary, there are probably not less than 1,000 followers of Islam.

SECURITY.

European officers who are required to give security do so principally through the medium of one of the English guarantee societies; and native officers by obtaining two approved sureties in the Colony. This latter arrangement has been found to be unsatisfactory, principally because it places the officers under obligation to their sureties, which is undesirable, and because the more perfect organization which has been effected in all departments in recent years having resulted in the detection of all monetary irregularities, the sureties have, not unfrequently, been required to make good the defalcations; and many native officers have, on that account, been unable to get approved persons to become sureties for them.

An ordinance (No. 19 of 1892) has accordingly been passed for the purpose of enabling the Government to become surety for its own officers up to a limit of 500*l.* in each case.

The salient features of this Ordinance, which will come into force in 1893, are:—

(*a.*) The annual payment in advance of 1 per cent. upon the amount for which the officer is required to give security.

(*b.*) The payment of an entrance fee as follows:—
For incomes of 100*l.* and under, 5*s.*
For incomes over 100*l.*, 10*s.*

(*c.*) The payment of the first year's contribution in one lump sum in advance.

(*d.*) The payment of the contributions of succeeding years monthly in advance.

(*e.*) After contributing for five years, the contribution to be lowered to one-tenth of the original amount, unless otherwise ordered by the directors with the approval of the Governor.

(*f.*) The year for the purposes of the fund to be from the 1st January to the 31st December.

PENSIONS.

At the close of the year 1892 there were 35 pensioners on the Government, the total pensions amounting to 3,130*l.* 10*s.* Since 1887 the Pension List has stood as follows:—

		£	s.	d.
1888 - - -	22 pensioners,	1,734	7	7
1889 - - -	28 "	2,420	7	2
1890 - - -	30 "	2,471	8	8
1891 - - -	36 "	3,159	13	3
1892 - - -	35 "	3,130	10	0

EDUCATION.

The educational system of the Colony is based upon an ordinance passed on the 28th September 1887 for "the promotion and assistance of education in the Gold Coast Colony" and upon rules framed under that ordinance by a Board of Education and approved on the 4th November 1887.

Although there are two well filled Government schools, one at Accra and the other at Cape Coast, the work of educating the natives is practically in the hands of the two large missionary societies which have worked so long and so well in the Colony, namely the Wesleyan and the Basel Missionary societies. In 1892 the former had 26 schools with 2,948 children on the registers, and the latter 32 schools with 2,192 children. The Roman Catholics are, however, making good advances in this all important work and now have nine schools with 1,189 children on the registers.

The total number of children under instruction in the Colony during the last five years has been as follows:—

1888 - - - - - -	4,585
1889 - - - - - -	5,038
1890 - - - - - -	5,356
1891 - - - - - -	6,688
1892 - - - - - -	7,572

Although these figures show that some advance is being made the result is after all very meagre having regard to the estimated population of 1,473,882. As a matter of fact only 5 per 1,000 of the population are now attending the elementary schools, and there remains therefore an enormous amount of work to be accomplished.

The following summary shows the distribution of the children among the groups of schools during the last five years.

Year.	Government Schools.			Wesleyan Mission Schools.			Basel Mission Schools.			Roman Catholic Schools.			Bremen Mission Schools.		
	Boys.	Girls.	Total.	Boys.	Girls.	Total.	Boys.	Girls.	Total.	Boys.	Girls.	Total.	Boys.	Girls.	Total.

* Not separately furnished.

GOLD COAST. 1892.

In 1889 steps were taken to obtain a better uniformity in all schools in the matter of school registers and school equipment, and in lessening the diversity of the books in use. Examinations have also been held in 1890, 1891 and 1892 for the purpose of ascertaining the acquirements of the teachers and of grading and certificating them in accordance with the results obtained. Much, however, has still to be done in this direction.

In 1891 the Kindergarten system of teaching was introduced into the Government schools for the junior classes and it has answered admirably. It is being adopted in the schools of the Wesleyan and Basel Missions.

In 1891, with a view to the encouragement of thrift, penny banks were started experimentally in the principal schools of the Colony, and the result has not been without encouragement. On the 31st December 1892 there were 508 school children depositing money in the penny banks and a total sum of £43 11*s.* 8½*d.* deposited. The following table shows the distribution of the deposits:—

Schools.	Total No. Depositors.	Total sum to credit of Depositors.
		£ s. d.
Government School, Accra - - -	164	26 11 4½
Wesleyan School, Accra - - -	113	9 17 10
Basel Mission School, Accra - -	34	15 10
Government School, Cape Coast - -	87	2 18 1
Wesleyan School, Cape Coast - -	55	10 0
Roman Catholic School, Elmina - -	53	1 9 11
Wesleyan School, Winneba - - -	2	1 8 8
	508	43 11 8½

In order to encourage school work by the promotion of rivalry between the several schools of the Colony a competition and exhibition of needlework as well as of mapping, freehand drawing, and handicrafts have been held annually since 1888. At these competitions and exhibitions, prizes are awarded by a committee of management and the results duly published.

The girls in the Roman Catholic schools at Elmina and Cape Coast are taught practical cooking; the Wesleyan Mission opened in 1892, at Cape Coast, a school for instruction in carpentry and forge work, and at many of the Basel Mission schools practical instruction has for some time been given in agriculture as well as in carpentry and forge work. It is principally owing to the exertions of the Basel Mission in years past that the Gold Coast is now the principal recruiting ground of neighbouring Colonies for

coopers, carpenters, and blacksmiths and that the mechanics of Accra are in such demand.

The sums earned as grants-in-aid by the several groups of schools have been as follows :—

Group.	1888.	1889.	1890.	1891.	1892.

TRADE.

IMPORTS and EXPORTS.

Imports.

Of the total imports about two-thirds come from the United Kingdom, the remainder being supplied by the United States, Germany, France, and Holland.

The total value of the imports during the last six years, that is to say since Lagos was divorced from the Gold Coast, is shown as follows :—

Year.	From the United Kingdom.	From British Colonies.	From Foreign Countries.	Total.
	£ s. d.	£ s. d.	£ s. d.	£ s. d.
1887 - -	267,176 10 4	4,665 15 9	91,873 6 0	363,715 12 1
1888 - -	312,565 12 2	6,568 14 11	112,977 18 3	432,112 5 4
1889 - -	340,111 2 1	8,828 12 11	91,928 14 3	440,868 9 3
1890 - -	422,739 14 6	5,861 0 4	133,502 1 6	562,102 16 4
1891 - -	483,392 18 3	5,085 6 10	177,302 17 11	665,781 3 0
1892 - -	407,037 16 10	9,924 13 11	180,132 1 8	597,094 12 5

The value of the principal articles of Imports since 1888 are shown in the following table :—

†Ten per cent. ad valorem duty imposed on certain articles.

In 1892 the importation of rum and alcoholic liquors was as follows :—

—	Gallons.
Rum - - - - - - -	1,029,114
Gin and Geneva - - - -	220,322
Whiskey - - - - - -	5,054
Brandy - - - - - -	485
Wines - - - - - -	20,492
Ale and Porter - - - - -	19,665
Total - - - - - -	1,295,132

GOLD COAST. 1892.

With an estimated population of 1,473,882 this gives an average consumption of about $\frac{8}{7}$ths gallon per head, but there is no doubt that a large quantity of the spirits imported into the Colony finds its way into Ashanti and other interior countries not within the protectorate and that $\frac{3}{4}$ gallon per head more nearly approximates to accuracy.

In the United Kingdom, with its population of 38,000,000, the annual consumption of spirits is roughly 39,000,000 gallons and of beer 31,000,000 barrels, besides other strong drinks. It is clear, therefore, that the consumption of alcoholic drinks on the Gold Coast compares very favourably with that of the United Kingdom.

Drunkenness on the Gold Coast is comparatively uncommon. East of the river Volta, where, on account of the low duties, rum can be purchased for threepence a bottle, and where, therefore, if the importation of spirits into the midst of the natives has the demoralizing influence so often contended for it, the effects would be at once visible, there is absolutely no increase of drunkenness apparent. It would seem, therefore, that the West African Native is not without a proper appreciation of the advantages of temperate habits.

Exports.

The value of the exports during the last six years is shown as follows :—

Year.	To United Kingdom.			To British Colonies.			To Foreign Countries.			Totals.		
	£	s.	d.	£	s.	d.	£	s.	d.	£	s.	d.

By far the larger quantity of the exports go to the United Kingdom, next in order are Germany, France and the United States, the last named taking gum copal, palm kernels, and palm oil only.

There seems every promise that a large trade in the valuable timber of the Colony is springing up. It has already attracted a good deal of capital and the timber realizes good prices in the English markets. The export of timber has, it will be seen from the foregoing figures, increased from 240 feet, valued at 4*l.* in 1887, to 2,130,614 feet, valued at 36,407*l.* 6*s.* in 1892. The transport of the timber from the timber grants to the coast forms one of the principal obstacles to the success of the trade, but it is one which is not insurmountable.

One of the most remarkable exports is that of monkey skins. During the last five years an average of 175,000 monkey skins, valued at about 30,000*l.*, have been exported annually. Only skins in good condition and with few shot holes are taken, and under the circumstances it may safely be asserted that at least 200,000 monkeys are massacred every year on the Gold Coast. The skins most sought after are those of the Colobus Vellerosus, which are often as large as a big dog and have beautiful coats of long black silky hair.

The total value of the exports per head of the population was in 1892 8*s.* 10½*d.*

SHIPPING.

The following tables show :—

(A.) The number of sailing ships and steamers which have entered and cleared during the past five years.

(B.) The countries from which they have entered, and

(C.) the countries for which they have cleared during the same period.

There are 12 ports of entry and 34 sufferance wharves in the Colony for the loading and unloading of vessels.

AGRICULTURE.

The area of the Colony has been variously estimated from 29,401 square miles, as given in the admirable report made by the Commissioners who were appointed by Colonel F. White when administering the Government in 1887 for the purpose of considering the resources of the country and the best means of developing them (the report has been published under the title "Economic Agriculture on the Gold Coast" and can be obtained of the Government Printers, Messrs. Eyre and Spottiswoode*), to 39,060 square miles as published in the Blue Books. It is probable that a mean between the two—say 35,000 square miles—will more nearly approximate to accuracy.

This is not the place to enter into the question of land tenure on the Gold Coast, but anyone interested in the subject can find a good deal of information with respect to it in the report above referred to.

With regard to the area of land under cultivation I cannot do better than quote from the Commissioners' report:—

"In this tropical country, where nature repays every effort of cultivation by a hundredfold return, and the wants of man are confined almost exclusively to his daily necessary food, there is no incentive to exertion, and thus, though agriculture is the main occupation of the people, we have no hesitation in stating that probably we have no more than three per cent., certainly not more than five per cent., of the soil brought under cultivation in any one year."

The staple food crops of the country are maize, plantains, yams, cassada, ground-nuts, and in some districts, rice. Many parts of the Colony are admirably adapted for the cultivation of rice, and a profitable trade might be carried on by the cultivation of it, as may be seen at a glance from the following figures, which give the quantity and value of rice imported into the Colony during the last five years:—

Year.	Cwts.	Value.
		£ s. d.
1888 - - - - - -	8,992¾	4,050 11 11
1889 - - - - - -	10,922¾	5,429 1 7
1890 - - - - - -	10,524¼	4,936 11 0

1892 - - - - - -	22,774	11,108 3 11

* Colonial Report, No. 110 of 1890 [C.—5897.-40].

The tobacco plant might also be cultivated with advantage. During the last five years tobacco has been imported into the Colony in the following quantities :—

Year.	Lbs.	Value.		
		£	s.	d.
1888 - - - - - -	482,445	14,313	2	2
1889 - - - - - -	512,233	13,626	10	3
1890 - - - - - -	692,166	15,552	5	4
1891 - - - - - -	731,580	15,657	8	10
1892 - - - - - -	744,508	17,591	8	7

No well directed efforts have as yet been made to grow tobacco, but from the experiments which have been made at the Botanical Station since its establishment in 1890 there is no doubt that the plant is easy of culture on the Gold Coast, and that tobacco of good quality can be produced.

The variety of fruits obtainable is small, and little or no attention is paid by the natives to the cultivation of fruit trees. It is hoped that the establishment of the Government Botanical Station at Aburi will stimulate the natives to turn more attention to fruit cultivation.

The principal commercial product is the oil palm, which, although to be found in profusion throughout the Colony, has never been systematically cultivated. There are three varieties of the tree, which are distinguishable by the colour of the nuts—orange, red, and black, the first giving the best quality of oil. The means adopted by the natives for extracting the oil are very well described in the report on Economic Agriculture. They are miserably defective, causing considerable waste. Probably also not more than half the oil-producing palm trees are made use of, the nuts from the remaining trees being allowed to fall from the trees and rot on the ground. In connection with this, the staple industry of the Colony, the want of improved means of communication between the plantations and the trade Ports is seriously felt. Better means of communication would necessarily lessen the cost of transport; would open out the oil-producing districts; would stimulate trade; and would, by decreasing the cost of placing the staple on the market, admit of the palm oil trade holding its own for a long time to come with its many competitors for attention in the markets of the world. With the spread of education will come improved methods of cultivation and manufacture, which in their turn will be the means of ensuring a stable, abiding, and profitable trade to merchants.

GOLD COAST. 1892.

The trade in palm kernels suffers even more than oil from the want of good communication with the trade ports, and in this regard it will be sufficient to quote from the Report on Economic Agriculture: "For every ton of palm oil there should be 2½ tons "of clean palm kernels, and yet we find that the exports of the "article are much below those of the oil. The direct loss to the "Colony is enormous and arises from the same causes as diminish "the export of oil. Machines have been invented by Gunnell "and others for the purpose of rapidly breaking the nuts, but "they can never come into general use until it is possible to move "large weights in carts along roads adapted to the purpose, as "will be evident when it is considered that under present condi-"tions four men are required to carry on their heads sufficient "nuts (2 cwts.) to produce 56 lbs. of kernels, the value of which "varies from 1*s.* 9*d.* to 2*s.* 3*d.* Owing to this cause £100,000* "worth of this one article are annually wasted (*see* Schedule B), "the nuts being piled in heaps and allowed to rot. Schedule B is "an eloquent argument for the establishment of good cart roads." In place of Schedule B referred to, which gave figures up to 1888 only, I append the following table, showing the figures from 1888 to 1892 inclusive:—

Year.	Quantity of Palm Oil exported.	Quantity of Palm Kernels produced.	Quantity of Palm Kernels exported.	Quantity of Palm Kernels unutilized.	Value of Palm Kernels unutilized.
	Tons.	Tons.	Tons.	Tons.	£
1888 - -	11,369	28,422	13,330	15,092	75,460
1889 - -	9,672	24,180	10,919	13,261	66,305
1890 - -	9,776¼	24,441	12,650	11,791	58,955
1891 - -	12,948	32,370	12,928	19,442	97,210
1892 - -	12,144¼	30,361	15,846	14,515	72,575
Total -	55,910	139,774	65,673	74,101	£370,505

Next in importance to the oil palms are the rubber trees. There was practically no trade in rubber until the year 1883, when, in consequence of the attention which was drawn to this valuable product in 1882, a trade was stimulated, until rubber has reached the dignity of being regarded as one of the staple exports of the Colony.

The following figures show the progress which has been made in the decade.

* Which it should have been 75,000*l.*

Year.	Quantity.	Value.		
	Lbs.	£	s.	d.
1883 - - - -	57,913	2,371	12	0
1884 - - - -	123,843	13,619	17	7
1885 - - - -	93,726	30,234	15	1
1886 - - - -	1,549,121	69,971	2	8
1887 - - - -	1,306,252	62,430	1	8
1888 - - - -	878,387	38,048	8	9
1889 - - - -	1,241,628½	55,197	16	4
1890 - - - -	3,361,055	231,281	11	0
1891 - - - -	2,946,913	198,901	6	6
1892 - - -	2,663,020	166,659	16	8

In 1891, 5,450 tons of caoutchouc were imported into the United Kingdom, and the Gold Coast now ranks third among the rubber-producing countries of the world. Rubber is found in abundance in Akim, Krepi, Denkera, Sefwhi and Wassaw, and outside the Protectorate in Ashanti.

Coffee and cotton are cultivated in small quantities and the soil is admirably adapted for their growth as well as for other economic products of market value.

Cotton is indigenous and has been used by the Natives from time immemorial. The Mohammedans weave from it very handsome cloths. The raw material has never, however, become a staple export, and the cultivation of it—if cultivation it can be called—is mainly carried on by the natives who inhabit the districts far removed from the sea-coast, where they find that yarn of British manufacture is more expensive to them than the material which they can raise on their own soil. In 1890 large quantities of Egyptian cotton were imported by the Government with a view to encourage the cultivation of cotton, and the samples obtained from the cotton planted at the Botanical Station were valued in England at a higher figure than any sample previously received from West Africa. The seed has been distributed as widely as possible throughout the Colony, but although a splendid trade might easily spring up in this valuable commodity the want of the means of transport will act as a deterrent to its cultivation on a scale beyond that which is sufficient to supply local wants.

The Botanical Station, to which I have already referred, has been the means of reviving the cultivation of coffee in the country of Akwapim, the soil of which is peculiarly suited to its growth,

and under the fostering hand of the Government it should in time become one of the staple exports of the Colony. Several coffee and cocoa plantations have in recent years been started by European and Native gentlemen in the neighbourhood of Cape Coast, and are likely to be attended with success and profit to the owners.

Fibre plants, which require so little attention, and the cultivation of which would on that account be suited to the habits of the native, have scarcely as yet received any consideration. Many valuable fibre plants are indigenous. Attempts have been made to develop an industry in African piassava fibre but not as yet with any success.

The kola tree, the nuts of which combine the best qualities of coffee and cocoa, and which can therefore be used for extracting a substitute for those beverages, is indigenous to the country. A small trade has been established and more will, it is believed, be heard of kola nuts as an article of export.

MANUFACTURES, MINES, &C.

There are no manufactures of trade value, and mining is confined to gold mining. The country is rich in gold, it is to be found everywhere in large or small quantities, and there is no native family in the country without its family gold ornaments of the purest gold and often of artistic workmanship. The insignia of the court officials of a native King are almost invariably covered with beaten gold, and gold dust among the natives is a common means of exchange.

The natives mine for gold in a very primitive manner; they do not use mercury and their returns must be small compared to what they might be. I am indebted to Mr. G. E. Ferguson, a native Government officer, for the following description of native mining which is taken from his report upon a Government mission which, at the end of 1890, led him through the country of Akim, which abounds in gold.

"A native miner has but few implements—a long-bladed spud or digger, a wooden bucket for bailing out the water or hoisting up the stuff, and a bowl for washing or "vanning" make up the list. He rarely makes his shaft more than three feet in diameter. Planting one end of his digger into a recess in the shaft he places the other end diagonally against the opposite side of the shaft, and supporting himself by it his foot is placed in another of the recesses. He then lengthens out his body and fixes his back firmly against the side of the shaft. Thus supported, he removes the digger, plants it in another recess below the first and by repeating the operation gets to the bottom of the shaft. A

tunnel, which cannot be long, for his neighbour's shaft is only 15 to 20 feet from him, is next driven.

"In some cases there is a quick return, nuggets worth 100*l.* not being rare, as I was informed by the Chief of Asiakwa. From all I can learn the yield is about 2*l.* 10*s.* per ton.

"Whatever the yield may be the numerous shafts serve as catchpits for surface water, and as the rainy season sets in all the workings are suspended; a few are renewed during the dry season, while most of them are permanently deserted and new shafts sunk. In this way the Akim miner honeycombs the ground, and by interfering with the natural distribution of the water wastes the mineral resources of his country."

For many years past gold mining on an extensive scale has been carried on by several English mining companies in Wassaw. These mines were visited early in 1889 by Governor Sir Brandford Griffith, and His Excellency's Report has been printed and presented to Parliament (copies of the Report* can be obtained of the Government Printers, Messrs. Eyre and Spottiswoode). Large sums of money have been spent on machinery, but the difficulty of landing machinery, and the further difficulty of transporting it to the mines, have been great hindrances in the development of what ought to be a prosperous and handsomely paying industry. Mismanagement has not been absent and no doubt other causes have been at work to prevent success, but Sir Brandford Griffith in his report, already referred to, says that his visit impressed him with the following convictions:—

1st; that the country is rich in gold and that it is merely a matter of the necessary time and scientific application for that gold to pay well for extraction, and

2nd; that earnest and well considered attempts are now being made to ensure success.

In a paper on the "History, Trade, Resources, and Present Condition of the Gold Coast Settlement," which Mr. Hesketh J. Bell, F.R.G.S., Assistant Treasurer of the Gold Coast, read on the 1st May 1893 before the Liverpool Chamber of Commerce, he says, on the subject of gold mining:—

"It is impossible in the limits of a paper such as this to go fairly into the merits and prospects of gold mining on the West Coast of Africa. If the Gold Coast possessed a climate no worse than that of Australia or South Africa the question would long ere this have solved itself, and a rush to the West African Gold Fields would have happened very many years ago. I doubt very much whether California itself ever presented to the naked eye the tempting wealth of gold which so forcibly attracts the attention of the traveller in the western districts of the Gold Coast. All along the sea-board, from Cape Coast Castle to Appolonia, the native women may be seen washing the sand of

* Colonial Report, No. 66 of 1889 [C.—5620-24], August 1889.

the sea-shore and obtaining a considerable amount of gold therefrom. Every stream in Ahanta possesses rich auriferous deposits, and all over the country quartz reefs crop out in the surface soil giving good promise of great wealth lying at a little depth below. The reports of every competent person who visits these districts confirms the statement that gold is to be found in abundance."

The following table shows the exports of gold, irrespective of gold specie, from the Colony since 1885 :—

Year.	Weight.			Value.		
	Ozs.	Ack.		£	s.	d.
1886 - - - -	20,799	1	0	74,828	17	0
1887 - - - -	22,546	12	$4\frac{2}{3}$	81,168	9	5
1888 - - -	24,030	10	$0\frac{1}{3}$	86,510	5	2
1889 - - - -	28,666	12	$5\frac{1}{9}$	103,200	9	10
1890 - - - -	25,460	4	$3\frac{3}{4}$	91,657	0	10
1891 - - - -	24,475	9	3	88,112	2	9
1892 - - - -	27,446	1	1	98,805	17	3
Totals - - -	173,425	3	$5\frac{31}{36}$	£624,283	2	3

GRANTS OF LAND.

It is hardly an exaggeration to say that every square yard of land in the Colony has its owner, and the acquisition of land by the Government for public purposes can only be accomplished by payment at a valuation either eventually agreed upon or, in the majority of cases, fixed by the court to which the matter is taken for settlement under the provisions of the Public Lands Ordinance No. 8 of 1876. Large tracts of land form what is known as "Stool lands," that is land which is attached to the stool either of the native kings of the country or the chiefs of the towns or villages in that country, and passes upon the death of the king or chief to the next occupant of the stool. Disputes as to the ownership of land are frequent, and more trouble arises from such disputes than from any other cause. The mining companies hold most of their land by grants from native kings or chiefs for a term of years, and latterly large grants of land have been obtained by persons and companies interested in the timber trade. These grants are unregistered, and the only condition attached to them is that the grantee pays up with regularity the annual rent agreed upon.

73

GAOLS AND PRISONERS.

The total number of persons committed to the several Government prisons of the Colony during the last five years has been as follows:—

Year.	Males.	Females.	Juveniles.	Totals.
1888 - - -	1,702	69	7	1,778
1889 - - -	2,093	148	14	2,255
1890 - - -	1,647	76	9	1,732
1891 - - -	1,677	85	4	1,766
1892 - - -	1,475	48	11	1,534

During the same years the cost of the Prisons Establishment was:—

Year.	Cost. £	s.	d.
1888 - - - -	4,497	14	1
1889 - - - -	4,803	19	9
1890 - - - -	4,117	8	9
1891 - - - -	4,230	10	3
1892 - - - -	5,387	1	8

and the cost per head as shown in the following table:—

Year.	Total number of Prisoners.	Total cost of Prisoners. £	s.	d.	Cost per Prisoner. £	s.	d.
1888 - - -	1,778	4,497	14	1	2	10	7
1889 - - -	2,255	4,803	19	9	2	2	7
1890 - - -	1,732	4,117	8	9	2	7	7
1891 - - -	1,766	4,230	10	3	2	7	11
1892 - - -	1,534	5,387	1	8	3	10	3

The large increase in the cost per head in 1892 as compared with previous years is due principally to the fact that in order to get a more reliable and efficient staff of prison officers higher wages have been paid from the 1st January 1892. The prison rations,

which are obtained by tender, have also slightly risen in price from the same date.

Against the cost must be placed as a set-off the value of the work done by the prisoners. They are employed in scavenging duties, the upkeep of roads, mat making, carpentering, and tailoring.

Besides the Government prisons, which number 13, there are 62 registered native prisons each under the charge of the Chief of the town in which it is situated.

CRIMINAL STATISTICS.

The following return shows the number of committed offences brought before the Government Courts, and the number of convictions obtained in Courts during the last five years:—

Year.	Offences.	Convictions.		Totals.
		Commissioner's Courts.	Supreme Court.	
1888 - -	5,087	3,638	134	3,772
1889 - -	4,951	3,638	123	3,761
1890 - -	5,678	4,403	166	4,569
1891 - -	5,369	4,106	139	4,245
1892 - -	5,385	4,042	126	4,168

The native kings and chiefs in the Protectorate are with few exceptions allowed to hold court and adjudicate upon cases in accordance with native custom. They have, however, no power of life and death, and all criminal offences of a serious character have to be sent to the Government courts.

In accordance with native custom suitors in native courts have a right of appeal from the Chief's court to the court of the King of the country, and this right presents a serious difficulty in connection with the partition of native countries.

On the 15th January 1883 an Ordinance was passed giving power to the Government to regulate native tribunals where it might from time to time appear desirable to do so. Under this excellent Ordinance, which is called the Native Jurisdiction Ordinance, the kings and chiefs of the countries to which it is applied have to render periodical returns to the Government of the cases dealt with by them, and the means exist of seeing that justice is fairly and impartially administered. The Ordinance has so far only been applied to a very few of the countries of the Protectorate.

HOSPITALS.

There are four public hospitals maintained by the Government at the following places :—

——	Number of beds.
Accra - - -	40
Cape Coast - - -	32
Elmina - - -	28
Kwitta - - -	9

There are free dispensaries attached to each hospital and free dispensaries at the following places, where also a medical officer is stationed. At these dispensaries large numbers of natives are annually treated gratuitously :—

Axim. Saltpond. Winneba. Ada.

During the last five years the following in-patients have been treated :—

Year.	Patients Discharged.				Totals.
	Cured.	Relieved.	Not improved.	Deaths.	
1888 - - -	710	226	12	59	1,007
1889 - - -	686	246	32	88	1,052
1890 - - -	769	179	40	47	1,035
1891 - - -	572	212	41	48	873
1892 - - -	840	272	47	71	1,230

PUBLIC LUNATIC ASYLUM.

A lunatic asylum was established in Accra in 1887, and the following male and female lunatics have been treated in it :—

Year.	Admitted.		Discharged.						Deaths.		Remaining 31st December.	
			Cured.		Relieved.		Not improved.

* Escaped.

METEOROLOGICAL OBSERVATIONS.

The rainfall at Accra during the last five years has been as follows:—

1888 - - - - - -	34·96 inches.
1889 - - - - - -	25·56 inches.
1890 - - - - - -	29·535 inches.
1891 - - - - - -	28·97 inches.
1892 - - - - - -	29·27 inches.

In 1892 the highest shade temperature registered at Accra was 89° 92″ at 5 p.m. in March, and the lowest 62° 99″ at 9 a.m. in June. The hottest months are February, March, April, and May, and the coolest July, August, and September.

At the botanical station on the hills at Aburi the rainfall in 1891 was 55·14 inches and in 1892 43·25 inches. In June 1891 the rainfall at the station was unusually heavy, reaching a total of 20·03 inches.

SAVINGS BANKS.

A Government Savings Bank system was established on the 1st January 1888 by Ordinance No. 15 of 1887. Interest at the rate of 2½ per cent. is paid upon deposits by any one depositor not exceeding 500*l.* in the aggregate.

On the 31st December 1892 there were nine banks open, and the following table shows the progress which has been made in the five years during which the system has been in operation:—

Name of Bank.	Number of Depositors on the 31st December.					Amount standing to credit of Depositors on the 31st December.					
	1888.	1889.	1890.	1891.	1892.	1888.	1889.	1890.	1891.	1892.

It is unsatisfactory to find that the progress of the Savings Banks is so slow, but thrift is to a certain extent dependent upon education, and as education advances so will the natives learn to become thrifty. Still there would, it is believed, be more depositors but for the prevailing practice of petty trading. A man with a few shillings will buy small commodities of saleable value, and, raising the price, will start up country as a hawker and having sold his goods will with the proceeds purchase at a low cost rubber or monkey skins. With these he will return to the coast, and, selling them at their market value, start afresh as a hawker on a somewhat larger scale than before. The small number of Savings Bank depositors must not therefore be taken as a correct index to the thrift of the population.

I have referred, under the head of education, to the establishment of penny banks in the principal schools of the Colony. The money deposited in these penny banks is lodged in the local Government Savings Bank.

POSTAL AND TELEGRAPH STATISTICS.

Post Office.—There is a tri-weekly postal service along the whole coast line from Accra to Kwitta on the east, and from Accra to Axim on the west; a tri-weekly service from Accra to the Government station at Akuse on the Volta passing through and serving the countries of Akwapim and Eastern and Western Krobo; a weekly service from Axim to Half Assinie; and a bi-weekly service from Chama to the Gold Mines in Wassaw. The mails are carried on foot, and it is estimated that 122,226 miles are traversed annually by the 42 postmen employed for the purpose, giving each man an average of 8 miles a day assuming a continuous daily employment throughout the year.

There is an inland money order service in force between the principal coast towns, and the introduction of the system of sending small sums of money through the post by means of postal orders of fixed value has been decided upon. (The sale of postal orders of the value of 1*s.*, 1*s.* 6*d.*, 2*s.* 6*d.*, 5*s.*, 10*s.* and 20*s.* was commenced on the 1st March 1893.)

A parcel post with the United Kingdom, and through the United Kingdom with all countries with which there are parcels posts arrangements in force, was commenced on the 1st February 1888, and a similar post has since been established with the West African Colonies of Lagos, Sierra Leone, and Gambia.

The following table gives the principal postal statistics since the separation of Lagos from this Colony:—

Year.	No. of Post Offices.	Estimated No. of Letters &c. Posted.	No. of Money Order Offices.	Money Orders.				Parcels.	
				Inland.		Foreign.		Number received.	No. Despatched.
				No.	Value.	No.	Value.		
					£ s. d.		£ s. d.

Telegraphs.—The erection of telegraph lines in the Colony was commenced in 1882, but it was not until the 24th May 1887 that arrangements could be made for the public to have access to the wires for the despatch of telegrams, and that telegraph offices were opened. Prior to that date the wires were used entirely by the Government. On the 24th May 1887, nine telegraph offices were opened for the receipt of public messages, but only in a tentative manner, because in the notice announcing the fact it was expressly stated that Government messages were to have priority of transmission over the messages of the public, and that the Government reserved to itself the right to refuse any message it might wish so to do and to close the lines to the public at any time it deemed advisable. The rates of charge fixed were 1*s.* per 20 words and 3*d.* for each additional 5 words with free addresses; and these rates are still in force. Notwithstanding the restrictions to which the messages of the public were subjected and which no longer exist 4,399 paid messages were handed in and despatched between the 24th May and 31st December 1887, yielding a revenue of 250*l.* 0*s.* 9*d.* From the 24th May 1887 until the 1st June 1891, telegraph work was conducted by the Post Office staff, but on the latter date the telegraphs were formed into a separate department, as stated under the head of Civil Establishment.

On the 24th May 1887 there were 108 miles of telegraph lines, and on the 31st December 1891 the length had been increased to 265 miles. Since the 1st June 1891 considerable attention has been paid to the condition of the lines, and whereas before that date interruptions of communication were of frequent occurrence they are now rare. The lines are in good order, and the service is satisfactory.

The several Government offices in Accra are connected by telephone to a central exchange (18 connexions) with which exchange also the Government Sanitarium at Aburi—a distance of 26 miles—is in telephonic communication.

The Government accepts the cable messages of the African Direct Telegraph Company at all its offices, and also undertakes the delivery of such messages. In 1892 808 cablegrams of the value of 1,822*l.* 7*s.* 0*d.* were accepted while 708 such telegrams were delivered.

The following table shows the progress of the telegraphs since May 24th 1887:—

Year.	Number of Offices.	Miles of Wire.	Number of Telegrams dealt with.				Receipts.		
			Public.	Government.	Cable.	Totals.	Inland Telegrams.	For Cable Company.	Totals.
							£ s. d.	£ s. d.	£ s. d.
1887 -	9	108	4,399	17,130	—	21,529	252 0 9	—	252 0 9
1888 -	1	178	9,243	27,223	—	36,466	518 7 0	—	518 7 0
1889 -	11	178	14,493	22,481	715	37,689	786 1 0	904 4 7	1,690 5 7
1890 -	12	178	17,722	22,286	1,029	41,037	927 6 0	1,233 13 3	2,260 19 3
1891 -	13	210	17,513	21,157	1,274	39,944	1,015 10 9	1,586 17 1	2,692 7 10
1892 -	16	265	19,773	25,365	1,516	46,654	1,182 18 4	1,822 7 0	3,005 5 4

The telegraph lines run along the coast from Kwitta on the one side to Axim on the other (on the 31st December 1892 the extension to Axim had not been quite completed, but the line was open to the public as far as Dixcove) and there is a line to the Hill station and Government Sanitarium at Aburi. Steps are about to be taken to extend the telegraphs from Kwitta to Danoe, and to erect a new line from Ada to the Government station at Akuse with an extension thence to Kpong.

INTERNAL COMMUNICATION.

There are very few roads worthy of the name, and communication between the trade ports and the interior is for the most part maintained by native tracks either cleared of bush by the Native Chiefs at fitful intervals or kept more or less clear by the traffic passing over them. Within the immediate neighbourhood of the several Government stations these bush tracks are as a rule in fair order, the Native Chiefs being under the more direct supervision of the District Commissioner, but even then considerable difficulty often occurs in getting the chiefs to clear away the bush which in a tropical climate grows with such rapidity; and in the rainy seasons the tracks being by constant use more concave than convex become, where they pass through low-lying land, conduits for the surface drainage of the surrounding country and almost useless for traffic. In one or two isolated cases the chiefs have converted their tracks into fair roads, but such action on their part has either been brought about by an energetic Commissioner or by pressure on the part of the Government accompanied by a present of money.

The only roads in the Colony which may be fairly so designated are those which are entirely under Government supervision. These are the road between Accra and Christiansborg, a distance of 2¾ miles, and the road from the latter place to the Government Sanitarium at Aburi, a distance of 26 miles. In addition to these two Government roads, the military road between Cape Coast and Prahsu; the road from Aburi through Akwapim and Eastern and Western Krobo to Kpong and Akuse; and the road from Chama to Tarkwa (Lower Wassaw) are all under more or less constant Government supervision and on that account are either in good order or two or three stages in advance of the native bush tracks. In Akwamu and British Krepi the bush tracks are well looked after by the native Chiefs and could be converted into roads without much difficulty.

The native Chiefs who can be induced to keep their tracks clear of bush and passable for traders and travellers at all periods of the year are paid 10*s.* a quarter per mile, and cutlasses and hatchets are loaned to them by the Government to assist them in the work. In recent years a road overseer has been appointed in each Commissioner's district for the purpose of inspecting the

tracks and enabling the Government to know by trustworthy reports that the Chiefs have fairly earned their road subsidies.

On the 15th February 1890 an officer was specially appointed Inspector of Trade Roads. Under his supervision the native track between Anyako, a town on the lagoon behind Kwitta and Beve, a distance of 25 miles inland, was in 1890–91 converted into a road, and a similar process is now being applied to the much frequented coast track between the towns of Cape Coast and Anamaboe.

On the 10th and 14th August 1892 two additional officers were respectively appointed Sub-inspectors of Trade Roads, and on the 26th October 1892 a third Sub-Inspector was appointed. These officers have been supplied with gangs of labourers and have been employed on the Cape Coast Prahsu military road and the trade track from Cape Coast to Denkera and Sefwhi.

The country is intersected by several rivers, the principal of which are the Volta, Prah, and Ankobra. The Volta and Ankobra are extensively used as trade waterways. They are navigable for steam launches from 80 to 100 miles, but their upper reaches are obstructed by rapids, and throughout their courses navigation is frequently rendered difficult by the prevalence of rocks and snags. The trade in timber which is now springing into existence has brought the rivers of the Colony under notice as important means of communication with the coast.

The question of intersecting the country with light railways has been under consideration, and has advanced to the stage of a preliminary survey of the country for that purpose. On the 5th February 1893 Captain Lang, R.E., the officer selected for this special work, arrived in the Colony, and in company with Mr. Foord, a Civil Engineer experienced in railway work, proceeded to commence the survey, including the selection of a suitable place on the coast for conversion into a harbour for the landing of heavy material required for the construction and working of the lines. At present along the whole surf-bound coast line of the Colony there is no harbour of any kind and no quay which lighters and launches can run alongside with heavy material and stores. All goods and stores are at present landed in surf boats, often at great difficulty on account of the surf, and the question of the best way of providing means to ensure the safe unloading of heavy material into lighters, and of facilities for unloading the lighters themselves, necessarily obtrudes itself in connection with the laying down and working of lines of railway in the Colony.

GENERAL REMARKS.

Under the head of agriculture I have stated that the soil of the Gold Coast is admirably adapted to the cultivation of a vast quantity of products of market value. Equally with other tropical countries the soil is varied and practically inexhaustible.

GOLD COAST. 1892.

Against the development of the Colony by means of English capital there lies upon it the stigma of a baneful climate. But I cannot help thinking that by clearing the waterways of the Colony and thus improving the drainage of the country, by converting the bush tracks into decent roads and so improving the ventilation of the country, by a gradual conversion of the dense bush into cultivated areas, by the enforcement in the interior towns and villages of the sanitary laws which have proved so useful and advantageous in the coast towns, and by improving the means of transport, thereby enabling Europeans resident at a distance from the trade ports to have ready access to good food and the various comforts of civilization to which they have been accustomed and which they more than ever want in a tropical country, the climate of the Gold Coast will lose its notoriety and the country will become, equally with other tropical countries, a safe means for the investment of capital.

The greatest hindrance to the rapid development of trade is the want of proper means of transport. So long as every gallon of palm oil, every hundredweight of rubber, every fathom of cloth, and every pound of gunpowder has to be carried on men's heads to and from the interior, the amount of trade must necessarily be narrowed, and will be confined to those articles which can be transported by the primitive means in force or which will bear the heavy increase of price entailed by the cost of carriage. The construction of roads from the trade ports through the oil and rubber producing districts to the interior, the formation of a harbour where heavy goods can be safely disembarked and landed, and the laying down of lines of light railway in those parts of the country where there is reasonable possibility of a paying traffic will, besides opening up a country with a potentiality of wealth sufficient to make the Colony rich and prosperous, have the effect of increasing commerce, civilizing the natives, and implanting in their minds new wants for the gratification of which they will be aroused to industry.

(Signed) F. M. HODGSON,
Colonial Secretary.

Sir W. B. GRIFFITH to the MARQUESS OF RIPON.

Government House, Christiansborg Castle,
Accra, February 22, 1895.

MY LORD,

I HAVE the honour to transmit herewith to your Lordship a report on the Blue Book for the year 1893 which I received from the Colonial Secretary on the 21st instant.

2. The report affords the fullest evidence of the attention, care, and pains which Mr. Hodgson has taken in its preparation. It is very full, and I may say exhaustive, with reference to the various matters touched upon in it, and will afford very useful information to those who take an interest in the Gold Coast, as indicating the immense progress which has been made in the Colony of late years, of its great yielding power as regards exports, and of its capacity to consume vast quantities of imports:—

	£	s.	d.
The first of these being for the year under notice represented by - -	718,353	0	0
and the exports by - - -	722,106	0	0
Making a total volume of trade for 1893 of - - - -	1,440,459	0	0

the highest amount ever reached; whilst the five years from 1880 to 1893 show a steady increase in the value of both imports and exports, except as regards 1892, when there was a falling off of 19,000*l.* in the exports. I will not enter further into details because these are given with such fulness and value in the report that I should simply be repeating a portion of it unnecessarily.

GOLD COAST. 1893.

3. There are one or two points, however, relative to which I think I should make some remarks, especially with regard to the financial position of the Colony.

	£	s.	d.
The revenue in 1892 was - -	183,075	0	0
In 1893 - - - -	201,783	0	0
Showing an increase in the revenue of 1893 of - - - -	18,708	0	0

over that of 1892, or over 10 per cent., whilst, after allowing for the expenditure of the year, a balance remained on hand on 31st December 1893, of 175,615*l.*, whilst the Colony is entirely free from debt, and to show how light the pressure of taxation is upon the people of this country, I would mention that in 1893, with the increased revenue, it was only 2*s.* 8*d.*, per head.

4. Your Lordship will observe under the head of "Local Revenue" the remarks which the Colonial Secretary has made relative to the question of the application of the municipal system of government to Accra, the capital town of the Colony, and the larger and more important of the coast towns, which he states cannot much longer be deferred, and in this regard your Lordship will have had before you a Towns Council Ordinance, which was prepared chiefly by Mr. Ashmore, the late Acting Colonial Secretary of this Colony, based upon his experience of the advantage to all parties of corresponding legislation in the Island of Ceylon. Some of the people here have been stirred up into opposition to putting the machinery of this Ordinance into motion, and I do not propose to take any action with regard to it until your Lordship shall have had an opportunity of seeing the objections that have been taken to the Ordinance, but I do not hesitate to state, in passing, that the movement has proceeded solely from interested persons possessed of property as well as from some of the European traders who have instigated the natives to opposition, all parties being more or less opposed to any legislation—and it is not surprising that they should be—which is calculated to inflict the slightest tax upon them.

5. Your Lordship will observe in the concluding paragraph of Mr. Hodgson's able and interesting paper the expression of his regret that this report on the Blue Book for 1893 should have been so delayed, and he points out the reason for this in the fact that he was away on leave of absence from the 11th March to the 20th of November and found on his return that the work of writing the report had not been taken up. This is explained by the circumstance that Mr. Ashmore, who acted temporarily for Mr. Hodgson during his absence, was a good deal away from headquarters with me between August and November. He, therefore, had not time to take up and deal with the Blue Book for 1893 as he had fully intended, and whilst I have no doubt that from his great ability and quick grasp of points and circum-

stances he would no doubt have produced a very able report, yet he could not have brought to bear upon it the experience of 1893 which the Colonial Secretary possessed, because during hewhole of that year Mr. Hodgson was resident in the Colony, and therefore would be more at home with the numerous subjects to be dealt with in the report than an Acting Officer who was only in the Colony for a little over eight months. But, my Lord, although the report has been delayed, I trust your Lordship will kindly make allowance for this in view of the circumstances out of which the delay arose.

I have, &c.

W. BRANDFORD GRIFFITH,
Governor.

REPORT ON THE BLUE BOOK FOR THE YEAR 1893.

REVENUE AND EXPENDITURE.

Revenue.

During the year 1893 taxation, and duties remained as they were in 1892, and the growth in the prosperity of the Colony is shown by the Revenue having reached a total of 201,782*l.* 17*s.* 2*d.*, which is the largest sum collected in any one year in the history of the Gold Coast. In 1892 the Revenue amounted to 183,074*l.* 11*s.* 1*d.*, so that for the year under review the increase in the revenue was at the rate of 10 per cent.

The items of revenue may be properly classified and compared with those of 1892 as shown in the following table :—

Items of Revenue.	1892.			1893.		
	£	s.	d.	£	s.	d.
Wines, Spirits, Tobacco, Guns, &c., (specific)	133,448	1	10	144,907	1	9
General Merchandize (ad valorem) -	28,322	15	0	32,812	7	9
Liquor Licenses - - - -	5,597	10	0	5,482	10	0
Stamps, (Postal, Telegraph and Revenue)	6,686	9	5	7,352	1	8

Although complaints have been made to the Government from time to time that the 10 per cent. ad valorem duty on general merchandize is too high, the trade in this description of goods increased from 283,227*l.* 10*s.* 0*d.* in 1892 to 328,123*l.* 17*s.* 6*d.*, in 1893, or no less than 15·85 per cent. The only valid argument against the duty in a country like the Gold Coast, where direct taxation in the Interior towns is impracticable and where the native can only be got at for taxing purposes by a duty on such articles as experience shows he is inclined to purchase, is that it causes trade to be either stationary or retrogressive. This argument does not hold good as regards the Gold Coast at present, and as the country becomes more and more exploited there will be a less tendency to its existence. The merchants, it is true, feel the incidence of the tax in the first instance because it is from them that the Government collects it; but they are not slow to throw the burden off their shoulders, and, when trade is brisk, the money paid to the Government soon comes back to them; the burden is lost in being disseminated throughout the population in infinitesimal proportions. I showed in my report for 1892 that taxation in the Gold Coast Colony amounted only to 2*s.* 5*d.* a head. It amounted in 1893 to 2*s.* 8*d.* a head, and no one can say that this is any burden at all on the people of the Protectorate, for whom the Government provides security for life and property, education for those who choose to take it, and as many of the advantages of civilization as possible.

The specific duties, which are levied on luxuries (wine, spirits, tobacco, &c.) amounted to no less a sum than 144,907*l.* 1*s.* 9*d.*, being an increase of 8·58 per cent. over the amount collected in 1892. This again is an indication of the increasing prosperity of the inhabitants of the Colony.

Expenditure.

The expenditure, although showing an increase of 20,830*l.* 14*s.* 9*d.*, being 178,934*l.* 11*s.* 5*d.* in 1893 as against 158,103*l.* 16*s.* 9*d.* in 1892, was less than the revenue of the year by as much as 22,848*l.* 5*s.* 9*d.* The principal cause of the increase in expenditure was the commencement, and in some cases completion, of public works of utility.

Public Debt.

At present there is none, but it is not improbable that the time is approaching for adding the Gold Coast to the list of British Colonies borrowing money in the English market, inasmuch as such works as a harbour, the construction of railways into the interior, and the clearance of waterways, are pressing forward for attention, and must be taken up if the Gold Coast is to range itself with the Colonies which command the attention of capitalists.

Local Revenue.

The application of the municipal system of government to Accra, the capital town of the Colony, and to the larger and more important of the Coast Towns cannot much longer be deferred. It is desirable that the people should be taught, and made to understand, their obligations in the general system of government, and there can be no better way of doing this than in showing them how, with a very moderate direct taxation, they can obtain the increased comfort which proper sanitation, good streets, a satisfactory water supply, and so forth, will bestow upon them. Hitherto the fact that there is so small a number of educated people in each town has blocked the introduction of a system of local government, but with the spread of education this obstacle is being rapidly removed.

MILITARY AND POLICE FORCES.

The total cost of the Hausa Military Force was 37,204*l.* 19*s.* 9*d.*, being an increase on the previous year of 1,654*l.* 3*s.* 3*d.* which is almost wholly accounted for by the purchase of additional machine guns and ammunition.

Authority was obtained for increasing the Volunteer Force from 100 to 300 men by raising one additional company at Accra and two companies at Cape Coast. The Volunteer movement has proved most popular among the educated Natives and no difficulty whatever was experienced in obtaining the requisite number of recruits, as many as 120 having been enrolled in Cape Coast in the course of a few days. Apart from the fact that the Natives who join the Volunteer Force are taught habits of punctuality, obedience, and discipline which cannot fail to be of use to them in civil life, besides the usual military duties which fit them to take their place as part of the defensive force of the Colony, the Volunteer movement is a means of bringing together men of different tribes and various views, and giving them a common standpoint from which to sink their differences and do some work for the good of their country.

A scheme for improving the efficiency of the Police Force, which has for some time been far from satisfactory, has been drawn up and the introduction of the scheme will, it is hoped, result in the Force becoming more efficient and reliable.

Towards the end of September it became apparent that King Prempeh (Kwaku Dua III) of Ashanti, whose army had defeated the Nkoranzas, a tribe which had recently revolted from the Ashanti confederation, meditated a descent upon Attabubu, a country which the Government had taken into the Protectorate by a treaty dated the 25th November 1890. The Attabubus are one of the Brong tribes living to the north-east of the country of Ashanti. These tribes until the Ashanti War of 1873–74 were subservient to Ashanti, and King Prempeh having succesfully overthrown in turn all those tribes of the confederation which had favoured the

claims of his rival, Prince Atcheriboanda, namely, the Kokofus, Mampons, Nsutas, Dadiassis and Nkwantas, conceived the idea of re-asserting the power of Ashanti over the Brong tribes and of regaining the allegiance of the King of Attabubu, against whose treaty with this Government he had always protested.

The Kumasi army was composed of contingents from Mampon, Nsuta (the people of those two Ashanti tribes had returned to their respective countries and had given in their allegiance to King Prempeh) Ofinsu, Adjisu, Abiasim, the small tributary countries of Kumawu, Agogo, Kwamen, and Asokori, as well as a contingent from the King of Juabin under Ampetsi, a son of King Asafu Ajei, who died in exile at Lagos. The whole force was placed under the Kumasi General, Amankwatia Kwamin, whose intentions were expressed in the following oath which he swore before the King at a great council held at Kumasi for the purpose of deciding upon the final arrangements :—

"I will proceed to Nkoranza or wherever the King of Nkoranza may be and bring him to you. I will visit Brumasi ; I will take my breast plates ('osen') from the Kings of Prang, Yeji, and Gwan. I will encamp at Attabubu, where the shady trees will give shelter to my troops, and on my return I will bring Attabubu, Nkoranza, and all the Brong nation with me to you as part of your Kingdom by conquest."

Brumasi, Prang, Yeji, Gwan and Attabubu are, it may be stated, the principal Brong tribes, and the King of Nkoranza with a large number of his people had upon his defeat taken refuge with those tribes.

To prevent the Ashanti Army overrunning Attabubu, whose King had sent urgent messages to the Government for succour, a strong force of Hausas, under the command of the Inspector-General of Constabulary, Colonel Sir Francis Scott, was despatched from Accra, the advance guard starting on the 2nd October. On the arrival of the Hausas in Attabubu, the King of Ashanti, to whom at the same time a letter of warning had been addressed, withdrew his army to Kumasi, fearing that he might have to act on the defensive. The year closed with the Hausa Force still in Attabubu, the main body at the town of that name, and detachments in the frontier towns of Amantin and Bompata, both on roads leading to Kumasi.

PUBLIC WORKS.

The sum spent under this head amounted to 30,047*l.* 1*s.* 1*d.*, as against 16,608*l.* 16*s.* 3*d.* in 1892. Among the public works undertaken during the year were the erection of market sheds in the Town of Accra and the construction of a large underground fresh-water tank in connection with them, the survey by Captain Lang, R. E., of a route for the proposed railway from the Coast to the Interior, the survey of the watershed of the river Humo in connection with the question of obtaining a water-supply for the towns of Accra and Christiansborg, the construction of a fresh-water

tank at Saltpond sufficiently large to supply the wants of the people of that town, the improvement of the landing places at Accra and Cape Coast, the erection of gunpowder magazines at Winneba and Kwitta, and of a head treasury at Accra, the commencement of the Queen's warehouse at Accra, and lastly the commencement of the construction of a proper road from Cape Coast to Denkera and so on to Sefwhi.

LEGISLATION.

Ten Ordinances were passed, the principal of which were No. 7, "An Ordinance to enable the Governor to issue Commissions of enquiry with special powers;" and No. 8 "An Ordinance "to regulate the relations between employers and employed, "and to control the employment of persons in the Colony for "service out of the Colony."

The latter Ordinance is the first step towards placing the emigration of Natives from the Gold Coast upon a more defined and satisfactory footing than it had been previously.

CIVIL ESTABLISHMENT.

Under this head may be mentioned the sanction to proposals to augment the strength of the roads department which, when carried out, will enable the Government to commence the important work of constructing and maintaining throughout the Colony roads which will be passable for foot traffic throughout the year. Further, the re-arrangement of the Native staff of each department into classes with, in most cases, substantial increases of salary, and the provision of better means of promotion for deserving officers.

SECURITY.

The Public Officers' Guarantee Fund was started on the 1st January for the purpose (as stated in the report on the Colony for 1892) of putting an end to the unsatisfactory arrangement under which the Native officers of the Government had to find two approved sureties in the Colony, unsatisfactory because it placed the officers under obligations to their sureties. There was no defalcation during the year, and the Fund was not called upon to pay away any of its moneys during the first year of its existence.

PENSIONS.

The Pension list during the three years has remained more or less stationary, as the following figures show :—

			£	s.	d.
1888 - - -	22 pensioners,		1,734	7	7
1889 - - -	28	"	2,420	7	2
1890 - - -	30	"	2,471	8	8
1891 - - -	36	"	3,159	13	3
1892 - - -	35	"	3,130	10	0
1893 - - -	36	"	3,148	4	2

Of the 36 pensioners, 1 has drawn his pension for 23 years, 4 for periods varying between 11 and 15 years, 12 between 5 and 10 years, and the remaining 19 for less than 5 years.

POPULATION.

According to the Census taken in 1891, the population of the Gold Coast is given at 1,473,882. The number of professing Christians has been variously estimated but may be taken at a total 37,500, of whom about two-thirds are Wesleyans. During the year 1893 there were 135 marriage licenses issued, being an increase of 25 over the previous year and an increase of 63 per cent. in a period of five years, as shown by the following figures :—

1889	83
1890	93
1891	94
1892	110
1893	135

EDUCATION.

The educational system of the Colony is based upon an Ordinance passed on the 28th September 1887 for the promotion and assistance of education in the Gold Coast Colony and upon rules framed under that Ordinance by a Board of Education and approved on the 4th November 1887.

The business of the Board of Education, which consists of the principal Government officials and representatives of the various missionary bodies engaged in educational work, is to deal with the suggestions of the Director of Education, to receive, consider and confirm his reports, to approve the award of grants made by him, and to decide from time to time the conditions under which the Education Ordinance of the Colony shall be administered.

The schools of the Colony are, nearly without exception, what may be styled "elementary schools," although here and there one or two aspire to the higher title of "grammar" or "boarding" schools; but, even in these, elementary education forms the basis of the instruction given. The schools, of which during the year 1893 there were 67 in existence, divide themselves according to denomination and fall under one of four divisions, viz. :—

	No.
Government Schools	6
Basel Mission School	28
Wesleyan Schools	25
Roman Catholic Schools	8

All these schools are either entirely supported by, or assisted from, Government funds. There are at present no real higher-grade or secondary schools, and no provision yet exists for the training of teachers. These important branches of education are now being considered by the Director of Education and it is hoped that a few years will see, under properly certificated teachers, a complete gradation of schools, from the elementary to the higher grade, where promising pupils may be trained for further European education in the universities.

Although in 1893 only 67 schools were inspected and reported upon, that number by no means represents the total number of schools in the Colony. Each mission engaged in the cause of education, supports, entirely from its own funds, a large number of small schools, situated in the outlying parts of the Colony. These are generally known as "bush" schools; they contain but few children, but, as soon as the minimum number in attendance as fixed by the Board of Education is secured in them, they are brought under the notice of the Board, and as a rule placed upon the list of those in receipt of the Government grants. The Bremen Mission has also a few schools in the Kwitta District which do not, however, receive support from Government funds.

Very much yet remains to be done both with regard to the provision of suitable accommodation for new scholars, and to awaken the mind of the ordinary native to the benefits to be derived from education. The population of the Colony and protected territories is estimated to be about 1½ millions, and allowing, as in England, that one-sixth or about 16 per cent. of the total population, consists of children of school age, there are no less than 250,000 children to be brought within the education field. In such countries as the Gold Coast, the proportion of children to adults is greater than in temperate climates, but, reckoning on the same basis, a glance at the following statistical table will show what has been done and what yet remains to be done in the cause of education. The total number of children under instruction in the aided schools of the Colony during the last five years has been as follows:—

1889	5,038
1890	5,356
1891	6,688
1892	7,572
1893	7,350

but when the small "bush" schools are also taken into account the number of the children under instruction in all schools slightly exceeds 10,000 so that, at present, only 7 per 1,000 of the population, instead of 160 per 1,000 are under instruction. No further words are needed to show what remains to be done.

The following statistical table shows the distribution of the children in the assisted schools, under their various denominations, for the past five years:—

Year.	Government Schools.			Wesleyan Schools.			Basel Mission Schools.			Roman Catholic Schools.			Bremen Mission.		
	Boys.	Girls.	Total.	Boys.	Girls.	Total.	Boys.	Girls.	Total.	Boys.	Girls.	Total.	Boys.	Girls.	Total.
1889 - - -	784	215	999	1,620	178	1,798	1,155	531	1,686	364	91	455	92	8	100

1892 - - -	880	218	1,098	2,576	372	2,948	1,412	780	2,192	1,008	181	1,189	—	—	145
1893 - - -	771	203	974	2,214	289	2,503	1,733	960	2,693	819	161	980	No return.		

All the ordinary elementary subjects are taught in the schools, and in many cases English is the only language employed, though in some cases English and the vernacular are taught side by side, and in a very few instances instruction is given in the vernacular only.

In addition to the elementary and class subjects thus taught, the scholars in the more advanced schools receive instruction in book-keeping, shorthand, singing by note, and drill, and in the case of girls, needlework and household work in all its branches. The technical part of instruction is not neglected, for in connection with some of the leading schools there are classes for tuition in wood-carving, carpentry, smith-work, and practical husbandry.

An annual competitive exhibition is held in Accra, at which prizes are awarded by the Committee for the best specimens of school work in all its branches.

Infant schools are much needed in the Colony, where the large numbers of young children who flock to the schools could receive instruction suitable to their age and be trained upon the kindergarten system for entrance into the senior schools. Kindergarten teaching is gradually spreading, but suffers from the want of trained teachers.

In 1891, penny banks were established by the Government, and since that time have steadily increased, both in the number of depositors and in the amounts deposited. The total number of depositors and the amount standing in their names at December 31st 1893 is as follows:—

School Savings Bank.

School.	Total No. of Depositors on 31st December 1892.	Total sum to credit of Depositors. £	s.	d.
Accra:				
Government	196	26	16	4½
Wesleyan	85	5	15	11
Basel	34	1	2	1
Cape Coast:				
Government	104	6	0	4
Wesleyan	63	0	14	0
Elmina:				
Roman Catholic	49	1	5	5
Saltpond:				
Wesleyan	52	1	7	9
Winneba:				
Wesleyan	117	1	11	9
	700	44	13	7½

The following table shows the proportion of grants earned by the various educational bodies for the past five years :—

Mission.	1889.	1890.	1891.	1892.	1893.
	£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.
Wesleyan - -	304 13 6	580 14 0	691 0 0	1,060 6 0	1182 5 6
Basel - - -	490 11 0	627 8 6	618 9 0	671 18 6	805 18 6
Roman Catholic -	58 19 6	148 6 0	334 12 0	435 2 0	473 16 0
Bremen - -	62 5 0	No grants awarded.			
£	916 9 0	1,356 8 6	1,644 1 0	2,167 6 6	2462 0 0

Increased educational activity is apparent on all sides in the efforts of the various missions to increase the number, and to improve the efficiency, of the schools under their control. New schools are being established in some of the wilder parts of the Colony, the existing "bush" schools are growing in size and gradually being added to the list of Government assisted schools, plans for the establishment of secondary and technical schools are being discussed, and a scholarship scheme, drafted by his Excellency the Governor, is under consideration.

TRADE.

IMPORTS AND EXPORTS.

The total value of the Gold Coast trade amounted in 1893 to 1,440,460*l.* 3*s.* 4*d.* of which 718,353*l.* 4*s.* 3*d.* represented the value of the imports and 722,106*l.* 19*s.* 1*d.* that of the exports. A comparison of these figures with those of 1892 and previous years indicates a very substantial increase in the volume of trade.

The following tables show the distribution of trade during the past five years :—

Imports.

Year.	From the United Kingdom.	From British Colonies.	From Foreign Countries.	Total.
	£ s. d.	£ s. d.	£ s. d.	£ s. d.
1889 - -	340,111 2 1	8,828 12 11	91,928 14 3	440,868 9 3

GOLD COAST. 1893.

The import of rum and alcoholic liquors has increased by as much as 15½ per cent., as shown by the following comparative statement:—

—	1892.	1893.	Increase.
	Gallons.	Gallons.	Gallons.
Rum - - -	1,029,114	1,147,676	118,562
Gin and Geneva - -	220,322	294,687	74,365
Whiskey - - -	5,054	7,391	2,337
Brandy - - -	485	830	345
Wines - - -	20,492	24,098	3,606
Ale and Porter - -	19,665	21,949	2,284
Totals - -	1,295,132	1,496,631	201,449

In my report on the Gold Coast for 1892 I pointed out that the consumption of alcoholic liquors by the natives of this part of West Africa was far less than it is in the United Kingdom, and that there is insufficient ground for the contention, so often put forward, that the native is being ruined body and soul by what is stigmatized as the nefarious liquor traffic.

The native knows very well how to take care of himself, and a consumption of less than a gallon of spirits per annum per head of the population, which is what the statistics show, cannot well be considered to be excessive. Assuming that only half the population gets sight and taste of imported alcohol, 1¾ gallons per head per annum would give an infinitesimal daily allowance to each person. I repeat what I have said before, that drunkenness in the Gold Coast is comparatively uncommon and that East of the Volta, where, on account of the low duties, rum can be purchased for threepence a bottle, and where, therefore, if the importation of spirits into the midst of the natives has the demoralizing influence so often contended for it, the effect would at once be visible; there is absolutely no increase of drunkenness apparent.

SHIPPING.

The following tables show:—

(A.) The number of steamers and sailing ships which have entered and cleared during the last five years.

(B.) The countries from which they have entered, and

(C.) the countries for which they have cleared.

On the 31st December 1893 there were no less than 20 ports of entry and 24 sufferance wharves for the loading and unloading of vessels, as well as nine sufferance wharves for the shipment only of exports.

AGRICULTURE.

Under this head there is little to add to what was said in the report for the year 1892 (Colonial Reports, No. 88, Gold Coast). The only important advance which has been made in the cultivation of plants of economic value has been with respect to coffee. Several additional coffee plantations of small size have been started by the natives in the country of Akwapim, and the larger plantations in the neighbourhood of Cape Coast, more especially that owned by the Glasgow firm of Messrs. Miller Brothers and Company, are beginning to produce the coffee berry in paying quantities. It will be seen on referring to the table of exports, that the export of coffee has increased from 12,899 lbs. in 1892 to 21,437 lbs. in 1893.

It is satisfactory to note that the export of kola-nuts has increased, the value in 1892 being 1,328*l.* 7*s.* 3*d.*, whereas it was 25,716*l.* 5*s.* 7*d.* in 1893. I stated in my report for 1892 that more would be heard of kola-nuts as an article of export, and there is every reason to suppose that attention is now being given to this valuable commercial product, which is to be found in large quantities in the hinterland of the Gold Coast.

The trade in rubber was very good, as the following comparison with the trade in 1892 shows:—

—	Weight.	Value.		
	lbs.	£	s.	d.
1892 - - - - -	2,663,020	166,659	16	8
1893 - - - - -	3,395,990	218,162	8	3

A good deal of general work has been done in the Government botanical station during the year and considerable attention has been paid to the plantations of coffee and cocoa, in the cultivation of both of which, but more especially the former, the natives appear

to have become interested. Along the road leading from the botanical station through the country of Akwapim to the interior are large numbers of small clearings in which coffee plants, chiefly obtained by purchase from the botanical station, are to be seen in a most flourishing condition. The Liberian coffee plant appears to thrive best, but there are large quantities also of the Arabian coffee-plant, the berry of which, however, is small and apparently deteriorated. It will probably be necessary for the Government at no distant date, if the coffee industry is to be fostered into a trade, to instruct these native cultivators in the proper way of preparing the berry for export. At present the most primitive method is employed. The berries are scraped by hand with a round stone worked in the hollow of a larger stone, and after this process they are washed and dried in the sun. It is obvious that a large crop could not so be dealt with and that the employment of machine y in the near future is imperative. The initiative will have to be taken by the Government, because of the general ignorance on the part of the natives of all machinery, even of the simplest character, and because no single native cultivator possesses sufficient capital, enterprise, or experience to take the matter in hand.

In February many parts of the Colony were visited by large swarms of locusts. At Accra they took about three hours in passing over the town, and at the botanical station some damage was done by them to the plantains. The natives of Accra flocked into the streets and loudly called upon their fetishes for protection, thinking that they were being visited by a supernatural occurrence of fearful magnitude. In the Kwitta district much damage was done to the crops, but, fortunately, in no case do the locusts seem to have regarded the Gold Coast as their proper habitat.

MANUFACTURES, MINES, &C.

The only manufactures carried on by the natives are manufactures which the necessities of life have driven them to undertake. The most important is the manufacture of earthenware pots of various sizes, ranging from a capacity of 4 to 12 gallons, for the purpose of carrying and storing water for drinking and household purposes. These pots are made principally in the country of Shai, which lies behind the trade port of Pram Pram, where the clay is admirably adapted for the purpose. The pots, which in shape are exactly similar to the English glass bowl used by dealers in gold fish, are moulded by hand and shaped by eye. They are baked, in the first instance, and then are subjected to a slow wood fire for three days when, if the latter and important process has been properly carried out, the pots come out black and hard. Before the pots have cooled, each is polished by hand. For this purpose the covering of the palm-kernel is used. This thready covering is heated over

the fire in which the pots have been baked, and is then taken in the palm of the hand and rubbed over the outside of the pots. It acts as a varnish and imparts to the pots a brilliancy which may best be compared to a well-polished fire-grate. The pots are then packed longitudinally, in crates made specially for the purpose and adapted to conveyance as a head load, and are carried to the markets, where there is always a ready sale for them. The market price for these pots ranges from 1*s.* 6*d.* to 3*s.* 6*d.* apiece, according to size.

The drying of fish is also a staple industry of the country. All the large-sized sea fish caught by the coast fishermen are split open and cleaned. They are then closed and kept in salt water for three days until they begin to get putrid—which condition affords the flavour dear to the native—when they are again opened and covered with salt to prevent the presence of flies and other insects. They are then sun-dried and become ready for food.

The herring, which is a common sea fish on the West Coast of Africa, is treated differently. It is not subjected to the cleaning process, as in the case of the bigger fish, but is quickly roasted in clay-made ovens, and then smoked over an open fire, which is arranged in a shallow pit about one foot in depth. Fish are also salted into barrels.

These specially prepared fish are carried to the markets throughout the country, and are a recognised article of native diet. Their presence is soon made apparent, especially in the case of the sun-dried fish, by the putrid smell which arises from them and which, as I have said, is one of the principal attractions to the unsophisticated native.

Baskets and crates adapted for carrying goods on the head are extensively made in every part of the Colony, and on the Coast all the fishermen make their own nets, often from yarn which has been manufactured out of native-grown fibre and cotton.

In many of the villages of Akwapim and Krobo there are blacksmiths' forges, where rough iron-work is turned out, such as door-hinges, door-handles, bolts, window fasteners, and so forth. These forges are the outcome of the excellent instruction imparted by the Basel Missionary Society, which has always insisted in giving the natives a knowledge of some handicraft or industry "pari passu" with the tenets of the Christian faith.

There are no manufactures of export value.

Mining and working for gold is extensively carried on, especially in the countries of Wassaw and Akim. In my report on the Blue Book for 1892, I explained the primitive methods adopted by the natives and I referred also to the operations of the English mining companies in Wassaw. A company is also in course of formation for the purpose of working a concession obtained in the country of Sefwhi.

The following table shows the exports of gold-dust and nuggets from the Colony during the last five years :—

Year.	Weight.	Value.
	Ozs.	£ s. d.
1889 - - - -	28,667	103,200 10 0
1890 - - - -	25,460	91,657 0 0
1891 - - - -	24,476	88,112 0 0
1892 - - - -	27,446	98,805 17 0
1893 - - - -	21,972	79,099 4 0
Totals - - -	128,021	£460,874 11 0

GAOLS AND PRISONERS.

Accordingly to the returns, there were 1,589 persons received into the 13 gaols and lock-ups of the Colony, being an increase of 55 over the number in 1892. The following table shows the figures during the last five years :—

Year.	Males.	Females.	Juveniles.	Totals.
1889 - - -	2,093	148	14	2,255
1890 - - -	1,647	76	9	1,732
1891 - - -	1,677	85	8	1,766
1892 - - -	1,475	48	11	1,534
1893 - - -	1,513	61	15	1,589

The 1,589 persons committed to prison are classified as follows :—

For debt - - - - -	134
For safe custody till trial, or for want of security-	294
For purposes of penal imprisonment - -	1,161

Of the 1,161 committed for penal imprisonment, 1,020 were committed for three months or less, and, of the remainder, 70 were old offenders.

The total cost of the prisons establishment has, during each of the past five years, been as follows :—

1889 - - - - -	4,803 19 9
1890 - - - - -	4,117 8 9
1891 - - - - -	4,230 10 3
1892 - - - - -	5.387 1 8
1893 - - - - -	5,511 8 3

The mark system which was introduced in September 1891 has been found to work excellently. Under this system every convict sentenced to penal servitude or imprisonment for two years or upwards can earn a remission of one-fourth of his sentence by continuous good conduct, and by hard and steady labour. Each convict has his time of detention represented by a certain number of marks which he can earn as follows:—

For a full day's hard and steady labour	- 8	marks
For a less degree of industry -	- 7	"
For a fair but moderate day's work -	- 6	"

these being, of course, combined with good conduct.

The system is carefully explained to each convict upon his entry into prison, and it provides a satisfactory means of punishing convicts by enabling the head of the prisons department to fine a convict a certain number of his marks, and to deprive him, by reason of misconduct, of the whole or portion of any remission of sentence he may have earned.

Gangs of prisoners are employed outside the prisons in sanitary work, at Accra in the Government quarry, in road-cleaning, hauling and breaking stones, and convicts are also taught, inside the two principal prisons, boot-making, carpentering, tailoring, and mat and basket-making.

Besides the 13 Government prisons and lock-ups there were 63 registered native prisons each in charge of the chief of the town in which it situated.

CRIMINAL STATISTICS.

During the year 6,418, offences were reported to the police and of these 6,395 are stated to have been brought before the District Commissioners. The statistics given in the Blue Book show the nature of the offences committed and the number of persons convicted and acquitted.

HOSPITALS.

The Hospital at Kwitta had to be closed in consequence of the building rented for the purpose by the Government having been seriously damaged by unusually high tides. No other suitable building could be obtained.

The accommodation in the Accra hospital was increased from 40 to 46 beds, and that in the Elmina hospital from 30 to 32 beds. A small hospital with four beds was opened at Axim.

There are free dispensaries attached to each hospital, and free dispensaries at the following places, where also a medical officer is stationed:—

Ada; Akuse; Chama; Kwitta; Saltpond; Winneba.

At these dispensaries large numbers of natives are annually treated gratuitously.

During the last five years the following in-patients have been treated in the hospitals :—

Year.	Patients Discharged.				Totals.
	Cured.	Relieved.	Not improved.	Deaths.	
1889 - - -	686	246	32	88	1,052
1890 - - -	769	179	40	47	1,035
1891 - - -	572	212	41	48	873
1892 - - -	840	272	47	71	1,230
1893 - - -	836	294	36	94	1,260

PUBLIC LUNATIC ASYLUM.

A lunatic asylum was established in Accra in 1887, and the following male and female lunatics have been treated in it :—

Year.	Admitted.		Discharged.						Deaths.		Remaining 31st December.	
			Cured.		Relieved.		Not improved.					
	M.	F.	M.	F.	M.	F.	M.	F.	M.	F.	M.	F.
1887 - -	14	5	—	—	1	—	—	—	2	—	11	5
1888 - -	17	3	3	—	—	—	1	—	8	3	16	5
1889 - -	10	3	5	2	—	—	—	—	4	1	17	5
1890 - -	12	—	2	—	1	—	—	—	6	1	20	4
1891 - -	10	3	3	—	—	—	—	—	3	1	24	6

1893 - -	8	4	—	—	5	2	—	—	2	—	32	9

METEOROLOGICAL OBSERVATIONS.

The rainfall at Accra during the last five years has been as follows :—

1889 - - - - - -	25·96 inches.
1890 - - - - - -	29·535 inches.
1891 - - - - - -	28·97 inches.
1892 - - - - - -	29·27 inches.
1893 - - - - - -	28·73 inches.

At the botanical station on the hills at Aburi the rainfall in 1892 was 43·25 inches and in 1893, 61·09.

SAVINGS BANKS.

The natives are slowly but surely recognising the advantages of thrift in the matter of saving their money. The sum standing to the

GOLD COAST. 1893.

credit of depositors in the Government Savings Bank on the 31st December was 3,924*l.* 7*s.* 7*d.*, being an increase over the sum remaining on deposit on the 31st December 1892 of 414*l.* 6*s.* 7*d.* The number of depositors had increased from 264 in 1892 to 279 in 1893.

The following table gives the details of the progress of each bank :—

Bank.	No. of Depositors.		Amount Deposited.

POSTAL AND TELEGRAPH STATISTICS.

Postal.

On the 1st March the system of remitting money between one part of the Colony and another by means of postal orders of fixed values was brought into operation, and during the ten months orders were sold of the total value of 1,231*l.* 3*s.* 6*d.*

An overland mail service between the Gold Coast and the French Protectorate of Assinie has been established and additional facilities have been given in connection with the despatch and receipt of parcels.

The work of the post-office department is increasing very rapidly, as is shown by the following comparative statement of the transactions of the past five years and is another sign of the progress of the Colony :—

Year.	No. of Post Offices.	Estimated No. of Letters, &c. Posted.	No. of Money Order Offices.	Money Orders issued.				Parcels.	
				Inland.		Foreign.		Number received.	Number Despatched.
				No.	Value.	No.	Value.

347

Telegraphs.

On the 24th May 1887, the date on which the telegraph wires were made available for public use, there were nine telegraph offices and 108 miles of telegraph lines. On 31st December 1893 the length of line had been increased to 368 miles, and the number of telegraph offices to 18. The extension of the telegraphs to Axim has been completed and a line has been constructed from Ada, on the coast, to Akuse, a town on the River Volta and the headquarters of the Commissioner of the Volta River District. This latter line has been further extended to Kpong, a large trading town on the river.

The telegraph system has also been joined with that of the German Colony of Togoland, which is thus afforded access with Europe by means of the Gold Coast Government lines and the cables of the African Direct Telegraph Company, whose office is at Accra. The handing-over station for the Gold Coast and Togoland telegraph system is Danoe, a town on the Gold Coast side of the frontier.

During the year, a total of 60,031 telegrams was dealt with, of which 29,968 emanated from the public, yielding a revenue of 1,822*l.* 7*s.* 0*d.* The sum of 2,466*l.* 7*s.* 7*d.*, was collected for 1,104 messages destined for transmission over the cables of the African Direct Telegraph Company, and 930 messages were received from that Company for transmission to various places in the Colony; on these messages a terminal rate of 2*d.* a word is charged.

The following table shows the progress of the telegraphs since May 1887 :—

Year.	Number of Offices.	Miles of Wire.	Number of Telegrams dealt with.				Receipts.		
			Public.	Government.	Cable.	Totals.	Inland Telegrams.	For Cable Company.	Totals.
							£ s. d.	£ s. d.	£ s. d.
1887 -	9	108	4,399	17,130	—	21,529	252 0 9	—	252 0 9
1888 -	11	178	9,243	27,223	—	36,466	518 7 0	—	518 7 0
1889 -	11	178	14,493	22,481	715	37,689	786 1 0	904 4 7	1,690 5 7
1890 -	12	178	17,722	22,286	1,029	41,037	927 6 0	1,233 13 3	2,260 19 3
1891 -	13	210	17,513	21,157	1,274	39,944	1,015 10 9	1,586 17 1	2,602 7 10
1892 -	16	265	19,773	25,365	1,516	46,654	1,182 18 4	1,822 7 0	3,005 5 4
1893 -	18	368	27,934	30,063	2,034	60,031	1,822 7 0	2,466 7 7	4,288 14 7

The several Government offices in Accra are connected by telephone to a central exchange (20 connections) with which exchange also the Government Sanatorium at Aburi, a distance of 26 miles, is in telephonic communication.

INTERNAL COMMUNICATION.

Very little practical work was done during the year towards permanently improving the road communication of the Colony. The arrangements for the organization of a roads department were, however, carefully considered and worked out, and upon the arrival of trained men from England it is intended that this important matter shall be taken in hand. The present tracks are for the most part mere gullies, worn by continuous foot-traffic, which during the rains become almost impassable. It is hoped that when these tracks are widened, their trace and gradient made easier, the waterways which cross them permanently bridged, and the swamps made passable at all seasons, the natives will be induced to adopt some form of wheeled transport which will render possible a material development of the trade with the interior. It is not intended to construct great highways or even second or third-class roads, in the sense in which such works are understood in more civilized countries, but to construct, and keep in order when constructed, roads which can be used by traders and travellers at all periods of the year, and roads which, as the wants of the natives progress, can be developed into something better.

It is calculated that there are some 800 miles of what may be called main trade roads to be constructed, and, taking one road with another, the cost per mile will be 100*l.* There are also many important branch roads which will be taken in hand later.

The survey for a railway from the coast to the interior was proceeded with under Captain Lang, R.E., assisted by Mr. Foord, who upon Captain Lang's services being enlisted in connection with the expedition into Attabubu referred to under the head of "Military and Police Forces" took charge of the work until its completion early in 1894. The district selected for the railway is through the oil-producing countries of Mankessim, Edjumaku, and Essikuma, and so up to Insuaim, the capital town of the country of Western Akim, or as it is better known by the natives, Kotiko. It is geographically the most central town of the Colony and on that account is suitable as a converging point for branch railways.

GENERAL REMARKS.

There is no doubt that during the year under review a steady advance has been made in the prosperity of the Colony. Trade has been good, reaching in value a total of 1,440,460*l.* 3*s.* 4*d.*, there is a balance to the credit of the Colony of 175,615*l.* 2*s.* 4*d.*, available in great part for the carrying out of long-conceived public works of importance, and of improving and extending

communication, sanitation, and education, three important factors in the welfare of a country and its people, and, finally, the various tribes within the Protectorate have been at peace. The only disturbing element has been the restlessness of the kingdom of Ashanti, the King of which country, knowing that his position as King paramount of the Ashanti confederation is precarious (he has never been formally elected, and holds his position by force of arms), keeps his people in a constant state of petty warfare to prevent attention being turned to the legality of his claims. This state of things, always intolerable on account of the disturbance of trade, was aggravated by the designs of the King (Kwaku Dua III.) upon the country of Attabubu, as shown under the head of "Military and Civil Forces."

Signs are not wanting, however, that the sanguinary rule of this monarch is nearing its end. Already the power of the Government is being felt by the Ashantis, and it is hoped that a peaceful solution may be found to the question as to the best way of curbing the savage rule and influence of the Ashanti kingdom, and of putting an end to the degrading custom of human sacrifices, which, no matter what may be said to the contrary, are, it is known, carried on to the same extent now as in years past.

I regret extremely that this report on the statistics of the Blue Book for 1893 should have been so delayed, as delay lessens its value, and detracts from any interest which might otherwise attach to it. I was, however, on leave of absence from the 11th March to the 20th November 1894, and found on my return to the Gold Coast that the work of writing a report had not been taken up.

F. M. HODGSON,
Colonial Secretary.

GOLD COAST.

[For Report for 1893, *see* No. 136.]

GOVERNOR MAXWELL to Mr. CHAMBERLAIN.

Government House, Christiansborg Castle,
Accra, October 2, 1895.

SIR,

I HAVE the honour to transmit to you the report in anticipation of the Blue Book for 1894, which I am required by Section 271 of the Colonial Regulations to furnish in order that it may be laid before Parliament. The report has been prepared by the Colonial Secretary.

I have, &c.
WILLIAM MAXWELL.

REPORT ON THE BLUE BOOK OF GOLD COAST COLONY FOR THE YEAR 1894.

TAXES AND DUTIES.

In the third paragraph of the report on the Blue Book for the year 1892, reference was made to the reduction from the 1st May 1890 of the duties upon spirits, tobacco, and gunpowder, and the exemption from duty of all merchandize elsewhere subject to an ad valorem duty of 10 per cent. imported into the Gold Coast eastward of the Volta, and it was stated that this measure was rendered necessary by trade having been attracted to the neighbouring German Colony of Togoland in consequence of the lower duties levied in that Colony. This action had the almost immediate effect of rehabilitating the trade of the ports of Adda and Kwitta, and rendered it necessary for the German Government on their part to take steps to put a stop to the serious loss of revenue which they at once commenced to sustain. To further reduce their tariff was out of the question: it was already too low to give the Colony a sufficient revenue to meet necessary expenditure. The remedy lay only in the establishment of a Customs Union with the Gold Coast. This was proposed and the proposal met with success. On the 24th February 1894, a Convention was signed at Berlin "to assure the development of Commerce "within the territories of either state on the Gold and Slave "Coasts."

2. It was arranged that the tariff fixed by the Convention, which it was stipulated should apply only to that part of the

Gold Coast lying eastward of the Volta, should come into force on the 1st May 1894. Accordingly, from that date the following changes were made :—

The duty on gin, brandy, rum, liqueurs, and strong drinks of all kinds, was raised from 5½*d.* to 9¾*d.* per old wine gallon :

Tobacco from 1¼*d.* to 2¾*d.* per lb.

Gunpowder from 5*s.* per 100 lbs. to 1*s.* per lb. (reduced from the 1st June to 6*d.* lb.) and firearms from 1*s.* to 2*s.* each.

Further, an ad valorem duty of 4 per cent. was placed upon the principal articles of other merchandize, an arrangement which, so far as the Gold Coast is concerned, re-introduced the state of things existing with regard to such goods prior to the 1st January 1888.

3. The Convention is to remain in force until the 1st May 1896, and thereafter until either contracting party shall terminate it by giving six months notice of their desire to do so. An important feature of the Convention is the following stipulation :—

"The contracting Powers expressly bind themselves to abstain from influencing the natives in any unjustifiable or arbitrary manner in regard to their choice of places of buying and selling, and they will use their best endeavours to prevent such pressure being applied by traders or others."

4. The fiscal arrangements in respect of the Gold Coast Colony irrespective of the comparatively small portion of it lying eastward of the Volta have remained unchanged.

REVENUE AND EXPENDITURE.

Revenue.

5. The revenue for the year shows that the general trade of the Colony has been maintained, and is in a satisfactory condition. It amounted to 218,261*l.* 5*s.* 7*d.*, being an increase of 16,478*l.* 8*s.* 5*d.* over the revenue of 1893, which amounted to 201,782*l.* 17*s.* 2*d.*

6. In the following table the revenue is classified under the principal heads and compared with that of 1893:—

Items of revenue.	1893.	1894.	Increase.
	£ s. d.	£ s. d.	£ s. d.
Duties on wines, spirits, tobacco, guns, &c. (Specific).	144,907 1 9	154,155 14 3	9,248 12 6
Duties on general merchandize (ad valorem).	32,812 7 9	36,993 1 9	4,180 14 0
Liquor licenses - - - -	5,482 10 0	5,800 0 0	317 10 0
Stamps (postal, telegraph and revenue).	7,352 1 8	9,744 15 6	2,392 13 10
Other items - - - -	*11,228 16 0	†11,567 14 1	338 18 1
Total Revenue - - £	201,782 17 2	218,261 5 7	16,478 8 5

* Includes 4,972*l.* 8*s.* 9*d.* interest on investments.
† Includes 5,181*l.* 16*s.* 7*d.* interest on investments.

7. Taking the population of the Gold Coast at 1,500,000, as estimated from the Census returns of 1891, the taxation in respect of the year 1894 amounted to 2*s.* 10½*d.* per head.

Expenditure.

8. Expenditure shows a large increase as compared with previous years. It amounted to 226,931*l.* 19*s.* 4*d.*, being 8,670*l.* 13*s.* 9*d.* in excess of the revenue for the year, and 47,997*l.* 7*s.* 11*d.* more than that of 1893. The principal items of increase are public works, upon which a sum of 54,163*l.* 0*s.* 3*d.* was spent, (being 24,015*l.* 19*s.* 2*d.* more than the expenditure in 1893,) and the expedition in defence of the protected district of Attabubu against an Ashanti invasion which cost 10,778*l.* 11*s.* and which is referred to in the Report on the Blue Book for 1893 and at paragraph 13 of this report.

ASSETS AND LIABILITIES.

9. The Gold Coast Colony has no public debt and the net amount of assets which on the 31st December 1893 amounted to 175,615*l.* 2*s.* 4*d.* stood on the 31st December 1894 at 166,944*l.* 8*s.* 7*d.*

MUNICIPALITIES.

10. An Ordinance to provide for the establishment of town councils in the towns of the Colony was passed on the 14th November 1894. It supersedes and repeals the Municipalities Ordinance, 1889, which, for reasons given in previous reports, was never brought into force, and is designed to provide a means of starting town councils under Government supervision. The main features of the Ordinance are that one-half the members of the council shall be official members, and shall include the District Commissioner, who shall be ex-officio president and treasurer of the council, power to levy a rate not exceeding 5 per cent. on every house the rateable value of which is not less than 2*l.* a year, and the administration by the council, instead of by the Government, of the following Ordinances :—

Sales by Auction Ordinance, 1878,
Spirit License Ordinance, 1887,
Towns Ordinance, 1892;

the revenue derivable from these Ordinances being placed in the hands of the council for purposes of municipal administration.

11. Opposition to the measure at once manifested itself; it took the form of the old dislike to direct taxation, and, in addition, an adverse opinion to the constitution of the council, and the insufficiency of revenue provided by the Government to supplement direct taxation. An influential and representative deputation waited on the Governor to express its views, when it was argued

that councils constituted on the lines laid down in the Ordinance would not be representative in character, that they should be in the hands of the representatives of the people who would have to pay the taxes, that the people were not as yet ripe for town councils, that the revenue would be insufficient to take in hand such schemes of urgency as the provision of a good water supply and the improvement of sanitary arrangements, and that towns in which town Councils were to be started should first have these two named essentials provided by the Government, leaving to the councils the work of carrying them on efficiently.

12. There is perhaps some force in these arguments, but it is desirable to educate the people in the art of self-government, and it is not improbable that opposition to the Ordinance will die out, and that town councils will become popular institutions, once they are started and the people see that direct taxation will fall upon the persons who can afford to pay and not, as they fear, upon the poorer classes who inhabit mud huts, which, with very few exceptions, are unlikely to come up to the rateable standard.

MILITARY AND POLICE FORCES.

13. The commencement of the year found the larger part of the Hausa force in Attabubu. It had been sent for the defence of that district of the Protectorate in October 1893 upon its becoming known that the Ashanti army, under the Kumasi General, Amankwatia Kwamin, had received instructions, after the successful termination of the war with Nkoranza, to make a descent on Attabubu, and to bring the Attabubus and other neighbouring Brong tribes into subjection to Ashanti. The Ashanti army was withdrawn to Kumasi upon the arrival of the Hausas; and, as soon as it became clear that the designs against Attabubu had been abandoned, the main body of the Hausa force returned to Accra, but not until after treaties of friendship and freedom of trade had been made with the Brong tribes and also with the Nkoranzas. Small detachments of Hausas were left at Bompata and Agogo, the latter being a tributary country to Ashanti, the king of which, in consequence of the presence of the Government forces in the neighbourhood, had been emboldened to shake off his allegiance and make overtures for inclusion within the Protectorate.

14. The result of the campaign was not satisfactory to the Ashantis. They discovered that their movements were well known to the Government of the Gold Coast, that they were unable to impinge upon the Protectorate with impunity, and that they could not deal with Attabubu as they had dealt with Adansi, a country which until the Ashanti war of 1873–74 had been tributary to Ashanti, but had by the terms of the treaty signed at Fomana been made an independent, or, as it was called, a "buffer," country between the Protectorate and Ashanti (in 1887 the Bekwai contingent of the Ashanti army routed the Adansis and drove them

into the Protectorate where their blind King, Inkansa, and his principal adherents have since lived in exile, waiting for the time when Ashanti shall cease to be an independent power and they can return in safety to their country. Further, instead of the subjection of the Brong tribes, these tribes as well as the tributary country of Nkoranza made treaties with the Government, and in that way cut themselves further adrift from the tyrannical rule to which they had so long been compulsorily subjected.

15. Arrangements are being matured for the formation of a reserve of Hausas by encouraging men of good character to settle in the vicinity of Accra, instead of returning to their country upon the receipt of their discharge, and the gratuity which length of service with the Hausa Constabulary has earned for them. It is proposed to give each man a grant of land upon certain conditions, which will include attendance at a fixed number of drills with target practice annually. The necessary tract of land has been acquired for the purpose.

16. The efficiency of the volunteers was maintained. The force, which is armed with the Martini-Henri rifle, numbers 300 rank and file, and consists of two detachments, one of 180 in strength at Accra, and one of 120 at Cape Coast. At head-quarters (Accra) there is a stretcher party, composed of dispensers and other employés of the medical department, as well as a squad of signallers taken from the Government and Cable Company's telegraph staff.

17. On the 30th June an Ordinance was passed for the purpose of separating the police force from the Hausa Constabulary, and placing the former on an entirely different footing to that which had previously obtained. The force has now its own organisation and officers, and will, it is hoped, become an efficient body.

PUBLIC WORKS.

18. There wasconsiderable activity with regard to public works, many long contemplated and necessary works having been either completed or commenced during the year. Of the total expenditure of 54,163*l.* on the Public Works Department about 40,000*l.* must be set down to these works. Included in them is the survey of the route for a railway from the coast to the interior to which reference is made later under the head of "Railways, Roads, and Telegraphs."

LEGISLATION.

19. Seventeen Ordinances were passed during the year, the most important being the following:—

No. 2. An Ordinance to regulate the importation of folded woven goods. It has for many years been the custom for

woven goods to be sent to West Africa for sale folded in certain lengths, and the native, uneducated in the matter of measures, knew that in purchasing such goods he would receive material of a length known to him. It was his practice to count the folds. Latterly he has been imposed upon. Unscrupulous traders had their woven goods manufactured so as to show no signs of alteration, but these, when unrolled, gave deficient lengths, thus defrauding the purchaser.

The Ordinance was passed to protect the native and to render such frauds penal.

No. 3. An Ordinance to change the duties of Customs payable on certain imports into those parts of the Colony and Protected territories lying to the eastward of the river Volta, and to impose duties of Customs on certain other such imports.

This Ordinance was passed in order to give effect to a Convention signed at Berlin on the 24th February 1894, for the purpose of establishing a Customs Union between that part of the Colony lying eastward of the Volta and the German Colony of Togoland. Reference has already been made to the establishment of the Customs Union in paragraphs 1, 2, and 3 of this report.

No. 6. An Ordinance relating to the Civil Police of the Gold Coast Colony. Under this Ordinance the police force is constituted a body separate from the Hausa Constabulary, and is provided with organization, discipline, and general powers.

No. 9. An Ordinance to provide for the publication of a collected and revised edition of the Ordinances of the Colony.

There have been so many additions in recent years to the laws of the Colony, and so many alterations in, and amendments of, old Ordinances, that a collected and revised edition of the Ordinances has become an absolute necessity.

It is hoped that the work will be shortly completed and ready for publication.

No. 13. An Ordinance to provide for the better maintenance of the roads of the Colony.

This Ordinance repeals the Public Labour Ordinance, 1883, which was so drastic in the clauses referring to compulsory labour as to prove quite unworkable. Compulsion is now limited to labour on the public roads.

No. 17. An Ordinance to provide for the establishment of town councils in the towns of the Colony.

This Ordinance has been referred to in paragraph 10 under the head of municipalities.

POPULATION.

20. The action of the Liberian Government in placing a poll-tax upon Kroomen who leave their country to labour elsewhere has restricted the supply of these industrious African natives, who are truly the coolies of West Africa, and has forced upon the attention of the Government the question of forming Kroo settlements on the Gold Coast.

By nature docile, tractable, and not fastidious as to their surroundings, these hardy West Africans have all the elements of easy colonization. Moreover, as they are West Africans, all risk of failure as regards climate which has to be run in connection with the immigration of Chinese, Zanzibaris, Indian Coolies, or any race of men other than West Africans, is avoided.

21. It is a disappointing fact that, as yet, reliance cannot be placed upon the native of the Gold Coast to give employers of labour continuous and honest service, and that for work which is of a continuous character, such as the work of the gold mining companies, the construction of roads, and so forth, a nucleus of imported labour is necessary. The native cannot free himself from certain native customs at which he considers his presence imperative, as, for example, the annual festivities of his town known as the Yam custom, which takes place after the in-gathering of the food-crops, and which never lasts less than two weeks, and, above all, the numerous funeral customs, absence from which would be interpreted as a slight upon the family of the deceased to be visited upon the head of the culprit at the first fitting opportunity. Natives from a far country come emancipated from such trammels, and so are in a position to give continuous labour. When the native ceases to regard labour as derogatory, ceases to consider it necessary to show that he is an independent and free man by quitting his employment without regard to the interests of his employers, and ceases to be bound by his old-time native customs, the competition of aliens will no longer be necessary, as the country teems with a population capable, if properly directed, of giving their strength to the development of its resources.

22. The number of Christian marriages celebrated in the Colony during the year was 159, being an increase of 24 over the number celebrated in 1893. The numbers during the last six years have been as follows:—

1889 - - - - -	83
1890 - - - - -	93
1891 - - - - -	94
1892 - - - - -	110
1893 - - - - -	135
1894 - - - - -	159
Total Christian marriages in six years -	674

23. The population according to the Census returns taken in 1891 is 1,473,882 and the Christians are estimated at 37,500.

EDUCATION.

24. A new code has been drawn up for the purpose of increasing the efficiency of the elementary schools, and at the same time of pushing the important work of education. It has not as yet come into operation, but is before the managers of schools for their consideration.

25. The number of schools in the Colony under Government supervision and receiving grants in aid was 77, being an increase or 10 in the number for 1893. They are shown as follows:—

Government schools - - -	7
Basel Mission schools - - -	30
Wesleyan Mission schools - - -	28
Roman Catholic schools - - -	12

26. In connection with these schools, eight penny saving banks are in existence, and a library has been started in the Accra Government school for the use of past and present scholars. It is intended to start a library also in connection with the Government schools at Cape Coast.

27. The total number of children under instruction in the aided schools during the last six years has been as follows:—

1889 - - - - -	5,038
1890 - - - - -	5,356
1891 - - - - -	6,678
1892 - - - - -	7,572
1893 - - - - -	7,150
1894 - - - - -	7,689

and the following table shows the distribution of the children:—

Year.	Government Schools.			Wesleyan Mission Schools.			Basel Mission Schools.			Roman Catholic Schools.			Bremen Mission Schools.		
	Boys.	Girls.	Total.	Boys.	Girls.	Total.	Boys.	Girls.	Total.	Boys.	Girls.	Total.	Boys.	Girls.	Total.
1889 - - -	784	215	999	1,620	178	1,798	1,155	531	1,686	364	91	455	92	8	100
1890 - - -	683	201	884	1,769	203	1,972	1,282	615	1,897	432	86	518	68	17	85
1891 - - -	818	231	1,049	2,019	223	2,242	1,424	780	2,204	807	222	1,029	128	26	154
1892 - - -	880	218	1,098	2,576	372	2,948	1,412	780	2,192	1,008	181	1,189	—	—	—
1893 - - -	771	203	974	2,214	289	2,503	1,733	960	2,693	819	161	980	—	—	—
1894 - - -	784	205	989	2,789	384	3,173	1,363	943	2,306	1,089	132	1,221	—	—	—

28. The schools of the Colony may be divided into three classes :—

(*a.*) Those in which all instruction is imparted in the English language,

(*b.*) Those in which instruction is imparted partly in English and partly in the vernacular, and

(*c.*) Those in which the vernacular only is employed.

The schools which can be included in the first heading are almost entirely those in the principal towns on the sea-board, where contact with English-speaking people has given the natives a knowledge of the language.

29. The majority of the children attending the schools are, it must be noted with regret, in the lower school standards, and of these the greater number are in the "infant" classes. The attendance in the higher standards has hitherto been comparatively small.

30. In the more advanced schools, book-keeping, shorthand, singing by note, and drill, are taught to the boys, and needle-work and household work to the girls, classes for tuition in wood-carving, carpentry, smith-work and practical husbandry, being also held in connection with some of the schools.

31. It has been proposed to send a certain number of selected native lads to England to undergo a special training to fit them to act as working foremen in the Public Works Department or as engineers in connection with the contemplated railway.

TRADE.

IMPORTS AND EXPORTS.

32. The trade of the Gold Coast is rapidly increasing. It amounted in value in 1894 to 1,663,173*l.* 19*s.* 9*d.* of which 812,830*l.* 8*s.* 10*d.* represented the value of the imports and 850,343*l.* 10*s.* 11*d.* that of the exports. The bulk of the trade is with the United Kingdom, as shown by the following comparative tables :—

Imports.

Year.	From the United Kingdom.	From British Colonies.	From Foreign Countries.	Totals.
	£ s. d.	£ s. d.	£ s. d.	£ s. d.
*1890 - -	422,739 14 6	5,861 0 4	133,502 1 6	562,102 16 4
1891 - -	483,392 18 3	5,085 6 10	177,302 17 11	665,781 3 0
1892 - -	407,037 16 10	9,924 13 11	180,132 1 8	597,094 12 5
1893 - -	524,036 16 1	8,719 5 10	185,597 2 4	718,353 4 3
1894 - -	582,273 14 8	13,168 14 1	217,388 0 1	812,830 8 10

* Present tariff brought into force on the 1st January 1890.

Exports.

Year.	From the United Kingdom.	From British Colonies.	From Foreign Countries.	Totals.
	£ s. d.	£ s. d.	£ s. d.	£ s. d.
1890 - -	494,237 1 11	643 19 2	106,467 8 5	601,348 9 6
1891 - -	545,492 16 6	2,035 5 0	136,776 18 2	684,304 19 8
1892 - -	471,218 19 10	2,053 13 9	191,791 9 8	665,064 3 3
1893 - -	530,300 1 5	27,016 16 7	164,790 1 1	722,106 19 1
1894 - -	608,258 6 7	29,765 3 1	212,320 1 3	850,343 10 11

33. It will be seen from these two tables that, while the trade with the United Kingdom has increased from 1,054,336*l.* 17*s.* 6*d.* in 1893 to 1,190,532*l.* 1*s.* 3*d.* in 1894, or roughly 13 per cent., the trade with foreign countries has increased upwards of 22 per cent., namely, from 350,387*l.* 3*s.* 5*d.* to 429,708*l.* 1*s.* 4*d.* The latter increase is almost entirely confined to the trade with the United States, Germany, and France, as shown by the following figures:—

—	Imports.			Exports.		
	1893.	1894.	Increase.	1893.	1894.	Increase.
	£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.
United States -	65,220 0 8	79,112 13 7	13,892 12 11	9,929 11 5	27,868 19 9	17,939 8 4
Germany -	77,304 10 0	87,966 6 3	10,661 16 3	96,785 8 4	104,987 1 11	8,201 13 7
France - -	17,667 7 5	16,550 9 11	Decrease. 1,116 17 6	49,834 16 11	71,127 0	21,292 3 10

The trade of the Gold Coast during the last five years is shown as follows:—

Year.	Imports.		Exports.	Totals.
	Paying Duty.	Admitted Free		
	£ s. d.	£ s. d.	£ s. d.	£ s. d.
1890 - - - -	347,480 17 10	214,621 18 6	601,348 9 6	1,163,451 3 10
1891 - - - -	464,188 1 7	201,593 1 5	684,304 19 8	1,350,086 2 8
1892 - - - -	422,026 8 1	175,068 4 4	665,064 3 3	1,262,064 3 3
1893 - - - -	475,346 15 8	243,006 8 7	722,106 19 1	1,440,460 3 4
1894 - - - -	607,109 7 2	205,721 1 8	850,343 10 11	1,663,173 19 9

35. The principal articles of trade are:—

Imports.—Cotton, woollen, and silk goods, spirits, hardware and cooper's stores, rice, flour, provisions, tobacco, building materials, and wearing apparel.

Exports.—Palm oil, palm kernels, rubber, gold dust, timber, kola nuts, and monkey skins.

GOLD COAST. 1894.

36. The liquor traffic is shown by the following comparative statement, from which it will be seen that the trade has decreased to the extent of 146,182 old wine gallons, the decrease in the trade in rum being particularly noticeable :—

Description of Liquor.	Quantity Imported.		Increase.	Decrease.
	1893.	1894.		
	Old Wine Gall.	Old Wine Galls.	Old Wine Galls.	Old Wine Galls.
Rum - - -	1,147,676	985,121	—	162,555
Gin and Geneva -	294,687	317,778	23,091	—
Whisky - -	7,391	7,720	329	—
Brandy - -	830	875	45	—
Wines - - -	24,098	20,619	—	3,479
Ale and porter -	21,949	18,947	—	3,002
Liqueurs, &c. - -	3,564	2,953	—	611
Totals - -	1,499,801	1,354,013	23,465	169,647
	Total Decrease in 1894 - - - -			146,182

With the total consumption of alcoholic drink in 1894 of 1,354,000 old wine gallons, or 1,083,200 Imperial gallons, it may safely be said that, after allowing for the quantity which finds its way into countries beyond the boundaries of the Protectorate, and, taking the population of the Gold Coast at the census estimate of 1,473,882, the consumption does not exceed five-sixths of an Imperial gallon per head.

37. The following table shows that the staple articles of export, palm oil and palm kernels, have satisfactorily increased, thus indicating that the native has done more work during the year under review, and perhaps also that the action of the Government in improving the road communication with the trade ports is beginning to have its natural result :—

Year.	Palm Oil.		Palm Kernels.	
	Gallons.	Value.	Tons.	Value.
		£ s. d.		£ s. d.
1894 - - - -	4,213,935	237,623 3 9	17,136	112,373 6 1
1893 - - - -	3,417,306	183,909 14 10	12,041	80,721 8 11
Increase - - -	796,629	53,713 8 11	5,095	31,651 17 2

38. On the other hand, rubber shows a falling off of 368,463 lbs., the exports in 1894 having been 3,027,527 lbs., as against 3,395,950 lbs. in 1893. Notwithstanding this falling off, more rubber was collected in 1894 than in any previous year, excepting

1890 and 1893, and the decline may be traceable to the disturbance of trade in Ashanti (where large quantities of rubber are collected), arising from the petty war between King Prempeh of Kumasi and the Nkoranzas, and from the state of unrest which prevails in Ashanti, which deters many native rubber collectors from proceeding to that country.

39. There has been a most satisfactory increase in the export of mahogany and other valuable woods of the Colony, and the timber trade may now be regarded as established.

The growth of this trade is clearly shown by the following figures:—

Year.	Quantity.	Value.
		£ s. d.
1890 - -	6,375	510 18 0
1891 - -	1,350,226	22,096 12 5
1892 - -	2,130,614	36,407 6 0
1893 - -	3,412,486	50,428 9 4
1894 - -	3,012,670	69,405 13 10

40. Very satisfactory and gratifying progress has been made in what may be called the minor industries of the Colony, namely cocoa, coffee, guinea grains, and kola nuts.

The exports of these articles of commerce were as follows:—

Year.	Cocoa.		Coffee.		Guinea Grains.		Kola Nuts.	
	lbs.	Value.	lbs.	Value.	lbs.	Value.	Packages.	Value.
		£ s d.		£ s. d.		£ s. d.		£ s. d.
1894 -	20,312	546 17 4	41,488	1,265 3 4	174,412	1,186 17 4	1,202	28,511 18 11
1893 -	3,460	93 17 10	21,437	630 13 3	83,224	661 2 3	979	25,716 5 7
Increase	16,852	452 19 6	20,051	634 10 1	91,188	525 15 1	223	2,795 13 4

41. The increase in the exports of cocoa and coffee is directly traceable to the impetus given to the cultivation of those valuable economic products by the establishment of the Government Botanical Station at Aburi in 1890. The whole of the cocoa of 1894 and by far the greater quantity of coffee was, it may be stated, exported to Germany.

42. The kola nut is a very valuable product, and its cultivation should be carefully encouraged. Its use as a food of high sustaining qualities has long been known to the Mohammedan Hausa tribes in the Hinterland of West Africa, and it is believed that on account of these qualities a preparation of the nut now forms a reserve

ration in the German army when on active service. It is a product the export of which will most certainly increase.

43. The slaughter of monkeys continues, no fewer than 168,405 skins, of the total value of 41,001*l.* 14*s.* 10*d.*, having been exported from the Gold Coast during the year.

44. It is satisfactory to note that the export of ground-nuts has commenced, 706 lbs. having been shipped of the total value of 20*l.* 17*s.*

SHIPPING.

45. There has been a marked increase in the number of steamers carrying merchandize to and from the Gold Coast, due partly to the fact that a new line of steamers (General Steam Navigation Company), has entered into competition for the West African trade, and partly to the expansion of trade. The following comparative statement will be of interest:—

Nationality of Vessel.	Sailing Vessels.				Steamers.			
	1893.		1894.		1893.		1894.	
	No.	Tonnage.	No.	Tonnage.	No.	Tonnage.	No.	Tonnage.
Great Britain - - -	6	1,583	4	691	200	274,493	261	353,002
Germany - - -	7	1,494	—	—	81	86,539	90	108,192
France - - - -	3	1,664	4	1,900	36	43,099	43	49,765
Italy - - - -	7	3,198	9	3,064	—	—	—	—
United States - - -	8	2,492	7	3,370	—	—	—	—
Other nations - - -	1	277	—	—	2	1,232	1	1,008
Totals - - -	32	10,708	24	9,025	319	405,354	395	511,967

AGRICULTURE.

46. The more or less reckless manner in which the Native Kings and Chiefs have granted concessions of large tracts of land under their charge to persons, native as well as European, who have come to them armed only with a handful of silver and the bare statement that they were desirous of mining for gold or trading in mahogany, and the disputes which are arising in consequence of the same land being conceded to more than one company or individual, have attracted the attention of the Government to the necessity of taking steps to ensure that the land shall not be locked up and rendered unavailable to legitimate traders and bonâ fide capitalists on the one hand, and used solely to the advantage of the greedy adventurer without regard to the improvement of the condition of the people who dwell upon the land, on the other.

47. The staple food crops of the country, as stated in the report on the Blue Book for 1892, are maize, plantains, yams, cassada, ground nuts, and in some districts rice. No means are known to the native of fertilizing the soil. He shifts frequently from one spot to another, preparing, and, if necessary, clearing, sufficient ground for his purpose.

48. In many parts of the country the crops have been seriously interfered with by locusts, and the natives have been forced to buy maize imported from Lagos and elsewhere. It has not as yet been shown that the locusts are likely to be a standing menace to the Gold Coast, and no action with respect to them has therefore been taken. The natives themselves adopt no means to destroy either the locusts or the eggs which they lay, and it is probable that unless concerted action were taken any measures which they might adopt in individual places would not be of much use. The difficulty of dealing with the pests is well known. Various methods, direct and indirect, have been suggested. With regard to the former, Monsieur Decaux, a member of the Entomological Society of France, in a paper which he read at the Congres des Sociétés Savantes, in 1894, pointed out how ineffectual were extraordinary measures of destruction employed against the "*Acridium peregrinum.*" In 1890–91, although 87,000 men, furnishing 4,500,000 days of labour and 20,000 Cypriot screens were employed in Algeria, these means did not prevent further damage to agriculture in 1892 and 1893. Of indirect methods, the most popular is the increase of the natural enemies of the insects such as quails, starlings, and toads. It has been found, too, that there is a parasite which is developed with the eggs of the locusts and which feeds upon and destroys the locust when hatched. The propagation of this parasite has been recommended.

49. In 1894 the Government had 43 acres under cultivation at its botanical station on the Aburi Hills. Considerable attention has been paid to the cultivation of coffee and cacao, and, although the former seems to be more attractive to the native, the latter has also been coming into favour. Unfortunately, on account of the cacao having been badly cured, it has not fetched good prices in the English market, and the merchants who buy cacao from the grower have reduced the price from 6*d.* to 4*d.* per lb. The Curator of the Botanical Station has, however, given instruction to several of the native planters as to the proper method of curing, and it is hoped that better results will now obtain. It is a good sign to find that the Basel Mission, which has done such excellent work in the Gold Coast in teaching handicrafts and proper methods of agriculture to the natives, has now, in connection with some of its schools, formed small plantations of coffee, cacao, and arrowroot for the purpose of teaching the children how to plant and cure in accordance with the methods practised in the Government Botanical Station.

GOLD COAST. 1894.

50. The weather during the year was not favourable to agricultural enterprise, the rainfall having been unusually small. At the Government Botanical Station there were only 81 days of rain and the total rainfall for the year was 40·64 inches.

51. A system of apprenticeship has been established at the Botanical Station in order to give promising native youths instruction in agriculture, and by thus disseminating a knowledge of the value of economic plants and of a proper system of cultivation and preparation for export to induce the native to turn his attention to other means of earning a livelihood than the gathering of palm kernels and rubber. The arrangement has not been long enough in operation to see whether it is likely to be attended with good results, and there is one great difficulty to combat, namely, that manual labour, and more especially manual labour in connection with agriculture, is regarded as the work of slaves, from the universal practice in former years of employing the slaves of a family upon the family plantations. That product of education, the dignity of labour, is unknown to the West African.

MANUFACTURES, MINES, &c.

52. It has long been thought that petroleum springs existed in Apollonia, and in 1894 Mr. W. S. Haig, C.E., was sent out by an English syndicate for the purpose of examining some springs which had been discovered there, and of reporting upon their value. The report was most favourable, and two large sample barrels of crude oil obtained and forwarded to England were sold at the rate of 70*s*. per ton. The fact that the springs are within two miles of the coast makes them particularly advantageous for working, and it is not improbable that the attention of capitalists may be attracted to this new form of industry.

53. The year has not been a good one for the gold mining industry. From various causes, the total output has been less than in previous years, and the export of gold dust from the Gold Coast shows a further decline. The recorded output of the mining companies was as follows:—

Name.	Amount.	Value.		
	oz.	£	*s.*	*d.*
Tarkwa and Abosso -	4,490	16,166	5	0
Cie Appantoo - -	2,367	8,521	4	0
Adja Bippo - - -	3,645	13,120	15	1
Cinnamon Bippo - -	383	1,377	9	9
Totals - -	10,885	39,185	13	10

54. The following table shows the exports of gold, irrespective of gold specie, from the Colony since 1889 :—

Year.	Weight.	Value.		
	Ozs.	£	s.	d.
1889 - - -	28,667	103,200	10	0
1890 - - -	25,460	91,657	0	0
1891 - - -	24,476	88,112	0	0
1892 - - -	27,446	98,805	17	0
1893 - - -	21,972	79,099	4	0
1894 - - -	21,332	76,795	17	5

55. In 1889 an Ordinance (which came into force by proclamation on the 15th October) was passed to demonetize gold dust and nuggets, which until then had been accepted as a legal tender at the fixed value of 3*l.* 12*s.* 0*d.* per oz. Merchants still, however, accept gold dust and nuggets in the way of trade, and during 1894 as much as 10,447 ounces were so accepted of the value of 37,610*l.* 3*s.* 7*d.*

56. The number of persons employed in the gold mines fluctuates, but may be put down at 22 Europeans and 2,400 natives.

GAOLS AND PRISONERS.

57. There were 1,644 persons received into the 13 gaols and lock-ups in the Colony, being an increase of 55 over the number in 1893. The following table gives statistics for the last five years :—

Year.	Males.	Females.	Juveniles.	Totals.
1890 - - -	1,647	76	9	1,732
1891 - - -	1,677	85	8	1,766
1892 - - -	1,475	48	11	1,534
1893 - - -	1,513	61	15	1,589
1894 - - -	1,550	74	20	1,644

The 1,644 persons committed to prison are classified as follows :—

For debt - - - - -	181
For safe custody until trial, or for want of security	379
For purposes of penal imprisonment - -	1,084

58. Of the 1,084 committed for penal imprisonment, 954 were committed for three months or less, and, of the remainder, 76 were old offenders.

59. The total cost of the prisons establishment has, during the last five years, been as follows :—

	£	s.	d.
1890 - - - - -	4,117	8	9
1891 - - - - -	4,230	10	3
1892 - - - - -	5,387	1	8
1893 - - - - -	5,511	8	3
1894 - - - - -	5,720	13	1

60. Gangs of prisoners are employed outside the prisons in sanitary work,—at Accra in the Government quarry,—in road cleaning and mending, hauling and breaking stones, and convicts are also taught, inside the two principal gaols, boot-making, carpentering, tailoring, and mat and basket-making.

61. The "mark" system, which was introduced in September 1891, continues to work satisfactorily.

JUDICIAL STATISTICS.

62. During the year, 6,700 offences were reported to the police, being an increase of 272 over the number in 1893. Of these cases, 1,417 were discharged or dismissed, and 4,982 were the subject of summary conviction by District Commissioners.

63. The following return prepared by the late Chief Justice of the Gold Coast (now Chief Justice of Grenada) shows the work which the courts of the Colony have had to deal with during the past four years:—

Year.	Civil Causes.			Criminal Causes.		
	Commenced in District Commissioner's Courts.	Commenced in Divisional Courts.		Summarily disposed of in District Commissioner's Courts.	Fined at the Assizes.	
		Central Province.	Western Province.		Central Province.	Western Province.
1891 - -	2,058	161	186	5,210	113	123
1892 - -	2,546	187	211	5,182	152	83
1893 - -	3,031	156	262	6,226	99	103
1894 - -	4,750	247	201	6,399	124	116

64. In the District Commissioner's courts the civil work has more than doubled itself in three years, and the criminal work has increased by 20 per cent. On the other hand, the work of the judges has not increased *pari passu*, the number of criminal cases being substantially the same in 1891 and 1894, and the civil causes having increased by 29 per cent., namely, from 347 in 1891 to 448 in 1894.

65. In 1894 the Bench was augmented by the appointment of two additional puisne judges, and a Solicitor-General was added to the legal strength of the Colony.

HOSPITALS.

66. Public hospitals are maintained by the Government at Accra, Cape Coast, Elmina, and Axim, and free dispensaries at Ada, Akuse, Chama Kwitta, Saltpond, and Winneba.

67. The hospital at Kwitta, which was located in premises rented by the Government on the beach, and had to be closed in 1893, in consequence of the building having been seriously damaged by unusually high tides, will be re-opened in new premises in 1895. 1,586 persons were admitted into the hospitals during the year, of whom 189 were suffering from contagious diseases and were treated in the contagious diseases hospital.

68. The following table shows the number of in-patients treated in the hospitals during the last five years :—

Year.	Patients Discharged.				Totals.
	Cured.	Relieved.	Not improved.	Deaths.	
1890 - - -	769	179	40	47	1,035
1891 - - -	572	212	41	48	873
1892 - - -	840	272	47	71	1,230
1893 - - -	836	294	36	94	1,260
1894 - - -	1,050	295	32	84	1,461

69. Towards the close of the year, small-pox broke out in many parts of the Colony, and special steps had to be taken to stamp it out. Qualified dispensers were sent through the native villages for the purpose of isolating the cases, vaccinating the people, and instructing them how to prevent the spread of the disease.

70. The months of November and December were most unhealthy for Europeans in the western districts of the Colony, and many deaths occurred from malignant malarial fever.

PUBLIC LUNATIC ASYLUM.

71. The following table shows the number of lunatic patients treated in the Government Lunatic Asylum since its establishment in 1887 :—

Year.	Admitted.		Discharged.						Deaths.		Remaining 31st December.	
			Cured.		Relieved.		Not improved.					
	M.	F.	M.	F.	M.	F.	M.	F.	M.	F.	M.	F.
1887 - -	14	5	—	—	1	—	—	—	2	—	11	5

1894 - -	22	6	—	—	11	—	—	—	3	—	40	15
Total -	114	26	20	2	18	2	2	—	34	7	40	15

METEOROLOGICAL OBSERVATIONS.

72. The rainfall throughout the Colony was much below the average, and at Accra, where meteorological observations are taken, only 23·32 inches were recorded for the whole year. The heaviest fall was in October when there were 9·18 inches, April standing next with 5·04 inches.

73. During the last five years the rainfall at Accra has been as follows:—

1890 - - - - - -	29·53 inches.
1891 - - - - - -	28·97 „
1892 - - - - - -	29·27 „
1893 - - - - - -	28·73 „
1894 - - - - - -	23·32 „

Inland the rainfall is much greater, but no returns are available.

74. Reference is made in paragraph 58 to the rainfall at the Botanical Station on the Aburi Hills.

75. Arrangements are being made for the establishment of meteorological observations at Cape Coast, Axim, Ada, and Kwitta.

76. The shade temperature ranged from 89°·3 to 70°·6, the former being recorded at Accra in January, and the latter in August, the latter maintaining its reputation for being the least hot month in the year, the shade temperature having ranged during that month between 76°·8 and 70°·6.

SAVINGS BANK.

77. Some progress has been made during the year in the great thrift lesson which since 1888 the Government has undertaken to give the natives of the Gold Coast, the number of depositors in the Government Savings Bank having increased from 279 in 1893 to 330 in 1894 and the sum standing to the credit of depositors from 3,924*l.* 7*s.* 6*d.* to 5,162*l.* 1*s.* 10*d.* Of the 330 accounts open on the 31st December 1894, 234 were for sums under 5*l.*

78. The following table shows the position of the Savings Bank at the end of each year of its existence:—

Year.	Balance.	Deposits.	Interest due on Deposits.	Total.	Amounts withdrawn.	Interest paid on Withdrawals.	Total.	Balance.
	£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.
1888 - -	—	993 19 0	7 4 4	1,001 3 4	51 13 0	—	51 13 0	949 10 4
1889 - -	949 10 4	2,663 10 0	40 14 2	3,653 14 6	439 9 0	1 2 7	440 11 7	3,213 2 11
1890 - -	3,213 2 11	1,665 6 8	45 19 11	4,924 9 6	2,705 6 6	3 13 3	2,708 19 9	2,215 9 9
1891 - -	2,215 9 9	3,212 11 2	64 1 7	5,492 2 6	2,331 7 8	9 2 3	2,340 9 11	3,151 12 7
1892 - -	3,151 12 7	3,144 2 8	88 3 0	6,383 18 3	2,865 4 2	9 6 0	2,874 10 2	3,509 8 1
1893 - -	3,509 8 1	3,112 5 6	83 10 9	6,705 4 4	2,776 11 0	4 5 10	2,780 16 10	3,924 7 6
1894 - -	3,924 7 6	5,999 19 7	104 6 11	10,028 14 0	4,860 5 4	6 6 10	4,866 12 2	5,162 1 10

79. The 330 depositors are classified as follows:—

Clerks - - - - -	99
Mechanics - - - - -	121
Officials - - - - -	87
Auctioneers - - - -	1
Friendly societies trustees' accounts, &c. -	22
Total - - - -	330

80. The West African native is in most respects a thriftless person, contented to live only for the present, and happy if with the exercise of a minimum exertion on his part his immediate wants are met. The education which the continuous presence of Europeans in his midst necessarily gives him is gradually but surely revealing to him that he can make his lot happier and his life more pleasant. He is realizing that with money he can improve his house, purchase furniture, and acquire the many things which make for comfort. He is therefore induced to work for wages and become thrifty. The rate of progress in thrift as shown by the Government Savings Bank is to the superficial observer distressingly slow, but the progress is nevertheless sure, and side by side with it is the knowledge that many natives, instead of placing their savings in the bank, employ them in the, to the native, more congenial method of increasing capital by small trading operations, which in this country require only a small cash basis. The African native is not slow to learn once he realizes that to do so is to his advantage, and the time will surely come when the operations of the Government Savings Bank will advance by leaps and bounds.

POSTAL AND TELEGRAPH STATISTICS.

Post Office.

81. There has been a satisfactory increase in all branches of Post Office work. One additional Post Office was opened during the year, making a total of 32 Post Offices throughout the Colony, and the Parcel Post was extended to the Niger Coast Protectorate and Liberia.

82. The following comparative statement shows the progress which has been made:—

Year.	No. of Offices open.	Estimated No. of Letters, &c. Posted.	No. of Registered Articles dealt with.	Money Orders.			Inland Postal Orders.	Parcel Post.		
				No. of Offices open.	Value of Inland Orders.	Value of Foreign Orders.		No. of Offices open.	No. of Parcels.	Receipts.
					£ s. d.	£ s. d.	£ s. d.			£ s. d.
1888 -	17	111,041	7,836	2	1,939 8 2	6,709 3 7	—	3	826	31 19 11
1889 -	26	146,905	9,739	2	1,209 19 1	4,572 2 6	—	3	1,407	55 14 6
1890 -	26	161,726	10,862	2	1,681 11 11	3,481 18 0	—	3	1,902	102 8 9
1891 -	30	205,035	11,227	3	1,985 [illegible] 4	5,142 18 11	—	3	2,368	146 8 9
1892 -	31	225,293	12,362	5	3,193 8 0	7,251 1 11	—	3	2,379	104 19 1
1893 -	31	335,112	15,956	5	3,787 11 2	9,525 13 7	1,231 3 6	7	2,762	216 6 0
1894 -	32	386,028	18,068	5	3,382 9 3	9,888 19 0	2,021 7 6	7	3,224	247 5 3

83. Postal communcation with nearly all parts of the Colony is hampered by the absence of proper roads and bridges. The mails are conveyed on the heads of men who have to traverse sandy soil and rugged tracts of country, and often to wade across running streams, and it is satisfactory to be able to state that, with but few trifling exceptions, the Inland Mail work has been admirably done by natives at an average cost of 1*s.* 4*d.* a day each, or at the all-round rate of 2*d.* per mile.

TELEGRAPH.

84. In the report on the Blue Book of 1893 it was stated that the Government telegraph line had been connected with that of the adjacent German Colony of Togoland, thus affording to that country access with Europe by means of the Gold Coast Government lines and the cables of the African Direct Telegraph Company, whose office is at Accra. The service was commenced on the 15th January 1894, and during the year there were 302 cablegrams exchanged with Togoland, of which number 190 were sent from that country and 112 to it. It is understood that the French Government is constructing telegraph lines in Dahomey which will be extended to Kotenou and Porto Novo, and so onwards to the German frontier, whereby, joining the German line, access will thus be obtained by that Government to the cables of the African Direct Telegraph Company.

85. The question of running a telegraph line along the military road between Cape Coast and Prahsu, and so connecting the latter place with the Government telegraph system, has been considered and the route for the line surveyed. At Prahsu, which lies on the left bank of the Pra, the boundary at that point of the Protectorate, and which is on the high road from Cape Coast to Kumasi, the Government maintains a ferry and a detachment of Hausa Constabulary.

86. There are now 20 Government telegraph stations and 375 miles of line. During the year, 73,776 telegrams of all classes were dealt with, of which number 38,129 messages were inland paid messages, that is to say, private messages sent to and from persons in the Colony. In 1893 the number of inland paid messages was 27, 934, so that in this class of message, which is some index to the spread of education among the people, the increase has been as much as 36 per cent. The revenue from all sources was 2,293*l.* 8*s.* 2*d.*, and the expenditure 5,838*l.* 13*s.* 11*d.*

INTERNAL COMMUNICATION.

87. The survey for the proposed railway which was commenced by Captain Lang, R.E., in 1883 has been completed, and his report was presented on the 18th October 1894. The first route surveyed lies between the coast town of Kormantine and the central town of Insuaim (Western Akim), a distance of 65 miles. It is

recommended, however, that the terminal station should be at Eusa, a small village, two and half miles south of Insuaim, so as to avoid the difficult country which lies between it and Insuaim, and because Eusa is regarded as the better converging point for branch railways in the future. Kormantine, which lies two miles west of the flourishing trade port of Saltpond, was selected in the first instance as being the best starting point on account of its small bay which, by breaking the force of the surf, affords the most suitable means on that part of the coast for landing railway material. Later, Appam, which is a town on the Coast, 24 miles eastward of Saltpond, was suggested as an alternative starting point, and the route thence to Afitri, a place on the Kormantine—Insuaim route, was surveyed. The principal advantage of the Appam route is that the length of the railway would be 10½ miles less than by starting from Kormantine, and the cost of construction considerably reduced. Captain Lang's estimate of the cost of the line starting from Kormantine is 296,180*l.* and from Appam 255,816*l.*

88. The route for the proposed railway was chosen in order to carry the line through a country both fertile and thickly populated, and so to develop the resources of the region through which it passed and to make the line remunerative as quickly as possible. On the other hand, there are many who think that Accra, the head-quarters of the Government, where there is a large amount of fixed capital, should be the starting point of the first railway. The question of gauge is also a matter for serious consideration: that proposed by Captain Lang is 3 feet 6 inches.

89. In the report on the Blue Book for 1892 it was stated that,—

"At present along the whole surf-bound coast line of the Colony there is no harbour of any kind, and no quay which lighters and launches can run alongside with heavy material and stores. All goods and stores are at present landed in surf boats, often at great difficulty on account of the surf, and the question of the best way of providing means to ensure the safe unloading of heavy material into lighters, and of facilities for unloading the lighters themselves, necessarily obtrudes itself in connection with the laying down and working of lines of railway in the Colony."

The question of undertaking railway work and other works involving the use of heavy machinery necessarily forces to the front the almost equally important question of improving the arrangements for the landing and shipment of material and produce. The possibility of a breakwater at Accra, a project which was considered some years ago, and of making it possible for ocean-going steamers to cross the bar of the Volta, are matters which will have to be decided in the near future.*

* Since this was written, the Secretary of State has decided that it is necessary to obtain an authoritative report on the question of the best landing place before the route of the proposed railway can be settled. Messrs. Coode Son and Matthews have accordingly been commissioned to prepare a report, and two engineers selected by them went out in September 1895 to examine the mouth of the Volta and the landing places at Accra, Appam, and any other points to the eastward of Cape Coast which seem likely to offer facilities for the construction of a harbour.

90. Progress in improving road communication between the trade ports and the interior has been slow. It was hoped that the Roads Department, which had been sanctioned in 1893, would have been organised and would have got to work in real earnest before the year came to an end; but it was not until towards the end of the year that a road surveyor and two road constructors arrived in the Colony to supplement the existing staff. Nevertheless, work was commenced on the trade road from Cape Coast through Denkera and Sefwhi, and is being steadily pushed on. The cost of construction has, so far, been more than was anticipated, having averaged about 120*l.* a mile, but after all it is not much in excess of the cost of "maintaining" roads in British Guiana, where, notwithstanding the fact that the existing roads pass through a country comparatively flat, and presenting little or no engineering difficulties, the cost of maintaining 161 miles of road in the year 1893-4 amounted to 18,714*l.*, that is to say, to 116*l.* a mile.

91. The material for the construction of a bridge over the Sweet river, which crosses the coast road between Cape Coast and Elmina, has been ordered, and the bridge will be erected during the year 1895.

92. The importance of improving the means of communication between the trade ports and the interior cannot be overrated. The French on the one side and the Germans on the other have long been striving to divert trade to their ports on the West African Coast, but, with good road communication to the hinterland of the Gold Coast, English merchants will have little to fear. It is a well known fact that the natives buy manufactured goods in the same market where they take their produce, and such is the partiality of the native for merchandise of English manufacture that, once he is given the means of bringing his produce to English ports, he will not fail to avail himself of them. Railways will open up new markets and additional trade, because European merchants will then take their goods by train to the terminal station where they will establish stores for the purpose of trade. A railway from the coast to Insuaim means therefore, in addition to opening up and developing the country through which it passes, the extension of the trade area of the Gold Coast towards the hinterland by at least 60 miles. Colonel Binger, the present Governor of the Ivory Coast, who has travelled through much of the hinterland of West Africa, in the country embraced by the bend of the Niger river, has given an interesting account of the tribes whom he met with there. Mohammedans by religion, more intelligent and industrious by nature than the negro of the coast lands, they have advanced considerably further in civilization. Their wants are more numerous, and they present in every way a prospective source of profit to the English merchant. It is to the trade with these tribes that attention must ultimately turn.

93. During the year the Government has assumed the control of two ferries in Wassaw, one on the Ankobra and the other on the Hooni River. Most of the ferries of the Colony are often so badly worked by the native Chiefs who possess them, and are such

fruitful sources of contention between natives tribes, that the question of the Government either taking charge of them or, at any rate, of those on the principal roads, or of regulating them by law, cannot long be deferred.

GENERAL REMARKS.

94. During the year, three missions were sent to Kumassi with a view to effect arrangements for the establishment of a British residency there, but they proved abortive, and at the end of 1894 no satisfactory arrangement had been arrived at. The many causes of dissatisfaction with the administration at Kumassi which exist remained therefore unremoved.

95. In April, a succession of fires in Accra burnt down by far the larger part of the native huts in the town, and a scheme was formulated for the acquisition of the whole of the burnt area, through which steps were taken to mark out wide streets, and so to effect a long-needed improvement in this town. Many of the natives who were rendered houseless were temporarily accommodated in the large public market sheds which had just been completed and were about to be opened for market purposes. To the persons whose land has been taken it was proposed to give a free allotment upon a large plot of land acquired for the purpose in the immediate vicinity of the town, where, under certain defined conditions, houses might be built. It is hoped that the laying out of wide streets, besides improving the general appearance of the town, will put an end to much of the overcrowding which is such a difficult matter to deal with, and will give ventilation and better sanitation.

96. The question as to the best means to adopt for the purpose of giving the people of the larger coast towns a pure and sufficient water supply has long been under consideration. As regards Accra, it has been proposed that water should be brought into the town from the river Humo, a distance of about six miles. The river has been carefully examined, the route surveyed, and the cost estimated, but the water is not considered to be of a sufficiently satisfactory character to warrant the initial expense and the annual cost of maintaining a pumping station. The employment of wind power has been suggested, but has been reported on adversely. It has also been suggested that water should be brought from the Aburi Hills by gravitation, thus avoiding the large annual cost of maintaining a pumping station.

97. At Saltpond an enterprising firm of Americans has been conducting experiments in boring for water. At present, success has not attended their efforts, owing to insufficiency of apparatus, but the work is still being pursued, and is being watched with considerable interest.

98. The various tribes living within the Protectorate have given no serious trouble. There have been disturbances here and there, but, as a rule, they have lived peaceably among themselves

GOLD COAST. 1894.

and with their neighbours. The last of the political prisoners was released, and Kwabina Edjen, the exiled King of Elmina, (exiled to Sierra Leone in 1883 for complicity in the troubles with Ashanti), was brought back to Elmina amid great rejoicing on the part of the people of that district. Chief Kwabina Atcheri, who had been exiled to Lagos in 1888 in connection with the serious disturbances which took place at Wanki in that year, of which he was the originator, was restored to his country.

99. It has been shown by the trade statistics under the head of "Imports and Exports" that the general prosperity of the Colony has increased. The people are beginning to feel and appreciate the benefits of civilization, and, once the country and its hinterland are opened up to commerce by better means of communication, and the several tribes become more in touch with the governing power, there is absolutely no reason why there should not be an enormous increase in trade, with all the advantages to the native which follow in its train.

F. M. HODGSON,
Colonial Secretary.

No. 189.

GOLD COAST.

[For Report for 1894, *see* No. 158.]

THE ACTING GOVERNOR to Mr. CHAMBERLAIN.

Government House, Accra,
September 30, 1896.

SIR,

I HAVE the honour to transmit to you a report on the Blue Book for 1895. I regret that it has not been in my power to forward the report at an earlier date, but since my arrival in the Colony on the 17th April, I have had so much to do that I have only been able to write it at odd moments.

I have, &c.

F. M. HODGSON,
Acting Governor.

REPORT ON THE BLUE BOOK OF THE GOLD COAST COLONY FOR 1895.

REVENUE AND EXPENDITURE.

Revenue.

There was no change in the general fiscal arrangements of the Colony during the year, and the increased amount of revenue collected shows that trade was not only satisfactory but flourishing. The revenue amounted to 230,075*l.* 12*s.* 10*d.*, being an increase of 11,814*l.* 7*s.* 3*d.* over that of 1894, which amounted to 218,261*l.* 5*s.* 7*d.*

2. The following table gives a comparison of the revenue of the two years classified under the principal heads:—

Items of Revenue.	1894.	1895.	Increase.
	£ s. d.	£ s. d.	£ s. d.
Wines, spirits, tobacco, guns, &c. (specific duties).	154,155 14 3	157,163 0 11	3,007 6 8
General merchandise (ad valorem duty).	36,993 1 9	40,579 17 4	3,586 15 7
Liquor licences - - - -	5,800 0 0	6,347 10 0	547 10 0
Stamps (postal, telegraph and revenue).	9,744 15 6	9,952 14 3	207 18 9
Other items - - - -	*11,567 14 1	†16,032 10 4	4,464 16 3
Total revenue - - -	£218,261 5 7	230,075 12 10	11,814 7 3

* Includes 5,181*l.* 16*s.* 7*d* interest on investments.
† Includes 5,292*l.* 10*s.* 10 interest on investments.

0 94530. Wt. 20348.

GOLD COAST. 1895.

3. Taking the population of the Gold Coast at 1,500,000 as estimated from the census returns of 1891, the taxation per head amounted in 1895 to the small sum of 3*s.* 0¾*d.* The annual increase of taxation per head is roughly at the rate of 2½*d.*, as shown by the following figures:—

	s.	*d.*
1892 - - - - -	2	5
1893 - - - - -	2	8
1894 - - - - -	2	10½
1895 - - - - -	3	0¾

4. In no other Colony of the Empire is the general population so lightly taxed, and the imposition of additional taxes should neither be difficult nor harassing when the time comes, as it will come in the near future, for raising additional revenue to defray the cost of opening up the country by means of roads and railways, of the provision of water supplies at the more important of the trade ports, of the erection of important and long required public buildings, and of such extension of the administrative machinery as the opening up of the country will render necessary.

5. The actual revenue derived from imported alcoholic liquors was 135,220*l.* 3*s.* 9*d.*, being considerably more than half of the total revenue of the Colony. The revenue from the same source in 1894 was 132,261*l.* 17*s.* 2*d.* The revenue from merchandise other than alcoholic liquors was 56,618*l.* 19*s.* 10*d.*, as against 51,922*l* 9*s.* 6*d.* in 1894. Whereas, therefore, by the import of alcoholic liquors the revenue was increased by 2,958*l.* 6*s.* 7*d.*, it is satisfactory to note that the increase from merchandise other than alcoholic liquors was 4,696*l.* 10*s.* 4*d.* The comparison is better shown by the following figures:—

	Increase.
Alcoholic liquors - - - -	2·24
Merchandise other than alcoholic liquors -	9·03

Expenditure.

6. The expenditure amounted to 265,289*l.* 5*s.* 11*d.*, being in excess of the revenue by no less a sum than 35,213*l.* 13*s.* 1*d.*, and more by 38,357*l.* 5*s.* 7*d.* than the expenditure in 1894.

7. Upon public works of all kinds the expenditure, irrespective of salaries of the fixed establishment of the Public Works Department (10,687*l.* 19*s.* 7*d.*), amounted to 39,306*l.* 7*s.* 2*d.*, and upon roads it amounted to 8,343*l.* 13*s.* 9*d.* A sum of 5,699*l.* 2*s.* 4*d.* was spent in the work of education, 8,462*l.* 4*s.* 5*d.* upon telegraphic communication, and 15,618*l.* 1*s.* 6*d.* in connexion with the hospitals, dispensaries, and medical arrangements generally. The armed Hausa constabulary cost the Colony 32,657*l.* 3*s.* 8*d.*, and

the police force 12,845*l.* 5*s.* 5*d.*, while a small part of the expenses of the Ashanti expedition—namely, a sum of 16,279*l.* 11*s.*—was included in the year's expenditure.

ASSETS AND LIABILITIES.

8. The Gold Coast Colony has no public debt, and on the 31st December 1895 the net assets amounted to 143,087*l.* 17*s.* 11*d.*, including the following investments:—

	Value on 31st December.		
	£	*s.*	*d.*
General Account (surplus fund) -	61,574	8	5
Savings Bank Account - -	2,625	17	7
Public Officers' Guarantee Fund -	627	11	2

LOCAL REVENUE.

9. The Ordinance passed on the 14th November 1894, to provide for the establishment of town councils, has not as yet been brought into operation. It is proposed to try the Ordinance tentatively at Accra, where its operation can be watched by the Government, and then to extend the municipal system of administration to other towns, as soon as its success at Accra has been assured and the natives see the advantages which will accrue to them from it.

MILITARY AND POLICE FORCE.

10. The small detachments of Hausas which had been left at Bompata and Agogo, when the Ashantis had withdrawn their army from Nkoranza in 1894, were still at those places at the commencement of the year.

11. In November, the mission of the messengers sent to England by Prempeh, King of Kumasi, having failed, and no notice having been taken by the King of a second message sent to him in September, which he was requested to attend to by the 31st October, a military expedition to Kumasi was decided upon to compel compliance with the demands of Her Majesty's Government. The preparations for the campaign were made with the utmost expedition. Instructions were given for the immediate formation and despatch of a special service corps, and arrangements were made for the West Yorkshire Regiment, then on its way to England, being sent to Cape Coast as well as the West India Regiment from Sierra Leone, and 100 men of the Lagos Hausa Constabulary to reinforce the Hausa Constabulary of the Gold Coast. Orders were also issued by the Admiralty for the assembly of as large a naval force on the Gold Coast as was

possible. Preliminary preparations for the expedition were made in the Colony. Shelter huts and field hospitals were erected at Prahsu, as well as at four places along the road between Cape Coast and that station; a temporary bridge was thrown across the Prah at Prahsu; surf boats for landing the troops were engaged; food supplies ordered, and arrangements matured for the provision of some 8,000 natives as carriers. Steps were also taken to arm the Nkoranzas, who were to accompany the Hausa force destined to march on Kumasi from the north-east.

12. The command of the expedition was entrusted to Colonel Sir Francis Scott, the Inspector-General of the Gold Coast Hausa Constabulary, who, accompanied by the Head Quarter Staff, left England on the 23rd November. The whole of the troops engaged in the expedition had disembarked at Cape Coast by the 28th December, and before the end of the year were on the march to Kumasi.*

13. The civil police force was separated from the Hausa Constabulary by an Ordinance passed on the 30th June 1894. In December the constables stationed at several of the small towns were withdrawn and concentrated in the larger towns. The force suffers from the want of proper police stations, but it is hoped that it will be possible to remedy this want in the near future. The improvement which has been effected in the pay and prospects of the men has had the result of attracting a better and more educated class of men to apply for appointment.

PUBLIC WORKS.

14. A large number of public works were either completed or commenced during the year. Among the former may be mentioned a bridge over the Sweet River on the road between Cape Coast and Elmina, the clearing away of the houses in Accra burnt down by the fire in April 1894 and the marking out of new streets, the church of Accra, and the erection at Accra of a Queen's warehouse and a hospital for the Hausa Constabulary. Among the latter were the erection of an additional building to the Colonial Hospital at Accra, additional bungalows for Government officers, a court-house at Axim, Government officers' quarters at Saltpond, drainage work at Cape Coast, and the improvement and getting into order of the streets of the coast town of Winneba.

LEGISLATION.

15. Nine Ordinances were added to the statute book, and included:—

No. 1. An Ordinance to make better provision for the Registration of Instruments affecting Land in the Colony;

* The result of the expedition is now a matter of history. The force met with no opposition and entered Kumasi on the 17th January, and King Prempeh and his adherents were brought down to the coast, and lodged in Elmina gaol.

No. 2. An Ordinance to amend the Statute Law of the Colony; and

No. 3. An Ordinance to make temporary provision as to compulsory Labour for Public purposes.

Ordinance No. 3 was passed for the purpose of ensuring to the Government a sufficient number of porters for service with the Ashanti Expedition. By native custom it is obligatory on persons of the labouring class to give labour for public purposes on being called upon to do so by their Chiefs or headmen, and the Ordinance followed the lines of native custom, and strengthened the hands of the Chiefs and headmen upon being summoned to provide their quota of porters.

POPULATION.

16. During the year the countries of Nkoranza and Adansi, the former situated to the north and the latter to the south of Ashanti, were included within the protectorate by treaty. The Nkoranza tribe had revolted from the Ashanti confederation in 1892, and had been overcome by the Ashanti army and many of its towns and villages destroyed, including the well-known Mohammedan trading centre of Kintempo. A gradual revival of trade at Kintempo, which is being rebuilt, is now taking place, and it is hoped that with the protection now afforded to the Nkoranzas the trade from the interior, which was diverted by the destruction of the town, will once more flow towards it.

17. The question of forming on the Gold Coast permanent settlements of Kroomen, who are the coolies of West Africa, has been under the consideration of the Government, and steps have been taken to acquire the necessary amount of land for a village site at Accra. An Ordinance dealing with the allotment and regulation of village sites is also in course of preparation, and it is hoped that a start will be made in 1896 towards carrying out this important scheme.

18. The number of Christian marriages celebrated during the year was 124, being a decrease of 35 in the number celebrated in 1894. The numbers during the last six years have been as follows:—

1890	93
1891	94
1892	110
1893	135
1894	159
1895	124
Total Christian marriages in six years	715

19. It is satisfactory to note that the action taken by the Government in 1891, in requiring the establishment of cemeteries in the principal towns and villages, is being appreciated by the natives. Formerly it was the practice of the native to bury his relations within his dwelling house, but this practice is fast becoming a thing of the past, and the cemeteries established by the orders of the Government are now being freely used, many of the graves being marked with rude memorials to distinguish them. Cemeteries are kept up at the expense of the Government in Accra, Christiansborg, Cape Coast, Elmina, and Adda.

20. During the year steps were taken by the Government for the complete suppression of the worship of the Fetish Katawere. This Fetish, which was located in Akim Swaidru, was accredited with powers of life and death, and many a wealthy native fell a victim to its supposed powers, it being a rule that the property of persons stated by the priests to have died by order of the Fetish should be divided between the Fetish priests and the Head Chief of the country. The shrines of the Fetish were broken down, the sacred groves destroyed, and the people delivered from the tyranny of the rapacious priesthood.

EDUCATION.

21. Education in the Gold Coast Colony has made rapid and substantial progress during the past three years, in spite of the many difficulties to be overcome in such a country as West Africa.

22. The lack of properly trained teachers is in itself a great bar to the development of a thoroughly intelligent and useful scheme of instruction, and the various missionary agencies at work in the Colony are under the circumstances to be congratulated upon the results of their labours.

23. Three years ago there were but 72 certified inspected schools in the Colony giving instructions to some 7,350 scholars. There are now 100 such schools, containing 9,954 children in attendance,—an increase of nearly 40 per cent. in the number of schools, and 21 per cent. in the number of children in attendance. The average attendance of the scholars has risen in the same proportion, and the grant awarded by the Government for the past year has reached the sum of 3,179*l.* 6*s.*, a grant equal to a sum of 8*s.* 6*d.* per head for each child examined. The sum awarded by the Government is exclusive of grants for new buildings, repairs to old ones, grants to teachers, and grants towards the purchase of school books, furniture, and general apparatus, and, in addition, the Government entirely supports two of the largest and most efficient schools in the Colony, with 1,328 children in attendance, in addition to schools for the Hausa force and the civil police.

24. The following tabulated statement will show more plainly than words can describe the present position of the various educational agencies now at work in the Colony:—

Denomination.	No. of Schools.	On Rolls.	Average Attendance.	Examined.	Grant Earned.	Per Head.
					£ s. d.	s. d.
Basel Mission - -	33	2,705	2,082	2,472	1,012 19 0	8 2½
Wesleyan Mission -	44	4,044	3,086	3,654	1,396 2 0	7 8
Roman Catholic Mission	16	2,014	1,599	1,571	770 5 0	9 9½
Government Mission -	7	1,191	803	910	—	—
Totals - -	100	9,954	7,570	8,607	3,179 6 0	8 5¼

25. The subjects of instruction include reading, writing, and arithmetic, geography, history, and grammar, whilst in a few of the larger town schools, shorthand, book-keeping, and music are taught.

26. A purely literary education for Gold Coast children would be of little value, and the Government is, therefore, encouraging the missionary agencies to include in the training of the children some one or more of many branches of useful industrial work that will enable the boy when he leaves school to turn his education to some account and to help to develop the resources of his own country.

27. Plantation work in connexion with the schools is extending and flourishing, and already profitable crops of coffee are grown by the scholars at Aburi, Akropong, Begoro, and many other schools in the Akim and Kwahu districts, under the direction of the Basel Mission.

28. At Begoro, too, successful attempts have been made with cacao and the kola nut, and machines have been introduced for the subsequent treatment of the coffee when picked.

29. At Akropong a commencement has been made with carpentry and bookbinding, also under the Basel Mission management, and a most excellent workshop has existed at Christiansborg for many years, where youths who have passed through the Basel Mission schools may receive practical instruction in carpentry and smith's work.

30. Annual examinations of teachers for certificates are held at five centres in the Colony, and during the past two years have been numerously attended. During 1894–95 no less than 93 candidates attended the examinations of whom 26 were successful, and during 1895–96 some 79 candidates were examined, of whom 30 gained certificates. Prizes are also awarded to the successful teachers at the examinations. Thus the Colony has gained during the past two years 56 teachers, who have passed an examination and are now certified as fit to give instruction to others.

31. No scheme for secondary education yet exists, nor in fact is the country yet in want of such a measure. A scheme of Gold

Coast Government scholarships, tenable at the home universities for four years, was, however, drafted by the late Governor, Sir Brandford Griffith, the pass being the Senior Cambridge Local Examination; but it will, I think, be some time before a Gold Coast native reaches to this required standard and earns a scholarship.

32. An exhibition of school industries is held annually at Accra for two days. This exhibition increases in popularity every year, and the exhibits increase also in number and variety, on account of the valuable money prizes awarded by the Government.

TRADE.

IMPORTS AND EXPORTS.

33. Trade, excepting during the latter part of the year, when the general unrest due to the Ashanti expedition caused it to diminish, was satisfactory. The total value of the imports (invoice value, including freight and other expenses) was 931,537*l.* 1*s.* 7*d.*, and the value of the exports 877,803*l.* 12*s.* 1*d.* The total value of the trade of the Colony for the year amounted, therefore, to 1,809,340*l.* 13*s.* 10*d.*, being an increase of 146,166*l.* 14*s.* 1*d.* over the value for the year 1894, which amounted to 1,663,173*l.* 19*s.* 9*d.*, or roughly at the rate of 9 per cent.

34. The trade of the Colony during the last six years—that is to say, since the present ad valorem duty of 10 per cent. has been in force, is shown as follows:—

Year.	Imports.		Exports.	Totals.
	Paying Duty.	Admitted Free.		
	£ s. d.	£ s. d.	£ s. d.	£ s. d.
1890 - - - -	347,480 17 10	214,621 18 6	661,348 9 6	1,163,451 3 10
1891 - - - -	464,188 1 7	201,593 1 5	684,304 19 8	1,350,086 2 8
1892 - - - -	422,026 8 1	175,068 4 4	665,064 3 3	1,262,064 3 3
1893 - - - -	475,346 15 8	243,006 3 7	722,106 19 1	1,440,460 3 4
1894 - - - -	607,109 7 2	205,721 1 8	850,343 10 11	1,663,173 19 9
1895 - - - -	653,357 19 8	278,179 1 11	877,803 12 1	1,809,340 13 10

It will be seen from these figures that trade has increased in six years by nearly 650,000*l.*, or upwards of 55 per cent.

35. The principal articles of trade are:—

Imports.—Cotton, woollen, and silk goods, spirits, hardware, cooper's stores, rice, flour, provisions, tobacco, building materials, and wearing apparel.

Exports.—Palm oil, palm kernels, rubber, gold dust, timber, kola nuts, and monkey skins.

36. The bulk of the trade is with the United Kingdom as shown by the following comparative tables:—

Imports.

Year.	From the United Kingdom.	From British Colonies.	From Foreign Countries.	Totals.
	£ s. d.	£ s. d.	£ s. d.	£ s. d.
1890 - -	422,739 14 6	5,861 0 4	133,502 1 3	562,102 16 4
1891 - -	483,392 18 3	5,085 6 10	177,302 17 11	665,781 3 0
1892 - -	407,037 16 10	9,924 13 11	180,132 1 8	597,094 2 5
1893 - -	524,036 16 1	8,719 5 10	185,597 2 4	718,353 4 3
1894 - -	582,273 14 8	13,168 14 1	217,388 0 1	812,830 8 10
1895 - -	630,000 7 6	91,164 18 7	210,371 15 6	931,537 1

Exports.

Year.	To the United Kingdom.	To British Colonies.	To Foreign Countries.	Totals.
	£ s. d.	£ s. d.	£ s. d.	£ s. d.
1890 - -	494,237 1 11	643 19 2	106,467 8 5	601,348 9 6

GOLD COAST. 1895.

38. The following tables show the general classification of all imports and exports :—

Imports.

Articles.	Value in Sterling. Of Imports in Detail, including Expenses.	Value in Sterling. Total Value, including Expenses.
	£ s. d.	£ s. d.
1. Live animals, food, drink, and narcotics	246,370 15 4	246,370 5 4
2. Raw materials:		
(a) Textile	Nil.	—
(b) Metal	Nil.	—
(c) Other	28,941 4 10	28,941 4 10
3. Manufactured articles:		
(a) Textile	329,314 2 6	—
(b) Metal	51,112 0 8	—
(c) Other	189,930 5 8	570,356 8 10
4. Coin and Bullion	85,868 12 7	85,868 12 7
Totals	—	931,537 1 7

Exports.

Articles.	Value in Sterling. Produce and Manufacture of the Colony.	Value in Sterling. British and Foreign and other Colonial Produce and Manufacture.	Totals.
	£ s. d.	£ s. d.	£ s. d.
1. Live animals, food, drink, and narcotics	53 7 0	3,815 3 0	3,868 10 0
2. Raw materials:			
(a) Textile	704 5 9	—	704 5 9
(b) Metal	91,566 19 9	—	91,566 19 9
(c) Other	728,108 3 1	—	728,108 3 1
3. Manufactured articles:			
(a) Textile	8 4 3	6,766 9 8	6,774 13 11
(b) Metal	—	1,008 11 2	1,008 11 2
(c) Other	46 17 0	4,143 14 7	4,190 11 7
4. Coin and Bullion	—	41,581 17 0	41,581 17 0
Totals	820,487 16 10	57,315 15 5	877,803 12 3

39. The supply of the staple articles, viz.—palm oil, palm kernels, and rubber—has been satisfactory, as the following figures show :—

Year.	Palm Oil.		Palm Kernels.		Rubber.	
	Gallons.	Value.	Tons.	Value.	Lbs.	Value.
		£ s. d.		£ s. d.		£ s. d.
1894 - -	4,213,935	237,623 3 9	17,136	112,373 6 1	3,027,527	232,550 5 6
1895 - -	4,338,627	231,415 0 9	15,559	93,384 11 10	4,022,385	322,070 0 5

40. The amount of rubber exported during the year is the highest on record. The increase was not, however, it is to be regretted, due to greater industry on the part of the natives engaged in the trade, but to speculations on the part of European firms, which imported large quantities from the neighbouring Colony of Lagos for re-export from the Gold Coast. These speculations have come to an end, and as it is understood that large quantities of rubber are being exported from the Congo Free State, the profits to be made out of rubber are likely to diminish unless the trade is fostered by improved communication with the interior districts of the Colony.

41. The export of mahogany and other woods of the Colony shows a marked falling off, but this may be fairly set down to the exceptionally dry year. The rivers by which the logs are brought to the sea were, in consequence of the comparatively small rainfall, so low during the greater part of the year that the logs could not be floated down. The trade of the last six years is shown by the following figures :—

Year.	Quantity.	Value.
	Feet.	£ s. d.
1890 - -	6,375	510 18 0
1891 - -	1,350,226	22,096 12 5
1892 - -	2,130,614	36,407 6 0
1893 - -	3,412,486	50,428 9 4
1894 - -	5,012,670	69,405 13 10
1895 - -	3,587,337	28,244 14 5

42. The export of cacao, coffee, and kola nuts, to which minor industries attention has been prominently called in previous reports, continue to be most satisfactory, and it is gratifying to be able to record that there is every indication of further and continuous improvement in the future. The export of copra and guinea grains has, on the other hand, declined.

Year.	Cacao.		Coffee.		Copra.		Guinea Grains.		Kola Nuts.	
	Lbs.	Value.	Lbs.	Value.	Lbs.	Value.	Lbs.	Value.	Packages.	Value.
		£ s. d.		£ s. d.		£ s. d.		£ s. d.		£ s. d.
1893 -	5,460	93 17 10	21,437	630 13 3	248,304	831 5 0	85,224	621 2 3	979	25,716 5 7
1894 -	20,312	546 17 4	41,488	1,265 3 4	649,600	1,940 1 7	174,412	1,186 17 4	1,202	28,511 18 11
1895 -	28,906	470 11 7	51,755	1,753 17 5	482,608	1,712 13 5	154,693	580 15 7	2,352	30,565 13 9

43. The slaughter of monkeys is decreasing, probably because the traders in monkey skins have now to go further into the interior to find the monkeys they require. In the last six years no less than 884,768 monkey skins have been exported, to the value of 195,300*l.* 13*s.* 3*d.*, and as only skins in good condition with few shot holes in them are saleable, it is probable that within that period as many as one million monkeys have been massacred in the Gold Coast.

Year.	Number of Skins.	Value.
		£ s. d.
1890 - -	169,040	28,053 9 1
1891 - -	187,070	30,403 11 11
1892 - -	188,646	34,807 19 5
1893 - -	181,059	46,813 15 0
1894 - -	168,405	41,001 14 10
1895 - -	90,548	14,220 3 0
	884,768	195,300 13 3

44. The market prices of nearly all articles of export have shown a decline, and in many cases as, for example, mahogany, kola nuts, cacao, guinea grains, and monkey skins, the fall in prices has been most marked, so that the year cannot be said to have been a favourable one for exporters. It must be remarked, however, that the values entered in the invoices, which are the values taken by the Government, are the approximate values at the port of shipment.

45. A report upon trade in West Africa would not be complete without a reference to the liquor traffic about which so many conflicting opinions have been expressed.

46. As stated in paragraph 5, the actual revenue from alcoholic liquors was 135,220*l.* 3*s.* 9*d.*, being an increase of 2,958*l.* 6*s.* 7*d.* over the revenue of 1894. The increase is shown by districts as follows:—

District.	1894.	1895.	Increase.
	£ s. d.	£ s. d.	£ s. d.
Axim	4,950 7 6	6,119 12 6	1,169 5 0
Cape Coast	20,[illegible] 2 6	20,597 8 10	339 6 4
Saltpond	16,320 7 6	15,860 12 6	—
Winneba	14,903 0 0	15,294 15 6	391 15 6
Accra	28,761 18 6	28,946 6 6	184 8 0
Adda	10,569 7 1	11,808 15 0	1,239 7 11
Kwitta	11,566 14 2	10,532 11 8	—
Other Districts	24,931 9 6	26,060 1 3	1,128 11 9
			4,453 14 6
Less decreases Saltpond and Kwitta	—	—	1,493 17 6
Totals	132,261 17 2	135,220 3 9	2,958 17 0

47. Only in the Axim and Adda districts have material increases taken place, and they are to be accounted for by special causes and not by an additional craving for drink on the part of the normal population. In the Axim district the investment of capital by English companies and English firms in mining and timber concessions has had the result of attracting labour both imported and native, and Adda is the district from which the countries of Attabubu and the other Brong tribes recently added to the Protectorate draw their supplies.

48. A comparison of the importation of the alcoholic liquors into the Gold Coast during the years 1894 and 1895 is given in the following table :—

Description of Liquor.	Quantity imported.		Increase.	Decrease.
	1894.	1895.		
	Old Wine Galls.	Old Wine Galls.	Old Wine Galls.	Old Wine Galls.
Rum	985,121	1,007,340	22,219	—
Gin and Geneva	317,778	333,219	15,441	—
Whisky	7,720	12,769	5,049	—
Brandy	875	677	—	198
Wines	20,619	18,956	—	1,663
Ale and porter	18,947	23,214	4,267	—
Liqueurs, &c.	2,953	2,426	—	527
Totals	1,354,013	1,398,601	46,976	2,388
Total increase in 1895			44,588	

In Imperial measures the actual importation during the year 1895 was 1,165,500 gallons. The population, with that of the

additional countries incorporated into the Protectorate during the year may be set down at 1,700,000.

49. It has been often contended by many persons that the quality of the trade gin imported into West Africa is so deleterious as to be harmful to the persons drinking it, but this contention is, I think, sufficiently disproved by an analysis made by Mr. G. W. Robertson, Fellow of the Chemical Society and an Associate of the Institute of Chemistry, at the request of Sir Claude MacDonald while Commissioner and Consul General for the Niger Coast Protectorate.

Mr. Robertson's report is dated the 14th October 1895, and is as follows:—

"Analysis of sample of trade gin received 2nd October 1895.

"I have the honour to report as follows:—

"It contains—

	Per cent.
"Absolute alcohol - - -	39·3
"Acidity, expressed as acetic acid -	0·0068
"Ethers, expressed as acetic ether -	0·021
"Aldehydes - -	Present in small quantity.
"Furfural - - -	" "
"Higher alcohols - -	" "

"The only alcohol that can be estimated quantitatively is ethyl "alcohol: there is no methyl, and the higher alcohols, as shown "by Sivalle's method, only exist in traces. The spirit is flavoured "by more than one essential oil, and apparently oil of juniper is "one of these oils. The liquid contains no sugar, and leaves but "a small extract.

"In my opinion the liquid essentially consists of a pure distilled "spirit with essential oils. Of course no attempt to identify "these oils in the quantity sent—viz., 632 c.c.—was made. The "ethers are returned as ethyl acetate, but from a fractional "distillation amyl acetate was qualitatively found to be present."

It would seem from this analysis that the trade gin of West Africa is neither more nor less deleterious than the gin sold all over London.

SHIPPING.

50. Although the steamers placed by the General Steam Navigation Company in the West African trade were taken off early in the year, the number of steamers arriving with

merchandise at ports in the Colony shows no falling off, as will be seen from the following figures :—

Nationality of Vessels.	Sailing Vessels.				Steamers.			
	1894.		1895.		1894.		1895.	
	No.	Tonnage.	No.	Tonnage.	No.	Tonnage.	No.	Tonnage.
United Kingdom - -	4	691	3	642	261	353,002	271	380,213
Germany - - -	—	—	—	—	90	108,192	79	92,765
France - - - -	4	1,900	3	875	43	49,765	45	49,469
Italy - - - -	9	3,064	—	—	—	—	—	—
United States - - -	7	3,370	7	3,269	—	—	—	—
Other nations - - -	—	—	1	222	1	1,008	4	11,604
Totals - - -	24	9,025	14	5,008	395	511,967	399	534,051

51. Nearly all the steamers become coasting steamers as soon as they have entered, that is to say, they touch at one or more of the 19 ports of entry to unload merchandise or take in produce. 122 steamers entered at Kwitta, whereas only 88 entered at Accra, but it must not be inferred from those figures that there is more trade at Kwitta than at Accra. With the exception of the small but rising port of Danoe, Kwitta is the first port of entry eastward, and the steamers which enter there nearly all touch at Adda, Accra, Saltpond, Cape Coast, Axim, or other ports. Similarly Axim, at which 60 steamers are recorded as having entered, is the first important port of entry westward, but the trade of that port is less than that of Cape Coast, where only 51 steamers are recorded as having entered, or, in other words, made Cape Coast the first port of call.

AGRICULTURE.

52. The land is not generally cultivated. Naturally rich, the soil will produce almost any commodity of market value. It abounds in the oil palm, mahogany, and other valuable woods, rubber trees and vines, and the kola tree with its valuable nut, but, chiefly on account of the absence of proper roads, and the general ignorance of the natives, products which require a careful preparation of the soil and supervision, such as coffee, cacao, cotton, rice, &c., have not been cultivated systematically. The wants of the natives are few, and are met by planting maize, yams, cassada, and plaintains; the plantations being shifted from one spot to another as may be necessary.

53. The establishment by the Government of a botanical station at Aburi in 1890 has been the means of inducing the

natives in the immediate neighbourhood of the station to interest themselves in the cultivation of coffee, and, as the figures given under the head of exports show, not without result. Machinery for coffee pulping has been imported, and it is intended to give practical instruction to the natives in its use, so as to show them how the berry can best be prepared for export.

54. The system of apprenticing natives to the botanical station for instruction in agriculture, to which reference is made in paragraph 51 of last year's report, has, it must be admitted with regret, not been a success. A change is to be made. It is proposed to select a certain number of natives of education (a competitive examination will be held, the standard being Standard VI. of the elementary schools), who will be trained for one year under the curator of the botanical station in the Gold Coast, then for one year in the botanical station at Jamaica, and, finally, for one year in the Royal Gardens at Kew. The lads thus selected and trained will be required to apprentice themselves to the Government for a definite period, and will be employed in such manner as may be considered best for disseminating a proper knowledge of cultivating products of economic value among the natives, and stimulating them to apply themselves to an industry which will be of benefit to themselves as well as their country.

55. There are large quantities of sheep and cattle in the Colony, chiefly in the hands of the Mohammedan population. A ready market for them is found in the Coast towns, and there is no doubt that the industry of sheep rearing and cattle breeding is largely increasing. The native oxen are small, but are sturdy and strong, and at the time of writing this report a native of standing in the Colony is training a yoke of oxen to draw timber from land in his position along the new road, which is being constructed between Accra and Kibbi a circumstance which I am glad to mention, because it illustrates the fact that if roads are constructed by the Government wheeled traffic will follow.

56. Locusts were again very troublesome in many parts of the Colony during the year under review, and did considerable damage to the standing crops. They have been identified by the authorities of the British Museum as of the same species as those of Abyssinia, and it is probable, therefore, that the swarms which have passed through the Gold Coast came originally from the eastward. Prior to 1893 the last visitation of locusts appears to have occurred as far back as 1852. It is generally stated that the swarms in 1895 were less numerous than in 1894, the eggs having been destroyed by the heavy rains, but in many districts the rise in the price of the native-grown foodstuffs has testified to the ravages which they committed. In Wassaw, for example, the price of 100 stalks of maize rose from 1*s.* 3*d.* to 3*s.* 6*d.* The visitation of locusts is being watched by the Government with anxiety, but the heavy bush throughout the country must render

concerted action against the locusts difficult; the heavy rains and the annual burning of grass and bush by the natives will, it is believed, do much to counteract the evil.

MANUFACTURES, MINES, &c.

57. I the report on the Blue Book for 1894 (paragraph 52) I referred to the existence of petroleum in Appollonia. A company has been floated in order to work the springs, and machinery for the purpose is being imported.

58. Several companies and syndicates have been launched for taking up timber and mining concessions obtained from the native Kings and Chiefs, and already some activity has been displayed, mining machinery and other plant having in some cases been sent to Appollonia, which is the principal field of operations. One company intends to connect the port of Half Assinie, by means of a light railway with the Tando lagoon, in order to facilitate the conveyance to the Coast of the timber cut down on their concessions.

59. Concessions of various kinds purporting to cede valuable tracts of country, often for most inadequate sums, having greatly increased in number, it was decided to issue the following notice, which was published also in the English newspapers:—

Colonial Secretary's Office, Accra,
October 10, 1895.

"Whereas grants and concessions have been made by Chiefs within the Protectorate without the consent of the Governor of the Colony:

"Notice is hereby given that no document hereafter made purporting to grant or convey any right over or interest in land, save and except the right to occupy agricultural land for the purposes of native husbandry, or the right to occupy building land for the erection of a native house, will be recognised in any way by the Government unless it shall bear the signature of the Governor, or of such officer as he shall appoint for the purpose, in token of Her Majesty's approval.

"Grants and concessions already made without such consent will be recognised only to such extent and on such conditions as may hereafter be determined, but the grantees of rights in respect of which there is a reasonable prospect of efficient and continuous work being done within a reasonable time will receive all due consideration.

"By His Excellency's Command,
"F. M. HODGSON,
"Colonial Secretary."

60. The following table shows the amount and value of the gold dust and nuggets exported from the Gold Coast during each of the last seven years:—

Year.	Weight.	Value.		
	Ozs.	£	s.	d.
1889 - -	28,667	103,200	10	0
1890 - -	25,460	91,657	0	0
1891 - -	24,476	88,112	0	0
1892 - -	27,446	98,805	17	0
1893 - -	21,972	79,099	4	0
1894 - -	21,332	76,795	17	5
1895 - -	25,416	91,497	12	0

61. Notwithstanding the fact that gold dust is not a legal tender, merchants still accept it in the way of trade. During 1895 as much as 11,557 ounces, of the value of 41,605*l.* 18*s.* 1*d.*, were accepted and exported, as compared with 10,447 ounces in 1894, of the value of 37,610*l.* 3*s.* 7*d.* The output from the mines during 1894 was, therefore, 13,859 ounces, of the value of 53,887*l.* 8*s.* 5*d.*

GAOLS AND PRISONERS.

62. There are three gaols and nine lock-ups in the Colony, and 2,006 persons, classified as follows, were committed to confinement in them:—

For debt - - - -	376
For safe custody until trial or for want of security - - - -	564
For purposes of penal imprisonment -	1,066

Of the 1,066 persons committed for penal imprisonment, 868 were committed for three months or less, and of the remainder 408 were old offenders.

63. The following table gives statistics for the past five years:—

Years.	Males.	Females.	Juveniles.	Totals.
1891 - - -	1,677	85	8	1,766
1892 - - -	1,475	48	11	1,534
1893 - - -	1,513	61	15	1,589
1894 - - -	1,550	74	20	1,644
1895 - - -	1,859	101	46	2,006

64. During the year 729 prisoners were treated in the gaol infirmaries, and the attendances, or out-patients, amounted to 10,661.

65. The following comparative statement of sickness and death among prisoners during the last five years is worthy of notice:—

Year.	Total Number of Prisoners.	Treated in Hospital.	Total Attendances or Out patients.	Deaths.
1891 - - -	1,766	318	11,028	7
1892 - - -	1,534	240	12,338	16
1893 - - -	1,589	337	9,262	27
1894 - - -	1,644	339	5,773	17
1895 - - -	2,006	729	10,661	37

66. The large number of admissions into hospital during the year, as compared with previous years is, the Chief Medical Officer states, "largely explained by the cachetic diseases from which "the prisoners suffered, more or less acquired before admission "into prison, and to catarrhal affections induced by the excessive "heat and moisture, and the intensity of activity of the endemic "malarial poison which characterised the year."

67. Of the 37 cases that ended fatally the following were the causes of death:—

Aneurism - - - -	1
Bronchitis - - - -	4
Cancer of liver - - - -	1
Cardiac disease - - - -	3
Debility - - - -	4
Diarrhœa - - - -	9
Dysentery - - - -	8
Fever - - - - -	1
Disease of kidney - - -	1
Phthisis - - - - -	2
Rheumatism - - - -	1
Tuberculosis - - - -	1
Wound - - - -	1

68. The year 1895 was remarkable for the small rainfall. The greater number of the deaths among the prisoners occurred during the latter half year when the heat was very great and debilitating.

69. The forms of hard labour consist of breaking and carrying stones, repairing and clearing roads, picking cotton and cocoanut fibre, mason's and bricklayer's work, coopering, whitewashing prisons and other public buildings, transport services; and in the Accra gaol, where classes under qualified instructors have been formed, carpenters' and joiners' work, tailoring of all kinds, boot and shoe making and mending and other work in leather, basket making and weaving, as well as cloth weaving.

70. Light labour is represented by sweeping, minor sanitary work, and plaiting straw for mats.

71. The total cost of the prisons establishment has during the last five years been as follows :—

	£	s.	d.
1891 - - - - -	4,230	10	0
1892 - - - - -	5,387	1	8
1893 - - - - -	5,511	8	3
1894 - - - - -	5,720	13	1
1895 - - - - -	6,601	4	7

72. The want of a central prison, in which convicts can be confined in separate cells, and can be brought under proper disciplinary restrictions, has long been felt. A building to be erected in the vicinity of Accra has been designed, and it is hoped that an early commencement in its erection will be made.

Criminal Statistics.

73. During the year 6,499 offences were reported to the police, as compared with 6,700 in 1894. Of these cases 1,682 were discharged or dismissed, 4,509 were summarily dealt with, and 276 referred to the Supreme Courts.

Hospitals.

74. Public hospitals are maintained by the Government at Accra, Cape Coast, Elmina, Axim, and Kwitta, and free dispensaries at Ada, Akuse, Chama, Saltpond, and Winneba.

75. A public hospital was erected at Kwitta during the year, and a military hospital at Accra, for the treatment of the Hausa Constabulary at headquarters, was completed and brought into use.

76. At Accra and Cape Coast permanent hospitals exist for contagious diseases, and at the other stations temporary arrangements are made as the necessity for them arises.

77. The number of patients treated, both in the hospitals and at the dispensaries, has largely increased, and there can be no doubt that the boon conferred upon the public by these institutions is very largely appreciated.

78. The following table shows the number of in-patients treated in the hospitals during the last six years :—

Year.	Patients discharged.				Total.
	Cured.	Relieved.	Not improved.	Deaths.	
1890 - - -	769	179	40	47	1,035
1891 - - -	572	212	41	48	873
1892 - - -	840	272	47	71	1,230
1893 - - -	836	294	36	94	1,260
1894 - - -	1,050	295	32	84	1,461
1895 - - -	1,271	312	52	95	1,801

79. Small-pox, which towards the close of 1894 threatened to spread in an epidemic form throughout the Colony, was fortunately successfully contended with. 193 cases came under treatment, the disease being of a mild type. 138 persons were vaccinated, with successful results in 96 cases.

80. The general health of the Colony was extremely bad, the endemic fever assuming a pseudo-epidemic form of a malignant type, closely approaching in its clinical manifestations the Yellow Fever of the West Indies. The death rate among Europeans was very high, and the excitement induced thereby amounted at one time almost to a panic, and served to intensify the fatal tendencies of the prevailing fever in the latter part of the year. The disease was practically limited to Axim, Chama, Elmina, Cape Coast, Saltpond, and Accra, but with varying intensity at each of these places. To insanitary causes, aggravated by the excessive humidity of the atmosphere, high shade temperature, and practically no rainfall, intensifying the action of pathogenic organisms of every kind, and especially the endemic malarial poison, must be attributed the malignant type of the fever.

81. The European mortality from all causes was as under :—

——	Among Officials.	Non-Officials.
	Per 1,000.	Per 1,000.
Accra - -	22·72	60·97
Axim - -	Nil.	7·76
Cape Coast - -	307	89·29
Chama - -	250	Nil.
Elmina - -	200	Nil.
Saltpond - -	250	142·8

PUBLIC LUNATIC ASYLUM.

82. The following table shows the number of lunatic patients treated in the Government Lunatic Asylum since its establishment in 1887:—

Year.	Admitted.		Discharged.						Deaths.		Remaining 31st December.	
			Cured.		Relieved.		Not improved.					
	M.	F.	M.	F.	M.	F.	M.	F.	M.	F.	M.	F.
1887	14	5	—	—	1	—	—	—	2	—	11	5
1888	17	3	3	—	—	—	1	—	8	3	16	5
1889	10	3	5	2	—	—	—	—	4	1	17	5
1890	12	—	2	—	1	—	—	—	6	1	20	4
1891	10	3	3	—	—	—	—	—	3	1	24	6
1892	21	2	7	—	—	—	1	—	6	1	31	7
1893	8	4	—	—	5	2	—	—	2	—	32	9
1894	22	6	—	—	11	—	—	—	3	—	40	15
1895	11	4	—	—	12	1	—	—	6	2	33	14*
Totals	125	30	20	2	30	3	2	—	38	9	—	—

* Two females escaped, and were not recaptured before the end of the year

83. There is a large flower and vegetable garden attached to the asylum in which as many lunatics as possible are employed. During the year 12 male and 3 female lunatics were so employed.

METEOROLOGICAL OBSERVATIONS.

84. The year 1895 will long be known on account of its phenomenally small rainfall. At Accra, where statistics are carefully taken, only 17·33 inches are recorded for the whole year. The heaviest rainfall was in March, when there were 3·69 inches, May standing next with 3·38 inches. The heaviest rainfall in one day was 1·96 inches, which occurred in March.

85. During the last six years the rainfall at Accra has been as follows:—

1890	29·53 inches.
1891	28·97 ,,
1892	29·27 ,,
1893	28·73 ,,
1894	23·32 ,,
1895	17·33 ,,

86. The average daily maximum shade temperature was 85·5° F.

SAVINGS BANKS.

87. The number of depositors has increased from 330 in 1894 to 388 in 1895, and the balance standing to the credit of depositors from 5,162*l.* 1*s.* 10*d.* to 5,578*l.* 13*s.*

88. The increase in the number of depositors at each bank is shown by the following comparative statement :—

Bank.	No. of Depositors.		Increase.
	1894.	1895.	
Accra - - -	115	121	6
Adda - - -	74	77	3
Axim - - -	12	15	3
Cape Coast - -	36	52	16
Chama - - -	5	6	1
Elmina - - -	16	27	11
Kwitta - - -	16	18	2
Saltpond - -	18	26	8
Tarkwa - - -	34	42	8
Winneba - -	4	4	—
Total - -	330	388	58

89. An attempt has been made to properly classify depositors with the following result :—

Occupation.	No. of Accounts.
Auctioneers - - - -	1
Bakers - - - -	2
Barristers - - - -	4
Bootmakers - - - -	2
Blacksmiths - - - -	1
Bricklayers - - - -	1
Cabinet-makers - - -	1
Clerks - - - - -	31
Editors - - - - -	1
Engineers - - - -	1
Goldsmiths - - - -	2
Institutions, &c. - - -	31
Krooboys - - - -	23
Labourers - - - -	31
Managers - - - -	1
Miners - - - - -	6
Ministers of religion- - -	3
Officials, European - - -	42
Officials, Native - - -	52
Overseers - - - -	1
Photographers - - - -	1
Police - - - - -	34
Printers - - - - -	2
School children - - -	6
School masters and mistresses -	4
Servants - - - - -	15
Tailors - - - - -	2
Traders - - - - -	18
Occupation not stated - -	69
Total - -	388

90. The majority of the accounts are for sums under 5*l*. The number of such accounts remaining open on the 31st December was 278, as compared with 234 in 1894.

91. The following table shows the position of the Savings Bank at the end of each year of its existence:—

Year.	Balance.	Deposits.	Interest due on Deposits.	Total.	Amounts withdrawn.	Interest paid on Withdrawals.	Total.	Balance.
	£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.
1888 - -	—	993 19 0	7 4 4	1,001 3 4	51 13 0	—	51 13 0	949 10 4
1889 - -	949 10 4	2,663 10 0	40 14 2	3,653 14 6	439 9 0	1 2 7	440 11 7	3,213 2 11
1890 - -	3,213 2 11	1,665 6 8	45 19 11	4,924 9 6	2,705 6 6	3 13 3	2,708 19 9	2,215 9 9

GOLD COAST. 1895.

92. I wrote last year as follows:—"The rate of progress in "thrift as shown by the Government Savings Bank is to the "superficial observer distressingly slow, but the progress is "nevertheless sure, and side by side with it is the knowledge "that many natives, instead of placing their savings in the bank, "employ them in, to the native, more congenial method of "increasing capital by small trading operations, which in this "country require only a small cash basis." As education spreads so also will the natives see the many advantages to be gained by thrift, and many of those who now bury their money in the ground will lodge it in the bank. There are penny banks in connexion with eight of the schools of the Colony in which there are upwards of 500 depositors, and it is hoped that the habits of thrift thus early inculcated will remain in many cases in after life.

POSTAL AND TELEGRAPH STATISTICS.

Post Office.

93. An increase of postal business has again to be recorded, as will be seen by the following comparative table:—

Year.	No. of Offices open.	Estimated No. of Letters, &c. posted.	No. of registered Articles dealt with.	Money Orders.			Inland Postal Orders.	Parcels Post.		
				No. of Offices open.	Value of Inland Orders.	Value of Foreign Orders.		No. of Offices open.	No. of Parcels.	Receipts.
					£ s. d.	£ s. d.	£ s. d.			£ s. d.
1888 -	17	111,041	7,836	2	1,939 8 2	6,709 3 7	—	3	826	31 19 11
1889 -	26	146,905	9,739	2	1,209 19 1	4,572 2 6	—	3	1,407	55 14 6
1890 -	26	161,726	10,862	2	1,681 11 11	3,481 18 0	—	3	1,902	102 8 9
1891 -	30	205,035	11,227	3	1,985 1 4	5,142 18 11	—	3	2,368	146 8 9
1892 -	31	225,293	12,362	5	3,193 8 0	7,251 1 11	—	3	2,379	104 19 1
1893 -	31	335,112	15,956	5	3,787 11 2	9,525 13 7	1,231 3 6	7	2,762	216 6 0
1894 -	32	386,028	18,068	5	3,382 9 3	9,888 19 0	2,021 7 6	7	3,224	247 5 3
1895 -	32	390,502	17,474	5	*1,679 5 11	15,397 9 0	2,150 13 6	7	3,518	273 1 9

* In previous years the value of the Foreign Orders issued at the General Post Office, Accra, has been wrongly included in this column.

94. The inland mail services were satisfactorily performed during the year, not a single accident to them having to be recorded. Mails are carried on the heads of the natives to all places to which postal communication has been extended, at an average cost of 2*d.* a mile.

95. The question of increasing the number of offices available for the transaction of money order business will, it is hoped, be taken up in the near future. There is no doubt that in this and in other ways the usefulness of the Post Office can be considerably extended.

Telegraphs.

96. The extension of the telegraph system to Prahsu, which was commenced in September, was by the 31st December carried a short distance beyond Mansu, where a telegraph office was opened. Altogether 40 miles of line were constructed.

97. The wire between Cape Coast and Elmina was duplicated, and a commencement made towards completing the duplication of the wire between Accra and Cape Coast, between which stations the substitution of iron for wooden posts was completed.

98. There have been several instances of theft by the natives of the copper telegraph wire, copper wire being in request for native bangles, and it is in contemplation to pass an Ordinance making the Chiefs, where necessary, responsible for the safety of the wire in their respective districts.

99. There was a considerable increase in the number of messages dealt with irrespective of the traffic arising out of the dispatch of the expedition to Kumasi. The number of messages was 81,688, as compared with 75,776 in 1894.

100. The arrangements made in 1894 for the transmission of bonâ fide press messages at a reduced rate were taken advantage of for the first time. It was hoped, when the arrangements were made, that the editors of the local newspapers would avail themselves of the facilities thus afforded to make their papers of more interest, but their want of enterprise is illustrated by the fact that only a very small number of press telegrams was supplied to the newspapers during the Ashanti Expedition.

101. 889 telegrams were forwarded from the Gold Coast to Togoland, and 948 messages were received. Of the former no less than 693 were handed in at Kwitta, where there are German mercantile firms having factories at Lome and Klein Popo.

102. The following table shows the growth of telegraph business since the 24th of May 1887, when the telegraphs were first opened for the transmission of public messages:—

Year.	Number of Offices.	Miles of Wire.	Number of Telegrams dealt with.				Receipts.		
			Public.	Government.	Cable.	Total.	Inland Telegrams.	For Cable Company.	Totals.
							£ s. d.	£ s. d.	£ s. d.

GOLD COAST.
1895.

INTERNAL COMMUNICATION.

103. In September two engineers selected by Messrs. Coode, Son, and Matthews arrived in the Colony for the purpose of making:—

1. A survey of the reefs at Accra with a view to the designing of a breakwater to afford shelter for lighters and launches, and a place at which heavy goods can be landed and shipped in smooth water;
2. A survey of the bar at the mouth of the Volta River in order to promote the development of the navigation of that important waterway;
3. The examination of the upper reaches of the Volta in the vicinity of Kpong, where there are at present impediments in the way of navigation; and
4. The inspection of some of the ports on the coast which may seem to offer conditions entitling them to consideration in connexion with railway schemes.

104. Addressing the Legislative Council on the 28th October, the Governor made the following remarks:—

"Under ordinary circumstances these preliminary surveys and investigations must occupy several months, and it cannot be expected that reports and designs can be ready before the summer of 1896, or that definite schemes can be proposed for consideration here until this time next year. Upon the result of the work just described must in a great measure depend the decision of the Government upon the railway question. Stated generally, the railway policy of this Colony is as follows:—The conditions under which bulky produce is transported from the interior to the Coast are such that, beyond a certain distance inland, products have no commercial value; a new producing sphere could be tapped if a railway of 50 or 60 miles in length were constructed, and trade could be further developed by the gradual extension of the line; it is therefore desirable to carry a railway inland from the place best adapted for development as a harbour. What that place shall be is the matter now under consideration. Appam has been suggested by Captain Lang, R.E., who has surveyed a route from that place. Accra, not unnaturally, has its advocates, and there may be other proposals. Under the circumstances, it will be apparent that it has not been possible to include in the estimates for 1896 any provision for railway expenditure."

105. The necessity for training natives as engineers in connexion with the proposed railway has not been overlooked, and a scheme has been drafted by which selected candidates will be sent to Ceylon to undergo a course of instruction in the technical school and afterwards at the Government factory, the railway workshops, and on construction works in the Public Works Department. It is hoped that the arrangements will be completed and the first batch of apprentices sent to Ceylon in 1896.

106. During the year some progress was made in the construction of trade roads. The trade road from Cape Coast through Denkera and Sefwhi was completed to a distance of three miles north of Jukwa, some 15 miles of the trade road from Saltpond to the interior was constructed, and the survey and laying out the new trade road along the right bank of the Volta between Kpong and Tinkranku was carried to a distance of 120 miles. Further, the trade road between Accra and Insawam and thence viâ Apedjua to Kibbi (Eastern Axim) was commenced, and completed to a distance of 10 miles. In respect of this road the Government has been able to get much of the work done by contract and it is hoped that the system of contracts for road work will be extended.

107. The Roads Department, which was sanctioned in 1893 and established in 1895, has been abolished, and it has been recommended that the staff, reduced, however, to two surveyors and two assistant surveyors, should be placed under the Director of Public Works and made a branch of the Public Works Department.

108. In paragraph 55 of this report I have referred to the introduction of wheeled traffic on one of the newly constructed roads, a circumstance which will probably necessitate a revision of the order for the construction of roads of only 12 feet in width. In the adjacent German Colony of Togoland the width of the roads under construction by the Government is 16 feet.

109. The construction of a bridge over the Sweet River, which crosses the coast road between Cape Coast and Elmina, has been completed, and cannot fail to facilitate inter-communication between the two places.

110. The improvement of the ferry services throughout the Colony has engaged the attention of the Government, and a Bill has been drafted authorising the appropriation by the Government of ferries in respect of which the owners are in the habit of levying excessive tolls, or have neglected or mismanaged them, or where they are the subject of dispute between rival Chiefs or tribes.

General Remarks.

111. Sir W. Brandford Griffith, K.C.M.G., after an administration of the Government of the Colony for a period of 9½ years, retired from the Government service, and was succeeded on the 8th April by Mr. W. E. Maxwell, C.M.G., Colonial Secretary of the Straits Settlements.

112. The period of Sir Brandford Griffith's administration was marked by many changes and an enormous advancement in the material prosperity of the Colony. Between the time of his assuming and relinquishing the reins of office the trade of the Colony and the revenue had been doubled.

113. The great and important question of providing a proper and sufficient water supply for the use of the people of the principal coast towns has engaged the serious attention of the

Government. The action taken as regards a water supply for Accra is referred to in paragraph 96 of the Report on the Blue Book for 1894. Artesian wells have been suggested as a solution of the difficulty, and arrangements were accordingly made for the necessary plant and tools being got out, and a competent foreman engaged to undertake the work of boring for water. The first trial will be made at Accra, and it is hoped that, if the borings should prove successful, it will be possible to establish artesian wells at all the principal coast towns.

114. Failing artesian wells, the Government has under consideration, as regards Accra, another way of providing water for the supply of the inhabitants.

115. The clearance of the houses in Accra destroyed by the fire in April 1894, and the marking out of wide streets throughout the town, have been proceeded with. The improvement both in the appearance and ventilation of the town is immense, and when the work is completed the sanitary condition of Accra should be vastly improved. The public market, which was erected by the Government in 1893, and the opening of which had to be deferred in consequence of the necessity of accommodating in it the natives who had been rendered houseless by the fire, was opened by the Governor in November. It is filled to overflowing with vendors of meat, poultry, fish, vegetables, and general commodities, and has proved the boon to the community which was anticipated.

116. Arrangements were made with Reuter's Telegram Company for the despatch of two news telegrams a week to the Gold Coast, and the service commenced on the 12th October.

117. The several tribes within the Protectorate have been at peace. The Colony has within it all the essentials for prosperity. Rich in gold, in valuable timber, in soil, which will produce almost any commodity of trade value, it is already attracting the attention of capitalists, and with finances and trade in a satisfactory state, there is no reason why it should not advance in material prosperity and bring wealth to English merchants and native producers and workers.

F. M. HODGSON,
Acting Governor.

Accra, Gold Coast,
September 12, 1896.

COLONIAL REPORTS—ANNUAL.

No. 220.

GOLD COAST.

ANNUAL REPORT FOR 1896.

(For Report for 1895, *see* No. 189 of this Series.)

ACTING-GOVERNOR GRIFFITH to MR. CHAMBERLAIN.

Government House, Accra,

15th October, 1897.

SIR,

I HAVE the honour to transmit to you a report by Mr. Haddon Smith, Acting Colonial Secretary, on the Blue Book for 1896.

I have, &c.,

W. BRANDFORD GRIFFITH, C.J.,
Deputy for Governor.

REPORT ON THE BLUE BOOK OF THE GOLD COAST COLONY FOR 1896.

REVENUE.

1. The Gold Coast Colony has no Public Debt. On the 31st December 1896 the amount of surplus funds invested on account of the General Account of the Colony was valued by the Trustees at £30,908 5*s.* 1*d.*; the value on the same date in the previous year was £63,164 10*s.* 5*d.*; the difference of £32,256 5*s.* 4*d.* is caused by the sale during 1896 of securities which it became necessary to realize owing to the heavy charges caused by the Ashanti Expedition. The payments on account of the Expedition during the year under review amounted to £31,095 16*s.* 4*d.*, and miscellaneous expenditure in connection with the occupation and administration of Ashanti caused a

GOLD COAST. 1896.

further charge upon the Colony of £13,816 3*s.* 11*d.* It is interesting to note here that the annual increase in expenditure, which has been continuous since 1890, would have ceased in 1896, and that the expenditure of the latter year would have shown a decrease as compared with that of 1895 of £27,923 10*s.* 6*d.*, but for the demands upon the Revenue owing to the occupation of Ashanti. From increase in trade in the territory now at last made accessible to merchants, the Colony may gradually expect to see an increase in Imports, and consequently in the Customs Revenue.

2. The subjoined statement shows the years in which the Revenue exceeded the Expenditure and the amount of such excesses :—

	£	*s.*	*d.*
1890	38,549	16	4
1891	52,614	16	0
1892	24,970	14	4
1893	22,848	5	9

3. The Expenditure was in excess of Revenue in the following :—

	£	*s.*	*d.*
1887	17,092	11	9
1888	35,660	17	6
1889	13,614	6	1
1894	8,670	13	9
1895	35,213	13	1
1896	44,817	9	1

4. The net Revenue collected during 1896 amounted to £237,460 6*s.* 7*d.*, being £7,384 13*s.* 9*d.* in excess of that collected in the previous year.

5. The following table gives a comparison of the Revenue for the last two years, classified under the principal heads :—

Items of Revenue.	1895.			1896.			Increase.			Decrease.		
	£	*s.*	*d.*	£	*s.*	*d.*	£	*s.*	*d.*	£	*s.*	*d.*
Wines, Spirits, Tobacco. Guns, &c. (Specific duties).	157,163	0	11	162,849	11	7	5,686	10	8	—		
General Merchandize (*ad valorem* duty).	40,579	17	4	42,126	1	0	1,546	3	8	—		
Liquor Licenses ...	6,347	10	0	6,586	12	6	239	2	6	—		
Stamps (Postal, Telegraph and Revenue).	9,952	14	3	11,448	18	5	1,496	4	2	—		
Other items	16,032	10	4	14,449	3	1	—			583	7	3
Total Revenue £	230,075	12	10	237,460	6	7	7,384	13	9	583	7	3

STAMPS.

6. 499 Documents were submitted during the year for assessment and stamping, and 1,076 Documents for stamping without the Commissioner's certificate. 5,028 Bills of Lading were also stamped. The Revenue so derived amounted to £1,224 14*s.* 11*d.*, and a further sum of £80 was collected for penalties.

LOCAL REVENUE.

7. Independently of Customs Duties there is no direct taxation, neither are there, as yet, any municipal rates; some progress was, however, made in 1896 with the preliminaries necessary for the creation of a Town Council at Accra, which will necessitate the levying of rates at Accra and Christiansborg.

EXPENDITURE.

8. There was expended during the year 1896 a total sum of £282,277 15*s.* 8*d.*, being £16,988 9*s.* 9*d.* more than the expenditure for the previous year. The following are the principal heads under which an increase appears:—

—	1895.			1896.			Causes.
	£	*s.*	*d.*	£	*s.*	*d.*	
Ashanti Special Expedition.	16,279	11	0	31,095	16	4	—
Public Works	49,994	6	9	52,459	13	5	Supply of Materials and Stores.
Constabulary	32,657	3	8	35,561	3	8	Arrears of pay due in 1895.
Educational	5,699	2	4	6,765	16	9	Grants to Schools and Supplies.
Pensions and Gratuities	3,734	4	10	4,770	2	4	Arrears for 1895 paid in 1896.
Supreme Court, &c. ...	16,209	0	9	16,802	13	0	Salaries for 1895 paid in 1896.

GOVERNMENT SAVINGS BANK.

9. The deposits show an increase of £2,701 as compared with those of the previous year; the deposits for the year are £7,249 13*s.* 9*d.*, while the withdrawals are (including interest) £7,286 16*s.* 3*d.* Interest credited to Depositors amounts to £127 7*s.* 0*d.* The total amount credited (including interest) during the year was therefore £7,377 0*s.* 9*d.* and the withdrawals £7,286 16*s.* 3*d.* From this it is apparent that the business of this institution is almost stationary.

GOLD COAST. 1896.

10. The following is a comparative statement showing the number of Depositors, also the total amounts at each Savings Bank in the Colony during the years 1895–6 :—

District.	No. of Depositors.				Total amount deposited.			
	1895.	1896.	Increase.	Decrease.	1895.	1896.	Increase.	Decrease.
					£ s. d.	£ s. d.	£ s. d.	£ s. d.
Accra.. ..	121	141	20	—	2,024 3 11	4,020 0 3	1,995 16 4	—
Addah ..	77	60	—	17	143 9 1	278 19 4	135 10 3	—
Axim	15	19	4	—	33 5 4	203 16 5	170 11 1	—
Cape Coast ..	52	51	—	1	1,439 5 0	1,298 9 6	—	140 15 6
Chama ..	6	6	—	—	51 10 7	139 4 11	87 14 4	—
Elmina ..	27	31	4	—	358 18 11	487 5 4	128 4 5	—

11. The Savings Bank system appeals to a small minority of the population, namely, the educated natives living at a few trading-centres on the coast. It hardly touches the mass of the illiterate population, who would far sooner bury their money or turn it into jewelry than trust it to the safe keeping of any one, even a Government Savings Bank. From the following analysis it will be seen that the classes which contribute the largest number of Depositors are Government officials and labourers (employed for the most part by Government), and that the traders have few representatives.

Occupation of Depositors.	No. of Accounts.
Auctioneers	1
Bakers	2
Barristers	5
Bootmakers	3
Blacksmiths	2
Bricklayers	—
Cabinet Makers...	1
Clerks	44
Editors	1
Engineers	3
Goldsmiths	4
Institutions, &c.	27
Labourers	51
Messengers	1
Miners	6
Ministers of Religion	4
Government Officials (Europeans)	30
" " (Natives)	74

Occupation of Depositors.	No. of Accounts.
Brought forward ...	262
Police	18
Printers	1
School Children	5
„ Masters and Mistresses	10
Servants...	18
Tailors	1
Traders	20
Occupation not stated	76
Total	411

12. The large number of withdrawals suggests the conclusion that a number of the Depositors simply use the Bank as a safe and convenient place in which to keep money for brief periods. It is to be feared that few Depositors really acquire, from the habit of resorting to the Savings Bank, a notion of the real importance of thrift and of gradually accumulating a sum which will be available in time of need.

13. The total amount at the credit of the Savings Bank in the books of the Colony is £5,668 17*s.* 6*d.* Of this amount £4,099 14*s.* 0*d.* has been invested and is in the hands of the Crown Agents.

TRADE.

Imports and Exports.

14. The total value of the Imports in 1896 was £910,210 and the value of the Exports £792,111, thus making the total value of the trade of the Colony for the year £1,702,321, a decrease of £107,018 on the year 1895 in which the Imports and Exports were valued at £1,809,340. The decrease shown in these statistics may perhaps be partly explained by the prohibition of the gunpowder trade for a time, and by the employment of a large number of people in Ashanti who were withdrawn from their ordinary pursuits in the Coast provinces.

15. The following table shows the state of the trade of the Colony for the last seven years, that is, since the present Customs Tariff has been in force :—

Year.	Imports.		Exports.	Totals.
	Paying duty.	Admitted free.		
	£	£	£	£
1891	464,188	201,593	684,304	1,350,086
1892	422,026	175,068	665,064	1,262,158
1893	475,346	243,006	722,106	1,440,460
1894	607,109	205,721	850,343	1,663,173
1895	653,357	278,179	877,803	1,809,340
1896	647,682	262,528	792,111	1,702,321

GOLD COAST. 1896.

16. Notwithstanding the unfavourable result of the foregoing comparison of the trade statistics of 1895 and 1896, the value of the trade of the latter year was greater than that of any year prior to 1895; this may be taken as a healthy sign.

17. The principal articles of trade are :—

Imports.

Cotton, woollen and silk goods, spirits, hardware, rice flour, provisions, tobacco, building materials, and wearing-apparel.

Exports.

Palm oil, palm kernels, rubber, gold dust, timber and minor industries such as coffee, cocoa, monkey skins, and Kola nuts.

18. It is shown by the following comparative tables that the greater proportion of the trade is with the United Kingdom :—

Imports.

Year.	From the United Kingdom.			From British Colonies.			From Foreign Countries.			Totals.		
	£	s.	d.	£	s.	d.	£	s.	d.	£	s.	d.
1891	483,392	18	3	5,085	6	10	177,302	17	11	665,781	3	0
1892	407,037	16	10	9,924	13	11	180,132	1	8	597,094	12	5
1893	524,036	16	1	8,719	5	10	185,597	2	4	718,353	4	3
1894	582,273	14	8	13,168	14	1	217,388	0	1	812,830	8	10
1895	630,000	7	6	91,164	18	7	210,371	15	6	931,537	1	7
1896	659,561	11	10	31,483	19	5	219,164	19	2	910,210	10	5

Exports.

Year.	To the United Kingdom.			To British Colonies.			To Foreign Countries.			Totals.		
	£	s.	d.	£	s.	d.	£	s.	d.	£	s.	d.

21. The supply of the staple articles, such as palm kernels, palm oil, and rubber, has not been satisfactory, but whether this has been due to bad prices, or to the withdrawal of a large number of able-bodied men from their ordinary avocations to serve as carriers in the Ashanti Expedition, or to other causes, it is not easy to determine.

22. The following figures show the trade in three important Exports for the last three years :—

Year.	Palm Oil.		Palm Kernels.		Rubber.	
	Gallons.	Value.	Tons.	Value.	Lbs.	Value.
		£		£		£
1894	4,213,935	237,623	17,136	112,373	3,027,527	232,550
1895	4,338,627	231,415	15,559	93,384	4,022,385	322,070
1896	2,394,563	126,857	13,046	85,349	3,735,439	313,817

23. The following statement shows the quantity and value of rubber exported from the Gold Coast to the undermentioned countries during 1896 :—

Countries.	Quantity.	Value.
	Lbs.	£
United Kingdom	3,307,685	283,044
Germany ...	424,093	30,398
Belgium ...	3,661	375

In the previous year 3,597,052 lbs., valued at £294,325, were exported to the United Kingdom, while 424,197 lbs., valued at £27,610, were shipped to Germany.

24. It is hoped that native collectors of rubber have at length realised that the only economical method of drawing-off the sap from the tree is to tap it, and that to fell the tree is most wasteful and destructive. Those who travel in the forests can now see the trees scored with vertical and lateral incisions. Without the co-operation of the natives effective Government supervision for the protection of rubber trees is impossible, and forest laws would therefore be a dead letter.

25. The export of timber has largely increased during the year under review as compared to 1895; the timber country of the Colony is the Western District, the ports of shipment being Axim and Chama. The following statement will serve to show the trade of the industry for the last six years :—

Year.	Quantity.	Value.
	Feet.	£
1891	1,350,226	22,096
1892	2,130,614	36,407
1893	3,412,486	50,428
1894	5,012,670	69,405
1895	3,587,337	28,244
1896	6,063,381	52,233

GOLD COAST. 1896.

26. It is stated that the native lumbermen damage the trade by cutting down trees irrespective of their defects and imperfections, and that consequently the market is flooded with defective timber. Defects may be of various descriptions, such as those enumerated under the following technical headings :—

"Hollow portion,"
"Shakes,"
"Star Shakes,"
"Knots" (not greatly detrimental to the value of the log provided they are small),
"Wormed."

27. The dimensions of mahogany logs most in demand are 16 to 30 feet in length and 24 to 36 inches square.

28. The cultivation of coffee and cocoa is still in its infancy in the Colony ; plantations near the coast suffer from the scarcity of fresh water, while if situated far from the port of shipment transport becomes a varying item to the producer. Notwithstanding many disadvantages the export of coffee and cocoa shows a very fair increase as will be seen by the following table :—

Year.	Cocoa.		Coffee.		Copra.		Guinea-grains.		Kola-nuts.	
	lbs.	Value.	lbs.	Value.	lbs.	Value	lbs.	Value.	Packages.	Value.
		£		£		£		£		£
1893	3,460	93	21,437	630	248,304	831	183,224	621	979	25,716
1894	20,312	546	41,488	1,265	649,600	1,940	174,412	1,186	1,202	28,511
1895	28,906	470	51,755	1,753	482,608	1,712	154,693	580	2,352	30,565
1896	86,7[illegible]4	2,275	141,836	4,035	273,840	852	26,594	193	3,156	33,278

29. Monkey skins are scarcer than formerly, the increasing warfare carried on against the unfortunate animals which supply this article of commerce having resulted in the extermination of the species in the less distant provinces. In 1894, 168,405 skins, valued at £41,001 were exported, whereas in 1896 the number of skins fell to 67,660, valued at £8,662.

30. The Gold Mining industry is carried on chiefly in the Wassaw district, and much public attention was called to it, and to the difficulties (mainly that of transport) which retard its development, during the year. This was principally due to the prominent place given to this subject in an address which the Governor (Sir William Maxwell) delivered to the African section of the Liverpool Chamber of Commerce in July. The Colonial Government determined to improve communication between Tarkwa and the Ankobra River, and a vote was inserted in the Estimates for 1897 for this purpose.

31. The following table shows the weight and value of gold exported from the Colony during each of the last seven years :—

Year.	Weight.	Value.		
	Oz.	£	s.	d.
1890	25,460	91,657	0	0
1891	24,476	88,112	0	0
1892	27,446	98,805	17	0
1893	21,972	79,099	4	0
1894	21,332	76,795	17	5
1895	25,416	91,497	12	0
1896	23,941	86,186	7	2

32. Judging from trade statistics, the consumption of alcohol has undergone a considerable reduction in the year 1896. There appears to be no reason to think that a demand for spirituous liquors is spreading among the native population.

33. In the following table is given a comparison of the importations of wines and spirits in the Gold Coast Colony during the years 1895 and 1896, from which it will be seen that the fall in the quantity of rum has been very considerable ; gin and whisky have also been imported in decreased quantity.

Description of Liquor.	Quantity imported.		Increase.	Decrease.
	1895.	1896.		
	Old Wine. Gals.	Old Wine. Gals.	Old Wine. Gals.	Old Wine. Gals.
Rum	1,007,340	833,135	—	174,205
Gin and Geneva	333,219	330,804	—	2,415
Whisky	12,769	11,432	—	1,337
Brandy	677	822	145	—
Wines...	18,956	22,177	3,221	—
Ale and Porter	23,214	26,220	3,006	—
Liqueurs, &c.	2,426	2,189	—	237
Totals	1,398,601	1,226,779	6,372	178,194

SHIPPING.

34. The number of vessels was practically the same as in 1895, but the tonnage was greater. The figures are as follows :—

Nationality of Vessels.	Sailing Vessels.				Steamers.			
	1895.		1896.		1895.		1896.	
	No.	Tonnage.	No.	Tonnage.	No.	Tonnage.	No.	Tonnage.
United Kingdom...	3	642	1	105	271	380,213	254	366,857
Germany	—	—	4	1,540	79	92,765	87	108,168
France	3	875	—	—	45	49,469	50	65,870
Italy	—	—	—	—	—	—	—	—
United States ...	7	3,269	9	4,670	—	—	—	—
Other Nations ...	1	222	2	559	4	11,604	9	19,199
Totals ...	14	5,008	16	6,874	399	534,051	400	553,794

35. The mail service with England has improved as regards the time occupied by the outward voyage. Communication between Europe and the West African Colonies continues to be almost exclusively in the hands of the African Steamship Company and the British and African Steam Navigation Company, the large majority of whose steamers are of less than 300 horse-power, and are admittedly built for a coasting trade. No contract exists between the Government and these Companies for the carriage of mails according to a time-table.

LEGISLATION.

36. During the year 1896 the Legislative Council passed 15 Ordinances, of which the following are the more important :—

37. Ordinances Nos. 1, 2 and 12 of 1896 provide for the detention during Her Majesty's pleasure of Prempeh, the late King of Kumasi, his father and mother, and certain of his chiefs.

38. Ordinance No. 3 of 1896, "The Village Sites Ordinance," empowers the Governor to set apart Government land as a village site, whereon houses can only be built on certain conditions.

39. Ordinance No. 6 of 1896, "The Telegraphs Amendment Ordinance, 1896," is a short but useful Ordinance empowering the Governor to place any section of a telegraph line under a native chief, whose duty it then becomes (1) to preserve such section from injury, and (2), in the event of injury to the line, to report the same forthwith to the Commissioner of the District. The further duty is imposed on any such chief, and on the inhabitants of his town or village, of rendering active assistance in arresting any person who maliciously damages the telegraph line. For a breach of this duty the chief and village may be fined by the Governor.

40. Ordinance No. 7 of 1896, "The Ferries Ordinance, 1896," empowering the Governor to declare any ferry (1) whose owner has been in the habit of levying tolls not sanctioned by native custom, or (2) which has been neglected or mismanaged, or (3) which is the subject of rival claims, or (4) whose owner has consented to its transfer to the Government on compensation being given, to be a Public Ferry. Provision is made for fixing the tolls of Public Ferries and for the letting out of such tolls to contractors, and power is given to the Governor in Council to make rules regulating the management of Public Ferries.

41. Ordinance No. 8 of 1896, "The Survey Ordinance, 1896,' provides for the appointment of official and private surveyors, and contains sundry provisions facilitating survey by compelling owners to attend and point out boundaries and give information. The Ordinance also provides for the upkeep of boundary marks when once made.

42. Ordinance No. 9 of 1896, "The Weights and Measures Ordinance, 1896," practically applies to this Colony the main provisions of the Imperial Weights and Measures Acts. The Imperial Standard Pound, Gallon and Yard are taken as the basis of the weights and measures to be used in the Colony, and the various parts and multiples of the pound, gallon and yard that may be lawfully used in trade dealings are set forth in schedules. Provision is made for obtaining Colonial standards and duplicates thereof for the purpose of verifying weights and measures in the Colony. Provision is also made for the inspection and marking of weights and measures and weighing machines. The Ordinance contains the usual provisions with respect to offences in relation to weights and measures, and the Governor in Council is empowered to make rules as to fees for marking, &c. of

weights and measures, and generally for carrying the Ordinance into effect.

43. Ordinance No. 10 of 1896 provides for the detention, in the Colony, of Nana, the Ex-Chief of Benin.

44. Ordinance No. 13 of 1896, "The Compulsory Labour Continuance Ordinance, 1896," continues for another year the Compulsory Labour Ordinance of 1895.

45. Ordinance No. 14 of 1896, "The Reprint of Statutes Ordinance, 1896," an Ordinance authorising the present Chief Justice to prepare a revised edition of the Local Ordinances.

POST OFFICE.

46. Postal business shows an increase. The falling off of inland money orders is very marked, but the value of foreign money orders has more than doubled itself as compared with 1895; the following comparative table will show the steady increase of work in the Department:—

Year.	No. of Offices open.	Estimated No. of Letters, &c., posted.	No. of Registered Articles dealt with.	Money Orders.			Inland Postal Orders.	Parcels Post.		
				No. of Offices open.	Value of Inland Orders.	Value of Foreign Orders.		No. of Offices open.	No. of Parcels.	Receipts.
					£ s. d.	£ s. d	£ s. d.			£ s. d.
1888	17	111,041	7,836	2	1,939 8 2	6,709 3 7	—	3	826	31 19 11
1889	26	146,905	9,739	2	1,209 19 1	4,572 2 6	—	3	1,407	35 14 6
1890	26	161,726	10,862	2	1,681 11 11	3,481 18 0	—	3	1,902	102 8 9
1891	30	205,053	11,227	3	1,985 1 4	5,142 18 11	—	3	2,368	146 8 9
1892	31	225,293	12,362	5	3,193 8 0	7,251 1 11	—	3	2,379	104 19 1
1893	31	335,112	15,956	5	3,787 11 2	9,525 13 7	1,231 3 6	7	2,762	216 6 0
1894	32	386,028	18,068	5	3,382 9 3	9,888 19 0	2,021 7 6	7	3,224	247 5 3
1895	32	390,502	17,474	5	1,679 5 11	15,397 9 0	2,150 13 6	7	3,518	273 1 9
1896	35	545,824	19,324	5	1,590 6 8	32,616 19 3	2,489 9 6	7	3,563	292 15 5

47. It must be recorded that during the year three new Post Offices were opened, including one at Kumasi, the Capital of Ashanti, with which there is weekly postal communication from Cape Coast and Accra, the journey taking 9 or 10 days.

48. The Postal Revenue for the year was £602 14*s.* 7½*d.* in excess of that of 1895. The Department obtained a special revenue of £771 15*s.* 1*d.*, the proceeds of stamps sold to foreign stamp dealers in Europe and elsewhere during the year. 3,890 bags were brought to the Colony and 3,198 bags were despatched from the various Post Offices in the Colony, as against 3,115 received and 4,040 despatched during the year 1895.

TELEGRAPHS.

49. Telegraphic communication with Kumasi was effected by means of a military field wire during the Ashanti Expedition. During 1896 this was replaced by a permanent line, constructed by the Colonial Telegraph Department. On the 31st December, 1896, the telegraph line was completed to within a distance of 25 miles from Kumasi, and by March 1897 had reached Kumasi.

50. The following table will show the steady increase both in the number of messages sent and also in the receipts for the last six years :—

Year.	Number of Offices.	Miles of Wire.	Number of Telegrams dealt with.				Receipts.		
			Public.	Government.	Cable.	Total.	Inland Telegram.	For Cable Company.	Totals.
							£ s. d.	£ s. d.	£ s. d.
1891	13	210	17,513	21,157	1,274	39,944	1,015 10 9	1,586 17 1	2,602 7 10
1892	16	265	19,773	25,365	1,516	46,654	1,182 18 4	1,822 7 0	3,005 5 4
1893	18	358	27,934	30,063	2,034	60,031	1,822 7 0	2,466 7 7	4,288 14 7
1894	20	375	38,129	31,717	3,920	73,766	2,293 8 2	2,377 1 3	4,670 9 5
1895	21	415	40,869	35,861	4,956	81,686	2,509 2 9	2,906 2 5	3,415 5 2
1896	24	512	41,303	38,551	4,876	84,730	2,620 13 1	3,182 11 3	5,813 4 4

51. Interruptions are unfortunately frequent. This is attributable to many causes; for instance, the Kumasi line goes through a dense forest, with the result that falling trees and branches break the wire, and the line along the coast is affected by the action of the sea-spray, causing corrosion of the copper conductor, which gives way under the first strain experienced in the shape of a stiff breeze or tornado.

Considerable lengths of wire have been stolen from time to time, the copper wire being valued by the natives for making armlets; in one case, in the year 1896, 240 yards were stolen. Cases of this kind eventually led to restrictive legislation.

DEFENCES.

52. The Gold Coast Constabulary is recruited from the Hausa country within the territory of the Royal Niger Company, and also from the Mohammedan States in the bend of the Niger, due north of the Gold Coast Colony. The force is nominally 1,048 strong, but is much under strength, and the men are armed with the Martini-Metford carbine; it is also provided with Maxim guns and 7-pr. M.L.R. steel guns. 195 men were enlisted in 1896, 54 took their discharge, 17 died, and 28 deserted. The discipline of the Force is good.

VOLUNTEERS.

53. The strength of the Force is 280, and the sum expended by Government in maintaining it £1,147 19*s*. 1*d*., showing a cost to the Government in respect of each Volunteer of £4. The Force is recruited chiefly from the Government and mercantile clerks, with whom it is popular.

PUBLIC HEALTH.

54. The general health of the Colony during the year 1896 shows little or no improvement on that of the previous year. In 1896 there were amongst the European population, 11 deaths of officials, and 30 non-officials, as against 15 and 23 respectively during 1895. The number of Europeans invalided during 1896 was the same as in the previous year, viz., 58. An epidemic of a malignant type of fever was prevalent during the first four months of the year, the period in which the greater number of deaths occurred.

55. The health of the native population was also unsatisfactory.

56. The Government are taking all practicable measures to improve the conditions of life; at Accra, the seat of Government, the erection of bungalows at Victoriaborg has

removed the dwellings of the officials from the thickly populated part of the town. Bungalows are also being erected at outstations for the use of officers, and the removal of the residences of white men from squalid surroundings and sources of contamination is being insisted upon as much as possible.

57. One of the main improvements in the Medical Department has been the completion of the new wing at the Central Hospital, which contains on the upper floor three wards and a sitting-room, well built and airy, for the exclusive use of Europeans. This was practically completed in 1896.

RAINFALL.

58. The total rainfall for the year was 39·31 inches, as compared with 17·33 inches in 1895, the heaviest rainfall in one month being 13·62 inches in the month of May. There was no rain in February, and only ·03 in August, and ·09 in October.

LUNATIC ASYLUM.

59. The following table shows the number of lunatic patients treated in the Government Lunatic Asylum since its establishment in 1887.

Public Lunatic Asylum, 1896.

Year.	Admitted.		Discharged.						Deaths.		Remaining.	
			Cured.		Relieved.		Not Improved.					
	M.	F.	M.	F.	M.	F.	M.	F.	M.	F.	M.	F.
1887	14	14	5	—	1	—	—	—	2	—	11	5
1888	17	3	3	—	—	—	1	—	8	3	16	5
1889	10	3	5	2	—	—	—	—	4	1	17	5
1890	12	—	2	—	1	—	—	—	6	1	20	4
1891	10	3	3	—	—	—	—	—	3	1	24	6
1892	21	2	7	—	—	—	1	—	6	1	31	7
1893	8	4	—	—	—	5	2	—	2	—	32	9
1894	22	6	—	—	11	—	—	—	3	—	40	15
1895	11	4	—	—	12	1	—	—	6	2	33	14
1896	12	9	—	—	6	3	—	—	4	3	33	16

GOLD COAST. 1896.

60. The table given below will show the classification of the diseases of the patients treated in the lunatic asylum in 1896 :—

Disease.	Male.	Female.	Total.
Mania	23	8	31
Melancholia	7	2	9
General paralysis	2	—	2
Epilepsy	2	2	4
Dementia	—	1	1
Other diseases, idiotcy, &c.	1	—	1
Totals	35	13	48

PUBLIC WORKS.

61. Though none of the large public works contemplated, such as the Central Prison, Hausa Cantonment, New Public Offices and Court House, were undertaken in 1896, a number of useful works, such as new quarters for officers, new ward, general hospital, a club house, rest houses, &c., were commenced, and in many instances completed. The fort at Kumasi deserves separate mention. It was begun soon after the departure of the troops from Kumasi in January 1896, but was not complete at the end of the year. The residency is within the fort.

62. The total expenditure of the Public Works Department for 1896 amounted to £67,738 2*s.* 10*d.*, classified as follows :—

	£	*s.*	*d.*
Establishment	15,034	15	7

Recurrent Expenditure.

	£	*s.*	*d.*
Departmental and miscellaneous charges ...	4,784	7	3
Upkeep of town roads, streets, and bridges ...	1,426	4	2
Maintenance of trade roads	2,578	6	9
Repairs to buildings	3,359	1	9

Extraordinary Expenditure.

	£	s.	d.
New works and buildings...	30,115	11	6
Alterations and additions to buildings	1,971	13	3
New roads and improvements of roads	3,769	9	1
Lands acquired	393	13	8
Miscellaneous	4,394	18	10

63. The main roads, the bridges, and the public buildings throughout the Colony have been maintained in good order, and many improvements have been effected.

64. The construction of all the roads is under the Public Works Department; but the maintenance of trade roads, that is to say, the duty of obliging the native chiefs and their men to clear and broaden their native paths, is under the different District Commissioners.

65. The construction of a main drain at Accra, which was in progress in 1896, should have a beneficial result on the health of the town; it occupies the place of an old watercourse in which the surface drainage of the greater and most populous part of Accra collected. The new drain, lined with cement and constructed with attention to levels, empties itself into the lagoon to the west of the town.

66. The principal new roads undertaken were the construction of the road from Accra to the Akim District, a distance of 16 miles, at a cost of £95 per mile, and the Danoe Dogplata road, which in the year had been completed for 15 miles.

EXPERIMENTAL WELL BORING.

67. Experiments in boring for water have been tried in the neighbourhood of Accra, the total depth bored being 206 feet; the result was not satisfactory, the water being found brackish and unsuitable for potable purposes. Water was struck at a depth of 148 feet. Further experiments are proceeding.

RAILWAYS.

68. Two railway surveys were commenced in 1896, one from Accra to Kumasi *via* Insuaim, and the other from Takoradi Bay to Tarkwa; the latter is supposed to go through the mining and timber district. In connection with possible railway projects attention is being paid to the selection of a suitable place for a boat harbour.

POLICE.

69. The strength of the police force at the close of 1896 was 345; the number of men enlisted during the year was 164. Only seven per cent of the recruits speak English, and considering that the officers are unable to speak the language of the men the details of duty are too much in the hands of native non-commissioned officers, and the difficulty of working the department satisfactorily can be understood.

PRISONS.

70. The daily average number of prisoners in custody during the year was 138, against 146 in the previous year. There was, however, an increase in the number of convictions. The number of female prisoners has considerably increased, though juvenile offenders have decreased by 8 as compared with 1895.

Year.	Males.	Females.	Juveniles.	Totals.
1892	1,475	48	11	1,534
1893	1,513	61	15	1,589
1894	1,550	74	20	1,644
1895	1,859	101	46	2,006
1896	2,044	273	38	2,355

71. Discipline has been well maintained in the prisons, and the mark system works satisfactorily.

72. The several prison buildings are reported as being in good order; the prisons at Accra and Elmina are Dutch Forts converted for the purpose but not suitable for carrying out modern prison discipline. It is contemplated to erect a central prison at Accra, and until this is done and the separate system introduced, little improvement is to be expected.

73. Seven executions took place in the prisons during the year 1896.

74. The health of the prisoners was good; the following statement contains health statistics for the prisons for the last five years:—

Year.	Total number of Prisoners.	Treated in Hospital.	Total attendances or out Patients.	Deaths.
1892	1,534	240	12,338	16
1893	1,589	337	9,262	27
1894	1,644	339	5,773	17
1895	2,006	729	10,661	37
1896	2,355	340	3,473	26

75. The number of punishments inflicted on prisoners during the year was 773. 22 prisoners received corporal punishment.

76. There were five escapes during the year. In three cases the men were recaptured.

EDUCATION.

77. Elementary education in the Gold Coast Colony is steadily progressing. During the year 1896, fifteen new schools were added to the list of schools receiving a grant-in-aid, thus bringing the total number of inspected schools for the year to 115—an advance of 15 per cent. In addition to the 115 inspected schools, there are about 70 other schools belonging to the various Missions not yet under inspection, so that there may be said to be nearly two hundred elementary schools, in which the greater part of the instruction given is in English. During 1896 a Government school was opened at Insuaim, in Western Akim. In that year also the first examination was held for the Gold Coast Government Scholarships.

78. There is not yet much provision for higher education in the Colony, though the establishment of the above-named scholarships should give a stimulus to effort in this direction.

79. Industrial work in connection with the schools is steadily increasing, and includes now some 1,000 scholars, who are receiving systematic instruction in plantation work and other industries. Thirty-five schools are provided with coffee plantations, while classes for carpentry, smith's-work, brick-making, and book-binding exist in several other schools.

GOLD COAST. 1896.

80. Reading, writing, and arithmetic in English are taught in all the inspected schools; while in the large town schools, intelligent instruction is also given in geography, history, grammar, singing, book-keeping, shorthand, and in the case of girls, plain needlework.

81. The principal statistics which are necessary to illustrate the progress of Elementary education in the Gold Coast Colony will be found in the subjoined statements A and B.

A.—*Totals for the year* 1896.

Schools.	On Books.	Average attendance.	No. examined.	Teachers examined.	Grant earned.
					£ s. d.
115	11,205	8,558	9,675	79	3,400 11 0

82. The 115 inspected schools comprise 40 belonging to the Basel Mission Society, 53 belonging to the Wesleyan Society, 16 belonging to the Roman Catholic Mission Society, and 6 Government schools. Of the 11,205 scholars in attendance at the inspected schools only 2,183 are girls.

B.—*Classification of the Scholars.*

Denomination.	St. VII.	St. VI.	St. V.	St. IV.	St. III.	St. II.	St. I.	SS. II.	SS. I.	Infants.
Basel Mission ...	25	42	59	68	103	151	209	372	381	1,100
Wesleyan do. ...	43	79	154	234	347	405	584	457	778	1,352
R. Catholic do....	5	10	30	79	109	142	208	216	285	703
Government ...	2	8	43	55	66	73	84	89	94	431
Totals ...	75	139	286	436	625	771	1,085	1,134	1,538	3,586

83. These numbers compare very favourably with those of previous years, there being an increase in all classes.

BOTANICAL.

84. Samples of the coffee and cocoa grown at the Government gardens were sent to England in 1896. The Liberian coffee fetched 70*s*. per cwt., and cocoa fetched 37*s*. per cwt.

85. The authorities of Kew kindly sent some Indian Jute seed to the Botanical Gardens; this seed was sown and germinated freely; the plants were allowed to remain for seed; this when ripe was harvested, the seed cleaned, and a large quantity has been distributed to the natives.

86. The gardens have been visited on three occasions by swarms of locusts which have done much damage; another source of destruction to the plants is the borer, which plays great havoc with the trees, especially the Arabian coffee; specimens of these borers have been obtained, and have been sent to Kew for investigation and report.

GENERAL REMARKS.

87. When the year 1896 began, the Ashanti Expedition was in progress. The political circumstances which led to this were described in paragraph 11 of the Annual Report for 1895. On Friday, 17th January, the troops entered Kumasi, the capital of Ashanti, without having fired a shot, the Governor arrived in the capital the next day, and, on Monday, the 20th January, 1896, Prempeh, the King of Ashanti, made his submission to the Governor. The sight was most impressive, and not likely to be forgotten by those who witnessed it. The action of the Governor received the entire approval of Her Majesty's Government. Prempeh was removed to the coast, and was detained at Elmina Castle until the end of 1896, when he and the other political prisoners were removed to Sierra Leone. The Governor made a tour through some of the Ashanti provinces, visiting Insuta, Aguna, Mampong and Bekwai before returning to the coast.

88. Captain D. Stewart was appointed to be Resident of Kumasi, but Colonel Pigott (21st Hussars) acted as Resident for a great part of 1896, and did much to improve trade roads. A force of 300 Hausas was placed at Kumasi, and the erection of a fort was commenced. Trade however revived very shortly during 1896.

89. The Expedition cost the Colony £120,000. Putting aside the possible gain to trade that the annexation of Ashanti may bring about, the gain to humanity alone should justify this outlay.

90. The Basel Mission established a mission station at Kumasi in 1896, and started a school, where there are already 15 Ashanti

GOLD COAST. 1896.

children. The same mission has since established schools in the following Ashanti towns:—Mampong, Agona, Kumason, Kwamang, Nsota, Kwaso and Dweso.

91. Merchants have also acquired sites at Kumasi for the erection of stores.

92. Native States in the bend of the Niger, lying directly north of Ashanti and within the British sphere of influence, were disturbed and in some cases invaded in force by the armed bands of Samory, the well-known Mohammedan slave-raider.

93. The assertion of our legitimate rights in the Hinterland of the Gold Coast Colony received special attention in the last two months of 1896, and missions were despatched to the north under Captain Stewart and Lieutenant Henderson, resulting in the occupation of Mamprusi in December 1896 and Dagarti in January 1897.

GOLD COAST.

GOLD COAST, 1897.

(For Report for 1896, *see* No. 220.)

GOVERNOR HODGSON to MR. CHAMBERLAIN.

Government House,
Accra,
July 2nd, 1898.

SIR,

I HAVE the honour to transmit to you a Report by Mr. Haddon Smith, Acting Colonial Secretary, upon the Blue Book of the Gold Coast for the year 1897.

I have, &c.,

F. M. HODGSON,
Governor.

REPORT ON THE BLUE BOOK OF THE GOLD COAST FOR 1897.

REVENUE.

1. The Colony is at present in the position of having no Public Debt. On 31st December 1897 the amount of surplus funds invested was valued at £30,000. No sales or investments were made during the year under review, the stock being the same as that reported on 31st December 1896.

753—750—10/98 Wt 21620 D & S—5 (B)

GOLD COAST, 1897.

2. The revenue collected during the year was £237,857 being £397 in excess of the previous year.

3. The subjoined statement shows the years in which the revenue exceeded the expenditure, and the amount of such excesses.

	£
1890	38,549
1891	52,614
1892	24,970
1393	22,848

4. The following table gives a comparison of the revenue for the last two years classified under the principal heads :—

Items of Revenue.	1896.	1897.	Increase.	Decrease.
	£	£	£	£
Wines, spirits, tobacco, guns, &c., (specific duties).	162,849	158,382	—	4,467
General merchandise (*ad valorem* duty).	42,126	42,606	480	—
Liquor licences	6,596	8,002	1,416	—
Stamps, (postal, telegraph, and revenue).	11,448	11,899	451	—
Other items	14,449	16,968	2,519	—
Total revenue ... £	237,458	237,857	4,866	4,467

EXPENDITURE.

5. The expenditure for the year 1897 amounted to £406,369, being £124,091 in excess of the year 1896, and £85,200 in excess of the amount originally voted by the Legislature for the services of the year. The excess is, however, due to expenditure on account of the Ashanti Expedition of 1896 being brought into account in 1897, amounting in all to £147,587.

6. The deposits for which the Colony was liable amounted to £155,470 as against £26,865 on 31st December 1896. The large increase of £128,605 is principally owing to the sum of £97,768, which is due to the Imperial Government on account of the Ashanti Expedition of 1896, having been placed during the year to the credit of the War Office in the books of the Colony.

7. The following table shows the years in which the expenditure has been in excess of revenue :—

	£
1887	17,092
1888	35,660
1889	13,614
1894	8,670
1895	35,213
1896	44,817
1897	168,512

The expenditure in 1897 included £147,587 paid on account of the Ashanti Expedition.

GOVERNMENT SAVINGS BANK.

8. The deposits show a decrease of £3,575 as compared with those of 1896. The deposits for the year under review were £3,674 as compared with £7,249 for the year 1896, while the withdrawals (including interest) were £5,637 as compared with £7,286 for the previous year, leaving an excess of withdrawals over deposits of £1,963. Interest taken out of the general revenue of the Colony and credited to depositors amounted to £106. The total amount credited, including interest, during the year was therefore £3,780 and the withdrawals £5,637. The largest decrease has been at Accra, the capital of the Colony. This is not surprising, owing to the establishment of the Bank of West Africa during the year 1897. At the same time, though the number of depositors has increased at the outstations, the amount of deposits has considerably fallen off at most stations, especially at the two important trading stations of Cape Coast and Axim.

9. The total amount at the credit of the Savings Bank in the books of the Colony on the 31st December 1897 was £3,812, as compared with £5,668 at the same period in the previous year. The whole of the £3,812 has been invested.

IMPORTS AND EXPORTS.

10. There has been an increase of the trade of the Colony for the year under review, although the country beyond Ashanti has been in anything but a settled state. The total value of imports in 1897 was £784,188, and the value of the exports £857,793, thus making the total value of the trade of the Colony for the year £1,641,981, an increase of £71,861 on the year 1896.

GOLD COAST, 1897.

11. The following table shows the state of the trade of the Colony for the last seven years :—

Year.	Imports.		Exports.	Total.
	Paying duty.	Admitted free.		
	£	£	£	£
1891	464,188	201,593	684,304	1,350,086
1892	422,026	175,068	665,064	1,262,158
1893	475,346	243,006	722,106	1,440,460
1894	518,163	170,303	850,343	1,538,809
1895	563,290	231,691	877,803	1,672,784
1896	552,968	225,041	792,111	1,570,120
1897	562,418	221,770	857,793	1,641,981

Notwithstanding the disturbed state of the country as alluded to above, it will be seen from the above table that the value of trade in 1897 has only been exceeded by that of the trade in the year 1895.

12. The principal articles of trade are :—

Imports.—Cotton, woollen and silk goods, spirits, hardware, rice, flour, provisions, tobacco, building materials, and wearing-apparel.

Exports.—Palm oil, palm kernels, rubber, gold dust, timber, and minor industries, such as coffee, cocoa, monkey skins, and kola nuts.

13. The following comparative tables shew that the greater proportion of the trade is with the United Kingdom :—

Imports.

Year.	From the United Kingdom.	From British Colonies.	From Foreign Countries.	Totals.
	£	£	£	£
1892	407,038	9,925	180,132	597,095
1893	524,037	8,719	185,597	718,353
1894	504,255	12,068	172,143	688,466
1895	539,718	81,897	173,366	794,981
1896	569,828	282,520	179,661	778,009
1897	526,411	60,787	196,990	784,188

Exports.

Year.	To the United Kingdom.	To British Colonies.	To Foreign Countries.	Totals.
	£	£	£	£
1892	471,219	2,054	191,791	665,064
1893	530,300	27,016	164,790	722,107
1894	608,258	29,765	212,320	850,343
1895	586,415	38,211	253,177	877,803
1896	536,106	37,471	218,534	792,111
1897	581,904	35,667	240,222	857,793

14. The Customs receipts during the year at the principal ports of the Colony were as follows :—

Port.	Imports, exclusive of Spirits, Gunpowder, and Guns.	Spirits.	Gun-powder.	Guns.	Totals.
	£	£	£	£	£
Axim	6,330	9,944	233	108	16,615
Cape Coast	18,819	21,717	1,926	440	42,902
Saltpond	6,519	16,586	1,731	207	25,043
Winneba	2,363	13,688	258	53	16,362
Accra	14,436	27,969	1,428	214	44,047
Adda	3,483	8,524	57	67	12,131
Quittah...	2,998	8,997	1,252	103	13,350
Other stations	4,193	24,675	448	41	29,357
Totals ... £	59,141	132,100	7,333	1,233	199,807

GOLD COAST, 1897.

15. The following statement shows the general classification of all imports and exports :—

Imports.

16. The supply of the staple articles, palm kernels and palm oil, has not been satisfactory, but the export of rubber shows a considerable improvement.

The following figures show the trade in the three important exports for the last three years :—

Year.	Palm Oil.		Palm Kernels.		Rubber.	
	Gallons.	Value.	Tons.	Value	lbs.	Value.
		£		£		£
1895	4,338,627	231,415	15,559	93,384	4,022,385	322,070
1896	2,394,563	126,857	13,046	85,349	3,735,439	313,817
1897	2,021,716	107,737	10,836	69,818	4,957,016	419,813

GOLD COAST, 1897.

17. The following statement shows the quantity and value of rubber exported from the Colony to the undermentioned countries during 1897 :—

Countries.	Quantity.	Value.
	lbs.	£
United Kingdom ...	4,595,696	391,106
Germany	361,031	28,691

In 1896 the shipments to the United Kingdom amounted to 3,307,685 lbs. valued at £283,044, and to Germany 424,093 lbs. valued at £30,398.

18. Rubber is becoming one of the prime necessities of civilisation. The last few years the use of pneumatic tyres for cycles and solid rubber tyres for carriages, has considerably increased the demand for rubber. It is believed that, if the output of rubber could be doubled in one year, so many new applications of the material would arise that the supply would not be sufficient, and consequently rubber would still retain its price. In any of the swampy regions of this Colony, where vegetation grows rank and sappy, there are certain to be found the trees or vines which produce rubber. Rubber is one of the chief sources of wealth in this Colony. No cultivation is needed, very little skill, and not much work.

19. The great fear as regards this industry is the destruction of the trees by the natives ; they are not satisfied only with tapping, but the trees are cut down so that they may obtain as much milk as possible. To ensure the preservation of the trees it may become necessary for the Government to intervene and preserve the forests by requiring natives to take out licences for working the rubber trees. The Germans in the neighbouring Colony of Togoland have such a system in force.

20. Another disadvantage that the rubber trade has to contend with is that the regions which produce rubber are precisely the regions most deadly to Europeans, and, again, when the rubber is collected it has to be brought to the port of exportation on the heads of carriers, which so increases the cost of transport that it often does not pay to export this special product.

21. The export of timber is steadily increasing ; the port of Axim in the Western District is practically the only port of

shipment, the logs being floated down the river Ancobra. The following statement will serve to show the trade of this industry for the last six years :—

Year.	Quantity.	Value.
	Feet.	£
1892	2,130,216	36,394
1893	3,407,226	50,428
1894	5,012,670	69,345
1895	3,587,337	28,245
1896	6,063,381	52,234
1897	15,236,216	90,569

22. Shippers and buyers should beware of the defective timber which is often thrown upon the market. The defective woods are stated to be the following, which are enumerated under the following technical headings :—"Hollow portion," "Shakes" "Star Shakes" "Wormed."

The dimensions of mahogany logs most in demand are 16 to 30 feet in length and 24 to 36 inches square.

23. The cultivation of coffee and cocoa is still on the increase, though the shipment of the former has decreased during the year 1897 as compared with 1896 ; at the same time a number of new plantations, especially in the Akwapim district, have been started. Coffee cultivation in this Colony is greatly handicapped. Those who have plantations near the coast have great difficulty in obtaining a sufficient supply of fresh water, while those whose plantations are far removed from the port of shipment have the cost of transport to contend with.

24. The following table shows the shipment of cocoa, coffee, and other products for the last five years :—

Year.	Cocoa.		Coffee.		Copra.		Guinea Grain.		Kola nuts.	
	lbs.	Value.	lbs.	Value.	lbs.	Value.	lbs.	Value.	Packages.	Value.
		£		£		£		£		£
1893 ...	3,460	93	21,437	630	248,304	831	183,224	621	979	25,116
1894 ...	20,312	546	41,488	1,265	649,600	1,940	174,412	1,186	1,202	28,511
1895 ...	28,906	470	51,755	1,753	482,608	1,712	154,693	580	2,352	30,565
1896 ...	86,754	2,275	141,836	4,065	273,840	852	26,594	193	3,156	33,278
1897 ...	156,672	3,196	102,146	3,068	272,272	803	22,873	229	4,278	37,870

25. The number of monkey skins shipped in 1897 amounted to 14,438, valued at £811. This trade has considerably fallen off and can no longer be considered as one of the important exports of the Colony. In 1894, 168,405 skins, valued at £41,001, were exported, whereas in 1896 the number of skins fell to 67,660, valued at £8,662, and in the year under review the decrease again is very marked. This no doubt is owing to the distance hunters have to go to procure their victims.

26. The gold mining industry is carried on chiefly in the Western District—in Wassaw and Appolonia. Three or four companies are doing steady work. The gold reefs of the mining district have been declared by experts to be similar to those of Johannesburg, and there is no reason why gold mining in this Colony in a very short space of time should not prove a decided success. The industry up to the present has been hampered owing to the serious difficulty of transporting the necessary machinery from the coast to the mines; but the Government is constructing a railway from the coast to the mining districts in the neighbourhood of Tarquah, and, when this is completed, it is confidently anticipated that the gold industry will receive an impetus which will result in the larger investment of capital for the development of existing mines and the opening of new ones. On the other hand, it cannot be expected that investors will risk their money in this part of Africa unless they are assured that they will have proper security as regards the land which has been conceded, and the Government has under consideration a Lands Bill, one of the objects of which is to afford such security.

27. The following table shows the weight and value of gold exported from the Colony during each of the last five years.

Year.	Weight.	Value.
	Oz.	£
1893	21,972	79,099
1894	21,332	76,795
1895	25,416	91,497
1896	23,941	86,186
1897	23,555	84,797

28. Considering the large extent of country that has been opened up during the last two years, the increase of spirits imported into the Colony is very small. The figures do not seem to shew that the demand for spirituous liquors is spreading among the native population.

GOLD COAST, 1897.

29. The following table gives a comparison of the importations of wines and spirits into the Colony during the years 1896 and 1897 :—

Description of Liquor.	Quantity Imported.		Increase.	Decrease.
	1896.	1897.		
	Old Wine Gallons.	Old Wine Gallons.	Old Wine Gallons.	Old Wine Gallons.
Rum	833,135	878,052	44,917	—
Gin and Geneva	330,804	335,163	4,359	—
Whisky	11,432	12,987	1,555	—
Brandy	822	760	—	62
Wines	22,177	18,969	—	3,208
Ale and Porter	26,220	23,388	—	2,832
Liqueurs	2,189	1,297	—	892
Totals ...	1,226,779	1,270,616	50,831	6,994

SHIPPING.

30. There is little change in the number or tonnage of vessels to record during the year under review. The figures for the years 1896 and 1897 are as follows :—

Nationality of Vessels.	Sailing Vessels.				Steamers.			
	1896.		1897.		1896.		1897.	
	No.	Tonnage.	No.	Tonnage.	No.	Tonnage.	No.	Tonnage.
United Kingdom ...	1	105	3	315	254	366,857	247	361,742

France	—	—	—	—	50	65,870	70	92,449
United States ...	9	4,670	10	4,882	—	—	—	—
Other Nations ...	2	559	—	—	9	19,199	8	18,059
Totals ...	16	6,874	16	6,582	400	553,794	415	580,277

31. The mail service with England remains the same, the voyage taking, on an average, from Liverpool to Accra, a distance of 3,920 miles, 21 days. The mail service from the Colony to England still continues most irregular, and there is no competition.

LEGISLATION.

32. During the year 1897, the Legislative Council passed 23 Ordinances, of which the following are the most important :—

Ordinance No. 3 amends the Spirit Licence Ordinance 1887. It raises the half yearly and yearly licences from £2 10*s*. and £5 respectively, to £5 and £10 respectively, for every store situated in a place to which the Ordinance of 1887 originally applied. It prescribes the duties of £2 10s. for half yearly licences, and £5 for yearly, payable for every store situate in a place to which the Ordinance of 1887 has been applied, or shall by section 3 thereof by the Governor by proclamation be declared to apply. It imposes on every chief of a particular locality the duty of reporting every breach of the Ordinance in that locality that comes to his knowledge to the District Commissioner within whose jurisdiction the locality is situated.

Ordinance No. 4 increases the summary criminal jurisdiction of District Commissioners. Every District Commissioner is given jurisdiction to hear and determine besides the offences under Book II of the Criminal Code, misdemeanours and certain felonies under Book III of the Code, also attempts to commit, and conspiracies in respect of, any of the said offences. He is, however, restricted as regards the punishment he can inflict. He cannot impose a fine exceeding £50, or a term of imprisonment exceeding 6 months, except where under the Code or any other law a larger fine or a longer term of imprisonment is given.

No. 6, "The Peace Preservation Ordinance, 1897," suppresses the assembling together of armed men for unlawful purpose ; and, for the preservation of the peace, empowers the Governor in Council by proclamation published in the Gazette to declare it unlawful to carry arms or ammunition within any specified part of the Colony, but reserving the right to impose conditions and regulations under which the carrying of arms and ammunition may be licensed, and to make provision for the persons who may grant licences to have or carry arms or ammunition. Provision is made for a District Commissioner himself to search or to direct a search warrant to any person to enter and search any house, buildings, or places in the proclaimed district for any arms or ammunition suspected to be there in contravention of the Ordinance. Power is given to the Governor in Council to fine, not exceeding £500, under certain circumstances, any chief in a

GOLD COAST, 1897.

proclaimed district, and provision is made, where additional constabulary or police has been sent to a proclaimed district, for the costs thereof to be paid by the inhabitants.

Ordinance No. 20, "an Ordinance to amend the Customs Ordinance," besides amending certain sections of Ordinance No. 10 of 1876, prevents any master, without the consent of the Comptroller or other proper officer of Customs, from discharging or permitting to be discharged, unless included in the declaration or being intermediate goods are declared to on transire, (1) any cargo, or (2) any articles or things comprised in the Victualling Bills made under sections 126 of the Customs Consolidation Act, 1876, or (3) any ship's stores wherever taken on board, or (4) any other article or thing, by whomsoever taken on board or shipped that is likely to contribute to general average. It vests in the Governor in Council the power to make, vary, and revoke rules to determine the fees payable under section 14 of Ordinance No. 10 of 1876, the duties of the Comptroller as Shipping Master, and to declare in respect of such duties the persons by whom fees shall be paid, and the deductions, if any, which may be made from wages by the master in respect thereof.

Ordinance No. 21, "an Ordinance to amend the Firearms, Ammunition, and Gunpowder Ordinance, 1892," provides for the depositing of flint guns with unrifled barrels in private warehouses at seaports and their removal therefrom, and for the issuing by the Comptroller at Accra and a District Commissioner at outstations licences for such private warehouses.

PUBLIC HEALTH.

33. The general health of the Colony shows a slight improvement on the two previous years, though the death-rate still remains exceptionally high. It must be remembered that the Europeans in the Colony are for the most part men in the prime of life, as there are no European children in the Colony and a man of 50 years of age is an exception. The following table shows the death-rate among Europeans for the year under review, also the number who have been invalided from the Colony :—

—	Population.	Died.	Invalided.	Death-rate per 1,000.	Per 1,000 Invalided.
Government officials ...	160	6	31	37·5	137·50
Non-officials	362	34	47	93·92	129·83

In the year 1896 there were 41 deaths among the Europeans and 58 were invalided.

34. The health of the officers employed in Ashanti and the Northern Territories is far better than that of those employed on the Coast, and, considering the hard life that many of these have to lead and that they are often away from the usual comforts of life, the conclusion to be drawn is that the climate of the "hinterland" is far healthier than that of the Coast.

35. It will be noticed from the foregoing table that the death-rate among the official class is less than that among the mercantile community. This may perhaps be attributed to the leave arrangements of the Government service whereby all European officials are permitted to proceed to Europe on leave after twelve months residential service on the Coast, and to the houses occupied by Government officials being away from the thickly populated part of the town. This is no trivial matter, for climatic conditions are such that what is at most an inconvenience in more temperate climates is a veritable calamity to the European resident in West Africa. Much of the comfort of life depends on attention to its minutiæ, and this is pre-eminently so in a country such as the Gold Coast.

36. Facilities for hospital treatment at Accra have much improved, and the arrangements in the Colonial hospital are as complete as possible. The introduction of European nurses has proved a great boon, and no doubt the extra nursing has saved many lives during the past year.

RAINFALL.

37. The following table shows the rainfall for the different months of the year at the most important towns of the Gold Coast Colony :—

Month.	Stations.					
	Accra.	Aburi.	Axim.	Adda.	Cape Coast.	Quittah.
January	0·83	0·45	0·00	0·00	0·78	0·00

PUBLIC WORKS.

38. The fort at Kumassi has been completed, also a number of minor works, such as officers' quarters, offices, magazines, &c.

The most important works undertaken have been the construction of roads from chief coast centres to the interior. The following roads have been undertaken :—

From Accra to the Akim district, 25 miles.

From Tinkranku to Kpong, total length 190 miles. Work started in July, 25 miles completed up to 31st December, 1897.

From Axim to River Ankobra, 3 miles; work almost completed.

From Bonsa to Tarkwa, total 12 miles; 2 miles completed: work exceptionally heavy.

From Danoe to Dogplata, total length 23 miles, work completed.

The main roads, the bridges, and the public buildings throughout the Colony have been maintained in good order, and many improvements have been effected.

EXPERIMENTS FOR WATER SUPPLY.

39. A sum of money was specially set aside for carrying on investigations in the valley immediately behind Accra, with a view

to collecting water under ground into a well or wells to be pumped up into a reservoir on the high land adjacent. Special officers were sent out to make the necessary surveys, and to do the necessary borings and sinking of pits; but up to the end of the year the results were unsatisfactory, as the bulk of the water encountered was saline. The investigations are still being continued.

RAILWAYS.

40. Two railway surveys which were commenced in 1896 were completed in 1897; one from Accra to Kumassi *via* Insuaim, and the other from Takoradi Bay to Tarquah. Arrangements have been made for the construction of a line from Sekondi to Tarquah. This line will go through the mining and timber districts, and work was commenced early in 1898.

POST OFFICE.

41. There is not much change in the working of this department as compared with previous years. The gross revenue of the department for the year under review amounted to £4,009 4*s.* 6*d.* as against £4,285 11*s.* 5*d.* in 1896, showing a decrease of £276 6*s.* 11*d.*; the falling off is attributable to the money order transactions and the decrease in the sale of stamps. The establishment of a bank at Accra has undoubtedly curtailed the progress of the money order business. Money orders of the value of £12,974 7*s.* 3*d.* were issued during the year, as compared with £34,207 5*s.* 11*d.* issued during the year 1896.

Year.	No. of Letters, &c. posted.	No. of Registered Articles dealt with	Total amount of Money Order transactions.	Total amount of Postal Order transactions.	No. of Parcels.
			£ s. d.	£ s. d.	
1893	335,112	15,956	13,313 4 9	1,231 3 6	2,762
1894	386,028	18,068	13,271 8 3	2,021 7 6	3,224
1895	390,502	17,474	17,076 14 11	2,150 13 6	3,518
1896	545,824	19,324	34,207 5 11	2,489 9 6	3,563
1897	584,216	23,942	12,974 7 3	2,549 15 6	3,907

GOLD COAST, 1897.

42. 4,311 bags were brought to the Colony, and 3,673 bags were despatched from the various Post Offices in the Colony during the year, as against 3,890 received and 3,678 despatched during the year 1896.

TELEGRAPHS.

43. During the year 1897 the permanent telegraph line to Kumassi was completed. On this line hardly any poles are used, the wire being supported by trees. A line was put up between Kumassi and Kintampo a distance of 100 miles. This line should work satisfactorily as it is beyond the forest range. Owing to the increase of traffic it has been found necessary to erect a duplicate line between Accra and Cape Coast; this extra line was nearing completion at the close of the year.

There are 26 Government telegraph stations in the Colony: 17 on the coast line, and 9 in the interior.

44. The total number of messages dealt with during the year under review was 84,580 compared with 79,901 messages, showing an increase of 4,679 over the previous year. Out of the total number 84,580, Government messages amounted to 41,757, leaving the revenue to profit by 42,833 messages which brought in revenue amounting to £2,322 8*s*. 9*d*., being a decrease on the year 1896 of £206 4*s*.

45. The following table shows the number of messages sent, also cash received for the last five years :—

Year.	No. of Offices.	Miles of Line.	No. of Messages.	Cash receipt.
				£
1893	18	368	60,031	1 822
1894	20	375	73,776	2,293
1895	21	415	81,681	2,509
1896	24	512	79,901	2,538
1897	26	626	84,580	2,333

46. Interruptions have not been so frequent during the year 1897 as in previous years. Cases of theft of telegraph wire

or the destruction of telegraph property have considerably decreased. This is no doubt owing to the legislation which placed the responsibility for the maintenance of the line on the Chief through whose district it passed.

EDUCATION.

47. Fair progress has been made in the cause of education during the year 1897, though not at the same rate as in the preceding year. The total number of schools inspected during the year 1897 was 117, an increase of two. There is, however, a very considerable increase of new and as yet unassisted schools. This is owing to the pioneer work mainly done by the Basel Mission in the Ashanti district, and many of these schools will be shortly on the assisted list. Some of the Roman Catholic Mission Schools have been closed, and this accounts for a smaller number of scholars in average attendance.

48. As yet little has been done for the higher or secondary education of the Colony except the establishment of Government scholarships awarded on the result of the Cambridge senior local examination held in December of each year. Up to the present no candidate from this Colony has succeeded in satisfying the examiners. The Basel Mission, however, and the Wesleyan Mission have established high schools with some satisfactory results. The higher education is in some measure confined to the training of teachers, and the Basel Mission, as well as the Government schools at Accra and Cape Coast, have started giving suitable instruction to their pupil teachers.

49. *Industrial Instruction.*—Owing to the action of the Government in the matter of grants in aid for this subject, industrial work is receiving great attention at the hands of the managers of assisted schools. Nearly all the schools of any size are starting plantations for coffee, cocoa, and other products of the soil, and most of those with very fair success. Besides these, there are nearly forty schools to which are attached departments for carpentry, smith work, and book-binding. The most notable move in this direction is the building and furnishing of technical departments at the Government schools at Accra and Cape Coast. These will be completed early in the New Year, when a course in carpentering, &c. will be started.

50. The elementary subjects, reading, writing, and arithmetic, are taught in all schools, and the older scholars in most of the schools learn geography, history, book-keeping, shorthand, and needlework.

GOLD COAST, 1897.

51. The following tabulated statements will show the present state of elementary education in this Colony :—

A.—*Totals for the year* 1897.

Schools.	No. on Books.	Average attendance.	Teachers examined.	Grant earned.
119	11,638	8,798	100	£ 3,600

Since 1896 six new schools have been opened.

B.—*Classification of the Scholars.*

Denomination.	St. VII.	St. VI.	St. V.	St. IV.	St. III.	St. II.	St. I.	SS. II.	SS. I.	Infants.
Basel Mission ...	36	47	55	61	147	163	208	283	310	776
Wesleyan ...	38	96	184	279	380	454	516	480	545	1,730
R. Catholic ...	3	19	42	93	101	124	163	163	223	636
Government ...	9	40	43	59	83	86	110	143	116	371
Totals ...	86	202	324	492	711	827	1,057	1,067	1,194	3,513

This gives a decrease of 202 scholars as compared with 1896. The decrease is mainly to be observed in the sub-standard and infants.

BOTANICAL.

52. A quantity of Indian jute (*corchorus capsiolaris*) has been grown, and allowed to seed, and 112 packets of seeds have been distributed to the Missionaries and Chiefs with instructions as to

sowing, &c. The results are at present unknown. Jute growing is not popular with the natives, the mode of extracting the fibre necessitating hard work.

Theobroma cacao.—About 3,000 trees have been planted in the Government gardens. During the year 9 bags containing 1 cwt. each were shipped to England and obtained a very fair price.

Arabian coffee does not do well in this Colony, but Liberian coffee gives every satisfaction; in the year under review there were 3,400 trees in the Government gardens, and out of this number 2,300 were bearing fruit.

Cinnamomum zeylanicum.—The experiment of growing this cinnamon has not been successful, but further trials are to be made.

A quantity of the best white *Egyptian cotton* has been planted; the fibre obtained is rough and strong but dull in colour, owing to the moist atmosphere.

A large quantity of arrowroot (*maranta arundinacea*) which was planted in 1896 was taken up in 1897; though this plant grows well, it will never pay, owing to the high wages for labour, to grow it either for local consumption or for exportation.

Samples of fibres have been prepared from *furcræa gigantea*, *agave rigida*, var. *sisalana*, and jute. The two former produce a good strong fibre from 5 to 7 feet long; the latter is very poor, only being about 30 inches in length and is of a very dull colour and without any gloss.

53. The great curse in the agricultural districts of this Colony is a small insect commonly known as "the borer." To which class of beetles it belongs is uncertain, but it has been ascribed to the genus *herpetophygas* of which the only species hitherto known is said to have been found in Kaffraria; it enters near the bottom and makes a hole rootwards, thereby doing fatal injury to the tree. Every effort has been made to try and exterminate this pest. The soil all over the garden has been loosened to a depth of 8 or 10 inches, trees infested have been tarred, and a piece of steel wire pointed and barbed at one end has been inserted into the holes caused by the borer so as to kill them in the young stage.

GENERAL REMARKS.

54. The year under review, in which Her Majesty the Queen completed the 60th year of Her reign, was an eventful one in the history of this Colony. The Ashanti Expedition of 1895–96 having opened up the way into the interior, there devolved upon

GOLD COAST, 1897.

the Government the duty of taking steps to establish British authority in the countries beyond Kumassi in which treaties had already been made with the various Chiefs during the years 1892 and 1894.

55. Captain Donald Stewart was accordingly despatched by the Governor of the Gold Coast from Coomassie on the 27th of November, 1896, to occupy Gambaga, and Lieutenant F. B. Henderson, R.N., was sent to occupy Bona and Wa.

56. The French had previously sent from the Senegal an expedition under Lieutenant Voulet, who occupied Wagadugu in September 1896 and then made a treaty in the Gurunsi country with a Chief named Amrahia; while the Germans under Dr. Grüner had made their way through Salaga and Yendi in the Neutral Zone to Sansanné Mango.

57. Captain Stewart reached Gambaga on the 24th of December 1896, and hoisted the British flag. On the 3rd of January 1897 a German officer, Baron von Massow, arrived at Gambaga, and wished to hoist the German flag by the side of the British one; but Captain Stewart refused to allow it, and Baron von Massow returned to Sansanné Mango.

58. Captain Stewart then proceeded on his way to Wagadugu, leaving a detachment to hold Gambaga. At Tenkrugu, half-way between Gambaga and Wagadugu, he was met by messengers from the King of Mossi, who had been driven out of Wagadugu by the French and appealed to him for protection in virtue of the treaty concluded with Mr. Ferguson in 1894. On the 7th of February 1897 Lieutenant Voulet also arrived at Tenkrugu. In order to avoid a conflict, Captain Stewart arranged with Lieutenant Voulet that the British mission should retire within the boundaries of Mamprusi, and the French mission should at the same time retire beyond the boundaries of Tenkrugu, and this arrangement was carried out.

59. Meanwhile, Lieutenant Henderson, proceeding to the westward, had, on the 2nd of January 1897, arrived at Bualé, where he found the Sofas in great force. The attitude of the Sofas was not unfriendly, but they would not let him go to Bona. They had occupied Bona and killed the king, and had established communication across the Gold Coast "Hinterland" with the Germans at Kraki. Wa was also held by the Sofas; but Mr. Henderson pushed on and hoisted the British flag there on the 9th of January, the Sofas retiring when he came. Samory himself was at Jimini in French territory. From Wa, Mr. Henderson went in February into the Gurunsi country, where he saw Amrahia, with whom the French had made a treaty, and ascertained that there was no King of Gurunsi, but that the country was split up into small portions, with five of which Mr. Henderson concluded treaties. On

returning to Wa, he received a deputation from Bona and Lobi, who reminded him that they had made a treaty with Mr. Ferguson, and asked for protection against the Sofas. Bona had already been raided by the Sofas, but Lobi was still untouched. Mr. Henderson, therefore, went to Dawkita, or Dokta, an important town in Lobi, about 20 miles north of Bona, and there on the 16th of March made a treaty with the new King (Kampa) of Bona, which was also signed by Danwa-Massa, Chief of Bona and Governor of Lobi.

60. The effect of Mr. Henderson's occupation of Dokta was to prevent the Sofas from raiding Lobi, and it appears to have been owing to their being otherwise unable to obtain food that they attacked him at Dokta on the 29th of March. After holding Dokta for four days with only 43 men against a force of Sofas estimated at 7,000, Mr. Henderson was compelled to retreat to Wa. This he did with a loss of two men killed and eight wounded, while the Sofa loss was estimated at 400 men.

61. The Sofas followed Mr. Henderson to Wa, where he was joined by a detachment of the Gold Coast Constabulary under Captain Cramer and for three days successfully resisted the attempts of the Sofas to drive him out; but, owing to the cowardice or treachery of the King of Wa, the British force ran short of water, and Mr. Henderson decided that the place must be evacuated. Before leaving, however, he attempted to parley with the Sofa leader, and went alone into the Sofa camp for that purpose. There he was detained by the Sofas, who said that he must go to Jimini to see Samory. Before leaving he arranged that, if he was detained, the British force should leave Wa the same night. Captain Cramer accordingly, after unsuccessfully attempting to obtain Mr. Henderson's release, and receiving a note from him to the effect that he did not think that the Sofas would do anything to him beyond keeping him a prisoner, left Wa on the 5th of April. The column was thrown into confusion by a panic among the carriers, but ultimately, after falling in with a French party under Captain Scal, Captain Cramer succeeded in joining Captain Stewart at Yariba on the 20th of April. In the course of the retreat Mr. Ferguson, who had been previously wounded, was abandoned by his carriers and was killed by a party of Sofas. Mr. Henderson was taken by the Sofas to Jimini. There he saw Samory, who appears to have been, on the whole, friendly, although intensely suspicious. With regard to the attack on the British force, Samory would only say that it came from God After being detained for a few days at Jimini, Mr. Henderson was sent back to the coast, and arrived at Accra on the 14th of June.

62. Before this, the French under Captain Scal, having espoused the cause of Amrahia, against Barbatu, another Gurunsi raider, enabled Amrahia to defeat Barbatu, who took refuge with

GOLD COAST, 1897.

Captain Stewart at Yariba. Captain Stewart refused to give Barbatu up to the French; and on the 22nd of April he made with Captain Scal a "provisional agreement to prevent any conflicts or collisions between the French and English subjects in territories that are in dispute." A temporary boundary was agreed upon, which left Mamprusi and Dagarti in British occupation, and Gurunsi and Mossi in the occupation of the French.

63. Shortly afterwards another French expedition under Captain Hugot arrived on the scene from the north, and, upon the excuse that Barbatu, for whose conduct Captain Stewart had made himself responsible, had raided across the provisional boundary, proceeded to occupy Wa, which had been evacuated by the Sofas after the capture of Mr. Henderson.

64. The commencement of the rainy season made further operations difficult at this time, and it was arranged, on the recommendation of Sir W. Maxwell, that an officer should be sent out specially to take the command of the Colonial forces in the "hinterland" as soon as the rains were over. Major H. P. Northcott was selected for this duty, and left England on the 16th of October to take up the command, with the title of Commissioner and Commandant in the Northern Territories.

65. Pending Major Northcott's arrival, Major Jenkinson was in command of the Colonial forces; and in November, hearing that Bona had been evacuated by the Sofas, Major Jenkinson pushed on with great promptitude and effected the occupation of the town on the 17th of that month.

66. While these events were taking place on the north and west, reports kept coming in regarding the activity of German officials in the Neutral Zone, and on the 2nd of July the German Government were asked by Her Majesty's Government for an assurance that they would abstain from any operations against Yendi, to which a German expedition was said to be then advancing. It was pointed out to the German Government that the terms of the agreement of 1888 could not be disregarded by one of the parties to it without giving the other the right to secure its interests in such way as it might consider best, irrespective of that agreement. No answer was received from the German Government, and on the 2nd of August the Governor of the Gold Coast was ordered to occupy Salaga, which was done on the 21st of that month. At the close of the year, the British forces were still in occupation of Salaga. But, subsequently, assurances were received from the German Government that they had given orders for the withdrawal of any German troops which might be in the Neutral Zone, and Her Majesty's Government agreed to withdraw the British troops from the Zone with the

reservation that any infringement of the agreement by either party in the future would give the other the right to send troops again into the Neutral territory.

67. On the 14th of December 1897 the Colony suffered a severe loss by the lamented death at sea, on his way to England, of His Excellency Sir William Maxwell, K.C.M.G., the Governor of the Gold Coast. The illness to which he succumbed was induced by the hardships he had undergone in the "hinterland," where he had been engaged during the unhealthiest season of the year in dealing with the various difficult questions that had arisen in connection with the movements of the French and the Sofas. To quote from the despatch of the Acting-Governor to the Secretary of State when reporting the late Governor's death, "His whole life was centred and absorbed in the work which his position cast upon him," and his death occurred at a very critical time in the history of the Colony, when the energy and devotion to duty which he displayed could ill be spared.

G. B. HADDON SMITH,

Acting Colonial Secretary.

ACTING GOVERNOR LOW to MR. CHAMBERLAIN.

Government House,

Accra,

1st July 1899.

SIR,

I HAVE the honour to transmit to you a Report by Mr. Haddon Smith, Acting Colonial Secretary, upon the Blue Book of the Gold Coast for the year 1898.

I have, &c.,

WM. LOW,

Acting Governor.

3585—800—8/99 Wt 21935 D & S—5 (B)

GOLD COAST, 1898.

REPORT ON THE BLUE BOOK OF THE GOLD COAST FOR 1898.

FINANCIAL.

The following table shows the heads of revenue and expenditure for the year 1898 as compared with those of the preceding year:—

Revenue.

Head.	1897.	1898.	Increase.	Decrease.
	£	£	£	£
Customs	200,988	225,766	24,778	—
Light dues...	1,129	1,111	—	18
Licences and material ... ... Revenue not otherwise classified	10,499	12,496	1,997	—
Fees of court or office payments for specific services, and Reimbursements in aid... ...	16,221	15,852	—	369
Post Office	424	460	36	—
Rents of Government property...	11	24	13	—
Interest	1,081	1,017	—	64
Miscellaneous	7,502	2,096	—	5,406
Grant in aid of Northern Territories.	—	45,000	45,000	—
Total	237,855	303,822	71,824	5,857

2. The total revenue during the year, exclusive of the grant in aid of £45,000, amounted to £258,822 as compared with £233,179 the preceding year, showing an increase of £25,643.

3. The increase under the head of Customs is owing to the improvement in trade, and the reasons of this are dealt with more fully under the heading of Imports and Exports of this report.

4. The cost of licences for the sale of liquors having been doubled during the year on the coast towns, and the system of requiring rum shops in all parts of the Colony to be licensed, will account for the increase under the head of "Licences."

5. The parliamentary grant of £45,000 was made in aid of expenses of operations in the Northern Territories of this Colony.

(6.) *Expenditure.*

Head.	1897.	1898.	Increase.	Decrease.
	£	£	£	£
Pensions and gratuities	4,607	5,198	591	—
Governor and Legislature ...	5,143	4,446	—	697

Transport	13,080	14,780	1,700	—
Military expenditure	4,026	—	—	4,026
Carried forward	170,415	164,565	12,050	17,900

Head.	1897.	1898.	Increase.	Decrease.
	£	£	£	£
Brought forward	170,415	164,565	12,050	17,900
Rent, and purchases of land and houses.	3,131	1,750	—	1,381
Miscellaneous services	12,728	9,849	—	2,879
Special services	2,023	2,916	893	—
Post and telegraph offices ...	10,326	10,572	246	—
Public works	60,162	66,695	6,533	—
Ashanti special expenditure ...	147,588	603	—	146,985
Northern Territories	—	121,022	121,022	—
Totals	406,373	377,972	140,744	169,145

7. This gives a decrease in the expenditure of the Colony in the year of £28,401 as compared with the preceding year.

8. The increase in the cost of the Volta preventive service was caused by an increase in the European staff, which had been found necessary in order to keep down smuggling on this river.

9. The increase under constabulary is owing to salaries for 1897 due to officers and men who were serving in the Northern Territories being paid in 1898.

10. Under the heading Ashanti special expenditure in 1897 is included an amount of £97,769, the expenditure incurred by the Imperial Government in connection with the expedition to Kumasi in 1895 and 1896.

11. The cost of the operations in the Northern Territories in 1897, amounting to £24,034, does not appear in these accounts, as it was treated temporarily as an advance.

12. The following comparative table shows the revenue and expenditure for the last five years :—

Year.	Revenue.	Expenditure.
	£	£
1894 ...	218,261	226,932
1895 ...	230,076	265,289
1896 ...	237,460	282,278
1897 ...	233,179	401,692
1898 ...	303,822	377,976

13. Although the Colony has no public debt, it is under an obligation to refund to Army funds an amount of £98,075, expended for the Ashanti expedition, and it has also to repay to the Imperial Treasury an amount of £24,870 which has been advanced to cover the cost of the extension of the telegraph line in the Northern Territories, in addition to the advances, amounting to £109,067, obtained for railway works.

TRADE, AGRICULTURE, AND INDUSTRIES.

Imports and Exports.

14. The total value of imports in 1898 was £960,336, and the value of exports £992,998, thus making the total value of the trade of the Colony for the year £1,953,334, an increase of £311,353 on the year 1897.

15. The following table shows the general classification of all imports :—

Articles.	Value in Sterling	
	Of imports in detail, excluding expenses.	Value, excluding expenses.
	£	£
I.—Live animals, food, drink, and narcotics.	—	200,519
II.—Raw materials :—		
(*a*) Metal	2,550	
(*b*) Other	6,257	
		8,807
III.—Manufactured articles :—		
(*a*) Textile	291,646	
(*b*) Metal	51,111	
(*c*) Other	169,569	
		512,326
IV.—Coin and bullion... ...	—	238,684
	Total ... £	960,336

GOLD COAST, 1898.

16. The customs receipts during the year at the principal ports of the Colony were as follows :—

Port.	Imports, exclusive of Spirits, Gunpowder, and Guns.	Spirits.	Gun-powder.	Guns.	Totals.
	£	£	£	£	£
Accra	14,934	29,906	1,512	186	46,538
Addah	3,798	9,034	154	26	13,012
Axim	6,925	11,094	644	85	18,748
Cape Coast	20,335	28,171	2,537	905	51,948
Quitta	3,025	8,424	1,572	75	13,096
Saltpond	7,169	20,534	1,703	568	29,974
Winneba	2,880	16,174	793	157	20,004
Other stations	4,646	26,152	554	46	31,398
Totals ... £	63,712	149,489	9,469	2,048	224,718

17. The following comparative table shows that the greater proportion of the import trade is with the United Kingdom :—

Year.	From the United Kingdom.	From British Colonies.	From Foreign Countries.	Totals.
	£	£	£	£
1894	504,255	12,068	172,143	688,466
1895	539,718	81,897	173,366	794,981
1896	569,828	28,520	179,661	768,009
1897	526,411	60,787	196,990	784,188
1898	726,197	43,101	191,038	960,336

18. The increase in the value of exports in 1898 over that of the preceding year amounts to £135,205.

19. From returns received from Ashanti it is shown that from 70,000 to 90,000 lbs. of rubber pass weekly, during the season, through Kumasi to the coast. There are other roads to the coast by which rubber is carried in large quantities from west and east; the main supply, however, from the west and north of the Colony now goes through Kumasi, as being the safest road to travel. Given improved transport, the output of rubber from this Colony could be trebled, considering that the whole of this rubber is at present brought down to the coast on the heads of carriers, that the cost of each carrier from Kumasi to Cape Coast is at the minimum 10*s*., and that it takes 1,400 carriers to bring down 70,000 lbs. of rubber, bringing the total cost to £700 for transport alone for an eight days' journey, to say nothing of the employment of human beings who could be far more profitably employed for the benefit of trade were they not made to perform the duties of beasts of burthen, owing to the want of railways throughout the Colony. Rubber is one of the chief sources of wealth in this Colony; the trees and vines which produce it are found in the many swampy regions of the Colony, and as no cultivation is needed, very little skill, and not much work, there is no difficulty in getting the natives to collect it. Moreover it is known that if the output of rubber could be doubled in one year, so many new applications of the material would arise that the supply would not be sufficient, and, consequently, rubber would still retain its price.

20. Timber, another of the most important products of this Colony, is handicapped as regards export owing to want of proper transport. It abounds in the forests of Ashanti, but cannot be used for trade purposes until a railway is run through the country.

21. Where there is water transport the timber trade is largely on the increase. Formerly, the port of Axim, in the Western District, was practically the only port of shipment, the logs being floated down the river Ancobra; but, during the year 1898, timber has been brought down the river Volta and shipped at Ada, a port in the Eastern District.

22. The different kinds of woods suitable for building purposes are stated to be odum, mahogany, and cedar.

Odum is a magnificent wood which withstands the ravages of that pest the white ant.

Palm oil still holds its own as one of the chief exports of this Colony.

GOLD COAST, 1898.

23. The following table shows the general classification of all exports :—

Articles.	Value in Sterling.		
	Produce and Manufacture of the Colony.	British and Foreign and other Colonial Produce and Manufacture.	Totals.
	£	£	£
I.—Live animals, food, drink, and narcotics.	181	698	879
II.—Raw materials :—			
(*a*) Metal	63,838	—	63,838
(*b*) Other	895,701	—	895,701
III.—Manufactured articles :—			
(*a*) Textile	48	2,667	2,715
(*b*) Metal	—	388	388
(*c*) Other	66	2,224	2,290
IV.—Coin and bullion... ...	—	27,187	27,187
Total ... £	959,834	33,164	992,998

24. The following table shows the trade in three important exports for the last three years :—

Year.	Palm Oil.		Palm Kernels.		Rubber.	
	Gallons.	Value.	Tons.	Value.	lbs.	Value.
		£		£		£
1896	2,394,563	126,857	13,046	85,349	3,735,439	313,817
1897	2,0[illegible]1,[illegible]6	107,737	10,836	69,818	4,957,016	419,913
1898	2,145,138	114,288	9,732	66,378	5,984,984	551,667

25. The following statement will serve to show the trade of the timber industry for the last five years :—

Year.	Quantity.	Value.
	Feet.	£
1894	5,012,670	69,345
1895	3,587,337	28,245
1896	6,063,381	52,234
1897	15,236,216	90,569
1898	13,620,965	110,331

26. The following comparative statement shows the quantity and value of rubber exported from the Colony to the undermentioned countries during 1898 :—

Countries.	Quantity.		Value.	
	1897.	1898.	1897.	1898.
	lbs.	lbs.	£	£
United Kingdom	4,595,696	5,380,755	391,106	495,502
Germany	361,031	600,800	28,691	55,910

27. The following comparative table shows that the greater proportion of the export trade is with the United Kingdom :—

Year.	To the United Kingdom.	To British Colonies.	To Foreign Countries.	Totals.
	£	£	£	£
1894	608,258	29,765	212,320	850,343
1895	586,415	38,211	253,177	877,803
1896	536,106	37,471	218,534	792,111
1897	581,904	35,667	240,222	857,793
1898	713,335	41,667	237,996	992,998

GOLD COAST, 1898.

28. The following table shows the state of the trade of the Colony for the last five years :—

Year.	Imports.		Exports.	Total.
	Paying duty.	Admitted free.		
	£	£	£	£
1894	518,163	170,303	850,343	1,538,809
1895	563,290	231,691	877,803	1,672,784
1896	552,968	225,041	792,111	1,570,120
1897	562,418	221,770	857,793	1,641,981
1898	599,508	360,828	992,998	1,953,334

29. It is gratifying to be able to report that articles of British manufacture hold their own in the markets of this Colony, the only foreign article which is imported in greater quantities than from England being what is known as "trade gin," and this spirit is solely obtained from Hamburg.

30. The mining industry in this Colony is very largely on the increase, and, although the year under review has been employed chiefly in the development of the mines, at the same time some work resulting in more immediate profit has been done. Several companies have been started during the year with the intention of commencing mining operations in this Colony, and it is some satisfaction to know that the promoters of these companies are not only experienced men with scientific knowledge, but are also possessed of the necessary capital to undertake the work with success. The gold industry of this Colony is likely to prove one of its most solid and valuable assets. Experts who have gained experience in the Transvaal gold fields assert that the banket reefs in this Colony are not only similar to but of higher grade than those in the Transvaal. In the Western Province of this Colony it is estimated that there are about 20 miles of banket formation, and if this land were treated in the same way as similar land is in Johannesburg, it is estimated that it would contain 13 million tons of banket reef from which about £40,000,000 worth of gold could be extracted by ten years

operations with 1,350 stamps and the cyanide process, yielding an annual profit of fully one and a quarter millions sterling per annum. This would necessitate an initial investment of £2,000,000, and the area of land would allow 40 companies to work, each returning a profit of £3,000 a month, provided the necessary capital was put in.

31. It will be impossible for any of the mines to be worked at the profit above mentioned until the railway in course of construction is completed, and this is felt by most of the companies, who are simply waiting for the completion of the railway to commence operations on a large scale. At present the cost of transport ranges from £18 to £50 per ton, and the impossibility of getting up suitable stamps and other machinery prevents the proper working of the mines; this serious obstacle would disappear with the opening of the railway.

32. Notwithstanding the great difficulties which have to be contended with at the present time in consequence of the inadequacy of the machinery, it will be of interest to know that one mine in the Wassaw District had an output in 1897 of 6,880 ozs. 14 dwts. which realized £27,757 19*s.* 7*d.*, and in 1898 the same company had an output of 4,433 ozs. realizing £17,588 16*s.* 3*d.*; another company in the same district in 1897 had an output of 2,479 ozs. valued at £9,307, and in 1898 an output of 4,368 ozs. realizing £16,480. In addition to this, one company has given an average during the latter half of the year under review of 1½ ozs. to the ton, another 1 oz. to the ton, while one company is stated to have produced gold so pure that 84*s.* per oz. was offered for it.

33. In consequence of the low market price for coffee the natives of the eastern or agricultural province of the Colony have devoted their attention more to the cultivation of cocoa, which during the year under review increased £6,420 per export as compared with 1897. An impetus has been given to this industry through the adoption of a scheme introduced by the Governor of the Colony (Sir F. M. Hodgson), whereby planters bring their coffee or cocoa to the Government Botanical Station which is situated in this district, and the Government pay upon the produce brought half its supposed market value, less a small sum to cover freight and other charges; the coffee or cocoa is then sent by the Government to England for sale, and upon receipt of the sale returns from England, the balance of the money is paid to the producers. In this way they not only receive full value for their coffee and cocoa, but by the Government paying them the estimated half value on delivery, the planters are enabled to continue their work instead of having to either sell to shippers on the coast at a low price, or to await the return of their money from the bankers in England.

34. The Government Curator has during the year visited the plantations in the district, and instructed the different planters as

GOLD COAST, 1898.

to the best methods of cultivating cocoa and coffee, and also as to the picking and preparing the pods and seeds so as to procure the best market price, and the efforts of the Government have met with hearty response and grateful appreciation.

35. The encouragement now given to the natives by Government will, no doubt, be the means of establishing a greater number of small plantations, but the Curator reports that "to make much headway with crops, expensive machinery is necessary to prepare them for the market." At present the preparation is done in the most primitive fashion.

36. The Government Botanical Station at Aburi is doing good work, in not only affording practical instruction in agriculture to the people but also in distributing useful and economic plants. During the year the following specimens of fruit trees have fruited for the first time in the garden, viz. : Star apple (*choysophyllum cainito*), sapodillo plum (*achras saponta*), and cherinoyer (*anona cherinolia*) ; the two first are natives of the West Indies and the third is Peruvian.

37. One hundred plants of a new variety of banana raised from seeds received from the Botanical Gardens, Trinidad, have been planted out, and are growing most successfully, and are preferred by the natives to the tasteless kind usually grown by them.

38. The following species of coffee have been grown at the Gardens and have proved a success :—*Coffea stenophylla* (Sierra Leone coffee), *liberica* ; of this last kind there are 3,750 plants, covering about 12½ acres of ground.

39. Fibres as well as rubber plants are receiving a trial at the Gardens, and the Curator expects satisfactory results from them.

40. At the Botanical Station there is a system of apprenticeship, where boys receive daily instruction from the Curator in the theory and practice of gardening. After serving one year in the Botanical Gardens, they are sent at Government expense to Jamaica to undergo a further course of instruction for three years in the Botanical Gardens of that Island, and after that course they go through a final course of one year at Kew Gardens prior to their return to this Colony.

SHIPPING.

41. During the year 1898, as compared with 1897, there was a decrease of sailing vessels entered of 3,409 tons, and of those cleared a decrease of 1,144 tons.

There was also a decrease during the year 1898 of 7,466 tons of vessels entered, and 23,992 tons of those cleared, as compared with the preceding year.

42. The following table shows the comparative statement of total shipping inwards and outwards for the last five years :—

Year.	Sailing Vessels.		Steamers.	
	Number.	Tonnage.	Number.	Tonnage.
1894	24	9,025	395	511,967
1895	14	5,008	399	534,051
1896	16	6,874	400	553,794
1897	16	6,582	415	580,277
1898	9	3,173	390	572,811

43. The mail service with England remains the same, the voyage from Liverpool to Accra, a distance of 3,920 miles, taking, on an average, 21 days. Although the service has not been accelerated during the year, there has been a decided improvement in the class of boat. With regard to the English lines, the mail service from the Colony to England is not as regular as it might be, and the homeward voyage even occupies more time than the voyage from England. The German line, by strict adherence to the time table and by completing the voyage to England in 16 days, is proving a serious competitor to the English Shipping Companies.

LEGISLATION.

44. During the year 19 Ordinances were passed. Whilst none of the Ordinances were of first rate importance, those with respect to loans and railways point to a new factor in the development of the Colony. The following are the most important Ordinances passed during the year :—

Criminal Procedure—(No. 2 of 1898).

45. By the Criminal Procedure Amendment Ordinance, 1898, the number of jurors required to sit in criminal trials was reduced from 12 to seven. It had been a long standing complaint with the business part of the community at assize towns that their frequent attendance as jurors interfered with their trade, and in these circumstances they pressed for remuneration for their services as jurors. The Government, holding that in the gratuitous performance of jury service lay the germ of public

GOLD COAST. 1898.

spirit in the Colony, declined to grant remuneration. At the same time it was recognised that merchants and others had a real grievance, and whilst in a previous Ordinance the assizes were made less frequent, by the present Ordinance it was enacted that juries should consist of seven jurors instead of 12 as heretofore. By these means jurors are summoned less frequently than formerly, whilst a smaller panel is required.

Advantage was taken to amend the law as to criminal procedure in other minor respects, the most important amendment being with regard to the procedure in cases where a person accused of crime was suspected of being a lunatic, the English procedure being adopted.

Travelling Commissioners—(No. 3 of 1898).

46. The Travelling Commissioners Ordinance in 1898 in five short sections gives definite judicial powers to officers appointed by the Governor as Travelling Commissioners. For some years officers styled Travelling Commissioners have travelled about the interiors of the Colony settling disputes between tribes, obtaining information for the Government, supervising the working of native courts, at times acting as officers of the Supreme Court; and in the outlying parts of the Colony they were in the habit of exercising jurisdiction on the ground that they were commissioners of the Colony. To remove any doubt as to the exercise of these last mentioned powers the Travelling Commissioners Ordinance enacts that any officer appointed by the Governor to be a Travelling Commissioner shall in any district, without further appointment, have the powers and jurisdiction of the District Commissioner of such district, but practically limits the exercise of these powers to cases in which such District Commissioner is, for one reason or another, unable to act. This empowers a Travelling Commissioner in criminal cases to impose a fine of £50 and to inflict imprisonment up to 10 months, and gives him civil jurisdiction up to £25; at the same time it subjects all his criminal decisions to summary review by the Chief Justice.

47. The Railway Loan Ordinance, 1898 (No. 6 of 1898), empowers the Governor to borrow £220,000 by the sale of inscribed stock for the construction and equipment of the Seccondee-Tarquah railway. The sinking fund begins three years from the first issue of stock.

Railways—(Nos. 7 & 17 of 1898).

48. The Railway Ordinance, 1898 (No. 7 of 1898), is a short enactment providing for the establishment and maintenance of Government railways in the Colony. Provision is made for the acquisition of lands, and the usual powers of entry on land are given. Power is vested in the Governor and Legislative Council to make regulations for carrying out the purposes of the Ordinance, and various offences relating to railways are created.

The provisions of the above mentioned Ordinance as to the entry on and the acquisition of land were amended and simplified by the Railway Amendment Ordinance, 1898 (No. 17 of 1898).

Customs Tariff—(Nos. 12 & 19 of 1898).

49. Under Ordinance No. 5 of 1887, the only dutiable articles were wine, beer and spirits, tobacco, and firearms with their adjuncts. Two years later, by Ordinance No. 25 of 1889, a 10 per cent. *ad valorem* duty was placed on 22 of the chief articles of import and on all unenumerated articles; but there was an exemption list of 97 articles, most of them of small value from a fiscal point of view.

These two Ordinances applied to the whole of the Colony originally, but, subsequently, in 1892 and again in 1894, the application of the above-mentioned enactments was limited to those parts of the Colony west of the Volta river, those parts of the Colony east of the Volta being made subject to a special and much lower tariff.

In 1896 was passed the Weights and Measures Ordinance, introducing into the Colony the imperial gallon as the standard measure of capacity; but, under the first-mentioned Tariff Ordinance, No. 5 of 1887, the duty on liquors was to be computed on the old wine gallon. To avoid the inconsistency of using the old wine gallon as the basis of computation of the liquor duty, and to allow traders to bargain on the basis of a measure which could be lawfully used in sales and contracts, it was necessary to amend the law. The Customs Tariff Ordinance, 1898 (No. 12 of 1898), was accordingly passed, substituting the imperial gallon as the measure by which spirits &c. were to be measured for the purposes of duty. At the same time the opportunity was seized to reduce the free list, and the articles exempted from the port duty were reduced from 97 to 33. The present Ordinance now supersedes the Ordinances of 1887 and 1889, but only applies to those parts of the Colony to the west of the Volta.

On the last day of the year the tariff underwent another change. By the Customs Tariff (Amendment) Ordinance, 1898 (No. 19 of 1898), the duty of 3*s.* per gallon on spirits was raised to 4*s.* 6*d.* per gallon. This increase of duty on the principal article of importation was necessary in order to meet the cost of the railway, the Accra breakwater, and other large public works on hand or in contemplation.

Adulteration of Palm Kernels—(No. 18 of 1898).

50. For years the question of legislation to prevent the adulteration of native produce has been before the Local Government, but, mercantile opinion being almost equally divided on the point, no action was taken. One section of the leading community quoted the example of the neighbouring Colony of Lagos, where an Adulteration Ordinance has been in force since 1889. To

GOLD COAST, 1898.

this it was replied that the conditions of trade on the Gold Coast differed from those at Lagos, and that governmental action would tend to divert trade to one of the adjoining Colonies. Finally, the question was taken up by the merchants at home, principally in connection with rubber, and the Government thereupon appointed a committee of the Legislative Council to take evidence and report. After obtaining a large amount of evidence, the committee reported that there were practically only three articles which were subject to adulteration, viz. :—rubber, palm oil, and palm kernels. The committee further reported, that, as to rubber, merchants were able to and did safeguard themselves to a considerable extent against adulteration, and, further, that it would be unwise in any way to interfere with the rubber trade ; that, as to palm oil, there was no sufficient case for legislation, whilst legislative interference would probably result in injury to the Kwitta palm oil trade ; that, as to palm kernels, there was ample evidence to show that adulteration was systematically practised and that preventive legislation was likely to benefit the trade. In these circumstances, the Adulteration Ordinance, 1898, was passed, prohibiting under a penalty the purchase or sale of palm kernels soaked or otherwise adulterated. Up to the present date there have been very few prosecutions under the Ordinance, but its effect has been to produce a cleaner article at the chief palm kernel centres. There have been three or four prosecutions at Prampram—none elsewhere—and I understand from the District Commissioner at Prampram that the kernels are now much cleaner.

EDUCATION.

Primary.

51. Under the agency of the three missionary societies, viz. :—The Basel, Wesleyan, and Roman Catholic, elementary education has been rapidly spreading. In 1898, 112 schools of these societies were inspected and received grants. The efforts of the Basel Mission are chiefly directed to the interior, and their schools are to be found all over the eastern half of the Colony, from the coast to the verge of the Hinterland. The Roman Catholic Mission stations are not numerous, and are confined to the larger towns on the coast. The school management in the case of these two missions is European. The Wesleyan Mission extends along the entire coast line, and has only a few stations in the interior. The management is chiefly native.

52. There are also Government schools at Accra, Cape Coast, and Insuaim, and the total number of schools, assisted and not assisted, at the end of the year was 208. Reading, writing, and arithmetic are taught at all these schools ; in the advanced classes, history, geography, grammar, and, in a few cases, book-keeping and drawing are part of the curriculum.

Secondary.

53. With the exception of the small Wesleyan High School and one private school at Cape Coast, and the Teachers' Training College, under the Basel Mission, at Akropong, nothing is done to forward higher education. The Government scholarship, for natives who passed the Cambridge senior local examination, has been abolished by the Governor, as there was no likelihood of any candidate being successful.

The want of trained teachers is generally felt, and Government has not yet followed the example of the Basel Mission in establishing a training institution. Instruction is supposed to be given to Government teachers by the headmasters, but the frequent absence of these officers on other employment, has prevented the spasmodic effort in this direction from being of service.

Industrial, Technical, and Agricultural.

54. Plantations are attached to all the larger Basel Mission schools, to most of the Roman Catholic and to a few Wesleyan stations. Owing to the difficulties of transport, agriculture does not pay, except near the coast, and without such encouragement, lasting results cannot be expected. Technical instruction in handicraft, such as carpentry, smithwork, &c. is rare. It is to be regretted that industrial training is not made the principal aim of the educational system, especially in the Government and Wesleyan schools, which, by their position, have more facilities for this object. A small school in carpentry has recently been attached to the Government school, Accra, under a European master, and a similar arrangement may be made at Cape Coast. The Accra school is showing very good results.

GOVERNMENT INSTITUTIONS.

55. There are Government Hospitals at the following places in the Colony :—Accra, Cape Coast, Elmina, Axim, and Kwitta, although only at Accra and Cape Coast is there suitable accommodation for Europeans. The hospital arrangements at Accra, the capital of the Colony, are as complete as possible, and during the year the demand that has been made for better hospital accommodation at Cape Coast has received attention. The Secretary of State has approved of the Government bungalow which had been erected on Connor's Hill for the use of the Governor being converted into a hospital. The building affords ample accommodation for both native and European wards, and the site is an admirable one. Cape Coast is now in possession of a hospital which should meet the requirements of the large European mercantile community residing there.

GOLD COAST, 1898.

56. The following return will show the number of admittances to the hospitals during the year under review :—

Town.	Number admitted.	Native.	European.
Accra	903	862	41
Cape Coast...	279	271	8
Elmina	117	116	1
Quitta	121	121	—
Axim	52	52	—
Total	1,472	1,422	50

Asylum.

57. There is only one Lunatic Asylum in the Colony and that is at Accra. The following return shows the number of inmates for the last three years :—

—	1896.	1897.	1898.
Entered	21	18	27
Released	9	7	16

58. Poor Houses do not exist in the Colony, and I am pleased to say that there is no need for their establishment; poverty in the proper meaning of the word is unknown, and it is an exception to see a beggar.

59. There are no Reformatories, at present, in the Colony; but in view of the number of juveniles in the Prison it is a question whether their introduction has not now become a necessity.

Savings Bank.

60. The deposits for the year amounted to £4,914, the withdrawals including interest £3,722, leaving an excess of deposits on withdrawals of £1,192. The interest taken out of the general revenue of the Colony and credited to depositors amounts to £105. As compared with the previous year there is an increase of deposits, including interest credited, of £1,137. This cannot, however, be taken as indicating any rapid growth, as the deposits including interest credited in the year 1896 amounted to £7,377. There is no doubt that the establishment of the Bank of British West Africa at Accra has been the cause of the decrease in the amounts of the deposits. The following table shows the amount

of deposits at the principal stations in the Colony for the last two years :—

Station.	1897.	1898.	Increase.	Decrease.
	£	£	£	£
Accra	1,781	1,364	—	417
Addah	222	206	—	16
Axim	99	256	157	—
Cape Coast... ...	580	2,072	1,492	—
Chama	8	22	14	—
Elmina	163	78	—	85
Quitta	350	12	—	338
Saltpond	385	92	—	293
Tarkwa	21	75	54	—
Winneba	165	737	572	—
Total	3,774	4,914	2,289	1,149

There was a decrease of withdrawals in the year under review of £1,914.

61. The following table shows the synopsis of deposits, from which will be seen that deposits under £5 continue to increase, which is a healthy sign, and shows the reliance placed in the Bank by the poorer classes :—

Year.	No. of accounts under £5.	From £5 and under £10.	From £10 and under £20.	From £20 and under £50.	From £50 and under £100.	From £100 and under £200.	Over £200.	Total.
1896 ...	307	24	24	28	13	8	7	411
1897 ...	324	27	32	15	11	6	3	418
1898 ...	360	26	34	27	8	8	6	469

62. In 1897 the amount deposited by the natives of the Colony amounted to £1,748, while the amount deposited during the year under review was £3,478 ; this increase is an indication that the native of the Gold Coast is beginning to realize the value of a Government Savings Bank.

63. The Savings Bank of this Colony was established in 1888; it has, therefore, in the year under review completed ten years of its existence; consequently the following comparative statement of the transactions for the eleven years 1888 to 1898 should be interesting:—

Year.	Balance.	Deposits.	Interests due on Deposits.	Total.	Amounts Withdrawn.	Interest paid on Withdrawals.	Total.	Balance.
	£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.
1888 ...	—	993 19 0	7 4 4	1,001 3 4	51 13 0	—	51 13 0	949 10 4
1889 ...	949 10 4	2,663 10 0	40 14 2	3,653 14 6	439 9 0	1 2 7	440 11 7	3,213 2 11
1890 ...	3,213 2 11	1,665 6 8	45 19 11	4,924 9 6	2,705 6 6	3 13 3	2,708 19 9	2,215 9 9
1891 ...	2,215 9 9	3,212 11 2	64 1 7	5,492 2 6	2,331 7 8	9 2 3	2,340 9 11	3,151 12 7
1892 ...	3,151 17 7	3,144 2 8	88 3 0	6,383 18 3	2,865 4 2	9 6 0	2,874 10 2	3,509 8 1
1893 ...	3,509 8 1	3,112 5 6	83 10 9	6,705 4 4	2,776 11 0	4 5 10	2,780 16 10	3,924 7 6
1894 ...	3,924 7 6	5,999 19 7	104 6 11	10,028 14 0	4,860 5 4	6 6 10	4,866 12 2	5,162 1 10
1895 ...	5,162 1 10	4,564 11 9	110 13 1	9,837 6 8	4,251 18 11	6 14 9	4,258 13 8	5,578 13 0
1896 ...	5,578 13 0	7,249 13 9	127 7 0	12,955 13 9	7,277 3 0	9 13 3	7,286 16 3	5,668 17 6
1897 ...	5,668 17 6	3,674 1 1	106 8 9	9,449 7 4	5,613 4 10	23 19 1	5,637 3 11	3,812 3 5
1898 ...	3,812 3 5	4,812 5 4	105 18 10	8,730 7 7	3,716 11 1	5 19 9	3,722 11 10	5,007 15 9

JUDICIAL STATISTICS.

64. The sanctioned strength of the Police Force is 394, at the end of the year under review the strength of the force was 377. The number of recruits enlisted during the year was 164, an increase of 18 on the year 1897. The men enlisted are natives of the Gold Coast, Sierra Leone, Lagos, and West Indies.

65. The force is armed with the Martini Henry carbine, and is put through an annual course of musketry.

66. The efficiency of the force is retarded by the want of proper barrack accommodation. As long as the men are compelled to live among the inhabitants of a town the force will never attain to a high standard of efficiency.

67. The criminal returns show a decrease in 1898 of 145 crimes for the whole Colony as compared with 1897.

Prisons.

68. The daily average number of prisoners in custody during the year was 312, as compared with 309 the previous year.

69. The following table shows the number of convictions for the last five years :—

—	Males.	Females.	Juveniles.	Totals.
1894	1,550	74	20	1,644
1895	1,859	101	46	2,006
1896	2,044	273	38	2,355
1897	1,879	220	51	2,150
1898	1,850	189	34	2,073

GOLD COAST, 1898.

70. There are 14 prisons in the Colony, and the buildings used for the accommodation of prisoners are the forts erected by the Dutch and which are found at almost all the coast towns. They are unsuitable for prisons, and it is difficult to maintain the necessary discipline, since there is no system of solitary confinement. It is contemplated to erect a central prison.

71. In the prisons at Accra and Elmina the prisoners are employed as carpenters, shoemakers, tailors, and coopers. These trades have been carried on in the prison during the year with success. At the prisons in the other stations of the Colony the prisoners are employed exclusively on Government work as labourers and scavengers.

72. There were 17 escapes during the year, as compared with 15 in 1897, not one of the 17 being recaptured.

73. Ten prisoners received corporal punishment, as compared with 15 in 1897 and 22 in 1896.

74. New dietary rules were introduced during the year, the scale being on comparatively modern lines and extending in the classification of prisoners as regards diet.

75. The daily average number of prisoners in custody during each of the past three years was respectively as follows :—

Year.	Daily Average Number in Custody.
1896	330
1897	309
1898	312

76. The following are statistics of crime for the last five years :—

—	Apprehensions.					Convictions.				
	1894.	1895.	1896.	1897.	1898.	1894.	1895.	1896.	1897.	1898.

Totals	109	115	140	66	89	48	70	68	31	46

VITAL STATISTICS.

77. It is impossible to give any accurate figures regarding the population, as there is no proper system in force of registering births and deaths.

78. The general health of the Colony has shown an improvement during the year under review as compared with that of previous years; this is especially marked amongst the Europeans. The chief reason of this is no doubt the improvement which has taken place in the dwelling-houses of the Europeans, both officials and non-officials, the houses now being erected away from the crowded and native quarter of the towns. Facilities for hospital treatment have very much improved of late years, and at Accra the advantage of European nurses has been much felt and appreciated.

79. Although the health generally has improved the death-rate still remains high, especially so when it is remembered that the European inhabitants are men who are in the prime of life, and who have been selected as physically fit for service in the Colony. At the same time, given improved dwelling-houses and better sanitation, there is no reason why the mortality should not diminish in this Colony as in many other Colonies which a few years ago had an equally bad reputation for unhealthiness.

80. There can be no doubt that the health in the Hinterland or away from the coast is better than that enjoyed in the coast towns and, as an instance of this, a number of officers have been actively employed during the year in the Hinterland and, notwithstanding the hard life which many of them have had to lead, there has only been one death.

81. The following table shows the death-rate among Europeans for the year under review, also the number who have been invalided from the Colony :—

—	Population.	Died.	Invalided.	Death-rate per 1,000.	Invalided, per 1,000.
Government officials ...	122	8	19	65·57	155·73
Non-officials	230	17	24	73·91	104·34

In the year 1897 there were 40 deaths among the Europeans and 78 were invalided. In a constantly changing population it is out of the question to keep accurate statistics. The above figures do not include European officials employed in the Northern Territories, who number at least 25, neither does it include prospectors who are constantly moving about the Colony and adjoining territories.

82. The health report of this Colony would be incomplete if reference was not made to the establishment of a School of Tropical Medicine in London. Considering how common malarial fever of a most malignant type is in this Colony, and the number of lives that are lost annually by the disease, it is worth all the expense and trouble involved that every medical man before being appointed to this Colony should have received a practical training in the microscopic diagnosis and the intelligent treatment of this fever. The need of this has been greatly felt for some years, and speaking personally as a resident of over 12 years, I have often noticed the want of reliance on the part of patients when being attended by newly appointed Medical Officers with no previous experience of tropical diseases, and the remark has often been heard that patients are far better able to attend themselves in cases of tropical fevers than the newly appointed Medical Officer, who lacks experience in these particular cases. The scheme is of such vital importance that the Legislature of this Colony unanimously voted a sum of money to support it.

83. Improvement has been made in the various towns in the Colony as regards sanitation, and the Government have had drains made, wells constructed, and public latrines built, and where swamps exist the land is being drained. There are two great difficulties to contend with in carrying out any efficient system of sanitation, viz. (*a*) the inadequate water supply, (*b*) the filthy and lazy habits of the very large majority of the native population. The people, who are too lazy and naturally dirty, will not use the public latrines supplied for them, but make every yard and street in the native quarter of the town into a virtual cesspool. The law is put into force, but I am afraid it will take some years before the native of this Colony becomes impressed with the necessity of cleanly habits as a safeguard to health.

84. The following table shows the rainfall for the different months of the year at the most important towns of the Colony :—

Month.	Stations.					
	Accra.	Aburi.	Axim.	Ada.	Cape Coast.	Quitta.
January	—	2·61	0·60	—	0·22	0·03
February ...	—	0·62	0·52	—	0·36	0·25
March	1·72	3·28	3·85	2·40	0·83	0·73
April	5·66	6·85	2·75	7·34	6·07	7·35
May	2·53	4·83	9·05	5·91	7·90	2·72
June	4·88	7·78	34·01	6·89	10·47	7·37
July	2·74	5·26	15·33	1·47	2·95	1·28
Carried forward	17·53	31·23	66·11	24·01	28·80	19·73

Month.	Stations.					
	Accra.	Aburi.	Axim.	Ada.	Cape Coast.	Quitta.
Brought forward	17·53	31·23	66·11	24·01	28·80	19·73
August	1·56	3·72	0·90	2·09	0·57	1·27
September ...	4·69	6·16	3·00	3·35	2·12	2·93
October	3.41	8·52	7·98	5·65	1·41	8·23
November ...	—	6·16	2·12	0·17	0·22	—
December ...	1·33	2·33	2·03	0·06	0·95	0·02
Totals ...	28·52	58·12	82·14	35·33	34·07	32·18

85. Referring to the temperature, the Chief Medical Officer in his report under meteorological conditions states, "The first quarter of the year was very dry and cool; the Harmattan wind began to blow very early and continued until nearly the beginning of the rainy season."

"The second and third quarters were also exceptionally cool, the sea breeze was strong and steady, the rains began earlier than usual, were more prolonged, and the rainfall was considerably above the average."

"The fourth quarter was warm and dry."

During the months of January, February, March, April, May, June, July, August, October, and November the prevailing wind was N.W., in September it was W., and the month of December it was N.E. by E.

POSTAL, TELEGRAPH, AND TELEPHONE SERVICES.

86. The following comparative table will show the working of the Postal Department during the year 1897 and the year under review :—

Year.	No. of Letters posted.	No. of Registered Articles dealt with.	Total amount of Money Order transactions.	Total amount of Postal Order transactions.	No. of Parcels.
			£ s. d.	£ s. d.	
1897 ...	584,216	23,942	12,974 7 3	2,549 15 6	2,928
1898 ...	756,973	23,995	12,843 17 9	2,761 0 6	2,909
Increase...	172,757	53	—	211 5 0	—
Decrease	—	—	130 9 6	—	19

87. The continued decrease in the Money Order transactions as compared with the previous year is traceable to the establishment of a bank at Accra, which has become in a large measure the remitting medium between the Colony and other places with which the inhabitants have business relations.

88. It may interest stamp collectors to know that the amount received for philatelic purposes has decreased during the year under review to £154 14*s.* 6*d.*, as compared with £368 14*s.* 2*d.* for the year 1897.

Telegraphs.

89. During the year 60 miles of telegraph line was erected north of Kintampo, in the Northern Territories of the Colony. For a year's work this may not seem much, but, considering the difficulties and obstacles which have to be encountered in the way of food and labour, the progress cannot be considered unsatisfactory. At date of writing the telegraph line has reached Bolé, a town 160 miles from Kumasi. On this line trees are used as much as possible in place of poles.

90. The work of construction of the line from Nkoranza to Attabubu was commenced, but owing to sickness among the European staff work was delayed.

91. At the commencement of the year 1898 the rate on telegrams was reduced to ½*d.* per word with a minimum charge of 6*d.* inclusive of address, whereas it had formerly been ½*d.* per word with a minimum charge of 1*s.* This change has not only brought an increase in the number of telegrams but also in the revenue. The total number of telegrams dealt with during the year was 119,242, being an increase of 34,662 over the previous year. The revenue derived was £2,585 15*s.* 2*d.*, an increase of £253 6*s.* 5*d.* on the year 1897.

92. The number of messages handed in at Government offices for transmission by the African Direct Telegraph Company (Cable) amounted to 1,954, as compared with 1,357 in the previous year; the number received from the African Direct Telegraph Company for transmission over the inland line was 1,265, as compared with 991 in the previous year. The increase is a clear indication of the growing interest which is being taken in the development of the Colony. The number of cablegrams sent from and received at Accra are not known, as they are handed in direct to the Cable Co.

93. During the year there has been a decided decrease in the number of telegrams passing between the German Colony of Togoland and Europe. In 1897 the number of telegrams despatched from Togoland to Europe was 70, and the number received for the German Colony 60, whereas in the year under

GOLD COAST, 1898.

review the numbers were 12 and 36 respectively. This falling off may be attributed to the utilisation of the alternative French land lines in Dahomey.

94. Interruptions in the telegraph line continue to be frequent. This is specially the case on the line between Cape Coast and Kumasi, but considering the dense forest country this line passes through, damage to the wire can hardly be unexpected.

95. There has been a steady increase in the mileage of the telegraph line during the last five years. In 1893 there were 368 miles of telegraph line in the Colony, whereas at the close of the year under review the mileage amounted to 700, and, considering that the transport of material increases considerably the further the line gets from the coast, the result must be considered satisfactory.

Telephones.

96. Telephones are chiefly used between the Government Offices, and that only at Accra. Three mercantile firms are also connected.

MILITARY FORCES AND EXPENDITURE.

97. There are no Imperial troops stationed in the Colony, although, owing to the employment of the local Constabulary in the Northern Territories, it was necessary to obtain a portion of the 2nd Battalion West India Regiment for garrison duty at Cape Coast and Kumasi for a few months of the year.

98. There is no Militia Force in the Colony.

99. The following table shows the strength of the Volunteer Force on 31st December 1898 :—

Officers.	Warrant Officer.	Sergeants.	Corporals.	Privates.	Signallers.	Band.	Total.
12	1	16	20	141	11	37	238

The force is recruited chiefly from the Government and mercantile clerks. The men enlisted are of a good class and the force with a little trouble and encouragement should be a valuable addition to the defence of this Colony. The whole force is put through an annual musketry course and the performance of the members is decidedly fair.

The expenditure of the force is estimated at £811.

100. The authorized strength of the constabulary or semi-military colonial force, commonly known as the Hausas, is 1,500.

The force is armed with the Martini Metford carbine and has Maxim guns as well as 7-pr. M.L.R.

The estimated cost of the force for the current year is £51,639.

GENERAL OBSERVATIONS.

101. The most important event which has occurred to this Colony in the year under review is the occupation of the country north of Kumasi, which is officially designated as the Northern Territories of the Gold Coast.

102. The operations in the Northern Territories have been conducted by Lieutenant-Colonel H. P. Northcott C.B., who held the position of Commissioner and Commandant. Large tracts of the territory have been surveyed, and a permanent trunk road has been constructed for about 50 miles. The tribes whose country had been devastated by the Sofas are rebuilding their towns and villages and trade has revived; and a small revenue, encouraging as a beginning and cheerfully contributed to by those concerned, is being raised. The establishment of Government stores in the Northern Territories, in order to give the people a taste for articles of merchandise, and also to accustom them to the use of money as the medium of exchange and to pave the way for the establishment of trading houses by mercantile firms, has been a successful experiment. It should be stated that spirits are excluded from these stores and from the Northern Territories generally.

103. The state of Ashanti is satisfactory. The Resident in his report states "Most of the kings have done their work willingly and I have had no great trouble in getting the orders of the Government obeyed. Taking Ashanti as a whole, the country seems contented and prosperous, a pauper being unknown." Considering the state of anarchy that existed in this country previous to the expedition of 1896, this report is most encouraging, if only to prove that the gain to humanity has justified the annexation of the country by Her Majesty's Government.

104. The work on the first railway in this Colony, viz. the line from the coast to the mining district of Tarquah was commenced during the year under review. The work during the year has been largely of a preliminary character, and apart from survey has been principally confined to the neighbourhood of Seccondee, which is the starting point of the line, and where the works are relatively heavier than at any other point on the line.

105. The first members of the railway staff arrived at Seccondee on the 17th February and began the survey of the line and the erection of quarters for the officials.

GOLD COAST, 1898.

106. Until the end of August work was considerably delayed by the uncertainty regarding the final adoption of Seccondee as the starting point of the railway, and by the phenomenally heavy rainfall in June and July. In the month of August the number of the railway staff was largely increased, and from that date the survey and construction work has been pushed on as fast as circumstances in this part of the world will allow.

107. The Engineer-in-Chief furnishes the following information as regards the work done up to the end of December 1898 :—

"10 miles of the railway were permanently staked and the route was located for a further distance of 20 miles. The road to Tarquah had also been accurately surveyed. Clearing—the line was cleared ready for earthwork for a distance of 5 miles. 38,000 cubic yards of earthwork were completed, extending over the first two miles of the line. Rail-laying was commenced. Permanent culverts in masonry had been completed along the first mile of the line. The buildings erected include 9 wooden bungalows for offices and quarters, and an iron workshop and running shed. The passenger station building at Seccondee was well advanced and the erection of a hospital had been begun. Materials and stores to the amount of 2,500 tons were landed. A temporary timber jetty was built, furnished with cranes, and connected with the station yard by rail. The largest surf boats are able to unload at this jetty at low water."

The Governor laid the first rail on 18th December.

108. In addition to the line of railway which is at present under construction, the Government have had surveys for lines of railways made between Accra and Insuaim, between Accra and Appam, between Appam and Insuaim, between Insuaim and Kumasi, between Tarquah and Kumasi, and between Accra and Kpong. The first five will tap the mining districts, and that from Accra to Kpong will tap the rich oil producing and cocoa districts of Akwapim and the Krobos and gather up the trade which comes down the Volta from the interior.

109. The one thing absolutely necessary to develop the country is railways ; and, as stated above, until railway communication is established it will be impossible for the different mines to open up their works in a satisfactory manner. There are a large number of mines awaiting the opening of the Seccondee-Tarquah railway so as to enable them to transport their necessary machinery for the successful working of the mines. At present, as materials can only be transported in loads on the heads of carriers, it is impossible to carry weights greater than 50 lbs. The impossibility of getting up sufficiently heavy machinery is a serious obstacle to the successful working of any mine, but this would disappear with the opening of the proposed railway lines. When it is considered that with the present cost of transport, ranging from £18 to £50 per ton, an average of 5,000 people cross the River

Prah weekly and that out of that number quite 4,000 carry loads, some idea may be formed as to whether a railway from the coast to Kumasi should be a success or not.

110. The opening up of the country by means of roads has received the special attention of the Government during the year under review. The main roads and bridges in the Colony have been maintained in good order.

111. There is no system of immigration in the Colony and if the labour question continues to remain in the same satisfactory state as it has been during the year 1898, there is no reason why the opening up of this important Colony should not be successfully undertaken by its own people and without the introduction of inhabitants from other parts of the globe.

112. Emigration from the Colony is very small. A few continue to leave for work under the Congo Government and railway, but even this number is on the decrease, and, as the demand for labour increases, it will be found that the Gold Coast native will not leave his country.

113. The New Hausa Cantonment, which is situated about three miles from the town of Accra was completed during the year so far as the officer's quarters, magazines, armoury, and offices were concerned, the quarters for the men now only remaining in order to complete the work.

114. On account of the expenditure which the Colony has had to incur in connection with the acquisition of Ashanti and the Northern Territories, some of the public works which it was contemplated to undertake in 1898 had to be postponed. A number of minor works have been undertaken, and the public buildings throughout the Colony have been maintained in good order.

115. There has been no change in the constitution of the Colony.

116. The principal changes in the public service of the Colony were :—

Mr. F. M. Hodgson, C.M.G., Colonial Secretary, succeeded the late Sir William Maxwell, K.C.M.G., as Governor and Commander-in-Chief of the Colony.

Mr. W. Low, late Commissioner of the Island of Tobago, succeeded Mr. F. M. Hodgson, C.M.G., as Colonial Secretary of the Colony.

Mr. W. Clark, late Police Magistrate of Sierra Leone, succeeded Sir William Geary, Bart., as Attorney General of the Colony.

The Inspector General of the Constabulary, Major General Sir Francis Scott, K.C.B., K.C.M.G., was transferred to Trinidad as Commandant of the local forces of that Island.

GOLD COAST, 1898.

Captain G. Aplin, Inspector of the Constabulary, was transferred to Lagos on promotion to be Inspector General of the Constabulary of that Colony, and,

Mr. J. R. Holmes, a District Commissioner, was transferred to Cyprus on promotion to a Judgeship in that Island.

117. Now that the Colony is in a tranquil state the prospects of trade are most hopeful. As will be seen from returns in another part of this report the export of both oil and rubber has considerably increased, shipments of cocoa are also increasing, the disturbing influences which were prevalent in 1897, namely, Samory's hordes and the unrest in Ashanti, do not now exist, and the inhabitants of the interior have been able to continue their work in the rubber and palm forests. The consequence is that, during the year, there has been an increase in the amount of produce brought down to the coast, and there is a good prospect of an augmentation of trade.

The most important consideration in this question of increasing the trade zone is the provision at the earliest possible date of railways. Much of the good result of occupying the interior depends upon the rapidity with which internal transport can be carried out. An opportunity now occurs of founding a considerable market for British goods, but, unless the present means of transport be greatly improved, this opportunity will be lost, and it will be impossible to obtain the full benefit of the richness of the land.

118. The climate of the West Coast of Africa is not generally recognised as suitable for Europeans, but, given good physique and constitution, there is no reason why many Europeans should not preserve their health as well as they do in many other Colonies which are supposed to possess a healthier climate; but moderation in all things, especially as regards spirituous liquors, is absolutely essential.

119. The openings for white labour are few. The mines require miners and the mercantile firms need assistants, but all these men are sent out by appointment from England, and it is useless as well as hopeless for Europeans to come to this Colony on the prospect of obtaining employment.

120. The wages given to the labouring class are exceptionally high, when it is considered that the Government have to pay a carrier 1*s.* 3*d.* a day for transporting material weighing 40 lbs., and that that carrier can live well on 2*d.* a day or at most 3*d.* Two things are clearly shown, first, the carrier makes a large profit, and secondly, the Government are put to an enormous expense annually in connexion with transport, especially when it is considered that each ton of goods sent to Gambaga, the headquarters of the Northern Territories, costs £135 and the transport of each officer costs £108 annually.

121. During recent years the financial condition of the Colony has been disturbed by two events, both of which were unavoidable and both of which cost large sums of money. The first of these was the expedition to Kumasi and the occupation of Ashanti in 1896, and the second, the operations in the Northern Territories, rendered necessary by the raids committed upon tribes under our protection by Samory and his Sofas. Now that these two disturbing influences have been dealt with, the people are regaining confidence, towns and villages which had been destroyed are being rebuilt, and farms are being replanted. There is a demand for markets, and the importation of goods is steadily on the increase, and trade will push on to Ashanti and the Northern Territories.

122. The mining industry, which has been referred to elsewhere in this report, has considerably developed during the past year and has attracted an increased amount of capital to the Colony. There is every prospect of the trade of the Gold Coast increasing, and, as soon as the railways are constructed, the general condition of the Colony will improve. The possibilities of the Gold Coast as a market are not yet realised, nor its great produce capabilities. In addition to its great mineral wealth, there are forests of timber, all of which are capable of development if the necessary capital is forthcoming, and as soon as the country is opened up by railways and good roads.

GOLD COAST.

(For Report for 1898, *see* No. 271.)

ACTING GOVERNOR LOW to MR. CHAMBERLAIN.

Government House, Accra,

6th October, 1900.

SIR,

I HAVE the honour to transmit to you a report which has been prepared by Mr. C. H. Hunter, lately acting as Colonial Secretary, on the Blue Book for the year 1899.

I have, &c.,

WM. LOW,

Acting Governor.

8189r—125—2/1901 Wt 31512 D & S—5

GOLD COAST, 1899.

REPORT ON THE BLUE BOOK OF THE GOLD COAST FOR 1899.

FINANCIAL.

The following table shows the heads of Revenue and Expenditure for the year 1899 as compared with those of the preceding year:—

REVENUE.

HEAD.	1898.	1899.	Increase.	Decrease.
	£	£	£	£
Customs	225,776	280,192	54,426	—
Light dues	1,111	1,303	192	—
Licences and material revenue not otherwise classified.	12,496	16,079	3,583	—
Fees of court or office payments for specific services, and reimbursements in aid.	15,852	21,009	5,157	—
Post Office	460	482	22	—
Rents of Government property ...	24	290	266	—
Interest	1,017	141	—	875
Miscellaneous	2,096	3,300	1,205	—
Grant in aid of Northern Territories	45,000	100,000	55,000	—
Total	303,822	422,796	119,851	875

2. The General Revenue during the year, exclusive of the grants in aid, amounted to £322,796, and was £73,260 in excess of the amount estimated, and showed an increase of £63,974 as compared with the preceding year.

3. The increase occurred principally under the heads of "Customs," "Licences and Internal Revenue," and "Fees of Court," &c. The raising of the duty on spirits from 3*s.* to 4*s.* 6*d.* per gallon, and the general improvement in trade, will account for the very large increase under the head of "Customs."

4. It will be observed that there is an increase in every item of Revenue with the exception of Interest, which shows a decrease of £875, due to the sale of Investments in 1898.

5. A Parliamentary Grant of £100,000 was made in aid of the expenditure in the Northern Territories of this Colony.

6. EXPENDITURE.

Totals	377,975	309,656	18,584	86,903

7. The foregoing statement shows a net decrease in the expenditure of the Colony for the year £68,319 as compared with the preceding year.

8. The decrease was principally due to arrears of expenditure in the Northern Territories for 1897 being brought to account in 1898, and to the completion of certain public works in 1898.

9. The following comparative table shows the Revenue and Expenditure for the last five years:—

Year.	Revenue.	Expenditure.
1895	230,076	265,289
1896	237,460	282,278
1897	233,179	401,692
1898	303,822	377,976
1899	422,796	309,656

10. From the above table it will be noticed that the Expenditure exceeded the Revenue by very considerable sums during the years 1895 to 1898 inclusive. This was mainly due to the Ashanti Expedition of 1895-96, the cost of which was defrayed from the funds of the Colony, and to the general opening up and development of the Northern Territories. This continuous excess, however, was changed in 1899 into a substantial increase of Revenue over Expenditure, amounting to £113,138.

11. The Colony has no Public Debt, but there are various outstanding advances for which the Colony is responsible, amounting to £230,487. This includes advances made on account Sekundi Tarkwa Railway.

12. An Ordinance was passed in 1898 providing for the raising of a loan of £220,000 for railway construction. The loan has not yet been subscribed, but the construction of the railway from Sekundi to Tarkwa has been taken in hand, and the sum expended to 31st December amounted to £185,961.

TRADE, AGRICULTURE, AND INDUSTRIES.

IMPORTS AND EXPORTS.

13. The total value of imports in 1899 was £1,152,478, and the value of exports £1,111,738, thus making the total value of the trade of the Colony for the year 1899 £2,264,216, an increase of £310,882 on the previous year.

GOLD COAST, 1899.

14. The following table shows the general classification of all imports:—

Articles.	Value in Sterling. Of imports in detail, excluding expenses.	Total Value, excluding expenses.
	£	£
I.—Live animals, food, drink, and narcotics.	—	210,673
II.—Raw materials :—		
(a) Metal	3,294	
(b) Other	1,897	5,191
III.—Manufactured articles :—		
(a) Textile	372,057	
(b) Metal	32,715	
(c) Other	233,422	688,194
IV.—Coin and bullion...	—	248,419
Total	—	£1,152,477

15. The Customs receipts during the year at the principal ports of the Colony were as follows:—

Port.	Imports, exclusive of Spirits, Gunpowder and Guns.	Spirits.	Gunpowder.	Guns.	Totals.
	£	£	£	£	£
Accra ...	16,504	34,198	1,746	311	52,759

Other stations	3,215	19,920	241	15	23,391
Totals ...	78,079	186,743	11,946	2,289	279,057

16. The following comparative table shows that the greater proportion of the import trade is with the United Kingdom:—

Year.	From the United Kingdom.	From British Colonies.	From Foreign Countries.	Totals.
	£	£	£	£
1895 ...	539,718	81,897	173,366	794,981
1896 ...	569,828	28,520	179,661	768,009
1897 ...	526,411	60,787	196,990	784,188
1898 ...	726,197	43,101	191,038	960,336
1899 ...	858,721	54,079	239,678	1,152,478

17. The following table shows the general classification of all exports:—

Articles.	Value in Sterling.		
	Produce and Manufacture of the Colony.	British and Foreign and other Colonial Produce and Manufacture.	Totals.
	£	£	£
I. Live animals, food, drink, and narcotics	32	1,185	1,217
II. Raw materials:—			
(*a*) Textile	701	—	701
(*b*) Metal	51,870	—	51,870
(*c*) Other	1,021,543	—	1,021,543
III. Manufactured articles:—			
(*a*) Textile	—	3,938	3,938
(*b*) Metal	—	561	561
(*c*) Other	61	3,169	3,230
IV. Coin and bullion... ...	—	28,680	28,680
Totals	1,074,206	37,533	1,111,738

GOLD COAST, 1899.

18. The increase in the value of exports in 1899 over that of the preceding year amounted to £118,740.

19. The following table shows the trade in three important exports for the last three years:—

Year.	Palm Oil.		Palm Kernels.		Rubber.	
	Gallons.	Value.	Tons.	Value.	Lbs.	Value.
		£		£		£
1897 ...	2,021,716	107,737	10,836	69,818	4,957,016	419,913
1898 ...	2,145,138	114,288	9,732	66,378	5,984,984	551,667
1899 ...	3,323,919	183,204	12,664	106,156	5,572,554	555,731

20. The following statement shows the trade of the timber industry for the last five years:—

Year.	Quantity.	Value.
	Feet.	£
1895	3,587,337	28,245
1896	6,063,381	52,234
1897	15,236,216	90,569
1898	13,620,965	110,331
1899	11,990,832	87,076

21. The following comparative statement shows the quantity and value of rubber exported from the Colony to the undermentioned countries during 1898 and 1899:—

Countries.	Quantity.		Value.	
	1898.	1899.	1898.	1899.
	Lbs.	Lbs.	£	£
United Kingdom ...	5,380,755	5,249,541	495,502	522,854
Germany	600,800	322,414	55,910	32,836
Other countries ...	3,429	599	255	41
Totals ...	5,984,984	5,572,554	551,667	555,731

22. The following comparative table shows that the greater proportion of the export trade is with the United Kingdom:—

Year.	To the United Kingdom.	To British Colonies.	To Foreign Countries.	Totals.
	£	£	£	£
1895	586,415	38,211	253,177	877,803
1896	536,106	37,471	218,534	792,111
1897	581,904	35,667	240,222	857,793
1898	713,335	41,667	237,996	992,998
1899	767,575	70,762	273,401	1,111,738

23. The following table shows the state of the trade of the Colony for the last five years:—

Year.	Imports.		Exports.	Total.
	Paying duty.	Admitted free.		
	£	£	£	£
1895	563,290	231,691	877,803	1,672,784
1896	552,968	225,041	792,111	1,570,120
1897	562,418	221,770	857,793	1,641,981
1898	599,508	360,828	992,998	1,953,334
1899	735,917	416,561	1,111,738	2,264,216

24. The condition of trade has been highly satisfactory throughout the year, the Customs net receipts showing an increase of £54,501.

25. The imports and exports both exceed £1,000,000 for the first time; the increases amounting to £192,142 and £118,740 respectively.

26. The most marked increases in Customs receipts appear under the following heads:—

General imports	£14,368
Spirits	37,253
Gunpowder	2,477

GOLD COAST, 1899.

The first may be attributed to the large amount of provisions imported for the Northern Territories and for the use of European miners, whilst the increase in the tariff on spirits from 3*s.* to 4*s.* 6*d.* per gallon, which came into effect on the 1st January, is accountable for the greater revenue derived from that source. The value of spirits imported west of the Volta was actually £8,000 less than in 1898, and east of the Volta £4,000 more.

The decreases are trifling.

27. In imports the rise has been steady, but only in the case of cottons does the increase in value exceed £1,000, the actual amount here being £4,443.

Here again the decreases are but of little account.

28. Exports have largely increased, the most important increases being as follow:—

Cocoa	£6,447
Copra	1,773
Palm oil	68,916
Palm kernals	39,777
Kola nuts	21,231
Monkey skins	5,807
Rubber	4,063

29. The considerable increase in palm oil and palm kernals is due to a good season, greater attention to the trade, and better prices. The suitability of soil and climate, the greater demand for cocoa, and the increased attention which is being given to this most valuable product account for the larger export. Various districts were visited during the year for the purpose of arranging with the native kings and chiefs to clear large areas of land on which to form plantations of cocoa, rubber, and kola trees, which would be under the supervision of an officer of the Botanical Department, and this is certain to be attended with good results. Most of the kola nuts exported go to Lagos, and the increased export of these nuts is probably due to the development of the trade in this article from Lagos with its hinterland, and the cheapness of transport by water at Lagos as compared with that by land. With regard to rubber, the increase is in value only, the actual amount exported being half a million pounds less than in 1898.

30. A decrease of £23,254 is shown in the exports of native timber, but the figures with regard to this industry cannot be accepted as accurate because the measurement of timber is not thoroughly understood, and in many cases logs of inferior quality are shipped. Gold exports also show a further decrease

of £12,538, which is difficult to account for. The value of coffee exported is £114 less. This is doubtless due to the low prices prevailing in the European markets.

31. The increase of £4,000 in the value of spirits imported east of the Volta deserves attention. The duty charged on this import is only 9¾*d.* per gallon.

SHIPPING.

32. During the year 1899 as compared with 1898 steam vessels entered and cleared show increases of 58,313 tons and 68,439 tons respectively, while there is an increase in the sailing vessels of 1,652 tons.

33. The following table shows the comparative statement of total shipping entered and cleared for the last five years:—

Year.	Sailing Vessels.		Steamers.	
	Number.	Tonnage.	Number.	Tonnage.
1895	14	5,008	399	534,051
1896	16	6,874	400	553,794
1897	16	6,582	415	580,277
1898	9	3,173	390	572,811
1899	11	4,825	402	631,124

34. The mail service with England has been somewhat improved during the year by the establishment of a regular fortnightly service outwards and homewards, the voyages to and from Accra averaging about 18 days. These steamers sail from Liverpool on alternate Wednesdays and call at Plymouth on the homeward voyage.

LEGISLATION.

35. During the year under review there were 14 Ordinances passed. Of these the only ones of any importance are Nos. 4, 7, 10, and 13.

36. The "Sierra Leone Political Prisoners Detention Ordinance" (No. 10, of 1899, authorised the transfer to and detention at Accra of the leaders of the insurrection in the hinterland of Sierra Leone during the year 1898.

ESTATES OF AFRICANS ADMINISTRATION.

37. Estates of Africans Administration (No. 4, of 1899), is a re-enactment with variations of former legislation. For many years past it has been the practice for Gold Coast tradesmen and labourers to seek employment in the various British and Foreign West African Colonies, especially in the Congo Free State. Such employment is usually regulated by the Master and Servant Ordinance (No. 8, 1893), which affords protection to persons engaging in foreign contracts of service.

38. The Fires and Occurrences Inquiries Ordinance (No. 7, of 1899) has been passed mainly with a view to the protection of fire insurance companies. It provides that where fires occur causing injury to persons or property, or where there is ground to suspect crime, the District Commissioner may make due inquiry

39. The Corporal Punishment Ordinance (No. 13, of 1899) is a short enactment, limiting the number of strokes which may be given at any one flogging to 24. The enactment applies to all former Ordinances and to all rules and regulations thereunder.

EDUCATION.

PRIMARY.

40. Education in the Colony is principally conducted under the agency of the Basel, Wesleyan, and Roman Catholic Missionary Societies. One hundred and twenty-two schools under these Missions were inspected and awarded grants for the year 1899. The Basal Mission operate in the Interior, their stations extending all over the eastern side of the Colony, with

a few in the Kumasi District. They have also schools at two or three towns on the Coast. The Roman Catholic Mission have 12 stations, all in the Coast towns. The management in the case of these Missions is European, about 60 Missionaries being employed in the former and 12 in the latter Society. The Wesleyan Mission has schools all along the Coast line, and has also recently opened a few in the Ashanti District. The management is mainly native, there being only three Europeans engaged in the work.

41. In addition to these assisted schools, there are three large Government schools at Accra, Cape Coast, and Insuaim; and also schools for the Hausa Constabulary and the Civil Police.

42. In addition to the foregoing, there are two or three Mahomedan schools, and the Bremen Mission has also established a few schools.

SECONDARY.

43. There are no Government secondary schools, nor is provision made for the training of teachers, if we except the Basel Mission Seminary at Akropong, which is attended for a time by most of the teachers employed by that Society. There are two small unassisted schools at Cape Coast, which attempt a higher grade curriculum, but the want of teachers has hitherto interfered with the success of their efforts.

INDUSTRIAL, TECHNICAL, AND AGRICULTURAL.

44. There are plantations attached to many of the schools in the interior, the most important being those at the larger stations of the Basel Mission, at Begoro and Abetifi. The difficulties of transport, however, prevent exportation from being remunerative, and as the natives rarely utilise any but the ordinary products of the country, which require little cultivation, the training received at these schools is not often put to practical purpose. Technical instruction in carpentry, smithwork, &c., is given at the Cape Coast Wesleyan School, and at some of the Roman Catholic schools. There is also attached to the Accra Government school, a technical department, under a European master, where the boys are taught carpentry on scientific principles.

GOVERNMENT INSTITUTIONS.

45. There are Government hospitals at the following places in the Colony:—Accra, Cape Coast, Elmina, Axim, Saltpond, Kwitta, and Kumasi, although only at the two first-mentioned stations is there suitable accommodation for Europeans. The Government bungalow at Connor's Hill, Cape Coast, has been converted into a hospital, and the appointment of a nursing sister for this hospital has been sanctioned.

46. The number of in-patients treated during the year at the various hospitals was 628, as against 959 in 1898, thus showing a decrease of 331; of these 50 were Europeans.

ASYLUM.

47. There is only one lunatic asylum in the Colony, and that is the Castle at Christiansborg, the residence of former Governors of this Colony.

48. There are no poorhouses nor reformatories in the Colony, and poverty in the strict sense of the word is practically unknown.

SAVINGS BANK.

49. The deposits for the year amounted to £3,827, the withdrawals to £3,965, or an excess of withdrawals over deposits of £138. As high interest is easily obtainable on small loans the Savings Bank is only used as a place for temporary deposits, and not for the legitimate purpose of inculcating thrift. The interest accrued and credited to the several depositors accounts at 31st December amounted to £108. The interest on investments received during the year amounted to £141, the net profit on the working of the Bank being £33. As compared with the previous year there is a considerable falling off in the deposits and a slight decrease in the withdrawals.

50. The following tables show the amount of deposits and withdrawals at the principal stations in the Colony for the last two years.

I.

51. Comparative statement of deposits, 1898 and 1899:—

Station.	1898.	1899.	Increase.	Decrease.

1899	5,007 15 9	3,827 0 7	108 9 10	8,943 6 2	3,964 15 5	8 15 10	3,973 11 3	4,969 14 11

POLICE.

56. The strength of the Police Force on the 31st December, 1899, was 416 of all ranks; 161 recruits were enlisted at Accra, but of these 40 were subsequently rejected as unsuitable.

57. The force is armed with Martini-Henri carbines, and the men at Accra are put through a modified course of musketry.

PRISONS.

58. There are 12 prisons in the Colony, including Kumasi and Attabubu. The majority of these buildings are unsuitable for prisons, but until the question of a central prison is definitely decided they have to serve as such.

59. Various trades, such as carpentering, tailoring, bootmaking, coopering, &c., are carried on in the Accra and Elmina prisons, and very good results are obtained. The prisoners at the other stations are employed as labourers on the roads and as scavengers.

60. There were 22 escapes during the year, as against 17 in 1898. Six of these prisoners were recaptured.

61. The number of prisoners who received corporal punishment during the year was 18, as compared with 10 and 15 in 1898 and 1897 respectively. The number of executions was six.

CRIMINAL STATISTICS.

62. The criminal returns for 1899 show a decrease in general crime, the total number of crimes reported being 4,075, as against 4,713 in the previous year.

63. The following will show the total number of convictions for the last five years:—

Year.	Males.	Females.	Juveniles.	Totals.
1895	1,859	101	46	2,006
1896	2,044	273	38	2,355
1897	1,879	220	51	2,150
1898	1,850	189	34	2,073
1899	1,711	135	28	1,874

64. The following are the statistics of crime for the last five years :—

	Apprehensions.					Convictions.				
	1895.	1896.	1897.	1898.	1899.	1895.	1896.	1897.	1898.	1899.
I. Offences against the person	961	1187	986	1089		556	667	601	593	
II. Offences against property	782	730	744	846		427	411	416	492	
III. Other offences	4612	5263	4073	4165		3504	4274	3469	3136	
Totals	6355	7180	5803	6100		4487	5352	4486	4221	
I. Murder, including infanticide, manslaughter, cutting and wounding, common assault.	34	78	47	38		25	45	21	21	
II. Burglary and housebreaking	70	56	11	46		34	21	6	22	
III. Arson	11	6	8	5		11	2	4	3	
Totals	115	140	66	89		70	68	31	46	

VITAL STATISTICS.

65. The general health of the Colony during the past year was comparatively good. Out of 166 European officials there were only nine deaths and 23 cases of invaliding, and out of an estimated number of 400 non-official Europeans there were 18 deaths and 52 cases of invaliding. The following table gives the death and invaliding rate per thousand among the Europeans:—

Class.	No.	Deaths.	Invalided.	Death rate per 1,000.	Invaliding rate per 1,000.
Official ...	166	9	23	54·2	138·9
Non-official ...	400	18	52	45·0	130·0
Total ...	566	27	75	47·7	132·5

66. No death rate can be calculated for natives, owing to the difficulties of obtaining reliable information. Every effort has been made to decrease the rate of mortality and sickness by providing hospitals, good food, and good nursing, and by improving the sanitary conditions of the towns. But the large majority still resort to the "Native Medicine Man."

67. The general health of the officers in the Northern Territories does not appear to have been so good during the past year.

68. The experiment of bringing out European nurses for the Gold Coast has been a great success, and an additional nurse has recently been obtained, so that one may be permanently stationed at Cape Coast.

69. A Pathological Laboratory has now been established at Accra, and it is hoped will be found a useful institution for original research into the cause and nature of the various fevers and diseases found in the Colony.

70. The sanitary condition of the various towns has been improved, but in most of them there is still considerable room for further improvement. The sanitary work of Accra is now in the hands of the Town Council, who have their own Medical Officer of Health.

71. The following table gives the rainfall month by month at Accra and Aburi for the years 1898 and 1899 respectively:—

Month.	Accra.		Aburi.	
	1898.	1899.	1898.	1899.
January	—	—	2·61	·50
February	—	·62	0·62	4·74
March	1·72	1·99	3·28	6·18
April	5·66	·64	6·85	3·08
May	2·53	4·16	4·83	3·98
June	4·88	4·03	7·78	5·94
July	2·74	·11	5·26	5·35
August	1·56	4·12	3·72	5·45
September	4·69	·56	6·16	1·15
October	3·41	2·47	8·52	6·16
November	—	—	6·16	5·54
December	1·33	·94	2·33	1·05
Totals... ...	28·52	19·64	58·12	49·12

From the above table it will be seen that the rainfall for the year 1890 at both places was considerably less than in the previous year.

POST AND TELEGRAPHS.

72. Hitherto the two branches of the office have been separate departments, under the Postmaster-General and the Director of Telegraphs respectively, but from the 1st October, 1899, the whole administration has been in the hands of the Postmaster-General.

GOLD COAST, 1899.

73. The following comparative table will show the working of the Postal Department during 1899 as compared with the previous year:—

Year.	No. of Letters, Cards, &c. Posted.	No. of Registered Articles Posted.	Total amount of Money Order Transactions.	Total amount of Postal Order Transactions.	No. of Parcels.
			£ s. d.	£ s. d.	
1898 ...	662,978	23,995	12,843 17 9	2,761 0 6	3,863
1899 ...	633,909	41,878	16,878 18 1	2,387 4 6	5,744
Increase	—	17,883	4,035 0 4	—	1,881
Decrease	29,069	—	—	373 16 0	—

74. The money orders show a considerable increase over the number issued in the previous year. This is partly accounted for by the development in the gold industry, but is mainly owing to the numerous remittances on the part of the natives for goods advertised in various papers. This is also borne out by the increased number of parcels received by parcels post.

TELEGRAPHS.

75. The returns for the year show a steady increase in the revenue collected, as well as in the total number of messages transmitted. No new sections have been constructed during 1899, but a new office was opened at Bole, which is the furthest point the telegraph extension to the Northern Territories has reached.

76. The total number of telegrams transmitted during the year was 128,026, as compared with 119,242 in the previous year, showing an increase of 8,784.

77. The number of messages sent through the Government offices for transmission by the African Direct Telegraph Company amounted to 2,268, as compared with 1,954 in 1898. There is an increase in the number of messages transmitted over our lines from Togoland to Europe and *vice versâ*. The paid messages to and from Togoland show a slight falling off, probably due to the interruption of the Volta cable.

TELEPHONES.

78. There is a Telephone Exchange at Accra, connecting with all the Government offices.

MILITARY FORCES AND EXPENDITURE.

79. There are no Imperial or Militia troops in the Colony. There is, however, a Volunteer Force, which was raised in 1892, the strength of which on the 31st December, 1899, was as follows:—

Officers.	Warrant Officers.	Sergeants.	Corporals.	Privates.	Signallers.	Band.	Total.
12	1	17	19	139	10	43	241

80. The force, which is put through an annual musketry course, is recruited principally from the Government and mercantile offices.

81. The authorised strength of the Constabulary or Hausa Force is 1,676 of all ranks. The re-organisation of the force has been undertaken, and the force will in future be known as the Gold Coast Battalion of the West African Frontier Force. The force is armed with Martini-Metford carbines and has a supply of Maxim, Nordenfeldt, and 7 pr. guns. The total expenditure in connection with the force amounted to £40,583 during the year under review.

GENERAL OBSERVATIONS.

82. It was contemplated, for administrative purposes, to place the Northern Territories under an administrator, and the late Lieutenant-Colonel Northcott, C.B., was appointed to that post. Unfortunately for the Colony his death in South Africa prevented the scheme from being carried into effect.

83. Affairs in Ashanti were on the whole satisfactory. The issue of licences to prospect for gold and other mineral products was introduced in the latter part of the year, and 25 licences were taken out. The gold-mining industry steadily increased during the year, although, as stated elsewhere, the exports of gold showed a considerable and at the same time unaccountable falling off.

84. The difficulty of transport is still a serious obstacle in the way of gold mining, and, indeed, to the general progress and development of the Colony, and this serious drawback must continue until railways are an accomplished fact and the heavy machinery and other necessary appliances for the successful working of the gold mines and other industries can be economically and expeditiously conveyed from place to place.

85. The work on the Sekundi Tarkwa Railway has not been so rapid as was anticipated, and no part of the line was opened for traffic during the year. The scarcity of labour has considerably retarded progress.

86. Emigration from the Colony is practically confined to labourers for the Congo railway, who are indentured for periods of one or more years.

87. Investigations for a water supply for Accra have been proceeding in the neighbourhood of Aburi and Cape Coast, and it is hoped a definite scheme may soon be formulated.

C. H. HUNTER,

Acting Colonial Secretary.

COLONIAL REPORTS—ANNUAL.

No. 344.

GOLD COAST.

REPORT FOR 1900.

(For Report for 1899, *see* No. 306.)

Presented to both Houses of Parliament by Command of His Majesty.
December, 1901.

No. 344.

GOLD COAST, 1900

GOLD COAST.

GOVERNOR MAJOR NATHAN TO MR. CHAMBERLAIN.

Government House, Accra,

5th November, 1901.

SIR,

I HAVE the honour to forward a Report by Mr. C. H. Hunter, Acting Colonial Secretary, on the Blue Book of the Gold Coast for the year 1900.

2. I regret the delay which has occurred in the preparation of this document, due to the great amount of work that has been in the Secretariat this year, and to the staff of that office having been unavoidably below strength.

I have, &c.,

M. NATHAN,

Governor.

e10362—875—11/1901 Wt 25152 D & S—6

GOLD COAST, 1900.

REPORT ON THE BLUE BOOK OF THE GOLD COAST FOR 1900.

FINANCIAL.

1. The table below shows the Revenue for the year 1900 compared with that of the preceding year:—

HEAD.	1899.	1900.	Increase.	Decrease.
	£	£	£	£
Customs	280,192	282,652	2,460	—
Light dues	1,303	1,495	192	—
Licences and internal revenue not otherwise classified.	16,079	13,476	—	2,603
Fees of court or office, payments for specific services and reimbursements in aid.	21,009	19,618	—	1,391
Post Office	482	584	102	—
Rents of Government property ...	290	42	—	248
Interest	141	450	309	—
Miscellaneous	3,300	3,824	524	—
Ashanti	—	3,406	3,406	—
Northern Territories	—	7,736	7,736	—
Grant in aid of expenditure in the Northern Territories.	100,000	50,000	—	50,000
Total	422,796	383,283	14,729	54,242

2. The General Revenue for the year, exclusive of grants in aid, amounted to £333,283, being £24,397 less than the amount estimated, but £10,487 more than that collected in the preceding year. It was the highest Revenue ever raised in the Colony.

3. The increase was entirely due to the fact that Revenue was derived from Ashanti and the Northern Territories for the first time.

4. A Parliamentary Grant of £50,000 was made in aid of the Expenditure in the Northern Territories.

5. The table below shows the Expenditure for the year 1900 compared with that of the preceding year:—

Head.	1899.	1900.	Increase.	Decrease
	£	£	£	£
Pensions and Gratuities	5,610	6,293	683	—
Governor and Legislature	5,291	5,303	12	—
Colonial Secretary's Office	4,501	4,249	—	252
Ashanti...	2,608	2,578	—	30
Northern Territories	54,875	37,441	—	17,434
Native Affairs	2,036	1,382	—	654
Treasury	5,143	4,758	—	385
Customs	13,094	14,719	1,625	—
Preventive Services	8,906	14,438	5,532	—
Printing Office...	1,539	1,502	—	37
Audit	1,487	1,375	—	112
Lighthouses and Signal Stations ...	613	566	—	47
District Commissioners	8,831	8,896	65	—
Supreme Court	5,359	5,994	635	—
Law Officers	1,626	1,608	—	18
Ecclesiastical and Cemeteries ...	1,015	973	—	42
Constabulary	40,583	19,634	—	20,949
Police	13,784	12,514	—	1,270
Volunteers	708	516	—	192
Prisons	6,723	7,471	748	—
Medical and Sanitary	21,208	17,754	—	3,454
Education	6,523	7,038	515	—
Botanical Stations	1,154	1,650	496	—
Carried forward	213,217	178,652	10,311	44,876

5. EXPENDITURE—*continued.*

Head.	1899.	1900.	Increase.	Decrease.
	£	£	£	£
Brought forward	213,217	178,652	10,311	44,876
Transport	17,192	17,038	—	154
Rent	1,225	1,190	—	35
Miscellaneous Services	11,484	18,974	7,490	—
Post Office	4,940	11,916	416	—
Telegraphs	6,560			
Public Works Department	10,778	10,457	—	321
Public Works, Recurrent	13,146	14,162	1,016	—
Public Works, Extraordinary ...	27,183	19,814	—	7,369
Special Services	3,911	—	—	3,911
Ashanti Special Expedition	20	—	—	20
Totals	309,656	272,203	19,233	56,686

6. The foregoing statement shows a net decrease of £37,453 as compared with the Expenditure of the preceding year. This decrease was due to a general saving in nearly all the Departments, while £43,451 less than estimated was expended in the Northern Territories.

7. The table does not take into account a Grant-in-aid of £202,300 in respect of the Ashanti disturbances.

8. The table below shows a comparative statement of the Revenue and Expenditure for the last five years:—

Year.	Revenue.	Expenditure.
	£	£
1896	237,460	282,272
1897	233,179	401,692
1898	303,822	377,976
1899	422,796	309,656
1900	383,283	272,203

9. It will be observed that during the years 1896 to 1898 the Expenditure very considerably exceeded the Revenue. This was mainly due to the cost of the Ashanti expedition of 1895-96, which was defrayed from the funds of the Colony, and to the opening up and development of the Northern Territories. For the past two years the General Revenue has largely exceeded the Expenditure.

10. The Colony has no Public Debt, but is responsible for advances to the extent of £435,448. This includes advances made on account of the Seccondee-Tarquah Railway.

11. An Ordinance was passed in 1900 providing for the raising of a loan of £676,000 for railway construction, &c., in addition to the £220,000 authorised in 1898 by the Railway Ordinance of that year. Neither loan has yet been subscribed, but the sum expended on railways up to the end of 1900 amounted to £389,869.

TRADE, AGRICULTURE, AND INDUSTRIES.

Imports and Exports.

12. The total value of Imports in 1900 was £1,294,963, and the value of Exports £885,445, giving a total value for the trade of the Colony for the year of £2,180,408, a decrease of £83,808 on the previous year.

13. The table below shows the value of the trade of the Colony for the last five years:—

Year.	Imports.		Exports.	Total.
	Paying duty.	Admitted free.		
	£	£	£	£
1896	552,968	225,041	792,111	1,570,120
1897	562,418	221,770	857,793	1,641,981
1898	599,508	360,828	992,998	1,953,334
1899	735,917	416,561	1,111,738	2,264,216
1900	849,022	445,941	885,446	2,180,409

GOLD COAST, 1900.

14. The table below gives a general classification of all Imports:—

Articles.	Value in Sterling.	
	Of imports in detail, excluding expenses.	Total Value, excluding expenses.
	£	£
I.—Live animals, food, drink, and narcotics.	—	311,258
II.—Raw materials :—		
(a) Metal	1,209	
(b) Other	17,131	
		18,341
III.—Manufactured articles :—		
(a) Textile	370,752	
(b) Metal	93,255	
(c) Other	305,435	
		769,442
IV.—Coin and bullion...	—	195,922
Total	—	£1,294,963

15. The following is a comparative table of the value of Imports, showing that the greater portion of the Import trade is with the United Kingdom, and that while the Imports from the United Kingdom and British Colonies together increased 67 per cent. in the last five years, those from Foreign Countries increased 60 per cent. in the same period:—

Year.	From the United Kingdom.	From British Colonies.	From Foreign Countries.	Totals.
	£	£	£	£
1896 ...	569,828	28,520	179,661	768,009
1897 ...	526,411	60,787	196,990	784,188
1898 ...	726,197	43,101	191,038	960,336
1899 ...	858,721	54,079	239,678	1,152,478
1900 ...	920,279	78,042	296,642	1,294,963

16. The table below gives a general classification of all Exports:—

Articles.	Value in Sterling.		
	Produce and Manufacture of the Colony.	British and Foreign and Colonial Produce and Manufacture.	Totals.
	£	£	£
I. Live animals, food, drink, and narcotics	—	849	849
II. Raw materials:—			
(a) Metal	38,208	68	38,276
(b) Other	813,472	14	813,486
III. Manufactured articles:—			
(a) Textile	—	6,650	6,650
(b) Metal	—	413	413
(c) Other	737	3,913	4,650
IV. Coin and bullion... ...	—	21,121	21,121
Totals	842,417	33,028	885,445

17. The following is a comparative table of the value of Exports, showing that the greater portion of the Export trade is with the United Kingdom. Comparing it with the table in paragraph 15, it will be seen that the proportion of the total Exports going to Foreign Countries is far higher than that of the total Imports coming from them:—

Year.	To the United Kingdom.	To British Colonies.	To Foreign Countries.	Totals.
	£	£	£	£
1896	536,106	37,471	218,534	792,111
1897	581,904	35,667	240,222	857,793
1898	713,335	41,667	237,996	992,998
1899	767,575	70,762	273,401	1,111,738
1900	509,779	49,988	325,678	885,445

GOLD COAST, 1900

18. There was a decrease in the value of Exports for the year 1900 compared with that of 1899 amounting to £226,393, which is attributed to the Ashanti rebellion and consequent stagnation of trade, and also to the fact that rubber no longer goes to the Gold Coast ports from the neighbouring French Colony, as was formerly the case.

The following are the most important items of decrease:—

Rubber	£227,575
Lumber	19,329
Kola Nuts	13,888
Gold and gold dust	13,293

The increases are trifling, except in the following articles:—

Palm oil	£55,608
Cocoa	11,216

19. The following table shows the quantity and value of kola nuts and cocoa exported during the last five years:—

Year.	Kola Nuts.					Cocoa.				
	Packages.	Value.				Lbs.	Value.			
		£	s.	d.			£	s.	d.	
1896	3,156	33.278	0	4		86,854	2,275	13	3	
1897	4,278	37,869	16	4		156,672	3,195	14	7	
1898	3,092	35,789	3	7		414,201	9,616	4	0	
1899	2,671	57,020	16	11		714,929	16,063	19	5	
1900	1,907	43,132	13	7		1,200,794	27,280	9	7	

20. The following table gives quantities and values of palm oil and palm kernels exported in the last three years, and shows the trade in these to have been maintained:—

Year.	Palm Oil.		Palm Kernels.	
	Gallons.	Value.	Tons.	Value.
		£		£
1898	2,145,138	114,288	9,732	66,378
1899	3,323,919	183,204	12,664	106,156
1900	4,238,685	238,812	12,811	96,936

21. The following table gives quantities and values of timber exported in the last five years, and shows a decline in this trade since 1897:—

Year.	Quantity.	Value.
	Feet.	£
1896	6,036,381	52,234
1897	15,236,216	90,569
1898	13,620,965	110,331
1899	11,990,832	87,076
1900	7,443,987	67,747

22. The comparative table below shows the quantities and values of rubber exported from the Colony to the countries mentioned during the last three years, and shows a large falling off in 1900, partly due to the disturbances in Ashanti:—

Countries.	Quantity.			Value.		
	1898.	1899.	1900.	1898.	1899.	1900.
	Lbs.	Lbs.	Lbs.	£	£	£
United Kingdom.	5,380,755	5,249,541	3,063,657	495,502	522,854	292,257
Germany ...	600,000	322,414	322,009	55,910	32,836	32,445
Other Countries.	3,429	599	56,774	255	41	3,454
Totals...	5,984,984	5,572,554	3,452,440	551,667	555,731	328,156

23. The following table gives quantities and values of gold exported in the last five years, and shows a steady decline,

GOLD COAST, 1900.

due, it is believed, to new systems of development being introduced and old mines being closed down:—

Years.	Gold and Gold Dust.					
	Ozs.	Ack.*	Tek.*	Value.		
				£	s.	d.
1896	23,940	10	$2\frac{4}{5}$	86,186	7	2
1897	23,554	13	$3\frac{4}{5}$	84,797	9	1
1898	17,732	11	—	63,837	13	6
1899	14,249	14	$2\frac{2}{3}$	51,299	13	0
1900	10,557	6	$1\frac{2}{3}$	38,006	12	3

* Colonial Office Note. In weighing gold dust the natives of the Gold Coast employ only two denominations, viz., the Teku and the Ackie. The Teku is $\frac{1}{5}$th of an Ackie, and is equal to 9*d.* in value. The Ackie is $\frac{1}{16}$th part of an ounce (Troy), and is equivalent to 4*s.* 6*d.* in value. The ounce (Troy) of gold dust is fixed by Ordinance No. 2 of 1880 at £3 12*s.* 0*d.* in value.

CUSTOMS RECEIPTS.

24. The following were the Customs receipts during the year at the principal ports of the Colony:—

Port.	Imports, exclusive of Spirits, Gunpowder and Guns.	Spirits.	Gunpowder.	Guns.	Totals.
	£	£	£	£	£
Accra ...	16,665	39,423	709	109	56,906
Adda ...	6,125	15,572	103	42	21,842
Axim ...	7,460	17,538	544	122	25,664
Cape Coast ...	23,217	40,513	721	417	64,868
Kwitta ...	4,048	8,741	806	50	13,645
Saltpond ...	7,290	24,756	231	76	32,353
Sekondi ...	2,821	11,789	47	22	14,679
Winneba ...	3,308	20,884	312	11	24,515
Other stations	3,876	22,796	169	31	26,872
Totals ...	74,810	202,012	3,642	880	281,344

The Customs receipts show a net increase of £2,460 over those of the preceding year.

25. The principal increase in Customs receipts is that on spirits, which, compared with the receipts of last year, show an increase of £15,269. This is entirely due to the large importation of American rum to the detriment of the trade in gin; the duties on rum showing an increase of £18,065, whilst the gin duties show a decrease of £2,920. The most marked decreases are those under the following heads:—

General Imports	£3,270
Gunpowder	8,305
Guns	1,408

The decreases in receipts from General Imports can only be attributed to the Ashanti disturbances, and from Gunpowder and Guns to the Proclamation of April 12th, 1900, prohibiting dealing in these articles.

SHIPPING.

26. The following table is a comparative statement of the total shipping entered and cleared for the last five years:—

Year.	Sailing Vessels.		Steamers.	
	Number.	Tonnage.	Number.	Tonnage.
1896	16	6,784	400	553,794
1897	16	6,582	415	580,277
1898	9	3,173	390	572,811
1899	11	4,825	402	631,124
1900	12	4,858	433	708,742

27. The increase in tonnage of steamers entered and cleared over those of 1899 amounts to 77,618 tons. This is due to larger steamers being placed on the West African service.

28. There is a regular fortnightly English mail service between the ports of Axim, Sekondi, Cape Coast, and Accra, and the United Kingdom, performing the voyage in 16 to 18 days, and a regular monthly German mail service from Accra and Cape Coast to Plymouth. These latter boats now call at Southampton on their outward passage.

LEGISLATION.

29. During the year 1900 21 Ordinances were passed. Of these Nos. 1, 2, 6, 7, 12, and 14 are of importance.

30. "The Patents Ordinance" (No. 1 of 1900) provides for the protection of inventions by Letters Patent.

31. "The Trade Marks Ordinance" (No. 2 of 1900) provides for the registration of trade marks, giving to the proprietors of registered trade marks the right of exclusive use of such trade marks.

32. "The Shipping Casualties, Wrecks, and Salvage Ordinance" (No. 6 of 1900) gives authority for inquiry to be made respecting shipping casualties, and in the case of salvage directs that Receivers and Assessors shall be appointed by the Governor.

33. "The Imperial Loans Ordinance" (No. 7 of 1900) makes provision for the borrowing of the sum of £676,000 for certain public works from the Imperial Treasury and for the due repayment of the same.

34. "The Kwitta Customs Tariff (Amendment) Ordinance" (No. 12 of 1900) provides a new customs tariff for goods imported at Kwitta, and repeals Ordinance No. 8 of 1900.

35. "The Concessions Ordinance" (No. 14 of 1900) was passed to regulate the concession of rights with respect to lands by natives, and provides for enquiries into concessions, issue of certificates of validity, issue of licences to prospect, payment of duties on profits, and for other matters affecting the mining interests in the Colony.

EDUCATION.

PRIMARY.

36. The schools in the Colony are divided into two classes—Government and Assisted. The former, seven in number, have been established and are exclusively maintained by Government funds. The latter, of which there are 131, are schools established by the different Mission Societies and receiving annual Grants-in-aid from the State towards their support. There are, in addition, a number of schools connected with the Missions which not being sufficiently large (*i.e.*, not having an average daily attendance of 20) do not receive any support from the Government. The principal Missions at present represented in the Colony are the Wesleyan Methodist, the Basel (German Protestant), and the Roman Catholic (French).

37. There is no system of local management as that term is generally understood; indeed, in the majority of villages where schools have been established the only person in any way capable of taking a share in the management of the schools is the master himself. The sphere of each Mission is divided into districts, and an ordained member, either European or native, of the Society represented is appointed to overlook all the schools in his particular district. These managers appoint and dismiss teachers, fix salaries, &c., without any reference to the central authority. That this system is far from satisfactory is at once evident from the fact that a journey of two to three weeks is in some cases necessary to enable a manager to make one short visit to each of the schools for which he is responsible; but, unsatisfactory as the arrangement is, it is under present circumstances, and will be for some considerable time, the only one possible.

38. The total number of children returned as attending school in 1900 was 11,996, about 14 per cent. of whom were girls. The average daily attendance was 8,911, and the number actually presented for examination was 10,329. There are in addition about 2,000 children in attendance at the smaller or unassisted schools. The number of children attending school is thus barely one per cent. of the estimated population of the Colony.

In 1886 the number of children on the rolls was 3,513, and the average daily attendance 2,629.

39. The following table gives the returns for the past ten years:—

NUMBER OF SCHOOLS.

Year.	Government.	Assisted.	Total.	No. on Roll.	Average Attendance.	Grant-in-aid.		
						£	s.	d.
1890–1	5	49	54	5,076	3,541	1,761	5	0
1891–2	5	69	74	6,636	—	1,678	4	0
1892–3	6	66	72	7,350	5,195	2,170	17	6
1893–4	5	70	75	8,174	6,684	2,394	14	0
1894–5	7	93	100	9,954	7,570	3,179	6	0
1895–6	6	109	115	11,205	8,558	3,400	11	0
1897	7	111	118	—	8,478	3,646	13	8
1898	7	112	119	11,181	8,369	3,432	13	1
1899	7	123	130	12,240	9,239	4,129	11	5
1900	7	131	138	11,996	8,911	3,679	11	1

40. In the two principal Government schools at Accra and Cape Coast a fee of sixpence per month is charged for scholars in the standards, and children in the infant classes are charged threepence per month. In the majority of "Assisted" schools instruction is free, but in a few cases a fee, varying from one shilling to ten shillings per quarter is paid.

The following table shows the amount of fees paid during 1899 and 1900:—

Year.	Government Schools.	Assisted Schools.	Total.
	£ s. d.	£ s. d.	£ s. d.
1899	207 14 0	627 9 5	835 3 5
1900	210 12 3	536 10 8	747 2 11

The average annual payment of each child attending school during 1900 was thus one shilling and twopence.

41. In 1900 the Government expenditure on education was approximately £7,000. Of this amount £3,679 11*s.* 1*d.* was awarded as Grants-in-aid to the Mission Societies, the remainder representing the cost of maintaining the purely Government schools and the executive branch of the Department. The cost to the Missions of maintaining the aided schools was, as returned by them, about 75 per cent. of the amount expended by the Government.

Voluntary subscriptions, amounting to a little over £200, were received by the various missionary bodies.

SECONDARY.

42. Of higher or secondary education there is none. The training seminaries of the Basel Mission at Akropong and Abetifi may be said to be the only attempts at an education other than merely elementary. The standard from which the candidates for training are taken is not at present sufficiently high to enable the work done at these institutions to be of a very advanced order.

TECHNICAL.

43. In 1899 a school for instruction in carpentry was opened by a qualified European master in connection with the Government School, Accra. Attendance at these classes is not confined to scholars from the Government school, children from the higher standards in the local mission school having the privilege of entry. A School on similar lines is shortly to be opened at Cape Coast, where, in connection with the Wesleyan Mission,

classes for instruction in smith-work have for some time been held.

Most of the schools in the interior have small plantations attached where the scholars receive useful instruction in the cultivation of cocoa, coffee, sisal hemp, cassada, &c.

GOVERNMENT INSTITUTIONS.

44. There are Government hospitals at the following places in the Colony:—Accra, Cape Coast, Elmina, Axim, Saltpond, Kwitta, and Kumasi. Of these, there is accommodation for Europeans at the two first named stations. A nursing sister has now been appointed to the hospital at Cape Coast.

45. The number of in-patients treated during the year at the various hospitals was 1,185 compared with 628 in 1899.

ASYLUM.

46. There is only one lunatic asylum in the Colony, and that is at the Castle at Christiansborg, the residence of former Governors of this Colony.

47. There are no poor-houses nor reformatories in the Colony, and poverty, in the strict sense of the word, is practically unknown.

SAVINGS BANK.

48. The deposits for the year amounted to £3,553, and the withdrawals to £4,067, making an excess of withdrawals over deposits of £514. The number of depositors fell to nearly half that of the previous year. The reason that the transactions have decreased is stated to be mainly due to the establishment of branches of the Bank of British West Africa at Accra and Cape Coast. These branches, by giving 5 per cent. instead of 2½ per cent. interest, have taken away from the Savings Bank the larger and more permanent of the deposits. The small depositors, mainly subordinate officials and traders' clerks, still continue to make use of the Savings Bank chiefly as a means for safely keeping their money. They deposit their monthly pay as soon as received and draw it out again in instalments as they require it for use. The vast bulk of the natives who have money make no use of any Bank, preferring to obtain usurious rates of interest for its loan, though this is, of course, attended by risk. The Savings Bank on the Gold Coast with its 271 depositors cannot on the whole be looked upon as a thriving institution, though I am informed that it is appreciated by the small number of people that make use of it.

49. Comparative table showing deposits for 1899 and 1900:—

Station.	1899.	1900.	Increase.	Decrease.
	£ s. d.	£ s. d.	£ s. d.	£ s. d.
Accra	988 14 3	985 17 1	—	2 17 2
Adda	158 9 8	160 15 0	2 5 4	—

1899	5,007 15 9	3,827 0 7	108 9 10	8,943 6 2	3,964 15 5	8 15 10	3,973 11 3	4,969 14 11
1900	4,969 14 11	3,447 3 3	106 2 0	8,523 0 2	4,048 2 3	18 9 7	4,066 11 10	4,456 8 4

POLICE.

53. The strength of the Police Force on the 31st December, 1900, was 410 of all ranks; 149 recruits were enlisted at Accra, but of these 10 were afterwards rejected as unsuitable. Police duties among their people are very distasteful to the natives of the Gold Coast, and for that reason it is with great difficulty recruits can be induced to enlist in the Police Force.

PRISONS.

54. There are 15 prisons in the Colony, including Coomassie and Attabubu.

55. Carpentering, tailoring, boot-making, and other trades are carried on at the Accra and Elmina prisons. The prisoners at other stations are employed as labourers and scavengers.

56. During the year there were 13 escapes as compared with 22 in 1899. Of these, 3 were recaptured. Corporal punishment was administered to 3 prisoners, as compared with 18 and 10 in 1899 and 1898 respectively. The number of executions was 7.

CRIMINAL STATISTICS.

The following are the statistics of crime for the last five years :—

	Apprehensions.					Convictions.				
	1896.	1897.	1898.	1899.	1900.	1896.	1897.	1898.	1899.	1900.
I. Offences against the person	1,187	986	1,089	891	967	667	601	593	496	475
II. Offences against property	730	744	846	788	831	411	416	492	416	441
III. Other offences	5,263	4,073	4,165	2,362	1,563	4,274	3,469	3,136	1,481	1,186
Totals	7,180	5,803	6,100	4,041	3,361	5,352	4,486	4,221	2,393	2,102

From this table it will be seen that both the number of apprehensions and convictions have considerably decreased during the past five years.

VITAL STATISTICS.

58. The general health of the Colony during the year 1900 was good. Both the official and non-official European population increased very largely since 1899. The number of officials has increased from 166 to 468 and that of non-officials from 400 to 1,512. The very large increase in the latter is due to the great number of miners and others who are continually coming out in connection with the mining industry. Both the death and invalid rates per 1,000 are less than the corresponding rates for the preceding year.

59. The following table shows the death and invaliding rate per 1,000 among the Europeans:—

Class.	No.	Deaths.	Invalided.	Death rate per 1,000.	Invaliding rate per 1,000.
Official ...	468	10	29	21·36	61·96
Non-official ...	1,512	34	99	22·48	65·47
Total ...	1,980	44	128	22·22	64·64

60. No death-rate can be calculated for the natives owing to the impossibility of obtaining reliable information. It is, however, satisfactory to note that advantage is being taken of the hospitals provided, the number of in-patients treated during the year being nearly double of that for 1899.

61. The Pathological Laboratory which was established at Accra in the preceding year made little or no progress in 1900, owing to the absence at Coomassie of the Medical Officer in charge of it.

62. Each year shows some improvement in the sanitary condition of Accra, as well as most of the coast towns, but the habits of the people are dirty, and much of the sickness in the Colony, especially at Cape Coast, is attributable to this.

63. The following table shows the monthly rainfall at Accra and Aburi for the years 1899 and 1900:—

Month.	Accra.		Aburi.	
	1899.	1900.	1899.	1900.
January	—	·62	·50	1·51
February	·62	·8	4·74	2·30
March	1·99	1·27	6·18	2·72
April	·64	4·89	3·08	4·88
May	4·16	3·98	3·98	3·14
June	4·03	3·55	5·94	5·72
July	·11	·90	5·35	2·48
August	4·12	·30	5·45	1·49
September... ...	·56	·20	1·15	2·29
October	2·47	5·35	6·16	5·90
November... ...	—	2·20	5·54	2·53
December... ...	·94	—	1·05	2·69
Totals... ...	19·64	23·34	49·12	37·65

From this table it will be seen that the rainfall at Aburi is considerably less, and at Accra rather more, than in the previous year.

POST AND TELEGRAPHS.

64. From the 1st of October, 1899, the two branches of the office were put under the administration of the Postmaster-General.

POST.

65. The table below shows some part of the business of the Postal Department during 1900 as compared with the previous year:—

Year.	No. of Registered Articles Posted.	Total amount of Money Order Transactions.	Total amount of Postal Order Transactions.	No. of Parcels.
		£ s. d.	£ s. d.	
1899	41,878	16,878 4 6	2,387 4 6	5,744
1900	48,760	21,821 17 9	2,324 9 6	7,995
Increase	6,882	4,942 19 8	—	2,251
Decrease	—	—	62 15 0	—

The money orders show a large increase on those of the previous year.

TELEGRAPHS.

66. The increase in telegrams sent in 1899 was steadily maintained during the year, the total number of telegrams transmitted during the year being 140,315, as compared with 128,026 in the previous year; and the Revenue collected being about £400 in excess of that of 1899. Temporary offices were opened at a number of places during the Ashanti disturbances. The telegraph line for the greater part of the distance between Prahsu and Coomassie, and for many miles north of Coomassie, was destroyed by the Ashantis, but the greater part of it was restored before the end of the year.

67. The number of messages sent through the Government Offices for transmission by the African Direct Telegraph Company, amounted to 2,563, as compared with 2,268 in 1899.

TELEPHONES.

68. There is a telephone exchange at Accra connected with all the Government Offices. It was intended to establish an exchange at Cape Coast during the year but the disturbances in Ashanti prevented it being completed. Communication was established between Cape Coast Castle, the Base Commandant's Office, and the Hospital.

MILITARY FORCES AND EXPENDITURE.

69. There are no Imperial or militia forces in the Colony.

70. The establishment of the Gold Coast Constabulary in 1900 was 1,521 of all ranks. The strength of the force on 31st December was much below this establishment, owing to a large number having been killed during the disturbances in Ashanti and the cessation of all recruiting for the force for the time being. The total expenditure during the year in connection with the force amounted to £19,634. A complete reorganization of the force is proposed.

71. The Gold Coast Rifle Volunteers, which was raised in 1892, have gradually increased, the nominal strength of the force on the 31st December, 1900, being 283, or 42 in excess of the strength at the end of the previous year:—

Officers.	Warrant Officers.	Sergeants.	Corporals.	Privates.	Signallers.	Band.	Total
9	1	19	31	198	—	25	283

GENERAL OBSERVATIONS.

72. At the commencement of April the Coomassie chiefs and their followers in Ashanti, together with the Offinsus, Atchimas, and Egisus, rose against the Government, and were afterwards joined by part of the Kokofus, the Adansis, Ahafus, Wankis, Bechims, and Inkwantas. The Governor was besieged at Coomassie till the 23rd June, when he made his way to the coast, leaving a small garrison in the Residency. A force of West and Central African troops under Colonel Sir James Willcocks relieved the Residency on the 15th July, and inflicted several defeats on the Ashantis, the operations lasting till the end of the year.

73. Trade with the interior, except with the eastern part of the Colony, ceased during the rising and military operations.

74. Towards the end of the year, a large number of Europeans arrived on the Gold Coast with a view to the prospecting and development of mining properties.

75. The difficulties of transport which have always been an obstacle to the general progress of the Colony were greatly

increased by the necessity of providing for the movement of a large number of troops with their stores and ammunition to and from Ashanti.

76. Scarcity of labour again showed itself to be a very serious impediment to the opening up of the Colony generally; the price of labour is high and the supply most uncertain.

77. Railhead on the Seccondee-Tarquah Railway was at 25¼ miles from Seccondee, or 14 miles short of Tarquah, at the end of the year, the formation level being complete for four miles beyond. The scarcity of labour had very seriously retarded the progress of the work.

78. The investigations for a water supply for Accra progressed, but no definite scheme has yet been determined on.

79. His Excellency, Major Nathan, C.M.G., R.E., was appointed Governor and Commander-in-Chief of the Colony in succession to Sir F. M. Hodgson, K.C.M.G., and arrived at Accra on the 17th December.

C. H. HUNTER,

Acting Colonial Secretary.

GOLD COAST.

(For Report for 1900, *see* No. 344.)

ACTING GOVERNOR ARTHUR to MR. CHAMBERLAIN.

Government House,
Accra,
25th October, 1902.

SIR,

I HAVE the honour to transmit herewith a Report on the Blue Book of the Gold Coast for the year 1901, prepared by Mr. G. Attrill, Acting Colonial Secretary.

2. I regret that, owing to the pressure of work that has fallen upon the Secretariat, the staff of that Department having been below strength for a considerable portion of the year, it has not been possible to complete the Report earlier.

I have, &c.,
L. R. ARTHUR,
Acting Governor.

---

875 Wt 28616—12/1902 D & S—5—12990 A 2

REPORT ON THE BLUE BOOK OF THE GOLD COAST FOR THE YEAR 1901.

FINANCIAL.

1. The table below shows the Revenue for the year 1901 compared with that for 1900:—

Heads of Revenue.	Collected in 1900.	Collected in 1901.	Increase.	Decrease.
	£ s. d.	£ s. d.	£ s. d.	£ s. d.
1. Customs	282,652 10 5	350,916 16 4	68,264 5 11	—
2. Light dues	1,495 10 0	1,476 2 0	—	19 8 0
3. Licenses, Excise, &c....	13,475 13 4	20,033 11 2	6,557 17 10	—
4. Fees of Court or office, &c.	19,617 16 9	58,510 15 3	38,892 18 6	—
5. Post office	583 12 7	754 10 5	170 17 10	—
6. Rents of Government property.	42 2 0	45 5 0	3 3 0	—
7. Interest...	449 15 6	717 1 6	267 6 0	—
8. Miscellaneous	3,824 5 1	12,395 18 3	8,571 13 2	—
9. Revenue from Ashanti	3,405 14 0	18,838 0 9	15,432 6 9	—
10. Revenue from Northern Territories.	7,736 7 9	7,324 12 4	—	411 15 5
	333,283 7 5	471,012 13 0	138,160 9 0	431 3 5
Land sales	—	180 10 0	180 10 0	—
	333,283 7 5	471,193 3 0	138,340 19 0	431 3 5
Imperial Grants:—				
(*a.*) Northern Territories	50,000 0 0	25,000 0 0	—	25,000 0 0
(*b.*) Ashanti disturbances	202,300 0 0	197,700 0 0	—	4,600 0 0
	585,583 7 5	693,893 3 0	138,340 19 0	30,031 3 5

2. The net increase in the general Revenue for the year, exclusive of grants-in-aid, was higher than that of 1900, which was higher than that of any previous year by £137,909 15*s.* 7*d.*, and it was £122,998 3*s.* in excess of the original estimates.

3. The increase in Customs Receipts was due to the expansion of the general import trade of the Colony, the imports for the year being valued at £1,801,027, as against £1,258,963 for 1900, and £1,152,478 in 1899.

4. During the year a large number of spirit licenses were issued, more especially in the Sekondi and Tarkwa Districts, resulting in an increased receipt from this item of Revenue as compared with 1900 of £4,170.

5. The increase appearing under Fees of Court was almost entirely due to Stamp Duties, which amounted to £54,354 14*s.* 7*d.*, as against £17,347 6*s.* 7*d.* received in 1900, The greater portion of the above sum was received for Stamp Duties on concession documents, a large number of which were registered during the year.

6. The increases in the other items of Revenue do not call for special remark. The general improvement of trade, and the large amount of money put into circulation by the railway

works and the mining industry have no doubt been the cause of the all-round increase in the Revenue of the Colony.

7. The increase in "Miscellaneous" is due to Royalties due for 1900 having been paid in 1901, and the increase in "Revenue from Ashanti" to the collection of interest tax.

8. The Imperial Grant for the Northern Territories was £25,000 less than in 1900, when it was £50,000, and included a loan of £25,000 for the extension of the telegraph line, whilst the Revenue derived from those territories was £411 15*s.* 5*d.* less.

9. The falling off in the Revenue of the Northern Territories was due to the stoppage of the caravan trade with Ashanti and to the non-sale of trade goods, the year's supply not having been obtained owing to the Ashanti rebellion.

10. The Imperial Grant on account of Ashanti disturbances was £197,700, being the balance of the Imperial Loan of £400,000, of which £202,300 was granted in 1900.

11. The total receipts therefore carried to the general account of the Colony at 31st December amounted to £693,893 3*s.*

12. The table below shows the Expenditure for the year 1901 compared with that of the preceding year:—

Heads of Expenditure.	Expended, 1900.	Expended, 1901.	Increase.	Decrease.
	£ *s.* *d.*	£ *s.* *d.*	£ *s.* *d.*	£ *s.* *d.*

	234,762 7 3	329,475 2 7	110,847 8 10	16,134 13 6
Services provided by Imperial grants:—				
(*a.*) Northern Territories	37,441 2 9	15,592 1 4	—	21,849 1 5
(*b.*) Ashanti disturbances	243,453 9 2	124,392 5 2	—	119,061 4 0
	515,656 19 2	469,459 9 1	110,847 8 10	157,044 18 11

13. An Expenditure amounting to £19,062 10*s.* 6*d.* was incurred under certain heads in excess of the amount estimated; but on the other hand a saving of £43,250 1*s.* 4*d.* was effected under other heads of Expenditure, together with a sum of £15,565 18*s.* 8*d*, under the Vote for Northern Territories. The actual Expenditure, therefore, was £39,753 9*s.* 6*d.* less than the sum provided for by the Estimates.

14. The comparative Statement of Expenditure, 1900 and 1901, exhibits an increased expenditure in 1901, inclusive of the Northern Territories, of £110,847 8*s.* 10*d.*—£37,983 14*s.* 11*d.* = £72,863 13*s.* 11*d.* Of this amount, £53,803 was due to the establishment of the West African Frontier Force; £15,178 to interest charges on advances obtained by the Crown Agents pending the raising of the Railway Loan; and the balance to the reorganization of almost every department of the Service.

15. The Expenditure on the Ashanti disturbances brought to account during the year amounted to £124,392 5*s.* 2*d.*, which together with the amount expended in 1900, viz., £243,453 9*s.* 2*d.*, gave a total expenditure of £367,845 14*s.* 4*d.* at 31st December, 1901.

16. The above expenditure has been met out of a loan of £400,000 from the Imperial Government, £202,300 of which was received in 1900, and the balance, £197,700, in 1901, as already stated.

17. A comparative Statement of Revenue and Expenditure for the ten years 1892 to 1901 follows, showing the rapid strides which this Colony has made within the last ten years, the Revenue for 1901, exclusive of grants-in-aid, being £471,193 3*s.*, as against £183,074 11*s.* 1*d.* in 1892:—

Comparative Statement of Revenue and Expenditure.

Revenue.					Expenditure.				
Years.	Amount.			Remarks.	Years.	Amount.			Remarks.
	£	s.	d.			£	s.	d.	
1892	183,074	11	1		1892	158,103	16	9	
1893	201,782	17	2		1893	178,934	11	5	
1894	218,261	5	7		1894	226,931	19	4	
1895	230,075	12	10		1895	265,289	5	11	
1896	237,460	6	7		1896	282,277	15	8	
1897	233,179	1	6		1897	401,691	10	1	
1898	303,821	12	4	Includes Imperial Grant-in-aid of £45,000 on account, Northern Territories.	1898	377,975	17	1	
					1899	309,657	15	3	
1899	422,795	15	10	Includes Imperial Grant-in-aid of £100,000 on account, Northern Territories.	1900	515,656	19	2	Includes £243,453 9*s.* 2*d.* expended on account of Ashanti Disturbances.
1900	585,583	7	5	Includes £50,000 Grant-in-aid of Northern Territories and £202,300 on account of Ashanti Disturbances.	1901	469,459	9	1	Includes £124,392 5*s.* 2*d.* on account of Ashanti Disturbances.
1901	693,893	3	0	Includes £25,000 Grant-in-aid of Northern Territories and £197,700 on account of Ashanti Disturbances.					

Assets and Liabilities.

18. The Statement of Assets and Liabilities at 31st December, 1900, showed a surplus of £139,985 17*s.* 10*d.*

19. The excess of Assets over Liabilities at 31st December, 1901, amounted to £364,419 11*s.* 9*d.* The financial transactions for the year under review, therefore, resulted in an increased surplus of £224,433 13*s.* 11*d.*, being the excess of General Revenue over Expenditure during the year, as shown by the following figures:—

	£	s.	d.
Revenue	693,893	3	0
Expenditure	469,459	9	1
	£224,433	13	11

and which, added to the surplus at 31st December, 1900, agreed with the surplus at 31st December, 1901, viz., £364,419 11*s.* 9*d.*

20. This surplus, however, included sums amounting to £32,929 3*s.* 5*d.*, which cannot be taken as *bonâ fide* assets, for the reason that they represented expenditure incurred and awaiting adjustment.

21. The following figures give a more correct view of the financial position of the Colony at 31st December:—

	£	s.	d.	£	s.	d.
Cash on deposit in Bank of British West Africa.	20,000	0	0

as against the surplus £364,419 11*s.* 9*d.*, or a difference of £32,929 3*s.* 5*d.*, which represented unadjusted Expenditure, as explained.

22. The investment of £25,867 4*s.* 8*d.* on account of the loan for the erection of telegraph lines to Gambaga has since been realised and repaid to the Imperial Government.

23. The Expenditure on the railway at 31st December amounted to £767,501 11*s.* 1*d.*, as against £625,500 borrowed by the Crown Agents, and £142,001 11*s.* 1*d.* advanced by the Colony.

24. The advances outstanding at 31st December have since been gone into and the majority of them refunded and adjusted.

Liabilities.

25. The liabilities of the Colony at 31st December amounted to £42,173 19*s.* 10*d.*, and were made up as under:—

	£	s.	d.
Government of British Guiana	1	6	0
Government of Seychelles ...	610	4	11
Government of Gambia	2	14	7
Government of Lagos	3,616	16	1

Total liabilities ...	£42,173	19	10

26. The liabilities on account of the Savings Bank, Public Officers' Guarantee Fund, and the Bank of British West Africa are secured by investments as shown:—

	£	s.	d.
On account of Savings Bank ...	4,099	14	0
On account of Public Officers' Guarantee Fund.	1,900	0	0
On account of Bank of British West Africa.	10,000	0	0

27. Deposits such as Money Order Commission and Postal Orders represent Revenue awaiting adjustment.

Public Debt.

28. The Colony was indebted at 31st December as follows:—

	£	s.	d.
Imperial Government—			
(1) Ashanti Expedition, 1896 ...	98,075	8	6
(2) West India Regiment (expenses 1897-1898).	10,051	15	2
(3) Loan for erection of telegraph line to Gambaga.	25,000	0	0
(4) Loan for erection of telegraph lines Northern Territories.	29,441	10	8
(5) Loan for Ashanti War, 1900	400,000	0	0
Total loans due to the Imperial Government.	£562,568	14	4

29. As pointed out, the Crown Agents had lent at interest the loan (£25,000) for the erection of the telegraph lines to Gambaga, and which has since been called in and repaid to the Imperial Government.

30. The Crown Agents at 31st December had obtained advances amounting to £625,500, in anticipation of the raising of the authorised loan of £1,035,000 for the construction of the Tarkwa-Kumasi Railway; in addition to this the Colony had advanced from General Revenue Funds the sum of £142,001 11*s.* 1*d.*, so that the total Loan Debt of the Colony at that date was £562,568 14*s.* 4*d.* + £625,500 + £142,001 11*s.* 1*d.* = £1,330,070 5*s.* 5*d.*

COMMERCE.

31. The total value of the Imports in 1901 amounted to £1,801,027, and that of the Exports to £559,733, giving a general total of £2,360,760, as compared with £2,180,409 for 1900, being an increase over that year of £180,351.

32. Table 1 shows the value of the trade of the Colony for the last five years:—

TABLE 1.

Year.	Imports.	Exports.	Total.
1897	910,540	857,793	1,768,333
1898	1,101,546	992,998	2,094,544
1899	1,323,218	1,111,738	2,434,956
1900	1,294,963	885,446	2,180,409
1901	1,801,027	559,733	2,360,760

33. From the above table it will be seen that with the exception of 1899 the general total for 1901 is the highest figure that has been reached. There is, however, one noticeable point, which is that whereas in the four previous years the values of the imports and exports bore a more or less equal proportion to one another, the large total for 1901 is entirely due to the large figure given to the imports, for the exports on the other hand have shown a marked increase.

34. Table 2 gives a general classification of all the imports:—

TABLE 2.

Articles.	Value in Sterling. Of Imports in detail: Expenses.	Total Value: Expenses.
	£ s. d.	£ s. d.
I.—Live animals, food, drink, and narcotics.	—	467,474 3 3

Holland	37,880	13	4	43,946	6	3
Italy	3	9	0	1,896	13	1
Portuguese Colony	1,022	19	4	2,910	15	9
Spanish Colony	1,629	4	9	—		
Total	1,294,963	7	0	1,801,027	8	0

36. The United Kingdom has for the two years had the bulk of the import trade with the Colony with 71 per cent. in 1900, which was increased to 73½ per cent. in 1901. Germany was second in 1900 with 13 per cent., and also in 1901; but still her trade fell off slightly to 10½ per cent. Lagos and Sierra Leone together provided 6 per cent. in 1900, which fell to 4½ in 1901; and in 1900 the United States is credited with 4 per cent., which rose to 5¾ per cent. for 1901; Holland had 2½ per cent. in 1900, and 2¼ in 1901.

37. The total value of all imports, viz., £1,801,027, during 1901 shows an increase of £506,064, or 39 per cent. over the figure of 1900. The value of the imports paying specific duties was £214,874, as compared with £158,166 for 1900; and that of imports paying *ad valorem* duties was £1,005,041, as compared with £690,856 in 1900.

38. The value of imports free of duty was £581,114, as compared with £445,941 in 1900. These values include freight, insurance and other expenses.

39. The principal articles of import with their values for the years 1900 and 1901 are shown in Table 4:—

TABLE 4.

	1,294,963	1,801,027	510,674	4,610

40. The total value of all exports from the Colony for 1901 was £559,713, a decrease of £325,713 on the previous year, and is the lowest figure reached since 1889.

41. Table 5 gives the general classification of all exports:—

TABLE 5.

Articles.	Value in Sterling.								
	Produce and Manufacture of the Colony.			British, Foreign and other Colonial Produce and Manufacture.			Total.		
	£	s.	d.	£	s.	d.	£	s.	d.
I. Live animals, food, drink, and narcotics.	87	2	6	711	19	5	799	1	11
II. Raw materials :—									
(a) Textile ...	33	8	0	—			33	8	0

Totals	534,423	17	8	25,309	1	2	559,732	18	10

42. Table 6 gives the general values of the exports for 1900 and 1901, together with the countries to which they were shipped:—

TABLE 6.

Country.	1900.			1901.		
	£	s.	d.	£	s.	d.
United Kingdom	509,779	7	5	254,129	9	2
Lagos	49,805	19	0	35,256	1	0
Sierra Leone	182	4	6	93	17	0
African Ports	17,661	12	0	13,211	10	3
America, United States	19,371	18	9	22,707	13	5
Belgium	3,454	11	11	—		
France	136,308	1	8	89,526	1	5
Germany...	148,277	3	11	144,808	6	7
Holland	604	3	2	—		
Portuguese Colony	0	10	0	—		
Totals	885,445	12	4	559,732	18	10

43. These figures show not only a decrease in the value of the exports to all the countries, with the exception of the United States, but also a large falling off in the proportion taken by

the United Kingdom, from 57½ per cent. for 1900 to only 45 per cent. in 1901. Germany on the other hand received 17 per cent. of the total amount in 1900, and is credited with 26 per cent. in 1901. France also slightly increased her trade from 15 to 16 per cent., and the United States, although only taking a very small proportion, doubled it from 2 to 4 per cent.

44. Table 7 shows the values of the principal articles of export for 1900 and 1901 with the respective increases and decreases under the various headings:—

TABLE 7.

Articles.	Value		Increase.	Decrease.
	1900.	1901.		
	£	£	£	£

Total	885,446	559,733	18,068	343,781
				18,068
Net decrease				325,713

45. The article of export which shows the greatest decrease is rubber, and which also in 1900 showed a falling off in the value exported of £227,575, as compared with the preceding year. Two causes to which this may be attributed are the low prices on the European markets and to a number of the trees and vines having been killed off by people extracting the rubber through ignorance or wishing merely to obtain all the value out of the trees in the shortest time. No doubt, too, considerable difficulty has been experienced the last two years in obtaining labour to collect the rubber and to carry it down to the shipping ports, as large numbers of the natives have

deserted their usual occupations and pursuits, having been attracted to the mines or the railway by the prospect of higher wages; there is, therefore, every hope that with care and attention the rubber trade of the Colony may revive and the values and quantities regain the figures that have been shown in former years. It is almost entirely due to the falling off in the export of rubber that the total values against the United Kingdom in Table 6 show a decrease of £255,649 18*s*. 3*d*., and that the proportion of the whole export trade fell 12½ per cent.

46. The other two staple articles of export, viz., palm oil and palm kernels, show a decrease of £60,638 and £7,142 as compared with 1900, although in the latter case, the quantity exported, 12,844 tons, was actually a slight increase on the preceding year.

47. A comparative statement of the quantities and values of palm kernels, palm oil, and rubber exported since 1897 is shown in Table 8:—

TABLE 8.

Year.	Palm Kernels.		Palm Oil.		Rubber.	
	Tons.	£	Gallons.	£	lbs.	£
1897 ...	10,836	69,818	2,021,716	107,738	4,957,016	419,813
1898 ...	9,732	66,378	2,145,138	114,288	5,984,984	551,667
1899 ...	12,663	106,156	3,323,919	183,204	5,572,554	555,731
1900 ...	12,811	96,936	4,238,685	238,812	3,542,440	328,156
1901 ...	12,844	89,794	3,146,390	178,174	1,520,009	104,030

48. The trade in kola-nuts still shows signs of having been severely affected by the Ashanti rebellion in 1900, as there is a further decrease on the figures of that year of £8,109, but considerable quantities, for which the returns are not available, are exported over the Eastern frontier of the Colony from Ashanti and the Northern Territories.

49. Cocoa is the sole article of export which shows any increase for 1901, and that was considerable, being 994,777 lbs. in weight, and amounting to £15,537 in value. A further increase is expected for the current year, and there is every reason to hope that this satisfactory state of things will continue year by year, since in the Colony the natives are planting more trees and the trade in England is on the increase, the consumption for last year being estimated at 30,000,000 lbs., which was twice as much as in 1895. Accra is the chief port for the shipment of cocoa, as the greater part of it is grown in the districts immediately to the north of the capital of the Colony, and with which there are good means of communication.

Customs Receipts.

50. The total amount received during 1901 was £351,104 12*s.* 7*d.*, being an increase of £69,759 16*s.* 6*d.* over the total receipts of the preceding year, and greatly in excess of the receipts of any previous year.

The receipts were made up as follows:—

	£	*s.*	*d.*
General imports	105,414	5	8
Spirits	245,415	6	11
Gunpowder	166	16	0
Guns	108	4	0
	£351,104	12	7

and which figure practically represents 75 per cent. of the total ordinary revenue of the Colony (£471,193 3*s.*) for last year.

51. Table 1 shows how this amount was collected month by month and also gives a monthly comparison with 1900:—

Table 1.

Month.	1900.			1901.			Increase.			Decrease.		
	£	*s.*	*d.*	£	*s.*	*d.*	£	*s.*	*d.*	£	*s.*	*d.*

December ...	22,598	14	2	31,970	4	7	9,371	10	5	—		
Total ...	281,344	16	1	351,104	12	7	70,424	10	4	664	13	10
Decrease							664	13	10			
Net increase							69,759	16	6			

52. The amounts collected on articles which come under specific duties, as compared with those from articles charged with *ad valorem* duties, is shown in Table 2:—

TABLE 2.

Year.	Specific.			Ad valorem.			Total.		
	£	s.	d.	£	s.	d.	£	s.	d.
1900	226,689	1	9	24,655	14	4	281,344	16	1
1901	268,910	6	2	82,194	6	5	351,104	12	7

53. There are [illegible] additional items of Revenue to be added to the above amount of £351,104 12*s.* 7*d.*, consisting of—

	£	s.	d.
King's warehouse rent	642	2	7
Warehouse rent	45	4	4
„ fees	0	7	6
Light dues	1,476	2	0
	£2,163	16	5

which makes the total amount received by the Customs Department £353,268 9*s.* 0*d.*, nett increase in gross receipts over 1900 of £72,259 15*s.* 8*d.*

54. There was an increase of £27,539 in 1901 over 1900 from *ad valorem* duties which is satisfactory as being proof that the improvement is not entirely due to an abnormal importation of spirits; the amount collected on spirits and strong waters of all kinds was £245,415, giving an increase of £43,403 on the preceding year.

55. The receipts on guns and gunpowder, which have always been an important item, show a large decrease from £4,522 for 1900 to £275 only in 1901, this being due to the restrictions imposed on the sale of these goods since April, 1900.

56. Table 3 shows the Customs receipts at the principal ports of the Colony during 1900 and 1901:—

TABLE 3.

GOLD.

57. Gold is widely diffused throughout the Colony, Ashanti, and the Northern Territories, in quartz formation and alluvial deposits, whilst in Wassau there is good conglomerate (banket). The lack of good roads and means of transporting heavy machinery has proved an obstacle to successful mining on a large scale in the past, but the energy latterly displayed in mining enterprise is resulting in widespread improvement to the road system, and the Sekondi-Kumasi Railway in course of construction overcomes the difficulty of transport to the Wassau District. The following table shows the amount of gold exported in 1901 and in each of the four previous years:—

Years.	Gold and Gold Dust.			
	Ozs.	Ack.	Tek.	Value.
				£
1897	23,544	13	3	84,797
1898	17,732	11	—	63,838
1899	14,249	14	$3\frac{3}{5}$	51,300
1900	10,557	6	$1\frac{3}{5}$	38,007
1901	6,162	15	—	22,187

During the year 2,825 concessions were filed in the Colony, 41 orders for survey were issued, and 2 certificates of validity. 32 prospecting licenses were issued and 5 prospecting licenses were converted into mining licenses. The number of surveyors' licenses issued was 44.

AGRICULTURAL INDUSTRIES AND BOTANICAL STATIONS.

58. There cannot be said to be any agricultural industries. The staple products are palm oil, palm kernels, and rubber. Cocoa is cultivated in certain districts, however, and it will no doubt increase as an industry.

59. At the Botanical Station at Aburi, which is situated at an elevation of 1,400 feet above the sea, a Curator from the Royal Gardens, Kew, endeavours to teach the natives the most approved methods of planting and developing the agricultural resources of the Colony. 44 acres are planted with cocoa, coffee, cotton, tobacco, jute, &c. The cultivation of cocoa owes much of its success to this Station, from whence plants were

first supplied at nominal prices to native planters, who were then instructed and advised with regard to their cultivation and the preparation of the cocoa.

60. The Government during the year also established cocoa-nut plantations on suitable lands near Accra with a view to encouraging the growth of the nut for the production of copra oil and coir.

SHIPPING.

61. The two following tables show (I.) the number, &c., of steam vessels which have visited the Colony during the past three years, and (II.) the number, &c., of sailing vessels.

TABLE I.

Steam Vessels Visiting the Colony, 1899—1900—1901.

Nationality.	1899.			1900.			1901.		
	No.	Tonnage.	Crews.	No.	Tonnage.	Crews.	No.	Tonnage.	Crews.
British	253	416,385	10,402	292	492,914	12,355	284	477,066	12,794
German	91	119,974	3,121	84	115,599	2,915	108	159,936	3,961
French	40	50,653	2,021	34	39,187	1,662	33	42,059	1,516

TABLE II.

Sailing Vessels Visiting the Colony, 1899—1900—1901.

Nationality.	1899.			1900.			1901.		
	No.	Tonnage.	Crews.	No.	Tonnage.	Crews.	No.	Tonnage.	Crews.
America, United States	11	[illegible]	95	12	4,858	98	22	7,518	178

62. The increase of the number of steamers in 1901 over 1899 was 32 (71,996 tons); there was scarcely any difference in numbers when compared with 1900 (434 steamers against 433, but with a decrease in tonnage of 5,622 tons).

63. The services for mails and passengers have shown considerable improvement. There is a weekly British service between the principal ports, viz., Accra, Cape Coast, Sekondi, and Axim and the United Kingdom, the voyage occupying from 16 to 18 days, the vessels sailing from Liverpool direct to Canary Isles or Madeira, but calling at Plymouth homeward. The German mail service is every fifteen days and, like the Belgian steamers which leave Antwerp every three weeks for the Congo Free State, call at Southampton both outward and homeward for mails and passengers.

64. A large increase is shown in the number of sailing vessels, which are almost exclusively employed in carrying rum, tobacco, oil and lumber from the United States.

65. Two wrecks occurred during 1901 in the waters of the Colony, but on neither occasion was there any loss of life. The first was the stranding of the French steamer "Uruguay" in the month of March a few miles west of Sekondi; the second being the stranding of the British schooner "Walleda" a few miles to the east of Accra. In each case most of the cargo was salved.

LEGISLATION.

66. During the year 21 Ordinances were passed.

No. 4 confers upon the Governor the necessary powers for the detention and deportation of the Ashanti political prisoners.

Nos. 5 and 6 provide for the allowance of a drawback on goods exported from the Colony on which duties have been paid.

No. 10 constitutes and regulates the Gold Coast Regiment of the West African Frontier Force.

No. 17 facilitates the investment of trust and other funds in the United Kingdom in Gold Coast Government securities.

The Concessions Amendment Ordinance, 1901 (No. 20 of 1901), was passed to remedy certain defects which had during the year been discovered in the working of the principal Ordinance.

The definition of the term "concession" was narrowed so as not to include the assignment of a concession, and prospecting was for the first time defined.

By a ruling of the full Court it had been held that no opposition to a claim could be lodged after the expiration of three months from the date of the filing of the claim. In view of the fact that it was often impossible for landowners to know within that period whether rights had been encroached upon, power was given by Section 7, subject to rules of Court, to lodge notice of opposition at any time prior to the granting of a certificate of validity.

By Section 8, large powers are given to the Court to modify concessions and to impose conditions on concessionaires.

Section 11 increases the powers of the Court with regard to surveys of lands, the subject of concessions, by authorising the Court to require that a survey shall be certified as sufficient by a Government surveyor and to further require that each such survey shall be linked to the general survey of the Colony.

Section 16 prescribes the mode for the recovery of rent due to a native on a concession.

Section 17 reduces the cost of a prospecting license from £30 to £5; the new license does not limit the prospector to a particular area. This section also subjects a mining license to a duty of £30.

The other sections of the Ordinance deal with minor amendments not calling for special notice.

EDUCATION.

Primary.

67. There are two classes of schools in the Colony, Government and Assisted, numbering 7 and 128, respectively. The former are established and maintained by the Government, the latter by the different Mission Societies, &c., and receive annual grants-in-aid from the State towards their support.

They are as follows:—

Denomination.	1899.	1900.	1901.
Basel Mission	60	61	61
Wesleyan	50	55	49
Roman Catholic	12	12	12
Government	7	7	7
Mohammedan	1	2	3
Bremen Mission	—	—	3
African Mission Zion	—	1	—
Totals	130	138	135

68. In addition to the schools on the Assisted List there are about 120 small schools which, not having an annual average attendance of 20, are ineligible under the rules for grant.

69. There is no system of local management, as that term is generally understood; indeed, in the majority of villages where schools have been established the only person in any way capable of taking a share in the management of the schools is the master himself. The sphere of each Mission is divided into districts, and an ordained member, either European or native, of the Society represented is appointed to overlook all the schools in his particular district. These managers appoint and dismiss teachers, fix salaries, &c., without any reference to the central authority. That this system is far from satisfactory is at once evident from the fact that a journey of two to three weeks is in some cases necessary to enable a manager to make one short visit to each of the schools for which he is responsible; but, unsatisfactory as the arrangement is, it is under present circumstances, and will be for some considerable time, the only one possible.

70. The following table shows the average attendance and grants-in-aid earned during the last 10 years:—

NUMBER OF SCHOOLS.

Year.	Government.	Assisted.	Total.	No. on Roll.	Average Attendance.	Grant-in-aid.		
						£	s.	d.
1891–2	5	69	74	6,666	—	1,678	4	0
1892–3	6	66	72	7,350	5,195	2,170	17	6
1893–4	5	70	75	8,174	6,684	2,394	14	0
1894–5	7	93	100	9,954	7,570	3,179	6	0
1895–6	6	109	115	11,205	8,558	3,400	11	0
1897	7	111	118	—	8,478	3,646	13	8
1898	7	112	119	11,181	8,369	3,432	13	1
1899	7	123	130	12,240	9,239	4,129	11	5
1900	7	131	138	11,996	8,911	3,679	13	1
1901	7	128	135	12,018	8,616	3,706	2	7

71. There is a slight decrease in average attendance compared with 1900, which may be attributed to the following causes:—

1. The demand for labour consequent on the great impulse given to the mining industry, and the ease with which boys able to read and write obtained situations.

2. The increase in the number of native clerks employed by merchants.

3. The temporary closing of schools owing to the recent Ashanti rebellion.

The decrease may be taken as temporary.

72. There is no uniformity as yet in the scale of fees at the different Mission schools. At the Government schools, with the exception of Insuaim, which is free, 3*d.* a month is charged for infant and sub-standard classes, and 6*d.* a month for the standards. Fees are charged in the majority of the Wesleyan schools, the amount usually varying with the standing of the scholar from 5*s.* to 1*s.* a quarter.

73. Most of the Basel Mission schools are free; their upper standard schools, which are always boarding, charge about 10*s.* per annum, which includes lodging. No fees are charged at the Bremen Mission schools, nor at six of the 12 schools under the Roman Catholic Mission.

74. The total amounts returned as paid for 1900 and 1901 are as follows:—

School Fees.

Schools.	1900.			1901.			Increase.		
	£	*s.*	*d.*	£	*s.*	*d.*	£	*s.*	*d.*
Government	210	12	3	212	17	9	—		
Wesleyan Mission	407	0	11	450	6	8	—		
Basel Mission	93	19	3	115	19	9	—		
Roman Catholic Mission ...	25	0	6	222	11	2	—		
Mohammedan	10	10	0	—			—		
Total	747	2	11	1,001	15	4	254	12	5

SECONDARY.

75. There is no provision for higher or secondary education, but the Basel Mission have schools at Akropong and Abetifi, at which something better than merely elementary education is taught, and which are attended for a time by most of the teachers employed by that Society.

INDUSTRIAL, TECHNICAL AND AGRICULTURAL.

76. In 1899 a school for instruction in carpentry was opened by a qualified European master in connection with the Government School, Accra. Attendance at these classes is not confined to scholars from the Government School, children from the higher standards in the local Mission school having the privilege of entry.

77. Most of the schools in the interior have small plantations attached where the scholars receive useful instruction in the cultivation of cocoa, coffee, sisal hemp, cassada, &c.

GOVERNMENT INSTITUTIONS.

Hospitals.

78. There are Government hospitals at the following places in the Colony:—Accra, Cape Coast, Axim, Elmina, Saltpond, Kwitta, and Kumasi. There is special accommodation for Europeans at the first three, and European nursing sisters at the first two.

79. The number of in-patients treated during the year at the various hospitals was 2,019 compared with 1,185 in 1900.

Asylum.

80. There is one lunatic asylum in the Colony. This, in August of 1901, was removed from Christiansborg Castle, to which it had been transferred in June, 1899, and taken back to the Colonial Hospital Asylum, Accra. 63 cases were treated during the year.

81. There are no poor-houses or reformatories in the Colony, and poverty in the strict sense of the word is unknown.

Savings Bank.

82. The deposits during the year, including interest, amounted to £3,626 1*s.* 8*d.*, and were in excess of the deposits in 1900 (£3,553 5*s.* 3*d.*) by £72 16*s.* 5*d.*

83. The withdrawals for the same period amounted to £3,622 7*s.* 9*d.*, and were less than the deposits in the sum of £3 13*s.* 11*d.*, and as compared with the withdrawals in 1900 (£4,066 11*s.* 10*d.*) showed a decrease of £444 4*s.* 1*d.*

84. The business done by the Bank during the year under review was, with the exception of last year's transactions, the lowest on record since 1893, and the deposits in place of increasing are steadily decreasing from year to year.

85. The interest accrued on deposits during the year amounted to £101 18*s.* 8*d.*, and was met out of the amount voted from the General Revenue of the Colony, but as the interest received on the bank's investments (£139 1*s.* 2*d.*) was carried to the credit of the General Revenue, the profit to the Colony on the bank's transactions was £37 2*s.* 6*d.* This, however, does not include cost of supervision, stationery, &c., for which no charge was made.

	£	*s.*	*d.*
The balance due to depositors on 1st January, 1901, was	4,456	8	4
The deposits during the year amounted to	3,524	3	0
The interest accrued at 31st December was	101	18	8
	£8,082	10	0

	£	s.	d.
The withdrawals, inclusive of interest, during the same period amounted to	3,622	7	9
Leaving a balance due to depositors at 31st December of	4,460	2	3

Of the above sum, £4,099 14*s.* was held by the Crown Agents in securities, while the balance of £360 8*s.* 3*d.* was in the hands of the Treasurer at that date.

JUDICIAL STATISTICS.

POLICE.

86. The total strength of the Police Force at the end of 1901 was 534 of all ranks, or 77 short of the allowed strength, 611.

291 men were recruited during the year, and the dismissals, desertions, discharges, and deaths, &c., during the same period amounted to 244.

PRISONS.

87. Exclusive of Ashanti and the Northern Territories there are 12 gaols in the Colony. During the year 1901 the total number of persons committed was 2,190, the daily average number in prison was 449, the number of deaths was 11, and of executions, 6.

88. The amount realised from sale of prison manufactures, *i.e.*, carpentering, shoemaking, coopering, tailoring, matmaking, &c., was £502 15*s.* 3*d.* The gross estimated value of the labour of the prisoners was £5,525 2*s.* 9½*d.*; the cost of the Department, £8,436 7*s.* 3*d.*

CRIMINAL STATISTICS.

89. The following are the statistics of crime for the last five years:—

	Apprehensions.					Convictions.				
	1897.	1898.	1899.	1900.	1901.	1897.	1898.	1899.	1900.	1901.
Offences against the person	986	1,089	891	967	1,385	601	593	496	475	944
Offences against property	744	846	788	831	1,038	416	492	416	441	724
Other offences	4,073	4,165	2,362	1,563	2,042	3,469	3,136	1,481	1,186	1,612
Totals	5,803	6,100	4,041	3,361	4,465	4,486	4,221	2,393	2,102	3,280

VITAL STATISTICS.

90. The population of the Colony and Ashanti taken during the year was found to be 1,486,433, exclusive of the Northern Territories. At the previous Census, very roughly taken in 1891, it was estimated to be 1,473,559. The public health for the year was bad both in the European and native communities.

91. Fifteen officials died during the year in a total strength of 188, and 18 were invalided. The following list shows the causes of death:—

Remittent fever	8
Bilious remittent fever	1
Sunstroke	2
Blackwater fever	2
Acute meningitis	1
Abscess of liver	1

Thirty-eight non-officials died and 59 were, it is estimated, invalided. It is difficult to be accurate as to the number invalided as correct records cannot be obtained.

92. The following shows the death and invaliding rate per 1,000 among the European officials:—

No.	Deaths.	Invalided.	Death rate per 1,000.	Invaliding rate per 1,000.
188	15	18	80	95

The number of European non-officials who visited the Colony during the year is not known.

93. The health of the natives during the year was very bad owing to a severe outbreak of small-pox at Accra and Axim and in many villages throughout the Colony. No infection of Europeans occurred.

94. No death-rate can be calculated for the natives owing to the impossibility of obtaining reliable statistics.

95. The progress made in 1901 included—

1. A new hospital at Axim.

2. A new contagious diseases hospital, Accra.

3. General sanitary improvements.

CLIMATE.

96. The following table shows the temperature and rainfall experienced during the year at Accra:—

—	Temperature.						Rainfall.
	Solar Maximum.	Minimum. on Grass	Shade Maximum.	Shade Minimum.	Range.	Mean.	Amount in Inches.
January ...	150·06	68·09	80·70	75·12	11·70	77·91	2·35
February ...	150·75	70·64	86·92	75·78	11·14	81·35	4·80
March ...	149·87	67·22	84·54	78·35	10·35	81·44	1·60
April ...	147 66	67·36	89·6	75·0	14·4	82·3	4·60
May ...	146·61	65·35	89·25	72·32	16·95	80·78	4·71
June ...	141·6	63·53	86·46	71·23	15·23	78·84	3·43
July ...	134·09	63·03	84·63	69·80	14·61	77·21	1·73
August ...	128·93	64·64	83·67	67·35	13·00	75·51	1·24
September	130·00	71·13	82·1	71·6	10·5	76·85	5·17
October ...	130·09	71·89	82·12	70·29	12·00	76·20	2·85
November	130·06	71·5	89·1	69·7	19·4	79·4	1·77
December...	129·74	70·96	88·58	71·45	16·90	80·01	1·50
Total for year.	1,668·92	814·87	1,018·95	866·82	156·01	947·17	35·75
Monthly average.	139·07	69·90	84·91	72·23	13·00	78·93	2·97

In 1900 the temperature averaged 78·78 and the rainfall amounted to 23·34.

POSTS AND TELEGRAPHS.

97. There is no Department in the Government of the Colony which has had to contend with such a large increase of business during the past year as the posts and telegraphs. The two following tables give comparative statements between 1900 and 1901 of the gross receipts and expenses and show how considerable this increase has been:—

TABLE 1.

Comparative Table of Gross Receipts.

Head.	Receipts. 1900.	Receipts. 1901.	Increase.	Decrease.
	£ s. d.	£ s. d.	£ s. d.	£ s. d.
Sale of postage stamps for postal purposes	5,094 6 6½	24,040 16 11½	18,946 10 5	—

Totals	11,557 1 4	15,988 9 1	4,707 0 11	275 13 2
			275 13 2	
Total Increase			4,431 7 9	

98. The estimated number of letters, post cards, newspapers, books, sample packets, and circulars received and despatched during the year was 8,611,518, as compared with 2,782,776 for 1900, showing an increase of nearly 400 per cent.

99. The total number of telegrams dealt with was 199,424, containing 2,880,025 words, as compared with 140,315 messages of 2,565,807 words in 1900, an increase of 59,109 and 314,218 messages and words, respectively.

100. The total number of cablegrams handed in at offices in this Colony for the United Kingdom and other parts of the world amounted to 6,911, to the value of £16,277 8*s.* 5*d.*, the Government proportion of this amount being £695 11*s.*, while £15,581 17*s.* 5*d.* was paid to the African Direct Telegraph Company. The African Direct Telegraph Company handed over to the Post Office 6,400 messages for transmission, upon which the Colony's share amounted to £644 12*s.* 1*d.* There is an increase in the total number of cablegrams received and forwarded during the year of 125 per cent. over the previous year.

101. There is a telephone exchange at Accra connected with all the Government offices and some of the leading business houses.

MILITARY FORCES AND EXPENDITURE.

102. By Ordinance 10 of 1901 the defensive force of the Colony was completely reorganised, and the Gold Coast Constabulary became the Gold Coast Regiment of the West African Frontier Force, consisting of two battalions, each battalion comprising such number of companies of infantry and batteries of artillery as the Governor may from time to time direct.

103. The 1st Battalion of the regiment has its headquarters at Kumasi, and the 2nd Battalion at Gambaga in the Northern Territories.

104. At the end of the year the total strength of the 1st Battalion was 30 officers, 2 European non-commissioned officers and 1,370 native non-commissioned officers and privates; of the 2nd Battalion, 17 officers and 572 native non-commissioned officers and privates.

105. The total expenditure on this Force for the year was £73,437 5*s.* 7*d.*

106. The Gold Coast Rifle Volunteers which were raised in 1892 had a total strength at the end of the year of 268 officers, non-commissioned officers and men. The Volunteer Force of

P. V. - 11 28 589643

Bloch 800

the Colony was strengthened by the formation of machine-gun sections at Accra and Cape Coast, recruited from Europeans.

107. The members are armed with ·303m. Martini-Enfield carbines, and the guns in use are ·303m. Maxim machine guns on tripod mountings.

X - 11

GENERAL OBSERVATIONS.

108. The operations against the Ashantis which were carried on from the previous year were brought to an end and a general amnesty and pardon was proclaimed on the 10th June. The pardon did not extend, however, to the persons in custody at the time, nor to certain other persons wanted by the Government.

109. Progress was made with the Sekondi-Tarkwa-Kumasi Railway, 30 miles being completed during the year, the railhead being 15 miles beyond Tarkwa on 31st December, 1901.*

110. The cost of living continued to increase. The large influx of Europeans consequent upon the mining boom greatly raised the price of domestic labour, and a proportionate increase in the price of food followed. Labour was never more difficult to obtain, nor was money ever more plentiful among the native community.

111. It is very unwise for any European to come to the Colony on the *chance* of obtaining employment. During the year several cases of Europeans being in a destitute condition were brought to notice. There is no system or means of relief for paupers in the Colony.

GEO. ATTRILL,
Acting Colonial Secretary.

25th October, 1902.

---

* On the 4th December, 1902, the railhead had reached a point 114 miles from Sekondi.

No. 397.

GOLD COAST.

(For Report for 1901, *see* No. 375.)

GOVERNOR SIR M. NATHAN to MR. CHAMBERLAIN.

Christiansborg Castle,

17th August, 1903.

(Extract.)

SIR,

I HAVE the honour to transmit herewith a Report on the Blue Book for the Gold Coast for the year 1902.

In the absence of the Colonial Secretary and of the Chief Assistant Colonial Secretary, both on sick leave, and of the senior of the two Assistant Colonial Secretaries on leave, the report has been prepared under my supervision by Captain C. H. Armitage, Commissioner of the Southern District of Ashanti, whom I stopped here on his way from England for this purpose as well as to assist in the general work of the Secretariat.

The report is based as much on the 19 Departmental Reports, of which the last was sent to you in my despatch dated the 25th July, 1903, as on the Blue Book itself, which is now in the press. As you have approved of these reports being placed on sale to the public, detailed information on the various matters briefly treated in the Report on the Blue Book will be available to the large and increasing number of persons in England who desire to inform themselves on questions relating to this Colony.

Referring to the third paragraph of your despatch of the 24th April, 1903, in which you enquire whether there is any insuperable difficulty in the way of getting the Blue Book completed during the first quarter of the year succeeding that to which it relates, I regret to have to inform you that I can hold out no prospect of this being done. No. 268 of the Rules

875 Wt 21109 10/1903 D & S 5 15629

and Regulations for His Majesty's Colonial Service lays down that the various returns comprised in the Blue Book must be filled up with the greatest possible accuracy and that the statistical tables must be full and complete. This would obviously be impossible with regard to the most important item of finance if the Book were prepared before the accounts of the Colony were finally closed for the year. For this final closing it is necessary to await the accounts from Ashanti and the Northern Territories where there are stations many days' journey from the respective headquarters, with which communication is sometimes difficult and always slow. I am satisfied that even if no occasion arises for references back to these outstations from headquarters it is not possible to get the December accounts of Ashanti at Accra till early in March, and of the Northern Territories till well on in April. This year the last instalments of the accounts for 1902 were not received from Ashanti and the Northern Territories until the 8th of April, and the 16th of May, respectively. When the accounts are received there is much work to be done in checking the numerous vouchers, and in abstracting the charges to the various votes and subheads of the Estimates before the books can be closed for the year, balanced, and the annual statement of accounts made up.

I have considered the suggestion that was made some time ago of having separate Blue Books for Ashanti and the Northern Territories, which would involve separate systems of accounts for that Colony and that Protectorate. I do not think, however, that this would result in such earlier transmission of the Blue Book for the Gold Coast proper as would justify the considerable additional staff that would be required. I fear that until communications improve, as they will do in time with the development of the territories under this administration, the responsibility of the Colonial Secretary under No. 289 of the Rules and Regulations is one that it is impossible for him to discharge.

With regard to paragraph 4 of your despatch above quoted, it would be possible if approximate figures with reference to the financial position of the Colony only were given for the Report on the Blue Book to appear one or two months before the actual Blue Book. But I should be fearful, if this were done, of there being grave discrepancies between the financial statements appearing in the two, discrepancies which would certainly receive ample public recognition.

Something may be done at any rate in the way of expediting those Departmental Reports and those parts of the Report on the Blue Book which do not depend on annual statistics in the direction suggested in the fifth paragraph of your despatch by the making of notes from time to time during the year, and I will take steps to give effect to this suggestion. As the Blue

Book consists mainly of statistics for the whole year and the report on it largely on deductions from these statistics, I fear, however, that the notes of the officers made during the year will not be of much value to them, or in their absence at the end of the year to the officers acting for them, in compiling their reports when the time comes for submitting them. In this connection it must be borne in mind that the conditions in this Colony are subject to considerable and somewhat rapid changes with the state of the West African mining market, and that it is in the last three months of the year, corresponding to the first part of the dry or best working season, that these changes generally occur.

On the whole I recommend that the preparation of the Blue Book and Report on it be allowed to wait as at present the closing of the Treasury books at the end of the financial year.

* * * * * *

I trust that the report for 1902 now submitted, to which Captain Armitage has given much care and work, will meet with your approval. It possibly contains more detailed figures than are essential, but represents on the whole an accurate, fairly complete, and fair, history of the Gold Coast, Ashanti, and the Northern Territories, for the year to which it relates.

I have, &c.,

M. NATHAN,

Governor.

REPORT ON THE BLUE BOOK OF THE GOLD COAST FOR THE YEAR 1902.

I.—FINANCIAL.

(A.) General Revenue and Expenditure.

1. The following table shows the Revenue of the Colony for 1902, compared with that for 1901:—

Heads of Revenue.	Collected in 1901.	Collected in 1902.	Increase.	Decrease.
	£ s. d.	£ s. d.	£ s. d.	£ s. d.
1. Customs	350,916 16 4	382,510 19 7	31,594 3 3	—
2. Light dues	1,476 2 0	1,832 10 0	356 8 0	—
3. Licenses, Excise, &c. ...	20,033 11 2	20,084 6 6	50 15 4	—
4. Fees of Court or office, &c.	58,510 15 3	47,747 16 11	—	10,762 18 4
5. Post office	754 10 5	816 9 7	61 19 2	—
6. Rents of Government property.	45 5 0	634 17 6	598 12 6	—
7. Interest...	717 1 6	4,388 4 0	3,671 2 6	—
8. Miscellaneous	12,395 18 3	6,141 19 0	—	6,253 19 3
9. Revenue from Ashanti	18,838 0 9	15,591 8 11	—	3,246 11 10
10. Revenue from Northern Territories.	7,324 12 4	9,327 17 6	2,003 5 2	—
	471,012 13 0	489,085 9 6	38,336 5 11	20,263 19 5
Land sales	180 10 0	2,669 0 0	2,488 10 0	—
	471,193 3 0	491,754 9 6	40,824 15 11	20,263 19 5
Imperial Grants:—				
(*a.*) Northern Territories	25,000 0 0	19,748 6 3	—	5,251 13 9
(*b.*) Ashanti disturbances	197,700 0 0	—	—	197,700 0 0
	693,893 3 0	511,502 15 9	40,824 15 11	223,215 3 2

2. The General Revenue for the year, exclusive of Grants-in-aid, amounted to £491,754 9*s.* 6*d.*, exceeding the original estimate of £447,950 by £43,804 9*s.* 6*d.* The Revenue of 1901, which was higher than that of any previous year, was exceeded by £20,561 6*s.* 6*d.*

3. The increase in 1902, as in 1901, was principally due to "Customs" receipts, the expansion of the general import trade having been well maintained.

4. The decrease under the heading Fees of Court is attributable to the fact that in 1901 the greater portion of the sums received under this head was for stamp duties on concession documents, of which a very much larger number were registered than in 1902.

5. The Receipts under the heading Miscellaneous were, in 1901, enlarged by the royalties due in 1900 having been then paid in, and this accounts for the decrease in 1902.

6. The increase in the Revenue from the Northern Territories is mainly due to larger receipts from caravan taxes,

and the decrease in that of Ashanti to the Interest Tax, paid by the Kings and Chiefs of Districts in 1901, having been reduced by one-half in 1902.

7. Below are the detailed receipts of Revenue from Ashanti and the Northern Territories:—

Ashanti.	£	s.	d.	Northern Territories.	£	s.	d.
Sale of Provisions...	571	5	3	Taxes on Caravans...	6,163	18	0
Interest Tax ...	6,626	18	3	Sale of Live Stock ...	729	13	6
Forfeitures, Fines and Fees.	1,086	6	8	Trade Tax	98	10	0
Trade Tax	4,504	3	0	Prospecting Licences	268	5	0
Prospecting Licences	275	0	0	Sale of Trade Goods	810	14	0
Liquor Licences ...	2,449	14	0	Fines and Fees ...	416	0	0
Miscellaneous ...	78	1	9	Sale of Provisions ...	376	17	2
				Slaughter House Fees	305	18	0
				Sale of Land ...	62	10	0
				Miscellaneous ...	95	11	10
Total	15,591	8	11	Total	9,327	17	6

8. The Imperial Government contributes half the cost of the upkeep and administration of the Northern Territories. On the 31st March, 1902 (the end of the Imperial financial year), the sum of £9,194 10*s.* 11*d.* was due by the Colony to the Imperial Government on account of sums received. The Expenditure from that date to the end of the year amounted to £37,885 14*s.* 4*d.* After deducting from half this amount the above-mentioned sum owed by the Colony, the sum of £9,748 6*s.* 3*d.* has been credited to the Colony in the accounts for 1902.

9. The loan of £25,000 received from the Imperial Government for the extension of the telegraph line to Gambaga was repaid, as the work had not been undertaken.

10. The table below shows the Expenditure in the year 1902, as compared with that in 1901:—

Heads of Expenditure.	Expended, 1901.			Expended, 1902.			Increase.			Decrease.		
	£	s.	d.	£	s.	d.	£	s.	d.	£	s.	d.
1. The Governor and Legislature.	5,553	11	2	4,875	2	8	—			678	8	6
2. Supreme Court ...	6,725	9	6	9,887	1	3	3,161	11	9	—		
3. Law Officers	1,653	0	6	1,798	16	11	145	16	5	—		
4. Colonial Secretary's Office.	4,761	0	10	5,018	19	9	257	18	11	—		
5. Printing Office ...	1,725	9	9	1,948	2	7	222	12	10	—

	469,459 9 1	547,607 13 0	181,012 15 3	102,864 11 4

11. Exclusive of £32,154 5*s.* 8*d.*, on account of Ashanti Disturbances, covered by the original grant of £400,000, for which credit was taken in 1900 and 1901, and exclusive of the repayment of the loan of £25,000, the Expenditure of the Colony amounted to £490,453 7*s.* 4*d.*, or £18,108 18*s.* 8*d.* in excess of the original estimate. The excesses occurred chiefly in Transport, Mines Surveys, and Miscellaneous Services.

12. The Expenditure in 1902 was £145,386 3*s.* 5*d.* more than in 1901, the increase being due mainly to Transport which, in

1901, was still largely charged to Ashanti Disturbances, to the Mines Survey, a new and temporary service from which revenue is being derived in 1903, to more Public Works having been undertaken, to the strength of the West African Frontier Force and of some departments of Government having been brought up to establishments which in some instances have been increased to meet larger demands on them, and to a sum of £2,580 5*s.* 2*d.* having been expended on Ashanti Disturbances in excess of the original grant of £400,000.

13. The details of Expenditure in Ashanti and in the Northern Territories, under all headings of the Estimates under which such Expenditure was incurred, are given below:—

Ashanti.	£	s.	d.	Northern Territories.	£	s.	d.
Ashanti (Head 7 of Estimates).	7,473	14	4	Northern Territories including survey of Black Volta (Head 8 of Estimates).	8 191	5	6

14. The Comparative Statement of Revenue and Expenditure for the last five years, given below, would show that for the year 1902 the Revenue of the Colony (exclusive of Grants-in-aid) was within £25,889 of being double that for 1898; while the Expenditure (exclusive of Ashanti Disturbances and repayment of loan) was £109 897 more than that for 1898:—

Comparative Statement of Revenue and Expenditure.

Revenue.			Expenditure.		
Years.	Amount.	Remarks.	Years.	Amount.	Remarks.
	£ s. d.			£ s. d.	
1898	303,821 12 4	Includes Imperial Grant-in-aid of £45,000 on account of Northern Territories.	1898	377,975 17 1	
			1899	309,657 15 3	
1899	422,795 15 10	Includes Imperial Grant-in-aid of £100,000 on account of Northern Territories.	1900	515,656 19 2	Includes £243,453 9*s.* 2*d.* on account of Ashanti Disturbances.
1900	585,583 7 5	Includes £50,000 Grant-in-aid of Northern Territories and £202,300 on account of Ashanti Disturbances.	1901	469,459 9 1	Includes £124,392 5*s.* 2*d.* on account of Ashanti Disturbances.
1901	693,893 3 0	Includes £25,000 Grant-in-aid of Northern Territories and £197,700 on account of Ashanti Disturbances.	1902	547,607 13 0	Includes £34,734 10*s.* 10*d.* on account of Ashanti Disturbances, and £25,000 Repayment of Loan.
1902	511,502 15 9	Includes £19,748 6*s.* 3*d.* half cost of Upkeep and Administration of Northern Territories up to 31st December, 1902.			

(B.) Taxation.

1. With the exception of taxes levied on caravans entering or leaving the Northern Territories, there is no direct taxation. Prior to British occupation, a toll, at all times heavy, and frequently oppressive, was, in accordance with native custom, exacted from caravans when passing through any district in these Territories, where the local Chief felt himself powerful enough to demand it. It was nominally for protection, which, however, was often not given. This power of levying a toll on caravans has been taken out of the Chiefs' hands and vested in the Administration, which ensures the safety of the roads.

2. The following scale of charges, which has been practically in force for some time, was, in 1902, regularized by rules approved by the Governor:—

	s.	d.
For each horse	5	0
For each head of cattle except calves ...	3	0
For each calf	1	6
For each sheep or goat	0	6
For each lamb or kid...	0	3
For each donkey	2	0
For each carrier's load of trade goods or country produce not being grain or kola	2	0
For each donkey load of similar goods ...	4	0
For each carrier load of kola	3	0
For each donkey load of kola	3	0

3. Tolls in accordance with this scale are collected at Attabubu, Mampon, and Sikassiko, in Ashanti, and at Wa, Bole, Kintampo, Gambaga, Walewale, and Tumu, in the Northern Territories.

(C.) Assets and Liabilities.

1. The statement of Assets and Liabilities at 31st December, 1902, shows an excess of Assets of £328,314 14*s.* 6*d.*, as against £364,419 11*s.* 9*d.* on 1st January, 1901. It would appear at first sight that there is a reduction of £36,104 17*s.* 3*d.*, but the figures of 1st January, 1901, are misleading, as they included sums amounting to £57,154 5*s.* 8*d.* which were in reality liabilities awaiting adjustment, and the followng deductions should be made:—

	£	s.	d.
Un-expended balance of the Grant-in-aid of Ashanti Disturbances	32,154	5	8
Loan received from Imperial Government for extension of line to Gambaga, and repaid in 1902	25,000	0	0
Total	£57,154	5	8

The surplus Revenue at 31st December, 1901, was therefore £307,265 6*s.* 1*d.*

2. The sum of £57,154 5*s.* 8*d.* should be deducted from the General Expenditure of the Colony during 1902, which leaves an actual Expenditure charged against the General Revenue proper (exclusive of all grants) of £490,453 7*s.* 4*d.*, giving a balance of £21,049 8*s.* 5*d.* of Revenue over Expenditure.

3. This sum added to the actual surplus at 31st December, 1901—£307,265 6*s.* 1*d.*—gives a total of £328,314 14*s.* 6*d.*, which agrees with the statement of Assets at 31st December, 1902. Of this excess the greater part, viz.:—£292,149 3*s.* 11*d.* has been advanced for the construction of the Sekondi-Kumasi Railway.

4. A Statement of Assets and Liabilities on December 31st, 1902, follows:—

Assets.

	£	s.	d.	£	s.	d.
Investments:—						
On Account of Savings Bank	4,099	14	0

				40,898	15	8
Drafts and Remittances				16,651	1	8
Surplus and Deficit Accounts net excess of Assets over Liabilities.				328,314	14	6
Total				385,864	11	10

5. Of the sum of £40,898 15*s.* 8*d.*, appearing as Liabilities, investments amounting to £16,499 14*s.* appear as Assets, so that the net Liabilities amounted to £24,399 1*s.* 8*d.*, to which must be added the Drafts and Remittances outstanding at 31st December, viz.:—£16,651 1*s.* 8*d.*, making £41,050 3*s.* 4*d.* Against these Liabilities must be placed the sum of £369,463 17*s.* 10*d.*, made up by the value of gold ornaments with the Crown Agents, the General Imprest Account, and General Assets, thus giving a sum of £328,413 14*s.* 6*d.*, Surplus Assets over Liabilities at 31st December, 1902 .

6. The following is a statement of the Railway Accounts on the 31st December, 1902:—

Dr.	£ s. d.	£ s. d.	*Cr.*	£ s. d.	£ s. d.
Realized on issue of loan £1,035,000 3 per cent. Inscribed Stock.	915,481 7 7		Issued by the Colony for Railway Expenditure:—		
Advances obtained through the Crown Agents in anticipation of the issue of the loan of £665,000.	218,001 0 0		Sekondi Tarkwa and Extension to Kumasi.	—	1,422,559 16 10
			Railway Surveys:—		
			Reconnaissance—Accra to Kpong, Flying.	2,147 17 1	
		1,133,481 7 7	Survey—Tarkwa to Kumasi ...	922 17 7	
Advanced by the Colony (shown in the statement of Assets and Liabilities).	—	292,149 3 11			3,070 14 8
Total	—	1,425,630 11 6	Total	—	1,425,630 11 6

(D.) Public Debt.

1. The Public Debt of the Colony at 31st December was as follows:—

Due to Imperial Government:—

	£	s.	d.
(1) Ashanti Expedition, 1896	98,075	8	6
(2) West India Regiment (expenses 1897-1898)	10,051	15	2
(3) Loan for erection of telegraph lines in Northern Territories	29,441	10	8
(4) Loan for Ashanti War, 1900 ...	400,000	0	0
Total loans due to Imperial Government	537,568	14	4

Due to Stockholders:—

On account of Gold Coast Government 3 per cent. Stock (for the construction of Sekondi-Kumasi Railway) ...	1,035,000	0	0
Total Public Debt, 1902	£1,572,568	14	4

To this should be added:—

Advances obtained by Crown Agents in anticipation of the further loan of £665,000 for Railway purposes ...	218,000	0	0
Advanced from General Revenue ...	292,149	3	11
Total Loan Account, 1902 ...	£2,082,717	18	3

2. The Loan raised by the issue of 3 per cent. Inscribed Stock is secured on the General Revenues and Assets of the Government, by a sinking fund of 1 per cent. per annum. The principal will be repayable at par on the 1st March, 1952, the Government having the option of redemption at par on or after the 1st March, 1927, on giving six calendar months' notice.

3. The amount due to the Imperial Government is repayable when the financial condition of the Colony will permit.

(E.) Currency.

1. British gold and silver coins have almost entirely superseded the use by the natives of gold dust in Ashanti and cowries in the Northern Territories. Bronze coins, although legal tender, are little used, and are greatly disliked by the natives who, in most places, will not accept them. A few Bank of England notes are in circulation.

2. The following coins, fixed by the Demonetization Ordinance, No. 2 of 1880, are legal tender:—

—	Nominal Value.	Legal Value.
French—	Francs	£ s. d.
Napoleons	20	0 15 10
Spanish and South American States—	Dollars	
Doubloon	16	3 4 0
Half Doubloon	8	1 12 0
United States—		
Double Eagle	20	4 2 0
Eagle	10	2 1 0
Half Eagle	5	1 0 6
Quarter Eagle...	2½	0 10 3

3. Cowries are reckoned by "strings" of 40 cowries. Fifty strings equal a "head," which is equal to one shilling. They are now only used in the market-place.

4. The following statement shows the amount of gold, silver, and bronze coinage imported into the Gold Coast Colony during the last five years:—

Years.	Gold.	Silver.	Bronze.	Total.
	£ s. d.	£ s. d.	£ s. d.	£ s. d.
1898 ...	7,137 10 0	230,481 16 6	1 2 4	237,620 8 10
1899 ...	12,654 0 0	235,445 0 4	320 0 10	248,419 1 2
1900 ...	18,683 0 0	171,558 16 6	60 0 6	190,301 17 0
1901 ...	23,827 10 0	175,900 4 7	95 0 9	199,822 15 4
1902 ...	38,072 10 0	249,392 10 6	110 15 0	287,575 15 6

5. The following table shows the amount of specie exported during the last five years:—

Years.	Total.		
	£	s.	d.
1898	27,187	11	10
1899	28,680	2	0
1900	21,120	16	7
1901	10,820	0	1
1902	46,630	12	8

(F.) Municipal Bodies.

1. The Accra Town Council is the only municipal body on the Gold Coast. Town Committees were instituted during the year at Cape Coast and Sekondi, but are at present only consultative bodies, without power to raise or spend money. It is intended to confer such power on them later. The following is a comparative statement of Revenue and Expenditure of the Accra Town Council for the five years, 1898 to 1902:—

Revenue.					Expenditure.			
Years.	Amount.			Remarks.	Years.	Amount.		
	£	s.	d.			£	s.	d.
1898	2,566	19	0		1898	1,893	1	8
1899	3,031	9	5		1899	2,894	8	4
1900	3,235	6	2		1900	3,021	2	6
1901	4,114	8	4	Includes grant-in-aid of £1,500 by the Colonial Government.	1901	3,522	5	1
					1902	3,200	2	9
1902	3,515	4	3					
	16,463	7	2			14,531	0	4

2. The Accra Town Council has no debt.

II.—TRADE, AGRICULTURE, AND INDUSTRIES.

(A.) Imports and Exports.

Imports.

1. The total value of all Imports for 1902 was £2,125,464, an increase of £324,437 over that of the previous year. The value of Imports paying specific duties was £209,786, and of Imports paying ad valorem, £1,151,853, as compared with £214,874, and £1,005,041 respectively in 1901.

2. The value of Imports free of duty was £763,825, as against £581,113 in 1901, these values including freight, insurance, and other expenses.

3. The following table shows the value in sterling of the Imports of the Colony, and their countries of origin, for the years 1901 and 1902:—

Country of Origin.	1901.			1902.		
	£	s.	d.	£	s.	d.
United Kingdom	1,324,808	16	8	1,553,654	12	3
British Colonies:—						
Cape Colony	—			383	11	10
Lagos	67,541	0	7	69,041	4	3
Northern Nigeria	—			8	18	6
Sierra Leone	16,588	18	1	31,601	18	10
Southern Nigeria	—			37	8	4
Total	84,129	18	8	101,073	1	9
Foreign Countries:—						
African Ports	28,194	9	3	40,165	14	0
America, United States	103,127	14	3	77,677	12	10
France	19,741	18	7	19,144	10	0
Germany...	192,270	15	6	282,346	9	8
Holland	43,946	6	3	45,926	3	5
Italy	1,896	13	1	61	6	1
Portuguese Colonies...	2,910	15	9	1,255	5	5
Spanish Colonies	—			4,159	6	4
Total	392,088	12	8	470,736	7	9
Value of Total Imports	1,801,027	8	0	2,125,464	1	9

4. The United Kingdom continues to hold the bulk of the Import trade with the Colony with 73 $\frac{1}{16}$ per cent. Germany is second, with 13 per cent., as in 1901. The United States, which

was credited with 5¾ per cent. in 1901, dropped to 3⅔ during the year.

5. The following table gives a return of the principal articles imported during the years 1901 and 1902, with their respective values:—

Articles.	Value.		Increase.	Decrease.
	1901.	1902.		
	£	£	£	£
Ale, Beer and Porter ...	6,577	8,893	2,316	—
Firearms	5,043	4,796	—	247
Gunpowder	205	331	126	—

Specie...	205,663	292,607	86,944	—
Sugar...	16,658	18,193	1,535	—
Wearing Apparel	52,479	75,106	22,627	—
Woollen Goods	16,701	19,988	3,287	—
Other Articles	441,517	458,589	17,072	—
	1,801,027	2,125,464	346,640	22,203
Total Decrease			22,203	
Nett Increase			324,437	

6. The large increase in the importation of machinery shows the energy which is being displayed in the development of some of the mining properties. The increases under the headings of "Ale, Beer, and Porter," "Wines," and "Manufactured Tobacco," are mainly due to the larger number of Europeans now resident in the Colony, and the increase under "Unmanufactured Tobacco" to native demands.

7. The increases under the headings of "Bread and Biscuits" and "Provisions" are partly due to increased native, but mainly to European, consumption.

8. Under the heading of "Wearing Apparel," the increase is due to European and native demands, and under "Cotton Goods" and "Other Articles," almost entirely to the native, and would show that the increased employment of labour has provided him with ready money to spend, which he did not before possess.

9. The above naturally points to a large increase under the head of "Specie Imported."

10. The one decrease in the Imports which calls for remark is that under the heading of "Rum," and it is to be noted that there is no corresponding increase in the importation of gin or other spirits, and that the falling off in the importation under these three heads amounts to over £15,000. The duties that were paid on spirits of all classes amounted, however, to £262,899, representing 53·46 per cent. of the total ordinary revenue of the Colony for the year, viz:—£491,754. The value of those spirits on which duty was paid was £134,373, which added to the duty gives an amount of £397,272 paid in the Colony for them. This divided by the population as given by the 1901 Census, less that of the Northern Territories, viz., by 1,379,001, gives 5*s*. 9*d*. as the expenditure per head on drink. This consumption, however, is by no means uniform in the different parts of the Colony and Ashanti.

EXPORTS.

11. The total value of all Exports from the Colony during the year was £774,186, as compared with £559,733 in 1901. The fall in the export trade of the Colony, which had been continuous since the year 1899, was arrested. This was due partly to the gold mining, which had in previous years taken labour from other industries, beginning to be itself productive, partly to the rapid growth of the cocoa industry, and partly to the year having been a very good one for palm oil and palm kernels. The export, however, of timber and rubber further declined.

12. The following tables give the values of the produce and manufacture of the Colony, and British, Foreign and other

Colonial Produce and Manufacture, for the years 1901 and 1902, and the Countries to which they were shipped:—

13. There is a general increase in the value of the exports to all countries during 1902, as compared with the previous year, but a falling off in the proportion taken by the United Kingdom from 45 to 43$\frac{1}{5}$ per cent. Germany slightly increased, and France and the United States slightly decreased their per centages, as compared with 1901.

14. The following table shows the Principal Articles of Export for the years 1901 and 1902:—

Principal Articles of Export.

Articles.	Value.		Increase.	Decrease.
	1901.	1902.

15. The trade in kola nuts, which suffered severely during the Ashanti disturbances, has revived, and in addition to those exported from the coast, large quantities of the nut, for which returns are not at present available, are carried north from Ashanti, mainly to the Hausa States.

16. The value of cocoa exported during the year shows an increase of about 121 per cent. over that for 1901. This industry was founded in 1879 by a native of Accra, who brought some cocoa plants and pods from Fernando Po, made a small plantation and, four years later, sold the cocoa pods in the neighbouring villages. The first consignment of 121 lbs. of cocoa was shipped to England in 1895, and realized £6 1*s*. No more cocoa was shipped until 1901, since when the industry, fostered by the Government, which distributed large quantities of cocoa seeds from the Botanical Station at Aburi and, at one period, shipped crops to England for the native growers, and also by the Basel Mission Stations, has advanced with rapid strides, fully 6,000,000 plants having been planted in one district alone. The chief port of shipment is Accra, which is now connected with market towns in the districts in which the greater portion of the cocoa exported is grown, by excellent roads.

17. The year 1902 proved a good one for palm oil and kernels, the increased exportation of which is also to be attributed to the improved road communication between the coast and the tracts of country where the oil palm (Elæis guineensis) flourishes.

18. The large increase in the export of gold is mainly due to the renewal of active mining operations following the pacification of Ashanti.

19. The decrease in lumber as an article of export is due to the low price obtainable in England for mahogany, in conjunction with the high cost of transport of logs to the ports of shipment, now that the forest in the vicinity of rivers capable of floating them down has been cleared of the large trees. A better price and improved transport facilities will give a fresh impetus to this trade.

20. Although 5 per cent. more rubber was exported than in 1901, 15 per cent. less value was realised. The wholesale destruction of trees and vines by the natives, due to the unskilful methods employed by them in the extraction of the latex, and the low prices now realised in Europe, are the factors which have conduced to the decline of this once staple product. An effort is being made to teach the native how to tap the trees and vines without injuring their vitality or growth.

21. The followng table shows the quantities and values of the principal articles of export for the last five years:—

Quantities and Values of the Principal Articles of Export.

(B.) Mines, Manufactures, and Fisheries.

1. Since its discovery by Europeans in the fifteenth century the Gold Coast has continuously exported gold to Europe. The available records, prior to 1850, of this exportation are intermittent and meagre, and from that year till 1880, there are wide gaps in them, the values of exportations during the period fluctuating between £24,000 and £175,000. These figures refer, however, only to British Settlements, and it should be borne in mind that up to the year 1872 shipments of gold must have also been made from the Danish and Dutch Settlements on the Gold Coast, and that there is evidence of a large quantity of gold dust having been exported from Ashanti to Yendi and Kong, and, viâ Timbuctoo, to the countries on the Mediterranean seaboard. The industry was practically in the hands of the natives, and it was not till 1874 (with the exception of old Portuguese and Dutch enterprises, traces of which still exist, and which it is said ended in the annihilation of the whitemen by the natives) that the first European Company was formed for gold mining in West Africa. It apparently did little beyond exploration, but the foundation of a second Company in 1879 resulted in some mining operations in the neighbourhood of Tarkwa, and the records of 1880 to the present time, which are continuous, cover the period in which the exportation of gold dust, the produce of native mining, was replaced by that of gold bars the result of European operations.

2. The export of gold increased from a value of £32,865 12*s.* 9*d.* in 1880, to one of £89,981 4*s.* 2*d.* in 1885. From that year to 1897 it fluctuated between values of about £77,000 and £103,000, the lowest return being that of 1894, the highest that of 1889. The year 1901 witnessed a remarkable development in the mining industry of the Gold Coast. A "boom" occurred in the West African mining market. The Colony was over-run by prospectors, and during the year no less than 2,825 concessions were taken up and filed in the Colony. Many of these were, however, abandoned on the collapse of the "boom," towards the end of that year, while the bulk of the mines engaged in serious mining operations confined themselves to development work pending the arrival near their properties of the Sekondi-Kumasi Railway.

3. The whole export of gold for 1902 was due to the Ashanti Goldfields Corporation and to its offshoot the Ashanti Sansu Mine, with the exception of a shipment of £2,000 in value, made in the last month of the year, which was the first of the "Bibiani Goldfields," a Company working in Sefwhi, and except £35 11*s.* 3*d.* worth of gold dust received in trade with natives. The value of total shipments was £96,810 7*s.* 2*d.*, which was higher than those of any year since 1850, of which figures are recorded, except 1889 and 1892.

4. The following table shows the amount of gold exported since 1880:—

Years.	Weight.			Value in Pounds Sterling.		
	Ozs.	Ackie.	Takoo.	£	s.	d.
1880	9,129	5	3	32,865	12	9
1881	12,567	1	2	45,240	10	0
1882	17,097	13	$4\frac{1}{2}$	61,552	5	9
1883	14,565	6	$2\frac{1}{2}$	52,435	8	9
1884	18,385	12	—	66.188	13	11
1885	24,994	12	$2\frac{8}{10}$	89.981	4	2

1887	22,546	12	$4\frac{2}{3}$	81,168	9	6
1888	24,030	10	$\frac{1}{3}$	86,510	5	3
1889	28,666	12	$5\frac{1}{6}$	103,200	9	10
1890	25,460	4	$3\frac{3}{4}$	91,657	0	$9\frac{3}{4}$
1891	24,475	9	3	88,112	2	9
1892	27,446	1	1	98,805	17	3
1893	21,972	1	—	79,099	8	6
1894	21,332	2	$5\frac{7}{12}$	76,795	17	4
1895	25,415	14	5	91,497	6	9
1896	23,940	10	$2\frac{4}{5}$	86,186	7	2
1897	23,554	13	$3\frac{4}{5}$	84,797	9	1
1898	17,732	11	—	63,837	13	6
1899	14,249	14	$2\frac{2}{3}$	51,299	13	0
1900	10,557	6	$1\frac{2}{5}$	38,006	12	3
1901	6,162	15	$\frac{4}{6}$	22,186	15	2
1902	26,891	12	$2\frac{1}{3}$	96,810	7	9

NOTE.—An ounce is reckoned at 72*s.*, an ackie at 4*s.* 6*d.*, and a takoo at 9*d.* There are 16 ackies in an ounce and 6 takoos in an ackie.

5. Gold is generally diffused throughout the Colony, Ashanti, and a small part of the Northern Territories, and appears in quartz formation and alluvial deposits, and in the Wassaw District there is a conglomerate, or "banket," formation. The rivers of the Colony are said to be rich in alluvial deposits.

6. From reports at present available, the only mining operations being carried on in the Sefwhi District are those of the Bibiani Goldfields.

Actual mining operations are being conducted on the following out of 71 mining properties in the Wassaw District:—

Wassaw West Amalgamated Mines, Limited,

Effuenta (Wassaw) Mines, Limited,

Taquah and Abosso Gold Mining Company (1900), Limited,

Mantraim (Wassaw), Limited,

Abbontiakoon (Wassaw) Mine, Limited,

Abosso Gold Mining Company, Limited,
Wassaw (Gold Coast) Mining Company, Limited,
Cinnamon Bippo Company, Limited,
Chida (Wassaw) Mines, Limited,
Prestea Mines, Limited,
Appantoo Mines, Limited,
And eight properties are being prospected.

In the Dixcove District there are 21 mining properties, in none of which actual mining operations are proceeding.

In the Axim District there are 14 properties, on two of which prospectors are working.

The Goldfields of Eastern Akim are engaged in transporting machinery to five properties in Eastern Akim, and general prospecting work is being carried on in connection with them and with the properties of one or two other Companies.

Twelve reports on properties in the Central and Southern Districts of Ashanti for the year 1902 were received by the Chief Commissioner from the Manager of Mines in that Colony. Those of the Ashanti Goldfields Corporation and the Ashanti Sansu Mine recorded active mining operations; the former with 65 stamps having crushed 16,348 tons of ore, yielding 16,407$\frac{7}{10}$ ozs. of gold, the latter, with 20 stamps, 8,223 tons, yielding 9.948$\frac{3}{4}$ ozs. of gold. Pending the completion of the Tarkwa-Kumasi extension of the Government Railway, other mining Companies in Ashanti have confined themselves to development work.

Only prospecting work has been carried on in connection with concessions taken up in the Black Volta District of the Protectorate of the Northern Territories.

7. During the year 788 concessions were filed in the Colony, 400 Orders for Survey were issued, and 10 Certificates of Validity. 61 Prospecting and 37 Surveyors' Licences were issued.

8. Native cloths are manufactured in various places in the Colony, Ashanti, and the Northern Territories. On the coast, and in the forest belt, English spun yarn is used in their manufacture, while in the north and in Krepi, thread is made from the indigenous cotton plant. Strips of cloth of from 3 to 7 inches broad are woven by means of a rough hand loom, and when sewn together, form the toga-like robe which is the native costume. Pottery is made by hand in many places for domestic purposes.

9. The Census returns for the year 1901 showed that 5,930 of the inhabitants of the ten principal coast towns were fishermen. The entire coast-line is, however, studded with small fishing villages. Sun-dried fish is a staple article of food in the

Colony, while a certain proportion is taken up country for sale in the forest villages of Ashanti.

Agricultural Industries and Botanical Stations.

1. Agricultural industries, if the cultivation of cocoa be excepted, cannot properly be said to exist, as the native has not yet been prevailed upon to make a sustained effort to bring any considerable area of ground under regular cultivation. The staple products of the Colony are palm oil, palm kernels, rubber, and kola nuts, which require practically no attention.

2. The Curator of the Botanical Station at Aburi reports that during the year many Europeans and natives have consulted him on the subject of planting, &c., and that the latter have bought large numbers of cocoa pods for seed.

3. The following trees and shrubs have been experimentally planted and have given such satisfactory results as to warrant their more extensive cultivation:—

Pepper (Piper Nigrum), nutmeg (Myristica Moschata), allspice (Pimento Officinalis), and croton oil (Croton Tigluim).

4. 15,000 rubber plants (Funtumia Elastica, which is the best variety of rubber to be found in the forest), have been planted out in forest land acquired by the Government, and are doing well. It is hoped that the success of this experiment will induce the native to take an interest in the planting of rubber trees, the more so as when once established they require little or no attention, as they grow better and quicker in dense bush and shade than in open exposed situations. 130 plants of the caoutchouc producing "Abba" (Ficus Vogelii), and 9,000 kola trees (Cola acuminata) have also been planted.

5. Experiments with several of the best varieties of cotton seed have been made at Aburi, but, so far, with no great success, the fibre produced being rather short. 40 bags of South American seed have been distributed to various Chiefs in the neighbourhood of the Volta River, and a cotton expert is now visiting these districts with a view to recommending suitable areas for experimental plantations, and what should be done to improve native methods of cultivation.

6. At Christiansborg 8,000 cocoanuts (Cocos nucifera) have been planted to encourage the growth of this palm by the native, for the production of copra and coir. The plantation has suffered from the ravages of the white ant, but the plants which have escaped are doing well.

7. A total of 26,000 plants, and 748 packets of seed were sent out during the year to Botanic Institutions in various parts of the world.

8. The Botanical Station is yearly exercising a greater influence over the natives, who, since they have seen the success attending the cultivation of cocoa by native planters who commenced under its auspices, are the more ready to seek and follow the advice always readily given to them.

(D.) Land Grants and Value of Lands.

1. In the principal coast towns land is mainly owned by families or individuals and conveyance by lease or sale follows the forms of English law, prices naturally varying in different towns and at different times. They probably reached a climax at Cape Coast in 1901, with the influx of European mining prospectors and the establishment of agencies for the mining companies in the interior of the Colony and in Ashanti, when as much as £1 a square foot was paid.

2. In the interior of the Gold Coast, and in Ashanti, land is generally the property of the tribe, sub-tribe, or community, represented by the head chief or "king," chief, or headman, with his councillors, the interests of the head chief or chief over lands allotted to sub-tribes or communities varying in different parts of the country. Lands unallotted by a tribe or sub-tribe remain attached to the office of its head chief or chief as "stool lands." In former times land frequently changed ownership as a result of inter-tribal wars. Now its permanent alienation, except compulsorily to the Government for public purposes, is unusual, and is mainly confined to the sale of stool lands for the redemption of debts incurred by the stool-holder for the time being on account of litigation. Occupancy by strangers to the tribe for purposes of cultivation is still, as it was formerly, allowed on easy conditions. Since the passing of the Concessions Ordinance of 1900, large tracts of land have been leased for long terms to European mining companies, mainly through the agency of middlemen from the coast. The legal proceedings, to which the validification of these leases has given rise, have shown that in many cases tribal boundaries are very vaguely known.

3. The usual terms for a gold mining concession of five square miles for 99 years, in the eastern part of the Colony are:—

A preliminary payment of £50 (called consideration money).

An annual rent of £12 until mining with machinery begins (called occupation rent).

A mining rent of from £100 to £250 a year.

The Court at Accra, however, now invariably requires that the native lessor shall have the option of a mining rent of £24, together with 2½ per cent. on the net profits, in lieu of the rent reserved by the lease.

The usual size of a gold mining concession in other parts of the Colony is 1,000 fathoms square; the consideration money is from £50 to £100, the occupation rent £12, and mining rent £200. If the area be more than 1,000 fathoms, the Court usually requires a mining rent to be at the rate of £200 per 1,000 fathoms square.

4. In Ashanti the following terms are generally in force for concessions of five square miles:—

£100 consideration money.

£12 to £24 annual ground rent.

£200 to £300 mining rent.

In some cases, however, larger sums have been paid for concessions.

5. Little is known with regard to land tenure in the Northern Territories, which have a scant population, no big towns, and a vast area of waste and mainly barren country.

(E.) Shipping.

1. The following tables show the number, tonnage, and crews of steam vessels of each nation entered and cleared at Ports in the Gold Coast Colony in the years 1901 and 1902:—

3. The increase in the number of steamers entered and cleared in 1902, as compared with the previous year, is due to the increase in imports, nd the decrease in the number of sailing vessels to the falling off in the sales of American liquor.

4. The following table shows the total shipping inwards and outwards for the last five years:—

Years.	Entered.									Cleared.

5. There is a weekly British service of mails conveyed by the British and African Steam Navigation Company and the African Steamship Company between the principal ports of the Colony (Axim, Sekondi, Cape Coast, and Accra) and the United Kingdom. The voyage occupies from 15 to 16 days from Liverpool. The vessels now proceed direct from Liverpool to Sierra Leone, and call at the Canaries, Madeira, or both, and also at Plymouth on the homeward voyage. The German Mail Service (Woermann Line) is every fifteen days, and, like the steamers of the Compagnie Belge Maritime du Congo, which leave Antwerp every three weeks for the Congo Free State, their boats call at Southampton for mails and passengers on both the outward and homeward voyages. The steamers of one or two French Companies, sailing from Marseilles, call irregularly outwards and homewards at Gold Coast ports.

6. There were three wrecks in the Colony during the year. In January the African Steamship Company's "Lokoja" stranded near Half Assinie; in May the Compagnie Belge Maritime du Congo's boat "Stanleyville" struck a rock when entering Axim Bay; and in August the three-masted American schooner "Garfield," laden with lumber, parted her cables at Axim and drifted ashore. All three ships became total wrecks, but no lives were lost and much of the cargo was saved.

III.—LEGISLATION.

1. During the year 15 Ordinances were enacted by the Governor, with the advice and consent of the Legislative Council.

No. 1 is in aid of the Administration of Ashanti. It gives the Supreme Court jurisdiction over cases referred from Ashanti, and empowers the Chief Justice to make, amend, or revoke rules providing for the procedure in any case so referred. Such rules were made to regulate the procedure in civil appeals, and the reference of causes and matters from Ashanti, to the Supreme Court of the Colony.

No. 2 is a similar Ordinance in aid of the Administration of the Northern Territories.

No. 5 increased the cost of spirits licences for stores within three miles in a direct line from the railway track or course of a railway under construction.

No. 13 regulates harbour and wharfage dues and defines the powers of harbour masters.

No. 12 made certain offences committed by carriers punishable.

No. 14 authorised the raising of a loan of £665,000 for the purpose of completing the railway from Sekondi to Kumasi.

No. 15 regulates pensions, gratuities, and other allowances granted in respect of offices held in His Majesty's Service.

2. Four Ordinances were enacted by the Governor of the Gold Coast in 1902 with respect to Ashanti:—

No. 1 provides for the Administration of the Government of Ashanti, which was annexed to His Majesty's Dominions by the Order of the King in Council of the 26th September, 1901. Part I. defines the terms used in the Ordinance and empowers the Governor to divide Ashanti into Districts. Part II. deals with the civil and criminal jurisdiction of the Chief Commissioner and District Commissioners; an appeal is allowed to the Supreme Court of the Gold Coast Government, by leave of the Governor, from the decision of the Chief Commissioner or District Commissioners' Courts, where the sum or matter involved amounts to £100. No appeal lies from the decision of the Chief Commissioner's or District Commissioners' Courts in any criminal matter. Part III. deals with the civil and criminal jurisdiction of the Native Tribunals; and Part IV. with miscellaneous regulations.

Nos. 2 and 3 slightly amend No. 1.

No. 4 deals with the construction and maintenance of railways in Ashanti; empowering the officer in charge of the work to take such lands as may be required for the construction, establishment, and maintenance of a railway.

Penalties are imposed for trespass or wilful damage to property belonging to the railway, and for wilful obstruction of its rolling stock.

3. Three Ordinances were enacted by the Governor of the Gold Coast with respect to the Northern Territories of the Gold Coast:—

No. 1 provides for the Administration of the Northern Territories, in accordance with the authority given to the Governor of the Gold Coast by the Order of the King in Council of the 26th September, 1901, providing for the exercise of His Majesty's jurisdiction in those Territories. This Ordinance is generally similar to the Ashanti Administration Ordinance above referred to, with modifications taking into account the smaller degree of development of the country.

Nos. 2 and 3 slightly amend No. 1.

IV.—EDUCATION.

(A.) Primary.

1. Seven Government Schools have been established in the Colony, while 117 schools, conducted by the various Mission Societies, receive towards their support annual grants-in-aid from the State. To receive such a grant a school must, after fulfilling certain conditions laid down by the Board of Education, have assembled at least 300 times during the year, with an average daily attendance of not less than 20 scholars.

2. The following table shows the number of Government and Assisted Schools maintained in the Colony for the last five years:—

Denomination.	1898.	1899.	1900.	1901.	1902.	Increase or decrease, 1902.
Basel Mission	47	60	61	61	57	Decrease, 4.
Wesleyan Mission ...	54	50	55	49	43	" 6.
Roman Catholic Mission	11	12	12	12	10	" 2.
Government	6	7	7	7	7	No change.
Bremen Mission ...	—	—	—	3	6	Increase, 3.
Mohammedan	—	1	2	3	1	Decrease, 2.
African Mission Zion ...	—	—	1	—	—	—
Totals	118	130	138	135	124	Decrease, 11

3. The decrease in Assisted Schools is mainly due to a shifting population, and not to a falling off in the attendance, which was 322 in excess of that of the previous year.

59 certificated teachers were employed during the year, of whom 15 worked in the Government Schools.

4. The following schools did not receive grants-in-aid, as the daily attendance in no instance averaged 20:—

Basel Mission Schools	73
Wesleyan Mission Schools	43
Bremen Mission Schools	8
Mohammedan Mission Schools	3
Roman Catholic Mission School	1
African Methodist Episcopal Zionist Church	1
Total	129

These Schools had a total attendance of about 2,726 pupils during the year.

5. Apart from inspections by the Director of Education or his representative, the schools of the various Mission Societies are under the direct management of ordained European or Native missionaries. Of these, each is appointed by his Society to a district, in which he exercises full authority, appointing and dismissing teachers, fixing salaries, &c. It is a fact, however, that to the teachers themselves falls the real management of the schools, which are scattered far apart, and are, on that account, not inspected as frequently by the managers as would appear desirable.

6. The following table shows the average attendance of scholars and grants-in-aid earned during the last five years:—

Year.	Government.	Assisted.	Total.	No. on Roll.	Average Attendance.	Grant-in-aid.
						£ s. d.
1898 ...	7	112	119	11,181	8,369	3,432 13 1
1899 ...	7	123	130	12,240	9,239	4,129 11 5
1900 ...	7	131	138	11,996	8,911	3,679 13 1
1901 ...	7	128	135	12,018	8,616	3,706 2 7
1902 ...	7	117	124	12,136	8,938	3,875 11 5
Increase or Decrease 1902.	—	−11	−11	+118	+322	+169 8 10

Special grants, to the total of £170 3*s.* 5*d.*, for the maintenance of buildings, furniture, and apparatus, and for new buildings and enlargements were awarded during the year, and £349 to scholars undergoing industrial instruction. A further grant of £1,092 0*s.* 9*d.* was earned by scholars in optional subjects.

7. The Government Schools, with the exception of Insuaim, which is free, charge a fee of 3*d.* a month for children in the infant classes, and 6*d.* a month for scholars in the standards. There is no uniform scale of fees charged by the Assisted Schools; those in the coast towns charge from 1*s.* to 5*s.* a quarter, those inland impart instruction free. The returns for the year show that 58 schools (of which 29 are under the Wesleyan Mission) charge fees, while 60 are free. The Basel Mission upper standard boarding schools charge about 10*s.* per annum, which includes lodging. No fees are collected at the Bremen Mission Schools.

School Fees Collected in 1900, 1901 *and* 1902.

Schools.	1900.	1901.	1902.
	£ s. d.	£ s. d.	£ s. d.
Wesleyan Mission	407 0 11	450 6 8	398 5 4
Government	210 12 3	212 17 9	361 19 6
Basel Mission	93 19 3	115 19 9	110 14 6
Roman Catholic Mission ...	25 0 6	22 11 2	43 2 10
Mohammedan	10 0 0	—	—
Total	747 2 11	801 15 4	814 2 2

8. The main difficulty in improving the Gold Coast assisted schools is the unsatisfactory qualifications of the teachers, due largely to the small salaries offered to them. A system of grants to training colleges, to pupils under instruction in them, and to qualified teachers from them who bind themselves to engage in educational work was initiated during the year to meet this difficulty.

(B.) Secondary.

It is only at the Basel Mission seminaries at Akropong and Abetifi that an attempt is made to provide a higher or secondary education. Students about to join the ministry are here taught something of theology and classics. Parents desirous of giving their children a better education than can be obtained at the elementary schools, as a rule, send them either to Sierra Leone or England.

(C.) Industrial, Technical and Agricultural Schools.

1. Although 45 schools earned industrial grants in 1902, these were awarded, in all but eight cases, for agricultural work. The cost of transport, which greatly reduces the profit of sales of country produce on the coast, is one of the chief drawbacks to the success of this department of instruction. A want of qualified instructors is also felt. The Government instituted during the year a course of instruction for teachers at the Botanic Station at Aburi. Candidates who succeed in passing the examination held at the end of the course receive a grant of 50*s.*, and holders of certificates for knowledge of agriculture, an annual grant of £5, if ten of the pupils under their instruction earn the highest grant obtainable for the subject.

2. The Technical Department attached to the Government School at Accra, and closed for some time owing to the want of proper supervision, has been re-opened and pupils are

now taught how to work in wood from measured drawings prepared by themselves. Lessons in bookbinding are given at Saltpond and at the Basel Mission School at Akropong.

V.—GOVERNMENT INSTITUTIONS.

(A.) Hospitals.

1. There are Government hospitals at the following places in the Colony:—Axim, Elmina, Cape Coast, Accra, Ada, Kwitta, and Kumasi; and dispensaries at Sekondi, Tarkwa, Saltpond, and Akuse. A hospital has been built by the railway construction staff at Sekondi, to be taken over by the Government. Special accommodation is provided for Europeans at Axim, Cape Coast, and Accra; and at the two latter nursing sisters are in attendance. There is a permanent stone building at Accra for contagious diseases, and one is being erected at Cape Coast. At other stations in the Colony small-pox hospitals are only temporary structures.

2. The number of in-patients treated during the year at the various hospitals was 1,305, as compared with 2,019 in 1900.

(B.) Asylum.

There is one lunatic asylum in the Colony at Accra. 67 cases were treated during the year.

(C.) Poor Houses and (D.) Reformatories.

There are no poor-houses or reformatories in the Colony, and poverty in the strict sense of the word is unknown.

(E.) Savings Bank.

1. The deposits during the year, including interest, amounted to £4,325 12*s.* 2*d.*, and were in excess of the deposits in 1901 by £699 10*s.* 6*d.*

2. The withdrawals for the same period amounted to £3,370 2*s.* 2*d.*, and were less than the deposits in the sum of £955 10*s.*, and, as compared with the withdrawals in 1901, showed a decrease of £252 5*s.* 7*d.*

3. There has been a slight increase during 1902 on the two previous years, both in the number of depositors and in the amount of money deposited in the Savings Bank; while, taking into consideration the number of depositors, the amount

withdrawn shows a considerable decrease. During the year a branch of the Savings Bank was opened at Kumasi with satisfactory results.

4. The interest accrued on deposits during the year amounted to £95 10*s.* 11*d.* No further investments in securities have been made during the year, so that the sum of £4,099 14*s.* in the hands of the Crown Agents remains unchanged. The treasurer holds the sum of £1,220 7*s.* 4*d.*, which makes the total assets of the Savings Bank £5,320 14*s.*, an increase of £859 19*s.* 1*d.*

VI.—JUDICIAL STATISTICS.

(A.) Police.

1. The total strength of the General Civil Police at the end of 1902 was 521 of all ranks, and of the branch known as "Escort Police," 89. At the end of 1901 a body of men, called the "Mines Police," was organised for employment in the mining districts by the various mining companies. The total strength at the end of 1902 was 35. The headquarters of the Mines Police is at Tarkwa, and in the latter part of the year they were fully employed by the mining companies with such satisfactory results that it has been found necessary to increase their strength. A small body of police, known as "Railway Police," is on duty on the railway. Its strength at the end of the year was 32.

2. A detective office was opened at headquarters with a staff of 14 non-commissioned officers and men selected from the ranks of the Police.

(B.) Prisons.

1. There are three central common gaols at Elmina, Cape Coast, and Accra, to which long sentence prisoners are sent, and nine lock-ups at out-stations where sentences up to six months are undergone, exclusive of prisons in Ashanti and the Northern Territories.

2. The amount realised from the sale of prison manufactures during the year was £397 4*s.* 8*d.* The gross estimated value of prison labour was £8,117 2*s.* 7*d.*, and the cost of the Department was £10,215 16*s.* 5*d.* Improvements in the prison system are in contemplation.

(C.) Criminal Statistics.

The following are the statistics of crime for the last five years:—

	Apprehensions.					Convictions.				
	1898	1899.	1900.	1901.	1902.	1898.	1899.	1900.	1901.	1902.
Offences against the person	1,089	891	967	1,385	1,498	593	496	475	944	897
Offences against property	846	788	831	1,038	1,157	492	416	441	724	766
Other offences...	4,165	2,362	1,563	2,042	3,086	3,136	1,481	1,186	1,612	2,445
Totals	6,100	4,041	3,361	4,465	5,741	4,221	2,393	2,102	3,280	3,108

VII.—VITAL STATISTICS.

(A.) Population.

A Census of the Colony, including Ashanti and the Northern Territories, was taken in 1901, when a population of 1,338,433 was recorded. The Census Committee decided, in view of the unreliability of many of the returns, to make an addition of 148,000, which gave a total population of 1,486,433. The previous Census, taken in 1891, showed a population of 768,559 (not including the Northern Territories), to which the Census Committee made an addition of 705,000—total, 1,473,559. These figures are still far from reliable, the returns from Ashanti in particular being very incomplete.

(B.) Public Health.

1. The general health of Europeans in 1902 was fairly good, and showed an improvement on that of the previous year. The most prevalent disease was, as always, malarial fever, and to it is due the greater portion of the mortality. The greatest amount of sickness occurred during the rainy season—June to September. The health among Europeans in Ashanti was good; in the Northern Territories it was bad.

2. For the first time, a return of Europeans resident in the Colony has been obtained with some approach to accuracy. The following table shows the number, death rate, and invaliding of Europeans during the year:—

How Employed.	Number.	Deaths.	Invalided.	Death rate per 1,000	Invaliding rate per 1000.
Officials	286	10	24	34·96	83·91
Mercantile Firms &c.	373	21	38	56·30	101·87
Mining Companies	778	18	98	23·13	125·96
Go'd Coast Railway	297	6	20	20·20	67·34
Missions	96	2	1	20·83	10·41
Total ...	1,830	57	181	31·14	98·90

3. The number, death, and invaliding rate, of officials in 1901 appears below:—

Number.	Deaths.	Invalided.	Death rate per 1,000.	Invaliding rate per 1,000.
188	15	18	80	95

4. No accurate death-rate of the native population can be given, as there is no compulsory registration of deaths in the Colony. The health of the natives during the year appears to have been fairly good. Owing to the systematic manner in which vaccination has been carried out, there has been a very marked decrease in the number of small-pox cases among the native population, who are gradually becoming more willing to submit themselves to the operation.

(C.) Sanitation.

Considerable improvements were carried out in the sanitation of the principal coast towns, and the water tanks at Accra were made mosquito-proof.

(D.) Climate.

1. The greater part of what was an average rainfall, fell between the months of February and the beginning of July. The "Harmattan" blew strongly at intervals between January and March, and a cold dry wind blew constantly from the middle of July till the end of November. No observations as to the direction and force of the wind were taken.

2. The following table gives a mean monthly return for the year of the temperature and rainfall, where observations have been recorded:—

Name of station.	Temperature.						Rainfall.	
	Solar maximum.	Minimum on grass.	Shade maximum.	Shade minimum.	Range.	Mean.	Amount in inches.	Degree of humdity.

VIII.—POSTAL, TELEGRAPH, AND TELEPHONE SERVICES.

1. The phenomenal increase in the business of this Department during the year 1901 was not maintained in 1902. This is attributable to:—

(*a.*) The falling off in the general correspondence and circulars of advertising firms, and to the decrease in the number of cablegrams sent to England from the Colony, the transmission of which had, in 1901, received so great an impetus owing to the interest aroused by mining enterprise on the Gold Coast.

(*b.*) The decrease in the sale of stamps, due in a measure to the shrinkage of the outward correspondence, but principally to the introduction of stamping machines, now used for the stamping of concessions and other legal documents.

2. An increase in expenditure in 1902 over that of the previous year was due to the higher rates of pay drawn by the staff of the Department, and to the reconstruction and extension of the telegraph lines in the Colony.

3. The following tables show the gross receipts and expenses of the Department for the years 1901 and 1902:—

TABLE 1.

Comparative Table of Gross Receipts.

Head.	Receipts. 1901.	Receipts. 1902.	Increase.	Decrease.	Remarks.
	£ s. d.	£ s. d.	£ s. d.	£ s. d.	
1. Sale of postage stamps for postal purposes.	24,217 9 2½	13,223 18 11	—	10,993 10 3½	Item 1 includes postage on parcels. In 1901 a sum of £320 8*s.* 6*d.* was entered in error under two heads: "Sale of postage stamps for postal purposes" and "Postage on parcels."
2. Sale of postage stamps for telegraphic purposes.	20,633 2 8½	15,408 6 6	—	5,224 16 2½	
3. Sale of judicial stamps	13,829 7 8	11,352 7 6	—	2,477 0 2

12. Rent of offices	—	38 15 0	38 15 0	—
Totals	15,988 15 1	21,983 11 11	6,594 6 10	599 10 0
			599 10 0	
Total Increase			5,994 16 10	

4. The estimated number of letters, postcards, newspapers, books, sample packets, and circulars received and despatched during the year was 3,701,367. This shows a steady increase on previous years, if we except the abnormal circulation of 1901, which totalled 8,611,518. Of registered articles dealt with, however, 102,301 were forwarded and 63,578 received, as against 82,734 forwarded and 57,718 received in 1901, and of parcels 20,108 received as against 11,320, and 2,984 despatched as against 1,776. The value of money orders issued in 1902 was £42,410 7*s.* 3*d.*, as compared with £33,275 18*s.* 3*d.* in 1901, and of inland postal orders, £3,725 19*s.* 4*d.*, as compared with £2,504 6*s.*

5. Three European postmasters, out of five provided for in the Estimates, were appointed and stationed at Axim, Cape Coast, and Sekondi, in 1902. The credit stocks of stamps, previously held by the District Commissioners, who supplied them to the local post offices, were transferred to district postmasters, who thus became directly responsible to the postmaster general. A new system of post office accounts, based on that obtaining in the United Kingdom, was introduced on the 1st September, 1902, and has proved successful.

6. The total number of telegrams dealt with was 259,169, as compared with 199,424 in 1901, the greater part of the increase representing official messages. Cablegrams for the United Kingdom and other parts of the world were handed in at the offices of the Colony to the number of 4,996 (value £11,098 5*s.* 4*d*), as compared with 6,911 cablegrams (value £16,277 8*s.* 5*d*), transmitted in 1901. The Government proportion of this sum amounted to £363 0*s.* 9*d.*, the remainder being paid over to the African Direct Telegraph Company. This company handed over 3,835 cablegrams for transmission over Government lines during the year, as against 6,400 in 1901. The decrease in the number of cablegrams despatched is attributable to the small number of prospectors who visited the Colony during the year, as compared with the number at work in 1901.

7. During the year a telegraph office was opened at Tarkwa, a postal telegraph line being run from Sekondi on the railway telegraph poles. A single line was also constructed from Axim to Newtown and communication with the French colony of the Ivory Coast was established on the 31st December. Telegraphic communication is now possible from the eastern frontier of Liberia, along the shores of Ivory Coast, Gold Coast, Togoland, and Dahomey, to Lagos.

8. There are telephone exchanges connecting all Government offices, and some of the leading business houses at Accra and Cape Coast; the latter was established in 1902.

IX.—MILITARY FORCES AND EXPENDITURE.

(A.) Regular Forces.

1. On the 26th June, 1902, "The West African Frontier Force (Gold Coast Regiment) Ordinance of 1901," came into force, finally converting the Gold Coast Constabulary into the Gold Coast Regiment of the West African Frontier Force. The regiment consists of two battalions.

2. The first battalion, stationed in Ashanti, with headquarters at Kumasi, has an authorised establishment of 35 officers, 21 European non-commissioned officers, and 1,657 native non-commissioned officers and men, including the artillery and band.

3. The second battalion is stationed in the Northern Territories, with its headquarters at Gambaga, and has an authorised establishment of 13 officers, 6 European non-commissioned officers, and 559 native non-commissioned officers and men, including artillery.

An irregular body of 30 Moshi horsemen is employed for scouting purposes.

4. The expenditure on this force for the year was:—First Battalion, £58,942 7*s.* 6*d.*; Second Battalion, £22,298 18*s.* 3*d.*

Detachments of half companies of the First Battalion West India Regiment were stationed at Elmina and Cape Coast, and one company at Accra from January to November, 1902.

(B.) Militia.

There is no Militia Force in the Colony.

(C.) Volunteers.

1. The Gold Coast Rifle Volunteers, which was raised in 1892, had a total strength of 259 officers, non-commissioned officers and men, at the end of 1902. Machine gun sections recruited from Europeans have been formed at Accra and Cape Coast. The Volunteers are armed with the Martini-Enfield carbine and pattern '88 sword-bayonets.

2. The sum of £1,369 3*s.* 6*d.* was expended on the Volunteers in 1902.

(D.) Preventive Service.

1. This service, which is a branch of the Customs Department, is stationed along the western and eastern frontiers of the Colony.

2. The Western Frontier Preventive Service extends north to Debisu, within five miles of the boundary of Ashanti, and consists of 21 stations. During the year the principal seizures consisted of powder. The men know something of musketry, and for their further instruction, rifle ranges have been cleared.

3. The Volta River Preventive Service extends from Ada to Burai in the Northern Territories, just north of the eighth parallel, and consists of 28 stations. Since its establishment, Ada trade has greatly increased, largely owing to the prevention of smuggling from the Trans-Volta districts where lower duties prevail. This service also undertakes the transport of stores for the Northern Territories by canoe from Ada to Padjai.

4. The expenditure on these services in 1902 was £12,531 11*s.* 8*d.*

GENERAL OBSERVATIONS.

1. Important Events.

The coronation of His Majesty the King was celebrated with enthusiasm throughout the Colony.

An Anglo-German Boundary Commission, which had commenced work in December, 1901, completed by the 21st July the demarcation of the boundary between the Northern Territories of the Gold Coast and Togoland from the southern frontier of Mamprusi and Chakosi to the 11th degree of north latitude, and also made a map of the Dagomba country, on which the remainder of the boundary between the two Protectorates is to be determined in Europe.

An Anglo-French Boundary Commission which, during the year, worked its way northward from Nugua on the Tano, along the western frontier of the Colony, reached the Northern Territories in June, and was engaged in mapping the frontier north of the ninth parallel up to the point fixed by the previous Boundary Commission in 1900, on the eleventh parallel of north latitude.

The western and northern frontiers of the Gold Coast are now completely demarcated, and the eastern frontier nearly so.

In March a small expedition left Gambaga to punish the people of Nafrango, in the Tiansi country, who had been raiding the surrounding country and looting caravans. It met with little opposition and complete success. This was the only warlike operation undertaken during 1902, which, on the whole, was an uneventful and prosperous year throughout the Colony.

2. State of Railways and Roads.

The Government railway from Sekondi to Kumasi which had been commenced in February, 1898, was proceeded with during the year, and on the 24th December the first train from Sekondi entered Obuassi, the headquarters of the Ashanti Goldfields Corporation, a distance of 124 miles from the coast. The traffic receipts for 1902 show an increase of £26,003 7*s.* 9*d.* over those of 1901. The following table shows the monthly traffic receipts for the year 1902 as compared with those for 1901:—

Total Receipts for 1902, £39,438 18*s.* 6*d*

The construction of new roads on a definite scheme, and the maintenance and extension of those already existing, was continued during the year. Much difficulty is experienced in the up-keep of good roads, and in the bridging of rivers in the Colony, owing to the heavy floods which occur during the rainy season, and to the swampy nature of the ground in many parts of the forest country. It is also necessary for a European to be stationed on each road where work is in progress to ensure adequate return from the employment of a large amount of highly paid labour.

The following is a summary of the work done by the Roads Branch of the Public Works Department in 1902:—

An 18-feet vehicle road from Accra northwards, under construction by "The Goldfields of Eastern Akim, Limited," with Government assistance, was completed as far as Sansame, 24½ miles from Accra, early in the year, and has been satisfactorily maintained. The section of the 16-feet road from Sansame to near Apedwa—25½ miles in length—is not yet completed; while the section from near Apedwa to Osino—28½ miles in length—has been partly formed for 12 miles.

At the end of the year there still remained about 14 miles out of 71¼ of the Cape Coast (Prahsu section) of the 12-feet vehicle road from Cape Coast to Kumasi to reconstruct. The Prahsu-Kumasi section has only been reconstructed for 7 miles out of 70, the work in the neighbourhood of the Prah having been very heavy. The remainder of the road is kept clean by the local chiefs. If, after the completion of the railway to Kumasi, trade with Cape Coast still continues from the interior, it will come by this road.

The 12-feet vehicle road from Saltpond was constructed through Mankessim for 9¼ miles to near Nyamen, and a bridge over the Amissa river was being built at the end of the year. The road is to be pushed on to Denkera and Ejumaku, and, eventually, to Nsuaim.

A 12-feet cask road completed from Winneba to Swaidru, 14⅔ miles long, is being further improved, and a similar road from Appam to Abodom is under construction.

The native roads from Tarkwa to Bonsa, and Bonsa to Himang, were improved.

The 16-feet vehicle road from Accra to Aimensa and Dodowa was re-made and re-metalled from the cantonments (3½ miles from Accra) to the point (8 miles from Accra) where the roads to Aimensa and Dodowa bifurcate. A new trace of the road from this point to Aimensa (17½ miles from Accra) is to be adopted, as it will avoid some steep gradients. It follows the Dodowa road for four miles from the present junction, from which, to Dodowa, the road has been widened to 16 feet by the native headmen of villages. It is not, however, metalled,

with the exception of that part which coincides with the new trace to Aimensa. The roads from Aimensa and from Dodowa to Accra are much used for rolling down casks of palm oil and cocoa. The cost of rolling down one cask containing about 1,000 lbs., from the former place is 14*s.* 6*d.*, including return of the empty cask. This adds one-sixth of a penny per lb. at Accra to the cost of the produce at the place where it is purchased, and the merchants do not consider that wheeled traffic would be more economical than the present system of bringing down produce.

The following roads, constructed by the Public Works Department in the Kwitta District, were maintained and repaired during the year:—

Anyako-Wute-Sesapke	...	36 miles.
Afieringbe-Whenyi	...	15 „
Danoe-Dogplata ...	...	23 „

The maintenance of these roads is important for ensuring the shipment of produce grown in the district from English ports instead of from Lome in Togoland.

Other roads maintained by the Public Works Department are the following:—

Axim-Ancobra ...	...	3½ miles.
Cape Coast-Elmina	...	8 „
Cape Coast-Anamaboe	...	9½ „
Cape Coast-Jukwa	...	14½ „

The Kpong-Tinkranku road (93 miles long) which follows the right bank of the Volta River, is practically unused, mainly owing to there being no considerable villages along it and to its not having been completed to some place on the river whence good road communication to the interior exists. On this account its periodical cleaning has been stopped for the present.

Apart from the roads kept up by the Public Works Department, there are a large number of bush paths, for the quarterly cleaning of which the native chiefs are made responsible under "The Roads Ordinance, 1894," and for which they are paid 10*s.* per mile per quarter.

With the exception of the Prahsu-Kumasi road, already mentioned, and the Kumasi-N'koranza-Kintampo road, no road construction has been undertaken in Ashanti. The native paths are, however, widened and kept clean by the local chiefs.

In the Northern Territories, a scheme of transport by the Volta River came into force in December, 1902. Previous

to this, the transport of a carrier's load of 60 lbs. from Cape Coast to Kintampo cost £1 17*s.*, but by river transport from Ada to Padjai this cost is now reduced to 10*s.* 6*d.* As some 2,000 carriers' loads of stores are sent up annually to the Northern Territories a great saving is thus effected. A road between Gambaga and Salaga *viâ* Karaga, Kpatenga, and Kpabia, has been completed and provided with rest-houses, and is much used by caravans. It is being extended from Salaga to Padjai.

3. Immigration and Emigration.

There are no records available with regard to the extent of immigration to the Gold Coast. Kroo and Bassa boys are employed as labourers by the merchants and on some of the mines. Timanis and Mendis from the Sierra Leone Protectorate, and Yorubas from Lagos, are employed on the railway, and also by the mining companies. Sierra Leoneans from Freetown and a few Lagos natives trade in the coast towns. There was practically no emigration during the year.

4. Public Works.

The work of improving the township of Sekondi was continued. Areas formerly occupied by native huts have been cleared and plots leased for the erection of substantial buildings, under conditions ensuring good sanitation and an adequate storage of water. Some such buildings have been completed and others are in progress. The construction of main and branch streets and of a general drainage system is being proceeded with. A new native town to the south west of the township has been laid out. The expenditure incurred on this work during the year was £4,220 9*s.* 3*d.*

The boundaries of the new township of Tarkwa were declared, and a considerable amount of work was done in improving the town. Natives' huts near the railway station were acquired and destroyed, and a new native town established about half a mile to the south east of the railway station. The site by the station is being laid out in plots, and a number have been leased to important firms and companies, under similar conditions to those enforced at Sekondi. A main street is under construction, and other main and branch streets are to be made. The expenditure incurred on these works was £2,717 17*s.* 1*d.*

Cape Coast, although with the growth of Sekondi it may decline in commercial pre-eminence, has still by far the largest native population of any town in the Colony, as well as a considerable number of resident Europeans, and during the

year efforts were made, by the formation of open spaces, additional drainage, and the provision of various sanitary conveniences, to improve its health conditions.

The erection, mainly by public subscription, as a memorial to Her late Majesty Queen Victoria, of the tower attached to the church at Accra was rapidly proceeded with. The work of re-converting Christiansborg Castle into Government House was nearly completed by the end of the year, and it was decided to move the Supreme Court and Law Offices into the former Government House.

Land was purchased in Dodowa, an important market town, about 25 miles north-east of Accra, to form an open space for a produce market.

The transference of the headquarters of the First Battalion Gold Coast Regiment, West African Frontier Force, from Accra to Kumasi necessitated the erection of a large number of buildings at the latter town. Commenced in 1901, these buildings were almost completed at the end of 1902. They consist of hutments for native troops, and quarters and messrooms for European officers and non-commissioned officers, the latter of burnt brick of local make with timber-work and roofing shingles of native wood. The total expenditure on these buildings, including that of 1901, was £12,133 16*s.*

A sum of £366 2*s.* 11*d.* was expended on the building of officers' quarters, &c., at Gambaga in the Northern Territories.

The Mines Survey Department during 1902 ran a considerable number of main traverse lines through the country, which, when connected with the surveys of the western frontier of the Gold Coast, Ashanti, and the Northern Territories, of the northern frontier of the Northern Territories, and of the eastern frontier of the Northern Territories, will form the basis for a map of the Colony. In the Wassaw District a number of shorter traverse lines were run by which to locate the many mining properties in that district. The surveys of 20 mining properties were completed or in hand at the end of the year.

5. Changes in the Constitution of the Colony.

The annexation to His Majesty's Dominions of Ashanti, under the Order of the King in Council of the 26th of September, 1901, was formally proclaimed on the 1st January, 1902, the chiefs and people being informed that the administration would be carried out on the same lines as heretofore, and would uphold the legitimate powers of the chiefs, and respect such native customs as were not repugnant to civilization. On the same date the Order of the King in Council with regard to the exercise of jurisdiction in the Northern Territories was also proclaimed.

6. Changes in the Establishment.

A scheme for the reorganization of the district administration of the Colony, and the establishment of District Commissioners was partially put into operation during the latter months of 1902. It consisted of dividing the Colony into three districts, each administered by a District Commissioner, and sub-divided into sub-districts each placed in charge of an Assistant District Commissioner as follows:—

The Western District with headquarters at Sekondi and sub-districts Sefwhi, Axim, Wassaw, Dixcove, and Sekondi.

The Central District with headquarters at Cape Coast and sub-districts Cape Coast, Elmina, Saltpond, and Winneba.

The Eastern District with headquarters at Ada and sub-districts Accra, Prampram, Kwahu and Eastern Akim, Volta River, Ada, and Kwitta.

A Secretary for Native Affairs was appointed, and tribal affairs and some other matters were transferred to his office from that of the Colonial Secretary.

Ashanti was divided into the following four districts in 1902.

The Central district comprising Kumasi, Ejisu, Juabin, Bompata, Obogu. Kumawu, Insuta, Mampon, Aguna, Ofinsu, and Atchima. Headquarters: Kumasi.

The Southern district comprising Mansu N'kwanta (or Dengiasi), Bekwai, Kokofu, Abodom, Adansi, and Ofuasi. Headquarters: Kwissa.

The North-western district comprising British Gaman, Wanki, Tekiman, Berekum (Bechim-Ahafo and Borumfu), Wam, and Asunafo-Ahafo. Headquarters: Sikassiko.

The North-eastern district comprises N'Koranza, Attabubu, and Abiasi. Headquarters: Attabubu.

The three last named districts are each under a Commissioner, the whole of Ashanti being administered by a Chief Commissioner, whose headquarters are at Kumasi.

The Northern Territories is now divided into the following districts which are placed under Commissioners:—

District.	*Headquarters.*
White Volta.	Gambaga.
Black Volta.	Wa.
Kintampo.	Kintampo.
Gonja.	Salaga.

Gambaga is the headquarters of the Chief Commissioner of the Northern Territories.

7. Future prospects of Trade.

The staple articles of export, viz., palm oil and palm kernels, to which now may be added cocoa, though subject to fluctuation, due to rise and fall of prices in Europe and good and bad seasons on the Coast, are likely to continue to increase with the completion of the road system now under construction, which is intended to tap the large palm-bearing areas and cocoa plantations in the eastern half of the Colony. The export of rubber and lumber may revive at some future date now that large numbers of the natives have been attracted to the mines, who previously collected rubber or were employed in felling trees, thereby giving the young trees time to mature. The railway to Kumasi should prove an important factor in the future trade of the Colony.

8. Suitability of Climate for Europeans and Openings for White Labour.

The climate is damp, malarious, and unhealthy for Europeans; the coast being more so than are Ashanti and the Northern Territories. Efforts, attended with some success, have recently been made to ameliorate climatic conditions by improvements in the dwellings of Europeans, which are now removed, where possible, from the neighbourhood of native buildings, and in the sanitation of towns. Europeans of sound constitution, who practise habits of moderation, generally suffer little from the effects of a not too prolonged residence in the Colony. The openings for white labour are few. Europeans employed at the mines and by mercantile firms are appointed in England, and it is useless for men to come to the Colony on the chance of obtaining employment. In 1901 there were four cases of destitute Europeans in the Colony, and in 1902, 18. The Government does not undertake to repatriate destitute persons.

9. Rates of Wages and Costs of Living.

Wages in the Colony are high, and were increased by the action of prospectors, who, when the mining "boom" was at its height, paid extravagant sums to obtain the services of carriers and of personal servants.

The rate of pay given by Government for carriers is 1*s.* a day and 3*d.* subsistence money, and a table has been drawn up fixing the rate of pay for short journeys to and from the principal coast towns. Contractors at Cape Coast and Accra supply the Government with carriers when they are required and are paid at the rate of 1*s.* per head for so doing. At the mines, as much as 2*s.* 6*d.* per diem has been paid for unskilled labour, but a body, known as "The Mine Manager's Association," which has been established in Wassaw. is dealing

with this matter, so as to ensure that the various mining companies represented on it pay rates of wages on a fixed scale.

For similar reasons to those already given, a proportionate increase has occurred in the cost of living. In the Colony the price of beef, mutton, poultry, and eggs, &c., has been more than doubled within the last few years, and in some parts these articles of food are very difficult to obtain. The same increase has occurred in the price of native foodstuffs, this being mainly due to the numbers of natives who have abandoned farming for labour on the mines.

Food is fairly plentiful and cheap in Ashanti, and the same remark applies to the sparsely populated Northern Territories.

10. Openings for Investment of Capital.

Large sums of money have been invested in the mining industry of the Colony, and with the completion of the Sekondi-Kumasi Railway, and the building of the branch lines to some of the outlying mining properties, there will be justification for further investments in both mining and forestry enterprises that have been properly prospected by thoroughly competent men.

11. Social Condition of the People.

Pauperism does not exist in any part of the Colony, Ashanti, or the Northern Territories, for it is the firmly established native custom for a family to provide the necessities of life to an indigent member. Although advantage is taken of the Government and Mission Schools, there has been a very slight advance of Christianity in the Colony during the past ten years, the mass of the people still retaining fetish worship, without, however, its more repulsive rites. There was, during the year, a marked absence of violent crime, and the greater proportion of minor offences were against sanitary regulations. A desire on the part of the natives for European clothing and goods is a natural sequence to the possession of money, which is now plentiful among them owing to the ease with which employment can be obtained in the mining districts. In the coast towns the native costume is being rapidly discarded for the less becoming European style of dress.

In Ashanti, Christianity has made no headway, but a desire is evinced by the chiefs and people for schools to be established in their towns. A large number of Ashantis took advantage of the demand for labour, and, during the year, worked for the various mining companies. They have proved themselves to be energetic and quick to learn.

In the Northern Territories, the natives are poor. They devote themselves to agriculture, growing foodstuffs, cotton, and tobacco, mainly for local consumption. Slave raiding has been completely stamped out, but slave dealing is prevalent. No mission has as yet been established in the Northern Territories and while in many districts Mohamedanism, tainted with fetish practices, is professed, the natives living in the north of the Protectorate are pagans. In most parts of the Protectorate a Mohammedan style of costume is affected. The wild Fra-fra tribes wear little or no clothing, and are armed with bows and poisoned arrows. They are now the only disturbing element in an otherwise peaceful country.

12. General Condition of the Colony.

The general condition of the Colony at the end of 1902 was satisfactory, as will have been gathered from this report.

In Ashanti the natives have recovered from the effects of the campaign of 1900, and, during the year, the country was free from any disturbance. Those who fled from Ashanti have returned; towns and villages have been rebuilt, in many cases on a better and larger scale than formerly. The War Indemnity Tax collected in 1901 was reduced by one half during the year, and the chiefs and people were informed that it would be abolished in 1903. The settlement of such disputes as have arisen between local chiefs with reference to ownership of land, was, where any doubt existed, postponed pending the completion of the Government survey of Ashanti.

With the exception of the expedition already recorded the Northern Territories were free from any disturbance, and caravans can now travel through them in complete safety.

GOLD COAST.

(For Report for 1902, *see* No. 397.)

GOVERNOR RODGER to MR. LYTTELTON.

Christiansborg Castle,
West Coast of Africa.
30th June, 1904.

SIR,

IN continuation of my despatch of the 17th instant, forwarding the Annual Blue Book of this Colony for the year 1903, I have the honour to transmit herewith an able and comprehensive Report by the Colonial Secretary.

2. In the compilation and issue of the Blue Book, at a much earlier date than is usual in this Colony, Major Bryan informs me that he has received valuable assistance from Mr. L. W. Bristowe, Assistant Colonial Secretary, and from Mr. E. D. R. Paull, acting Government Printer.

3. As I have fully expressed my views on the various Departmental Reports (on which this Report is based) in the despatches forwarding those Reports, and on the general condition of the Colony, in my despatch of the 27th instant, I will not add anything to the accompanying Report.

I have, &c.,

J. P. RODGER,
Governor.

REPORT ON THE BLUE BOOK OF THE GOLD COAST, ASHANTI, AND THE NORTHERN TERRITORIES, FOR THE YEAR 1903.

I.—FINANCIAL.

(A.) Revenue and Expenditure.

Revenue.

The General Revenue for the year, exclusive of Grants-in-aid, amounted to £554,552 16*s.* 1*d.*, exceeding the original estimate by £15,222 16*s.* 1*d.* Thus the Revenue, which in 1901 had reached the high figure of £471,193 3*s.*, and was exceeded in 1902 by £20,561 6*s.* 6*d.*, again shows a further increase of £62,798 6*s.* 7*d.* The heads of revenue of the Colony, Ashanti, and the Northern Territories for the years 1902 and 1903, are shown for purposes of comparison in Table I.

With the exception of Customs receipts, which show a decrease of £12,935 11*s.* 10*d.*; interest of £4,235 6*s.* 9*d.*; revenue from Ashanti of £3,151 2*s.* 2*d.*; and land sales of £842, all other items of revenue show gratifying increases.

The decrease in the Customs receipts need not be regarded as a very serious matter, as those for 1902 were somewhat abnormal and resulted from the general revival of trade which succeeded the cessation of hostilities in Ashanti in December, 1900, and from the great boom in the mining industry. A comparison with the receipts under this head for 1901 shows an increase of £18,658 11*s.* 5*d.*

There was very little realized under the head "Interest" as there was no investment of surplus funds—all available balances were expended in carrying on the construction of the railway to Kumasi.

The receipts from the railway open lines from Sekondi to Obuasi from the 1st July, the date on which the line was handed over to the Government, amounted to £65,152 11*s.* 7*d.*

The increase in Light Dues is mainly attributable to a greater number of steamers calling at the various ports, and to a more prompt and better method of collection. Fees of Court, to large payments made by the various mining companies for the survey of their lands. Post Office, to the sale of embossed telegraph forms and to the general increase in the transactions of the Department. Rents, to rents becoming due on lands which had been sold at Tarkwa. Miscellaneous, to the payment of Royalties on the output of gold on mining

properties. Revenue from the Northern Territories, to the large increase in the caravan receipts. The decrease in the revenue from Ashanti is due to the decision not to collect further instalments of the War Indemnity.

The detailed receipts of revenue from Ashanti and the Northern Territories are set forth in Table II.

The Imperial Government paid over to the Colony during the year under review a sum of £23,000 in respect of the contribution towards the upkeep and administration of the Northern Territories. In the Comparative Yearly Statement contained in the report on the Blue Book for 1902 the revenue for that year was shown as £19,748 6*s.* 3*d.*, which was the amount to which the Colony was actually entitled. These figures have since been amended owing to the decision to show as Grants-in-aid the amounts actually paid over instead of the sums due.

Expenditure.

Table III. shows the expenditure in detail of the Colony, Ashanti, and the Northern Territories for 1903, as compared with that for 1902.

The expenditure for the year 1903 was £593,956 7*s.* 9*d.*, an increase of £46,348 14*s.* 9*d.* compared with that of 1902, and £32,280 3*s.* 6*d.* in excess of the original estimates.

The working expenses of the railway (which was taken over on the 1st July) from Sekondi to Obuassi, and thus became a new item of expenditure, absorbed £40,343 16*s.*

Another noticeable increase is that of £15,893 11*s.* 3*d.*, on account of interest on railway loans.

The Mines Survey also shows an increase of £20,319 4*s.* 1*d.* owing to the survey party having been largely increased to meet the demands made by mining companies to have their properties surveyed; this expenditure has been justified by the receipts exceeding the estimates by one-third.

The augmentation of the Medical Staff entailed an increased expenditure of £5,693 2*s.* 5*d.*, and an additional sum of £1,002 8*s.* 3*d.* has been spent on sanitation.

The Gold Coast Regiment of the West African Frontier Force, having been brought up to its full strength, shows an increase for the 1st battalion of £5,949 10*s.* 1*d.*, and, for the 2nd battalion, of £4,459 10*s.* 4*d.*

The increases in other departments are attributable generally to their having been brought up to the authorized establishments, which in some cases have been increased to meet additional demands, and to the payment of increments of salaries.

The saving in the Public Works Extraordinary was chiefly due to the decision to postpone the undertaking of certain works.

The payments made during the year on account of the Ashanti disturbances amounted to £14,624 8*s.* 5*d.* which, added to £402,580 5*s.* 2*d.* spent up to the end of 1902, makes the total expenditure on this service, up to the 31st of December, 1903, £417,204 13*s.* 7*d.*

The details of expenditure in Ashanti and the Northern Territories, under all headings of the Estimates under which such expenditure was incurred, are detailed in Table IV.

General.

The rapid progress made by the Colony within the period 1894-1903, is clearly shown in the comparative table given below; it is interesting to observe that the average revenue, which during the period 1894 to 1898 was £244,559 per annum, has risen during the period 1898-1903 to an average of £556,316. In other words, in ten years the average revenue has doubled, plus £67,198. The figures of 1900 and 1901 include a loan of £400,000 towards the cost of the Ashanti disturbances, but this may fairly be taken to represent the losses naturally caused by those disturbances to the trade of the Colony. For the same periods referred to above the expenditure shows an average increase from £310,833 to £487,267.

Comparative Statement of Revenue and Expenaiture for ten years from 1894 *to* 1903, *inclusive.*

Revenue.						Expenditure.					
Years.	Amount.				Remarks.	Years.	Amount.				Remarks.
	£	s.	d.				£	s.	d.		
1894	218,261	5	7			1894	226,931	19	4		
1895	230,075	12	10			1895	265,289	5	11		
1896	237,460	6	7			1896	282,277	15	8		
1897	233,179	1	6			1897	401,691	10	1		
1898	303,821	12	4		Includes Imperial Grant-in-aid of £45,000 on account of Northern Territories.	1898	377,975	17	1		
1899	422,795	15	10		Includes Imperial Grant-in-aid of £100,000 on account of Northern Territories.	1899	309,657	15	3		
1900	585,583	7	5		Includes £50,000 Grant-in-aid of Northern Territories and £202,300 on account of Ashanti disturbances.	1900	515,656	19	2		Includes £243,453 9*s.* 2*d.* expended on account of Ashanti disturbances.
1901	693,893	3	0		Includes £25,000 Grant-in-aid of Northern Territories and £197,700 on account of Ashanti disturbances.	1901	469,459	9	1		Includes £124,392 5*s.* 2*d.* on account of Ashanti disturbances.
1902	*501,754	9	6		Includes £10,000 Grant-in-aid of Northern Territories.	1902	547,607	13	0		Includes £34,734 10*s.* 10*d.* expended on account of Ashanti disturbances, and £24,000 Repayment of Loan.
1903	577,552	16	1		Includes £23,000 Grant-in-aid of Northern Territories.	1903	593,956	7	9		Includes £14,624 8*s.* 5*d.* expended on account of Ashanti disturbances, 1900.

* Shown in the return for 1902 at £511,502 15*s.* 9*d.*

(B.) Taxation.

There is no direct taxation in the Colony. In Ashanti and the Northern Territories, the power of levying a toll, or tax, on caravans, which was formerly vested in the chiefs, has been taken out of their hands. The administration now levies the tolls and, in return, ensures the safety of the caravan routes.

Tolls are collected at Attabubu, Mampon, and Sikassiko in Ashanti, and at Wa, Bole, Kintampo, Gambaga, Wale Wale, Salaga, and Tumu in the Northern Territories, at the following rates:—

	s.	*d.*
For each horse	5	0
For each head of cattle, except calves ...	3	0
For each calf	1	6
For each sheep, or goat	0	6
For each lamb, or kid	0	3
For each donkey	2	0
For each carrier's load of trade goods or country produce, not being grain or kola	2	0
For each donkey load of similar goods ...	4	0
For each carrier load of kola	3	0
For each donkey load of kola	3	0

(C.) Assets and Liabilities.

The excess of assets over liabilities on the 1st of January, 1903, amounted to £328,314 14*s.* 6*d.*; on the 31st of December the excess was £302,162 16*s.* 7*d.*; a difference of £26,151 17*s.* 11*d.*

This difference is accounted for in the following manner:—

	£	*s.*	*d.*	£	*s.*	*d.*
Excess on the 1st January, 1903				328,314	14	6
Expenditure, 1903	593,956	7	9			
Revenue	577,552	16	1	16,403	11	8
	16,403	11	8	311,911	2	10
Less amount deducted from Revenue of 1902 as explained above				9,748	6	3
				302,162	16	7

The surplus of £302,162 16*s.* 7*d.* was distributed as follows:—

	£	s.	d.
General Imprest Account (cash in hand)	44,813	0	11
Gold Ornaments with Crown Agents...	57	18	2
General Assets, exclusive of Advances for Railway purposes	63,362	12	0
Drafts and Remittances (remittances in transit)	13,250	5	0
Amount advanced out of accumulated Revenue over Expenditure for the construction of the Railway from Sekondi to Kumasi including expenses of Survey	210,613	15	10
	332,097	11	11

	£	s.	d.	£	s.	d.
Liabilities	47,834	9	4			
Less amounts secured by investments ...	19,899	14	0			
	29,934	15	4	29,934	15	4
				302,162	16	7

The detailed statement of assets and liabilities on the 31st December, 1903, is drawn up in Table V.

(D.) Public Debt.

The public debt of the Colony on the 31st of December, 1903, amounted to £2,252,975 5*s.* 7*d.*—exclusive of certain claims not yet finally accepted for the ordinary expenditure on troops lent for the Ashanti war by Lagos and Northern Nigeria, and expenses in connection with the employment of Imperial troops—and may be summarized as follows:—

Due to the Imperial Government—

	£	s.	d.	£	s.	d.
(1) Loan for the erection of Telegraph lines to the Northern Territories, 1897 to 1898...	29,441	10	8			
(2) Loan for Ashanti War, 1900	400,000	0	0			
				429,441	10	8

	£	s.	d.	£	s.	d.
Due to the War Office—						
(1) Ashanti Expedition, 1896	98,798	3	6			
(2) West India Regiment (Expenses 1897 to 1898)	10,051	15	2			
				108,849	18	8
Due to West African Colonies—						
(1) Sierra Leone (Ordinary expenditure of troops lent in 1900)	1,207	7	10			
(2) Southern Nigeria (Ordinary expenditure of troops lent in 1900)	3,169	0	3			
				4,376	8	1
Due to Stock-holders—						
(1) Inscribed Stock, issued in March, 1902 ...	1,035,000	0	0			
(2) Scrip against authorised loan of £665,000	63,000	5	9			
				1,098,000	5	9
Due to the Crown Agents—						
(1) Advances pending issue of the further loans for Railway purposes	612,307	2	5	612,307	2	5
				2,252,975	5	7

The loan raised by the issue of 3 per cent. Inscribed Stock is secured on the general revenues and assets of the Government. Provision is made for the liquidation of the loan by the creation of a sinking fund of 1 per cent. per annum. The principal will be repayable at par on the 1st March, 1952, the Government having the option of redemption at par on or after the 1st March, 1927, on giving six calendar months' notice.

The amount due to the Imperial Government is repayable when the financial condition of the Colony will permit.

(E.) Currency.

The Demonetization Ordinance, No. 2 of 1880, declared what coins should be legal tender in the Colony and demonetized all others then in circulation.

All gold and silver British sterling are legal tender, as are also French gold napoleons, Spanish and South American gold doubloons, and half doubloons, United States gold double eagle, eagle, half eagle, and quarter eagle.

By an Order in Council, dated the 3rd of February, 1898, bronze coins were made legal tender for an amount not exceeding one shilling. Farthings, halfpennies, and pennies have recently been circulated in the Eastern Province, and are reported to be readily taken by the natives.

Cowries are still used in the market places throughout the Colony, but there appears to be a growing desire on the part of the inhabitants for some less cumbersome medium of exchange, and it is hoped that in the near future cowries will be entirely replaced by the smaller bronze coins. 160 cowries may be taken as equivalent to 1*d.*, but the rate varies in different parts of the country.

The following statement shows the amount of gold, silver, and bronze coinage imported during the last five years:—

Years.	Gold.			Silver.			Bronze.			Total.		
	£	*s.*	*d.*	£	*s.*	*d.*	£	*s.*	*d.*	£	*s.*	*d.*
1899 ...	12,654	0	0	235,445	0	4	320	0	10	248,419	1	2
1900 ...	18,683	0	0	171,558	16	6	60	0	6	190,301	17	0
1901 ...	23,827	10	0	175,900	4	7	95	0	9	199,822	15	4
1902 ...	38,072	10	0	249,392	10	6	110	15	0	287,575	15	6
1903 ...	3,122	10	0	249,818	14	2	25	0	2	252,966	4	4

The amount of specie exported was £56,031 12*s.* 10*d.*

The Bank of British West Africa, Limited, is the only bank that does business in the Colony; it has branches at Accra, Cape Coast, Sekondi, Axim, and Tarkwa.

(F.) Municipal Bodies.

The Accra Town Council is at present the only municipal body in the Colony, but it is under contemplation to extend the provisions of the Town Councils Ordinance, 1894, to the towns of Cape Coast, Sekondi, and Axim from the 1st of January, 1905. Town Committees were instituted for sanitary purposes during the year 1902, at the three towns mentioned above, but they are consultative bodies only without power to raise or spend money.

The following is a comparative statement of revenue and expenditure of the Accra Town Council for the past five years:—

Years.	Revenue.	Expenditure.
	£ s. d.	£ s. d.
1899...	3,165 19 0	3,028 17 11
1900...	3,242 13 6	3,779 5 5
1901...	3,898 3 8*	4,155 5 3
1902...	3,532 13 3	3,200 2 9
1903...	5,216 2 9	5,215 1 2

* Includes Grant-in-aid of £1,500 by the Colonial Government.

These figures do not correspond with those given in the Annual Report for the year 1902, as certain discrepancies have since been rectified.

II.—TRADE, AGRICULTURE, AND INDUSTRIES.

(A.) Imports and Exports.

Imports.

The total value of all Imports in 1903 was £2,082,543 11*s.* 11*d.*; a decrease of £42,920 from that for 1902. This decrease is probably of no special significance, as in the short space of six years the value of imports has been almost doubled, and, as explained under the head of "(A) General Revenue and Expenditure," the trade year 1902 was abnormal.

The total values of imports of the Colony for the preceding eight years are as follows:—

Year.	Amount.
	£
1896	910,211
1897	910,540
1898	1,101,543
1899	1,323,218
1900	1,294,963
1901	1,801,027
1902	2,125,464
1903	2,082,544

The value of imports free of duty was £781,076 as against £763,825 in 1902. These values include freight, insurance, and

other expenses. The value of imports paying specific duties was £205,442 as against £209,786 in 1902; and, of imports paying *ad valorem* duties, £1,096,026 as against £1,151,853, in 1902.

Table VI. shows the value in sterling of imports and their countries of origin, for the years 1901, 1902, and 1903.

The following is a summary of the imports showing the extent to which specie and Government imports swell the total returns of the year:—

		£
Specie		252,966
Commercial Imports—		
	£	
Free	352,459	
Specific	205,442	
Ad valorem ...	1,096,027	
		1,653,928
Government Imports—		
Free	101,082	
Specific	9,436	
Ad valorem ...	65,132	
		175,650
		2,082,544

Sixty-four per cent. of the import trade was with the United Kingdom; imports from British Colonies show an increase of £39,303. Imports from Germany have risen from £106,469 in 1898 to £270,342 in 1903; since 1901 the proportion has remained at about 13 per cent. Imports from other foreign countries show an increase of £31,610. Imports from the United States have again decreased.

The chief increases are in machinery, building materials, and cordage, used in connection with the work of development on mining properties. There is a decided drop in cotton goods, provisions, specie, wearing apparel, and unenumerated articles, which must be attributed chiefly to over-importation in 1902. Provisions and wearing apparel were to a certain extent affected by the closing down of certain mines, and the decrease in the number of labourers employed on the railway, through which a number of natives were thrown out of work, with consequent inability to purchase goods.

Specie, which shows a decrease of £39,641 in 1903, is yet £47,303 in excess of the amount imported in 1901. The decrease may be accounted for as in the preceding paragraph, there being less necessity for large payments of wages.

Rum, gin, and other spirits show no appreciable differences.

In the report for 1902 special stress was laid on the fact that there was a considerable decrease in the importation of rum, the value of which was £14,088 less than in 1901; but this was probably due to an overstock at the end of 1901.

The receipts from duties on spirits, wines, &c., amounted to £253,815, out of a total revenue from Customs of £368,714.

The details of liquor imported are as follows:—

—	Value.	Quantity.
	£	Galls.
Ale, &c.	10,143	61,614
Gin...	49,119	400,191
Rum	71,742	816,877
Other Spirits	15,312	24,251
Wine	18,933	50,329
Total ...	165,249	1,353,262

or rather less than one gallon per head of the population.

Exports.

The total value of all Exports from the Colony during the year was £980,942 3*s.* 7*d.*, or an increase of £206,756 compared with 1902, and of £421,209 compared with 1901.

A reference to the statistics for the years 1896, 1897, 1898, 1899 will show that the great impetus to the export trade in rubber and kola which followed the entry into Kumasi in 1896, and subsequent pacification of the hinterland, but which received a severe check during the last Ashanti war, is again making itself felt.

The total values of Exports for the last eight years are:—

Year.	Amount.
	£
1896	792,111
1897	857,793
1898	992,998
1899	1,111,738
1900	885,446
1901	559,733
1902	774,186
1903	980,942

Table VII. gives the values of the produce and manufactures of the Colony, and British, Foreign, and other Colonial produce and manufactures for the past three years, and the countries to which they were shipped.

The values of exports to countries other than the United Kingdom, show a decided decrease from those of the previous year in consequence of the smaller output of palm oil and palm kernels, of which Germany, France, and the United States of America are large consumers. Of the decrease of £26,787 in the value of palm kernels, £24,645 less was shipped to Germany; of the decrease of £89,315 in the value of palm oil, £29,558 less was shipped to France, £5,705 less to Germany, and £4,790 less to the United States.

The exports to the United Kingdom exceeded those of the previous year by £254,680, and this is approximately the value of the export of gold; but, if the value of the gold exports, viz., £96,880, for the previous year is deducted, an increase is shown by that amount. This is due to the large increase in the value of the export of rubber (£107,898) of which the United Kingdom is the chief consumer.

The total increase in the exports for the year, as compared with 1902 amounted to £333,334, and the decrease to £126,578, leaving a nett increase of £206,756. The chief increases were: gold, £157,911; rubber, £107,898; lumber, £26,957; kola nuts, £13,086; and specie, £9,501. The chief decreases were: palm oil, £89,315; palm kernels, £26,787; cocoa, £8,694; and Guinea grain, £1,425. So that the decreased exports in palm oil, palm kernels, cocoa, and Guinea grain were more than counterbalanced by increases in the exports of rubber, lumber, and kola nuts.

Table VIII. shows the comparative values of the principal articles of export for the years 1902 and 1903, the nett increase being £206,756.

Taking the exports for the year in their relative order of value, the increased export of gold commands attention, especially when it is borne in mind that £254,791 is nearly the equivalent of the sum of the export of gold for the previous five years, and that it practically represents the output of only three mines. Hitherto £3 12*s.* per ounce has been accepted as the official rate of valuation; but if, as will be done in future years, the value is taken at the market rate, 70,775 ozs. represents a sum of £275,543.

The quantity of rubber exported was 2,258,981 lbs., valued at £196,500, or an increase of 659,007 lbs. in weight, and of £107,898 in value, over that in 1902. The rubber exported in 1903 realized an average of 1*s.* 9½*d.* per lb., while that exported in 1902 only realized 1*s.* 1¾*d.* per lb., owing to the low prices then prevailing in Europe.

This large increase in the export of so valuable an article of commerce is the more gratifying when it is remembered that in 1901, when the export was only 1,520,009 lbs., as against the record year, 1898, when it rose to 5,984,984 lbs., predictions were made of a permanent decline based on the impression that it was mainly due to the destruction of the growths by the native. It is probable, however, that the disturbed state of the hinterland in 1900-1901 was the main cause of the decrease.

The timber trade of the Colony which had for the past three years dwindled until it reached the low figure of 2,228,618 ft., valued at £21,895, in 1902, revived owing to an improvement in prices, and 7,382,684 ft., valued at £48,853 were exported.

The trade in kola nuts, which has revived since 1902, declined considerably during the Ashanti disturbance, kola being grown chiefly in that territory.

In 1903, 2,773 packages were exported, representing a value of £50,561; of this amount £46,880 was exported to Lagos, and £3,277 to Northern Nigeria. Large quantities of the nut are also carried by caravans into the Hinterland and Northern Nigeria, but at present complete returns are not available as to the quantity so carried.

Although the quantity of cocoa exported in 1903 amounted to 5,104,761 lbs., as against 5,367,405 lbs. in the previous year, its value was considerably less, the figures being, 1902, £94,944; 1903, £86,250. The decrease therefore is chiefly attributable to the lower prices obtainable.

The decrease in the export of palm oil and palm kernels is not of serious moment, as it invariably fluctuates according to the rainfall, which in 1903 was unusually small, 20 inches falling in Accra as against 30 inches during 1902.

The total values of imports and exports of the Colony for the last eight years are shown in Table IX.

Table X. shows the trade of the principal and minor ports of the Colony during the years 1902 and 1903. The relative order of importance of the principal ports with respect to the amount of Customs Revenue collected is as under:—1, Accra; 2, Cape Coast; 3, Sekondi; 4, Saltpond; 5, Ada; 6, Kwitta; 7, Axim.

It appears therefore that more than two-thirds of the revenue producing trade is confined to Cape Coast and the eastern portion of the Colony.

The sum of the duties collected at Accra, Cape Coast, Saltpond, Ada, and Kwitta were £211,353, as against £67,859 collected at Sekondi and Axim, which are the only ports of importance westward of Cape Coast.

(B.) Mines, Manufactures, and Fisheries.

The available records showing the export value of the gold industry of the Colony are continuous from 1880 to the present time; during this period, as a reference to Table XI. will show, considerable fluctuations have occurred. The value of gold exported has varied from the minimum of £22,186 in 1901, to £103,200 in 1889, until the present maximum of £254,790 was reached. It is interesting to note that the year of the great "boom" in the West African Mining Market, 1901, was also that of the smallest output of gold for twenty-one years.

As in 1902, nearly the whole output of gold was won in Ashanti by the "Ashanti Goldfields Corporation" at Obuassi, and by its subsidiary mine the "Ashanti Sansu," which together exported 63,767 ozs., valued at £229,363. The "Bibiani Goldfields," which exported its first shipment, £2,000 in value, in December, 1902, has, during the year under review, exported 6,825 ozs., valued at £24,572. The "Ankobra, Tarquah, and Abosso Development Syndicate" exported 137 ozs., valued at £493, and the "Gold Coast Exploration and Trading Company" shipped 33 ozs., valued at £120. This last includes 27 ozs. of nuggets found while prospecting in Eastern Akim. The value of 12 ozs. of trade gold dust exported was £43.

Satisfactory as is the progress shown in 1903 (the output equals the sum of the values of the five preceding years), yet there is a noticeable want of general progress, there being still only three companies which export gold in any considerable quantity.

In the Western Province of the Colony, in which the properties of most of the principal companies are situated, three companies at the end of the year had batteries working, viz.:—

The Bibiani Goldfields, Limited.

The Broomassie Gold Mining Company, Limited.

The Adjah Bippo Gold Mining Company, Limited.

The Ankobra (Tarquah and Abosso) Development Syndicate, Limited, are dredging in the Ankobra River.

Eighteen Companies were engaged on the work of development, 9 in prospecting and 2 in cutting boundaries. During the year 6 companies closed down.

In the Eastern Province, the "Goldfields of Eastern Akim" and "Pritchard's Gold Dredging Company" had, at the close of the year, transported to the Birrim River large quantities of machinery, and it is understood that active dredging work will be started early in 1904.

Eighty-one concessions were filed in the Colony in 1903, as against 788 in the preceding year, and 2,825 in 1901; 62 certificates of validity were issued as against 10 in 1902. 16 prospecting and 17 mining licenses were taken out. 153 orders for survey were made, and 10 surveyors' licenses issued.

In Ashanti development work is in progress on the following properties:—

The Edubia Syndicate, Limited.
The Akriporisu (Ashanti) Syndicate, Limited.
The Bipposu Mines, Limited.
The Consolidated Goldfields of Ashanti, Limited.
The Akrokerri (Ashanti) Mines, Limited.
The Ashanti Goldfields Auxiliary, Limited.
The Obenemassi Mines, Limited.

The work of the Offin River Gold Estate, Limited, has been confined to reef prospecting and the erection of a dredger, which was reported in December, 1903, to be ready to start work early in January, 1904.

Nine concessions were abandoned and 18 became void on account of non-payment of rent in Ashanti during the year.

Some prospecting work has been carried out in connection with concessions taken up in the Northern Territories.

The health of the Europeans employed by the various Companies in the Colony and Ashanti has been good.

The Government Railway will be open to Kumasi in April, 1904, which will assist the companies to get heavier stamps on to their properties, and considerable progress should be made during the year.

Strictly speaking there are no manufactures in the Colony, Ashanti, or the Northern Territories. A certain amount of native cotton cloth is woven by primitive methods from the produce of the indigenous plant. Salt is made in the marshes round Adda and Kwitta; along the coast line generally fish are caught and sun-dried for inland consumption.

(C.) Agricultural Industries and Botanical Stations.

The Botanic Station at Aburi continues to exercise yearly a greater influence over the natives; this is evinced by the fact that the applications for advice as to methods of cultivation, were 1,333, compared with 746 in 1902.

The establishment of a branch Botanic Station half a mile from the Tarkwa Railway Station in the Western Province of the Colony, on land 270 acres in extent, rented from the Tarkwa

and Abosso Mining Company, and the efforts made to encourage the natives to cultivate cotton, more particularly in the Eastern Province, were the chief features of progress.

Rubber.

An interest in the cultivation of rubber has been stimulated amongst the natives in the Eastern Province, where the land is reported to be admirably adapted to its cultivation, by a tour made by the Head Curator.

The soil in the neighbourhood of the North Western frontier of the Colony, has always been regarded by the native as that most adapted to rubber cultivation, but there is little doubt that as soon as the inhabitants of the Eastern Province have realized that their own country is equally suitable to the growth of rubber, it will be extensively cultivated. The native is slow to move, and likes to see the prospects of immediate gain before he will act; but, as the establishment of the cocoa industry in this district proves, time and encouragement are required.

The Head Curator has reason to believe that there are plants unknown to science from which the native obtains rubber.

Samples of Para rubber (Hevea brasiliensis) and African rubber (Funtumia Elastica) grown in the gardens at Aburi, in comparatively poor stony soil, were sent to the Government chemist at Lagos for analysis and produced highly satisfactory results. The Para rubber was reported on by English brokers, and found to be quite as good as that exported from Ceylon.

The Central American rubber (Castilloa Elastica) has not produced satisfactory results, the soil at Aburi not appearing to suit it.

In the rich low-lying lands at Tarkwa, better results are likely to be obtained from all the species, and 6,000 Para plants have already been raised there from seed obtained from Ceylon.

On the extensive plains surrounding Accra the plants Clitandra (henriquesiana?) and Carpodimus lanceolatus, new root rubbers from the Congo and Benguela might be tried, as they are reported to flourish in dry areas.

Coconuts.

The coast line of the Colony is sparsely studded with coconut plantations, the products of which are however but little exported. The plantations are not well cultivated and are much damaged by beetles.

1,000 plants put out at the experimental farm at Christiansborg in 1901 have made fair progress, but those planted in 1902 failed to grow, owing to the severe drought in the latter part of that year and early in 1903.

Cocoa.

The introduction of cocoa has been one of the most successful of the Government experiments. Until quite recently its production was practically limited to the neighbourhood of Aburi; but cultivation is now rapidly spreading in all directions and it is estimated that over 44,000 acres have been planted.

Cotton.

5,560 lbs. of seed from the Southern States of America have been distributed among the planters. The extent of land at present under cultivation does not exceed 200 acres, and the industry is still in the experimental stage. Experts report favourably upon the samples of cotton grown in the Colony. The main difficulties would appear to be the native methods, or want of methods, of culture, and the non-existence of labour-saving implements. Active steps have been taken to remedy these deficiencies; the first by the advice and practical demonstrations of the cotton expert on model farms, and the second by the introduction of light ploughs, ploughing-cattle and gins. It is satisfactory to note that many of the chiefs are taking a keen interest in cotton growing, and the Government is prepared to give them every encouragement and assistance. Small shipments of cotton from the Gold Coast have been made for some years; in 1894, 28,540 lbs., value £632, were exported. The cotton expert found flourishing cotton-fields to the west of the Volta, in the Akwapim and Krobo districts, and, in his report, states:—"That cotton, and good cotton, can be grown in the Colony there is not the least doubt"; adding that "Native cotton receiving the same care and attention as is given to cotton grown from American seed would compare favourably with the latter, and, being acclimatized, is less liable to injury, although at present its yield is smaller."

Palm Oil and Palm Kernels.

The abnormally dry season of 1903 had its inevitable effect on the production of palm oil. The output, however, is a fairly fixed quantity, averaging from over 2 million gallons in bad, to over 4 million gallons in good seasons.

Experiments were tried during the year with a patent machine for cracking the nuts, as large quantities of the kernels are wasted by the natives in the primitive methods adopted; but, though the reduction in the cost of labour in passing 2,050 lbs. through the machine worked out at 41 per cent., it was found that 19 per cent. of nuts remained unbroken, and a more effective machine is required.

Food Products.

The food products of the Gold Coast, Ashanti, and the Northern Territories (as distinguished from articles of export) comprise cassava, yams, maize, Guinea corn, peas, plantains, ochroes, peppers, onions, tomatoes, and garden eggs; mangoes, oranges, pine-apples, pawpaws, and bananas, are brought to the local markets in the large coast towns, and the cultivation of these, principally to supply the European population, is slowly but steadily increasing; the quality of the fruit, however, leaves much to be desired.

Botanical Stations.

The experimental garden at Aburi suffered somewhat from the frequent absence of the Head Curator, who, for considerable periods, was engaged in travelling and explaining to the natives proper methods of cultivation. 11,730 plants and 660 packets of seeds were sold or distributed during the year, in addition to 410 cocoa pods and 5,560 lbs. of cotton seeds. 183 new plants were added to the collection.

(D.) Lands.

There being no Crown lands in the Gold Coast, the Government is not in a position to make grants.

The value of lands varies in different localities, but fluctuates little. In Accra the average price is from 4*s.* to 10*s.* per square foot; but at Cape Coast, where the area is more restricted, it has risen to about 20*s.* per square foot. In the principal coast towns land is owned chiefly by families or individuals. Conveyance by lease or sale follows the forms of English law.

In the interior and in Ashanti, however, the permanent alienation of land (which is usually the property of the community, represented by the chief) except to the Government for public purposes, is unusual; and, when it does occur, is usually brought about by sale on mortgage. Occupancy by strangers to the tribe, for purposes of cultivation, is commonly allowed on easy terms.

Since the passing of the Concessions Ordinance of 1900 large tracts of land have been leased for long terms to European mining companies.

Up to September, 1903, 3,712 concession claims were filed in Court. These were almost all filed during 1901 and 1902. During the year under review few claims have been filed. The terms on which concessions are granted, having been practically fixed by the Court, have not varied during the

past two years. Up to September, 1903, only 77 Certificates of Validity had been issued. This was owing, not so much to the difficulty of obtaining such certificates, as to the fact that the vast majority of claimants had refrained from prosecuting their claim in the Concessions Court.

The lease of forest lands for concession purposes and the marking out of concessions by the Government Survey is leading to the settlement of many boundaries. It has also had the effect of strengthening the hands of the head chiefs, who have declined to consent to the lease of lands by sub-chiefs, unless they are compensated.

The usual terms on which a gold mining concession in the Eastern part of the Colony is leased, are, for an area of five square miles for 99 years:—

(i.) A preliminary payment of £50 (called consideration money).

(ii.) An annual rent of £12 (known as occupation rent) until mining with machinery shall have been commenced.

(iii.) A mining rent of, from £100 to £250 a year.

The usual size of a gold mining concession in other parts of the Colony is 1,000 fathoms square; the consideration money is from £50 to £100; the occupation rent £12, and mining rent £200. If the area be more than 1,000 fathoms, the Court usually requires a mining rent to be at the rate of £200 per 1,000 fathoms square.

In Ashanti the following terms are generally in force for concessions of five square miles:—

£100 consideration money.
£12 to £24 annual ground rent.
£200 to £300 mining rent.

In some cases, however, larger sums have been paid for concessions.

Little is known with regard to land tenure in the Northern Territories, which have a scant population, no big towns, and a considerable area of waste and mainly barren country.

(E.) Shipping.

There is a British weekly service of mails conveyed by the British and African Steam Navigation Company and the African Steamship Company, between the principal ports of the Colony and the United Kingdom. The voyage occupies from 15 to 16 days. Outward bound vessels proceed direct from Liverpool to Sierra Leone or Monrovia and, homewards, call at the Canary Islands, Madeira, or both. The German Mail Service (Woermann Line) is bi-monthly, and like the steamers of the Compagnie Belge Maritime du Congo, which leave Antwerp every three weeks for the Congo Free State, their

boats call at Southampton for mails and passengers on both the outward and homeward voyages. The steamers of one or two French Companies, sailing from Marseilles, call irregularly outwards and homewards at Gold Coast ports.

The total number of vessels which entered the ports of the Colony with cargo was 587, carrying crews of 26,497 and of 1,011,059 tons register. A reference to Table XII. will show the increase which has taken place since 1898.

The total number of vessels cleared was 579 with crews numbering 26,326 and a tonnage of 1,002,318.

Of the total number of vessels entered 565 were steamers and 22 sailing vessels; of the latter 15 were from the United States of America, 4 from the adjoining German Colony of Togo, 2 from Cape Verde, and 1 from Dakar. Of the 15 sailing vessels from the United States; 7 were British and 8 Foreign. Of the total number of steamers 321 were British with a tonnage of 581,164 and crews of 15,328, and 244 Foreign, with a tonnage of 421,015 and crews of 10,979.

Table XII. shows the total shipping inwards and outwards for the last six years.

III.—LEGISLATION.

30 Ordinances were enacted by the Governor with the advice and consent of the Legislative Council, during the year 1903. Of these 16 were amendments to existing Ordinances, to render their operation more effective. There were 3 amendments affecting the Criminal Code and amendments affecting the following Ordinances:—Ashanti Administration, Concessions, Customs Tariff, Kwitta Customs Tariff, Customs Tariffs, Patents, Shipping Casualties, Spirit Licenses, Stamps, Towns, Town Councils, Trade Marks, and West African Frontier Force.

The most important Ordinances enacted were as follows:—

No. 2 regulates the use of certain rivers in the Colony. It provides for licenses being obtained to dredge, to dredge for minerals and precious stones, and for steamers using such rivers; power to make rules is reserved to the Governor in Council for the purpose of improving the navigability of any river, regulating traffic, their use for the transport of floating timber, and by steam vessels.

No. 3 amends the statute law of the Colony. A revised edition of the laws being in preparation, it was necessary to repeal certain Ordinances that were obsolete, and amend others.

No. 4 provides for the publication of a collected and revised edition of the Ordinances of the Colony.

No. 5 makes better provision for the holding of inquiries and investigations in respect of shipping casualties, for dealing with wrecks and salvage.

No. 6 gives effect in the Colony to "The Foreign Marriages Order in Council, 1903."

No. 7 regulates and restricts the wearing of naval and military uniforms.

No. 27 makes provision for provincial commissioners.

No. 30 regulates the law relating to sentences of flogging and whipping.

Ashanti.

Five Ordinances were enacted by the Governor of the Gold Coast Colony in 1903 with respect to Ashanti.

No. 1 regulates the use of certain rivers in Ashanti and is practically the same as the Gold Coast Rivers Ordinance.

No. 2 further amends the "Ashanti Administration Ordinances, 1902," by adding certain Gold Coast Ordinances to those already made applicable to Ashanti.

No. 3 regulates the concession of rights with respect to land in Ashanti by natives.

No. 4 slightly amends section 26 of the Ashanti Administration Ordinances.

No. 5 amends No. 3.

Northern Territories.

There was only one Ordinance enacted by the Governor of the Gold Coast Colony in 1903 with respect to the Northern Territories of the Gold Coast, viz.:—To regulate the use of certain rivers; this based on the Rivers Ordinance of the Colony.

IV.—EDUCATION.

(A.) Primary.

Main features and number of Schools open in 1903.

There are seven Government Schools in the Colony and 117 schools conducted by the various Mission Societies, which receive annual grants-in-aid from the State. To receive a grant-in-aid a school must, after fulfilling the conditions laid down by the Board of Education, have assembled at least 300 times during the year, with an average daily attendance of not less than 20 scholars.

The following table shows the number of Government and Assisted Schools maintained in the Colony for the last six years:—

Denomination.	1898.	1899.	1900.	1901.	1902.	1903.
Basel Mission	47	60	61	61	57	55
Wesleyan Mission	54	50	55	49	43	41
Roman Catholic Mission ...	11	12	12	12	10	12
Government	6	7	7	7	7	7
Bremen Mission...	—	—	—	3	6	7
Mohammedan	—	1	2	3	1	1
African Mission Zion	—	—	1	—	—	1
Totals	118	130	138	135	124	124

The decrease in the number of Assisted Schools is probably caused by the village schools having been absorbed by the larger establishments in their proximity and is not due to a falling off in attendance, which was 473 in excess of that for the previous year.

48 certificated teachers were employed during the year, of whom 12 taught in the Government Schools.

The total number of scholars on the roll during the year 1903 was 16,326, of which Accra and Christiansborg claim 2,012, and Cape Coast, 1,637.

The following table shows the average attendance of scholars and grants-in-aid earned during the last six years:—

Year.	Government.	Assisted.	Total.	No. on Roll.	Average Attendance.	Grant-in-aid. £	s.	d.
1898 ...	7	112	119	11,181	8,369	3,432	13	1
1899 ...	7	123	130	12,240	9,239	4,129	11	5
1900 ...	7	131	138	11,996	8,911	3,679	13	1
1901 ...	7	128	135	12,018	8,616	3,706	2	7
1902 ...	7	117	124	12,136	8,938	3,875	11	5
1903 ...	7	117	124	12,803	9,411	4,647	3	3
Increase or Decrease 1903.	—	—	—	+667	+473	+771	11	10

Special grants amounting to £341 4*s.* 9*d.*, for the maintenance of buildings, furniture, apparatus, and for new buildings and enlargements were awarded during the year. The Roman Catholic Mission spent about £678 on new buildings, the Basel

Mission about £260, and the Wesleyan Mission about £58. On school equipment and repairs, the Basel Mission spent about £370, the Roman Catholic Mission about £24, and the Wesleyan Mission about £66. £395 was paid to scholars receiving industrial instruction and £874 0*s.* 6*d.* was earned in optional subjects.

The total number of non-assisted schools in the Colony, including Ashanti, is 147, and the number of scholars on the roll is 3,523. None of these schools were eligible for a grant-in-aid, the average daily attendance being below 20. They are attended only by infants and the instruction given is almost entirely in the vernacular.

The following table shows the non-assisted schools and number of scholars:—

Denomination.	Number of Schools.	Number of Scholars.
Basel Mission	78	1,263
Wesleyan Mission	54	1,649
Bremen Mission	7	154
Roman Catholic Mission	5	363
Muhammadan Mission...	3	94
Total	147	3,523

The system of examinations for appointment to Junior Clerkships in the Colonial Civil Service was initiated a few years ago with the object of securing a better class of men for the Government Service, and improving the existing method of selection. Clerks cannot be placed on the permanent establishment without passing the prescribed examination.

In the highest standard of the schools there has been an increase of over 34 per cent., which is mainly attributable to the issue of a certificate by the Education Department to every scholar who passes Standard VII., and the institution of the Civil Service Examination.

Apart from inspections by the Education Department the schools of the various Mission Societies are under the direction of ordained European or Native missionaries. Of these, each is appointed by his Society to a district, in which he exercises full authority; appointing and dismissing teachers, fixing salaries, &c. To the teachers themselves, however, falls the practical management of the schools, which are scattered far apart, and are not on that account inspected as frequently by the managers as is desirable.

The Government Schools at Accra and Cape Coast charge a fee of 3*d.* a month for pupils in the infant classes, and 6*d.* a month for those in the standards. The other Government Schools are free. There is no uniform scale of fees charged by the Assisted Schools; those inland impart instruction free. The returns for the year show that 69 schools (of which 29 are under the Wesleyan Mission) charge fees, while 55 are free. The Basel Mission upper standard boarding schools charge about 10*s.* per annum, which includes lodging. No fees are collected at the Bremen Mission Schools.

The following table shows the School Fees collected in 1901, 1902, and 1903:—

Schools.	1901.			1902.			1903.		
	£	*s.*	*d.*	£	*s.*	*d.*	£	*s.*	*d.*
Wesleyan Mission	450	6	8	398	5	4	493	15	10
Government	212	17	9	361	19	6	289	3	6
Basel Mission	115	19	9	110	14	6	133	5	3
Roman Catholic Mission ...	22	11	2	43	2	10	55	0	2
Mohammedan	—			—			2	5	6
Bremen Mission	—			—			—		
African Mission Zion ...	—			—			9	14	6
Total	801	15	4	814	2	2	983	4	9

These figures show an increase for 1903 of £169 2*s.* 7*d.*, and, taken in conjunction with the average attendance, give an average payment per scholar of 2*s.* 1*d.* as compared with 1*s.* 9*d.* for 1902. The increase in the amount of fees paid is an indication of the growing desire for education.

The eastern half of the Colony has been hitherto in a much healthier condition educationally, than the western. The development of the mining industry and the construction of the railway are becoming, however, effective in awakening the people to educational needs. Several of the chiefs on whose properties companies have been formed have agreed to subscribe ten per cent. of the income derived from their concessions to a fund to be used for the purposes of education. This fund is vested in trustees, one of whom is the Director of Education. The chiefs of Lower Wassaw, an important mining centre, are defraying the cost of a substantial school house and quarters for a European headmaster at Bensu.

The main difficulty in improving the standard of the Gold Coast assisted schools is the unsatisfactory qualifications of the teachers, due largely to the small salaries offered to them. A system of grants to training colleges and to pupils under instruction in them; also to such qualified teachers as bind

themselves to engage in educational work, was initiated in 1902, to meet this difficulty.

(B.) Secondary.

There are no assisted Secondary Schools in the Colony, and apart from the training institutions of the Basel Mission at Akropong and Abetifi, there are only three schools which attempt to give more than elementary education. These are, the higher grade Wesleyan School at Cape Coast; a private school, also at Cape Coast; and a school under a native corporation recently opened at Accra. The first of these has done excellent work in the past, but of late years has declined through lack of adequate supervision and instruction. The second is under the management of an ex-Wesleyan African Minister, and has not as yet made much progress. The third is of too recent origin to justify criticism.

The want of a good secondary school is seriously felt. There are many well-to-do people in the Colony who send their children to schools in Sierra Leone and Lagos, and even to England.

(C.) Industrial, Technical and Agricultural Schools.

Industrial instruction was given at 43 schools, which all earned grants during the year. This instruction is chiefly of an agricultural character, plantations being attached to most of the larger mission schools, where cocoa, coffee, sisal hemp, cotton, and rubber are successfully cultivated. Useful instruction can only be imparted on this subject when the teacher has some theoretical as well as practical knowledge; and, so far, this has only been possible where there are experienced European managers. The rule by which a certificate of proficiency is given to teachers who go through a prescribed course at the Government Botanical Gardens, has up to the present not borne much fruit, only one teacher succeeding in completing the course and obtaining a certificate. It has been difficult in the past to make such arrangements as would suit the convenience both of the Curator and the schools, but this has now been considerably lessened by the increase in the staff of the Botanical Department, and the opening of a station on the western side of the Colony. Prizes are offered to the scholars in attendance.

In other technical instruction a marked improvement is noticeable. The classes in woodwork at the Accra Government School are largely attended, and show good results. Similar classes are now being organized at Cape Coast. The Basel and Roman Catholic Missions teach book-binding at several

of their schools. At the Roman Catholic School at Cape Coast a printing press has been established. Straw-plaiting, basket-making, enamelling, and iron work, are taught at several mission schools with good results. The Wesleyan Mission has under contemplation the establishment of a technical school at Cape Coast, under a trained European instructor. Altogether the prospects of industrial education are more hopeful than they have been for some years. There has been, and is, much to overcome. The dislike of manual work, the facility with which clerical positions could be obtained, and the profits to be made by petty trading, have all tended to discourage handicraft. Conditions are now somewhat more favourable; labourers are better paid, and a skilled artizan commands a high wage.

V.—GOVERNMENT INSTITUTIONS.

(A.) Hospitals.

There are excellent hospitals at Accra, Cape Coast, and Sekondi. The last was built by the railway construction department, and handed over to the Government on the 1st July, 1903. At all three Hospitals European Nursing Sisters are in attendance, the number of wards and beds being as under:—

—	European Wards.	Beds.	Native Wards.	Beds.
Accra	3	7	4	26
Cape Coast	3	6	2	27
Sekondi	2	11	3	14

There are also smaller hospitals at Axim, Elmina, Ada, Kwitta, and Kumassi, and dispensaries at Tarkwa, Saltpond, and Akuse. There is a substantial stone building at Accra for the treatment of contagious diseases, and one is being erected at Cape Coast.

The number of in-patients treated during the year at the various hospitals was 2,255, as compared with 1,350 in 1902.

(B.) Asylum.

There is one lunatic asylum in the Colony, at Accra. 30 males and 4 females were admitted during the year; 61 were old patients, making a total of 95. Of these, 4 were cured, 10 relieved and given into the charge of their friends, 9 died, and 1 escaped.

(C.) Poor Houses; and (D.) Reformatories.

There are no poor houses or reformatories in the Colony, and it speaks well for the inhabitants that poverty, in the strict sense of the word, does not exist amongst them. Within the last three years, however, several Europeans, either attracted by the possibility of obtaining work on the mines, or, in some cases, brought to the Colony by mining companies and subsequently dismissed, have become a charge on the Government, which, in many instances, has paid the cost of their passage to Europe. Legislation on the subject is under consideration.

(E.) Savings Bank.

The deposits during the year, including interest, amounted to £6,345 18*s.* 3*d.*, and were in excess of the deposits in 1902 by £2,115 17*s.*

The withdrawals for the same period amounted to £5,876 18*s.* 10*d.*, being less than the deposits by £468 19*s.* 5*d.*, and, as compared with the withdrawals in 1902, showed an increase of £2,506 16*s.* 8*d.*

The interest on deposits during the year amounted to £122 10*s.* 2*d.* A further sum of £800 was transferred for investment by the Crown Agents, which, with the previous amount of £4,099 14*s.* already invested, and a sum of £889 6*s.* 9*d.* in the hands of the Treasurer, makes the total assets of the Savings Bank £5,789 0*s.* 9*d.*

The increase in the deposits is in a great measure due to the opening of a branch of the Savings Bank at Kumassi, thus enabling the men of the 1st Battalion Gold Coast Regiment to avail themselves of its privileges, which have been thoroughly appreciated.

It is proposed shortly to open a branch at Gambaga in the Northern Territories, to enable the men of the 2nd Battalion to enjoy equally the advantages of this institution.

It is contemplated in the near future to transfer the control of the Savings Bank from the Treasury to the Post Office Department, where it would undoubtedly be worked under much more favourable conditions, as the general public are in closer and more frequent touch with the District Post Offices than with the Treasury.

VI.—JUDICIAL STATISTICS.

(A.) Police.

The total strength of the Police force for the year under review was 589 of all ranks. Of these 429 were general police, 78 escort police, 50 mines police, and 32 railway police. They are officered by Europeans and West Indian Superintendents. The men are mainly recruited from natives of the Colony, but a considerable number are obtained from Lagos and Sierra Leone. The police are armed with Martini-Henry carbines.

The detective branch of the force, which was organized in 1902 with a staff of 14 non-commissioned officers and men, has done useful work.

The total number of offences reported to the police and magistrates for the year was 6,721. They consisted chiefly of offences against the person and property.

(B.) Prisons.

At Accra, Cape Coast, and Elmina there are large prisons to which long-sentence prisoners are sent, and there are nine lock-ups at out-stations in which prisoners undergo sentences up to six months, exclusive of prisons in Ashanti and the Northern Territories.

Improvements in the prison system are in contemplation and partial provision has been made in 1904 for the erection of a central prison at Sekondi. A European gaoler will shortly be appointed to each of the central prisons at Accra, Elmina, and Cape Coast.

The estimated gross value of prison labour was £7,819 5*s.* 7*d.*, and the cost of the department was £11,520 5*s.* 8*d.* The amount realized from the sale of work executed by prison industry was £267 14*s.* 7*d.* This was considerably less than that realized during the previous year, owing to the decision to abolish prison industrial work for the public from the 2nd of July.

The number of persons confined in the prisons of the Colony during the year was 3,171, composed of 2,997 men, 142 women, and 32 juvenile offenders.

(C.) Criminal Statistics.

The following table shows the number of offences, apprehensions, convictions, and acquittals, including Ashanti and the Northern Territories, for the last four years:—

Number of Offences, Apprehensions, Convictions and Acquittals.

—	1900.	1901.	1902.	1903
The number of offences reported to the Police	5,220	5,921	7,047	6,721
The number of persons apprehended by the Police or summoned before the Magistrates.	5,158	5,829	7,260	6,721
The number of Summary Convictions—				
1. For offences against the person ...	574	540	739	795
2. For praedial larceny	—	—	—	5
3. For offences against property, other than praedial larceny.	493	551	855	1,100
4. For other offences	2,578	2,836	3,805	5,073
5. For slave dealing...	3	13	4	12
The number of convictions in the Superior Courts—				
1. For offences against the person ...	53	24	27	29
2. For slave dealing...	—	—	—	—
3. For offences against property, other than praedial larceny.	27	20	15	54
4. For other offences	55	14	34	42
The number of persons acquitted—				
1. In the Inferior Courts	1,282	1,397	1,688	1,922
2. In the Superior Courts	44	39	27	56

VII.—VITAL STATISTICS.

(A.) Population.

The population of the Gold Coast, Ashanti, and the Northern Territories, which was stated in the last census, 1901, to be 1,486,433 can only be considered as approximately correct.

(B.) Public Health.

The general health of the population of the Colony and Protectorates during the year was exceptionally good; in fact it may be looked upon as a record year. Fevers, due to malaria, were the most prevalent diseases. The greatest amount of sickness occurred during the rainy season, especially at the beginning and the end. The temperature throughout the year was low and fairly equable. The rainfall in the greater part of the Colony was below the average. Small-pox showed a very marked diminution.

Health of the European Community.

The health of the Europeans in the Colony, Ashanti, and the Northern Territories shows a great improvement over the record of any former year; the following is a tabulated return:—

How Employed.	Number.	Deaths.	Invalided.	Death rate per 1,000	Invaliding rate per 1,000.
Officials	326	5	25	15·33	76·68
Mercantile Firms, &c.	335	12	18	35·82	53·73
Mining Companies	1,043	20	92	19·17	88·20
Missions	92	2	2	21·73	21·73
Total ...	1,796	39	137	21·71	76·28

The corresponding figures for 1902 were:—

Number.	Deaths.	Invalided.	Death rate per 1,000.	Invaliding rate per 1,000.
1,830	57	181	31·14	98·90

The death rate amongst officials has been remarkably low, even less than the return shows, as the deaths from disease were only 4, the other death having been due to accidental drowning through the upsetting of a surf boat. As usual, by far the greatest mortality is amongst the mercantile community, and is undoubtedly due in part to the long period they are obliged to serve on the Coast, and partly to the fact that in most places they live in, or in close proximity to, the native parts of the towns, and are thus more exposed to malarial infection by mosquitoes.

It is most important that mercantile firms and others should cause the residences of their European employes to be removed as far as possible from native habitations. That segregation is of the greatest efficacy in preventing the spread of malaria is now generally admitted; it has been carried out on the part of the Government by building bungalow residences for European officials in nearly every station in the Colony, and the remarkable fall in the death rate during recent years speaks for itself.

The return of the European non-official population, deaths and invaliding, though fairly accurate, is not quite complete, as certain companies failed to send in returns, and some of the mines have been shut down. The figures may be looked upon,

however, as very satisfactory; but it is too much to hope that such a very low death rate will be maintained in all future years.

Health of the Native Population.

The health of the native population also shows a considerable improvement. The principal diseases treated were, malarial fevers, diseases of the skin, ulcers, yaws, diseases of the intestines and respiratory organs. There were some isolated outbreaks of small-pox, chiefly in bush villages, but the ravages caused by this disease are yearly becoming less. Vaccination was systematically carried out.

(C.) Sanitation.

During the year under review, great improvements in the sanitation of many of the principal towns of the Colony have been carried out; more especially in the cases of Cape Coast and Sekondi. The resistance to sanitary regulations on the part of the native population in some districts still continues, but not to so great an extent as during the previous year.

(D.) Climate.

The rainfall throughout the Colony has been below the average; and, during the greater part of the year, a low and equable temperature prevailed, which, to some extent, may account for the general good health.

The following table gives the mean meteorological observations taken at Accra, Aburi, Cape Coast, Axim, Kwitta, Kumasi, and Gambaga during the year 1903:—

Name of Station.	Temperature.						Rainfall.	
	Solar maximum.	Minimum on grass.	Shade maximum.	Shade minimum.	Range.	Mean.	Amount in inches.	Degree of humidity.
Accra	144·94	67·86	84·13	68·87	15·76	76·04	20·04	78·22
Aburi	123·98	72·32	81·53	81·00	9·95	76·35	35·81	82·24
Cape Coast	120·87	72·74	84·33	80·97	11·36	78·49	30·00	79·68
Axim	126·21	70·37	85·71	75·01	10·25	80·52	63·22	87·81
Kwitta	138·87	73·93	86·54	75·85	11·66	80·74	14·91	76·69
Kumasi	148·73	47·66	82·21	69·04	15·92	75·17	40·46	84·83
Gambaga	144·11	66·56	87·19	72·23	21·60	79·79	43·03	63·68

VIII.—POSTAL, TELEGRAPH, AND TELEPHONE SERVICES.

The revenue of the department for the year amounted to £22,720 4*s.*, exclusive of the receipts of £9,582 6*s.* 4*d.*, on account of the sales of judicial stamps; and the sum of £7,709 8*s.* 5*d.*, collected on behalf of the African Direct Telegraph Company.

Sale of Stamps.

There has been a considerable decrease in the value of stamps sold. The figures for 1902 and 1903 respectively are:—

—	1902.			1903.		
	£	*s.*	*d.*	£	*s.*	*d.*
(*a*) Postage Stamps (for Postal and Legal purposes).	13,223	18	11	8,468	5	2
(*b*) Postage Stamps (for Telegraphic purposes).	15,408	6	6	11,671	19	7
(*c*) Judicial Stamps	11,352	7	6	9,582	6	4

The falling off in (*a*) and (*c*) is, however, not due to any decrease in postal business, but to a decline in connection with the stamps used for legal and revenue purposes. Of the decrease of £3,736 6*s.* 11*d.* shown under (*b*), £3,025 16*s.* 2*d.* is accounted for by a falling-off in the receipts on cablegrams, and £710 10*s.* 9*d.* by a reduction in the receipts on account of Colonial telegrams.

The expenditure for the year amounted to £21,623 3*s.* as compared with £21,953 11*s.* 11*d.* in 1902.

There has been a slight falling off in the correspondence received in the Colony, but an increase in the mail matter despatched. 3,749,982 ordinary letters, postcards, newspapers, and book and sample packets, were received and despatched, as compared with 3,701,367 the previous year.

A large increase has again to be recorded in the registered correspondence, 125,954 registered articles having been despatched, and 91,364 received, as against 102,301 forwarded, and 63,578 received during 1902.

In the last three years the parcel post traffic has nearly quadrupled; an increase of 60 per cent. was recorded in 1901, and 76 per cent. in 1902; there has been a further increase of 32 per cent. in 1903. Of the total number of parcels dealt with, 1,784 were insured by the senders.

New Money Order Offices were opened during the year at Akuse, Dixcove, and Elmina. There is now a Money Order Office at the headquarters of each District, with the exception of Prampram, as well as at Kumasi and Obuassi in Ashanti. In 1902 Money Orders to the value of £42,410 7*s.* 3*d.* were issued; in 1903 the value was £48,953 12*s.* 11*d.*, an increase of over 15 per cent. The value of money orders issued in the United Kingdom and elsewhere, and payable in the Colony, was £4,593 8*s.* 4*d.*

The value of Inland Postal Orders sold was £4,963 18*s.* 7*d.*, as compared with £3,725 19*s.* 4*d.* in 1902; an increase of 33 per cent.

The system of insurance of valuable letters was introduced into the Gold Coast Colony on the 1st July, 1903.

The total number of telegrams dealt with was 276,681, as compared with 259,169 in 1902. Official telegrams numbered 136,822, their estimated value being £5,820.

The number of cablegrams originating in the Colony for the United Kingdom and elsewhere was 3,767, as compared with 4,996 in 1902. The Government derived a revenue of £255 15*s.* 6*d.* from these cablegrams, as against £363 0*s.* 9*d.* for the previous year; while the African Direct Telegraph Company's share amounted to £7,709 8*s.* 5*d.*, as against £10,735 4*s.* 7*d.* in 1902. 3,016 cablegrams were received, upon which the Colony's share was £212 1*s.* 3*d.*

In 1902 a marked decrease in the cablegram traffic had to be recorded, and there is a further decrease in 1903. But the large increase in this traffic in 1901 and 1902 was owing to the gold-mining boom. It is satisfactory to note that, in spite of the falling off from these two years, the receipts on account of cablegrams are more than 52 per cent. over those of 1900.

The work of construction and maintenance during the year was chiefly devoted to improving the existing system. A new line is in course of construction along the railway from Sekondi to Kumasi, and has been completed to within a few miles of the latter station. Offices have been opened at Beyin and Half Assinie. The line between Dixcove and Axim has been duplicated. A new line between Aburi and Kpong is almost completed, which will complete a circuit from Accra to Adda.

The new telegraph line from Axim to the boundary of the French Ivory Coast having been completed in December, 1902, communication was opened with Grand Bassam and intermediate offices on the 1st January, 1903. The traffic over this line has been considerable.

Telephone exchanges connect all the Government Offices, and some of the leading business houses at Accra and Cape Coast. An exchange is being established at Sekondi.

IX.—MILITARY FORCES AND EXPENDITURE.

(A.) Regular Forces.

The strength of the Gold Coast Regiment of the West African Frontier Force on the 31st December, 1903, was 61 officers, 12 European non-commissioned officers, and 2,102 rank and file (natives).

The 1st battalion and a battery are stationed in Ashanti, with headquarters at Kumasi, and detachments at Accra and Cape Coast in the Colony.

The 2nd battalion and a battery are stationed in the Northern Territories, with headquarters at Gambaga. A body of mounted infantry, recruited from local levies, is attached to the latter battalion.

The expenditure incurred in the up-keep of this force in 1903 was £90,171. The number of companies in the 1st battalion is to be reduced from nine to eight on the 1st January, 1904, which should effect an annual saving of £6,373.

(B.) Militia.

There is no Militia Force in the Colony, Ashanti, or Northern Territories.

(C.) Volunteers.

The Gold Coast Volunteers, which were raised in 1892, had, at the end of 1903, a total strength of 282 of all ranks; an increase of 23 compared with December, 1902. The sanctioned establishment is 414.

In January, 1903, a European machine gun section was raised at Axim in addition to those already formed at Accra and Cape Coast. The total strength of the three machine gun sections is 94. The volunteers are armed with the Martini-Enfield carbine and '88 pattern sword-bayonets. £803 0*s.* 10*d.* was expended on the force during 1903.

(D.) Preventive Service.

This service, which is a branch of the Customs Department, is stationed along the eastern and western frontiers of the Colony.

The River Volta preventive service extends from Adda to Burai in the Northern Territories, just north of the eighth parallel, and consists of 28 stations. The western frontier of the preventive service extends from Half Assinie to Debisu, within five miles of the boundary of Ashanti, and consists of 25 stations.

The amount of powder seized during the year was considerably less than during the previous year; and from the increase in the trade of Adda it would appear that smuggling across the Volta is diminishing.

Occasional patrols are sent north of Debisu along the Ashanti frontier by the preventive service; but the prevention of smuggling into Ashanti from the Ivory Coast, rests with the Ashanti Administration; as does the prevention of smuggling into the Northern Territories from Togo, by the Northern Territories Administration.

The expenditure on these services in 1903 was £14,845 19*s*. 10*d*

GENERAL OBSERVATIONS.

Important Events.

A most important event in the history of the Colony was recorded on the 1st of July when the Government Railway from Sekondi to Obuassi, was taken over from the Construction Department. The first train, run by the Construction Department, entered Kumasi on the 1st of October.

Telegraphic communication with the Ivory Coast was opened on the 1st January, 1903.

Ashanti.

The year 1903 was uneventful in Ashanti. Many Ashantis who had left their villages and settled in the Colony during the disturbances in 1900-1901, returned to their own districts; the population is settling down and becoming more prosperous.

The Governor visited Kumasi in March and received the Kings and Chiefs, when various tribal matters in dispute were amicably settled. While evincing a not unnatural desire to get back some of their former power, no feeling of resentment is shown against the present administration.

The War Indemnity Tax, which was reduced by one half in the preceding year, was abolished after the tax for 1902 had been collected. The first train on the Government Railway, run by the Construction Department, reached Kumasi on the 1st of October. The advent of the line is likely to have a great civilizing effect.

Some of the European firms established on the Coast are engaged in opening branch stores at Kumasi. The cultivation of cocoa is receiving encouragement, and the rubber trade shows very satisfactory signs of improvement.

Northern Territories.

The Protectorate has, with the exception referred to below, been thoroughly quiet during the past year; our relations with both the French and German officials in the neighbouring territories have been most cordial. The only districts in which some unrest still prevails are those inhabited by the Lobis, Dagartis, and the Fra Fras.

In December a small expedition under Captain Berthon made a tour through Grunshi, Dagarti, and Lobi-Dagarti. The tour was intended to be of a peaceful nature, but in Lobi-Dagarti, where the party was attacked by some of the wilder tribes, it was found necessary to repel the assailants by force, and to punish them by the infliction of a fine in cattle.

The revenue of the Northern Territories shows an increase of £1,695 over that for 1902. No prospecting licenses, fees, or rights of option were taken out during the year. The establishment of a trading post at the important market of Salaga has led to a considerable increase in the caravan tax revenue, £3,083 having been collected at that station. Samples of native cotton grown at Dagomba have been very favourably reported on at Liverpool. Samples have also been sent from Salaga for analysis and report.

A considerable reduction was made during the year in the cost of transport. In previous years the approximate cost of transport of stores conveyed to the Northern Territories *viâ* Cape Coast, Kumasi, and Kintampo, was £100 per ton. In 1903, owing to the introduction of the Volta River Transport Service, *viâ* Yeji, the cost was reduced to about £40 per ton.

A permanent road, 16 ft. wide, between Gambaga and Salaga, *viâ* Patenga and Khobia (150 miles) has been completed by local labour. The mails sent by this route, which are carried by a soldier on a bicycle from Salaga to Gambaga, now reach the latter station (headquarters) six days earlier than when they were forwarded *viâ* Kumasi-Kintampo-Daboya.

State of Railways and Roads.

Railways.

The construction of the Government Railway was commenced at Sekondi in August, 1898, the first rail being laid in December of that year. During 1900 and the early part of 1901, construction was interrupted by the Ashanti disturbances, which practically put a stop to the importation of labour. Thus it was not until May, 1901, that the first section, Sekondi-Tarkwa (40 miles), was completed. From that time, however, better progress was made and the Tarkwa-Obuassi

section was finished in December, 1902, Kumasi, the present terminus, being reached in October, 1903. The average rate of construction in miles per month was:—

—	Miles.	Time—Months.	Average Mile Rate per Month.
Sekondi-Tarkwa	39	33	1·2
Tarkwa-Obuassi	85	17	5·0
Obuassi-Kumasi	44	7	6·3

The Sekondi-Obuassi section, 124 miles, was taken over by Government from the Construction Department in July, 1903; the Obuassi-Kumasi section is to be taken over on the 1st of April, 1904.*

Cost of Construction.

In West Africa, the clearing of dense forests; the unhealthiness of the climate, necessitating short terms of residence in the country; the heavy rainfall; the scarcity and poor quality of labour; landing difficulties; and the necessity of working from a single base, prevent rapid progress; and, in consequence, increase the cost of construction, which, on the Gold Coast, was further enhanced by the scarcity of ballast.

The amount expended on construction up to the 31st of December, 1903, was £1,796,203 1*s.* 8*d.*, or, approximately, £10,700 a mile which included the cost of permanent bridges, offices, quarters for staff, hospital, rolling stock, and landing jetties at Sekondi.

Funds were raised for construction mainly by the issue of Inscribed Stock; partly by advances made by the Crown Agents for the Colonies against scrip of an unissued Gold Coast loan, and partly by advances made by the Colony. (Detailed figures are to be found in Table XIII.)

It is not yet possible to give exact figures of the total cost of construction, but it may be put down approximately at £1,820,000.

Description.

The length of the line Sekondi-Kumasi is 168 miles, the gauge 3 ft. 6 in., the permanent way laid with 50-lb. steel rails on steel trough sleepers. The heaviest type of locomotive used, including tender, weighs 60·5 tons. The steepest grade is over the Adjah Bippo rise between the 45th and 49th mile, where it is 1 in 46 on both sides. The total number of changes of grade, below 1 in 100, is 400.

The total number of curves is 690; and there are 157 curves with a radius of 5 chains.

* This has since been done.

Rolling Stock.

The rolling stock consists of 16 locomotives of four different classes; 18 40 ft. carriages; 15 covered and 130 open trucks; 12 covered four-wheeled goods stock, and 36 ballast trucks.

Rates.

Prior to the section Sekondi-Kumasi having been taken over by the Government, a uniform rate of 2*s.* per ton mile was charged by the Construction Department, with special rates for rice, timber, coal, and a few other articles. By an agreement made with the Ashanti Goldfields Corporation, Limited, in 1897, the Government undertake not to lower (excepting by special arrangement) the average rate per ton per mile beyond 1*s.* 6*d.* in the up, and 1*s.* in the down direction: or an average minimum of 1*s.* 3*d.* The principal commodities carried by the railway from 1st July to 31st of December (during which period the line was partially closed for a fortnight owing to an accident in July), with the tons carried and amount earned, are shown below:—

Articles.	Tons.	£
1. Building materials	628	5,937
2. Provisions	861	5,287
3. Timber	1,496	4,455
4. Hardware	396	3,468
5. Machinery	462	3,392
6. Castings (not machinery)	291	2,672
7. Rice	911	2,634
8. Galvanized iron (sheets)	337	1,652
9. Cement	531	1,638

The amount of country produce (chiefly food-stuffs) conveyed, was 603 tons, on which the amount of freight earned was £950. The cranage charges on goods landed at the Sekondi jetties were, on the 1st of July, at the rate of 1*s.* 6*d.* per ton lifted. On the 1st of October the charges were altered to a time rate of £1 per hour for steam cranes and gantries, and 10*s.* per hour for manual cranes; subject to a minimum charge as for 5 hours. The cranage earnings amounted to £882, and the actual cost of working, without allowing for depreciation, interest, &c. was £632. The cranage charges are to be reduced, as a tentative measure, from the 1st of January, 1904, to 7*s.* 6*d.* per hour, with a working minimum of 3 hours.

Traffic (Distribution).

The number of passengers and earnings from public traffic at each station are shown in Table XIV. It will be seen that the greatest number of bookings were at Tarkwa, and that the

largest amount was earned at Sekondi. 72 per cent. of the passengers were booked to or from stations between Sekondi and Abosso (45 miles).

Particulars as to the goods traffic are given in Table XV., from which it will be observed that the bulk of the traffic was conveyed out of Sekondi to Tarkwa, Abosso, Huni Valley, Dunkwa, and Obuassi. The most noticeable fact in connection with the goods traffic is that 98 per cent. is in the up direction. Efforts are being made to develop the downward traffic by carrying export produce, such as rubber and cocoa, at low rates. The rate for firewood has also been largely reduced.

Revenue and Expenditure.

The results of the working for the half year during which the railway has been taken over by the Government are as under:—

	£
Earnings	65,965
Expenditure	47,425
Nett Earnings	18,540

the percentage of working expenses to earnings being 71·69 per cent.

Earnings were derived under the following heads:—

Head of Receipt.	Amount.	Percentage on total.
	£	
Coaching Traffic	12,173	18·45
Goods Traffic	53,188	80·63
Electric Telegraph	140 }	·92
Sundries	— }	
	65,965	100·00

Expenditure was incurred as under:—

Head of Expenditure.	Amount.	Percentage on receipts.
	£	
Maintenance of Ways, Works and Stations.	18,849	28·57
Locomotive Carriages and Wagons ...	16 989	25·75
Traffic	4,204	6·37
General charges	5,361	8·13
Harbour Department	551	·84
Special and Miscellaneous	1,491	2·23
	47,425	71·69

The actual expenditure exceeded the estimate by £2,283; but this was more than covered by a surplus of actual over estimated receipts of £6,964.

Roads.

The construction of new roads, on a definite scheme, inaugurated in 1901, has been productive of good results; up-keep, however, is a difficult matter, owing to the heavy floods which occur during the rainy season. The swampy nature of much of the ground in forest country renders progress slow; European supervision is essential where work is in progress.

An important road, 18 feet wide, from Accra northward in the direction of Kibbi in Eastern Akim, was practically reconstructed under contract, and completed as far as Sansami, a distance of 21½ miles, in 1902; it was carried on to Apedwa, a further distance of 25½ miles, during the year. From Apedwa to Osino, a distance of 28½ miles in length, the road has been partly formed for 12 miles.

The 12 foot vehicle road from Saltpond to Insuaim on the river Prah has been completed for 17¾ miles, notwithstanding heavy floods and rains which necessitated the making of large embankments, many bridges and culverts.

The 12 foot road constructed for the transport of produce from Winneba to Swaidru, a distance of 12⅔ miles, will shortly be placed under the Roads Ordinance, and kept cleared by the Chiefs.

In the Annual Report for 1902 it was stated that a new trace of a road to Aimensa, from whence the roads to Aimensa and Dodowa bifurcate, had been made, to avoid steep gradients. This road has now been constructed, and is suitable for motor and other vehicular traffic.

The road from Tarkwa to the Fanti Mines, constructed by the Mining Companies, has been taken over by the Government and reconstructed; it will be continued to Chida, *viâ* Adja Bippo.

There are, in addition to the roads maintained by the Public Works Department, many native paths which are kept clean by the local chiefs, for which service they receive quarterly payments of 10*s.* per mile.

The scheme by which the river Volta was utilized for purposes of transport to the Northern Territories came into force in December, 1902; though useful as a temporary measure, the necessity for its continuance has disappeared with the completion of the railway to Kumasi.

Immigration and Emigration.

There are no records available with regard to the extent of immigration to the Gold Coast. There was practically no emigration during the year.

Public Works.

Good progress has been made with the plans begun in the preceding year to improve the town of Sekondi. The principal streets of the town, 40 to 50 feet wide, have been completed and properly formed with gravelled surfaces and concrete side drains. The sites of the two native towns have been relaid, and buildings are being brought into line; ample provision has been made for ventilation; roads and drains are under construction. The Customs warehouse and bonded store were completed.

The chief improvements in the town of Tarkwa consisted of forming and gravelling the main road, where heavy embankments, cuttings, and culverts were necessary; the construction of the road to the native town was commenced, where additional streets have been formed, and plots laid out.

At Cape Coast the work of re-forming certain streets and roads, making concrete drains, and constructing a new road to the Contagious Diseases Hospital was carried out. The Victoria Park was laid out and fenced, and boundary pillars erected on Government property. The buildings intended for a Contagious Diseases Hospital and the Supreme Court were completed.

At Accra the Church and Victoria Memorial Tower have now been completed, and are both excellent buildings. The total cost of the Queen Victoria Memorial Tower, including the clock, was £1,717 1*s.* 7*d.*, of which sum £1,017 1*s.* 7*d.* was privately subscribed, the remaining £700 being given by the Government. The work of reconverting Christiansborg Castle into the Governor's residence, and the necessary structural alterations to convert the former Government House into the Supreme Court, Law Offices, and quarters for the Chief Registrar, were carried out. The further investigation of the Accra water supply scheme was proceeded with.

At Kumasi several sets of new quarters have been erected for the housing of officials and servants; a Court House and quarters for the Cantonment Magistrate were completed.

Mine Surveys.

The staff in 1903 consisted of the Director and Assistant Director of Surveys, eleven Surveyors, nineteen Assistant Surveyors, and six Non-Commissioned Officers and Sappers of the Royal Engineers. Of the above staff, five parties were engaged on traverse work, and six parties on boundary cutting.

During the year 118 boundaries were cut, for which £19,656 was received in fees; in addition to the above, the work of cutting the boundaries on 27 other properties was well in hand,

For the season 1902-03, 524 miles of traverse work were completed and a large number of plans of properties finished and transmitted to the various Companies concerned.

Changes in the Establishment, &c.

On the 8th of September His Majesty was graciously pleased to approve of the appointment of the Governor, Major Sir Matthew Nathan, K.C.M.G., R.E., as Governor of Hong Kong; and of John Pickersgill Rodger, Esquire, C.M.G., British Resident, Perak, as Governor of the Gold Coast.

The Governor, Sir M. Nathan, made a long tour through Ashanti and the Northern Territories, leaving Accra on the 18th of February, and returning on the 10th of May. During the absence of the Governor, Mr. C. H. Hunter, Chief Assistant Colonial Secretary, acted as Deputy-Governor.

Captain L. R. S. Arthur, C.M.G., Colonial Secretary, resigned on the 27th of September to take up the appointment of Secretary to the Governor-General of the Australian Commonwealth. He died on the 13th of December.

Suitability of Climate for Europeans, and Openings for White Labour.

Europeans of sound constitution, who practise habits of moderation, generally suffer little from the effects of a not too prolonged residence in the Colony. The openings for white labour are few. Europeans employed at the mines and by mercantile firms are appointed in England, and it is useless for men to come to the Colony on the chance of obtaining employment.

Rates of Wages and Cost of Living.

The rates of wages are high, but the cost of living has increased considerably in recent years; this is specially felt in the Western Province of the Colony, the main site of the mining industry. The prices of beef, mutton, poultry, and eggs, &c. have more than doubled within the last few years, and in some districts fresh meat is very difficult to obtain. An increase has also occurred in the price of native foodstuffs; this is probably due to the numbers of natives who have abandoned farming for the more lucrative forms of labour on the mines. Food is fairly plentiful and cheap in Ashanti, and also in the more sparsely populated Northern Territories.

In Accra and the Eastern Province the wages of domestic servants range from £1 to £2 10*s*., and of cooks from £2 to £4

per month; at Accra and Cape Coast the hotel charges are 10*s.* a day; and at Sekondi 20*s.* a day.

The rate of pay given by the Government for carriers is 1*s.* a day and 3*d.* as subsistence; short journeys to and from the principal coast towns are at a fixed rate. Contractors at Accra and Cape Coast supply the Government with carriers and are paid 1*s.* per head for doing so. Carpenters and masons can earn 1*s.* 6*d.* to 3*s.* a day; bricklayers, 1*s.* 6*d.* to 2*s.* 9*d.*; coopers and painters, 1*s.* to 1*s.* 9*d.* a day.

The rates of wages paid to native miners vary from 1*s.* 3*d.* to 1*s.* 6*d.* a day for surface; and 1*s.* 9*d.* to 2*s.* for underground work. The Government Transport Department has done much useful work in organizing and regulating the employment of and prices paid for labour, particularly on the mines in the Western Province. A large number of labourers have been supplied to the mines during the year. The mines about Tarkwa have required the most assistance; isolated mines are usually able to draw on a sufficiency of local labour.

The labourers sent to the mines by the transport department are hired on contract for six months or a year, and, with the exception of occasional advances, do not draw their pay until their contract is completed. Labourers receive subsistence, whether they work or not, until their contract is finished; but mine managers who do not know the country, seldom appear to realize that their labourers, being drawn from numerous tribes, do not sympathise with each other, and consequently are dependent on their ration money for the means to purchase food.

While there is no doubt as to there being a sufficiency of labour on the Gold Coast, supplemented as it is at present from other Colonies, complaints are made as to its quality. The value of a gang of labourers varies with the ability of the European in charge. One overseer will condemn as worthless a gang out of which another will get excellent results. Under efficient supervision, or working on a fair system of daily task work, it is probable that the day's work performed will, for the expenditure, compare favourably with that of unskilled labour in other West African Colonies.

The comparative value and uses of the various tribes usually employed on the mines may be thus briefly described. The clerks are usually Fantis, from the coast towns, where they have been taught at the Government or mission schools. Artisans are mostly from Accra, who have been trained at the schools of the Basel mission.

Underground miners are difficult to obtain. Basas from the Liberian Coast are most in demand, as they are said to take more readily to drill and hammer work than any others; their

numbers in their own country, however, or, at any rate, such as are willing to leave it, are small. Kroomen from the same country come next in value.

The difficulty, on account of this deficiency, is to find local substitutes, and this applies to surfacemen also. The Krepis are most in demand; practically every mine mainly depends on Krepis for surface work, and a few are employed underground. Fantis and the various kindred tribes have not proved to be suitable. Appolonians will work underground to a certain extent, as they have mining traditions dating from Portuguese times. Yorubas, and others from Lagos, will not work underground at all. The Northern Territories tribes, *e.g.*, Wangaras, Moshis, Grunshis, &c., will not, at present, readily take to any form of labour excepting that of carrying loads. As the carrying industry must decline in competition with the railway, these tribes will be obliged to take to other work, and, being strong men, may prove good material. The labourers who come from other Colonies are chiefly Mendis and Timmanis from the Sierra Leone Protectorate, and Veis from the hinterland of Liberia. These last, though small men, are generally more strongly built than the natives of the Gold Coast Colony, and take readily to underground work.

A twenty per cent. reduction of wages has been effected in the Tarkwa district for surface men; the Government rate will be reduced in 1904 for permanent carriers from 30*s.* a month to 25*s.* a month, with 3*d.* a day subsistence in each case. It is not anticipated that a reduction in the rate of wages will tend to reduce the supply of labour. A native usually goes on working till he has obtained a definite sum of money with which to return to his country. This is partially spent in the coast towns on cloths and various other things; for he dislikes returning home empty handed.

General Conditions.

The year under review witnessed much steady progress. It was impossible to suppose that the mining "boom" of 1901 would be maintained but, though the inevitable reaction took place in 1902-1903, there is no doubt that the Colony has benefited and been stimulated by the influx of capital and labour.

Many mining companies have gone into liquidation, and a number of concessions have been abandoned.

As has been pointed out elsewhere, the high level attained by the imports in 1902 has not been maintained but, as compared with 1900, a very satisfactory rise has taken place.

The value of exports is steadily increasing, even if the value of gold is deducted. The revival of the rubber trade is remarkable.

The chief present requirements are:—

(*a.*) At least one good harbour, or breakwater, for improving landing accommodation: the non-existence of adequate facilities seriously prejudices trade.

(*b.*) The provision of suitable water supplies, which would materially improve sanitation, in the principal coast towns.

(*c.*) Increased facilities in the agricultural Eastern Province, for transporting produce to the coast.

To sum up, the Colony now needs a few quiet years, free from internal disturbance or financial vicissitudes, in which to decrease its liabilities; increase its population; develop its resources; foster its agriculture; and educate its inhabitants to a sense of the vast agricultural potentialities of the fertile but uncultivated soil.

H. Bryan,

Colonial Secretary.

29th June, 1904.

No. 465.

GOLD COAST.

(For Report for 1903, *see* No. 426.)

MAJOR BRYAN to MR. LYTTELTON.

Government House, Accra,
28th August, 1905.

SIR,

I HAVE the honour to transmit to you, herewith, a full and carefully compiled Report on the Blue Book for 1904, by Mr. C. H. Hunter, I.S.O., the acting Colonial Secretary.

2. This Report tends to show that the steady progress made in 1903 has been well maintained during the year under review. With the exception of the year 1901, in which the sum of £197,000, forming part of a loan, was incorrectly credited to the general revenue, the revenue for 1904 is the largest yet recorded and exceeded the expenditure by £59,816.

3. The value of the exports from the Colony was £1,340,026, which is also the largest amount ever recorded. The value of the gold exported was £345,608, showing an increase of £90,817, as compared with the figures for 1903. I may mention here that the yield of gold for the first six months of the current year is of the estimated value of £300,617.

The value of cocoa exported was more than doubled during the past year, the figures being £86,250 for 1903, and £200,025 in 1904.

4. The actual earnings of the Government Railway amounted to £148,097, against an original estimate of £128,000; the percentage of expenses to earnings was 61·67 per cent., and the percentage of net earnings to capital expenditure on the 31st of December, 1904, was 3·18 per cent.

5. I am glad to be in a position to report that the general health of the Colony has been good in 1904. The death rate amongst the European officials was 22·79, as against 15·33 in

1903; but in the case of European employees of mercantile firms, &c., the death rate decreased from 35·82 in 1903 to 9·83 in 1904; the corresponding figures for the Europeans employed by mining companies are 19·17 for 1903, and 10·63 for 1904.

6. By the demarcation on the ground of the Anglo-German boundary between the Trans-Volta district and the adjoining Colony of Togo; of the Anglo-German boundary north of the 9th parallel of north latitude; and of the Anglo-French boundary along the 11th parallel of north latitude, all the frontiers of the Colony, Ashanti, and the Northern Territories, have now been exactly defined with the exception of a small portion of the Anglo-German boundary lying between 6° 10′ and 6° 20′.

7. The Colony, Ashanti, and the Northern Territories, have been free from internal disturbances during the past year, and though the expenditure on account of its dependencies is at present a heavy drain on the revenues of the Colony proper, signs are not wanting that the population in the interior is increasing, and that trade is making steady progress in many districts which, owing to the opening of the railway, have for the first time been put in touch with the requirements of the mercantile community on the coast.

I have, &c.,

H. Bryan,

Acting Governor.

REPORT ON THE BLUE BOOK OF THE GOLD COAST FOR THE YEAR 1904.

I.—FINANCIAL.

(A.) Revenue and Expenditure.

Revenue.

1. The estimated revenue for the year 1904, inclusive of a sum of £20,000 Imperial Grant-in-aid towards the cost of the administration of the Northern Territories, was £647,643. The actual revenue amounted to £682,193, exceeding the estimate by £34,550, and showing the substantial increase of £104,640 3*s.* 11*d.*, as compared with that of the previous year.

2. The heads of revenue of the Colony, Ashanti, and the Northern Territories for the years 1903 and 1904, are shown for the purposes of comparison in Table I.

3. From this table it will be observed that there are large increases under "Customs," "Licences," "Post Office," "Revenue from Ashanti and the Northern Territories," and "Railways," the decreases occurring under the heads of "Fees of Court," "Rent of Government Property," and "Miscellaneous."

4. With regard to the increase of £14,096 4*s.* 10*d.* in Customs, this is particularly satisfactory as showing an increase of £1,160 13*s.* 0*d.*, as compared with 1902, in which year the receipts were abnormal, and tending to show that the revenue has recovered the severe check it sustained in 1903.

5. The increase under the head of "Licences" is mainly due to the large receipts from liquor licences. On the 1st January, 1904, the cost of licences was doubled with a view of restricting their number and thus enabling a more efficient check to be kept on licensed premises, but instead of the slight increase of £1,000, which was estimated in the revenue under this head—it being realised that the number of licences would, in consequence, be reduced—the result was a satisfactory increase of £7,172.

6. The detailed receipts of revenue from Ashanti and the Northern Territories are set forth in Table II.

7. The amounts paid over during the year by the Imperial Government towards the cost of the administration of the Northern Territories amounted to £31,800 4*s.* 4*d.*; of this sum £11,612 9*s.* 7*d.*, was paid in January, 1904, in respect of the Imperial Grant for the Imperial financial year 1903-04.

8. With regard to the railway, the collections in 1903, amounting to £65,152, were for the half year from July to

December, whereas the receipts in 1904, which amounted to £146,915, were for the whole year.

Expenditure.

9. Table III. shows the expenditure in detail of the Colony, Ashanti, and the Northern Territories for the year 1904, as compared with 1903.

Increase in Expenditure.

10. The expenditure for the year 1904 was £622,376 11*s.* 5*d.*, as against £593,956 7*s.* 9*d.* in the previous year, or an increase of £28,420 3*s.* 8*d.*

Reasons for Increase.

11. These figures, however, do not afford a fair comparison, as the expenditure on the railway account shown in 1903 is for the half year only, and that on Ashanti disturbances was in settlement of larger claims. If, therefore, these two items were deducted, the expenditure for 1903 would stand at £538,988 3*s.* 4*d.*, and that for 1904 at £522,593 10*s.* 10*d.*, or a decrease in 1904 of £16,394 12*s.* 6*d.*

Decrease.

12. The most noticeable decreases occurred under the heads "Transport," £10,783, "Mines Surveys," £10,073, and "West African Frontier Force, 1st Battalion," £7,524.

13. Public Works undertaken in 1903 in Ashanti involving heavy cost of transport of stores, swelled the charges against the Transport Vote to an abnormal extent during the previous year.

14. The saving under the head of "Mines Survey" is due to decreases in the staff and transport charges.

15. The decrease under "West African Frontier Force" is chiefly accounted for by the strength of the regiment having been reduced by one company.

16. Table IV. gives the details of expenditure in Ashanti and the Northern Territories under all headings of the estimates under which such expenditure was incurred.

General.

17. In the reports upon the financial transactions for 1903 attention was drawn to the rapid progress made by the Colony up to the end of that year; this progress has been well maintained in the year under review, as is clearly shown in the comparative table given below. If the sum of £197,700, balance of the loan of £400,000 on account of Ashanti disturbances, is deducted from the receipts during 1901 (that amount not being properly credited to the general revenue), the revenue is the largest ever recorded, and exceeded the total expenditure by £59,816 8*s.* 7*d.*

Comparative Statement of Revenue and Expenditure for ten years from 1895 to 1904, inclusive.

Revenue.					Expenditure.				
Years.	Amount.			Remarks.	Years.	Amount.			Remarks.
	£	s.	d.			£	s.	d.	
1895	230,075	12	10		1895	265,289	5	11	
1896	237,460	6	7		1896	282,277	15	8	
1897	233,179	1	6		1897	401,691	10	1	
1898	303,821	12	4	Includes Imperial Grant-in-aid of £45,000 on account of Northern Territories.	1898	377,975	17	1	
1899	422,795	15	10	Includes Imperial Grant-in-aid of £100,000 on account of Northern Territories.	1899	309,657	15	3	
1900	585,583	7	5	Includes £50,000 Grant-in-aid of Northern Territories and £202,300 on account of Ashanti disturbances.	1900	515,656	19	2	Includes £243,453 9*s.* 2*d.* expended on account of Ashanti disturbances.
1901	693,893	3	0	Includes £25,000 Grant-in-aid of Northern Territories and £197,700 on account of Ashanti disturbances.	1901	469,459	9	1	Includes £124,392 5*s.* 2*d.* expended on account of Ashanti disturbances.
1902	501,754	9	6	Includes £10,000 Grant-in-aid of Northern Territories.	1902	547,607	13	0	Includes £34,734 10*s.* 10*d.* expended on account of Ashanti disturbances, and £24,000 Repayment of Loan.
1903	577,552	16	1	Includes £23,000 Grant-in-aid of Northern Territories.	1903	593,956	7	9	Includes £14,624 8*s.* 5*d.* expended on account of Ashanti disturbances.
1904	682,193	0	0	Includes £31,800 4*s.* 4*d.* Grant-in-Aid of Northern Territories.	1904	622,376	11	5	Includes £5,612 0*s.* 7*d.* expended on account of Ashanti disturbances.

(B.) Taxation.

1. There is no direct taxation in the Colony. In Ashanti and the Northern Territories, the power of levying a toll or tax on caravans, which was formerly vested in the chiefs, has been vested in the administration which now levies the tolls, and, in return, ensures the safety of the caravan routes.

2. Tolls are collected at Attabubu, Mampon, Kratchi, and Sikassiko, in Ashanti, and at Wa, Bole, Kintampo, Gambaga, Wale Wale, Salaga, and Tumu, in the Northern Territories, at the following rates:—

	s.	*d.*
For each horse	5	0
For each head of cattle, except calves ...	3	0
For each calf...	1	6
For each sheep, or goat	0	6
For each lamb, or kid	0	3
For each donkey	2	0
For each carrier's load of trade goods or country produce, not being grain or kola	2	0
For each donkey load of similar goods ...	4	0
For each carrier load of kola	3	0
For each donkey load of kola	3	0

(C.) Assets and Liabilities.

The excess of assets over liabilities on the 1st of January, 1904, amounted to £302,162 16*s.* 7*d.* On the 31st of December, 1904, the excess was £355,380 6*s.* 3*d.* This increase is explained in the following manner:—

	£	*s.*	*d.*
Excess at 1st January, 1903	302,162	16	7
Add Revenue for 1904	682,193	0	0
	984,355	16	7
Deduct Expenditure for 1904 ...	622,376	11	5
	361,979	5	2
Deduct also, the payments made on account of the expenses of the Central African Regiment in 1900-1901 (£5,603 2*s.* 9*d.*), and the mutiny of the West African Regiment in 1901 (£995 16*s.* 2*d.*), shown previously as advances and included in the Assets, which have now been deducted from the gross sum due by this Government to the War Office for expenses incurred in 1900-1901	6,598	18	11
Excess of Assets over Liabilities at 31st December, 1904	£355,380	6	3

This surplus is accounted for as follows:—

Assets.

	£	s.	d.
General Imprest Account (cash in hand)	56,197	11	8
Gold Ornaments with Crown Agents...	57	18	2
General Assets, exclusive of Advances for Railway purposes	54,912	1	2
Advanced out of accumulated Revenue over Expenditure for the construction of the Railway from Sekondi to Kumasi, including expenses of Survey	268,183	4	8
	379,350	15	8

Liabilities.

	£	s.	d.	£	s.	d.
As shown in Table V.	41,870	17	5			
Less amount secured by Investment appearing on the contra side	18,899	14	0			
	22,971	3	5			
Plus Drafts, and Remittances (Family Remittances, &c., in transit)	999	6	0			
				23,970	9	5
				£355,380	6	3

The detailed statement of assets and liabilities on the 31st December, 1904, is given in Table V.

(D.) Public Debt.

At the 31st December, 1904, the Public Debt of the Colony, exclusive of the claim made by the Government of Northern Nigeria, but not finally accepted, for the ordinary expenditure on troops lent in connection with the Ashanti Expedition, 1900-1, amounted to £2,272,501 6*s.* 9*d.*, and may be summarised as follows:—

Due to the Imperial Government.

	£	s.	d.	£	s.	d.
(1) For Telegraph line to the Northern Territories, 1897 to 1898	29,441	10	8			
(2) Ashanti War, 1900	400,000	0	0			
				429,441	10	8

Due to the War Office.

	£	s.	d.	£	s.	d.
(1) Ashanti Expedition, 1896...	98,798	3	6			
(2) West India Regiment, 1897-98 ...	10,051	15	2			
(3) Ashanti War Expenses, West African Regiment, Central African Regiment, and West India Regiment	62,826	7	0			
				171,676	5	8

**Due to Government of Lagos.*

(1) For Ordinary Expenses of troops, lent in 1900-01				3,971	7	9

Due to Stock Holders.

(1) Inscribed Stock, 1902	1,035,000	0	0			
(2) Scrip against authorised loan of £665,000	63,000	5	9			
				1,098,000	5	9

Due to Crown Agents.

(1) Advances pending issue of loans				569,411	16	11
				£2,272,501	6	9

(E.) Currency.

Legal Tender.

1. British sterling is current and legal tender as are also the following foreign gold coins fixed by the Demonetization Ordinance, No. 2 of 1880:—

2. French gold napoleons, Spanish and South American gold doubloons and half doubloons, United States double eagle, eagle, half eagle, and quarter eagle. British silver coins are legal tender to an unlimited amount, and British bronze coins to any amount not exceeding one shilling. These latter coins have been circulated in the various Provinces, and their use is becoming more general, although cowries are still common in the market places throughout the Colony.

Banks.

3. The Bank of British West Africa, Limited, is the only bank that does business in the Colony. It was established at

* Paid in 1905.

Accra on 1st January, 1897, and now has branches at Cape Coast, Sekondi, Axim, and Tarkwa.

(F.) Municipal Bodies.

Town Councils.

1. The provisions of the Town Councils Ordinance, 1894, were, by Proclamation, extended to Sekondi from the 1st October, and will be extended also to Cape Coast in 1905.

2. Table VI. is a comparative statement of revenue and expenditure of the Accra Town Council for the past five years.

II.—TRADE, AGRICULTURE, AND INDUSTRIES.

(A.) Imports and Exports.

Imports.

1. The total value of all Imports was £2,001,857, as against £2,082,544 in 1903; a decrease of £80,687.

2. Table VII. shows the total values of imports into the Colony for the preceding five years.

3. The value of imports free of duty was £623,208, as against £781,076 in 1903. These values include freight, insurance, and other expenses. The value of imports paying specific duties was £215,742, as against £205,442 in 1903, and, of imports paying *ad valorem* duties, £1,162,907, as against £1,096,026 in 1903.

4. Table VIII. shows the value in sterling of imports and their countries of origin for the years 1902, 1903, and 1904.

5. The following is a summary of the imports showing the extent to which the total returns for the year are increased by specie and Government imports:—

	£	s.	d.	£	s.	d.
Specie				275,850	5	0
Commercial Imports—						
Free	295,887	19	6			
Specific	215,923	19	6			
Ad valorem ...	1,162,725	3	3			
				1,674,537	2	3
Government Imports—						
Free	16,839	1	6			
Specific	4,524	11	3			
Ad valorem ...	30,105	18	9			
				51,469	11	6
				£2,001,856	18	9

The principal headings and amounts showing the increases and decreases are given in Table IX.

Increase.

6. It will be observed that the chief increases are in cotton goods, specie, gin and wearing apparel. The increase in cotton goods and wearing apparel is probably due to the fact that more money was in circulation by payments for produce exported.

7. The increased importation of specie was principally for the payment of export produce.

Decrease.

8. The decreases in the importation of machinery and building materials are due to the completion of the railway and the closing down of some of the mines. The other decreases are under the heads of "Provisions," "Bread and Biscuits," and "Rum." The two former are due to the increased cultivation of local crops, which had to a great extent been neglected during the past few years owing to the demand for labour on the railway and the mines.

The decrease in rum is met by the increase in gin.

9. Imports decreased to the following extent as compared with 1903: From the United Kingdom, £4,588, Germany, £21,970, France, £391, United States, £15,285, and the British Colonies, £61,811, amounting in all to £104,045, the decrease from Lagos alone being £60,513. The increases were from Holland, £14,188, and other foreign countries, £9,170, or a net decrease of £80,687.

Exports.

10. The total value of Exports from the Colony during the year was £1,340,026, the largest on record in any year, or an increase of £359,084, as compared with 1903; and of £565,840 as compared with 1902. The total values of exports for the last five years are shown in Table X.

11. Table XI. gives the value of the produce and manufactures of the Colony and British, Foreign, and other Colonial produce and manufactures for the past three years, and the countries to which they were shipped.

Increase.

The principal heads of increase were:—

	£
Rubber	164,144
Cocoa	113,775
Gold and gold dust	90,817
Specie	36,893
Kola nuts	4,202

Decrease.

The principal decreases were:—

	£
Palm kernels	18,686
Palm oil	17,144
British, Foreign, and other Colonial produce and manufactures	18,637

12. Table XII. shows the comparative values of the principal articles of export for the years 1903 and 1904, the nett increase, as already stated, being £359,084.

Rubber.

13. Dealing, seriatim, with the increases, the rise in the amount and value of rubber exported is probably due to the opening up of hitherto untapped districts in Ashanti, and the impetus given to the rubber trade in that province by the completion of the railway, and the enterprise of various European firms who have recently established trading depôts in Kumasi. The quantity of rubber exported was 4,013,837 lbs. valued at £360,644, as against 2,258,981 lbs. valued at £196,500 in 1903. It is satisfactory to note that a gradual increase has been maintained in this valuable product since 1901, when there was a heavy falling off owing to the Ashanti disturbances.

Cocoa.

14. The export of cocoa, both in quantity and value, was more than doubled during the past year, the total amount exported being 11,451,458 lbs. valued at £200,025, as against 5,104,761 lbs. valued at £86,250 in 1903. With the exception of a comparatively slight set-back in value in 1903, the export of this product has steadily increased since the first shipment, amounting to only 80 lbs., was made in 1891.

15. Table XIII. gives the actual quantities exported with the values from the year 1891 inclusive.

16. The value of exports to the United Kingdom, France, and Germany exceeded those of the previous year by £270,944, £25,448, and £71,587, respectively; while those of the United States were less than in the previous year by £16,899.

Gold.

17. As already stated the export of gold shows a very substantial increase, as compared with the previous year, the total amounts being £254,791 in 1903, and £345,608 in 1904, or an increase of £90,817. The number of mining companies which exported gold was 13.

Timber.

18. It is satisfactory to note the increase of £5,442 in the value of timber exported.

Kola Nuts.

19. The trade in kola nuts has shown a steady improvement since 1902, the total value exported being £54,763 in 1904, as against £50,561 in 1903, and £37,474 in 1902. The principal market for this product is Lagos, to which nuts to the value of £52,394 were shipped during the year. The shipments to Germany also showed a marked increase, while a small quantity amounting in value to £334 was for the first time sent to the United Kingdom. Large quantities are also exported into the hinterland, whence they are carried to Northern Nigeria.

Palm Oil and Palm Kernels.

20. Palm oil and palm kernels show a still further decrease as compared with the previous year, which is probably due to the exceptionally small rainfall which was even less than in 1903.

Trade of Principal and Minor Ports.

21. Table XIV. shows the trade of the principal and minor ports of the Colony during the years 1903 and 1904.

(B.) Mines, Manufactures, and Fisheries.

1. The increase in the export of gold is chiefly due to the erection of larger stamp batteries on some of the properties.

2. Table XV. gives a list of the companies which exported gold during the year 1904, together with the respective amounts.

Gold Dredging.

3. Dredging work has been carried on by the Ankobra (Tarkwa and Abosso) Development Syndicate, the Birrim Valley Gold Mining and Dredging Company, Pritchards Dredging Company, the Offin River Gold Estates Company, and the Ashanti Goldfields Auxiliary, Limited, and the results obtained have been sufficiently satisfactory to show that dredging is likely to develop into a profitable industry.

Comparative Statement of Gold Exported.

4. Table XVI. gives the comparative amounts and value of gold exported from the Colony since 1880. From this statement it will be seen that there was an increase in 1902 of

£74,694 over the previous year, in 1903 an increase of £157,910 over 1902, and in the year under review a still further increase of £90,817.

List of Mines and Dredging Companies.

5. Table XVII. gives a list of the mines and dredging companies from which the gold was obtained, together with the amounts.

6. There is general improvement in the progress of the mines, as compared with last year, due in a great measure to the opening of the railway to Kumasi, which has assisted the companies in getting up heavier stamps.

7. Three additional companies in the Western Province of the Colony and two in Ashanti are erecting batteries on their properties, all of which should commence work during 1905.

8. Prestea Mines, Limited, is building a light railway about 25 miles in length to bring up machinery to their property for the installation of a battery.

9. Twenty-five other companies were engaged in working their concessions during the year.

10. The number of concessions filed in the Colony was 189, as compared with 81 in 1903, and 67 certificates of validity were granted.

11. Eight prospecting and six mining licences were taken out during the year. No surveyor's licences were issued.

Health of European Staff.

12. The health of the Europeans employed on the mines was good, as the result of improved conditions of housing and feeding.

Manufactures.

13. Strictly speaking, there are no manufactures in the Colony, Ashanti, or the Northern Territories. A certain amount of native cotton cloth is woven by primitive methods from the produce of the indigenous plant. Salt is made in the marshes round Adda and Kwitta, and along the coast-line generally fish are caught and sun-dried for inland consumption.

(C.) Agricultural Industries and Botanical Stations.

Rubber.

1. Attempts have been made to encourage native planters to form plantations of the native rubber trees, but, owing to the apathy of the Chiefs, these have not hitherto met with much success.

2. Samples of Para rubber grown in the Gardens at Aburi have been very favourably reported on, and the prices quoted for samples shown in the English market compare well with the Ceylon and South American product. Sir W. T. Thiselton-Dyer, writing on this subject, has expressed the opinion that the production of Para rubber in our West African Colonies is an enterprise which has now emerged from the experimental stage, and may be safely encouraged by the Colonial Governments. The Para rubber tree appears to be the most satisfactory rubber-producing plant to cultivate in this Colony, and steps are being taken to procure further supplies of seeds from Ceylon and the Straits Settlements for intending planters, with a view to foster the interest aroused in the cultivation of this very valuable product.

Coconuts.

3. There are at the experimental farm at Christiansborg 6,500 plants living, out of a total number planted since 1901 of 11,100. Of this total 3,200 were killed by drought, 1,100 by insects, principally the rhinoceros beetle, and 300 stolen. The scarcity of rain, however, during the year has had a general deteriorating effect.

Cocoa.

4. The cultivation of this product has now been taken up in practically every district in the Colony. During the year numbers of pods for planting purposes have been despatched from Aburi to Ashanti and the Western Province, and the substantial increase in the quantities exported shows how very successful the experiment of the introduction of cocoa has proved.

Cotton.

5. The outlook in connexion with the cotton-growing industry is promising in the Eastern Province, where it is estimated that the area cultivated with this product has increased from 200 to 2,000 acres during the last two years.

6. The soil and climate in this district are adapted for the successful growth of cotton, and the difficulties of transport, which is an all-important factor in this country, are facilitated to a certain extent by the vicinity of the Volta River.

7. Experimental cotton farms have been established at Anum and Labolabo, in the Eastern Province of the Colony, to serve as object lessons and seed-distributing centres for planters.

Palm Oil and Palm Kernels.

8. The very marked falling off in the trade in palm oil and palm kernels is mainly attributable to the great drought, and

partially owing to the substitution of cocoa on some of the plantations.

Food Products.

9. The food products of the Gold Coast, Ashanti, and the Northern Territories (as distinguished from articles of export) comprise cassava, yams, maize, guinea corn, peas, plantains, ochroes, peppers, onions, tomatoes, and garden eggs; mangoes, oranges, pine-apples, pawpaws and bananas are brought to the local markets in the large coast towns, and the cultivation of these, principally to supply the European population, is steadily increasing.

Botanical Stations.

10. The general condition and development of the Gardens at Aburi have been somewhat hindered owing to the frequent and extended absences of the officer in charge in connexion with other departmental undertakings and experiments.

11. The rubber and cocoa trees and the cardamom plants have all made satisfactory progress, and a large number of economic plants new to the collections were established.

12. The quantity of cocoa seeds available for distribution was limited to about 2,000 pods, the remainder being utilized for curing experiments.

13. At Tarkwa over 70 acres have now been brought under cultivation at this station, which was only established in 1903.

14. The total number of seeds and plants distributed through the two stations during the year was 15,142 plants, 2,000 cocoa pods, 8,500 lbs. cotton seeds, 55,000 Para rubber seeds, and 942 packets of seeds (various)

(D.) Lands.

Value of Land.

1. The value of lands varies in different localities, but fluctuates little. In Accra the average price is from 4*s*. to 10*s*. per square foot. In the principal coast towns land is owned chiefly by families or individuals. Conveyance by lease or sale follows the forms of English law.

2. In the interior and in Ashanti, however, the permanent alienation of land (which is usually the property of the community, represented by the chief), except to the Government for public purposes, is unusual; and, when it does occur, is usually brought about by sale on mortgage. Occupancy by

strangers to the tribe, for purposes of cultivation, is commonly allowed on easy terms.

3. Since the passing of the Concessions Ordinance of 1900 large tracts of land have been leased for long terms to European mining companies.

Concession Claims.

4. During the year the number of concession claims filed were 189, as compared with 81 in 1903.

Certificates of Validity.

5. Sixty-seven certificates of validity were granted, making a total of 142 to the end of the year.

6. The lease of forest lands for concession purposes and the marking out of concessions by the Government Survey is leading to the settlement of many boundaries. It has also had the effect of strengthening the hands of the head chiefs, who have declined to consent to the lease of lands by sub-chiefs unless they are compensated.

7. The usual terms on which a gold mining concession in the eastern part of the Colony is leased are, for an area of five square miles for 99 years:—

(i.) A preliminary payment of £50 (called consideration money).

(ii.) An annual rent of £12 (known as occupation rent), until mining with machinery shall have been commenced.

(iii.) A mining rent of from £100 to £250 a year.

8. The usual size of a gold mining concession in other parts of the Colony is 1,000 fathoms square; the consideration money is from £50 to £100, the occupation rent £12, and mining rent £200. If the area be more than 1,000 fathoms, the Court usually requires a mining rent to be at the rate of £200 per 1,000 fathoms square.

9. In Ashanti the following terms are generally in force for concessions of five square miles:—

£100 consideration money.

£12 to £24 annual ground rent.

£200 to £300 mining rent.

In some cases, however, larger sums have been paid for concessions.

(E.) Shipping.

1. A comparative statement of the number and tonnage of steam and sailing vessels, entered and cleared, in the Colony for 1903 and 1904, is given in Table XVIII.

2. The total number of steam vessels which entered and cleared from the various ports in the Colony during the year was 577 and 567 respectively.

Thirteen sailing vessels entered and 17 cleared.

3. The former show an increase on the previous year of 12 entered and seven cleared, and the latter a decrease of nine entered and two cleared. The sailing vessels are mainly employed in the rum, tobacco, and lumber trade, the greater part of which is carried on with the United States.

Table XIX. gives a comparative statement of the sailing and steam vessels of British and foreign nationalities entered and cleared during the years 1903 and 1904.

Mail and Steamship Services.

The African Steamship Company and the British and African Steam Navigation Company (1900) *Limited.*

1. Mail steamers of these companies leave Liverpool every Saturday, calling at Sierra Leone, Monrovia, Axim, Sekondi, Cape Coast and Accra, the length of the voyage being 14 to 15 days.

2. These companies also despatch cargo steamers every alternate Wednesday and fourth Thursday from Liverpool, the Wednesday steamers calling at the principal Gold Coast ports and the Thursday steamers at all Gold Coast ports outwards and homewards. Length of the voyage, Liverpool to Accra, varies from 30 to 37 days.

3. On the 15th of each month a steamer leaves Hamburg and calls at the principal Gold Coast ports, length of voyage being about 30 days.

4. Homewards.—The mail steamers of these companies call at Accra every Tuesday, also calling at Cape Coast, Sekondi, and Axim—the length of the voyage, Accra to Plymouth, by these steamers, being 17 days.

5. The steamers of these companies call at the Canary Islands or Madeira, and occasionally at both places, homewards.

Compagnie Belge Maritime du Congo.

6. The steamers of this company, sailing outwards from Antwerp, call at Southampton every third Friday for passengers for Teneriffe, Sierra Leone, Axim, Sekondi, Cape Coast,

and Accra, the length of the voyage, Southampton to Accra, being 14 days. These steamers also call at Accra on the homeward voyage every third Saturday, and at the other above-named ports in reverse order, the length of the passage, Accra to Southampton, being 14 days.

Woermann Line.

7. A mail steamer of this line, outwards from Hamburg, calls at Southampton on the 12th and 28th of each month for passengers for the principal Gold Coast ports, the length of the voyage, Southampton to Accra, being 16 days. Cargo steamers of this line leave Hamburg on 1st, 7th, 20th, and 22nd of each month, calling at most ports on the Gold Coast, the voyage to Accra varying from 25 to 32 days.

8. Two of this company's steamers leave Accra on 14th and 28th of each month homewards, calling also at Cape Coast, Sekondi, and Axim for mails and passengers, the voyage from Accra to Southampton taking about 16 days.

9. Cargo steamers of one or two French companies sailing from Marseilles call irregularly outwards and homewards at Gold Coast ports

---

III.—LEGISLATION.

Ordinances of 1904.

1. Table XX. gives a Schedule of the Ordinances passed in the Legislative Council during the year, together with the Ordinances affecting Ashanti and the Northern Territories enacted by the Governor. Of these six were merely amendments to existing Ordinances of the Colony.

2. The most important Ordinances enacted during the year were as follows:—

No. 1, which provides for the removal of lunatics from the Colony.

No. 4, to facilitate the proof of the election and installation and the deposition of chiefs according to native custom.

No. 9, to regulate the sale of wine and beer.

No provision had hitherto been made by the Legislature, restricting in any way the sale of wine and beer, and it was deemed advisable to place the sale of these intoxicating beverages on the same footing as the sale of spirits by means of licences. The Ordinance does not affect the sale of palm wine.

No. 11, to prevent the illegal detention of stool property.

This Ordinance was passed for the purpose of preventing the detention of stool property by legally deposed Chiefs, who might thereby obstruct the installation of their successors duly elected according to native customary law.

No. 12, to vest the control of Savings Banks in the Post and Telegraph Department.

The management of the Saving Bank had hitherto been under the control of the Treasury, and its transfer to the Post Office was decided upon with a view to make the branches more accessible to the general public.

No. 13, to repeal the Customs Tariff Ordinance, 1898, and to substitute other provisions.

The main object of this Ordinance was to amend the existing tariff west of the Volta, by placing specific duties on certain articles hitherto charged 10 per cent. ad valorem duty, in respect of most of which questions had arisen as to the value of the packages and coverings in which the goods are imported.

Ashanti.

3. Three Ordinances were enacted by the Governor with respect to Ashanti during 1904:—

No. 1 amends the Ashanti Administration Ordinance, 1902, by adding to it the Spirit Licence (Amendment) Ordinance, 1903.

No. 2, to regulate the law relating to sentences of flogging and whipping in Ashanti.

No. 3, to further amend the Ashanti Concessions Ordinance, 1903.

Northern Territories.

4. Three Ordinances were also enacted by the Governor with respect to the Northern Territories during the year, viz.:—

No. 1, to regulate the law relating to sentences of flogging and whipping in the Northern Territories of the Gold Coast—similar to that enacted for Ashanti.

No. 2, to regulate the rights of prospecting and mining in the Northern Territories of the Gold Coast.

No. 3, to amend the Northern Territories Administration Ordinance, 1902.

IV.—EDUCATION.

(A.) Primary.

Main features and number of Schools open in 1904.

1. In 1904 there were 139 schools in the Colony on the list for inspection, of which seven were Government schools; out of the remainder 123 succeeded in obtaining Government grants.

2. Table XXI. gives the number of Government and Assisted Schools maintained in the Colony for the last three years, showing an increase of 15, as compared with the previous year.

3. The total number of scholars on the roll during the year was 13,955, as compared with 12,803 in 1903 and 12,136 in the previous year.

4. The following table shows the average attendance of scholars and grants-in-aid earned during the last three years:—

Year.	Government.	Assisted.	Total.	No. on Roll.	Average Attendance.	Grant in-aid.
						£ s. d.
1902 ...	7	117	124	12,136	8,938	3,875 11 5
1903 ...	7	117	124	12,803	9,411	4,647 3 3
1904 ...	7	132	139	13,955	10,234	4,636 5 7
Increase or Decrease 1904.	—	—	+15	+1,152	+823	— 10 17 8

5. Table XXII. gives the classification of the schools under the various educational agencies.

6. Special grants, amounting to £133 13*s.* 7*d.*, for the maintenance of buildings, furniture, apparatus, and for new buildings and enlargements were awarded during the year. The Basel Mission spent £34 16*s.* 11*d.* on new buildings, and the Wesleyan Mission £178 12*s.* 10*d.* On school equipment and repairs, the Basel Mission spent £207, the Roman Catholic Mission £45 16*s.* 5*d.*, and the Wesleyan Mission £133 12*s.* 2*d.*; £513 1*s.* 3*d.* was paid for scholars receiving industrial instruction, and £816 10*s.* 6*d.* was earned in optional subjects.

7. There are about 123 schools in the Colony which do not receive any grant. Most of these are half-time infant schools, and in few of them is the average attendance over 20.

8. Table XXIII. shows the non-assisted schools and number of scholars.

9. The system of examinations for appointment to Junior Clerkships in the Gold Coast Civil Service was initiated a few years ago with the object of securing a better class of men for the Government service, and improving the existing method of selection. Clerks cannot be placed on the permanent establishment without passing the prescribed examination.

10. There has been a satisfactory increase in all classes except Standard VI. A regulation has been introduced requiring candidates for Junior Clerkships in the Civil Service to produce a certificate showing that they have passed Standard VII. and such certificates are issued by the Department.

11. Apart from inspections by the Education Department the schools of the various Mission Societies are under the direction of ordained European or native missionaries. Of these each is appointed by his society to a district, in which he exercises full authority, appointing and dismissing teachers, fixing salaries, &c. To the teachers themselves, however, falls the practical management of the schools, which are scattered far apart, and are not on that account inspected as frequently by the managers as is desirable.

School Fees.

12. There is no uniform scale of fees charged by the Assisted Schools. The Government Schools at Accra and Cape Coast charge a fee of 3*d.* a month for pupils in the infant classes, and 6*d.* a month for those in the standards. The other Government Schools are free.

13. Table XXIV. shows the school fees collected in 1902, 1903, and 1904 respectively. These fees, amounting to £1,076 8*s.* 10*d.*, show an increase proportionate to the increase in the number of scholars. Taken in connexion with the average attendance, the figures in the table referred to show an average payment of 2*s.* 1*d.* per scholar, which is the same as that for 1903.

14. Attendance at school being entirely voluntary, any increase in the amount of school fees must be welcomed as an indication of the growing popularity of education.

15. There is nothing in the nature of a school rate or tax, and the small fee asked can easily be paid.

16. A school has been opened at Bensu, in Lower Wassaw. The buildings, which include a master's residence, were erected by the Government and paid for by the Chiefs out of their mining rents.

(B.) Secondary.

17. There are no secondary schools under the Board of Education, and apart from the two seminaries of the Basel Mission, there are only four Schools in the Colony which claim to give an education other than elementary. These are the Accra Grammar School, the Cape Coast Graded School, the Wesleyan Collegiate School, Cape Coast, and a school recently opened at the same town by the Fante Public Schools Company. There are no Europeans on the staff of any of these schools, and they can hardly be regarded as secondary in more than name. A good High School is a serious want.

(C.) Industrial, Technical, and Agricultural Schools.

18. No teacher volunteered last year to take the course of instruction in agriculture at the Government Botanical Gardens. This course was first instituted in 1902, and its object is to improve the agricultural work done in the schools, by enabling the teachers to acquire a theoretical as well as practical knowledge of the subject.

Agricultural Instruction.

19. At a large number of schools there are plantations in which are grown cotton, cocoa, arrow-root, corn, rubber, as well as vegetables and flowers. The chief difficulty is the want of trained instructors. At the Central Schools of the Basel Mission there is European supervision, but in the outlying villages it is doubtful if the work done is of much practical value. A course of instruction is now given to teachers at the Government Botanical Gardens. Prizes are also offered to schools for the best farm or plantation.

Other Technical Instruction.

20. In connexion with the Government Schools at Accra and Cape Coast, are classes for instruction in cabinet-making. The course of training extends over two years, and at the conclusion of this, boys who pass an examination held by the Director of Works are admitted as apprentices to the Public Works Department. At the Roman Catholic School, Cape Coast, a printing press has been established. Bookbinding is taught at several Basel Mission Schools. Straw plaiting, enamel work, basket-making, brick-making, and masonry are also taught at various Basel Mission and Roman Catholic Schools.

V.—GOVERNMENT INSTITUTIONS.

(A.) Hospitals.

1. There are excellent Hospitals at Accra, Cape Coast and Sekondi, with European nursing sisters attached to them; the number of wards and beds being as follows:—

—	European Wards.	Beds.	Native Wards.	Beds.
Accra	3	7	4	26
Cape Coast	3	6	2	27
Sekondi	2	12	3	14

2. There are also smaller Hospitals at Axim, Elmina, Ada, Kwitta, Kumasi, and Gambaga, and dispensaries at Tarkwa, Saltpond, and Akuse. There are contagious diseases hospitals at Accra and Cape Coast.

3. The number of in-patients treated during the year at the various hospitals was 2,496, as compared with 2,540 in 1903 and 1,350 in 1902, but the general health of the Colony was good.

(B.) Asylum.

1. There is only one lunatic asylum in the Colony, at Accra. Seventy-one patients remained in the asylum at the close of 1903 under treatment, and 34 new cases were admitted during the year 1904, making a total of 105 cases—83 males and 22 females. Of these 30 were discharged from the Asylum, 14 died, and one escaped, leaving 60 patients under treatment at the end of 1904.

(C.) Poor Houses; and (D.) Reformatories.

1. There are no poor-houses or reformatories in the Colony, and poverty, in the strict sense of the word, is unknown.

2. Further instances have occurred of Europeans who have been dismissed from the employment of the mining companies being left practically destitute, and the Government has in several cases paid the cost of their passages to England.

(E.) Savings Bank.

Deposits.

1. The deposits during the year, including interest, amounted to £6,776 14*s.* 5*d.*, or an increase of £430 16*s.* 2*d.* over 1903.

Withdrawals.

2. The withdrawals for the same period amounted to £5,559 17*s.* 10*d.*, being £1,216 16*s.* 7*d.* less than the deposits, and also showing a decrease as compared with the withdrawals for 1903 of £317 1*s.* 0*d.*

3. The number of branches open remained the same, viz., 10.

4. The account opened on behalf of the 1st Battalion, Gold Coast Regiment, continued to show very satisfactory progress.

Transfer of Control from Treasury to Post Office.

5. The arrangements for transferring the control of the Savings Bank from the Treasury to the Post Office Department were concluded during the year, and on the 31st December the Savings Bank Transfer Ordinance was passed, legalizing the transfer.

Interest on Deposits.

6. The interest credited to depositors during the year amounted to £143 12*s.* 11*d.*; the amount of interest received from investments during the same period was £1,721 12*s.* 6*d.*

VI.—JUDICIAL STATISTICS.

(A.) Police.

Force.

1. The total strength of the police force on the 31st December, 1904, was 611 of all ranks, made up as follows:—

General Police	406
Escort Police	116
Mines Police	57
Railway Police	32
	611

Included in this number are six European officers and four West Indian superintendents.

Recruiting.

2. Recruiting was almost entirely confined to natives of the Colony—no Lagos men were enlisted. The force is armed with ·450 Martini Henry carbines.

Detective Branch.

3. The detective branch of the force has been increased with useful results.

Crime.

4. The return of crime shows that 6,659 cases were dealt with, as against 5,834 in the previous year, or an increase of 825. This increase is, to a great extent, accounted for by the increase of offences at Kumasi under the Sanitary Laws.

(B.) Prisons.

Appointments.

1. On the 1st January, 1904, the appointment of Superintendent of Prisons was combined with that of Commissioner of Police. Three European Gaolers were appointed during the year, and were placed in charge of the three Central Prisons at Accra, Elmina, and Cape Coast. The native staff of warders has been considerably increased during the year, owing to the increased number of prisoners, and additional accommodation has been provided both at Accra and Cape Coast.

New Prison at Sekondi.

2. At Sekondi the site has been selected and the ground cleared for the new Central Prison.

Prison Industries.

3. The amount realized from the sale of prison industries during the year from the two principal prisons at Accra and Elmina was £112 7*s.* 8*d.*, as against £267 14*s* 7*d.* in 1903. The total earnings of the prison for the year amounted to £10,173 19*s.* 1½*d.*, as compared with £7,819 5*s.* 7*d.* in the previous year, the total cost of the department being £12,794 6*s.* 0*d.*, or £1,274 0*s.* 4*d.* in excess of 1903.

(C.) Criminal Statistics.

Table XXV. shows the number of offences, apprehensions, convictions, and acquittals, including Ashanti and the Northern Territories, for the last three years.

VII.—VITAL STATISTICS.

(A.) Population.

The population of the Gold Coast, Ashanti, and the Northern Territories was, according to the last census taken in 1901, 1,486,433, but the figures can only be considered as approximately correct.

(B.) Public Health.

1. The general health of the population of the Colony and Protected Territories during the year has been good. Malaria was slightly less prevalent than last year, while the European population was greater.

Smallpox.

2. There has been an increase in the number of cases of small-pox, but the number of deaths has decreased, being one in 62, as against eleven in 37 last year.

3. The rainfall throughout the Colony was, on the whole, less; an increase being noted only at Axim and Kwitta.

Health of the European Community.

4. The health of the Europeans in the Colony, Ashanti, and the Northern Territories shows an improvement generally over the previous year, and the hope expressed in 1903 that the low death rate would be maintained was more than fulfilled. There were fewer deaths, but the invaliding rate was slightly higher.

5. The following table gives the death and invaliding rate per 1,000 of the European community:—

How Employed.	Number.	Deaths.	Invalided.	Death rate per 1,000	Invaliding rate per 1,000,
Officials	351	8	27	22·79	76·92
Mercantile Firms, &c.	305	3	22	9·83	72·13
Mining Companies	1,222	13	97	10·63	79·37
Missions	75	1	11	13·33	146·66
Total ...	1,953	25	157	12·80	80·38

6. In 1903 the number of deaths was 39, and the number of men invalided 137.

HEALTH OF THE NATIVE POPULATION.

7. The health of the native population was fair, but dry weather has in many cases been a cause of suffering and ill-health, especially at Accra, where the water supply is inadequate.

Principal Diseases.

8. The principal diseases treated were malarial fever, diseases of the skin, ulcers, yaws, diseases of the intestines, and respiratory organs.

(C.) SANITATION.

9. Great improvements have been carried out in the sanitation of many of the principal towns during the past year, more especially in the cases of Cape Coast, Sekondi, and Axim. The resistance to sanitation on the part of the native population still continues, but not to such an extent as formerly, although it is still comparatively active. In other towns it is of a more passive nature; the native is usually satisfied with the conditions under which his race has lived for centuries, and does not wish for anything better.

(D.) CLIMATE.

10. The rainfall for the year was lower than ever before recorded, the result being that in many places on the coast the lack of water was seriously felt.

The following table gives the mean meteorological observations taken at Accra, Aburi, Cape Coast, Axim, Kwitta, Kumasi, and Gambaga during the year 1904:—

Name of Station.	Temperature.						Rainfall.	
	Solar maximum.	Minimum on grass.	Shade maximum.	Shade minimum.	Range.	Mean.	Amount in inches.	Degree of humidity.
Accra	140·72	71·04	84·83	73·01	11·47	78·92	17·28	79·98
Aburi	126·10	73·46	80·00	71·87	8·30	76·06	31·10	83·19
Cape Coast ...	—	71·35	83·94	71·89	11·52	77·91	22·97	84·26
Axim	129·31	36 67	84·53	70·67	14·11	77·43	75·09	85·37
Kwitta ...	140·52	73·56	88·77	76·49	12·22	82·63	15·40	75·12
Kumasi ...	146·05	68·80	84·81	69·73	15·04	77·10	39·75	83·02
Gambaga ...	147·91	51·19	87·23	74·64	15·78	79·27	40·51	57·81
Sekondi								

= Kitta?

VIII.—POSTAL, TELEGRAPH, AND TELEPHONE SERVICES.

Revenue.

1. The revenue of the Department for the year amounted to £21,836 16*s.* 11*d.*, exclusive of the sum of £6,475 8*s.* 10*d.* collected on behalf of the African Direct Telegraph Company on account of cablegrams despatched from the various offices in the Colony; and of £8,250 18*s.* 7*d.* realised on account of sales of Judicial Stamps, and of £2,176 1*s.* 8*d.*, duty collected on parcels imported and subsequently credited to the Customs Department.

Sales of Stamps.

2. The revenue from stamps for Postal and Revenue purposes shows a very considerable increase, as compared with the previous year; that from Judicial Stamps, a large decrease; and a slight decrease also appears under stamps for telegraph purposes.

Comparative Collections.

3. The following statement gives the figures for 1903 and 1904, respectively:—

—	1903.			1904.		
	£	*s.*	*d.*	£	*s.*	*d.*
(*a*) Postage Stamps (for Postal and Revenue purposes).	8,468	5	2	9,681	17	5
(*b*) Postage Stamps (for Telegraphic purposes).	11,671	19	7	11,379	13	9
(*c*) Judicial Stamps	9,582	6	4	8,250	18	7

Expenditure.

4. The expenditure for the year amounted to £23,400 8*s.* 6*d.*, as against £21,623 3*s.* in 1903. This amount, however, includes the sum of £2,675 1*s.* 11*d.* off account of extra expenditure in connection with the extensions of the telegraph system and the establishment of telephone exchanges at Sekondi and Tarkwa.

Correspondence.

5. There has again been a further falling off in the amount of correspondence received in the Colony, doubtless due to the closing down of some of the mines—the amount of ordinary mail matter dealt with was practically the same as in the previous year.

6. It is estimated that 3,564,800 letters, postcards, newspapers, and book packets were received and despatched, as compared with 3,749,982 in 1903.

Registered and Insured Correspondence.

7. Registered and insured correspondence again shows a substantial increase, 137,900 registered articles having been despatched, and 103,500 received, as compared with 125,954 despatched, and 91,364 received in 1903.

Parcel Post.

8. In the Parcel Post Service, which has become very popular as a means of importing wearing apparel and other light articles from England, increases have already been recorded of 60 per cent. in 1901 over 1900, 76 per cent. in 1902 over 1901, 32 per cent. in 1903 over 1902, and the year 1904 shows a further increase of 5 per cent. over 1903. The total number of parcels imported was 29,320, while 3,424 were despatched; of these, 2,368 were insured.

Money Order Offices.

9. A new money order office was opened at Prampram, and there is now a money order office at the headquarters of each district of the Colony, as well as at Kumasi and Obuasi in Ashanti.

Money Orders.

10. The total value of money orders issued was £54,963 2*s.* 11*d.*, as against £48,953 12*s.* 11*d.* in 1903, an increase of over 12 per cent., notwithstanding the fact that the introduction and sale of British postal orders on the 1st October has largely superseded the issue of money orders.

Postal Orders.

11. Postal orders to the value of £8,556 1*s.* 11*d.* were sold during 1904, as compared with £4,963 18*s.* 7*d.* in 1903, an increase of 72 per cent. This large increase is accounted for by the substitution of the British postal order for the inland postal order formerly in circulation. These orders are payable not only in the Colony but also in the United Kingdom and in a large number of Colonies which have become parties to the scheme put forward by the Imperial Post Office. This means of making remittances became immediately popular, as is shown by the sales, which amounted during the last quarter of the year to £5,047 4*s.* 7*d.*

Telegraphs.

12. On the 31st December there were 39 offices open for business in the Colony, Ashanti, and the Northern Territories, with a total constructed length of 1,032 miles.

13. The total number of telegrams dealt with was 270,518, as compared with 276,681 in 1903. This is accounted for chiefly by the decrease in the official telegrams, and the revenue has not been prejudicially affected thereby.

14. The number of official messages dealt with was 104,040, as compared with 136,822 in the previous year.

Telegraph Extension.

15. The telegraph extensions from Aburi to Kpong and from N'Koranza to Attabubu, and the construction of a line along the railway from Sekondi to Kumasi, were completed during the year. The Aburi-Kpong line completes the circuit from Accra to Adda.

New Offices.

16. New offices were opened at Akropong and Somanya on the Accra-Kpong line, and at Attabubu, which is the present terminal station of the projected N'Koranza-Yeji line.

17. The existing lines along the coast have been generally overhauled, and communication has been fairly well maintained during the year.

Telephones.

18. Telephone exchanges exist at Accra and Cape Coast, connecting all the Government Offices and most of the leading business houses.

Opening of New Exchange.

19. An exchange was opened at Sekondi in October last, to which there are at present 9 Government and 14 private subscribers.

IX.—MILITARY FORCES AND EXPENDITURE.

West African Frontier Force.

Strength.

1. The strength of the Gold Coast Regiment of the West African Frontier Force, which consists of two battalions, was on the 31st December, 1904, 55 officers, 11 European non-commissioned officers, and 1,747 rank and file (natives).

1st Battalion.

2. The 1st battalion and a battery are stationed in Ashanti, with headquarters at Kumasi, and detachments at Accra and Cape Coast in the Colony.

2nd Battalion.

3. The 2nd battalion and a battery are stationed in the Northern Territories, with headquarters at Gambaga. A body of mounted infantry is attached to this battalion.

Cost of Up-keep.

4. The expenditure incurred in the up-keep of this force in 1904 was £82,993.

Volunteers.

Authorised Establishment and Actual Strength.

1. The authorised establishment of the Volunteers on 31st December, 1904, was 520 of all ranks. The actual strength of the force was 369, or an increase of 87 as compared with the previous year.

Machine Gun Sections.

2. The strength of the three gun sections was only 39, as against 94 in 1903. This falling off was mainly due to members at Accra and Cape Coast leaving after having completed their three years' agreement, and at Axim to the very few Europeans now stationed there.

Armament.

3. The volunteers are armed with the Martini-Enfield carbine and '88 sword-bayonets.

Expenditure.

4. The total cost of the force for the year was £1,262 16*s.* 10*d.*, or an increase of £459 16*s.* over the preceding year.

Preventive Service.

1. This service, which is a branch of the Customs Department, is stationed along the eastern and western frontiers of the Colony.

2. The River Volta preventive service extends from Adda to Burai in the Northern Territories, just north of the eighth parallel, and consists of 28 stations. The western frontier of the preventive service extends from Half Assinie to Debisu, within five miles of the boundary of Ashanti, and consists of 25 stations.

3. Occasional patrols are sent north of Debisu along the Ashanti frontier by the preventive service; but the prevention of smuggling into Ashanti from the Ivory Coast, rests with the Ashanti Administration, as does the prevention of smuggling into the Northern Territories from Togo with the Northern Territories Administration.

Expenditure.

4. The expenditure on these services in 1904 was £15,752 8*s.* 2*d.*

GENERAL OBSERVATIONS.

Important Events.

Taking over of Railway.

1. The most important event of the year was the taking over on the 1st April of the Government Railway from Obuasi to Kumasi from the Construction Branch.

Demarcation of Anglo-German Boundary.

2. The Anglo-German boundary between the Trans-Volta District and the adjoining Colony of Togoland was demarcated during the year.

3. The demarcation of the Anglo-German boundary north of the 9th parallel of north latitude and that of the Anglo-French boundary along the 11th parallel of north latitude were also completed during the year.

ASHANTI.

1. Ashanti remained peaceful throughout the year, and the political outlook is satisfactory.

2. During the first half of the year all the Ashanti Kings, with the exception of Bekwai and Ekwanta, who, however, sent their representatives, were taken to visit Sekondi by railway, in order to acquaint them with the advantages afforded for merchandise by rapid transit to the coast.

3. Although the railway reached Kumasi in October, 1903, it was not until the 1st of April, 1904, that the Government took over the Obuasi-Kumasi section from the Construction Department.

4. The natives are becoming more accustomed to the railway, and the downward traffic from Ashanti is steadily increasing.

5. Many of the leading mercantile firms on the coast have opened branches and stores in Kumasi, and trade at that place is increasing.

6. A camp of exercise for the 1st Battalion, Gold Coast Regiment, was formed at Tekiman in March and April. The natives of that district were very friendly and kept up a constant supply of food during the six weeks that the troops were stationed among them.

NORTHERN TERRITORIES.

1. During the year under review, our relations with the local French and German officials in these Territories were of a cordial nature.

Demarcation of Anglo-French and Anglo-German Boundaries.

2. The Anglo-French boundary, along the 11th parallel of north latitude was demarcated during the year, as was also the Anglo-German boundary from the 9th parallel of north latitude to the boundary of the French Soudan, thus finally delimiting the boundaries between this Protectorate, the Ivory Coast and the French Soudan on the north and west, and Togo on the east.

3. In the early part of the year minor disturbances again took place in Lobi-Dagarti, which necessitated the despatch on three occasions of small parties of soldiers under European officers to restore order.

4. It was also necessary for the Chief Commissioner to proceed with a strong escort to Kandigar, a large district lying about 6 miles south of the 11th parallel of north latitude, to punish the people for looting traders and caravans.

5. The state of the Protectorate, taken as a whole, during the year may be considered to have been quite peaceful, except for the foregoing instances.

6. Looting and stealing cattle are the most prevalent offences, but there has been comparatively little serious crime during the year. Slave dealing is gradually being suppressed.

Revenue.

7. The revenue from all sources amounted to £12,524 2*s.* 4*d.*, showing an increase of £560 6*s.* 7*d.*, as compared with the previous year.

8. The store at Gambaga having served the purpose for which it was established, namely, to encourage trade by creating a demand for European goods, was closed in April, thereby involving a falling off in the sale of trade goods of £723 6*s.* 8*d.*

9. A new road was made between Yeji and Salaga, and the road between Dogonkade and Kwobia completed. Various station buildings were erected at Yeji, Kintampo, and Salaga.

10. The harvest throughout the Protectorate was plentiful, and more land put under cultivation than in former years, thereby affording an ample supply of foodstuffs, such as maize, guinea corn, millet, yams, ground-nuts, rice, beans, &c., except at Yeji where there was an abnormal demand for these articles owing to the increase in the native population brought about by the transfer of the headquarters of the Gonja District from Salaga to that station.

11. From a commercial point of view cotton is the most important produce of these territories; it is grown in most parts of the Protectorate, and particularly in Dagomba, in sufficient quantities to meet local requirements, which are yearly increasing.

12. The question of the cultivation of this product for export in the Northern Territories cannot be taken up until better transport facilities are available.

13. The Volta River transport scheme has been abandoned, and all goods are now sent *viâ* the railway as far as Kumasi and thence *viâ* Yeji to Salaga, Kintampo, and Gambaga, respectively.

Force.

14. The troops stationed in the Protectorate, the headquarters of which is Gambaga, consist of the 2nd Battalion of the Gold Coast Regiment of the West African Frontier Force, and one battery of artillery.

RAILWAYS.

1. On the 1st of April, 1904, the last section of the railway from Obuassi to Kumasi (44 miles) was taken over from the Construction Department.

Capital Outlay.

2. The capital outlay on construction to the 31st December, 1904, according to the Construction Department books, was £1,756,409, which, added to capital expenditure incurred by the open lines, amounted to £1,782,134.

Length of Line.

3. The length of the line from Sekondi to Kumasi is 168 miles, the gauge 3 ft. 6 ins., and the permanent way laid with 50 lb. steel rails on steel trough sleepers. There are 19 stations, of which 13 are in the Colony and six in Ashanti.

Obuasi to Kumasi.

4. On leaving Obuassi (124 miles from Sekondi) the line continues to ascend until at 135½ miles the highest elevation is reached, 862 feet above sea level. Thence northwards there is a long descent, broken by a sharp rise and fall on each side of Bekwai Station, 151 miles, whence the road again rises to Kumasi Station (858 feet above sea level).

Improvement of Line.

5. The line has been much improved, and the derailments, mainly attributable to the defective state of the road, which were somewhat frequent during the first half of the year, have been considerably less during the six months ended the 31st of December.

Goods Sheds.

6. Goods sheds have been built at the Sekondi Jetty and also at Kumasi, which have proved of great convenience to the public. Storage for merchandise at several stations has been provided. As necessity arises, it is proposed to reserve spaces for local markets near each station.

Bridges and Culverts.

7. The bridges and culverts were reported as being in good working condition at the end of the year. The wooden jetty at Sekondi has been put in good order, and the repairs to the iron jetty completed.

Locomotive and Rolling Stock.

8. The locomotives and rolling stock underwent heavy repairs during the year; the engines suffering considerably owing to the lack of fresh water, caused from the prolonged drought.

Abnormal Drought.

9. The abnormal drought also increased the expenditure and difficulty in working the trains, and water had to be brought from the Bonsa River, a distance of 28 miles from Sekondi. The scarcity of water was also much felt at up-country stations.

Water Supply.

10. Investigations are being carried out with a view to obtaining a suitable water supply, but it necessarily takes a considerable time to collect accurate data on which to base a satisfactory scheme.

Consumption of Coal.

11. The consumption of coal per engine mile has been progressively reduced, and was 41·69 lbs. per mile for the half-year ended 31st December, 1904, as against 45·83 during the first six months of the year.

Rates.

12. By an agreement made with the Ashanti Goldfields Corporation, Limited, in 1897, the Government undertook not to lower (excepting by special arrangement) the average rate per ton per mile beyond 1*s.* 6*d.* in the up and 1*s.* in the down direction, or an average minimum of 1*s.* 3*d.* Negotiations are in progress with a view to the cancellation of the agreement.*

Cranage Charges.

13. The cranage charges on goods landed at the Sekondi Jetties were reduced from the 1st of January, 1904, to 7*s.* 6*d.* per hour, with a working minimum of three hours.

Principal Commodities and Native Produce.

Principal Commodities.

14. The principal commodities carried by the railway from 1st January to the 31st December, 1904, with the tons carried and the amount earned, are shown in Table XXVI.

* The Agreement was on the 19th April, 1905, cancelled by mutual consent, and on the 6th June new regulations and by-laws were made, and considerable reductions in the rates effected.

Native Produce.

15. The following are the various articles of native produce conveyed during the year, amounting to 5,105 tons, and producing a freight value of £8,883. The amount of freight earned for [illegible] months in 1903 was £950; decided progress has, therefore, been made in this direction:—

Articles.	Tons.	£
Cocoa	95	110
Corn...	80	82
Fish	885	1,674
Garri	145	150
Live Stock	63	537
Unclassified...	368	459
Onions	42	219
Palm Oil	55	98
Plantains	1,178	1,149
Rubber	433	3,189
Sheabutter	3	4
Timber	1,692	1,133
Yams	66	79
Total	5,105	8,883

Coaching Traffic.

16. The earnings from coaching traffic have increased considerably, and amounted to £31,475 for the year, or 21·30 per cent. of the total earnings of the railway. Whilst in the first class passenger traffic there is little or no improvement, there is a large increase in the number of ordinary second class passengers; "market" tickets will shortly be issued, by which it is hoped that a further improvement will be shewn.

Public Traffic.

17. The number of passengers and earnings from public traffic at each station are shewn in Table XXVII. It will be seen that the greatest number of bookings were at Tarkwa, as in the preceding year, and that the largest amount was earned at Sekondi. Seventy-three per cent. of the passengers were booked to or from stations between Sekondi and Abosso.

Goods Traffic.

18. The earnings from goods traffic at each station are shewn in Table XXVIII.

Downward Traffic.

19. The increase in the downward traffic, which is still only 16 per. cent. of the total tonnage carried, is shewn by the following figures:—

6 months ended	31st December, 1903	—Tonnage down	383
6 „ „	1st June, 1904,	„ „	913
6 „ „	31st December, 1904	„ „	2,443

Goods Traffic.

20. For convenience of reference, the earnings from goods traffic are here summarised:—

—	Weight.	Amount.
	Tons.	£
General Merchandise	23,409	108,804
Construction Materials	491	545
Government Stores	385	1,844
Cranage	—	1,400
Shunting	—	384
Demurrage	—	417
Total	24,285	113,394

*Revenue and Expenditure.**

21. The general result of the year's working is as follows:—

Revenue for first half-year	£32,289
Revenue for second half-year	24,382
Total Net Revenue ...	£56,671

22. Earnings were derived under the following heads:—

Coaching Traffic	£21,475
Goods Traffic	113,394
Telegraphs	136
Sundries	3,092
Total ...	£148,097

* Blue Book figures show actual receipts and payments in the year. Railway figures show revenue earned and expenditure incurred, although not necessarily received or paid, during the year.

23. Expenditure was incurred as under:—

Maintenance of Ways, Works, and Stations	£40,633
Locomotives, Carriages, and Wagons	29,855
Traffic	9,635
General Charges	9,627
Special and Miscellaneous	1,712
Total ...	£91,465

Percentage of Expenses.

24. The percentage of the expenses, therefore, to earnings is 61·76 per cent., and the percentage of net earnings on the capital outlay at 31st December, 1904, was 3·18 per cent.

General.

25. The maintenance, working, and receipts of the line have improved, and economy in expenditure has been effected in several directions.

Roads.

Saltpond-Insuaim Road.

1. The construction of the Saltpond-Insuaim road has been completed to within three miles of Essekuma.

Accra-Kyebi Road.

2. The road from Accra to Insawam (20¾ miles) and from Densuaffi to Kyebi (11 miles) was taken over by the Government from the Goldfields of Eastern Akim, Limited, and the intervening section from Insawam to Densuaffi (28¼ miles) was maintained by the Company under contract with the Government.

Minor Roads.

3. A number of roads have been added to those already under the operation of the Roads Ordinance, which are repaired and kept in good condition by the Chiefs responsible for them, for which they receive a payment from the Government.

Immigration and Emigration.

There was considerable immigration into the Colony from the Kroo Coast and other places in connexion with the various mines and trading establishments. There was no emigration.

Public Works.

Expenditure.

1. The total amount spent on public works throughout the Colony during the year was £62,239 17*s.* 6*d.*, divided up as follows:—

Cost of Establishments	£12,731	10	6
Other Charges	831	15	11
Public Works Recurrent ...	17,675	6	1
Public Works Extraordinary ...	31,001	5	0
	£62,239	17	6

2. The amount expended was less than was anticipated, owing to illness amongst the various members of the staff, which delayed the preparation of plans and the delivery of material from England.

Tarkwa.

3. Amongst the Public Works Extraordinary the work of laying out a township at Tarkwa with roads and drains was practically completed; the site is laid out in building plots.

A small prison was also built.

Sekondi.

4. Further improvements were carried out at Sekondi by making new streets with side drains.

Extension of Warehouse.

5. Foundations were prepared for the iron structure of the extension to the King's Warehouse, which has been necessitated by the increase of trade to this Port.

New Central Prison.

6. The site for the new Central Prison has been selected and cleared, and work on the enclosure wall commenced.

Proposed Lighthouse.

7. The proposal to provide a lighthouse for the Port was abandoned.

Water Supply.

8. Investigations for a water supply have been carried out during the year owing to the great scarcity of water, and eight additional tanks of 7,000 gallons capacity each have been provided in order to store the water from the roofs of the various buildings.

Accra (Water Supply Scheme).

9. At Accra further investigations in connexion with the scheme for the supply of water from the Adjimenta Valley, in the neighbourhood of Aburi, were proceeded with.

Printing Office.

10. A new printing office, built of stone to replace the present wooden building, was taken in hand, but it was not found possible to complete it during the year.

Arim.

11. Land was acquired for a new cemetery at this station.

Mine Surveys.

Work Done.

The amount of work done from October, 1903, to June, 1904, the period during which the working parties were actually in the Colony, was an improvement on the amount of work done during the same period in 1902-1903. Owing to the large number of Mining Companies requiring properties checked and boundaries cut, it was not possible to carry on very much traverse work, though two important connections were made. In addition to the traverse work, 3,000 miles of chain and compass work was carried out. The total amount recovered from the various Mining Companies was £18,281.

Changes in the Establishment.

1. On the 9th of February, Major Sir Matthew Nathan, K.C.M.G., R.E., left for England on his appointment as Governor of Hong Kong, and Major H. Bryan, Colonial Secretary, administered the Government until the arrival of Governor Rodger, C.M.G., on the 3rd March.

2. Captain Sir Donald Stewart, K.C.M.G., Chief Commissioner of Ashanti, severed his connexion with this Colony on the 8th July on his appointment as Commissioner of the East Africa Protectorate.

3. Lieutenant-Colonel A. Morris, C.M.G., D.S.O., having completed the period for which he was seconded as Chief Commissioner of the Northern Territories and Commanding Officer of

the 2nd Battalion of the Gold Coast Regiment, was restored to the establishment of his British Regiment on the 7th December.

4. Major H. Bryan, who had been acting as Colonial Secretary from the 29th of November, 1903, was appointed to that office on the 14th of February.

5. Mr. A. M. Anderson, late Director of Public Works, who had completed over 10 years' service in the Colony in that capacity, died on the voyage to England on the 23rd March, and Captain W. E. Lees, R.E., who was appointed to succeed him, arrived in the Colony on the 22nd November.

Transport (Labour).

Rate of Wages.

1. The Government Transport Department has succeeded in reducing the rate of wages for carriers on a long engagement from 1*s.* a day and 3*d.* a day subsistence to 25*s.* a month with 3*d.* a day subsistence, and all those employed either as labourers or carriers in Ashanti and the Northern Territories and by the Mines Survey are now on the lower rate.

Labour.

2. Labour has been adequate for all purposes. The mines are now able to obtain most of the labourers they require without the assistance of the Department, and the requirements of the railway, owing to the improvements effected in the condition of the permanent way, tend to decrease steadily.

Suitability of Climate for Europeans, and Openings for White Labour.

The climate is malarious and not suitable for the prolonged residence of Europeans. European employes, belonging to mining and mercantile communities, are engaged in England. There is little hope of obtaining employment, and Europeans should not come to the Colony on the chance of obtaining employment, where the openings for white labour are few.

Rates of Wages and Cost of Living.

1. The rates of wages are high, and the cost of living has considerably increased in recent years, particularly in the Western Province, which is the centre of the mining industry.

2. In Accra and the Eastern Province the wages of domestic servants range from £1 to £2 10*s.*, and of cooks from £2 to £4 per month; at Accra and Cape Coast the hotel charges are 10*s.* a day, and at Sekondi, 20*s.* a day.

3. The rate paid by the Government for carriers has been reduced from 1*s.* a day and 3*d.* a day subsistence, to 25*s.* a month with the same amount for subsistence; short journeys to and from the principal coast towns are at a fixed rate. Contractors at Accra and Cape Coast supply the Government with carriers. Native carpenters and masons can earn 1*s.* 6*d.* to 3*s.* a day; bricklayers, 1*s.* 6*d.* to 2*s.* 9*d.*; coopers and painters, 1*s.* to 1*s.* 9*d.* a day.

4. The rates of wages paid to native miners vary from 1*s.* 3*d.* to 1*s.* 6*d.* a day for surface labourers, and 1*s.* 9*d.* for underground work. The Government Transport Department have done valuable work in organising and regulating the employment of labour for the mines in the Western Province, and it is mainly by the efforts made by this Department that the rate of labour has been reduced to the present figure.

5. The labourers sent to the mines by the Transport Department are hired on contract for six months or a year, and, with the exception of occasional advances, do not draw their pay until their contract is completed. Labourers receive subsistence money, whether they work or not, until their contract is finished.

6. While there is no doubt as to there being a sufficiency of labour on the Gold Coast, supplemented as it is at present from other Colonies, complaints are made as to its quality. The value of a gang of labourers usually varies with the ability of the European in charge. One overseer will condemn as worthless a gang out of which another will get excellent results. Under efficient supervision, or working on a fair system of daily task work, a fair day's work is generally obtained.

General Conditions.

1. The general condition of the Colony was satisfactory. As stated elsewhere the total value of imports was less than in the previous year, but, on the other hand, the exports showed a very large increase.

2. There were no internal disturbances of a serious nature, and the friendly relations of the Government with the various native tribes were maintained.

C. H. Hunter,

Acting Colonial Secretary.

26th August, 1905.

ORDINANCES PASSED.

Gold Coast Colony.

No.	Ordinance.
1	To make provision for the removal of lunatics from the Colony.
2	To further amend the "West African Frontier Force (Gold Coast Regiment) Ordinance, 1901."
3	To amend the "Railway Ordinance, 1898."
4	To facilitate the proof of the election and installation and the deposition of chiefs in accordance with native custom.
5	To amend "The Kwitta Customs Tariff Ordinance, 1894."
6	For making final provision for the Public Service for the year 1903.
7	To provide for the service of the Gold Coast Colony during the year 1905.
8	To amend "The Pensions Ordinance, 1902."
9	To regulate the sale of Wine and Beer.
10	To further amend "The Kwitta Customs Tariff Ordinance, 1894."
11	To prevent the illegal detention of Stool property.
12	To vest the control of Savings Banks in the Posts and Telegraphs Department.
13	To repeal "The Customs Tariff Ordinance, 1898," and to substitute other provisions.
14	To amend "The Police Ordinance, 1894."

Ashanti.

No.	Ordinance.
1	To further amend the "Ashanti Administration Ordinance, 1902."
2	To regulate the law relating to sentences of flogging and whipping in Ashanti.
3	To further amend "The Ashanti Concessions Ordinance, 1903."

Northern Territories.

No.	Ordinance.
1	To regulate the law relating to sentences of flogging and whipping in the Northern Territories of the Gold Coast.
2	To regulate the rights of prospecting and mining in the Northern Territories of the Gold Coast.
3	To amend "The Northern Territories Administration Ordinance, 1902."

No. 488.

GOLD COAST.

(For Report for 1904, *see* No. 465.)

THE ACTING GOVERNOR to THE SECRETARY OF STATE.

Government House, Accra,

11th June, 1906.

MY LORD,

I HAVE the honour to transmit to your Lordship, herewith, the Annual Report on the Blue Book of the Gold Coast Colony for the year 1905.

I have, &c.,

H. BRYAN,

Acting Governor.

REPORT ON THE BLUE BOOK OF THE GOLD COAST COLONY FOR THE YEAR 1905.

I.—FINANCIAL.

(A.) Revenue and Expenditure.

Revenue.

1. The actual revenue for the year 1905, inclusive of a sum of £15,000 as the Imperial Grant-in-aid towards the cost of the administration of the Northern Territories, was £586,221 8*s.* 1*d.*: being £97,143 11*s.* 11*d.* under the estimate and £95,971 11*s.* 11*d.* less than the revenue of the previous year. The actual deficit on the year was £29,897.

2. The heads of revenue of the Colony, Ashanti and the Northern Territories for the years 1904 and 1905, are shown for the purposes of comparison in Table I. attached to this report.

3. An analysis of this table shows that small increases were realized under the following heads:—"Light Dues," "Rent of Government Property," "Interest," "Miscellaneous," and "Revenue from the Northern Territories." On the other hand decreases occurred under the heads:—"Customs," "Licences," "Fees of Court," "Post Office," "Revenue from Ashanti," "Railways," "Land Sales," and Imperial Grant-in-aid toward the cost of the administration of the Northern Territories.

4. The increase under the head "Miscellaneous" is chiefly due to the sale of ammunition to the Government of Northern Nigeria, and that under the head "Northern Territories" to augmented collections of Caravan Taxes.

5. The heavy decrease under the head "Customs" is due mainly to the severe depression in trade which marked the whole year, and partially to the fact that duties which would in the ordinary course have been paid in 1905 were actually paid in 1904 in anticipation of the increase in the Tariff which was effected by Ordinance No. 13 of 1904. The decrease under "Licences" is caused by the allocation of licences collected within the town of Sekondi to the newly established Sekondi Town Council. Under "Fees of Court" decreases occur in the sub-heads "Stamp Duties," "Mines Police," "Mines Surveys," and "Transport Agency." These may be attributed to the depression which prevailed in the mining industry. The decrease under "Revenue from Ashanti" is due to the Royalties which accrued during the year not having been paid by the 31st of December. The decrease under "Railways" may be put down to the dulness of trade generally and, in part, to the reduction of rates introduced on the 1st of July. Under "Imperial Grants"

the decrease is due to the reduction by the Imperial Government of the Grant-in-aid towards the administration of the Northern Territories.

6. The receipts of revenue from Ashanti and the Northern Territories are shown in Table II. attached to this Report.

7. The net amount credited to the Colony during the year by the Imperial Government towards the cost of the administration of the Northern Territories was £13,759 6*s.* 6*d.* which represents the payment in full of the sum of £15,000 which appears in the estimates—the difference of £1,240 13*s.* 6*d.* having been refunded to the Imperial Government in respect of overpayments for the years 1904-5.

Expenditure.

8. The expenditure for the year 1905 was £616,118 11*s.* 2*d.* as against £622,376 11*s.* 5*d.* in the previous year, representing a decrease of £6,258 0*s.* 3*d.*, notwithstanding the repayment of £20,000 to the Imperial Government in respect of loans.

9. The headings under which the principal decreases have been effected are "Provincial and District Commissioners," "Customs," "Preventive Services," "Transport," "Railways," and "Mines Surveys." The considerable saving under the head "Mines Surveys" is due to a reduction effected in the number of surveyors and carriers employed.

10. The principal increases are under the heads "Printing Office," "Post and Telegraphs," and "2nd Battalion, Gold Coast Regiment." The increases which appear under the head "Native Affairs," and "Mines Departments" are due to the establishment of those departments during the year under review

11. The expenditure in detail of the Colony, Ashanti and the Northern Territories for the years 1904 and 1905 is shown in Table III. attached to this Report.

12. Table IV. gives the details of expenditure in Ashanti and the Northern Territories under all headings of the Estimates under which such expenditure was incurred.

General.

13. The Revenue for 1905 compared with that for 1904, exclusive of Grants-in-aid of the Northern Territories, shows a decrease of £57,930 18*s.* 5*d.* Notwithstanding this large decrease, the Revenue for 1905, exclusive of the extraordinary receipts as mentioned in the Comparative Statement of the Revenue and Expenditure, exceeds that for any year prior to 1904. The decrease, however, would not have been so marked had it not been for the reasons assigned in paragraph 5 above with respect to the receipts in Customs duties, and for the fact that the Royalties due were not collected by the close of the year.

Comparative Statement of Revenue and Expenditure for ten years from 1896 to 1905, inclusive.

Revenue.						Expenditure.					
Years.	Amount.				Remarks.	Years.	Amount.				Remarks.
	£	s.	d.				£	s.	d.		
1896	237,460	6	7			1896	282,277	15	8		
1897	233,179	1	6			1897	401,691	10	1		
1898	303,821	12	4		Includes Imperial Grant-in-aid of £45,000 on account of Northern Territories.	1898	377,975	17	1		
1899	422,795	15	10		Includes Imperial Grant-in-aid of £100,000 on account of Northern Territories.	1899	309,657	15	3		
1900	585,583	7	5		Includes £50,000 Grant-in-aid of Northern Territories and £202,300 on account of Ashanti disturbances.	1900	515,656	19	2		Includes £243,453 9*s.* 2*d.* expended on account of Ashanti disturbances.
1901	693,893	3	0		Includes £25,000 Grant-in-aid of Northern Territories and £197,700 on account of Ashanti disturbances.	1901	469,459	9	1		Includes £124,392 5*s.* 2*d.* expended on account of Ashanti disturbances.
1902	501,754	9	6		Includes £10,000 Grant-in-aid of Northern Territories.	1902	547,607	13	0		Includes £34,734 10*s.* 10*d.* expended on account of Ashanti disturbances, and £24,000 repayment of loan.
1903	577,552	16	1		Includes £23,000 Grant-in-aid of Northern Territories.	1903	593,956	7	9		Includes £14,624 8*s.* 5*d.* expended on account of Ashanti disturbances.
1904	682,193	0	0		Includes £31,800 4*s.* 4*d.* Grant-in-Aid of Northern Territories.	1904	622,376	11	5		Includes £5,612 0*s.* 7*d.* expended on account of Ashanti disturbances.
1905	586,221	8	1		Includes £13,759 6*s.* 6*d.* Grant-in-Aid.	1905	616,118	11	2		Includes £4,106 15*s.* 2*d.* on account of Ashanti disturbances; and £20,000 repayment of loans.

(B.) Taxation.

1. In the Colony proper there is no direct taxation. Taxes on caravan traders are collected at certain stations situated on the main roads in Ashanti and the Northern Territories.

2. In Ashanti tolls are collected at Attabubu, Mampon, Kratchi, Sikassiko, and Odumase; and in the Northern Territories at Wa, Bole, Gambaga, Salaga, Yegi, and Navarro. The authorized rates are as follows :—

	s.	*d.*
For each horse	5	0
For each head of cattle, except calves ...	3	0
For each calf...	1	6
For each sheep, or goat	0	6
For each lamb, or kid	0	3
For each donkey	2	0
For each carrier's load of trade goods or country produce, not being grain or kola	2	0
For each donkey-load of similar goods ...	4	0
For each carrier-load of kola	3	0
For each donkey-load of kola	6	0

(C.) Assets and Liabilities.

The excess of assets over liabilities on the 1st of January, 1905, amounted to £355,380 6*s.* 3*d.* On the 31st of December, 1905, the excess was £332,082 2*s.* 1*d.* This decrease is explained in the appended statement :—

	£	*s.*	*d.*
Excess at 1st January, 1904	355,380	6	3
Add Revenue for 1905	586,221	8	1
	941,601	14	4
Deduct Expenditure for 1905 ...	616,118	11	2
	325,483	3	2
Add also, the payments made on account of the expenses of the Central African Regiment in 1900-1901 (£5,603 2*s.* 9*d.*), and the mutiny of the West African Regiment in 1901 (£995 16*s.* 2*d.*), erroneously deducted in 1904 from the gross sum due by this Government to the War Office.	6,598	18	11
Excess of Assets over Liabilities at 31st December, 1905	£332,082	2	1

This surplus is accounted for as follows:—

Assets.

	£	s.	d.
General Imprest Account (cash in hand	46,066	12	10
Gold Ornaments with Crown Agents	57	18	2
General Assets, exclusive of Advances for Railway purposes	49,530	9	5
Advances out of accumulated Revenue over Expenditure for the construction of the Railway from Sekondi to Kumasi, including expenses of Survey	265,685	8	6
	361,340	8	11

Liabilities.

	£	s.	d.	£	s.	d.
As shown in Table V.	49,348	0	2			
Less amount secured by Investment appearing on the contra side	20,899	14	0			
	28,448	6	2			
Plus Drafts, and Remittances (Family Remittances, &c., in transit)	810	0	8			
				29,258	6	10
				£332,082	2	1

The detailed statement of assets and liabilities on the 31st of December, 1905, is set forth in Table V attached to this Report.

(D.) Public Debt.

During the year the amount of the Public Debt was reduced by £24,343. This reduction was effected by the repayment of £20,000 to the Imperial Exchequer; of £3,971 to the Government of Lagos; and a decrease of £371 in the amount advanced by the Crown Agents for the Colonies pending the issue of the loan sanctioned for Public Works. In addition to the actual reduction of the Public Debt, £5,175 was contributed out of Revenue to the Sinking Fund for the liquidation of the Railway Loan.

On the 31st December, 1905, the Public Debt, exclusive of the claim made by the Government of Northern Nigeria on account of troops lent during the Ashanti Expedition of 1900 to 1901, amounted to £2,248,158 14*s.* 2*d.* of which details are given in the following Statement :—

Due to the Imperial Government.

	£	s.	d.	£	s.	d.
(1) For Telegraph line to Northern Territories, 1897 to 1898	29,441	10	8

(E.) Currency.

Legal Tender.

1. The currency and legal tender is British sterling with the addition of the undermentioned French, Spanish and American gold coins the values of which are fixed by the Demonetization Ordinance, No. 2 of 1880:

—	Nominal Value.	Legal Value.
		£ s. d.
French—		
Napoleon	20 francs.	0 15 10
Spanish—		
Doubloon	16 dollars.	3 4 0
Half Doubloon	8 „	1 12 0
American—		
Double Eagle	20 dollars.	4 2 0
Eagle	10 „	2 1 0
Half Eagle...	5 „	1 0 6
Quarter Eagle	2 „ 50 c.	0 10 3

2. British silver coins are legal tender to an unlimited amount; British bronze coins are legal tender up to any amount not exceeding one shilling. There is a small circulation of the United States half-dollar but the coin is not legal tender and is not accepted by the Government; its current value is two shillings.

British bronze coins are generally superseding cowries in the coast towns and also at Kumasi.

Banks.

3. The Bank of British West Africa, Limited, is the only commercial bank established in the Colony; it has branches at Accra, Cape Coast, Sekondi and Axim, and has acquired sites for buildings at Tarkwa and Kumasi.

(F.) Municipal Bodies.

Town Councils.

1. The provisions of the Town Councils Ordinance, 1894, were extended to Cape Coast on the 1st of July, 1905.

2. Table VI. is a comparative statement of the revenue and expenditure of the Accra Town Council for the past five years, and of the Sekondi Town Council for the first year of its establishment.

II.—TRADE, AGRICULTURE, AND INDUSTRIES.

(A.) Imports and Exports.

1. Table VII. shows the value of Imports, Exports, and of the total trade of the Colony for the preceding five years. It will be observed that though the value of the trade in 1905 was less by £209,670 than that of the previous year, yet, with that exception, the total is the highest previously recorded.

Imports.

2. The total value of all imports in 1905 was £1,486,068 (exclusive of expenses on specie), as against £2,001,857 in 1904, showing a decrease of £515,789.

		£
The value of Imports paying specific duties was		360,292
" " " " *ad valorem*	"	784,674
" " " free of duty was	...	341,103
		£1,486,069

3. Table VIII. shows the value in sterling of imports and their countries of origin for the years 1903, 1904, and 1905.

4. The principal articles imported together with their values, showing the increases and decreases as compared with the previous year, are shown in Table IX.

The only items showing increases are "Firearms," "Gunpowder," "Bread and Biscuits." The decreases amounted to £515,789 of which nearly one-half was made up of—

		£
Specie ...	...	170,443
Machinery	...	85,804
		£256,247

These reductions are accounted for by the depression in the mining industry. Less specie has been required for the payment of wages and several of the mines had completed their equipment of plant at the end of the previous year.

Of the balance of £259,542, the principal articles which show a decrease in value are :—

	£
Wearing apparel	18,996
Cotton goods	18,530
Hardware	14,281
Provisions	57,101
Spirits	19,692
Other articles	53,845
Building materials	8,610
Beads	7,866
Perfumery	7,466
Tobacco (unmanufactured)	9,960
Wines	7,372

With the exception of the items "Provisions," £57,101; "Building Materials," £8,610; and "Wines" £7,372, the decreased consumption of which may be attributed to the cause referred to above, the main items consist of articles which in prosperous years are purchased by natives. Under the head "Exports" the causes which have contributed to the serious falling off in the value of Exports, other than gold and specie, will be explained.

5. Imports from the United Kingdom decreased by £390,576 as compared with the previous year.

With respect to Foreign Countries the Imports from

	£
Germany decreased by	42,370
United States decreased by	14,963
Holland decreased by	8,544
Lagos decreased by	24,675
Sierra Leone decreased by	7,218
Other British Colonies decreased by ...	24
Other Foreign Countries decreased by...	28,549
	£126,343
France increased by	1,130
Net decrease	£125,213

Exports.

6. The total value of all exports in 1905 was £1,646,145, being an increase of £306,119 over the previous year.

Gold exported shows an increase of £250,975, and the value of specie exported £97,621.

7. In order to arrive at the value of the exports of the principal agricultural products it is necessary to deduct from the total amount the value of gold and specie.

1904.—Total exports	...	...	£1,340,026
Gold	...	... £345,608	
Specie	...	... £93,025	
			£438,633
Total, other exports		...	£901,393

1905.—Total exports	...	...	£1,646,145
Gold	...	... £596,583	
Specie	...	... £190,646	
			£787,229
Total, other exports		...	£858,916

From the above figures it is apparent that agricultural and other natural products show a decrease of £42,477 as compared with the previous year.

The four main articles of what may be termed "natural products" show a decrease in value of £98,439, which is made up as follows :—

	£
Palm oil	... 40,393
Rubber	... 36,869
Cocoa	... 13,216
Palm kernels	... 7,961
	£98,439

On the other hand the value of the following articles increased by £59,138 :—

	£
Lumber	... 30,134
Cola nuts	... 5,348
Other articles	... 23,656
	£59,138

8. The main cause for the continued decrease in the exports of the principal natural products during the past years is the abnormally dry seasons which have prevailed in the years 1903, 1904 and 1905.

A subsidiary cause is, it is believed, the method of business which has been adopted by some of the principal firms trading in the Colony. The system adopted may be termed a "ring" and consists of an arrangement by which the parties interested give a uniform price for native produce which is pooled and eventually divided pro rata. This method of doing business may, or may not, be immediately profitable to the purchasers but it is destructive of healthy competition and tends to create distrust on the part of the producers and a consequent hesitation in bringing their crops for sale.

A factor which checks any improvement in the quality of native produce is the system of making large money advances to farmers against prospective crops. It follows that cultivators who are unable to fulfil the contract made by accepting these advances are driven to purchase the balance required regardless of quality and at the lowest possible prices.

9. The increase of £30,000 in the value of lumber exported was chiefly due to the opening up by the railway of new districts.

The trade in cola nuts has steadily improved since the year 1902 when the total value exported was £37,474 as against £60,111 during the past year. This export is hampered by the excessive ocean freight charged by the shipping company, the rate being no less than £2 10*s.* a ton from both Cape Coast and Accra to Lagos.

Table X. shows the comparative values of the principal articles of export for the years 1904 and 1905.

Table XI. gives the quantity and value of the cocoa exported since the year 1894.

As stated above the value of the exports of gold shows the satisfactory increase of £250,975. Twenty companies exported gold in the year under review as against 13 in the previous year.

Table XII. shows the trade of the principal and minor ports of the Colony for the years 1904 and 1905.

It is interesting to observe that whereas the amount of Cotton exported to the United Kingdom in 1904 was 57,616 lbs., valued at £434; in 1905 the exports, though amounting to only 24,756 lbs., were valued at £443.

(B.) Mines, Manufactures, and Fisheries.

1. As mentioned under the preceding head, "Exports," the increase in the value of gold amounted to £250,975.

2. Table XIII. gives a list of mining companies which exported gold during the year, together with the respective amounts.

3. Table XIV. shows the comparative amount and value of gold exported since the year 1880. In this table it will be seen that since the year 1902 the value of gold produced has increased by nearly half a million pounds sterling, the figures being for 1902, £96,880, and for 1905, £596,583.

4. The number of concessions filed in the Colony was 13, as compared with 50 in 1904 and 21 certificates of validity were granted.

5. The Concessions Ordinance of 1900 was amended during the year by No. 14 of 1905 which, *inter alia*, allows the Court, with the consent of both the granter and holder of a concession, to vary, add to, or otherwise modify the terms of a Certificate of Validity. This provision has been much appreciated by both parties and has been largely put to use.

6. The health of the Europeans employed at the mines continues to be very satisfactory. Many of the mining companies possess well-equipped hospitals and an adequate medical staff. The mining companies, generally, are fully alive to the necessity of effectually supervising the sanitation of the villages occupied by the natives they employ, and, in some instances, have for this purpose obtained the services of European Sanitary Inspectors.

Manufactures.

7. The only manufactory properly so called in the Colony is that at Cape Coast for the making of soda-water. The marshes in the vicinity of Adda and Keta produce a considerable amount of salt which is chiefly transported in canoes up the Volta River and eventually finds its way to the Northern Territories.

Fisheries.

8. A large portion of the inhabitants on the coast line are fishermen and considerable quantities of fish not required for local consumption are cured by being sun-dried and sent to the interior. The traffic in this article of food on the railway has largely increased during the past year.

(C.) Agricultural Industries and Botanical Stations.

Rubber.

1. The increased demand for rubber seeds and plants, and especially for the variety known as Pará (*Hevea braziliensis*), indicates the wide-spread interest taken in the cultivation of

this product. The mere wholesale distribution of these seeds to persons ignorant of the proper method of planting will not, in itself, accomplish the replacement of the stock of rubber trees which have been destroyed in the past by ignorant methods of tapping, but it is anticipated that, at no distant date, the steps which have been taken to disseminate an elementary knowledge of practical and theoretical agriculture by the establishment of classes of instruction for teachers in elementary schools at the various botanical stations will be productive of good results.

2. During the past year 13,000 plants of Pará rubber were raised in the botanical gardens at Aburi, and were eagerly bought at the price of 1*s.* 6*d.* per dozen. In addition to these 1,185,900 seeds of *Funtumia elastica* and 168,000 seeds of the first-mentioned variety, imported from Ceylon, were distributed.

3. The Pará seedlings planted in 1903 at the Botanical Station, Tarkwa, have made good progress, and are exceptionally healthy trees, some of which have attained a height of 20 feet and are seven inches in circumference at a distance of three feet from the ground.

4. In a plantation under European supervision at Bonsu, near Kyebi, 48,000 Pará rubber seedlings raised last year are in good condition and ready for planting out. 500,000 Pará rubber seeds have been ordered from Ceylon for delivery during the present year.

Coco-nuts.

5. As has been mentioned in previous reports an experimental farm containing 11,100 coco-nut trees was established in Christiansborg in 1901. The abnormally dry seasons of 1903, 1904, and 1905, severely affected the young trees and it has been decided not to expend further sums on the upkeep of the plantation.

Cocoa.

6. The amount of cocoa exported during the past year was less by 43,850 lbs. than that exported during the previous year; the slight decrease was no doubt due to the exceptionally dry season. The cultivation of this product has been still further extended during the year under review and it is anticipated that the yield in 1906 will exceed the production in 1904 which amounted to 11,451,458 lbs. As mentioned under the previous heading, "Exports," no improvement in the quality of this product is to be expected so long as the merchants continue to pay a uniform price irrespective of value. In this connection the Superintendent of Agriculture for British West Africa in reporting on the cocoa industry recorded his opinion that "the great obstacle to the production of a better grade of cocoa, as

represented to me by the Native Chiefs with whom I conversed, is the position taken up by the Accra merchants whose object appears to be to keep the products of the country in a condition of inferiority so as to prevent the growth of competition. The fact that large money advances are paid out by them (the merchants) to farmers against prospective crops is in itself a sure means of checking any inducement to improve the quality; but apart from this, where no advances had been taken the cultivator appears to be in no better position owing to the system adopted of pooling purchases. It is clear that so long as the present conditions exist there is little hope of improvement."

Cotton.

1. The experimental cotton farm at Labolabo has been cleared during the past year to its full extent of 200 acres. The farm at Anum has been abandoned as the site is found to be unsuited for the cultivation of cotton and the soil less rich than that at Labolabo.

2. The Superintendent of Agriculture for the West African Colonies and Protectorates has reported that the condition of the cotton grown at Labolabo was as good as possible, that as an object lesson to the natives living in the district it was quite a success, and that, as a consequence, cotton has been grown to some extent in the neighbourhood on the assumption that there might be a local market for it.

This local market has now been established by the British Cotton Growing Association, which has taken over the management of the farm, the Government agreeing to contribute for three years one half of the cost of upkeep, subject to a maximum limit of £1,500 a year.

3. The total expenditure on the experimental farm from its establishment in July, 1904, up to the 31st of December, 1905, has been £3,424.

4. At least one of the cross-fertilizing experiments carried out by the Director of Agriculture promises to be successful, and the yield from a plot planted with a hybridized variety was about 1,200 lbs. of seed cotton per acre.

Botanical Stations.

5. The principal station at Aburi has continued to fulfil, during the past year, the object with which it has been established. The total number of plants of economic value distributed was 10,875 and the number of seeds 1,657,922. An interesting experiment was the raising of 7,000 camphor plants from seeds imported from Japan. These are reported to have done well. The plants of a new species of cocoa (*theobroma pentagona*) continued to make good progress. The beans of these plants are

larger and finer than those of the "Forastero" stock common in the Colony. Unfortunately many of the seeds of these plants have been stolen from the garden, the natives having appreciated the fact that the bean produced is of fine quality.

6. At Tarkwa 17,740 plants, 578 lbs. of cotton seeds, and 40 packets of other seeds of different species were distributed.

7. In 1906 a botanical station will be established at Kumasi in Ashanti. With the exception of kola, which is taken by caravans viâ the Northern Territories to Northern Nigeria, and rubber, large quantities of which find their way into French territory, Ashanti possesses, practically, no economic products. The chiefs, however, appear to be fully alive to the advantages of agriculture, and it is anticipated that the establishment of the station will prove an important factor in the peaceful settlement of this territory.

Exhibitions.

10. The samples of various economic products sent from the Gold Coast to the St. Louis Exhibition in 1904 were awarded a gold medal. The Colony was represented at the Colonial and Indian Exhibition held at the Crystal Palace in 1905 where the exhibit received gold medals for "Fibres," "Photographs," and "Descriptive Labels, Illustrations and Literature," and also secured an "honourable mention" for cured cocoa beans. The exhibit is now permanently housed at the Imperial Institute.

11. The Colonial Agricultural Show held at Accra in the month of November was entirely successful. The registered exhibits under all sections numbered 1,331 exclusive of a considerable number which, owing to want of space, the committee found it necessary to reject. The show, which was opened for two days, was visited by about 3,000 people, some of whom had come from considerable distances, who showed a keen interest in the various animals, poultry, and products exhibited.

Agricultural Concessions.

12. With a view to encourage the taking up of lands for the cultivation of rubber, cotton, cola and cocoa, the Concessions Ordinance of 1900 has been amended by Ordinance No. 14 of 1905, which, *inter alia*, provides for the exclusion from the principal Ordinance of lands leased for agricultural purposes whereby no right is either directly or indirectly given with respect to minerals or precious stones.

(D.) Lands.

1. The permanent alienation of land, which is generally the property of the tribe, represented by the Chief and his councillors or elders, is unusual. In the coast towns, however, land is

frequently owned by families or individuals, and conveyance by lease or sale follows the forms of English law.

2. The Concessions Ordinance of 1900 left native landowners free to dispose of their lands without the intervention of the Government and safeguarded their interests by empowering the Supreme Courts to invalidate concessions for which adequate consideration has not been given.

3. In the case of gold mining the area of concessions must not exceed five square miles and for other purposes twenty square miles.

No concession can be enforced without the leave of the Court, until it is certified to be valid. The Court, before issuing a certificate of validity, has to be satisfied that the concession has been properly obtained, that adequate value has been given, and that the interests of the lessors have been protected. The Court requires the land to be surveyed and the plan authenticated by the Director of Surveys.

4. By Ordinance No. 14 of 1905 the Governor may exempt from the operation of the Concessions Ordinance of 1900 any class of concessions whereby no right, interest, or property in or over land with respect to minerals or precious stones purports to be either directly or indirectly granted.

5. The usual terms on which a gold mining concession in the eastern part of the Colony is leased are, for an area of five square miles for 99 years.

(i.) A preliminary payment of £50 (called consideration money).

(ii.) An annual rent of £12 (known as occupation rent), until mining with machinery shall have been commenced.

(iii.) A mining rent of from £100 to £250 a year.

6. The usual size of a gold mining concession in other parts of the Colony is 1,000 fathoms square; the consideration money is from £50 to £100, the occupation rent £12, and mining rent £200. If the area be more than 1,000 fathoms, the Court usually requires a mining rent to be at the rate of £200 per 1,000 fathoms square.

7. In Ashanti the following terms are generally in force for concessions of five square miles:—

£1,000 consideration money.

£12 to £24 annual ground rent.

£200 to £300 mining rent.

(E.) Shipping.

Table XV gives a comparative statement of the number and tonnage of steam and sailing vessels entered and cleared in the Colony during the years 1904 and 1905. The number of steamers entered and cleared shows an increase of 19, and the number of sailing vessels entered shows a decrease of 4, and cleared a decrease of 10.

The decrease in the number of sailing vessels is due to the stoppage of the importation of rum from the United States, which, after showing a falling off to the extent of £4,208 in 1904, ceased altogether during the year under review.

Mail and Steamship Services.

The African Steamship Company and the British and African Steam Navigation Company (1900) *Limited.*

1. Mail steamers of these companies leave Liverpool every Saturday, calling at Sierra Leone, Monrovia, Axim, Sekondi, Cape Coast, and Accra, the length of the voyage being 14 to 15 days.

2. These companies also despatch cargo steamers every Wednesday and fourth Thursday from Liverpool, the Wednesday steamers calling at the principal Gold Coast ports, and the Thursday steamers at all Gold Coast ports outwards and homewards. The length of the voyage, Liverpool to Accra, varies from 30 to 37 days.

3. On the 15th of each month a steamer leaves Hamburg and calls at the principal Gold Coast ports, the length of the voyage being about 30 days.

4. Homewards :—The mail steamers of these companies call at Accra every Monday, also calling at Cape Coast, Sekondi, and Axim—the length of the voyage, Accra to Plymouth, by these steamers, being 17 days.

5. The steamers of these companies call at the Canary Islands or Madeira, and occasionally at both places, homewards.

Woermann Line.

6. A mail steamer of this line, outwards from Hamburg, calls at Southampton on the 12th of each month for passengers for the principal Gold Coast ports, the length of the voyage, Southampton to Accra, being 16 days. Cargo steamers of this line leave Hamburg on 2nd, 12th, 13th, 22nd, and 26th of each month, calling at most ports on the Gold Coast, the voyage to Accra varying from 25 to 32 days.

7. Two of this company's steamers leave Accra on 14th and 28th of each month homewards, calling also at Cape Coast, Sekondi, and Axim for mails and passengers, the voyage from Accra to Southampton taking about 16 days.

8. Cargo steamers of one or two French companies sailing from Marseilles call irregularly outwards and homewards at Gold Coast ports.

III.—LEGISLATION.

Ordinances of 1905.

1. Table XVI. gives a Schedule of the Ordinances passed in the Legislative Council during the year, together with those of Ashanti and the Northern Territories enacted by the Governor.

2. For the Gold Coast Colony 16 Ordinances were enacted; 7 for Ashanti; and 2 for the Northern Territories, the most important of which are as follows :—

No. 2.—"The Stamp (Amendment) Ordinance, 1905" amends the law as to cancellation of adhesive stamps contained in section 24 of the "Stamp Ordinance, 1889" which was based on section 24 of the English Stamp Act, 1870. The amendments follow as closely as local circumstances permit those introduced into the English law by sections 8 and 9 of the English Stamp Act, 1891, and should prove very useful in a community where the proportion of illiterate persons is very large.

No. 3.—"The Customs Tariff (Amendment) Ordinance, 1905" reduces the standard of strength on which the duties on spirits is to be calculated west of the Volta River from proof to 12½ degrees under proof, and raises the duties on all spirits above the new standard. The object of reducing the standard is to assimilate it to that in force in the Colony east of the Volta, and, approximately, to the standard in force in the neighbouring French and German Colonies of the Ivory Coast and Togoland.

No. 4.—"The General Loan and Inscribed Stock Ordinance 1905" repeals Ordinance No 5 of 1898, which had a similar short title, and re-enacts it with the provisions necessary to enable the Colonial Government to raise money by the issue of debentures as well as inscribed stock. The Debentures are for not less than £100, bear an interest not exceeding four and a half per cent., and are redeemable at par either by annual drawings or n a date not more than 50 years from the date of issue. The inscribed stock is issued under the Colonial Stock Act, 1877, the interest is not to exceed four per cent. and the stock is redeemable

not later than 50 years from the date of issue. Provision is made for sinking funds and for the conversion of existing loans into inscribed stock, and the Crown Agents for the Colonies are practically made agents for the Colony in England.

No. 5. "The Loan Ordinance, 1905" empowers the Governor under the last preceding Ordinance to raise £1,400,000 for the following purposes:—

	£
Equipment and completion of Sekondi-Kumasi Railway ...	925,000
Accra Harbour Works	100,000
Accra Railway	310,000
Sekondi Harbour Works	65,000

No. 6. "The Ascertainment of Boundaries Ordinance, 1905" was introduced to put a check on the multiplicity of suits relating to land, which arise in a country where land owners frequently have a common but undefined boundary somewhere in a belt of dense virgin forest. The powers of the Supreme Court with regard to the demarcation of boundaries, which are those of the English Courts of Equity, have proved insufficient to cope with the evil arising from this unsettled state of affairs. The Ordinance provides that whenever a dispute shall arise between the owners of adjoining lands, the owner of either such lands may apply to the Court to determine their common boundary.

No. 8. "The Mining Rights Regulation Ordinance, 1905" provides for the appointment of a Secretary for, and Inspectors of, Mines and confers upon these officers rights of inspection and the power to enforce precautionary measures in mines. It also imposes upon Mine Managers certain duties, and bestows upon the Governor in Council rule-making powers with respect to the working of Mines.

No. 9. "The Police (Amendment) Ordinance, 1905" provides for the formation and regulation of a Police Reward Fund to be created by the accumulation of departmental fines on the Police and the undisposed of property of deserters and deceased members of the Force.

No. 12. "The Supreme Court (Amendment) Ordinance, 1905" provides for an annual legal vacation of six weeks commencing on the third Monday in December in every year.

No. 13. "The Prestea (Broomassie-Fura) Railway Acquisition of Lands Ordinance, 1905" was introduced as a private Bill to empower the Prestea Railways, Limited, to acquire by compulsory purchase the lands necessary for the purposes of a Railway from Broomassie to Fura Junction. The Ordinance follows generally the methods adopted by the Government in acquiring land; it is

a short Ordinance only containing 17 sections, but local circumstances do not require the elaborate provisions needed in a more settled country.

No. 14. "The Concessions (Amendment) Ordinance, 1905" provides for the exclusion from the Concessions Ordinance, 1900, of lands leased for agricultural purposes (such as rubber planting), gives the Court a freer hand as to enforcing Concessions not for mining purposes which have not been certified to be valid, allows the Court with the consent of both parties to modify a Certificate of Validity and the effect of section 5 will be that where a concession enquiry is begun but not duly prosecuted up to a certain stage the Concessions will be forfeited.

No. 16. "The Firearms Ammunition and Gunpowder Ordinance (Supplementary) Amendment Ordinance, 1905" imposes an annual duty of £5 upon licences issued for the sale of arms and ammunition. This is in conformity with the practice obtaining in England under "The Gun Licence Act, 1870" and "The Explosives Act, 1875."

ASHANTI.

No. 1. "The Ashanti Special Constables Ordinance, 1905" makes provision for the appointment of Special Constables on occasions of urgency. The Ordinance closely follows Ordinance No. 5 of 1900 of the Gold Coast Colony.

No. 3. "The Ashanti Administration (Amendment) Ordinance, 1905" applies to Ashanti certain recent Ordinances of the Gold Coast Colony.

No. 4. "The River Volta Regulation (Ashanti) Ordinance, 1905" makes provision for the licensing and registration of canoes on the Ashanti reaches of the Volta River, similar to the rules passed in the Gold Coast Colony on the 3rd February 1905, by the Governor in Council under section 145 of the "Customs Ordinance."

No. 5. "The Ashanti Railway Assimilation Ordinance, 1905" repeals the Ashanti Railway Ordinances of 1902 and 1905, and applies to Ashanti the Gold Coast Railway Ordinances and Regulations thereunder for the time being in force, thus doing away with the separate legislation for the Ashanti portion of the line which has hitherto been necessary.

No. 5. "The Ashanti Administration (Further Amendment) Ordinance, 1905" adds the Savings Bank Ordinance, 1887, as amended by the Savings Bank Transfer Ordinance, 1904, to the Ashanti Administration Ordinance, 1902.

No. 7. "The Ashanti Administration (Further Amendment) Ordinance, 1905," adds the Fires and Occurrences Inquiry Ordinance, 1899, and the Mining Rights Regulation Ordinance, 1905, to the Ashanti Administration Ordinance, 1902.

NORTHERN TERRITORIES.

No. 1. "The Northern Territories Administration (Amendment) Ordinance, 1905," applies to the Protectorate the Ordinances of the Gold Coast Colony passed in 1903, 1904 and 1905 for the amendment of the "West African Frontier Force (Gold Coast Regiment) Ordinance, 1901."

No. 2. "The River Volta Regulation (Northern Territories) Ordinance, 1905," is precisely similar to the Ashanti Ordinance No. 4.

IV.—EDUCATION.

(A.) PRIMARY.

The number of schools in the Colony and Ashanti on the Inspection List in 1905 was 143, of which seven were Government schools; of the remainder, 134 succeeded in obtaining a Government Grant-in-aid.

2. Table XVII. is a comparative statement of the number of Government and assisted schools maintained in the Colony for the last three years; an increase of four is shown in the year under review.

3. The total number of scholars on the roll at the above schools during the year was 14,375; in 1904 the number amounted to 13,955, and in 1903 to 12,803.

The average attendance of scholars, together with the amounts of the Grants-in-aid earned during the three previous years, is shown in the appended statement:—

Year.	Government.	Assisted.	Total.	No. on Roll.	Average Attendance.	Grant in-aid.		
						£	s.	d.
1903 ...	7	117	124	12,803	9,411	4,647	3	3
1904 ...	7	132	139	13,955	10,234	4,636	5	7
1905 ...	7	136	143	14,370	10,379	5,052	12	3
Increase or Decrease 1905.	—	+ 4	+ 4	+ 415	+ 145	+416	6	8

4. Table XVIII. gives the classification of the schools under the various educational agencies.

5. Special grants amounting to £230 10*s.* 5*d.*, for the maintenance of buildings, furniture, apparatus, and for new buildings

and enlargements, were awarded during the year. The Basel Mission spent £213 11*s.* 7*d.* on new buildings, the Wesleyan Mission £51 7*s.*, and the Roman Catholic Mission £537 13*s.* On school equipment and repairs the Basel Mission spent £178 19*s.* 11*d.*, the Roman Catholic Mission £154 9*s.* 4*d.*, the Wesleyan Mission £153 12*s.*, and the Bremen Mission £3 4*s.* 6*d.* The sum of £494 3*s.* 3*d.* was paid in grants for scholars receiving industrial instruction.

6. There are about 164 schools in the Colony which are not eligible to receive a Government Grant-in-aid. Most of these are half-time infant schools, and in few of them is the average attendance over 20; further particulars as to these unassisted schools will be found in Table XIX.

7. The examinations for appointment to junior clerkships in the local Civil Service are now held twice a year instead of quarterly as formerly, and at some of the principal out-stations instead of only at Accra. Clerks are not eligible to be placed on the permanent establishment without passing the prescribed examination.

8. Table XX. shows the amount of school fees collected during the past three years. In 1905 the sum collected was £1,684, which shows a more than proportionate increase to that in the number of scholars on the rolls. A comparison with the average attendance shows an average payment of 3*s.* 1½*d.* per scholar, being an increase per head of 1*s.* 1½*d.*

9. There is nothing in the nature of a school rate or tax, and the fee in the Government schools is only 3*d.* per month for children in the Infant classes and 6*d.* per month for those in the Standards. Government schools at stations other than Accra and Cape Coast are free.

(B.) Secondary.

10. The schools in the Colony which purport to give an education higher than the elementary classes are the Accra "Grammar School," the Cape Coast "Graded School," and the Wesleyan "Collegiate School" with which is now incorporated the "Fanti Public School" at Cape Coast. No European teachers are employed on the staff of any of these schools at present, and it has yet to be shown that they have earned a right to be considered as effective secondary schools.

(C.) Industrial, Technical, and Agricultural Schools.

11. Twenty teachers volunteered, during the past year, to attend a course of instruction in agriculture at the Government Botanical Station at Aburi, and of this number 19 completed the course. Ten teachers were awarded certificates of proficiency and received a Government grant.

This agricultural course was first instituted in 1902 with a view to improve the work done on the plantations attached to many of the Mission schools and also to enable the teachers to acquire and impart a theoretical and practical knowledge of this subject, which is of the first importance to the inhabitants of the Colony in general. In the same connection prizes are offered by the Government to schools for the best cultivated plots or plantations.

Other Technical Instruction.

12. In connection with the Government Schools at Accra and Cape Coast classes have been established for instruction in cabinet making and at the Wesleyan School at Winnebah practical instruction is given in carpentry and other work in wood. The course of training extends over two years and pupils who qualify at its termination are admitted as apprentices to the Public Works Department. Some good work has been turned out by the printing press established at the Roman Catholic School at Cape Coast. Generally, technical instruction may be said to be appreciated and the articles made by the pupils which are shown at the annual School Exhibition reflect great credit on instructors and pupils alike.

V.—GOVERNMENT INSTITUTIONS.

(A.) Hospitals.

The Hospitals at Accra, Cape Coast and Sekondi, to which European nursing sisters are attached, are well equipped, the number of wards and beds being as follows :—

—	European Wards.	Beds.	Native Wards.	Beds.
Accra	3	7	4	25
Cape Coast	3	6	2	25
Sekondi	2	12	3	14

2. There are also smaller Hospitals at Axim, Elmina, Addah, Kwitta, Kumasi and Gambaga, and Dispensaries at Tarkwa, Saltpond and Akuse. Contagious diseases hospitals are maintained at Accra and Cape Coast.

3. The number of in-patients treated during the year at the various hospitals was 1,989, as compared with 2,496 in 1904, 2,540 in 1903 and 1,350 in 1902, the general health of the Colony was good.

(B.) Asylum.

1. There is only one Lunatic Asylum in the Colony, at Accra. Sixty patients remained in the Asylum at the close of 1904 under treatment, and 20 new cases were admitted during the year 1905, making a total of 80 cases—61 males and 19 females. Of these 4 were discharged from the Asylum, and 14 died, leaving 62 patients under treatment at the end of 1905.

(C.) Poor Houses; and (D.) Reformatories.

1. Poverty, in the strict sense of the word, is hardly known in the Colony and there are no poor-houses or reformatories.

(E.) Savings Bank.

By Ordinance No. 12 of 1904, the control of the Government Savings Bank was transferred from the Treasury Department to the Post Office with a view to popularize this institution and make its facilities more easily accessible to the General Public.

In spite of a year marked by unusual depression in all branches of trade the amount of business transacted by the Bank shows an increase. The number of depositors rose by 60 per cent., and the amount at credit of the Bank increased by 28 per cent. The result of the first year's working under the new conditions tends to show that the transfer of the Bank will be fully justified by results.

VI.—JUDICIAL STATISTICS.

(A.) Police.

Force.

1. The total strength of the Police force on the 31st December, 1905, was 613 of all ranks including eight European officers and six West Indian superintendents, made up as follows:—

General Police	411
Escort Police	119
Mines Police	46
Railway Police	37
	613

Recruiting.

2. Recruiting was almost entirely confined to natives of the Colony and the force has been kept nearly up to its authorized establishment.

Detective Branch.

3. There has been no increase in the detective branch of the force which numbers 2 Superintendents, 2 Sergeants and 12 Constables, who do good work.

Crime.

4. The return of crime shows that 7,150 cases were dealt with, as against 6,659 in the previous year, or an increase of 491. This increase is, to a great extent, accounted for by the importation of Lagos and Sierra Leone men as labourers and servants in the mining districts.

(B.) Prisons.

New Prison at Sekondi.

1. The construction of the New Prison at Sekondi was started during the early part of the year; good progress has been made and its completion is anticipated in the latter part of 1905.

Prison Industries.

2. The amount realized from the sale of prison industries during the year from the two principal prisons at Accra and Elmina was £494 12*s.* 10*d.*, or an increase of £382 5*s.* 2*d.* on that of the previous year. The total earnings of the prison for the year amounted to £8,841 7*s.* 9*d.*, as compared with £10,173 19*s.* 1½*d.* in 1904; the falling off being due to a reduction in the price of prison labour, the cost of the department being £12,611 9*s.* 5*d.*, or a decrease of £182 16*s.* 7*d.* compared with the expenditure for 1904.

General Remarks.

3. It is satisfactory to note that crime diminished; the total convictions amounted to 2,7[illegible], as against 3,159 in 1904. Prison industries, which were abolished in 1903, have been re-introduced, and it is hoped that the amount of earnings will further be increased in future years.

(C.) Criminal Statistics.

Table XXI. shows the number of offences, apprehensions, convictions, and acquittals, including Ashanti and the Northern Territories, for the last three years.

VII.—VITAL STATISTICS.

(A.) Population.

According to the last census, taken in 1901, the population of the Colony, Ashanti, and the Northern Territories was 1,486,433, but these figures are unreliable; the population is much greater and is increasing.

(B.) Public Health.

1. The general health of the population of the Colony and protected territories during the year has been good. Malaria was slightly less prevalent than last year.

Small-pox.

2. There has been a decrease in the number of cases of small-pox, the number of deaths being 1 in 25.

3. The rainfall was, on the whole, good, except in the eastern portion of the Colony where the want of water was seriously felt.

Health of the European Community.

4. The health of the Europeans in the Colony, Ashanti, and the Northern Territories has maintained the improvement noted in the previous year.

5. The following table gives the death and invaliding rate per 1,000 of the European community:—

How Employed.	Number.	Deaths.	Invalided.	Death rate per 1,000.	Invaliding rate per 1,000.
Officials	248	9	41	29·19	165·42
Mercantile Firms, &c.	272	3	26	11·02	95·58
Mining Companies	1,157	12	71	10·37	61·36
Missions	94	2	12	21·27	127·65
Total ...	1,911	26	150	13·60	78·49

6. In 1904 the number of deaths was 25, and the number of men invalided 157.

Health of the Native Population.

7. The health of the native population was fair, except at Accra where the abnormally dry season was, in many cases, a cause of suffering and ill-health.

Principal Diseases.

8. The principal diseases treated were malarial fever, diseases of the skin, ulcers, yaws, diseases of the intestines and respiratory organs.

(C.) SANITATION.

9. Improvements have been carried out in the sanitation of most of the principal towns during the past year, more especially in the cases of Sekondi and Kumasi.

(D.) CLIMATE.

10. The average rainfall for the year was higher than the previous year, although in many places in the Eastern Province the lack of water was seriously felt.

The following table gives the mean meteorological observations taken at Accra, Aburi, Cape Coast, Axim, Kwitta, Kumasi, Sekondi, and Gambaga during the year 1905 :—

Name of Station.	Temperature.						Rainfall.	
	Solar maximum.	Minimum on grass.	Shade maximum.	Shade minimum.	Range.	Mean.	Amount in inches.	Degree of humidity.
Accra	131·07	70·27	85·24	71·80	13·10	78·52	13·11	75·56
Aburi	145·59	69·90	86·83	71·11	12·07	78·89	36·87	87·04
Cape Coast ...	—	72·10	84·25	73·96	10·27	79·10	39·67	85·25
Axim	135·52	64·18	83·71	71·23	12·49	77·90	100·00	89·36
Kwitta ...	140·64	73·06	89·00	76·20	12·59	82·51	25·58	89·70
Kumasi ...	141·47	69·68	86·31	70·77	17·99	81·03	45·32	85·84
Gambaga ...	146·97	66·34	91·56	72·47	16·40	82·44	71·71	57·40
Sekondi ...	141·55	72·57	85·23	73·53	12·26	79·38	36·11	65·24

VIII.—POSTAL, TELEGRAPH, AND TELEPHONE SERVICES.

REVENUE.

1. The revenue of the department for the year amounted to £23,941 8*s.* 7*d.*, exclusive of the sum of £5,759 3*s.* 1*d.* collected on behalf of the African Direct Telegraph Company on account of cablegrams despatched from the various offices in the Colony; of £8,262 9*s.* 4*d.* realised on account of sales of Judicial Stamps, and of £2,142 11*s.* 4*d.* duty collected on parcels imported and subsequently credited to the Customs Department.

Sales of Stamps.

2. The revenue from stamps for postal and revenue purposes again shows a very considerable increase; this is partly due to the discontinuance of the issue of Judicial Stamps from 1st September. A slight decrease appears under stamps for telegraph purposes.

Comparative Collections.

3. The following statement gives the figures for 1904 and 1905 respectively:—

—	1904.			1905.		
	£	s.	d.	£	s.	d.
(a) Postage Stamps (for Postal and Revenue purposes).	9,681	17	5	11,186	3	8
(b) Postage Stamps (for Telegraphic purposes).	11,379	13	9	10,232	3	7
(c) Judicial Stamps	8,250	18	7	8,262	9	4

EXPENDITURE.

4. The expenditure for the year amounted to £24,810 19*s.* 1*d.* as against £23,400 8*s.* 6*d.* in 1904. This amount, however, includes the sum of £2,108 10*s.* 1*d.* on account of extra expenditure in connection with the extensions of the telegraph system from Attabubu to Yeji.

Correspondence.

5. There has again been a slight falling off in the amount of correspondence received in the Colony—the amount of ordinary mail matter dealt with was practically the same as in the previous year. 3,446,524 letters, postcards, newspapers, and book packets were received and despatched, as compared with 3,564,800 in 1904.

Registered and Insured Correspondence.

6. Registered and insured correspondence again shows an increase, 238,762 registered articles having been despatched, and 115,260 received, as compared with 137,900 despatched, and 103,500 received in 1904.

Parcel Post.

7. In the Parcel Post Service, increases have been recorded of 32 per cent. in 1903 over 1902, 5 per cent. in 1904 over 1903,

and the year 1905 shows a further increase of 28 per cent. over 1904. The total number of parcels imported was 37,660 while 4,380 were despatched; of these, 2,252 were insured. An Inland Parcel Post Service was inaugurated on August 1st from which date to the end of 1905, 807 parcels were posted and delivered.

Money Order Offices.

8. A money order office has been established at the head quarters of each district of the Colony, as well as at Kumasi and Obuasi in Ashanti.

Money Orders.

9. The total value of money orders issued was £36,328 14*s.* 8*d.* as against £54,963 2*s.* 11*d.* in 1904. The large decrease is due to the introduction and sale of British postal orders from the 1st October, 1904. These have largely superseded the issue of money orders.

Postal Orders.

10. Postal orders to the value of £31,442 4*s.* were sold during 1905 as compared with £8,556 1*s.* 11*d.* in 1904, an increase of 73 per cent. This large increase is accounted for by the substitution in 1904 of the British Postal Order for the Inland Postal Order formerly in circulation. These orders are payable not only in the Colony but also in the United Kingdom and in a large number of Colonies which have become parties to the scheme put forward by the Imperial Post Office. This means of making remittances became immediately popular, and its popularity is well-sustained.

Telegraphs.

11. On the 31st December there were 40 offices open to the public in the Colony, Ashanti, and the Northern Territories, with a total constructed length of 1,078 miles.

12. The total number of telegrams dealt with was 193,877, as compared with 270,518 in 1904. This is accounted for chiefly by the decrease in the number of official telegrams and the revenue has not been prejudicially affected thereby.

The number of official messages dealt with was 62,990 as compared with 104,040 in the previous year.

Telegraph Extension.

13. The telegraph extension from Attabubu to Yeji was completed during the year, and will be carried to Salaga in 1906.

New Offices.

14. A new office was opened at Yeji in September, which is the present terminal station of the projected N'Koranza-Salaga line.

15. The existing lines have been generally well maintained during the year.

Telephones.

16. The Telephone exchanges at Accra, Cape Coast, Sekondi, and Tarkwa connect all the Government Offices, most of the leading business houses, and mines in the Tarkwa District.

New Cable across the Volta River.

17. A new cable was successfully laid across the Volta River o replace the old one, which was faulty.

IX.—MILITARY FORCES AND EXPENDITURE.

West African Frontier Force.

Strength.

1. The strength of the Gold Coast Regiment of the West African Frontier Force, which consists of two battalions, was, n the 31st December, 1905, 54 officers, 12 European non-ommissioned officers, and 1,938 rank and file (natives).

1st Battalion.

2. The 1st battalion and a battery are stationed in Ashanti, ith headquarters at Kumasi, and detachments at Accra and ape Coast in the Colony.

2nd Battalion.

3. The 2nd battalion is stationed in the Northern Territories, with headquarters at Gambaga. A body of mounted infantry is attached to this battalion.

The battery formally attached to this battalion has been abolished.

Cost of Up-keep.

4. The expenditure incurred in the up-keep of this force in 1905 was £83,870.

VOLUNTEERS.

Authorised Establishment and Actual Strength.

1. The authorised establishment of the Gold Coast Volunteers on 31st December, 1905, was 524 of all ranks. The actual strength of the force was 430, or an increase of 61 as compared with the previous year.

Machine Gun Sections.

2. Owing to the decrease in the number of European residents at Cape Coast, the machine gun section at that town has been disbanded. On the otner hand, sections were formed at Sekondi and Tarkwa where the movement has been keenly supported; at the latter station, many of the members have seen active service in South Africa.

Gold Coast Railway Volunteers.

3. This Corps was raised in 1905 for the protection of th Railway in time of war. The establishment consists of thre companies and a machine gun section at Sekondi, the latte being composed of Europeans. A fourth company, with its head quarters at Obuassi, in Ashanti, will be formed in 1906.

On the 31st of December, 1905, the total strength of all rank was 258.

Gold Coast Mines Volunteers.

4. This Corps was also raised during the year for the defenc of mining properties in time of war or internal disturbances Five companies have been formed in the Colony and two i Ashanti. All the members are Europeans, and the total strengt of all ranks on the 31st of December, 1905, was 279.

Ambulance Corps.

5. This Corps has been raised during the past year for tl purpose of training Volunteers to render "first aid in the field Two companies have been formed with their headquarters Accra and Tarkwa. Most of the members enrolled are hospit dressers or orderlies and should prove themselves useful in emergencies.

Armament.

6. All volunteer corps are armed with the Martini-Enfield carbine and '88 sword-bayonets.

Expenditure.

7. The total cost of the force for the year was £2,042 11*s.* 11*d.*, or an increase of £780 over the preceding year.

Preventive Services.

1. These services, which are branches of the Customs Department, are stationed along the eastern and western frontiers of the Colony; their duties are analogous to those of the Coast Guard in the United Kingdom.

2. The River Volta preventive service extends from Addah to Burai in the Northern Territories, just north of the eighth parallel, and consists of 28 stations. The western frontier of the preventive service extends from Half Assinie to Debisu, within five miles of the boundary of Ashanti, and consists of 25 stations. The authorised establishment of both services is 365.

Expenditure.

3. The expenditure in 1905 was £14,546.

GENERAL OBSERVATIONS.

Important Events.

1. The Loan Ordinance, No. 5 of 1905, which empowered the Government to raise the sum of £1,400,000 for the purpose of carrying on the under-mentioned public works, marked an important stage in the opening up of the Colony and its commercial development :—

	£
Equipment and completion of Sekondi-Kumasi Railway.	925,000
Accra Harbour Works	100,000
Accra Railway	310,000
Sekondi Harbour Works	65,000

2. The survey of the Accra Railway was commenced in November 1905, and, at the date of this report, has been completed as far as Mangoase, where it is proposed to make the provisional terminus with a possible extension northwards in the direction of Koforidua.

3. The Accra Harbour Works have been started and good progress has been made.

Ashanti.

1. The condition of Ashanti, in view of the small staff of Civil Officers available for administrative purposes, must be considered satisfactory. The attitude of the Ashantis towards their rulers is one of increasing friendliness and faith, and suspicion of ulterior motives is gradually losing ground.

2. The Revenue, however, shows a decrease of £1,432 as compared with that of the previous year. This decrease is entirely owing to the fact that payments of Royalties which accrued during the year had not been made up to the 31st of December. In other respects the Revenue shows a fairly satisfactory increase, especially under the heads of "Caravan Taxes" and "Sale of Stamps." These two items may be taken to indicate activity in trade and correspondence connected therewith.

3. The opening of branch stores at Kumasi by mercantile firms on the coast, to which reference was made in the Annual Report for 1904, has been an important factor in the development of trade, not only in Ashanti, but also with respect to that of the Northern Territories.

4. Under the head "Agriculture, Industries, and Botanical Stations" attention has been drawn to the establishment of a botanical station at Kumasi.

5. A well-equipped native hospital was completed at Kumasi during the year and a hospital for Europeans will be added in 1906.

6. The health of the European population is reported to have been good, the death-rate per 1,000 having been 19·30, as compared with a rate of 23·19 in the case of all officials serving in the Colony, Ashanti, and the Northern Territories.

7. The headquarters of the North-Eastern District have been transferred from Attabubu to N'Koranza, and those of the North-Western District from Odumasi to Sunyani.

8. The Annual Report on Ashanti for the year 1905, prepared by the Chief Commissioner, should be referred to for further information respecting this portion of the territories.

Northern Territories.

1. During the past year the Northern Territories have remained under peaceful conditions, and it has not been found necessary to utilize actively the military force for the maintenance of order.

2. Our relations with the French and German officials in the neighbouring territories continued to be of a cordial nature and friendly visits have been interchanged at or near the frontiers.

3. The Revenue of the Protectorate amounted to £13,414, an increase of £890 as compared with that realized in 1904.

4. The troops stationed in the Northern Territories consist of the 2nd Battalion Gold Coast Regiment, West African Frontier Force. There are no Civil Police in the Protectorate, which is administered by Military Officers. The Chief Commissioner is

also the officer commanding the Battalion, and the District Commissioners perform civil duties in addition to exercising the command of their companies.

5. An attempt was made towards the end of the year to cultivate more friendly relations with some of the wilder tribes of the Protectorate, which hitherto have been coerced rather than conciliated. The experiment, the main feature of which consisted in establishing a station in the Fra-Fra country with a store for the sale of trade-goods, promises to be entirely successful.

6. Further particulars with respect to this Protectorate will be found in the Annual Report on the Northern Territories by the Chief Commissioner.

RAILWAYS.

Capital Outlay.

1. The capital expenditure on the railway, subject to a final adjustment by the Treasury, to the 31st December, 1905, was £1,781,756. No work on capital account was undertaken during the year, but outlay was sanctioned on the following works and plant :—

	£
Re-construction of Sekondi No. 2 Jetty and equipment of 4 steam cranes	21,500
50 coal waggons...	14,640
Fitting locomotives and rolling stock with automatic vacuum brakes	4,152
50 coal skips	612
3 motor cars	565
	£41,469

Improvement of Line.

2. The line has been much improved, it is well ballasted, and derailments due to defective way are now of rare occurrence. The mean mileage maintained, including sidings, was 185m. 60c., at a charge of £177 1*s.* 1*d.* per mile. The cost of maintenance was reduced by 5 per cent. as compared with the previous year.

Locomotives and Rolling Stock.

3. The train service in the earlier part of the year was seriously disorganised by frequent engine failures; the locomotives had been allowed to deteriorate and the dislocation was

accentuated by the burning of wood fuel instead of coal. The experiment was abandoned as soon as its unfortunate results became apparent; the locomotives were taken in hand and are gradually being thoroughly overhauled and repaired.

4. Two new travelling cranes, with a capacity of ten tons and five tons respectively, mounted on bogey carriages, were added to the plant during the year.

Fuel.

5. Owing to a slightly lower rate in the cost of coal, and to the temporary use of wood fuel, a reduction was effected under this head from 10·19 pence to 7·65 pence per engine mile.

Water Supply.

6. In consequence of the drought (but 35 inches of rain fell in the year) the water supply proved inadequate.

The investigations referred to in the annual report for the previous year are being energetically carried out, and in the meantime new wells have been sunk, others deepened, and the overhead tanks improved.

Stations and Buildings.

7. The cost of up-keep was practically the same as in the preceding year. Steps are being taken to improve the quarters and add to the available accommodation.

Accidents.

8. There were 282 minor accidents in 1905 (146 of which were due to fallen trees) as against 329 during the preceding year, whilst there were only 15 derailments to trains on the running line (only four of which were due to defective way) as against 63 in 1904.

Rates.

9. The revision of rates which was brought into force on the 1st July, 1905, may be briefly summarised as follows:—

(*a.*) Coal and patent fuel were given a special rate of 8*s.* for the first 50 miles (including landing charges) and 1*d.* per ton per mile beyond that distance.

(*b*) The rate in Class II. was reduced from 2*s.* 6*d.* per ton mile to a sliding scale varying from 2*s.* 6*d.* to 1*s.* 9*d.* per ton mile, a concession which benefited the importers of machinery.

(*c.*) Reduced rates were given to consignments of bread and biscuits, drugs, haberdashery, kerosine oil, perfumery, cotton goods, flour, preserved milk, sugar, aërated waters, frozen fish, and provisions.

(*d.*) Special through rates to Kumasi were introduced in the cases of soap, cement, galvanized iron sheets, and imported rice.

Judging from the ready response with which these reductions were met, despite the adverse general condition of trade, it is believed they have been fully appreciated.

TRAFFIC.

Coaching Traffic.

10. The earnings from coaching traffic were £29,484, or less by £1,991 than in the preceding year.

The reduction in rate from 5*d.* to 4*d.* a mile and the issue of 500-mile coupons at 3*d.* per mile more than counterbalanced the increase in the number of first class passengers carried.

The decrease in second class passengers was chiefly at stations between Sekondi and Tarkwa, and is attributable to the general depression in trade and the mining industry.

Goods Traffic.

For convenience of reference the receipts from goods traffic, as compared with 1904, are here summarised :—

—	1905.		1904.	
	Tons.	£	Tons.	£
Merchandise, general	31,855	97,544	23,409	108,803
Railway Materials for construction...	—	—	491	545
Government Stores	328	2,317	385	1,845
Cranage...	—	594	—	1,400
Shunting	—	47	—	384
Demurrage	—	70	—	417
	32,183	100,572	24,285	113,394

The increase in the traffic handled amounted to 36 per cent. The particulars of goods traffic booked at stations as compared with the previous year are shown in Tables XXII. and XXIII.

The goods traffic may be grouped into the following five divisions, which compared with the corresponding figures for 1904, and, apart from the general reduction in rates from the 1st of July, tend to show that the decreased receipts have been caused more from a depression in the mining industry than from a want of progress in the general development of the railway traffic.

—	1905.		1904.	
	Tons.	£	Tons.	£
1. Native products for local consumption	3,289	5,567	2,842	4,232
2. Native products for export ...	7,713	13,029	1,759	4,086
3. Imports for trade purposes ...	6,175	32,464	4,946	28,240
4. Imports for the mining industry	13,441	38,057	11,705	56,213
5. Provisions, liquors, etc., imported generally for consumption and use by Europeans	1,565	9,551	2,542	16,319
	32,183	98,668	23,794	108,090

12. Turning to the export trade the increase is very marked. 566 tons of cocoa were carried, as against 95 tons in 1904; of rubber, 765 tons were carried as against 443 tons. Mahogany increased to 6,283 tons as against 1,219 tons in 1904.

The mahogany traffic requires special arrangements. Loading has to be done at various points on the single running line, and entails trucks being locked up for some days. Every effort, however, is being made to foster this industry, which, however, is hampered by heavy ocean freights. In connection with the goods traffic, it should be mentioned that the opening up of markets in Ashanti by the various commercial houses has had much to do with the increase in the carrying of the Import trade. The growth of the trade at Kumasi is illustrated by the following figures :—

—	1905.		1904.	
	Tons.	£	Tons.	£
Out	1,142	6,594	422	2,489
In...	3,155	22,289	1,775	15,818

REVENUE.

13. The general result of the year's working as compared with the preceding year is as follows :—

—	1905.			1904.		
	£	s.	d.	£	s.	d.
Gross receipts	132,752	0	0	148,096	0	0
" " per open mile	791	7	4	943	5	9
" " per train mile	1	2	9	1	8	7
Working expenses	82,477	0	0	91,465	0	0
" " per open mile	491	13	4	582	11	7
" " per train mile	0	14	1	0	17	8
Net earnings	50,275	0	0	56,631	0	0
" " per open mile...	299	14	0	360	14	1
" " per train mile...	0	8	7	0	10	11
	Per cent.			Per cent.		
Percentage of expenses to earnings ...	62·13			61·76		
Percentage of net earnings on capital outlay.	2·82			3·18		

It will be seen that while there was a considerable decline in earnings, amounting to £16,031, the working expenses were reduced by £8,988.

14. The earnings, which are here compared with those of the preceding year, were derived from the following sources :—

—	1905.	1904.
	£	£
Coaching	29,484	31,475
Goods	100,572	113,394
Telegraph... ...	—	135
Sundries	2,695	3,092
	132,752	148,096

EXPENDITURE.

15. The working expenses of the various branches of the railway were as follows :—

—	1905.		1904.		Increase.	Decrease.
	£	Per cent. on Total.	£	Per cent. on Total.		
Maintenance of Way, Works, and Stations.	32,888	39·88	40,634	44·43	—	7,746
Locomotive Expenses ...	29,657	35·95	29,855	32·64	—	198
Traffic Expenses	8,795	10·66	9,636	10·53	—	841
General Charges	9,408	11·41	9,628	10·53	—	220
Special and Miscellaneous	1,729	2·10	1,712	1·87	17	—
Totals	82,477	100·00	91,465	100·00	—	8,988

The working expenses, though reduced by £8,988, absorbed 62·13 per cent. of the gross earnings, as compared with 61·76 per cent. in 1904; a result due to the diminution in earnings.

16. During the year under review two light railways were constructed in the Colony by private enterprise.

The Fura-Broomassie line, 26·483 miles in length, was built by the Prestea Railways, Limited, from Fura Junction, on the Ankobra River, to Prestea, for the purpose of serving the Prestea and Broomassie groups of mines.

The line from Dunkwa, on the Government Railway, to Attasi, was constructed by the Attasi Mines to convey to their property the heavy milling plant which is in course of erection.

Roads.

The roads maintained by the Public Works Department, which are in fair conditions, are of a total length of 200 miles made up as follows :—

Axim-Ancobra Road	3½	miles.
Cape Coast-Elmina Road ...	8	„
Cape Coast-Anamaboe Road ...	9½	„
Cape Coast-Denkera Road ...	14½	„
Cape Coast-Prahsu Road ...	57½	„
Tarkwa-Bonsa Road	9	„
Accra-Kyebi Road	59	„
Accra-Aburi Road	25½	„
Dodowa Junction-Dodowa ...	13½	„
	200	miles.

2. In consequence of a slight alteration of the Eastern frontier of the Colony and Togoland following the demarcation of the boundary by the Anglo-German Commission in 1904, it was found necessary to realign and reconstruct a portion of the Danoe-Poglu Road.

3. The construction of the Saltpond-Insuaim Road was further advanced and the sum of £2,833 expended thereon during the year.

4. A sum of £415 was spent on the continuation of the Tarkwa-Abosso-Cinnamon-Bippo Road.

5. The expenditure on maintenence of the Cape Coast-Prahsu Road in 1905 was £1,873 exclusive of costs of supervision.

Minor Roads.

6. During the past year a number of roads have been placed under the operation of the Roads Ordinance; such roads are kept cleared by the Chiefs responsible for them who receive in return a payment of 10*s*. per mile per quarter.

Immigration and Emigration.

1. Immigrants consist principally of :—

(a) Krus and Bassas from Liberia,

(b) Mendis, Timanis and Vais from Sierra Leone,

(c) Yorubas from Lagos (Southern Nigeria).

They are employed

(i) On underground or surface work at the gold mines,

(ii) As boatmen or general labourers by mercantile firms,

(iii) As scavengers or carriers.

Imported labourers are usually brought into the Colony by one of their own tribe, who is already in employment, and are then engaged under the Master and Servant Ordinance, No. 8 of 1893, on a contract for six or twelve months executed before a District Commissioner.

2. The numbers of imported labourers are approximately :—

(a) Krus and Bassas	2,000
(b) Mendis, Timanis and Vais ...	1,200
(c) Yorubas	500

3. At the gold mining centres, where the men are employed in large numbers, plots of ground are set apart for them on which they form villages, the sanitation of which is supervised by a European. No special restrictions are imposed on the labourers when not at work.

4. There is little or no emigration.

Public Works.

Expenditure.

1. During the past year the total expenditure on the Public Works Department was £66,796 18*s.* 4*d.*, which was distributed as follows :—

	£	*s.*	*d.*
Personal Emoluments and Other Charges.	14,110	17	5
Public Works Recurrent... ...	17,955	9	6
Public Works Extraordinary ...	34,730	11	5
Total	£66,796	18	4

Axim.

2. Quarters for twelve subordinate officials were completed at a cost of £1,019.

Sekondi.

3. Two double bungalows for European officials were completed during the year at a cost of £2,946.

Good progress was made with the construction of the new prison on which a sum of £9,626 was expended during the year. The bungalow for the European gaoler was completed. It is expected that this important work will be completed at a cost of £15,630 in October, 1906.

Investigations for the water supply of Sekondi were actively prosecuted during the year on the Ashieme and Anankwan streams. Automatic and rain gauges have been fixed at various points.

Public offices for the Treasury, Customs, and Transport Departments were completed during the year.

Police barracks for 30 constables with quarters for one European officer and one native superintendent are in course of erection, and will shortly be completed.

CAPE COAST.

4. A sum of £771 was expended at Cape Coast in improving the main drain, providing additional side drains, and constructing a new outfall to the sea.

Police barracks for 50 constables, with quarters for one superintendent, are in course of erection, and will shortly be completed.

Accra.

5. Investigations in connection with the scheme for a water supply from the Adjementa valley in the neighbourhood of Aburi were continued. The flow of water recorded by the automatic gauges was, however, disappointing, and it was decided, in consequence, to postpone active measures in connection with the necessary works for another year.

Other public works which were completed, or nearly completed, during the year were the printing office, one double bungalow, and a native club house.

Kumasi.

6. A well-equipped native hospital was erected at a cost of £1,155.

Other works completed were the construction of a powder magazine and of sheds in the new market.

Mines Surveys.

1. The most important feature of the year's work was the running, by Captain Des Voeux, R.E., of a traverse across the Northern Territories in the neighbourhood of the 8th parallel of north latitude, thus forming a rigid connection between the work of the Anglo-French and Anglo-German Boundary Commissions, and providing a base line for the future survey of the Northern Territories.

2. Owing to the depression in the West African Mining Market which prevailed during the year, many mining companies were unable to raise sufficient funds to permit them to undertake the survey and development of their concessions, and it was possible, therefore, to reduce considerably the establishment of the Department on which the expenditure was £22,329, as compared with £32,151 for the previous year. £8,225 was received by the Department as fees.

Changes in the Establishment.

Governor Sir J. P. Rodger, K.C.M.G., proceeded on leave of absence on the 9th of May and returned to the Colony on the 12th of November; during his absence Major H. Bryan, Colonial Secretary, administered the Government.

2. Mr. F. C. Fuller, Assistant Secretary to the Government of Malta, was appointed to be Chief Commissioner of Ashanti, vice the late Captain Sir Donald Stewart, K.C.M.G., and assumed duty on the 13th of March.

3. Lieutenant-Colonel A. E. G. Watherston, C.M.G., R.E., Director of Surveys, was appointed to be Chief Commissioner of the Northern Territories, vice Lieutenant-Colonel A. Morris, C.M.G., D.S.O., who rejoined his British regiment on completing the period of service for which he had been seconded under the Colonial Office.

Transport (Labour).

1. The Transport Department has continued to justify its existence by introducing a regular system of payment throughout the Colony. As a means, however, of supplying labour for the mines it has outlived its original purpose, and it may be necessary, in the future, further to reduce its personnel.

On the 1st January, 1905, the entire control of expenditure on Government Transport was vested in the Department, a step which resulted in expert knowledge being brought to bear on the

details of expenditure, and the unification of diverse rates of pay.

2. The following are the contract rates of pay for carriers :—

Headman, 30*s.* a month with 6*d.* a day subsistence allowance. In special cases, *i.e.*, for extra qualifications as interpreter, etc., 37*s.* 6*d.* a month and 6*d.* a day subsistence allowance.

Carriers, 25*s.* a month and 3*d.* a day subsistence allowance.

The rates for carriers hired for short journeys are :—

Up to ten days : 2*s.* 3*d.* pay and 3*d.* subsistence allowance, total 2*s.* 6*d.*, for the first day ; and for subsequent days, 1*s.* pay and 3*d.* subsistence allowance. For periods exceeding ten days the rate is 1*s.* a day pay and 3*d.* subsistence allowance.

Headmen on these trips do not receive special pay as such unless the party exceed twenty in number when 6*d.* subsistence allowance may be given, the pay remaining the same.

In Ashanti and the Northern Territories, however, local and lower rates prevail, when special arrangements are made with the Chiefs to supply carriers.

3. The revival in the mahogany-cutting industry consequent on the opening up of new sources of supply in the vicinity of the railway, and the setting free of a large amount of labour which had hitherto been required for the mines, has resulted in the fraudulent treatment of many natives whose wages have been withheld ; it may be found necessary to license native mahogany-cutters and to make them give substantial security for the payment of the labourers employed in this industry.

4. The number of loads carried during the year amounted to 17,609, and the number of carriers supplied for the conveyance of officers and troops was 3,635. It is worthy of comment that during the year only one load was lost.

Out of the total of 1,214 carriers and labourers furnished on contract by the Transport Department only 10 desertions were notified ; eight being from the Mines and two from Government employment.

5. The supply of unskilled labour has been ample for all purposes.

The increasing use of coal at some of the principal mines will set free a considerable number of natives who have hitherto been employed in cutting wood fuel. Similarly, in the Eastern portion of the Colony, the Accra Railway should, on completion, release for agricultural purposes hundreds of men who are now employed in rolling casks containing cocoa, palm-oil, and palm kernels from distant markets to the coast.

Suitability of Climate for Europeans, and Openings for White Labour.

1. Europeans should on no account venture to come to the Colony on the chance of obtaining employment. All the employees of the mercantile firms and mining companies are engaged in England under agreement and opportunities of securing appointments locally are few and far between.

2. Though improvements in sanitation and a wider dissemination of the knowledge of elementary hygiene amongst residents have caused a remarkable diminution in the death-rate in recent years, yet the climate, which is enervating, and the difficulty of procuring adequate supplies of nourishing food, render the Gold Coast unsuitable for the prolonged residence of Europeans.

Rates of Wages and Cost of Living.

1. In the mining districts the influx of Europeans has considerably increased the cost of living. Wages are high; a cook asks and obtains from £2 to £5 per month, and the rate for other domestic servants varies from £1 to £2 10*s*.

2. At Sekondi the hotel charges are about 20*s*. a day, and at Cape Coast and Accra 10*s*. a day; the first-mentioned establishment is under European management.

3. Native craftsmen can earn good wages, particularly in the mining districts. Carpenters and masons are usually paid at the rate of 1*s*. 6*d*. to 3*s*. a day; bricklayers, 1*s*. 6*d*. to 2*s*. 9*d*.; coopers and painters, 1*s*. to 1*s*. 9*d*.

General Conditions.

1. The serious falling-off in revenue in 1905 is mainly attributable to the decrease in the receipts from Customs Duties which, as has been pointed out under the previous heading of "Imports," was caused to a great extent by an abnormally dry season in the Eastern or agricultural portion of the Colony, necessarily followed by scanty crops of palm-oil and other produce, and a consequent lack of purchasing power on the part of the natives engaged in the cultivation of economic products.

2. On the other hand, it is satisfactory to note that the value of the export of gold increased by over £250,000, and there is every reason to believe that the gold-mining industry has passed successfully through its critical stage and may now legitimately hope to obtain a measure of the financial support which is necessary for its further development. But even if such expectations should not be realized, and the output be confined to the mines now equipped with crushing machinery, the value of

the export of gold in 1906, based on the monthly returns up to the 31st of April, should reach, at least, £750,000.

3. At the date of writing this report, the rainfall at Accra has already exceeded the total number of inches recorded in the previous year, and the prospects in the agricultural districts are reported to be distinctly hopeful.

4. A favourable presage for the financial prospects of the present year is afforded by the earnings of the Government railway which, on the 26th of May, exceeded the receipts for the same period in 1904 (in which year the total earnings were £146,915) by £9,005.

5. The friendly relations of the Government with the native Chiefs were, on the whole, well-maintained, and there were no disturbances of a serious nature.

H. BRYAN,

Acting Governor.

9th June, 1906.

GOLD COAST.

(For Report for 1905, *see* No. 488.)

THE GOVERNOR to THE SECRETARY OF STATE.

Government House,
Accra,
4th June, 1907

MY LORD,

I HAVE the honour to transmit, herewith, a comprehensive report on the Blue Book of this Colony for the year 1906, prepared by the Colonial Secretary.

I have, &c.,

JOHN RODGER,
Governor

The Right Honourable
The Earl of Elgin, K.G.,
&c., &c., &c.

REPORT ON THE BLUE BOOK OF THE GOLD COAST COLONY FOR THE YEAR 1906.

I.—FINANCIAL.

(A.) Revenue and Expenditure.

The most interesting facts disclosed in the following general review of the financial position of the Colony at the end of the year are:—

(i.) In 1906 revenue exceeded expenditure by £54,193.

(ii.) Expenditure included:—

(*a*) £26,598 repaid to the Imperial Exchequer.

(*b*) £10,586 contributed to the Sinking Fund for liquidating the Railway Loan.

(iii.) On the 31st December assets exceeded liabilities by £386,277.

Revenue.

1. The revenue for the year 1906 exceeded that of any previous year and amounted to £683,101, as against the original estimate of £696,705. The increase as compared with the previous year was £96,880.

2. The heads of revenue of the Colony, Ashanti, and the Northern Territories, are shown in Table I. of the Appendix to this report.

The principal heads which provided increased revenue are:—"Customs" £52,172, "Railway" £41,409, "Ashanti" £14,796.

3. The big increase under "Customs" is due to the abnormal receipts during the last month of the year when heavy clearances were effected in anticipation of the augmented duties imposed by the amendment of the Customs Tariff Ordinance.

The receipts from the Sekondi-Kumasi Railway exceeded the estimate by £26,528, and, as mentioned above, the receipts for the previous year by £41,409.

The Traffic returns afford a striking contract to those of 1905, a year which was characterised by a depression in trade generally and in the mining industry.

The increased receipts under the head of "Ashanti" were chiefly due to "Caravan Taxes," "Royalties," and "Sale of Stamps."

4. The principal heads of revenue which show a falling off are:—

"Licences," £4,658.—Due mainly to the smaller number of liquor licences taken out and the transfer of the issue of licences at Cape Coast to the Municipality of the town. A decrease also is shown under the sub-head "Court Fines."

"Fees of Court, &c.," £1,924.—Due to decreased receipts under the sub-head "Stamp Duties." The satisfactory increase of £1,125 has been earned under the sub-head "Prison Labour."

"Miscellaneous," £2,774.—Due to a falling off of £4,596 under the sub-head "Other Receipts," which was abnormally increased in 1905 by the sale of ammunition to the Government of Northern Nigeria.

5. The receipts of revenue from the Dependencies, Ashanti, and the Northern Territories, are shown separately in Table II. of the Appendix.

Expenditure.

The expenditure for the past year was £628,905, as against the original estimate of £802,077.

This large saving is chiefly due to the unexpended provision made in the 1906 estimates for the repayment of £100,000 to the Imperial Exchequer, and for £56,000 on account of interest on the loan of £1,400,000 sanctioned by "The Loan Ordinance" of 1905, but not yet issued. Similar provision for these services has been made in the estimates for the current year, but the disbursements are conditional on the issue of the loan.

6. The total expenditure exceeded that of the previous year by £12,767, but, to give a just comparison, an additional sum of £12,565, short charged in 1906, should be added, making a total increase of £25,352. Under the system of Service Advances in force in 1905, adjustments of advances were made before the annual accounts were closed. During the year 1906, however, the Imprest System, described in Rule 115 of the Financial Instructions, was introduced, and it was not found possible under this system, owing to the distance of some of the outstations from headquarters, for certain departments to settle their imprests for the months of November and December by the last day of the year, when the Treasury cash accounts were closed. The new system will adjust itself in 1907 and hereafter, as the local imprests for the last two months of the previous year will be included.

7. The principal heads which show increased expenditure are:—

"Provincial and District Commissioners," £9,231.—Due to the transfer to this head of portions of the votes for "Hammockmen and Carriers," "Maintenance of Roads, under the Roads Ordinance," "Travelling Allowances."

"Ashanti," £12,747.—Due to the inclusion in 1906 of portions of votes under "Transport," "Post and Telegraphs," "Public Works Recurrent," "Botanical Department," and "Sanitation."

"Northern Territories," £9,231.—Due to transfers from other heads as in the case of Ashanti.

"Public Works Extraordinary," £4,056.—Due to the inclusion of the cost of completing certain public buildings which were left unfinished at the end of the year 1905.

"Railways," £6,975.—Caused by defraying out of current revenue the cost (£10,312) of partially constructing No. 2 Jetty at Sekondi.

"Gold Coast Regiment," £3,747.—Due to the transfer to this head of portions of votes from the head of "Transport." This increase would have been further augmented if the expenditure for November and December had been charged up before the Treasury accounts were closed. (*See* remarks in the preceding paragraph.)

"Charge on account of Public Debt," £12,754.—Due partly to increased interest paid to the Crown Agents on account of advances made pending the issue of the loan for public works, and partly to the increased contribution to the Sinking Fund.

8. The principal heads which show a decrease in expenditure are:—

"Transport," £25,772.—Due to the allocation of portions of the votes for "Railway Fares," "Hammockmen and Carriers," "Travelling Allowances," "Transport of Stores by Carriers," to other heads of expenditure such as "Ashanti," "The Northern Territories," and "Gold Coast Regiment."

"Public Works, Recurrent," £3,015.—Due to the transfer of £3,400 on account of "Maintenance of Trade Roads," (*see* remarks under "Provincial and District Commissioners" in the preceding paragraph). The Provincial Commissioners pay the dues to the Chiefs responsible for the upkeep of certain roads in the interior.

"Botanical and Agricultural," £1,644.—Due to diminished expenditure in connection with the experimental cotton farm which has been handed over to the British Cotton Growing Association.

"Second Battalion Gold Coast Regiment," £2,459.—Due to the fact that expenditure for November and December was not charged up (*see* remarks in paragraph 6).

"Police," £2,189.—Due to a similar cause to that mentioned in the last preceding paragraph.

"Mines Surveys," £8,957.—Due to reduction of the establishment.

"Miscellaneous Services," £3,035.—The reductions are chiefly under the sub-heads of "Agricultural Exhibition," "Refunds of Revenue," "Rent of Offices and Quarters," and the inclusion under this head in 1905 of the cost of the survey of the proposed branch railway from Tarkwa to Prestea.

"Imperial Grants," £3,759.—The decrease is due to the reduction, by the Imperial Government, of the grant-in-aid towards the administration of the Northern Territories.

9. The expenditure in detail of the Colony, Ashanti, and the Northern Territories for the years 1905 and 1906 is shown in Table III. of the Appendix.

10. Table IV. gives the details of expenditure in Ashanti and the Northern Territories under all headings. The decrease, as compared with 1905, of £4,927 in the case of Ashanti is mainly due to the decision to debit one-fourth of the upkeep of the Gold Coast Regiment to the Colony instead of charging the whole cost of this battalion to Ashanti as was done in former years.

General.

The surplus of £54,193, gross (£41,628, nett), though due to a great extent to the exceptional Customs receipts which were realised in December, must be regarded as satisfactory, and compensates for the deficit of £29,897 in the previous year. The average annual surplus of revenue over expenditure for the three years 1904-6 is £42,056.

Comparative Statement of Revenue and Expenditure for ten years from 1897 to 1906, inclusive.

Revenue.						Expenditure.					
Years	Amount.				Remarks.	Years.	Amount.				Remarks.
	£	s.	d.				£	s.	d.		
1897	233,179	1	6			1897	401,691	10	1		
1898	303,821	12	4		Includes Imperial Grant-in-aid of £45,000 on account of Northern Territories.	1898	377,975	17	1		
1899	422,795	15	10		Includes Imperial Grant-in-aid of £100,000 on account of Northern Territories.	1899	309,657	15	3		
1900	585,583	7	5		Includes £50,000 Grant-in-aid of Northern Territories and £202,300 on account of Ashanti disturbances.	1900	515,656	19	2		Includes £243,453 9*s.* 2*d.* expended on account of Ashanti disturbances.
1901	693,893	3	0		Includes £25,000 Grant-in-aid of Northern Territories and £197,700 on account of Ashanti disturbances.	1901	469,459	9	1		Includes £124,392 5*s.* 2*d.* expended on account of Ashanti disturbances.
1902	501,754	9	6		Includes £10,000 Grant-in-aid of Northern Territories.	1902	547,607	13	0		Includes £34,734 10*s.* 10*d.* expended on account of Ashanti disturbances, and £24,000 repayment of loan.
1903	577,552	16	1		Includes £23,000 Grant-in-aid of Northern Territories.	1903	593,956	7	9		Includes £14,624 8*s.* 5*d.* expended on account of Ashanti disturbances.
1904	682,193	0	0		Includes £31,800 4*s.* 4*d.* Grant-in-aid of Northern Territories.	1904	622,376	11	5		Includes £5,612 0*s.* 7*d.* expended on account of Ashanti disturbances.
1905	586,221	8	1		Includes £13,759 6*s.* 6*d.* Grant-in-aid.	1905	616,118	11	2		Includes £4,106 15*s.* 2*d.* on account of Ashanti disturbances; and £20,000 repayment of loans.
1906	683,101	16	3		Includes £10,000 Grant-in-aid.	1906	628,906	3	0		Includes £224 7*s.* 11*d.* on account of Ashanti disturbances; and £26,598 18*s.* 11*d.* repayment of loans.

(B.) Taxation.

1. The only forms of direct taxation in the Colony proper are the taxes on vehicles and the house rate levied under the Town Councils Ordinance. In the towns of Accra, Cape Coast, and Sekondi these items form part of the revenue of their respective municipalities.

In Ashanti and the Northern Territories taxes on caravans are collected at certain places situated on the main roads, where a European officer is permanently or temporarily stationed.

2. In Ashanti the collection of tolls is authorised at Mampon, Wam, Berekum, Pulliano, Sekatia, Tekiman, Kintampo, Atebubu, Krachi, Nkoranza, Odumase, Abeasi, Wiasi, Puniasi, Sunyani, and Sikassiko at the undermentioned rates:—

	s.	d.
For each horse	5	0
For each head of cattle, except calves	4	0
For each calf, over three months of age	2	0
For each sheep or goat	0	6
For each lamb or kid, over three months of age ...	0	3
For each donkey load of spirits	10	0
For each donkey load of kola or rubber	6	0
For each donkey load of goods, excepting farm produce	4	0
For each carrier load of spirits	5	0
For each carrier load of kola or rubber	3	0
For each carrier load of goods, excepting farm produce	2	0

In the Northern Territories tolls are collected at Wa, Bole, Gambaga, Walewale, Tumu, Lorha, Tamale, Salaga, Yeji, and Navaro the rates being:—

	s.	d.
For each horse	5	0
For each head of cattle, except calves	4	0
For each calf, over three months of age	2	0
For each sheep or goat	0	6
For each lamb or kid, over three months of age ...	0	3
For each donkey load of kola or rubber	6	0
For each donkey load of goods, excepting farm produce	4	0
For each carrier load of kola or rubber	3	0
For each carrier load of goods, excepting farm produce	2	0

(C.) Assets and Liabilities.

The excess of assets over liabilities on the 1st of January, 1906, was £332,082 2*s.* 1*d.* On the 31st of December the excess

was £386,277 15*s.* 4*d.*, an increase of £54,195 13*s* 3*d.*, which is accounted for as in the appended statement:—

	£	s.	d.
Excess at 31st December, 1905 ...	332,082	2	1
Add Revenue, 1906	683,101	16	3
	1,015,183	18	4
Deduct expenditure, 1906	628,906	3	0
Excess of assets over liabilities on 31st December, 1906	£386,277	15	4

The surplus is accounted for as follows:—

Assets.

	£	s.	d.
General Imprest Account (cash in hand)	94,141	7	4
General assets, as shown in Table V., exclusive of advances for the railway	65,868	5	4
Advances made out of accumulated balances of revenue for the railway pending the issue of the loan ...	283,103	1	3
	£443,112	13	11

Liabilities.

	£	s.	d.	£	s.	d.
Sundry items shown in Table V.	55,718	4	7			
Plus drafts and remittances in transit ...	1,116	14	0			
				56,834	18	7
Surplus				£386,277	15	4

(D.) Public Debt.

On the 31st December, 1906, the public debt, exclusive of the claim made by the Government of Northern Nigeria on account of troops lent during the Ashanti Expedition of 1900-1 (about £34,500), amounted to £2,252,743 9*s.* 2*d.*

The funded portion of the debt amounted to £1,098,000 5*s.* 9*d.*, against which £18,699 17*s.* stands to the credit of the Sinking Fund for the liquidation of the Railway Loan.

During the year £26,598 was repaid to the Imperial Exchequer, and £10,586 was contributed to the Sinking Fund. The following statement shows in detail the particulars of the public debt:—

I. Imperial Exchequer:—

	£	s.	d.
(i.) Ashanti Expedition, 1896	98,798	3	6
(ii.) West India Regiment, 1897-8 ...	10,051	15	2
(iii.) Telegraph lines to the Northern Territories, 1897-8	29,441	10	8
(iv.) Ashanti War, 1900	469,425	5	11
	607,716	15	3
Less repayments, 1905 and 1906 ...	46,598	18	11
	561,117	16	4

II. Railway and Harbour Works:—

(i.) Inscribed Stock, 3 per cent., 1902...	1,035,000	0	0
(ii.) Inscribed Stock, 3 per cent., 1902 ...	63,000	5	9
(iii.) Advanced by Crown Agents pending issue of new loan	593,625	7	1
	2,252,743	9	2

(E.) Currency.

Legal Tender.

1. The currency and legal tender is British sterling with the addition of the undermentioned French, Spanish, and American gold coins, the values of which are fixed by the Demonetisation Ordinance No. 2 of 1880:—

—	Nominal Value.	Legal Value.		
		£	s.	d.
French—				
Napoleon	20 francs.	0	15	10
Spanish—				
Doubloon	16 dollars.	3	4	0
Half Doubloon	8 „	1	12	0
American—				
Double Eagle	20 dollars.	4	2	0
Eagle	10 „	2	1	0
Half Eagle...	5 „	1	0	6
Quarter Eagle	2 „ 50 c.	0	10	3

2. British silver coins are legal tender to an unlimited amount; British bronze coins are legal tender up to an amount not exceeding one shilling. There is a small circulation of the United States half-dollar, but the coin is not legal tender, and is not accepted by the Government; its current value is two shillings.

British bronze coins are gradually superseding cowries in the Coast towns and also at Kumasi.

3. The following statement shows the amount of gold, silver, and bronze coinage imported during the years 1902-6:—

Year.	Gold.			Silver.			Bronze.			Total.		
	£	s.	d.	£	s.	d.	£	s.	d.	£	s.	d.
1902 ...	38,072	10	0	249,392	10	6	110	15	0	287,575	15	6

Banks.

4. The Bank of British West Africa, Limited, is the only commercial bank established in the Colony and its Dependencies, and has branches at Accra, Cape Coast, Sekondi, and Axim. Arrangements are being made for opening a branch at Kumasi, and a site for bank premises has been acquired at Tarkwa.

(F.) Municipal Bodies.

Municipalities have been established in the towns of Accra, Cape Coast, and Sekondi, under the provisions of the Town Councils Ordinance of 1894. These bodies consist of eight members, of whom four are officials, nominated by the Government, and four representatives elected by the ratepayers. In the absence of any election, by failure of the voters to nominate, the Governor has power to name four members to represent the ratepayers. The last elections at Sekondi were keenly contested, and resulted in the return of four native gentlemen. Indications are not wanting that the ratepayers are beginning to realise the duties and responsibilities placed upon them by their right to participate in municipal affairs, and it is hoped that, under the present system, the people will acquire the experience necessary to fit them for a fuller and more liberal measure of self-government.

II.—TRADE, AGRICULTURE, AND INDUSTRIES.

(A.) Imports and Exports.

1. In the year under review the value of the total trade of the Colony reached the highest point yet recorded, the figures being:—

	£
Imports	2,058,939
Exports	1,996,412
Total	£4,055,351

The result shows the satisfactory increase of nearly one million (£923,138) as compared with the year 1905; and of £713,518 as compared with the year 1904. The total of the latter year has hitherto been the highest in the annals of the Colony. Since the year 1898 the value of the trade has practically doubled.

Imports.

2. The total value of all imports in 1906, exclusive of expenses on specie, was £2,058,939, as against £1,486,068 in 1905, an increase of £572,871.

	£
The value of imports paying specific duties was	364,073
The value of imports paying *ad valorem* duties was	853,706
The value of imports free of duty was	841,160
	£2,058,939

These values include freight, insurance, and other charges. Table VI. shows the value of imports, exports, and the total trade of the Colony for the years 1902 to 1906.

3. Table VII. shows the value in sterling of imports and their countries of origin for the years 1904, 1905, and 1906.

4. Table VIII. shows the principal articles imported and the comparative values thereof in the years 1905 and 1906. The chief items showing an increase are:—

	£
Specie	321,592
Machinery	103,297
Coal	20,445
Cotton goods	15,723
Provisions	14,228
Wearing apparel...	8,535
Tobacco (unmanufactured)	7,820
Building materials	7,018
Soap	5,888

Chief Items showing an Increase—cont.

	£
Rum	5,787
Hardware	4,979
Perfumery	3,374
Gunpowder	2,681
Spirits (other than gin and rum) ...	2,568
Tobacco (manufactured)	2,281
Lumber	1,264
Ale, beer, and porter	1,263
Other articles	81,019

Out of a total increase of £572,871, two items, "Machinery," £103,297, and "Specie," £321,592, account for £424,889. These increases are attributable mainly to the satisfactory progress made in the mining industry to which reference will be made under the head of "Exports."

The importation of spirits in 1906 amounted to 1,231,068 gallons, an increase of 201,889 gallons as compared with the previous year, and a decrease of 59,071 gallons as compared with the year 1904. The consumption per head of the population (census, 1901), excluding the Northern Territories where the importation of spirits is prohibited, amounts to 1·120 gallons. It is interesting to compare these figures with those relating to the consumption of spirits in the United Kingdom where ·91 gallons per head were consumed in the year 1906. During the same period the population of the United Kingdom consumed, per head, 27·7 gallons of beer, and ·27 gallons of wine.

The total importation of intoxicants for consumption of all kinds in the Colony during the past year was 1,309,993 gallons, or ·905 gallons per head, as against a consumption in the United Kingdom, in the year 1905, of 84,833,784 gallons, or 2·05 gallons per head.

The value of the coal imported increased by nearly 100 per cent., and the cost per ton to the consumer has fallen from 37*s.* 6*d.* to about 30*s.* per ton.

Most of the mining companies continue to use wood fuel, and the principal exceptions being the Abbontiakoon and the Akrokerri Mines.

A decrease appears under the undermentioned items:—

	£
Silk goods	4,311
Gin	2,934
Bread and biscuits	2,370
Cordage	2,037
Beads	1,623
Brass and copper ware	1,506
Woollen goods	1,146
Salt	1,125

5. Imports from the United Kingdom increased by £545,803 as compared with the previous year.

With respect to foreign countries and British and foreign Colonies:—

		£
Imports from	Germany increased by	1,817
,, ,,	the United States increased by ...	2,756
,, ,,	Holland increased by	658
,, ,,	Southern Nigeria increased by ...	11,524
,, ,,	Sierra Leone increased by	10,932
,, ,,	other British Colonies increased by	12
,, ,,	other foreign countries increased by	4,044
		£31,743
,, ,,	France decreased by	4,675
	Nett increase	£27,068

The increased importations from Southern Nigeria and Sierra Leone are due to transfers of specie by the Bank of British West Africa.

Exports.

6. Table IX. shows the comparative values of the principal articles of export for the years 1905 and 1906. The total value of all exports was £1,996,412, being an increase of £350,267.

The shipments of gold show an increase of £225,442. The exports of specie show a decrease of £102,288 which, coupled with the increased imports of £300,952, show the large demands made on the Bank for the payment of wages and the purchase of indigenous products.

7. Following the method adopted in the Annual Report for the year 1905, the value of the exports of gold and specie will here be deducted from the total value of exports for the purpose of showing the value of the principal agricultural and economic products. The appended comparative returns show a marked improvement, chiefly due to a sufficient rainfall, during the year under review:—

1905.		Amount.	1906.		Amount.
		£			£
Total Exports ...		1,646,145	Total Exports ...		1,996,412
	£			£	
Gold ...	596,583		Gold ...	822,025	
Specie ...	190,646		Specie ...	88,358	
		787,229			910,383
Total other Exports...		£858,916	Total other Exports...		£1,016,029

8. The principal heads of increase, with their respective values, are as follows:—

	£
Gold	225,442
Cocoa	149,460
Palm oil	36,649
Kola nuts	13,521
Rubber	10,730
Palm kernels	2,209
Gum copal	1,810
Other articles	19,368

The only indigenous product which shows any marked decrease is lumber. The falling-off (£4,417) in this trade is probably due partly to the lower prices obtained for mahogany in Europe, and partly to the heavy felling, during the preceding year, of trees in the immediate vicinity of the railway.

9. An extraordinary impetus is apparent in the production of cocoa, the exports of this article increased in quantity by 8,696,896 lbs., and in value by £149,460. The good rainfall in the eastern portions of the Colony produced a prolific crop, and many new plantations came into bearing. Not the least satisfactory feature of the trade was the advance in prices, owing to the shortage of supplies from other countries, which occurred at the end of the year in the Liverpool and Hamburg markets, in the former of which prices rose from 60 to 70 per cent. as compared with the preceding year. Local prices rose about 50 per cent. Table X. shows the quantity and value of the cocoa exported since the year 1894.

The trade in kola nuts shows the satisfactory increase of £13,521. The heavy ocean freight charged by the shipping companies for this product, to which attention was drawn in the Annual Report for last year, has now been reduced by 10*s.* per ton, but the rate still compares very unfavourably with the charges on goods carried from Liverpool, as will be seen by the following figures:—

Rates on goods from Liverpool to Accra, 30 to 37 days' transit, vary from 30*s.* to 45*s.* per ton.

Rate on kola from Accra to Lagos, 18 to 24 hours' transit, 40*s.* per ton.

The exports of cotton show the considerable increase of 63,762 lbs. in weight and of £506 in value. The figures for this product are now included under the head of "Other Articles," but in future years they will be shown separately. The trade in gum copal shows a marked improvement; this product is now being exploited in the forests of Ashanti.

Table XI. shows the trade of the principal and minor ports of the Colony for the years 1905 and 1906. Sekondi, with a trade of imports, £995,993, and exports, £1,094,656, owes its position as the most important port to the mining companies,

which imported machinery (free of duty) to the value of £549,977, and exported gold to the value of £805,235.

(B.) Mines, Manufactures, and Fisheries.

Mines.

1. Under the last preceding head, "Exports," it has been noticed that the increase in the value of gold exported was £225,442. The steady progress made is fairly satisfactory; but the production has not been augmented at the rate hoped for at the end of the year 1905.

2. Table XII. gives a list of mining companies which exported gold and the representative values. The number of productive mines is twenty, as in the previous year. The mines situated in the Colony produced 154,925 oz., and those in Ashanti 76,032 oz. (These figures do not correspond exactly with the returns of gold exported as part of the gold won in December, 1906, was not shipped until January, 1907).

3. Table XIII. shows the comparative exports of gold since the year 1887.

4. The number of concessions filed in the Colony was 11, as compared with 13 in 1905; and 12 certificates of validity were granted as against 21.

5. A further amendment of the Concessions Ordinance of 1900 was enacted during the year by Ordinance No. 13 of 1906. This enactment gives companies which are liable to pay income tax in the United Kingdom on the profits of their concessions, the option of electing to pay duty on the amount of profits as assessed to income tax by the Income Tax Commissioners.

6. The health of Europeans employed at the mines does not compare so favourably as in former years with that of the official and mercantile communities. The comparative figures will be found under Head VII. (3)—Vital Statistics.

Manufactures.

7. In the sense in which the word is usually understood in European countries the Gold Coast can hardly be said to produce any manufactured goods.

A certain amount of cotton cloth of good quality is woven by primitive methods in the Colony, Ashanti and the Northern Territories. An attempt is being made by the Chief Commissioner of the Northern Territories to introduce an improved pattern of hand loom in that portion of the Hinterland; and the experiment, if successful, should improve the quality of the cloth and increase the output. The salt obtained from the marshes in the vicinity of Ada and Kwitta brings employment and profit to the inhabitants of those towns. From the former 27,234 bags, of about 56 lbs. each, were despatched during the

year up the river Volta for distribution in the Northern Territories and elsewhere.

Fisheries.

8. The facilities afforded by the Sekondi-Kumasi Railway have given a considerable stimulus to the trade with the interior in sun-dried fish. This article of diet commands a ready sale in all the inland parts of the Colony and in Ashanti, and its preparation gives employment to the inhabitants of the towns and villages on the coast line.

(C.) AGRICULTURAL INDUSTRIES AND BOTANICAL STATIONS

1. The Agricultural Department was working under adverse conditions during a considerable portion of the year owing to the resignation of his appoinment by the Director of Agriculture and the difficulty experienced in obtaining, to succeed him, a suitable officer with the requisite scientific training.

Rubber.

2. The sustained enquiries for seedlings and seeds of the Para (Hevea brasiliensis) and the Funtumia Elastica varieties of rubber, tend to show that in many districts of the colony and Ashanti the chiefs and people have become alive to the potentialities of wealth consequent on the planting and cultivation of this valuable economic product.

3. During the year 12,130 Para seedlings and 259,000 Para seeds were distributed from Aburi, in addition to 3,278 seedlings and 3,237,106 seeds of the Funtumia elastica. At Tarkwa, 62,240 plants of the latter variety were raised and distributed to chiefs in Ashanti.

4. The Para rubber trees planted at Tarkwa in June-September, 1904, have continued to make satisfactory growth and have attained to an average height of 26 feet with an average girth of 10 inches at 3 feet from the ground. Twenty-three acres are under cultivation.

5. Several experiments were carried out by the Acting Director of Agriculture with a view to improve the methods of preparing the latex of the Funtumia elastica. The results were reported by the Director of the Imperial Institute, who has kindly rendered most valuable assistance, to be satisfactory. The specimens exhibited very good elasticity and tenacity and were valued by brokers at 4*s.* 6*d.* to 5*s.* 3*d.* per lb., the latter quotation being, at the time, nearly equal to the price of South American Para.

Cocoa.

6. The quantity of cocoa exported rose from 11,407,608 lbs. in 1905, to 20,104,504 lbs. in 1906, and the prices realized by the growers increased by about 50 per cent. The increased

value appears to have been due rather to a shortage on the European markets of cocoa from other countries, than to any special improvement in the quality of the native product. It has been estimated by competent observers that a further heavy increase in the quantity exported will take place in 1907. It is satisfactory to note that the area under cultivation of this crop is rapidly extending, especially in Ashanti, where the Acting Director of Agriculture observes that during a recent tour he saw hundreds of young cocoa plantations, and thousands of seedlings, ready for planting out, in many of the villages.

Cotton.

7. The Government experimental cotton farm at Labolabo was handed over to the British Cotton Growing Association during the year, the Government agreeing to contribute for three years one half of the cost of upkeep, subject to a maximum limit of £1,500 a year.

The export of this product rose from 29,124 lbs. in 1905, to 92,886 lbs. in 1906.

8. The Association have sent out from England and erected at Labolabo a pneumatic power gin, with suitable engine, a large shed for storing cotton, and a bungalow for the European staff. It is anticipated that with the establishment of the gin and a permanent market for the sale of cotton, the natives in the district will now increase the area under cotton cultivation.

Miscellaneous Products.

9. "Camphor."—370 plants (Cinnomomum camphora), raised in 1905 from seed imported from Japan, were put out and have made good growth, some of the bushes being three feet in height.

"Cinnamon" (Cinnamomum zeylanicum).—The plants have made excellent progress; are now 12 feet high, and bore fruit during the year. A large number of seedlings were raised and sent to the stations at Tarkwa and Kumasi. Experimental plots planted with allspice (Pimento officinalis), guinea grain (Amomum melegueta) and Lemon grass (Andropogon sp.) all did well and show promise. Samples of allspice and lemon oil have been distilled and sent to England for valuation.

Experimental plots planted with jute seed received from India did not do well either at Aburi or Tarkwa.

Botanical Stations.

10. Progress at the principal station at Aburi is reported not to have been well maintained during the year under review owing to the depletion of the European staff. The increasing demand for economic plants and seeds was, however, well met,

and the number distributed, viz.: 24,896 plants and 3,620,906 sseds (exclusive of 23,164 packets) doubled those of the previous year.

11. At Tarkwa over 100 acres have now been brought under cultivation. Large numbers of economic plants were distributed during the year, and there are in the nurseries 2,000,000 plants of the Funtumia elastica, 10,800 Para rubber, 30,000 kolas (kola acuminata), 5,000 cocoa, and 6,600 fruit trees in readiness for distribution.

One acre of each of the undermentioned rubber trees has been planted out: Castilloa elastica, Manihot Preciosa, and Manihot glaziovii. All are reported to be doing well.

Three varieties of sugar cane were received from Barbados and planted out with satisfactory results.

12. At Kumasi the work of clearing the ground for the new station was commenced early in March, and 50 acres were ready for planting at the end of the year. Several thousands of various economic plants have been raised in readiness for planting out during the rainy season.

13. Provision has been made in the estimates for 1907 for the establishment of a station in the Cape Coast District with a view to encourage the cultivation of economic products in this neighbourhood where depression has been felt in recent years by the transfer of trade *viâ* the railway, from Cape Coast to Kumasi.

Exhibitions.

14. The second agricultural show held in the Colony took place at Cape Coast in November. Though designated a "District Show" and not on the same scale as that held at Accra in the year 1905, yet the Exhibition was, on the whole, a success, and acted as a stimulant in directing the attention of the population to the potentialities of agricultural wealth, awaiting development, in their immediate neighbourhood.

15. It is of interest to note that some chiefs and thirty-seven native farmers from the Colony visited the agricultural show held at Lagos last November, and that 10 out of the number were awarded prizes for their exhibits.

Agricultural Concessions.

16. Owing to the favourable reports which have been made during the past few years on the experimental planting of Para rubber and the high prices realized by the sale of properly prepared latex from the indigenous plant (Funtumia elastica), capitalists are now turning their attention to this Colony as a promising field for investment. In the eastern province the "African Product Development Company" has taken up a tract of land at Boonso. Good progress has been made in clearing the ground and large qualities of rubber and kola seedlings have

been raised. In the same neighbourhood the "West African Plantations Company" has taken up five square miles of land and has cleared a considerable acreage besides raising a large number of seedlings of Para rubber and Funtumia elastica.

Near Axim the "African Plantations Company, Limited," has taken up about 32,000 acres for the purpose of cultivating various economic products. A considerable area has been cleared and some 16,000 cocoa trees, 12,000 Ofruntum rubber trees, and 15,000 Para rubber trees have been planted out. Some thousands of seedlings are also in nurseries in readiness for the coming rainy reason. About 10 miles west of Sekondi and Prestea and Imporbo rubber plantations cover an area of 7,610 acres of which 200 have been cleared. 22,000 plants of the Funtumia elastica and 200 of the Para variety have been planted out and are reported to be doing well. All these plantations are under European management and their progress will be watched with great interest.

General.

17. The year under review has been prosperous for agriculturists. The rainfall was sufficient, crops yielded well, and, in most cases, have fetched remunerative prices. Exports, with the exception of palm kernels, show considerable increases in both quantities and value.

(D.) Lands.

1. The Government possesses no Crown or Public lands in the Colony except such as have been acquired under or prior to the enactment of "The Public Lands Ordinance, 1876," which empowers the Colonial Secretary to purchase or take and acquire any lands required for the service of the Colony; paying reasonable compensation to the owner or owners thereof.

2. The general principle upon which the Supreme Court of the Colony proceeds in cases dealing with lands is that all unoccupied land within territory under a paramount "stool," belongs to such stool. The effect of the recognition of this principle is that, in theory, no land in the Colony is without an owner. Occupancy by strangers to the tribe for purposes of cultivation is commonly allowed on easy terms.

3. This theoretic principle is, however, much modified in practice in the Eastern Province of the Colony where each subordinate stool has attached to it large portions of land, apparently carved out of the territory originally belonging to the paramount stool. Similarly, families possess tracts of land carved out of the subordinate stool lands; and finally, individuals are found having private ownership of portions of the family land.

Any unoccupied land within the recognized boundaries of the subordinate stool land, or the family, or private land belongs to the subordinate stool of the family or the private individual,

as the case may be. But any unoccupied land, not being part of the land of a subordinate stool, or a family, or a private person, is attached to the paramount stool.

4. In towns situated on the coast, however, portions of land are frequently owned by individuals, and in such cases conveyance by lease or sale usually follows the form of English law.

5. Since the passing of the Concessions Ordinance of 1900, European companies have acquired on lease large tracts of land for gold mining. Briefly, the Concessions Ordinance leaves the chiefs free to dispose of stool and tribal lands without the intervention of the Government, and seeks to safeguard the interests of native owners by empowering the Supreme Court to invalidate concessions for which adequate pecuniary consideration has not been given. Concessions for gold mining must not exceed five square miles in area, and for other purposes, twenty square miles. No concession is good in law until it has been certified by the court to be valid. Before issuing its certificate the court has to be satisfied that the concession has been properly obtained; that adequate value has been given, and that the interests of the lessors have been protected. The boundaries of concessions must be demarcated and the plan authenticated by the Director of Surveys.

6. Under Ordinance No. 14 of 1905, the Governor may exempt from the operation of the Ordinance of 1900 any class of concessions whereby no right, interest, or property in land with respect to minerals or precious stones purports to be either directly or indirectly granted.

7. During the year under review 11 concessions were filed and 12 certificates of validity were granted.

(E.) Shipping.

1. A comparative statement of the number and tonnage of vessels entered and cleared at Colonial Ports during the years 1905 and 1906 is contained in Table XIV. The number of steamers entered and cleared shows a decrease of ten; the number of sailing vessels entered shows an increase of one, and cleared an increase of five.

Mail and Steamship Services.

The African Steamship Company and the British and African Steam Navigation Company (1900) *Limited.*

2. Mail steamers of these companies leave Liverpool every Saturday, calling at Sierra Leone, Monrovia, Axim, Sekondi, Cape Coast, and Accra, the length of the voyage being 14 to 15 days.

3. These companies also despatch cargo steamers every Wednesday and fourth Thursday from Liverpool, the Wednesday steamers calling at the principal Gold Coast ports, and the

Thursday steamers at all Gold Coast ports outwards and homewards. The length of the voyage, Liverpool to Accra, varies from 30 to 37 days.

4. On the 15th of each month a steamer leaves Hamburg and calls at the principal Gold Coast ports, the length of the voyage being about 30 days.

5. Homewards:—The mail steamers of these companies call at Accra every Monday, also calling at Cape Coast, Sekondi, and Axim—the length of the voyage, Accra to Plymouth, by these steamers, being 17 days.

6. The steamers of these companies call at the Canary Islands or Madeira, and occasionally at both places, homewards.

Woermann Line.

7. A mail steamer of this line, outwards from Hamburg calls at Southampton on the 12th of each month for passengers for the principal Gold Coast ports, the length of the voyage, Southampton to Accra, being 16 days. Cargo steamers of this line leave Hamburg on 2nd, 12th, 13th, 22nd, and 26th of each month, calling at most ports on the Gold Coast, the voyage to Accra varying from 25 to 32 days.

8. Two of this company's steamers leave Accra on 14th and 28th of each month homewards, calling also at Cape Coast, Sekondi, and Axim for mails and passengers, the voyage from Accra to Southampton taking about 16 days.

9. Cargo steamers of one or two French companies sailing from Marseilles call irregularly outwards and homewards at Gold Coast ports.

III.—LEGISLATION.

Ordinances of 1906.

Eighteen Ordinances were enacted by the Legislature of the Gold Coast Colony; and by the Governor, eight for Ashanti, and six for the Northern Territories, the most important of which are as follows:—

No. 1.—"The Savings Bank Deposits Transfer Ordinance, 1906," makes provision for the mutual transfer of Savings Bank deposits not exceeding £200 between the Colony and the United Kingdom or any British Possession or foreign country.

No. 2.—"The Stamp (Amendment) Ordinance, 1906," exempts from the additional duty of £25, concessions granted solely for the purpose of agriculture or arboriculture.

No. 5.—"The Criminal Procedure (Amendment) Ordinance, 1906," is an amendment of the law respecting criminal appeals, by removing the previous finality of a decision of a Divisional Court sitting as an appeal Court. Section 6 empowers a Divisional Court to refer a case stated by a District Commissioner for the consideration of the Full Court, and section 7 gives a discretionary power to a Divisional Court, affirming a conviction by a District Commissioner, to grant leave for further appeal to the Full Court.

No. 7.—"The Town Councils (Amendment) Ordinance, 1906," amends Ordinance No. 17, of 1894, in certain particulars. The most important amendment abolishes the biennial general assessment of a municipal town and substitutes a sexennial general assessment with interim assessments every two years of new houses, and of houses in respect of which the owners or occupiers have sent in a written request for reassessment.

No. 8.—"The Volunteer Ordinance, 1906," repeals the Ordinance of 1894 and provides the constitution of the volunteer force in corps, each under a Commanding Officer, and with powers of making rules, subject to the approval of the Governor in Council, for the management of its property and with regard to interior economy. The act also extends the engagement of Volunteers to service in Ashanti if required.

No. 9.—"The Civil Process Extension Ordinance, 1906," is part of a system of mutual assistance between the Supreme Court of the Gold Coast Colony and the Courts of Ashanti with reference to the service and execution of process in civil causes and matters. Part II. of the Ordinance deals with requests for the service and execution in Ashanti of process issuing out of the Supreme Court, and Part III. provides for service and execution in the Colony of process of the Ashanti Courts. An Ashanti Ordinance, No. 5 of 1906, supplements this Ordinance, and completes the system.

No. 11.—"The General Loan and Inscribed Stock Ordinance, 1906," which repeals Ordinance No. 4 of 1905, represents the latest form of Crown Colony legislation with reference to the raising of loans in England. New features have been introduced to enable loans to be issued to better advantage, the principal of these being the conferring of specific power on the Crown Agents for the Colonies to decide whether a loan should be issued in the form of stock or debentures, and the raising of the maximum rate of interest on debentures from 4½ to 5 per cent.

No. 12.—"The Loan Ordinance, 1906," repeals Ordinance No. 5 of 1905, and substitutes amended figures, based on the latest estimates, for the works for which the loan is to be raised.

No. 13.—"The Concessions (Amendment) Ordinance, 1906," gives concession holders, who are liable to be charged income

tax in the United Kingdom in respect of the profits of their concessions, the option of paying duty on the amount of those profits as assessed by the Income Tax Commissioners, instead of delivering the annual statement called for by section 28 of the Concessions Ordinance, 1900. A new provision is accordingly added empowering such concession holders to give notice to the Treasurer on or before the 31st day of March, in any financial year of the United Kingdom, of election to pay on their income tax assessments.

No. 14.—"The Companies Ordinance, 1906," is practically a consolidation of such of the provisions of the Companies Acts 1862 to 1900, and the other Imperial Acts relating to Companies, as are suitable to this Colony, where there is no Bankruptcy law, and makes provision for the incorporation in the Colony of companies with limited liability. Its introduction was due to representations made to the Government that the absence of legislative provision for the limitation of liability had deterred natives of the Colony from forming associations for the development of its natural resources.

No. 15.—"The Rivers (Amendment) Ordinance, 1906," reduces, as from the beginning of the new year, the annual fee for a licence to dredge for minerals from £30 to £5. The Ordinance was introduced at the instance of holders of dredging concessions, who had represented that the yearly fee hitherto in force had imposed a much heavier burden on dredging than that borne by other forms of gold mining.

No. 16.—"The Customs Tariff (Amendment) Ordinance, 1906," was enacted for the purpose of partially defraying the debt charges connected with the loan authorized by Ordinance No. 12, by increasing the duty on brandy and other spirits from 4*s*. 6*d*. to 5*s*. per gallon; raising certain other specific duties, and, by a reduction from 2*d*. to ½*d*. per gallon, assimilating the proportional charge per degree for spirits above the standard strength of 12½ degrees under proof to that in force in other British West African Colonies. Provision is also made for the substitution, when convenient, of the Tralles hydrometer used in the neighbouring French and German possessions, in place of Sykes hydrometer.

No. 18.—"The Foreign Companies Preferential Creditors Ordinance, 1906" was introduced for the protection of local clerks and workmen in the event of the liquidation or insolvency of mining and other companies incorporated elsewhere but carrying on business in the Colony. Such persons under the former local conditions were practically incapacitated from presenting their claims for payment to an Official Liquidator in England or any foreign country. The Ordinance also provides for the appointment, in certain circumstances, of an Official Receiver of such a company, who is empowered to ascertain and pay the amount of local preferential debts, and to realise local assets so far as may be necessary for the purpose.

ASHANTI.

No. 1.—"The Ashanti Administration (Amendment) Ordinance, 1906," repeals and re-enacts with slight variations Ashanti Ordinance No. 7 of 1905. The effect of the Ordinance is to apply to Ashanti the Mining Rights Regulation Ordinance, 1905 (No. 8 of 1905 of the Gold Coast Colony).

No. 2.—"The Ashanti Concessions (Amendment) Ordinance, 1906," is an amendment of the Ashanti Concessions Ordinance, 1903, on lines similar to the Gold Coast Ordinance No. 14 of 1905. Power is given to the Governor to exclude from the operation of the principal Ordinance concessions granted for the purpose of agriculture or arboriculture, and provision is made for variation of the terms of a certificate of validity subject to the consent of both the grantor and holder of the concession.

No. 4.—"The Ashanti Foreign Enlistment Ordinance, 1906," removes a doubt which had arisen as to the application of the Foreign Enlistment Act, 1870 to Ashanti, and enacts that the provisions of that Act are to be deemed to apply to Ashanti in the same manner as to British Possessions acquired prior to the date of the Act. The proclamation under section 3 of the Act was made on the 22nd May, 1906.

No. 5.—"The Ashanti Civil Process Extension Ordinance, 1906," was enacted on the lines of Gold Coast Ordinance No. 9 of 1906, which it supplements, and it completes the system of mutual assistance with regard to Civil Process.

No. 6.—"The Ashanti Administration (Second Further Amendment) Ordinance, 1906," introduces certain amendments into the Ashanti Administration Ordinance, 1902. Of these the principal are the prohibition of the employment of legal practitioners in the Ashanti Courts, and the amended procedure with reference to death sentences, which will henceforth be submitted to the Governor for confirmation or otherwise.

No. 7.—"The Ashanti Rivers (Amendment) Ordinance, 1906," reduces the annual fee for a dredging licence for minerals from £30 to £5.

No. 8.—"The Ashanti Administration (Third Further Amendment) Ordinance, 1906," introduces further amendments into the Ashanti Administration Ordinance, 1902. A new clause is added as to appointment of District Commissioners Assistant District Commissioners, and Travelling Commissioners, and section 16 is amended so as to give the Chief Commissioner of Ashanti power of reviewing the sentences of subordinate Commissioners in the same way that the Chief Justice reviews sentences of Commissioners in the Colony.

NORTHERN TERRITORIES.

No. 2.—"The Northern Territories Administration (Further Amendment) Ordinance, 1906," makes provision for the charging of customs duty on goods imported from French or German territory.

No. 3.—"The Fugitive Criminals Surrender Ordinance, 1906," provides for the extradition of fugitive criminals from the Protectorate to such countries as may from time to time be notified by the Governor in the Gazette.

No. 4.—"The Northern Territories Constabulary Ordinance, 1906," makes provision for the establishment and maintenance of a body of constabulary in the Protectorate, to take the place of the recently disbanded second battalion of the Gold Coast regiment.

No. 5.—"The Northern Territories Rivers (Amendment) Ordinance, 1906," reduces the annual fee for a dredging licence for minerals from £30 to £5.

No. 6.—"The Northern Territories Administration (Second Further Amendment) Ordinance, 1906," introduces several amendments into the Northern Territories Administration Ordinance, 1902. Of these the principal relate to the appointment of Commissioners; the prohibition of the employment of barristers and solicitors in the local courts; the procedure with regard to death sentences, which in future must be confirmed by the governor before the sentence is executed; and to a revision by the chief commissioner of all sentences imposed in criminal cases by subordinate commissioners.

IV.—EDUCATION.

(A.) Primary.

1. There are seven Government Elementary Schools in the Colony and 140 Elementary Schools conducted by the various Missionary Societies which receive, on certain conditions laid down by the Board of Education, grants-in-aid. To be eligible for a grant an assisted school must have assembled at least 300 times during the year with an average daily attendance of not less than 20 pupils.

2. Table XV. is a comparative statement of the number of government and assisted schools maintained in the Colony and Ashanti for the past three years. An increase of three schools was effected during the year 1906. Of the schools on the list for inspection, 130 out of a total of 140 succeeded in earning grants-in-aid.

3. The total number of pupils on the rol of the elementary schools for the last preceding three years is as follows:—

1904	13,955
1905	14,370
1906	14,780

The average attendance of pupils, and the amounts of the grants-in-aid for the same period are shown in the appended statement:—

Year.	Government.	Assisted.	Total.	No. on Roll.	Average Attendance.	Grant-in-aid.
						£ s. d.
1904 ...	7	132	139	13,955	10,234	4,636 5 7
1905 ...	7	137	144	14,370	10,379	5,052 12 3
1906 ...	7	140	147	14,780	10,712	5,352 12 0
Increase or Decrease 1906.	—	+ 3	+ 3	+ 410	+ 333	+299 19 9

4. Table XVI. is a statement of the classification of the schools under the various education bodies.

5. In addition to the schools mentioned in the preceding paragraphs, there are 126 schools (most of which are half-time infant schools) in the Colony which are not eligible for various reasons to receive grants-in-aid. The classification of the non-assisted schools and the number of pupils will be found in Table XVII.

It will thus be seen that the grand total number of children attending all schools is 18,006, which represents, approximately, twenty per cent. of all the children in the Colony.

6. The total number of teachers employed is 680.

7. The half-yearly examinations for admission to clerkships in the Government service were held in January and July. The number of candidates was over 400, and 220 sat for examination.

8. The total income of the assisted schools was £11,226 5*s.* 8*d.*, an increase of nearly £3,000 as compared with the year 1905. The amount is chiefly made up as follows:—

	£	s.	d.
Government Grants	5,852	12	0
Voluntary Contributions and Grants from Missionary Societies	3,635	11	6
School Fees	1,362	7	0

9. The average payment per head in the Elementary Schools was 2*s.* 3*d.*, and in the Secondary Schools £2 13*s.* 0*d.* per annum.

10. The total cost of the Education Department in 1906 was £12,520.

11. The main difficulty with which the Education Department is confronted is the lack of qualified teachers. Only a

comparatively small number of the 680 teachers employed in the various schools possess the certificates granted by the Board of Education and the only mission in the Colony which possesses a training institution is the Basel Society. In order to provide a staff of qualified and efficient teachers the Board of Education has drawn up a scheme for the establishment of a government training institution for teachers which it is hoped will be opened in about two years time.

(B.) Secondary.

12. There are three schools in the Colony which profess to give a higher education than that obtainable at the elementary schools, viz.: the Accra "Grammar School," the Cape Coast Wesleyan "Collegiate School," and the Cape Coast "Graded School." Of these institutions only the Accra "Grammar School" succeeded in earning a Government grant of £100. This school is reported to be doing good work, but to be greatly hampered by lack of funds.

(C.) Industrial, Technical, and Agricultural Schools.

13. The courses of instruction held at the Agricultural Stations at Aburi and Tarkwa were attended by thirty-two students of whom only eight were awarded certificates of proficiency and received the Government grant. Though these classes were not altogether successful last year, owing to a shortness in the European Staff of the Agricultural Department, yet the Director of Education reports that improvement is noticeable in those school plantations where the instructor has attended the course in question. Economic plants such as rubber, cocoa and cinnamon are being more extensively planted, and at least twelve school plantations are reported to have well-grown rubber trees, both of the Para and Funtumia varieties, which should be ready for tapping next year. The course includes instruction in the tapping of rubber trees and the preparation of the latex. Prizes are offered by the Government to schools for the best cultivated plots or plantations.

14. The classes in wood work, carpentry, cabinet making, &c., at the Government schools are well attended and some good work is turned out for the annual school exhibition. The printing press at the Roman Catholic School at Cape Coast enables that institution to train a few boys in type setting and elementary printing work and book-binding. At other schools straw-plaiting, basket-making, enamelling, wood-carving and iron work are taught with fair results. The qualifications of the instructors are, however, not of a high order. A scheme for the establishment of a high grade technical and industrial school at Accra has been formulated, and it is hoped that the necessary buildings will be put in hand early in 1908.

V.—GOVERNMENT INSTITUTIONS.

(A.) Hospitals.

1. Well equipped hospitals are maintained at Accra, Cape Coast, Sekondi and Kumasi—European nursing sisters being attached to all except that at Kumasi. The hospital at Sekondi was enlarged and greatly improved during the year at an expenditure of £1,512; the increased accommodation provides three additional wards and a convalescent ward for second-class patients.

The new hospital for Europeans at Kumasi which was approaching completion at the end of the year contains three wards and nine beds.

The accommodation in the four main hospitals is as follows:—

—	European Wards.	Beds.	Native Wards.	Beds.
Accra	3	7	4	25
Cape Coast	3	6	2	25
Sekondi	5	18	3	14
Kumasi	3	9	3	44

2. Smaller hospitals are established at Axim, Elmina, Adda, Keta, Kumasi, and Gambaga. There are dispensaries at Tarkwa, Saltpond and Akuse. At Accra and Cape Coast hospitals are maintained for contagious diseases.

3. The number of in-patients treated during the year in all hospitals was 1,949, as compared with 1,989 in 1905; 2,496 in 1904; and 2,540 in 1903. The general realth of the Colony is reported to have been good.

(B.) Asylum.

1. The lunatic asylum at Accra is the only one in the Colony. On the 31st of December, 1905, 62 patients remained in the institution. During the year under review 33 patients were admitted and 13 discharged. The total number of patients under treatment was therefore 95, of whom 76 were males and 19 females.

(C.) Poor-Houses; and (D.) Reformatories.

As has been stated in previous reports, poverty, in the strict sense of the word, is hardly known in the Colony. There are no poor-houses nor reformatories.

(E.) Savings Bank.

1. The transfer of the Savings Bank from the Treasury Department to the Post Office with effect from the 1st January,

1905, has encouraged depositors to take advantage of the increased facilities afforded and the wider area covered by the latter department.

2. During the year under review the total deposits amounted to £9,206, as compared with £5,798 in 1905. On the 31st of December the bank had to its credit the sum of £12,816, as against £8,995 at the end of the year 1905.

3. The total number of accounts open on the 31st of December was 890, as compared with 648 at the beginning of the year.

VI.—JUDICIAL STATISTICS.

(A.) Police.

Establishment.

1. The strength of the police, all ranks, on the 31st of December was 621; or 27 below the authorized establishment. On the corresponding date in the previous year the deficiency was 35. The number in the various divisions were distributed as follows:—

General Police	427
Escort Police	112
Mines Police	47
Railway Police	35
	621

Recruits.

2. During the year 194 men were engaged and trained at Accra; nearly all these men are natives of the Colony or its dependencies. There was less wastage than in the year 1905 during which 256 recruits were engaged. The Acting Commissioner of Police reports that it is still difficult to persuade the better and more educated class of natives to join the force.

The stamp of recruits who are coming forward has, however, improved somewhat during the past two years; and the appearance of the police generally is beginning to show the result of the more efficient supervision rendered possible by the increase of the European staff in the year 1905.

Barracks.

3. Suitable police barracks have been constructed at Cape Coast and Sekondi, and the acting Commissioner of Police reports that good results are already apparent in the improved discipline at these stations. Additional barracks at Tarkwa are also now ready for occupation.

Detective Branch.

4. The conduct of this branch of the police is reported to have been most satisfactory. The superintendents and staff have worked intelligently and have secured convictions in serious cases of robbery, larceny, slave dealing and forgery.

Crime.

5. The return of crime shows that 7,414 cases were dealt with as against 7,150 cases in the year 1905. The number of convictions obtained was 5,652.

The increase of crime during the year has been chiefly in the mining districts.

(B.) Prisons.

New Prison at Sekondi.

1. Progress with this important public work has not been so rapid as was anticipated at the date of writing the Annual Report for last year. Its completion will probably be delayed until the end of June, 1907.

2. Structural improvements have been made in the existing prisons at Accra and Kumasi.

A new prison has been erected at Ada.

The central gaols of the Colony are situated in the old forts or castles at Accra, Cape Coast, Elmina, and Sekondi. There are nine district gaols, in which prisoners under sentence of six months or less are confined, at Axim, Tarkwa, Winneba, Ada, Akuse, Keta, and Saltpond in the Colony; and at Kumasi and Obuassi in Ashanti. The discipline and interior economy of the central gaols has been greatly improved since the engagement of the European gaolers in 1904. All the prisons in the Colony and Ashanti were personally visited and inspected by the Superintendent of Prisons during the year.

Prison Industries.

3. The amount realized from the sale of goods manufactured in the prisons and from convict labour was £1,564, as against £642 in the previous year—the gross estimated value of prison labour being £7,688 as against £8,844. The re-introduction of prison industries has been attended with satisfactory results. The quality of the furniture and clothing made by the prisoners has given general satisfaction to the public departments, and the Superintendent of Prisons reports that the convicts seem to take great interest in learning trades with a view to earning an honest livelihood on their discharge.

4. The total expenditure of the Department was £11,956, being a reduction of £1,014 as compared with the year 1905.

General Remarks.

5. The number of prisoners committed during the year was 4,846, being an increase of 470 over 1905.

(C.) Criminal Statistics.

Table XVIII. shows the number of offences, apprehensions, and acquittals in the Colony, Ashanti, and the Northern Territories for the last three years.

VII.—VITAL STATISTICS.

(A.) Population.

1. The population of the Gold Coast and its dependencies Ashanti and the Northern Territories, was found by the Census Committee in 1901 to be 1,486,433. A discrepancy in the figures placed before the Committee was discovered in 1906, from which it is apparent that the population of the Northern Territories has been understated by 210,532. The figures have been corrected in the current issue of the Blue Book.

There can be little doubt, however, that the population of the last mentioned Protectorate was very much underestimated in 1901, and its inhabitants probably number at least 1,000,000.

(B.) Public Health.

2. During the year under review the general health of the population may be said to have been good. The Deputy Principal Medical Officer in his Annual Departmental Report states: "I have no hesitation in saying that the health has "improved." As is usual, fevers were the most prevalent diseases amongst the European community. The severe types of bilious remittent, yellow, and hyperpyrexial fevers which were formerly common are now, however, reported to be more seldom met with. On the other hand blackwater or haemoglobinuric fever appears to be on the increase. Fifteen officials suffered from this disease during the year; but in two cases only was the termination fatal. A severe outbreak of cerebro spinal meningitis occurred during February and March in the Northern Territories. The disease is reported to have assumed a virulent epidemic type and in one instance practically decimated a village of some 400 inhabitants. It is of interest to note that the outbreak of this epidemic coincided with the season at which the harmattan, the dry wind from the North, was blowing with some violence; the epidemic ceased abruptly with its cessation.

Health of the European Community.

3. The improvement in the health of Europeans resident in the Colony and its Dependencies to which attention was drawn in the Annual Reports for 1904 and 1905 has not been fully maintained. The death-rate rose from 13·60 in 1905 to 17 per 1,000 in 1906; on the other hand the invaliding rate per 1,000

OFFICIAL DEATH-RATE PER 1000 FOR 10 YEARS 1897_1906

fell from 78·49 to 62. The death and invaliding rates per 1,000 are shown in the appended table.

How Employed.	Number.	Deaths.	Invalided.	Death rate per 1,000.	Invaliding rate per 1,000.
Officials	399	6	39	15	97
Mercantile Firms...	255	4	16	15	62
Mining Companies	992	18	53	18	53
Missions	119	3	3	25	25
Total ...	1,765	31	111	17	62

The corresponding total figures for the preceding years were—

Year.	Number.	Deaths.	Invalided.	Death rate per 1,000.	Invaliding rate per 1,000.
1904	1,953	25	157	12·80	80·38
1905	1,911	26	150	13·60	78·49

The following table shows the comparative health statistics of the Colony, Ashanti, and the Northern Territories:—

Locality.	No.	Deaths.	Invalided.	Death rate per 1000.	Invaliding rate per 1000.
Colony	1,344	25	77	18	57
Ashanti...	383	6	29	15	75
Northern Territories ...	38	—	5	—	131
Total	1,765	31	111	17	62

Of the six deaths which occurred amongst the officials in 1906, two were due to accidents, and four to climatic diseases.

The annexed chart shows the official death-rate for the ten years 1897-1906. The record enfaced thereon shows the marked improvement which has taken place since the years 1897-1901.

The Acting Principal Medical Officer reports that the number (9) of medical officers invalided during the year was far in excess of the record of any other Department except the Railway.

Health of the Native Population.

4. With the exception of the epidemic previously referred to, the health of the natives has been fairly good. Cases of special interest which came under observation were cancer (4), sleeping sickness (3), leprosy (2), beri-beri (9).

(C.) Sanitation.

5. Improvements were carried out at considerable expense in the towns of Cape Coast, Sekondi, and Kumasi. A great deal has been done during the past six years to improve matters in all the principal towns, but, as the Acting Principal Medical Officer observes in his Annual Report, much remains to be done. The schemes now under consideration for supplying the towns of Accra and Sekondi with an ample supply of good drinking water should, when completed, have a very beneficial effect on the general health of these places. Provision (£870) has been made in the current estimates for flushing the main drain at Cape Coast with sea water.

(D.) Climate.

6. There was, as in past years, a wide variation in the rainfall registered in various parts of the Colony. The extent of this variation is apparent from the following figures:—

	Inches.
Accra	20
Keta	15
Axim	66
Kumasi	75

Generally, there was a marked increase in the rainfall in the eastern portion of the Colony compared with the year 1905, as is evinced by the increased quantities exported of all indigenous products.

The appended table gives the mean meteorological observations taken at the stations mentioned during the year:—

Name of Station.	Temperature.						Rainfall.	
	Solar maximum.	Minimum on grass.	Shade maximum.	Shade minimum.	Range.	Mean.	Amount in inches.	Degree of humidity.
Accra	140·79	65·73	84·64	70·91	13·72	77·77	20·54	85·68
Aburi	141·61	70·61	81·12	73·57	7·34	77·34	49·13	89·24
Cape Coast ...	116·49	73·99	84·84	75·95	8·87	80·39	41·80	84·55
Axim	138·95	62·16	86·20	70·27	16·14	78·15	66·99	84·99
Kwitta ...	140·93	70·12	90·11	72·75	17·36	81·43	15·74	78·78
Kumasi ...	144·41	67·69	88·08	70·91	17·20	79·49	75·00	89·70
Gambaga ...	148·34	70·74	88·68	74·49	14·21	81·58	44·67	60·72
Sekondi .	140·54	72·38	86·48	73·27	13·29	79·87	41·71	68·39

VIII.—POSTAL, TELEGRAPH, AND TELEPHONE SERVICES.

REVENUE.

1. The revenue of the Department for the year amounted to £25,000 2*s.* 1*d.*, as against £23,941 8*s.* 7*d.* for the previous year. The sum of £7,288 12*s.* 3*d.* was collected on behalf of the African Direct Telegraph Company and foreign administrations on account of cablegrams despatched from the various offices in the Colony £2,703 10*s.* 4*d.* was collected on parcels imported and this amount subsequently credited to the Customs Department.

Sale of Stamps.

2. The sale of stamps for 1905 and 1906, respectively, amounted to:—

—	1905.			1906.		
	£	s.	d.	£	s.	d.
(*a*) Postage Stamps for Postal, Revenue and Judicial purposes.	19,730	0	5	19,675	3	6
(*b*) Postage Stamps for Telegraphic purposes.	9,950	16	5	12,229	15	3

The increase in the sale of stamps for telegraphic purposes is due to the improvement of trade.

EXPENDITURE.

3. The expenditure for the year amounted to £22,568 1*s.* 9*d.*, as against £24,810 19*s.* 1*d.* for 1905. This amount includes the sum of £946 19*s.* 10*d.* on account of expenditure extraordinary in connection with the extension of the telegraph system from Yeji to Salaga.

Correspondence.

4. The total number of ordinary letters, post cards, newspapers, and book packets is estimated at 2,970,000, as compared with 3,092,502 in 1905.

Registered and Insured Correspondence.

5. Less registered and insured correspondence was dealt with than in the preceding year, but the quantities were in excess of those in 1904. The number of registered and insured articles despatched was 158,363, and the number received 105,000.

Parcel Post.

6. The total number of United Kingdom and Inter-Colonial parcels dealt with was 36,167, viz., 4,044 despatched and 32,123 received, as against a total of 42,040 the previous year.

Although there is this decrease in the actual number of parcels imported, the average weight and value were greater, and an increase of 26 per cent. on the *ad valorem* duty was collected.

Money Order Offices.

7. The Money Order Office at Dixcove was closed in July. 1906, upon the merging of the Dixcove in the Sekondi District.

Money Orders.

8. The total value of money orders issued was £27,371 5*s.* 6*d.*, as against £36,328 14*s.* 8*d.* in 1905. The decrease is due to the fact that British postal orders have largely superseded the use of money orders.

Postal Orders.

9. The total number of postal orders issued during 1906 was 74,851, of the value of £51,703 1*s.* 1*d.*, as compared with £31,442 4*s.* in 1905, an increase of over 64 per cent. The cause of this large increase was referred to in the Annual Report for 1905.

Telegraphs.

10. On the 31st December 43 offices were open to the public in the Colony, Ashanti, and the Northern Territories with a total constructed length of 1,129 miles, or 51 miles more than in 1905.

11. The total number of telegrams dealt with was 218,421, as compared with 205,270 the previous year. While there has been a general increase in the traffic in paid messages there has been a decrease of 2,353 in the number of official telegrams; 60,637 having been transmitted as compared with 62,990 in 1905.

Telegraph Extension.

12. The telegraph line, which had during the previous year been extended from Attabubu in Ashanti to Yeji in the Northern Territories, was further extended to Salaga, a distance of 27 miles, at a cost of £946.

New Offices.

13. Three new telegraph offices were opened during the year at Aimensa in the Colony, Akrokerri in Ashanti, and at Selaga in the Northern Territories.

14. The whole of the line along the Coast from Accra to Keta has been practically renewed, and the line through the forest from Cape Coast to Kumasi thoroughly overhauled. The lines throughout the Colony generally have been kept in a satisfactory condition during the year.

Telephones.

15. The number of offices, &c., connected with the telephone exchanges at Accra, Cape Coast, Sekondi, and Tarkwa are 104, of which 59 are Government.

16. The extension of the telegraph system from Yeji to Salaga involved the laying of an additional cable across the Volta River at Yeji.

IX.—MILITARY FORCES AND EXPENDITURE.

West African Frontier Force.

1. The strength of the Gold Coast Regiment of the West African Frontier Force at the end of the year was 36 officers, 11 European non-commissioned officers, and 1,411 rank and file.

The headquarters of the Regiment and the Battery is at Kumasi in Ashanti, with detachments of infantry at Accra and Cape Coast in the Colony, and at Gambaga in the Northern Territories.

2. The 2nd Battalion of the Regiment, formerly stationed in the Northern Territories, was disbanded with effect from the 1st of January, 1907, and was replaced by a force of constabulary, the establishment of which consists of 2 officers and 319 non-commissioned officers and constables.

3. The cost of the maintenance of the Regiment in 1906 was, 1st Battalion, £60,969; 2nd Battalion, £24,189.

Reserve.

4. Considerable progress has been made in the formation of a reserve of men who have completed the period for which they were enlisted.

Volunteers.

1. The strength of the various corps on the 31st of December, 1906, was as follows:—

Corps.	Officers.	Native Officers.	Rank and File.	Remarks.
Gold Coast Volunteers ...	21	4	446	Including Ambulance Corps.
Gold Coast Railway Volunteers,	9	—	263	—
Gold Coast and Ashanti Mines Volunteers.	18	—	256	All Europeans.
Machine Gun Sections ...	3	—	36	"
Total...	51	4	1,001	

Expenditure.

2. The total cost of the Volunteer Force in 1906 was £1,852, being a decrease of £190 over that of the preceding year.

Preventive Services.

1. The Eastern and Western Frontier Preventive Services, which are branches of the Customs Department, are stationed on the frontiers of the Colony and on the eastern frontiers of Ashanti and the Northern Territories. Their duties are analogous to those of the Coast Guard in the United Kingdom.

2. The authorised establishment of both services is 365 of all grades. The cost of maintenance in 1905 was £16,436.

GENERAL OBSERVATIONS.

Important Events.

1. The year under review was one of steady progress in the Colony and its Dependencies, it was not marked by any events of the first importance.

Ashanti.

The general condition of Ashanti improved during the year, and Kumasi, where agencies have been opened by the principal European mercantile firms, has become the centre of a rapidly increasing trade.

The staff of civil officers has been augmented, with effect from the 1st of January, 1907, by one District Commissioner, and five Assistant District Commissioners. The cost to Ashanti of this increase in the establishment will be covered by the saving which has been effected by the transfer of one company of the Gold Coast Regiment to the Northern Territories.

2. The boundaries between the Colony and Ashanti, and between Ashanti and the Northern Territories, have been readjusted and defined by Order in Council of the 22nd of October, 1906. The new boundaries have been demarcated with due regard to tribal lands and natural features, in contradistinction to the arbitrary boundaries defined in the Order in Council of the 26th of September, 1901, at which date, owing to the absence of detailed surveys of the country, it was found necessary to base the boundaries on parallels of latitude.

3. The revenue shows an increase of £14,996 as compared with the year 1905. The principal heads of increase are:—

	£
Royalties	6,881
Caravan taxes	5,123

4. A reference to the establishment of an agricultural station at Kumasi has been made under the head "Agriculture, Industries, and Botanical Stations."

5. A well-equipped hospital for Europeans at Kumasi has been completed on an admirable site which was secured, to mutual advantage, from the Basel Mission in exchange for Government land situated nearer to the native township.

6. The swamps which existed in the near vicinity of the town have been drained, and in other respects the sanitary arrangements have been greatly improved during the year.

7. No big game animals were killed in Ashanti during the year, and no licences to shoot were taken out.

8. The Annual Report on Ashanti, written by the Chief Commissioner, for the year 1906* should be referred to for detailed information with regard to this Dependency of the Colony.

Northern Territories.

1. An important step has been taken with regard to the Government of this Protectorate by replacing, with effect from the 1st of January, 1907, the former semi-military administration, by a staff of Civil District and Assistant District Commissioners, and by establishing new stations at Tumu, Lorha, and Tamale. Simultaneously, the 2nd Battalion of the Gold Coast Regiment has been disbanded and a force of armed constabulary substituted therefor. These changes, by bringing the Commissioners into closer touch with the native rulers than has hitherto been possible, should result in a more effective control and contribute to steady and peaceful development. The saving which will be effected by the alterations in the establishment is estimated at £3,000 a year.

2. Our relations with the officials of neighbouring foreign Powers continue to be satisfactory and even cordial. As in former years, friendly visits have been interchanged between officers stationed at or near the frontiers.

3. The revenue of the Protectorate realised £14,013, an increase of £599 as compared with the previous year.

4. The attempt, to which reference was made in the report for 1905, to cultivate friendly relations with some of the wilder and intractable tribes of the interior is reported by the Chief Commissioner to have been entirely successful. A practical proof of the establishment of good relations was afforded during the Governor's visit to the Protectorate in the early part of last year, when His Excellency travelled for five days through the Fra Fra country without molestation or difficulty of any kind.

5. The telegraph line was extended from Yeji to Salaga during the year, and, in 1907, will be carried from Salaga to Tamale which will become the future headquarters of the Administration. The present telegraph line from Kintampo to Bole will be extended in 1907 from Bole to Wa.

---

* Colonial Report—Annual, No. 523.

6. The undermentioned big game animals were killed during the year in the localities named. £27 was received from licences; no fines were inflicted.

Locality.	pecies.	Remarks.
Kintampo	Hippopotamus (2)	Nil.
Navarro	Elephant (male) (1) ...	Nil.

7. An interesting experiment was made in the Southern Dagomba District on the death of the Chief of Savelugu. Seven applicants presented themselves for the vacant office, and the claims of none appeared to be paramount. Some eighty subordinate chiefs who presented themselves were too much afraid of the seven to express openly their wishes in the matter. The Chief Commissioner thereupon explained to them the operation of the secret ballot, and his proposal to adopt it was received with acclamation. In the end the most capable chief secured a large majority, and is reported to have fully justified his election.

8. The Annual Report on the Northern Territories,* written by the Chief Commissioner, should be referred to for detailed information with regard to this Protectorate.

Railways.

Capital and Loan Accounts.

1. The total capital expenditure on the railway up to the 31st December, 1906, was £1,817,583; these figures are subject to a final adjustment by the Treasury.

The extraordinary expenditure incurred during the past year amounted to £28,082. Of this sum £17,353 was spent in the purchase of rolling stock and coal skips; £10,160 was expended on the reconstruction of No. 2 Jetty, and £568 in purchasing motor trollies.

The loan for the construction of the railway was raised at 3 per cent., and its extinction is provided for by a Sinking Fund of 1 per cent., chargeable to the general revenue of the Colony. On the 31st of December the amount standing to the credit of the Sinking Fund was £18,699.

The loans issued up to the present, together with the advances by the Crown Agents pending the raising of the new loan, and the amount contributed by the surplus funds of the Colony, have already been specified under head I. (Financial) of this report.

Revenue.

2. The total revenue from all sources during the year under review was £171,231, as compared with £132,751 in the previous year. £26,231 was realised in excess of the estimated

* Colonial Report—Annual, No. 530.

revenue, or an increase of £38,480 as compared with the year 1905. This increase was derived entirely from the goods traffic. The earnings in respect of coaching traffic were £1,354 less than in 1905, a decrease which is attributable to the reduction in first and second-class fares and the issue of market tickets.

3. The appended statement shows the receipts under the various heads for the past three years. The railway was taken over from the Construction Department on the 1st July, 1903:—

Particulars.	1904.	1905.	1906.
	£	£	£
Coaching	31,475	29,484	28,130
Goods	113,394	100 572	135,915
Sundries	3,227	2,695	3,186
	148,096	132,751	171,231

The particulars of the goods traffic booked at stations as compared with the previous year are shown in Tables XIX. and XX.

The net revenue earned, namely £93,975, is equal to 5·14 per cent. upon capital expenditure.

Expenditure.

4. The total recurrent expenditure was £77,256, as against £82,477 in the previous year. The expenditure provided for in the estimates was £80,703.

The percentage of recurrent expenditure to revenue was 45·12. Adding the extraordinary expenditure on capital improvements (£28,082) the grand total of the expenditure during the year was £105,338, being approximately 61·51 per cent. of the revenue earned.

5. The recurrent and extraordinary expenditure, as compared with the previous year, were as follows:—

Head.	1905.	1906.	Increase.	Decrease.
	£	£	£	£
Maintenance of Way, Works, and Stations.	32,888	27,969	—	4,919

Number of miles open	168
Number of passengers carried	89,282
Gross tonnage, goods and minerals ...	47,388

ACCIDENTS.

8. The number of accidents which occurred during the year under review was 209, as compared with 282 in the year 1905. The number of derailments was 41, as against 54 in 1905, and the number of accidents due to fallen trees, 95, as against 146. No accident occurred to a passenger during the year. Out of

41 cases of derailments only 6 occurred in running, of which 3 were traced to defects in the permanent way. The remainder of the accidents were attributable to various causes incidental to ordinary shunting work.

RATES.

9. The following reductions were made in the goods tariff during the year:—

Bricks (native).—From 5th class to £8 per truck load any distance.

Cement and imported timber.—From 3rd class to 4th class.

Coal and patent fuel.—From 8*s*. per ton, up to 50 miles, and 1*d*. per ton per mile beyond; to 1½*d*. per ton, up to 40 miles, and 1*d*. per ton per mile beyond, with terminal charges of 2*s*. per ton (including rebates on a sliding scale of quantities bearing from 5 per cent. to 27 per cent.) with free cranage and wharfage.

Explosives of all kinds.—From 1st to 2nd class.

Cyanide, cyanide plant, and mining machinery.—From 2nd to 3rd class.

Bricks (imported), fire clay, lime, rails, and permanent way materials.—From 3rd class to 4th class.

These reductions have been much appreciated by the mining companies and mercantile firms. Many concessions, principally affecting local products, have also been sanctioned.

GENERAL.

10. The financial year covered by this Report was one of prosperity to the Colony generally, and the railway contributed considerably, both directly and indirectly, to the total revenue realized.

ROADS.

1. The maintenance of the roads made by the Public Works Department has been fairly satisfactory. The total length completed is 200 miles made up as follows:—

Axim, Ancobra Road	3½	miles.
Cape Coast, Elmina Road	8	,,
Cape Coast, Anamaboe Road ...	9½	,,
Cape Coast, Denkera Road	14½	,,
Cape Coast, Prahsu Road	57½	,,
Tarkwa, Bonsa Road...	9	,,
Accra, Kyebi Road	59	,,
Accra, Aburi Road	25½	,,
Dodowa Junction, Dodowa Road ...	13½	,,
	200	,,

Minor Roads.

2. In addition to the roads constructed and maintained by the Public Works Department at an annual expenditure of about £4,000, some 1,700 miles of native paths and tracks are kept clear by the chiefs, under the operation of the "Roads

Ordinance, 1894," in return for a payment of 10*s*. per mile per quarter.

Immigration and Emigration.

1. No exact statistics are available with regard to the extent of immigration to the Gold Coast. It is estimated, however, that some 3,500 labourers enter the Colony yearly for employment in the mines, or as carriers, labourers for public and private works, and as scavengers.

2. The immigrants come chiefly from the Kru Coast (Liberia); Sierra Leone and Lagos.

3. Imported labourers are usually engaged for six or twelve months under the "Master and Servant Ordinance, 1893" under a contract duly executed before a District Commissioner. No servile restrictions are imposed on the labourers thus engaged.

4. There is little or no emigration.

Public Works.

1. The principal public works for which provision has been made by "The Loan Ordinance, 1906," are:—

(*a*) Equipment and completion of the Sekondi-Kumasi Railway.
(*b*) Accra Harbour Works.
(*c*) Accra Railway.
(*d*) Sekondi Harbour Works.

The Sekondi-Kumasi Railway has been equipped and completed, partly from funds advanced by the Crown Agents pending the issue of the Loan referred to above, and partly from advances made out of accumulated balances of Revenue over Expenditure.

The construction of the Accra Harbour Works was commenced in February, 1906, and good progress has been made in spite of the heavy surfs which hampered the works considerably during the rainy season. The breakwater will probably be finished during the year 1908, and the scheme completed in 1909.

A survey of the proposed route of the Accra Railway has resulted in a satisfactory location of the line as far as Mangoase, which will probably be the provisional terminus, 35 miles from Accra. The line is now being staked out and the progress made has been satisfactory It is proposed to invite tenders for its construction. Mangoase lies in the centre of the cocoa-growing districts, and the completion of the line will set free for agricultural work a large number of natives now employed in transporting produce by slow and cumbersome methods from the plantations to Accra and Akuse.

The Sekondi Harbour Works will be commenced as soon as the new loan has been raised. In the interim an additional iron jetty is being constructed which should relieve considerably the congestion at this port.

2. In addition to the works sanctioned by the Loan Ordinance, schemes have been prepared for the following undertakings:—

(*a*) Accra Water Supply.
(*b*) Cape Coast Harbour Works.
(*c*) Sekondi Water Supply.

The original scheme for the supply of water for Accra from the Adjementa Valley has not been proceeded with, the drought of the past three years having given rise to some incertitude as to the sufficiency of the flow to maintain the necessary quantity of water in the reservoir. A second scheme under which the supply would be obtained from the Densu River has been prepared and will shortly be reported on by a representative of the consulting engineers who is about to visit the Colony. The cost of this undertaking will be defrayed from accumulated balances of revenue. A scheme has been completed for improving the landing facilities at Cape Coast at a cost of £23,000. It is proposed to provide for this work out of current revenue as soon as money is available.

Plans have been completed by which it is proposed to supply Sekondi with water from the Anankwan River, and the consulting engineers are preparing an estimate of the cost of the necessary works on the data afforded by the survey of the area of supply.

Public Works Department.

The Expenditure of this department in the year 1906 was as follows:—

	£	s.	d.
Personal Emoluments and Other Charges	13,900	17	5
Works Recurrent	14,940	5	4
Works Extraordinary	38,786	1	8
Total ...	£67,627	4	5

The principal buildings completed or under construction during the year were:—

Tarkwa.

Tarkwa.—Quarters for 12 subordinate officials were completed at a cost of £1,370, and police barracks for 12 constables and 1 native superintendent at a cost of £1,538.

Sekondi.

Sekondi.—The large prison which was commenced in 1905 has been nearly completed. £15,925 had been expended up to the 31st of December. Progress has been slower than was anticipated.

£1,435 was spent in completing the investigation of the source of the proposed water supply.

The additions to the European hospital have been carried out at a cost of £1,512.

The offices for the Public Works Department were completed.

£746 were expended on drains, roads, &c., and the general improvement of the town.

Police barracks for 30 constables and quarters for a European officer were commenced and nearly finished at a cost of £3,007.

Quarters for two European officers were completed.

Cape Coast.

Cape Coast.—Improvements to roads and drains were carried out at a cost of £2,447.

A new native hospital ward was completed.

The police barracks for 50 constables and 1 native superintendent, commenced at the end of the year 1905, were practically completed on the 31st of December for £1,627.

Accra.

Accra.—Further investigations at the source of the proposed water supply for the town were made at a cost of £527.

Good progress was made with the new lunatic asylum on which £4,512 was expended out of a total estimated cost of £6,760.

The Government girls' school was completed at a cost of £1,210.

Two quarters for European officials, built in the year 1875, were reconstructed for £1,276.

Kumasi.

Kumasi.—Quarters for 4 European officers were completed at a cost of £2,736, and the prison accommodation improved by the expenditure of £607.

Roads.

Roads.—£384 was spent in completing the Saltpond-Insuaim Road, and £801 in improving roads in the neighbourhood of Tarkwa.

MINES SURVEYS.

1. In the year under review the staff consisted of the Director and Assistant Director of Surveys; six surveyors, five assistant surveyors, one computer and two draughtsmen.

2. The most important work executed was a survey of the Volta River by Captain C. B. O. Symons, R.E., which joined the previous surveys of the northern portion of Ashanti and the Northern Territories to that of the Colony proper.

3. Other important works undertaken and completed were the delimitation of the boundaries of the Colony and Ashanti between the Prah and Volta Rivers; fixing the boundaries of districts in the Colony; and the survey of the Anankwan River in connection with the scheme for the water-supply of Sekondi.

4. Good progress was made with the work of producing the new map and two of the sheets, Sekondi and Obuassi, of the new map (scale $\frac{1}{125000}$) are now on sale. It is hoped that by the end of the year 1907 eight or ten sheets will have been produced. The publishers are Messrs. W. & A. K. Johnston, Edinburgh.

Changes in the Establishment.

1. At the commencement of the year 1906, the Governor, Sir J. P. Rodger, K.C.M.G., was absent in the Northern Territories on a tour of inspection; during his absence Major H. Bryan, Colonial Secretary, was appointed Deputy Governor.

His Excellency returned to the Colony on the 16th of March; proceeded on sick leave on the 2nd of April, and resumed duty on the 2nd of September. In the interval Major H. Bryan, C.M.G., Colonial Secretary, administered the Government.

2. Mr. A. E. P. Graves, general manager of the railway, retired from the service of the Colony on the 1st of June, and was succeeded by Mr. W. E. Smith, General Manager of the Trinidad Government Railway.

3. Lieutenant-Colonel E. C. Tidswell, D.S.O., the Lancashire Fusiliers, on the completion of his tour of service under the Colonial Office, rejoined his British regiment on the 29th of December, 1905, and was succeeded in the command of the 1st Battalion Gold Coast Regiment by Brevet-Colonel C. H. P. Carter. C.M.G., Royal Scots.

Transport (Labour).

1. The Transport Department dealt with 16,996 loads during the year under review, and the transport officer reports that none were lost.

The total number of carriers supplied by the department was 6,351.

2. As a means of supplying contract labourers for the mines the department appears to have fulfilled its purpose, and a further reduction has in consequence been effected in its establishment.

3. The rates of pay for contract and other carriers have undergone no alteration since the issue of the last Annual Report from which the appended extract is given for convenience of reference:—

"The following are the contract rates of pay for carriers:—

"Headman.—30*s.* a month with 6*d.* a day subsistence allowance. In special cases, *i.e.*, for extra qualifications as interpreter, etc., 37*s.* 6*d.* a month and 6*d.* a day subsistence allowance.

"Carriers.—25*s.* a month and 3*d.* a day subsistence allowance.

"The rates for carriers hired for short journeys are:—

"Up to ten days; 2*s.* 3*d.* pay and 3*d.* subsistence allowance, total 2*s.* 6*d.*, for the first day; and for subsequent days, 1*s.* pay and 3*d.* subsistence allowance.

For periods exceeding ten days the rate of 1*s.* a day pay and 3*d.* subsistence allowance.

"Headmen on these trips do not receive special pay as such unless the party exceed twenty in number when 6*d.* subsistence allowance may be given, the pay remaining the same.

"In Ashanti and the Northern Territories, however, local and lower rates prevail, when special arrangements are made with the chiefs to supply carriers."

4. The supply of labour for the mines, though adequate, was not so large as in the previous year. In order to tap an undeveloped source of supply an interesting experiment was made by bringing from the Northern Territories a contingent of labourers, selected from various tribes, in the hope that the prospect of regular work and wages would induce large numbers of their fellow tribesmen to seek employment in the mining districts. The party were brought from the Northern Territories under the supervision of a District Commissioner and shown over some of the properties at Tarkwa by the Secretary for Mines, subsequently they were taken by train to Sekondi and shown the sea and steamers in the port. The men are reported to have been much impressed by their novel experiences and it is hoped that the experiment will be attended by good results.

5. The harbour works in progress at Accra have given regular employment to a large number of men in the Eastern Province.

Suitability of Climate for Europeans, and Openings for White Labour.

1. Europeans of temperate habits and sound constitution who take suitable exercise, generally suffer little from climate causes, provided that their residence in this portion of West Africa is not unduly prolonged.

2. As has been stated in previous reports, Europeans should on no account come to the Gold Coast for the purpose of seeking employment. Government subordinate officials, employees of the mercantile firms and mining companies are engaged in England under agreement. Vacancies are therefore rarely filled locally.

Rates of Wages and Cost of Living.

1. Generally the rates of wages are high, but the cost of living has tended to increase during recent years. This is specially the case in the Western Province in which the principal gold-mines are situated. In Ashanti and the Northern Territories food is plentiful and cheap.

2. The wages of domestic servants vary from £1 to £2 10*s.*, and of cooks from £2 to £4 per month. Servants of the coolie class can be obtained at a wage of £1 to £1 10*s.* Carriers earn 1*s.* a day and are given 3*d.* a day to buy food. Contract

labourers and carriers are paid 25*s.* a month; these also receive 3*d.* a day subsistence money.

3. Native carpenters, cabinet-makers, masons, and smiths command ready employment and earn good wages at rates from 1*s.* 6*d.* to 3*s.* a day.

General Conditions.

1. The period under review, as I ventured to predict when writing my Annual Report for the year 1905, was one of considerable prosperity for the Colony. The sufficient rainfall produced good crops, and the figures of imports, exports, and revenue all show marked expansion.

2. The gold-mining industry continues to make steady and substantial, though not very rapid, progress. The monthly export returns show that over £1,000,000 should be won during the current year. The percentage of working expenses is gradually falling.

3. Like its predecessor, the year 1907 promises to be exceptionally prosperous. At the time of writing this Report the rainfall at Accra has already exceeded the total amount registered in the previous year, and news from the planting districts says that there also the rains have been abuntant.

4. The friendly relations of the Government with the native chiefs and people were, for the most part, well maintained.

H. Bryan,
Colonial Secretary.

4th June, 1907.

(For Report for 1906, *see* No. 534.)

THE GOVERNOR TO THE SECRETARY OF STATE.

Government House, Accra,
3rd July, 1908.

MY LORD,

I HAVE the honour to transmit, herewith, an able report on the Blue Book for 1907, prepared by the Acting Colonial Secretary.

I have, &c.,

JOHN RODGER,
Governor.

The Right Honourable
The Earl of Crewe,
&c., &c., &c.

1125 Wt 24282 9/08 D & S 5 33331 A 2

REPORT ON THE BLUE BOOK OF THE GOLD COAST COLONY FOR THE YEAR 1907.

I.—FINANCIAL.

(A.) Revenue and Expenditure.

The most interesting facts disclosed in the following general review of the financial position of the Colony at the end of the year are that in 1907 revenue surpassed the revenue of any previous year and exceeded expenditure by £91,594 1*s.*, and that expenditure included:—

(*a*) £15,000 repaid to the Imperial Exchequer;

(*b*) £10,980 contributed towards the Sinking Fund for the extinction of the Colony's Funded Debt.

Revenue.

1. The revenue for the year had been estimated at £676,470, but actually amounted to £708,718, an increase over the estimate of £32,248; and over the revenue of the previous year of £25,617.

2. The amounts collected under the several Heads of Revenue in the Colony, Ashanti, and the Northern Territories, are shown in the following statements:—

Heads of Revenue.	Actual Revenue to 31st December, 1907.			Revenue for same period of preceding year.			Increase.			Decrease.

Total ...	£37,248	18	4	Total ...	...£18,089	18	3

The principal items of increase are:—

	£
Customs	28,260
Revenue for Ashanti	4,920
,, Northern Territories ...	4,076

3. The increase in Customs Duties occurs mainly under *ad valorem* duties, the collections under this sub-head exceeding those of the previous year by £24,128. Specific duties only increased by £4,132; this is explained by the fact that large withdrawals from bond were made in December, 1906, in

anticipation of increased duties on spirits which came into operation on the 1st January, 1907.

The increase in revenue from Ashanti is mainly attributable to Royalties and Spirit Licences. The increase in Royalties is due to two causes—the payment in 1907 of amounts which should have been paid in 1906, and an increase in the output of gold by the Ashanti Goldfields Corporation and the Sansu Mine. There was a large decrease (£7,309) in Ashanti revenue derived from Caravan Tolls owing to abolition of collecting stations on the Gold Coast frontier.

The increase in revenue from the Northern Territories is almost entirely in respect of Caravan Tolls.

4. The two decreases in revenue calling for remark are Fees of Court £6,070, and Railways £3,094.

Fees of Court.—The decrease occurs mainly under the sub-heads of Stamp Duties and Mines Surveys. The Mines Survey Department was reduced in 1907, as most of the principal mining properties had by then been surveyed, and less work was accordingly undertaken than in the previous year. The decrease in Stamp Duties is due to a falling off in the number of civil cases brought before the Courts.

Railway.—The decrease in railway revenue is principally due to the reduction of certain rates, including those on spirits and mining machinery.

Expenditure.

5. The estimated expenditure for the year was £792,040, the actual expenditure £617,124, or £11,781 less than the expenditure for 1906.

The savings on the estimates are mainly under the heads of (i) Charge on account of Public Debt £53,347, and (ii) Repayment of Loans £105,000, and are due to the proposed Loan for Railway and other Public Works not having been raised during the year, as was contemplated when the Estimates were prepared. Also provision was made under (ii) for a repayment of £100,000 of the Colony's debt to the Imperial Exchequer, from Surplus Balances. These balances, however, have been temporarily advanced on Loan Works, and will not be available for general expenditure until the new Loan is raised.

There was also a saving of £9,117 under the head of Railways, due to economies effected in working expenses.

6. The principal excesses of actual over estimated expenditure were under the heads of (*a*) "West African Frontier Force, 2nd Battalion," £3,433; (*b*) "Miscellaneous Services," £2,931; and (*c*) "Pensions and Gratuities, £1,467;

(*a*) is due to the introduction in 1906 of the Imprest System, which resulted in the expenditure under this head for

November and December of that year appearing in the accounts for 1907, no provision having been made in the Estimates to meet it.

(*b*) is mainly due to a sum of £2,147, the cost of the Railway Reconnaissance Survey in 1898 from Accra to Kpong, having been adjusted and charged under this head during the year under review.

7. The following tables show the expenditure in detail, compared with 1906:—

Total ...	£82,302	13	1	Total	£54,064	9	2

9. As stated in paragraph 5 the total expenditure for the year was £11,781 less than that for the previous year.

10. As compared with 1906 the principal decreases in expenditure were:—

(i) "West African Frontier Force, 2nd Battalion," £20,756 4*s.* 6*d.*—Due to the disbandment of the Battalion at the end of 1906, to make way for a Force of Constabulary, which has been maintained at less than half the cost.

(ii) "Mines Surveys," £8,855.—Due to the reduction of the Survey Staff and consequent amount of work undertaken.

(iii) "Repayment of Loans," £11,598.—Due to only three instalments of £5,000, each having been repaid to the Imperial Exchequer, on account of the Colony's debt, as against four in 1906, and to an adjustment of the accounts between the Colony and the Imperial Exchequer, made in 1906, which increased the expenditure of that year by £6,598.

(iv) "Public Works Extraordinary," £17,304.

11. The principal increases were:—

(i) "Northern Territories," £10,700.—Mainly due to the reorganization and increase of the Administrative Staff of the Northern Territories.

(ii) "Transport," £6,477.—This increase is mainly due to increased expenditure under the items of "Railway Fares" and "Freight on Stores by Railway," such increased expenditure being more apparent than real. From the 1st January, 1907, an arangement came into force under which £6,000 is

paid annually to the railway for the carriage of Government passengers and goods. The whole sum was provided under "transport," whereas the expenditure has, in previous years, been sub-divided and charged under other heads.

(iii) "Post and Telegraphs Extraordinary," £4,406.—Due to expenditure on the extension of the telegraph system in the Northern Territories.

(iv) "Railways," £3,140.—Railway expenditure in 1907 includes £15,212 on account of capital improvements as against £10,727 expended in 1906.

(v) "Constabulary, Northern Territories," £9,163.—This force was only established in 1907.

The following is a comparative statement of the total revenue and expenditure for the past five years :—

Revenue.						Expenditure.					
Year.	Amount.				Remarks.	Year.	Amount.				Remarks.
	£	s.	d.				£	s.	d.		
1903	577,552	16	1		Includes £23,000 Grant-in-aid of Northern Territories.	1903	593,956	7	9		Includes £14,624 8*s.* 5*d.* expended on account of Ashanti disturbances.
1904	682,193	0	0		Includes £31,800 4*s.* 4*d.* Grant-in-aid of Northern Territories.	1904	622,376	11	5		Includes £5,612 0*s.* 7*d.* expended on account of Ashanti disturbances.
1905	586,221	8	1		Includes £13,759 6*s.* 6*d.* Grant-in-aid.	1905	616,118	11	2		Includes £4,106 15*s.* 2*d.* on account of Ashanti disturbances; and £20,000 repayment of loans.
1906	683,101	16	3		Includes £10,000 Grant-in-aid.	1906	628,906	3	0		Includes £224 7*s.* 11*d.* on account of Ashanti disturbances; and £26,598 18*s.* 11*d.* repayment of loans.
1907	708,718	9	6		Includes £5,000 Grant-in-aid.	1907	617,124	8	6		Includes £25,980 on account of repayment of loans.

(B.) Taxation.

The only forms of direct taxation in the Colony proper are the taxes on vehicles and the house rate levied under the Town Councils Ordinance. In the towns of Accra, Cape Coast, and Sekondi these items form part of the revenue of their respective municipalities.

In Ashanti and the Northern Territories taxes on caravans are collected at certain places situated on the main roads, where a European officer is permanently or temporarily stationed. As before stated, the collection of these tolls has been abolished on roads leading from Ashanti into the Gold Coast Colony.

The rates are as follows:—

Ashanti.

	s.	d.
For each horse	5	0
For each head of cattle, except calves	4	0
For each calf over three months of age	2	0
For each sheep or goat	0	6
For each lamb or kid over three months of age ...	0	3
For each donkey-load of spirits	10	0
For each donkey-load of kola or rubber	6	0
For each donkey-load of goods, excepting farm produce	4	0
For each carrier-load of spirits	5	0
For each carrier-load of kola or rubber	3	0
For each carrier-load of goods, excepting farm produce	2	0

Northern Territories.

	s.	d.
For each horse	5	0
For each head of cattle, except calves	4	0
For each calf over three months of age	2	0
For each sheep or goat	0	6
For each lamb or kid over three months of age ...	0	3
For each donkey-load of kola or rubber	6	0
For each donkey-load of goods, excepting farm produce	4	0
For each carrier-load of kola or rubber	3	0
For each carrier-load of goods, excepting farm produce	2	0

(C.) Assets and Liabilities.

The following is a detailed statement of the Assets and Liabilities of the Colony on the 31st December, 1907:—

1907.	ASSETS.	£	s.	d.	£	s.	d.

Sundry items shown in above detailed statement	56,586	8	1			
Drafts and Remittances	755	5	6			
				57,341	13	7
Surplus				£477,871	16	4

(D.) Public Debt.

On 31st December, 1907, the Public Debt of the Colony amounted to £2,206,964 16*s.* 7*d.*, as against £2,252,743 9*s.* 2*d.* on 31st December, 1906. The reduction of £45,778 12*s.* 7*d.* is accounted for as follows:—

	£	s.	d.
Repayment on account of the debt to the Imperial Exchequer	15,000	0	0
Reduction of Crown Agents' Advances on account of Loan Works	65,158	18	5
	£80,158	18	5
During the year the claim of the Northern Nigeria Government for ordinary expenditure on troops lent was accepted and was added to the public debt. The amount is... ...	34,380	5	10
The net reduction during the year was therefore	£45,778	12	7

The funded portion of the debt amounted to £1,098,000 5*s.* 9*d.*, and the amount standing to the credit of the Sinking Fund for the extinction of the debt was £30,722 14*s.* 3*d.*

The following statement shows in detail the particulars of the Public Debt:—

	£	s.	d.	£	s.	d.
1. Imperial Exchequer—						
i. Ashanti Expedition, 1896 (due to the War Department)	98,798	3	6			
ii. West India Regiment, 1897–8 (due to the War Department)	10,051	15	2			
iii. Telegraph lines to the Northern Territories 1897–8 (due to Imperial Government)	29,441	10	8			
iv. Ashanti War, 1900 ...	469,425	5	11			
	607,716	15	3			
Less repayments	61,598	18	11			
	546,117	16	4			
v. Government of Northern Nigeria (for ordinary expenditure on troops lent during the Ashanti disturbances, 1900) ...	34,380	5	10			
				580,198	2	2
2. Railway Purposes and Harbour Works—						
i. 3 per cent. Inscribed Stock issued in March, 1902	1,035,000	0	0			
ii. 3 per cent. Inscribed Stock issued against authorised loan of £665,000	63,000	5	9			
iii. Advanced by C.A. pending issue of authorised G.C. loans	528,466	8	8			
				1,626,466	14	5
				£2,206,964	16	7

(E.) Currency.

Legal Tender.

1. The currency and legal tender is British sterling with the addition of the undermentioned French, Spanish, and

American gold coins, the values of which are fixed by the Demonetisation Ordinance No. 2 of 1880:—

—	Nominal Value.	Legal Value.
		£ s. d.
French—		
Napoleon	20 francs.	0 15 10
Spanish—		
Doubloon	16 dollars.	3 4 0
Half Doubloon	8 „	1 12 0
American—		
Double Eagle	20 dollars.	4 2 0
Eagle	10 „	2 1 0
Half Eagle...	5 „	1 0 6
Quarter Eagle	2 „ 50 c.	0 10 3

2. British silver coins are legal tender to an unlimited amount; British bronze coins are legal tender up to an amount not exceeding one shilling. There is a small circulation of the United States half-dollar, but the coin is not legal tender, and is not accepted by the Government; its current value is two shillings.

The use of bronze coinage has increased to a marked degree in the more civilised parts of the Colony and Ashanti. In the Accra markets copper coins have almost entirely superseded cowries, and in the larger Coast towns and in Coomassie and Obuasi they are now extensively circulated. In proof of this statement, it may be pointed out that whereas the importation of bronze in 1903 was only £25, in the year under review it exceeded £1,100. The objection to gold, which at one time was hardly ever in circulation amongst the natives, seems to have entirely disappeared.

3. The following statement shows the amount of gold, silver, and bronze coinage imported during the past two years:—

Year.	Gold.	Silver.	Bronze	Total.
	£ s. d.	£ s. d.	£ s. d.	£ s. d.
1906 ...	6,604 0 0	419,474 10 9	920 0 0	426,998 10 9
1907 ...	29,256 0 0	406,636 4 0	1,100 0 2	436,992 4 2

Banks.

4. The Bank of British West Africa, Limited, is the only commercial bank established in the Colony and its Dependencies, and has branches at Accra, Cape Coast, Sekondi, Axim, and Coomassie.

(F.) Municipal Bodies.

Municipalities have been established in the towns of Accra, Cape Coast, and Sekondi, under the provisions of the Town Councils Ordinance of 1894. These bodies consist of eight members, of whom four are official, nominated by the Government, and four representatives elected by the ratepayers. In the absence of any election, by failure of the voters to nominate, the Governor has power to name four members to represent the ratepayers. The unofficial members of the Town Councils have, with the exception of the Council at Cape Coast, all been elected, and both at Accra and Sekondi the elections were contested.

The following statement shows the revenue and expenditure of the Town Councils for the past five years:—

—	Revenue.					Expenditure.				
	1903.	1904.	1905.	1906.	1907.	1903.	1904.	1905.	1906.	1907.
	£	£	£	£	£	£	£	£	£	£
Accra	4,617	5,339	5,151	5,075	5,589	4,164	5,751	4,852	4,819	4,647

Cape Coast†	—	—	—	2,060	2,284	—	—	—	1,207	2,627

* Not established till 1905. † Not established till 1906.

There is no municipal debt.

II.—TRADE, AGRICULTURE, AND INDUSTRIES.

(A.) Imports and Exports.

1. In the year under review the value of the total trade of the Colony was £5,007,869, and exceeded by £952,518 that for the previous year; this result, satisfactory in itself, affords even greater cause of congratulation when it is borne in mind that the figures for 1906 were the highest on record and exceeded those of 1905 by upwards of £920,000, and that these large increases are the consequence of legitimate expansion and development of trade, and in no way due to adventitious circumstances.

The following table gives the values of imports (exclusive of expenses on specie), exports, and total trade for the past five years:—

Year.	Imports.	Exports.	Total Trade.
	£	£	£
1903	2,082,544	980,942	3,063,486
1904	2,001,857	1,340,026	3,341,883
1905	1,486,068	1,646,145	3,132,213
1906	2,058,939	1,996,412	4,055,351
1907	2,366,195	2,641,674	5,007,869

Imports.

2. As will be seen from the above table the value of imports in 1907 exceeded that for the previous year by £307,256.

	£
The value of imports paying specific duties was	413,158
The value of imports paying *ad valorem* duties was	1,118,246
The value of imports free of duty was	834,791
	£2,366,195

These values include freight, insurance, and other charges.

3. The following table shows the value in sterling of imports and their countries of origin for the past two years:—

Country of Origin.	1906.			1907.		
	£	s.	d.	£	s.	d.
United Kingdom	1,590,460	18	5	1,758,315	5	9

Specie	..	—	426,999	—	436,992	9,993	—
Other Articles	..	—	273,046	—	309,826	36,780	—
Total		—	*2,058,939	—	*2,366,195	356,794	49,538
			Total Decrease ..			49,538	
			Net Increase			307,256	

* Exclusive of expenses on Specie.

The chief items showing an increase are:—

	£
Cotton goods	154,777
Silk goods	23,076
Wearing apparel	21,366
Coopers' stores	11,577
Beads	6,141
Cotton yarn and twist	5,460
Furniture	4,110
Hardware	10,212
Specie	9,993
Lumber	11,298
Perfumery	8,831
Kerosine oil	9,162
Gin	9,293

Though the returns show an increase in the value of cotton goods, due to the importation of better and more expensive qualities, there is a growing demand in the hinterland for cheaper German cotton goods, especially those printed with the pattern on both sides by the double block system. There is reason to believe that the sale of materials of similar quality and price, as well as of certain classes of beads and brass rods, at present procurable only at Lome, would be welcomed at Coomassie.

The increase in the value of coopers' stores imported is attributable to large importation by shippers to be utilized in making barrels or cases for the export of rubber and other produce of the Colony.

Exports.

5. The total value of exports in 1907 was £2,641,674, an increase over the previous year of £645,262. The following table shows the quantities and values of the principal articles of export compared with those of 1906:—

—	1906.		1907.		Increase.	Decrease.
	Quantity.	Value.	Quantity.	Value.		
		£		£		
Cocoa .. .. .. lbs.	20,104,504	336,269	20,956,400	515,089	178,820	—

Total	—	1,996,412	—	2,641,674	652,485	7,223
		Decrease			7,223	
		Net Increase..			645,262	

6. Following the method adopted in previous reports the value of the exports of gold and specie will here he deducted from the total value of exports for the purpose of showing the

value of the principal agricultural and economic products. The comparative return below shows a marked increase chiefly due to good seasons in the agricultural districts:—

1906.	Amount.	1907.	Amount.
	£		£
Total Exports ...	1,996,412	Total Exports ...	2,641,674
£		£	
Gold ... 858,842		Gold ... 1,164,676	
Specie ... 88,358		Specie ... 127,645	
	947,200		1,292,321
Total other Exports...	£1,049,212	Total other Exports...	£1,349,353

7. The increase in the exportation of cocoa is satisfactory, and this increase may be accounted for partly by good seasons, and partly by extended and improved cultivation.

The large increase in the value of timber exported is attributable to various causes. Prices were better, railway facilities at Sekondi have been improved, and the frequent flooding of the Ancobra River during the year enabled timber which had for some time past been accumulating in dry creeks to be floated down to the coast.

The value of gum copal exported was more than double the value of exports in 1906, due to the better prices obtaining and the greater attention paid by merchants and natives to this produce.

There were decreases in the value of palm oil—£5,540— and rubber—£1,385; partly due to the falling off of prices in the European markets and partly to the greater attention being paid to cocoa.

The export of cotton also decreased from 92,886 lbs., with a value of £1,022, to 56,088 lbs., with a value of £966. This is not due to any abandonment of cultivation, but to the fact that exportation by way of the Volta River of cotton grown in Togoland ceased with the completion of the Lome-Palime Railway.

The principal ports in the Colony are—

—	Value of Imports, 1907.	Value of Exports, 1907.	Total Trade.
	£	£	£
Sekondi	930,810	1,517,238	2,448,048
Accra	549,689	417,801	967,490
Ada	192,536	226,450	418,986
Axim	208,546	130,705	339,251
Cape Coast	162,400	98,360	260,760

Sekondi owes its position as the most important port to the fact that it is the terminus of the Sekondi-Kumasi Railway, which connects the coast both with the mining districts and with Ashanti. Accra, the second in importance, is the head-quarters of Government and the principal port of shipment for cocoa.

(B.) Mines, Manufactures, and Fisheries.

1. The sum total of the year's mining output, which is the highest on record, is 273,898 ozs. of fine gold, estimated to be worth £1,163,517. This is about four times the value of the output in 1903, and shows an increase of £271,226 over that of 1906.

2. To this total, Prestea Block A, Limited, a quartz concession, situated about 20 miles from Tarkwa, is the principal contributor with 46,869 ozs., of the value of £199,101, crushed from 78,164 tons of ore, very nearly five times the amount of the value of the year's result in 1906. This is due to continuous running of a 50-stamp battery started in September, 1906. A branch line of railway from Tarkwa to this property is now in course of construction.

3. Next comes the Ashanti Goldfields Corporation, Limited, also a quartz property, situated at Obuasi in Ashanti. This Company won 45,599 ozs., of the value of £193,705, an increase of £37,036 over the previous year. The extraction was greatly improved by roasting the ore before treatment. In the mill 53,158 tons were crushed, and the sands cyanided, with a recovery of 30,052 ozs., while 10,533 tons were treated by roasting and direct cyanide with the result that 15,190 ozs. were obtained. This Company paid two dividends of 10 per cent. during the year.

4. Abbontiakoon Block 1, Limited, who hold a conglomerate property adjoining the Tarkwa concession, showed 72,201 tons crushed for 28,864 ozs., of the value of £122,618, a decrease since 1906 of £11,013. This Company converted their dry crushing plant, the results of which were not satisfactory, into a wet crushing plant during the year.

5. Abosso Gold Mining Company, Limited, whose conglomerate property is situated at Abosso, the next railway station beyond Tarkwa, treated by means of a 30-stamp battery and cyanide works 39,435 tons of ore and 11,055 tons of old tailings, with a recovery of 27,607 ozs., of an estimated value of £117,275, a decrease of £19,501. This Company paid a dividend of 10 per cent. during the year.

6. The Wassaw (Gold Coast) Mining Company, Limited, the only other Company to win over £100,000, holds a concession at Adja Bippo, the next station beyond Abosso, where during the year a 30-stamp battery and cyanide plant have been at work with the result that, from 50,210 tons of reef sent to the mill, 25,331 ozs. were obtained, of the value of £107,607, an increase of £66,018.

7. Of the other mines, the most interesting is perhaps that of the Taquah and Abosso Gold Mining Company (1900), Limited, at Tarkwa. The title to this property dates back nearly thirty years, when it was acquired by a M. Bonnat, a Frenchman, who was the first to discover the richness of the Tarkwa Main Reef. Near the old workings a 50-stamp battery of 1,280 lbs. stamp started crushing in August last, but for various reasons a full month's results have not yet been obtained. The plant is worked by a suction gas producer, which effects a considerable economy in fuel. The total of the year's operations shows 21,843 tons crushed for 17,257 ozs., of the value of £73,309, an extraction of 15·8 dwt. per ton.

8. On the quartz property of the Broomassie Mines, Limited, situated near Prestea, 17,981 ozs. were got from 15,618 tons treated, giving a value of £76,386, an increase of £19,795.

9. Akrokerri (Ashanti) Mines, Limited, who hold a property on the railway, show a decrease on the year's working of £37,082, and Bibiani Goldfields, Limited, whose mine is situated in the outlying district of Sefwhi, a decrease of £25,815. On the other hand the Attasi Mines (1905) and Railway, Limited, whose concession is in Denkera show an increase of £18,732, and the Sansu Mines, Limited, who are situated within the area of 100 square miles, leased by the Ashanti Goldfields Corporation, Limited, an increase of £15,589. All these four properties are quartz concessions.

10. The dredging Companies working in the Ankobra River, which was fuller than usual, were not so successful as in 1906, but the two Companies on the Offin River were more fortunate. The Offin River Gold Estates, Limited, which had only two dredgers at work, showed the best results, with 508,100 cubic yards treated for 5,472 ozs., whilst the Ashanti Goldfields Auxiliary, Limited, with four dredgers, treated 959,157 cubic yards, with a recovery of 4,326 ozs.

11. The experiment of introducing labour for the mines from the Northern Territories has proved successful, and 280 were employed in the Tarkwa District. The average number of persons employed altogether in the mining industry was about 15,300, of whom some 540 were Europeans.

12. The general health of the mining community was good, and there has been a welcome absence of accidents on a large scale, though one European and 41 natives met with accidental death from various causes.

13. Nineteen certificates of validity were granted by the Supreme Court of the Gold Coast Colony, of which four were granted to concession holders for timber rights over their mining properties; whilst sixteen, of which a very large percentage was for dredging concessions, were issued by the Court of the Chief Commissioner of Ashanti.

14. No royalties were paid during the year under review in respect of the mining operations in the Colony during 1906,

but Ashanti receipts show a sum of £18,054 under this head. The profits for 1907 have not yet been assessed.

Manufactures.

The manufactures of the Colony are meagre and of small importance, and there seems no prospect of any change in the immediate future. The list of factories only comprises a cement, brick, and tile factory at Sekondi, and an ærated water factory at Cape Coast. The natives still make several things for their own requirements, such as cloths, baskets, pots, fishing nets, canoes, &c., but the economic value of these industries, which are the result of individual and not co-operative effort, is small, and the workmanship, as a general rule, crude.

Fisheries.

The fisheries of the Coast employ a number of natives and over 5,000 canoes, but no means exist of ascertaining the quantity or value of the takes. Many excellent fish are caught, and form one of the principal articles of food in the Coast towns; there is also a considerable industry in dried fish, large quantities of which are taken into the interior and bartered for country products. No fishing ever takes place on a Tuesday, however favourable the climatic conditions, the day being sacred to the fetish of the sea, and devoted to the overhauling and repairing of nets.

(C.) Agriculture.

General Observations.

Owing to delay in the submission of the departmental report, which has not yet come to hand, the material available for a report on the year's progress in agriculture is not as complete as could be wished. Speaking generally, the most important events of a year full of interest, and marked by increased attention to this all-important subject, were the industrial progress of Ashanti, the holding of a successful exhibition at Sekondi, and the appointment of a commission to inquire into matters connected with the collection and preparation of rubber. Attention was paid to practical instruction by the European Officers of the agricultural department, and a scheme formulated for the appointment of trained native instructors, whose duties are to travel through the Colony, Ashanti, and the Northern Territories to teach the native producer more scientific methods of cultivation and preparation.

Cocoa.

During the year under review the increased demand for cocoa in the home markets led to an abnormal advance in local

prices, and gave an undoubted impetus to the industry. It is, however, difficult to make the native realise that the price paid for his products is governed by laws of supply and demand, which are outside his control, and even more difficult to convince him that the quality of the product is also an important factor in determining its value.

It is impossible to form an accurate estimate of the quantity of land under the cultivation of this product, but it must extend over hundreds of square miles. This important industry began in a humble way about the year 1879, when a native trader brought some seed from Fernando Po and made a small plantation in Akwapim, which is now the main centre of the industry. At that time the attention of the native cultivator was directed to coffee, and it was not until the failure of that crop in 1898 that cocoa came into prominence. Its cultivation has been steadily fostered by Government, both by distribution of seed and by instruction in the methods of planting and preparation, with the result that in the year under review it heads the list of economic exports, with a total value of over £500,000. From its cradle in Akwapim it has overrun the forest belt of the Eastern Province, and has made rapid strides in Western Akim and other parts of the Central Province, as is shown by the growing exports from Winneba and Saltpond. In the Western Province the mining industry has hitherto diverted attention from agriculture, but since the establishment of the botanical station at Tarkwa in 1903 cocoa has been introduced into the Western Province with some success.

Rubber.

The fall in price in the home markets and competition of the cocoa trade somewhat interfered with rubber exports during the year. The chief sources of the rubber supply are the rich forest belts of Northern Ashanti, Sefwhi, and Akim; Ashanti rubber mostly finds its way by rail to Sekondi, the other principal ports of exportation being Axim, Cape Coast, and Saltpond. Most of the rubber exported is that known as "Lump" rubber, which is the product of the forest tree called Funtumia Elastica, and with a view to improving the local methods of collection and preparation of this as well as of other kinds of rubber, a Commission of Inquiry was appointed in the latter part of the year to report on the various processes in use, and to consider whether legislation could usefully be introduced. Their report, which has recently been submitted, does not advocate any immediate legislative action, but emphasises the importance of the practical instruction, of which mention has already been made. Rubber plantation has also been encouraged, and there is a yearly distribution of the best Para seeds, which have been grown with considerable success not only in the various Botanical Stations, but on private properties in Akim and the Western Province.

Cotton.

The British Cotton Growing Association continued during the year a series of interesting experiments in hybridisation at the farm at Labolabo, where the ginnery is giving satisfaction. The manager and his assistants have endeavoured to promote the cultivation of cotton by visiting chiefs in the vicinity of the River Volta and by distributing seed. In the Northern Territories, cotton is grown for local requirements, and recent reports favour the impression that at no distant date this product will form an important export from the Protectorate, where conditions are somewhat similar to those obtaining in Northern Nigeria.

Miscellaneous Products.

Kola.—The quantity and value of this product, which grows chiefly in the forests of Akim, has steadily increased during the last five years, and in 1907 surpassed all previous records. The export trade is almost entirely in the hands of the Muhammadans, who ship the nuts to Lagos for conveyance to the upper reaches of the Niger. An interesting experiment in kola plantation is being conducted by an English Company at Boonso in Akim.

Oil Palm Products, which were formerly the principal economic articles of export from the Colony, have had to yield place to cocoa, where the return is greater in proportion to the labour expended. Kernels, however, show a slight increase over 1906, both in quantity and value exported, but palm oil has slightly fallen off.

Forestry.

The question of introducing forestry legislation and of establishing a forestry department was under consideration during the year, and with a view to meeting the expenses of a preliminary investigation and report by an experienced forestry officer, a vote was inserted in the Estimates for 1908. Arrangements were concluded with the Government of Southern Nigeria, whereby the services of Mr. H. N. Thompson, Conservator of Forests, were placed at the disposal of the Government of the Gold Coast for this purpose, and at the time of writing his tour of inspection has just been completed.

Botanical Stations.

In the absence of the departmental report, comparative statistics cannot be given, but, speaking generally, the efficiency of the stations at Aburi, Tarkwa, and Coomassie has been maintained, much valuable instruction has been given by the curators and their assistants, and large quantities of economic seeds and plants have been distributed from each station.

A new Botanical Station for ..
opened at Asuanchi, about 15 miles from Cape Coast,
large quantity of land was cleared during the year, and planted with various products, chiefly cocoa and rubber. Seeds and plants were also distributed, and the establishment of the station, which will be connected with the principal trade roads, is expected to give a stimulus to agricultural development in a portion of the Colony which has hitherto been somewhat neglected in this respect.

Exhibitions.

A very successful Agricultural Show was held at Sekondi on the 29th and 30th November, 1907, the special feature of which was the fine quality of exhibits in all classes coming from Ashanti. Foreign exhibits, native industries, and timber were displayed in large marquees 100 by 60 feet, while the other structures were of bamboo with palm roofs, each section, as far as possible, having a separate building. Interesting exhibits were sent from the French Colonies of the Ivory Coast and Dahomey, and others from Senegal and French Guinea unfortunately arrived too late. Captain Von Doering represented the Government of the neighbouring German Protectorate of Togoland, who, however, did not send any official exhibits. Southern Nigeria sent some fine specimens of figured mahogany, native mats, and basket work, and a potter's wheel, in charge of a European potter, which excited great interest. Of the economic products exhibited, those of the oil palm and kola nuts were the best, but cocoa, native cotton, and rubber were, with a few exceptions, disappointing.

The industry of the Ashantis will be rewarded by the holding of the next show in Coomassie, and as several chiefs from the Northern Territories will be invited down for the occasion, it is to be hoped that agriculture will also receive a stimulus in that Dependency.

(D.) Lands

1. The Crown possesses no waste lands in the Colony, but certain lands have been acquired by the Government from time to time, mostly under the provisions of the Public Lands Ordinance, 1876, which legalises compulsory acquisition for the service of the Colony on payment of reasonable compensation.

2. The bulk of land in the Colony belongs to the tribal "stools," and theoretically there is no land without an owner. The ascertainment of the exact boundaries of tribal lands is, however, often a matter of considerable difficulty, as towns and villages have sprung up with large tracts of intervening unoccupied land, sometimes dense forest, which is gradually

om either end. Now that the ...and is appreciated, boundary disputes frequently ...me before the Supreme Court, and in certain parts of the Colony, especially in the mining district of Wassaw, the limits of the lands of adjoining tribal stools have been definitely prescribed.

3. The general principle laid down by judicial decisions is that all land within the recognised territory of a "stool" is the property of that stool. Thus, in the case of every headchief's division, where there are tribal and family stools in subordination to the headchief's stool, all lands within the recognised boundaries of the family or subordinate tribe are held to be attached to the family or tribal stool, but all other unoccupied lands are the property of the headchief's stool. An attempt was recently made in the courts to extend this principle so as to enable the headchief's stool to claim all cultivated land the original title to which, as is not uncommon in the case of lands under native tenure, is lost in obscurity; but, though no limit of prescription is laid down by native law the local Court of Appeal held that in the case of long occupation and when there has been cultivation of permanent crops, such as sugar cane and cocoa, as opposed to the usual shifting cultivation of yams, plantains, and similar food products, the presumption is that the occupation was with the consent of the headchief's stool.

4. Of recent years deeds have come into common use, especially in land transactions between natives and Europeans. Where these deeds relate to grants of rights of mining, felling timber, and collecting rubber and other products of the soil, they are called concessions, and their validity is inquired into by the Supreme Court, under the provisions of the Concessions Ordinance, 1900. The court inquires whether the grantors are the native owners of the land, whether the area falls within the prescribed limit of five square miles for a mining concession, and 20 square miles for other concessions, whether the prescribed term of 99 years is exceeded, whether the consideration is adequate, and whether the statutory rights reserved to the natives are included in the deed. A survey and demarcation of boundaries by the Mines Survey Department is ordered, and when this is completed a certificate of validity, giving the lessee an indefeasible title, subject to observance of his covenants, is issued by the court, in which are contained such modifications of the deed as the Court may impose to bring it within statutory requirements, and to render it a transaction fair and equitable to both parties. The rent from certified concessions is paid to the native grantors through the Government. Concessions granted solely for purposes of plantation of rubber and other products may be exempted from the operation of the Ordinance; whilst concessions to acquire mineral oil are held subject to the Government right of preemption of the oil under Ordinance No. 15 of 1907.

(E.) Shipping.

1. The following are comparative statements of the number and tonnage of vessels which entered and cleared at the ports of the Colony during the past five years:—

Sailing Vessels.

Year.	British.				Foreign.				Total.			
	Entered.		Cleared.		Entered.		Cleared.		Entered.		Cleared.

Mail and Steamship Services.

British Lines.

Mail steamers of the African Steamship Company and the British and African Steam Navigation Company, Limited, both of which are under the management of Messrs. Elder, Dempster and Company, leave Liverpool every Saturday for Axim, Sekondi, Cape Coast, and Accra, the scheduled time of the voyage to Accra being 15 days.

2. The same lines provide three services of cargo boats from Liverpool, viz., the Brass and Benin Service, which leaves every alternate Wednesday and calls at Axim, Sekondi, Cape Coast, Accra, and Ada; the Opobo and New Calabar Service, which leaves on the other alternate Wednesdays, and calls at all the same ports except Ada; and the Windward Service, which leaves Liverpool every third Thursday, and calls at all Gold Coast ports. These boats take from 32 to 34 days to Accra. These lines also run these services from Hamburg and one from London, which leaves every third Saturday.

3. Homewards, the mail service leaves Accra every Wednesday, and is due to arrive in Plymouth in 16 days. The cargo services also touch on the homeward voyage at the outward ports of call.

4. The present rates of fares by these lines are £28 12*s*. first class and £20 7*s*. for all ports as far as Winneba, and £29 14*s*. and £21 9*s*. respectively for Accra and ports to the eastward.

5. A new line of steamers called the Sun Line, which was inaugurated towards the end of 1906, plies at intervals between Newport (Mon.) and Sekondi carrying passengers and cargo. Outwards, they usually bring coal and freight for the mining companies, and homewards the usual cargo is timber. This line is under the management of Messrs. G. T. Symons and Company.

Foreign Lines.

6. The Woermann Line runs a mail steamer monthly from Hamburg, which is scheduled to leave Dover on the 11th of every month with passengers and mails for Axim, Sekondi, Cape Coast, and Accra, the duration of the voyage being about 15 days. These boats also call homewards at the same ports, leaving Accra on the 13th of every month for Southampton. The passenger fares are the same as the Elder, Dempster steamers.

7. Cargo services of the Woermann Line leave Hamburg for the Gold Coast on the 1st, 3rd, 15th, and 30th of the month.

8. Steamers belonging to the Compagnie Belge Maritime du Congo are scheduled to leave Antwerp every third Thursday, calling the following day at Southampton for mails and passengers for Axim, Sekondi, Cape Coast, and Accra, at which last named port they are due to arrive 13 days after leaving Southampton. They do not, however, call on the Coast on the homeward voyage.

III.—LEGISLATION.

Gold Coast Colony.

1. During the year under review twenty-one Ordinances were passed by the Legislative Council, of which several were of considerable importance.

2. The Firearms, Ammunition, and Gunpowder (Amendment) Ordinance, 1907 (No. 3 of 1907), introduces a yearly system of licences for arms of precision, in the place of the quinquennial licence formerly required.

3. The Foreign Judgments Extension Ordinance, 1907 (No. 4 of 1907), provides for the enforcement in the Colony of the judgments of the Superior Courts of other British possessions, and *vice versa*. The operation of the Ordinance is, however, at present restricted to a reciprocal arrangement with the other West African Colonies and Protectorates.

4. The Railway (Amendment) Ordinance, 1907 (No. 5 of 1907), vests in the General Manager, subject to the approval of the Governor in Council, the power of making regulations and imposing rates heretofore exercised by the Legislative Council, thereby simplifying the administrative machinery of the Government Railway; but none of the existing rates can be raised, except with the consent of the Governor and Legislative Council.

5. The Wild Animals Preservation (Amendment) Ordinance, 1907 (No. 10 of 1907), enables the Governor in Council to make better provision for the protection of local fauna, by means of regulations for the imposition of export duties on hides, skins, horns, and tusks, and for the confiscation of ivory weighing less than 25 lbs.

6. By Ordinance No. 12 of 1907 flogging is abolished in the Gold Coast Regiment of the West African Frontier Force in time of peace, except for offences committed on the line of march against the persons or property of the inhabitants of the country.

7. The Criminal Evidence Ordinance, 1907 (No. 13 of 1907), enables an accused person to give evidence on his own behalf, and makes the husband or wife of such a person a competent witness for the defence, in the same manner and to the same extent as is the practice in England under the Imperial Act 61 and 62 Vic. c. 36.

8. The Mineral Oil Preemption Ordinance, 1907 (No. 15 of 1907), secures to His Majesty's Government the right of preemption of mineral oil discovered in the Colony and the right to control the supply in time of war.

9. Shot drill, crank, and other unremunerative forms of prison labour are removed from the ordinary system of hard labour by the Prisons (Amendment) Ordinance (No. 16 of 1907), and are retained solely for punitive purposes.

10. The Motor Traffic Ordinance, 1907 (No. 17 of 1907), regulates the use of motor vehicles, which are now commonly employed in the Eastern Province in connexion with the shipment of cocoa from Accra. The Ordinance provides for the licensing and identification of vehicles, and the examination and certification of drivers, and makes general provisions for the safety of the public and the prevention of injury to roads.

11. Ordinance No. 18 of 1907 prohibits the manufacture of firearms, ammunition, or gunpowder in the Colony without a licence, and penalises the conversion of flint-lock guns into

cap guns, a recent form of evasion of the Brussels Convention, which is due to the ingenuity of the local blacksmith.

12. The Proprietary Railways Ordinance, 1907 (No. 19 of 1907), regulates the construction and working of private railways, for the commencement of which a licence from the Governor is now required.

13. The Timber Protection Ordinance, 1907 (No. 20 of 1907), forbids the cutting of certain specified trees of economic value below a certain girth, without the written permission of a District Commissioner.

14. The Muhammadan Marriage Ordinance, 1907 (No. 21 of 1907), establishes a system of registration of marriages and divorces performed according to Muhammadan rites.

ASHANTI.

15. Of the five Ashanti Ordinances enacted during the year, No. 1 enables the holder of a concession in Ashanti to pay duty on his income-tax assessment in the United Kingdom, instead of having his profits assessed locally. This privilege is similar to that conferred on concession holders in the Gold Coast Colony in the previous year.

16. Ordinance No. 3 provides for the creation of four provinces in Ashanti, capable of sub-division into districts, and makes the necessary consequential amendments in the previous law; whilst Ordinance No. 4 defines the jurisdiction of Provincial and District Commissioners, and other officers with subordinate judicial powers.

17. Ordinance No. 5 regulates the introduction, storage, and disposal of firearms, ammunition, and gunpowder in Ashanti. The written permission of the Chief Commissioner is requisite in every case to legalise the introduction of any arms, ammunition, or powder by private individuals or firms. Most of the other provisions of the Ordinance are similar to those in force in the Gold Coast Colony, and, amongst others, the holder of an arm of precision is similarly required to take out a yearly licence, and the conversion of flint-lock into cap guns is prohibited.

NORTHERN TERRITORIES.

18. The sole enactment for the Northern Territories was an amendment of the Fugitive Criminals Surrender Ordinance, 1906, making extraditable bribery and any other crime from time to time added by Act of Parliament to the list in the First Schedule to the Extradition Act, 1870.

IV.—EDUCATION.

(A.) Primary.

1. There are seven Government Primary Schools in the Colony, and 141 Primary Schools on the assisted list, which are conducted by the various Missionary Societies and are eligible for Grants in Aid on condition that the school has assembled at least 300 times during the year with an average daily attendance of not less than 20 pupils.

2. The following comparative table shows that the number of Government and Assisted Primary Schools maintained in the Colony during 1907 exceeds by two the number maintained during 1906:—

Denomination.	1906.	1907.	Increase or Decrease.
Baptist Mission	1	—	—1
Basel Mission	58	61	+3
Wesleyan Mission	52	48	—4
Roman Catholic Mission	14	18	+4
Bremen Mission	11	10	—1
Government	7	7	No change.
Mohammedan	1	1	No change.
African M.E. Zionist	2	1	—1
Church of England S.P.G.	—	2	+2
Totals	146	148	+2

132 of the 141 schools on the list for inspection succeeded in earning grants in aid.

3. The following table shows the total number of pupils on the rolls of primary and secondary schools under the Board of Education, the average attendance and the amount of grants earned during the years 1906 and 1907:—

Year.	Number on Roll.	Average Attendance.	Grants earned.
			£ s. d.
1906...	14,657	10,621	5,252 12 0
1907...	14,046	10,503	5,560 11 1
Increase or Decrease	– 611	– 118	+ 307 19 1

Though there has been a decrease in the total number of pupils on the roll, there has been a slight improvement in the percentage of the average attendance.

4. In addition to the schools on the assisted list there are in the Colony and Ashanti 218 primary schools belonging to the following denominations:—

Basel Mission	103
Wesleyan Mission	96
Roman Catholic	5
Bremen Mission	10
Baptist	1
Church of England	2
African M.E. Zionist	1

The number of pupils attending these schools in 1907 was 4,653, making, with the Government and Assisted Schools, a grand total of 18,699 pupils on the nominal rolls.

5. During the year there were two examinations of candidates for appointment to junior clerkships in the Government Service. In all 228 candidates presented themselves for examination and 113 gained certificates.

6. The total income of the Assisted Schools amounted to £10,929 18*s.* 3*d.*, a decrease of nearly £300, as compared with the income for 1906. The amount is chiefly made up of the following items:—

	£	*s.*	*d.*
Government Grants	5,560	11	1
Voluntary Contributions and Grants from the various Missions ...	4,530	7	11
School Fees	1,002	6	9

7. The average annual payment for pupils in the primary schools amounted to 2*s.* 3*d.*—the same as in 1906.

8. Reference was made in last year's report to the difficulty experienced by the Education Department on account of the lack of qualified teachers. It is hoped that this difficulty will be removed on the completion of the Training Institute for Teachers at Accra which is now in course of construction.

9. No endeavours are spared to teach the rising generation their privileges and duties as citizens of the British Empire, and, in conformity with the movement started by the League of the Empire, lectures, accompanied by magic lantern slides, are given in all districts of the Colony. On Victoria Day, the 24th May, celebrations were held by the majority of the schools in the Colony, lectures on the Empire and the late Queen were given by the head teachers, patriotic songs were sung, and the flag was saluted, whilst in many places the anniversary was commemorated by the planting of a tree.

(B.) Secondary.

10. There are only four schools in the Colony which profess to give a higher education than that obtainable at the Primary Schools, viz., the Accra "Grammar School," the Accra "Collegiate School," the "Mfantsipim School," Cape Coast,

and the Cape Coast Wesleyan "Collegiate Girls' School." The first named of these schools is the only one which has hitherto received any Government aid. The total nominal roll of the four schools is 352, with an average attendance of 292, the Accra Collegiate School, which was only opened in July, 1907, heading the list with a total of 210 on the roll, and an average attendance of 174.

(C.) Industrial, Technical, and Agricultural Schools.

11. Twenty-eight teachers and students completed two courses of agricultural instruction and 20 were successful in obtaining certificates. In addition 15 attended a first course and will complete the training in 1908. The number of teachers and students undergoing this branch of training shows a very satisfactory increase over that of the previous years.

12. The Director of Education reports that these courses of agricultural instruction are now more successful than heretofore, and that the results are plainly visible in those school gardens to which teachers with agricultural certificates have been appointed. Unfortunately a fairly large proportion of the teachers who obtain these certificates are employed in schools in the coast towns where there is but little scope for their agricultural training to be put to any practical use.

13. At present certain schools are giving industrial instruction, some with considerable success. In addition to schools mentioned in previous reports as giving instruction in carpentry, printing, bookbinding, net weaving, &c., carpenter shops have been established in the Wesleyan Schools at Tarkwa, Aburi, Accra, and in the Roman Catholic School at Axim; and fairly good work is being done. The building of the Government technical and industrial school at Accra, referred to in last year's report, was commenced during the year under review.

14. At the latter end of the year 1907 a Committee was appointed to inquire into the desirability of adding some form of hand and eye training to the compulsory subjects, which have to be taught before a school can be placed on the assisted list. Their report, which was published during the present year and is now under the consideration of the local Board of Education, strongly advocates this change in the near future, and the Board have adopted the principle of the report, whilst reserving further discussion on the detailed amendments suggested.

V.—GOVERNMENT INSTITUTIONS.

(A.) Hospitals.

There is a well-equipped hospital, with three European and four native wards, in Accra, there being seven beds for Europeans and 25 for native patients. A European nursing sister is attached to this hospital, at which 448 cases of various kinds were treated during the year. There is also a Contagious Diseases Hospital at headquarters. At Cape Coast the hospital is a spacious building, situated on Connor's Hill, overlooking the sea. The accommodation for Europeans consists of three first class wards containing in all six beds, and two second class wards containing together seven beds; that for natives, of four wards, with a total number of 19 beds, in addition to two wards for contagious diseases. The number of cases treated was 121.

Sekondi Hospital, situated on a hill near the town, contains three classes of accommodation for Europeans. There are in all six European wards, including two for convalescents, with a total of 16 beds. For native patients four wards are provided, holding 22 beds. Nursing sisters are also attached to this hospital, where 485 cases were treated.

Smaller hospitals also exist at Elmina, Kwitta, Axim, and Ada, and dispensaries at certain other out-stations.

In Ashanti, there is at Coomassie a commodious native hospital with three wards, a main ward containing 36 beds, a female ward with 4 beds, and another small ward with 4 beds. 661 cases were treated in this hospital, where the existing accommodation is adequate only as far as male patients are concerned, and will shortly be increased by the addition of a larger female ward, an operating theatre, and a consulting room. There is also a European hospital of four wards, each with two beds to which a nursing sister was attached in the latter part of the year.

In the Northern Territories, accommodation for the treatment of sick natives is being gradually provided, and with the development of the country, further improvements will be effected as requirements are recognised.

(B.) Lunatic Asylum.

There is only one lunatic asylum in the Colony, situated at Accra. During the year under review 29 male and 3 female inmates were admitted, as compared with 28 and 5 respectively in 1906, but the number of discharges, viz.: 14 males and 2 females, compares very favourably with the figures for 1906, when only 2 males and one female were discharged. The daily average of inmates was 64, of whom about three-fifths are classified as maniacal and dangerous.

2. The building occupied as an asylum in 1907 is now converted to other uses, and a new and more commodious structure has been erected on one of the best sites near Accra. This consists of two large airing yards, one for males, and the other for females, each of which is flanked by cells and dormitories, and contains a large open shed for shelter and recreation. There are also hospital accommodation, large tanks and the usual accessories, besides quarters for the staff, all of which have been built in concrete. The buildings generally are cool and well ventilated, and the dormitories, each of which contains separate latrine accommodation, are spacious and lofty. It will be interesting to note whether the improvement in the surroundings will produce any marked effect in the recovery of the patients.

(C.) Poor-Houses; and (D.) Reformatories.

As has been stated in previous reports, pauperism in the strict sense of the word is, thanks to the obligations entailed by the family system, unknown in the Colony. There are no poor houses nor reformatories.

(E.) Savings Bank.

The savings bank is now under the control of the Postmaster-General, and it is satisfactory to note that there is a steady annual increase.

2. During 1907 the total deposits amounted to £12,787, as compared with £8,961 in 1906. The total amount withdrawn was £10,618. On the 31st of December, 1907, the total amount at credit of depositors was £15,169.

3. The total number of accounts open at the 31st December was 1,279, as against 890 at the commencement of the year.

VI.—JUDICIAL STATISTICS.

(A.) Police.

(1). *Establishment.*

The police of the Colony comprise general police, escort police, mines police, and railway police, and their total strength, all ranks, on the 31st of December was 636, or 37 below the authorised establishment. On the corresponding date in the previous year the deficiency was 27. The authorised strength of the escort police was increased at the beginning of the year by 30 men of various ranks.

(2). *Recruiting.*

During the year 213 men were engaged and trained at Accra; nearly all these men are natives of the Colony or its dependencies. These figures show an increase of 29 on the previous year. The Commissioner of Police again reports that it is still difficult to persuade the better class of natives to join the force.

(3). *Detective Branch.*

The strength of this branch, all ranks, on the 31st of December was 17. The results have again been extremely satisfactory. The Superintendents have continued to carefully train their subordinates, and the intelligence displayed by the detectives has been higher than in former years.

(4). *General Remarks.*

All the police have performed their duties fairly satisfactorily during the year, and in view of an increase of the European staff provided for in 1908, it is to be hoped that the improvement [illegible] the efficiency and education of the force will be even bette[illegible] aintained in future.

(B.) Prisons.

1. The [illegible] mmon gaols of the Colony are situated in the old [illegible] at Accra, Cape Coast, and Elmina, and the new [illegible] at Sekondi, has been finished and occupied. This [illegible] structure containing 120 solitary cells, 4 [illegible] 4 condemned cells, and 2 European cells. [illegible] 10 beds is attached, besides accommodation [illegible] gaoler, matron, and staff of 13 warders and the [illegible] It was erected at a cost of £17,344, and is [illegible] building of its kind in the Colony. It is used solely [illegible] confinement of long-sentence prisoners. There are ten district common gaols in the Colony in which prisoners under sentence of six months or less are confined, at Axim, Tarkwa, Sekondi (Fort Orange), Saltpond, Winneba, Ada, Akuse, and Kwitta. In Ashanti, the prison at Coomassie has been greatly improved. The discipline and interior economy of all the gaols continues to show great improvement. The number of prisoners committed during the year was 5,055, being an increase of 209 over 1906.

2. The amount realized from the sale of goods manufactured in the prisons was £2,080 10*s.* 4*d.* as against £1,567 19*s.* 1*d.* in the previous year—the gross estimated value of prison labour being £6,856 5*s.* as against £7,688. The principal prison industries consist of carpentry, boot and shoemaking, masonry, tailoring, coopering, basket and matmaking; the quality of the work has been generally good and in Accra reached quite a high standard.

3. The total expenditure of the Department was £11,703 3*s.* as against £12,007 11*s.* 7*d.* in the previous year, a decrease of £304 8*s.* 7*d.*, and this notwithstanding the fact that the daily average of prisoners was 791 as compared with 763 in 1906.

(C.) Criminal Statistics.

The returns of crime in the Colony, Ashanti, and the Northern Territories show that 8,310, 2,047, and 402 cases respectively were dealt with as against 7,848, 2,155, and 325 respectively, an increase of 431 over the cases in the year 1906. The number of convictions obtained was 6,325, 1,771, and 387 respectively.

There has been practically no increase of crime of a serious nature. The increase has been principally of petty offences which have occurred generally in all the districts throughout the Colony, except those of the Volta River and Akwapim. In Ashanti and the Northern Territories the figures show a general decrease as compared with the preceding year, which points to an increasing respect for law and order, though in the mining districts of Ashanti, which naturally attract many undesirable characters, mostly from outside the Colony and its dependencies, there has been a rather larger number of criminal cases than in 1906.

In the Colony, where serious offences are tried by a judge with a jury or assessors, the number of convictions and acquittals in the Superior Courts in 1906 and 1907 was as follows:—

	1906.	1907.
Convictions for offences against the person	30	45
Convictions for offences against property (other than prædial larceny)	18	28
Convictions for other offences	69	41
Acquittals	47	77

In the inferior Courts, where the trial is summary, the comparative figures are:—

	1906.	1907.
Convictions for offences against the person	680	743
Convictions for slave dealing	19	16
Convictions for offences against property (other than prædial larceny)	841	975
Convictions for other offences	4,096	4,477
Acquittals	2,135	1,980

In Ashanti, where all trial is summary, the following are the returns:—

In the Superior Courts.

	1906.	1907.
Convictions for offences against the person	16	20
Convictions for offences against property (other than prædial larceny)	30	13
Convictions for other offences	32	8
Acquittals	48	10

In the Inferior Courts.

	1906.	1907.
Convictions for offences against the person	268	315
Convictions for slave dealing	3	1
Convictions for offences against property (other than prædial larceny)	264	226
Convictions for other offences	1,225	1,188
Acquittals	152	316

In the Northern Territories trial is also summary, and the figures are as follows:—

In the Superior Courts.

	1906.	1907.
Convictions for offences against the person	8	9
Convictions for slave dealing	—	4
Convictions for offences against property (other than prædial larceny)	23	29
Convictions for other offences	30	52
Acquittals	9	5

In the Inferior Courts.

Convictions for offences against the person	118	86
Convictions for slave dealing	27	6
Convictions for offences against property (other than prædial larceny)	66	69
Convictions for other offences	41	132
Acquittals	9	5

In taking the figures for Ashanti and the Northern Territories into consideration, it must be borne in mind that the increase of the administrative staff has greatly improved the facilities for bringing offenders to justice.

VII.—VITAL STATISTICS.

Population.

There is no compulsory registration of births and deaths in the Colony and its dependencies, and the census return in 1901, which estimated the total population of the Gold Coast Colony, Ashanti, and the Northern Territories at 1,696,695 (about 1,400 Europeans), is probably at least a million under the mark. The collection of statistics of this nature is viewed with great suspicion by the uneducated native population, and the information given is as a rule wholly unreliable.

PUBLIC HEALTH.

1. The health of Europeans shows a general improvement, and it is satisfactory to note that out of 370 officials there were only three deaths, two from blackwater fever, and one unconnected with climatic causes. The rate of sickness is, however, still high, especially towards the end of the rainy season, when mosquitoes are plentiful. Blackwater fever was, as usual, the most dangerous disease, having accounted in all for 9 deaths and 32 cases of invaliding, as against 6 deaths and 25 cases of invaliding caused by malaria.

2. The following tables show the statistics of mortality and invaliding of Europeans during 1906 and 1907:—

How employed.	Year.	No.	Deaths.	Invalided	Death rate per 1,000.	Invaliding rate per 1,000.
Officials	1907	370	3	20	8·10	54·05
	1906	399	6	39	·15	97
Mercantile Firms ...	1907	538	9	29	16·72	53·90
	1906	255	4	16	15	62
Mining Companies	1907	883	12	46	13·59	52·09
	1906	992	18	53	18	53
Missions	1907	86	1	—	11·62	—
	1906	119	3	3	25	25
Totals ...	1907	1,877	25	95	13·31	50·61
	1906	1,765	31	111	17	62

3. The comparative salubrity for Europeans of the Colony, Ashanti, and the Northern Territories in 1906 and 1907 was as follows:—

Locality.	Year.	No.	Deaths.	Invalided.	Death rate per 1,000.	Invaliding rate per 1,000.
Colony	1907	1,595	22	82	13·79	51·41
	1906	1,344	25	77	18	57
Ashanti	1907	259	2	11	7·72	42·47
	1906	383	6	29	15	75
Northern Territories	1907	23	1	2	43·47	86·95
	1906	38	—	5	—	131

The improvement in the invaliding rate of Ashanti and the Northern Territories is very marked, and it is worthy of note that no official died during the year in the former dependency.

4. It is difficult, for reasons given above, to obtain reliable information as to the health of the native population. No

epidemic visited the Colony or Ashanti, but the Northern Territories were visited by an outbreak of cerebro-spinal meningitis, which has formed the subject of special investigation. In Accra, where the population is estimated at 18,000, 928 burial permits were granted, and the total number of similar permits granted in the five towns where registrars of death are situated, viz:—Accra, Ada, Cape Coast, Elmina, Saltpond, and Sekondi, was 1,517 in 1907, as against 1,361 in 1906.

Sanitation.

1. The sanitation of the three principal towns in the Colony, Accra, Cape Coast, and Sekondi, is carried out by Town Councils, composed half of official, and half of unofficial members. These bodies are hampered by lack of funds from undertaking sanitary improvements on an extensive scale without Government assistance. In other places the sanitary work is under the supervision of the Medical Department, and an extended tour of inspection through the Colony, Ashanti, and the Northern Territories was made by Dr. W. H. Langley, C.M.G., the Principal Medical Officer, during the latter part of 1907 and the beginning of 1908. Native towns and villages in the Colony are not constructed, as a rule, on sanitary lines, and the outbreak of plague which has occurred during the present year in Accra has drawn forcible attention to the squalid and congested state of some of the native quarters of that town.

2. With a view to remedying this state of affairs, increased efforts are being made to teach the all-important subject of hygiene. A scheme has been formulated whereby school teachers can attend a systematic course of instruction given by medical officers, and failure to acquire the requisite standard of proficiency on this subject is to disqualify a teacher for the rest of his examination. It is hoped that the knowledge thus acquired will be disseminated not only to the pupils at the various schools, but to the elder generation.

3. At the same time energetic measures have been taken to locate the breeding places of mosquitoes in the principal towns, and, by filling up of holes, and treatment of puddles with kerosine, to destroy the larvæ. Every endeavour is also made to impress on the minds of the natives the part played by the insect in the transmission of malarial fever, and to induce them to free their surroundings from all broken pots and similar articles capable of collecting rain-water.

Climate.

The average solar maximum readings varied from 161 degrees, recorded in Gambaga in the Northern Territories in April, to 126 in Axim in June, and the average minimum on

grass from 75 degrees in Sekondi in March to 54 in Axim in December. The average shade maximum was highest, 97 degrees, in Gambaga in March, and lowest, 79, in Accra in August, and the average shade minimum highest, 79 degrees in Kwitta in March, and lowest, 63 degrees in Accra in January. The year's rainfall varied from 94 inches in Axim to 26 inches in Kwitta, but was generally satisfactory. The heaviest fall for a month was in Axim in June, where no less than 30·95 inches were recorded, followed by 23·13 inches in July.

A few slight shocks of earthquake were felt in Accra in the beginning of the year.

The appended table gives the results of the meteorological observations taken at the stations mentioned during the year:—

Station.	Temperature.						Rainfall.	
	Solar maximum.	Minimum on grass.	Shade maximum.	Shade minimum.	Range.	Mean.	Amount in inches.	Degree of humidity.
Aburi	144·47	70·29	87·11	71·07	16·03	79·09	50·73	88·56
Accra	142·51	70·55	84·80	70·42	14·38	77·61	36·67	77·89
Axim	135·81	57·12	85·11	68·41	16·70	76·76	94·84	90·55
Cape Coast ...	140·38	71·81	86·54	73·36	13·19	79·96	38·01	87·19
Kwitta ...	139·31	71·55	87·85	74·95	12·90	81·40	26·46	79·51
Sekondi ...	138·53	72·77	86·14	71·71	14·43	78·50	45·89	59·36
Coomassie (Ashanti)	140·55	69·13	87·58	70·00	17·57	78·79	63·32	88·00
Gambaga (Northern Territories).	149·65	61·77	88·81	73·97	14·82	80·64	39·17	62·46

VIII.—POSTAL, TELEGRAPH, AND TELEPHONE SERVICES.

Revenue.

1. The revenue of the department for the year amounted to £27,032 10*s.* 9*d.* as against £25,000 2*s.* 1*d.* for the previous year. The department also collected £6,876 4*s.* 10*d.* on behalf of the African Direct Telegraph Company and foreign administrations on account of telegrams despatched from the various offices in the Colony, and £3,456 16*s.* 7*d.* in respect of Customs duty on parcels.

Sale of Stamps.

2. The sale of stamps for 1906 and 1907, respectively, amounted to:—

	1906.			1907.		
(*a*) Postage stamps for Postal Revenue and Judicial purposes ...	19,675	3	6	20,876	2	7
(*b*) Postage Stamps for Telegraphic purposes	12,229	15	3	12,697	7	11

EXPENDITURE.

3. The expenditure amounted to £27,970 2*s*. 5*d*. as against £22,568 1*s*. 9*d*. in 1906. In 1907, however, £5,245 13*s*. 7*d*. was expended on the construction of new telegraph lines in the Northern Territories, whereas in 1906 the expenditure on this service was only £946 19*s*. 10*d*.

Correspondence.

4. The total number of ordinary letters, postcards, newspapers, and book packets which passed through the post in 1907 is estimated to have been 3,094,000 as compared with 2,970,000 in the previous year.

Registered and Insured Correspondence.

5. The number of registered and insured articles despatched was 162,933 and the number received 107,195, the figures for 1906 being respectively 158,363 and 105,000.

Parcel Post.

6. The total number of United Kingdom, German, and Intercolonial parcels dealt with was 42,240—4,108 despatched and 38,132 received—the contents being of a declared value of over £39,000. The number dealt with in the previous year was 36,167.

Money Orders.

7. The total value of money orders issued was £47,257 11*s*. 6*d*. as compared with £27,371 5*s* 6*d*., an increase of over 72 per cent., which is attributable to the reduction made in the rates of commission in January, 1907.

Postal Orders.

8. Notwithstanding the very large increase in money order transactions, the value of postal orders issued increased from £51,703 1*s*. 1*d*. to £63,787 10*s*. 6*d*. The number of postal orders issued increased from 74,851 to 95,677.

Telegraphs.

9. At the end of 1907, 46 offices were open to the public in the Colony, Ashanti, and the Northern Territories, with a total length of 1,280 miles; 151 miles more than the previous year.

10. The total number of telegrams dealt with was 254,190 as compared with 218,421 in 1906. 66,039 were official telegrams as against 60,637 in the previous year.

Telegraph Extension.

11. During the year the telegraph system was extended from Salaga to Tamale in the Northern Territories, a distance of about 74 miles, and from Bole to Wa, a distance of about 77 miles, at an expenditure of £5,133 13*s.* 11*d.*

New Offices.

12. Three new telegraph offices were opened during the year at Abosso, a mining town in the Colony, and at Tamale and Wa in the Northern Territories.

Telephones.

13. Local telephone services exist at Accra, Sekondi, Cape Coast, and Tarkwa, and are entensively used by the public, as is shown by the fact that out of 111 connections at the four exchanges, no less than 50 are those of unofficial subscribers.

IX.—MILITARY FORCES AND EXPENDITURE.

West African Frontier Force.

1. The headquarters of the regiment and the battery are at Coomassie, in Ashanti. Detachments of infantry are stationed at Accra and Cape Coast in the Colony, at Kintampo and Sunyani in Ashanti, and at Gambaga in the Northern Territories.

2. The discipline, drill, and training of the regiment is satisfactory, and the musketry shows steady improvement.

3. The cost of the regiment in 1907 was £65,326 10*s.* 1*d.*

The total cost of the Volunteer Force in 1907 was £1,663 16*s.* 9*d.*, as compared with £1,852 in the previous year.

Northern Territories Constabulary.

This force was created on the disbandment of the 2nd Battalion of the Gold Coast Regiment, West African Frontier Force, at the end of December, 1906.

The establishment consists of 2 European officers and 319 native non-commissioned officers and constables, of whom 66 are mounted, and the actual strength on 31st December, 1907. was 2 officers and 311 non-commissioned officers and constables.

Detachments of the force are stationed at the following places in the Northern Territories:—

Tamale, Gambaga, Wa, Navarro, Bole, Lorha, Tumu, and Salaga.

The expenditure on the force during the year under review amounted to £9,163.

Preventive Services.

1. The Eastern and Western Frontier Preventive Services, which are branches of the Customs Department, are stationed on the River Tano on the western frontier of the Colony, and on the River Volta on the eastern. Their duties are analogous to those of the coastguard in the United Kingdom.

2. The authorised establishment of both services is 364 and the cost of maintenance in 1907 was £14,494 0*s*. 10*d*.

X.—GENERAL OBSERVATIONS.

Ashanti.

1. The year under review was a satisfactory one for this dependency. As compared with 1906, revenue increased from £32,328 to £36,794, and expenditure decreased from £85,125 to £82,302. Owing to the special military expenditure required, the actual revenue of Ashanti cannot be expected, for some years to come, to meet the actual expenditure, but indications are not wanting that increased trade and development of the agricultural resources of the country will steadily reduce the deficit from year to year.

2. A rearrangement of boundaries with the Northern Territories on the north, and the Gold Coast Colony on the south, came into force on the first of January, 1907, on the publication of two Orders of His Majesty in Council bearing date the 22nd of October, 1906. The territory was subsequently divided into four administrative provinces, and the staff of Commissioners was increased, with the result that the European officers were enabled to travel more into outlying districts, and were thus brought into touch with a large body of natives to whom their rulers were previously unknown. Owing to this, a large number of land disputes between chiefs of subdistricts were adjusted and there is an increasing respect for the administration.

3. Trade increased by fifty per cent. over the previous year, and Coomassie is rapidly becoming an important trade centre. Attention has already been drawn to the encouraging interest taken by the Ashantis in agriculture. Political relations with the chiefs were good, and there was a comparative absence of serious crime. Educational results show a slight increase in the number of pupils during the year, and the Roman Catholic Mission is now a factor in the educational movements, in addition to the older establishments of the Wesleyan and Basel Missions.

4. The improvement of Coomassie, the headquarters of the Ashanti administration, continues year by year, and the insanitary squalor of a native town has given way to a large, well-planned, well-drained settlement, with several handsome buildings. In addition to other public works during the year under review, a new and more commodious Post Office was opened, in the turret of which a large four-dial clock was erected as a memorial to the late Sir Donald Stewart, K.C.M.G. Moreover, the foundation stone of a three-storied building for the Bank of British West Africa, Limited, was laid by the Chief Commissioner on His Majesty's birthday, and during the year a thirteen-hole grass golf course was laid out for the benefit of the European population.

5. For further detailed information as to Ashanti, reference should be made to the annual report of the Chief Commissioner of Ashanti.

Northern Territories.

1. In this dependency, which is not an integral part of His Majesty's dominions like the Gold Coast Colony and Ashanti, but is composed of protected territories, satisfactory progress has been made during the year under review in pacifying the wild tribes and increasing their confidence in the Administration.

2. Financially, the Protectorate is as yet unable to pay its way, but, considering the low intelligence of the vast majority of the inhabitants, the ravages inflicted a few years back by the great chiefs Samory and Barbatu, the poorness of the soil, as compared with the economic wealth of the forest belt, and the deficiency of water in many parts, this is hardly to be wondered at. It is satisfactory, however, to note that the revenue, which amounted to £18,089 as compared with £14,103 in 1906, shows an increase of 25 per cent, due to trade expansion consequent on the greater security of travellers, and that there is a growing demand for staple articles of commerce.

3. A notable change in the system of government was effected at the commencement of the year, the former semi-military regime giving way to a purely civil administration. The second battalion of the Gold Coast Regiment, which had hitherto been stationed in the Protectorate, was disbanded, and replaced by a considerably reduced force of constabulary, which has proved adequate to maintain peace and order. Three

administrative divisions were formed at first called districts, but now termed provinces, and a Commissioner was placed at the headquarters of each, with European subordinates in the sub-divisions. As might be expected, these changes caused an increase in the year's expenditure, which amounted to £24,304, against £13,603 in 1906, but of the ultimate benefit to the country there can be no doubt.

4. The headquarters of the administration were transferred during the year from Gambaga, which lies too far north to form a convenient centre for government, to the more central town of Tamale, which is described as situated in open, park-like country, on a ridge commanding extensive views, and near to an excellent water supply. It bears a reputation among the natives as being extremely healthy for men, cattle, and horses, and as it is situated in a very populous district, and contains excellent sites for European residences, it is to be hoped that when the transport difficulties are overcome by the completion of the trunk road from Coomassie, now in course of construction, the town will become an important trade centre.

5. Excellent relations were maintained between the officials of the Protectorate and those of the contiguous foreign possessions; constant interchanges of visits took place at stations on the Anglo-French frontier, and, by special invitation, several British officers spent the 14th July at Wagadugu, the French headquarters.

6. Further detailed information as to the Protectorate will be found in the Annual Report of the Chief Commissioner of the Northern Territories.

RAILWAYS.

Capital Account.

1. The total capital expenditure upon the Sekondi-Kumasi Railway to the 31st December, 1907, was £1,846,818 14*s.* 5*d.* Of this sum £1,776,450 2*s.* 1*d.* represents the cost of original construction, and the balance of £70,368 12*s.* 4*d.* has been expended on permanent improvements, and additional plant, machinery, and rolling-stock.

Loans of £1,035,000 and £63,000 towards the construction of this railway have been raised at 3 per cent. and their extinction is provided for by a sinking fund of 1 per cent., chargeable to the general revenue of the Colony, to the credit of which £30,722 stood on the 31st December, 1907.

A further loan of £867,000 for the construction and equipment of the line has recently been authorised by Ordinance No. 4, of 1908.

REVENUE.

2. The total revenue for 1907 was £166,256, being £4,975 less than that earned in the previous year, and £3,743 less than the amount estimated for. Upon goods traffic alone there was a falling off of £11,658, due mainly to tariff reductions on mining materials and spirits introduced, the former in

October, 1906, and the latter in May, 1907. As a partial set-off against this decrease, there was an increase of £3,858 in coaching earnings, and £2,824 in sundry earnings, added to which additional revenue of £5,000 was realized from mahogany traffic.

The total receipts per mile open were £990 and per train mile £1 3*s.* 3*d.*

The net revenue (total revenue less recurrent expenditure) earned during the year under review was £89,480, which is equal to 5·03 per cent. on the cost of construction and 4·84 per cent. on the total expenditure charged to capital account, a satisfactory condition of things.

Expenditure.

3. The total recurrent expenditure was £76,776, as against an estimated expenditure of £83,000, and an expenditure in 1906 of £77,257. The large saving of £6,524 on the estimated expenditure was the result of improvements effected in the organisation of the various branches of the Railway Department.

The recurrent expenditure works out at 46·18 per cent. of revenue, and the total expenditure, including £15,496 chargeable to capital account, at 55·50 per cent. of the revenue earned.

4. The general financial position of the railway and the working results to the 31st December, 1907, are given below:—

Total capital expenditure ...	£1,846,818	0*s.*	0*d.*
Total revenue earned in 1907	166,257	0	0
Total working expenditure in 1907	76,776	0	0
Extraordinary expenditure chargeable to capital account	15,496	0	0
Proportion of working expenditure to revenue... ...	46·18 per cent.		
Proportion of total expenditure (working and extraordinary) to revenue	55·50 ,,		
Net revenue earned	£89,480	0*s.*	0*d.*
Interest earned upon capital expenditure	4·84 per cent.		
Revenue per mile, open	£990	0*s.*	0*d.*
Expenditure per mile, open ...	457	0	0
Earnings per train mile	1	3	3
Expenditure per train mile ...		10	9
Net earnings per mile open ...	533	0	0
Net earnings per train mile ...		12	6

Number of miles, open	168
Number of passengers carried	109,680
Gross tonnage of goods and minerals	55,756

Accidents.

5. The total number of accidents of all kinds during the year under review was 319 as against 209 in 1906, the large increase being mainly due to the great number of trees (195) which fell across the line, thereby damaging the telegraph lines and permanent way. There were 20 engine failures, for the most part of a very ordinary character, and involving no serious consequences. There were 59 derailments, the majority of which occurred within station limits, principally in the Sekondi yard, which has been undergoing extensive alterations. There were three fatal accidents, two occurring to men in railway employment, the third being the case of a native apparently asleep on the track. In every case the verdict acquitted the railway department of negligence.

Rates.

6. As a result of the numerous and substantial reductions of rates in 1906 there were comparatively few changes of importance during 1907. The following list, however, shows that some further reductions have been made:—

Spirits of all descriptions	From 3*s.* 9*d.* per ton per mile to 2*s.* 6*d.*
Native corn (for export) from Kumasi to Sekondi.	Special rate of 10*s.* per ton.
Kola traders—Kumasi to Sekondi.	Free 3rd class traders' ticket issued in respect of consignments of 1 ton and over.
Cattle traders	Free 3rd class ticket to owner or attendant for each vehicle load.
Third class passengers ...	Issue of 500 mile coupon books at reduction of 25 per cent.

7. Comparative statement of revenue and expenditure (recurrent) for the years 1906 and 1907.

ROADS.

1. By the system in force, the construction and maintenance in the Gold Coast Colony of roads for vehicular traffic and cask-rolling devolves for the most part on the Public Works Department. The total length thus maintained is about 200 miles, and the roads are in a fair condition.

2. The principal of these roads are:—

(*a*) The road from Accra to Dodowa, on which the traffic is very heavy in the cocoa season. The length of this road is about 27 miles, and it is suitable for motor traffic; for vehicles with a gross weight not exceeding six tons. Four motor lorries are in frequent use on this road, and this number is expected to be shortly increased.

(*b*) The road from Accra to Aburi, about 25 miles in length, is identical with the Dodowa road for the first 13 miles. It is used by motor lorries as far as Ayimensa, at the foot of the range of the Akwapim hills.

(*c*) The road from Winneba to Swaidru, which is about 14 miles long, is also of importance in connection with the increased cultivation of cocoa in this part of the Colony. This road is now being made suitable for light motor lorries, and temporary wooden bridges are being replaced by iron structures.

(*d*) The Saltpond-Insuaim road, which is about 60 miles in length, has been reconstructed as far as Essikuma —about half way—and improved for the remainder of the distance. This is an important trade route, and is being made suitable for light motor lorries as far as Essikuma.

(*e*) The road from Cape Coast to Prahsu, which is the old trade and military road to Coomassie and the north, is maintained by the Public Works Department as far as Dunkwa, about 30 miles. For the remainder of the distance to Prahsu the bridges are kept in repair by the Department and the surface by the native chiefs.

3. In addition to the roads constructed and maintained by the Public Works Department, some 1,800 miles of native paths and tracks are kept clear by the chiefs, under the provisions of the Roads Ordinance, 1894, in return for a quarterly payment per mile, which varies from 5*s*. to £1, according to the nature of the road and the state of repair, but averages about ten shillings.

IMMIGRATION AND EMIGRATION.

1. No exact statistics are available with regard to the extent of immigration to the Gold Coast. It is estimated,

however, that some 3,500 labourers enter the Colony yearly for employment in the mines, or as carriers, labourers for public and private works, or scavengers.

2. The immigrants come chiefly from the Kru Coast (Liberia), Sierra Leone, and Lagos.

3. Imported labourers are usually engaged in gangs for six or twelve months under the "Master and Servant Ordinance, 1893," under a contract duly executed before a District Commissioner, which provides for the rate of pay and other conditions of service, and for repatriation at the expiration of the period of service.

4. There is little or no emigration in the strict sense of the word, but a considerable number of the natives of the Colony obtain temporary employment further down the coast as carpenters, coopers, blacksmiths, washermen, and domestic servants, and in clerical positions, official and mercantile.

Public Works.

The programme of public works extraordinary during the year under review was comparatively modest.

In addition, however, to sundry minor works, progress was made in the following more important works:—

At Sekondi.

The erection of a court house and judge's quarters to enable a divisional court to be established at Sekondi, was commenced.

By the reclamation of No. 1 Lagoon, the most objectionable portion of which was filled with gravel, and by the construction of a concrete drain to carry off the water from Essicadoes stream, the sanitation of the town is greatly improved.

The new prison was completed, and is now in use for long-sentence prisoners.

At Accra.

The new lunatic asylum, situated on an excellent site about two miles from the town, was practically completed by the end of the year, and is now occupied.

At Kwitta.

A court house and district commissioner's office were built of cement and sand bricks, to replace the inadequate accommodation in the Fort.

Waterwoks.

During the year Mr. Walter Hunter, a member of the firm of Messrs. Middleton, Hunter, and Duff, the consulting engineers, paid a visit to the Colony, accompanied by Mr. W. Baldwin, F.G.S., as geologist, and Mr. M. Mawson as assistant,

to advise on the projected water supplies for Accra and Sekondi. As a result of their investigations, the scheme of waterworks for Accra has been provisionally altered, and in lieu of damming up the Adjumenta valley in the Akwapim hills, where the rainfall has considerably decreased of late, it is now proposed to utilise the Densu river, about eight miles distant from Accra, and borings are being carried out at the dam site selected. A further result of their visit is the provisional adoption of a scheme for Sekondi, which provides for a dam on the Anankwan river, and for pumping from an impounding reservoir to a service reservoir on an adjacent hill, whence the town will be supplied by gravitation.

Harbour Works.

Satisfactory progress was made with the Accra harbour works during 1907. The railway to the quarry, a distance of three miles, was completed, and a large quantity of stone was quarried and delivered on the works. Owing to the banking up of the sand it was found necessary to raise over 250 feet of the sea wall three feet higher than was intended. On the breakwater 200 feet of blockwork was built, and 107 bags and 28 blocks were laid in foundations. Nearly 90 feet of retaining wall for the roadway was constructed, when work had to be stopped until more protection was gained from the breakwater; 250 feet of the road itself was also filled in and metalled. The protection afforded by the breakwater, so far even as it has been constructed at present, already decreases the danger of landing and embarking in rough weather.

Mines Surveys.

During the year, in addition to the ordinary work of the department, certain lines in the north of Ashanti were surveyed to form a basis for the map which is being compiled.

The rearrangement of the districts of the Colony, with a view to bringing their boundaries into closer conformity with tribal boundaries, was completed.

The compilation of a wall map of the Colony for the use of schools was commenced.

Good progress was made with the production of the new map of the Colony and its dependencies on a scale of $\frac{1}{125000}$ and the following sheets were produced in 1907, viz.:—Sekondi, Obuasi, Accra, Komfrodua, Winneba, Nianyano, Coomassie, Nsaba, Cape Coast, Kyebi, Praso, and Fumsu.

Changes in the Establishment.

There were no important changes in the substantive holders of office during the year under review. During the absence on leave in the latter part of the year of the Governor, Sir John

Rodger, K.C.M.G., the Government was administered by Major Herbert Bryan, C.M.G., the Colonial Secretary.

Transport.

The Transport Department dealt with 16,437 loads during 1907, and the Transport Officer reports that none were lost.

The office at Cape Coast, where business has declined since the opening of the railway from Sekondi to Coomassie, was closed at the beginning of the year.

Few labourers are now supplied by this Department to the mines, but it continues to provide carriers for officers travelling in Ashanti, the Northern Territories, and the western portion of the Colony, and still attends to the transport of Government stores by rail and sea from Sekondi.

Suitability of Climate for Europeans, and Openings for White Labour.

1. Europeans of temperate habits and sound constitution, who take suitable exercise, generally suffer little from climatic causes, provided that their residence in this portion of West Africa is not unduly prolonged.

2. As has been stated in previous reports, Europeans should on no account come to the Gold Coast for the purpose of seeking employment. Government subordinate officials and employees of the mercantile firms and mining companies are almost invariably engaged in England under agreement, and vacancies are rarely filled locally.

Rates of Wages and Cost of Living.

1. Generally the rates of wages are high, but the cost of living has tended to increase during recent years. This is specially the case in the Western Province, in which the principal gold-mines are situated. In the hinterland food is plentiful and cheap.

2. The wages of domestic servants vary from £1 to £2 10*s*. and of cooks from £2 to £4 per month. Servants of the coolie class can be obtained at a wage of £1 to £1 10*s*. Carriers earn 1*s*. a day and are given 3*d*. a day to buy food. Contract labourers and carriers are paid 25*s*. a month; these also receive 3*d*. a day subsistence money.

3. Native carpenters, cabinet-makers, masons, and smiths command ready employment and earn good wages at rates from 1*s* 6*d*. to 3*s*. a day.

Redivision of Administrative Districts.

By an Order in Council which came into force on the 1st November, 1907, new administrative districts were created in the Colony, the boundaries whereof have been defined, as far

as possible, in conformity with the tribal boundaries of the native headchiefs.

The three provinces of the Colony, were, however, but little affected by the Order.

NATIVE AFFAIRS.

During the early part of the year a certain number of local disputes occupied attention in the Colony, but the latter half was a time of quietness. Speaking generally, it may be said that the relations between the Government and the native chiefs are satisfactory, and that increased respect for the Administration is noticeable in Ashanti and the Northern Territories.

NATIVE JURISDICTION.

An interesting feature of the year under review was the second reading in the Legislative Council of a Bill having for its aim the amelioration of the present unsatisfactory state of native tribunals, which, owing to inability to enforce their decisions, to the want of proper records, and to other causes, have fallen somewhat into disrepute, and the establishment of these tribunals as an integral factor in the recognised judicial system of the Colony. It is sought to effect these objects by the appointment of a Government officer as native registrar of every headchief's court, whose duties will be to record the minutes of the proceedings and the decisions of the court, and to issue process. The limit of the civil and criminal jurisdiction of these courts is to be confined to small cases where the parties are natives, and machinery is to be provided, through the medium of the native registrar, for the proper enforcement of judgments. Native law is, subject to the provisions of the bill, to be administered, and while native procedure is to be adhered to, as far as practicable, in the form of trial, the suggested methods of execution of judgments is based on the Supreme Court practice. Criticism has been freely invited, both on the principles and details of the Bill, alike from native chiefs and others who will be affected by its provisions, and from judicial officers of the Colony, and the Bill itself has been referred to a select committee composed of the legal and native members of the Council. Whatever may be its ultimate fate, the introduction of the measure will afford lasting evidence of an honest and generous endeavour to deal satisfactorily with a question beset with many practical difficulties.

SCIENTIFIC RESEARCH.

Much interesting and valuable research work has been done by Dr. W. M. Graham, of the West African Medical Staff, who was detailed to investigate and make classified collections of the biting insects of Ashanti. He has been engaged especially

in making as complete a collection as possible of the ticks, flies, mosquitoes, and other diptera, defining the localities in which they are found, making microphotographs of perfect blood-sucking insects captured, identifying specimens, describing and drawing some of the agricultural pests which attack cocoa and other products, and studying the distribution of the tsetse fly in Ashanti; and his report is likely to prove of great scientific value.

Dr. A. E. Horn, of the West African Medical Staff, was detailed for special duty in connection with the study of the epidemic of cerebro-spinal meningitis in the Northern Territories, and this duty was carried out under many difficulties, not the least being the suspicious and unfriendly attitude of some of the wild tribes inhabiting those regions.

General Conditions.

The general feature of the year under review was peaceful progress. With its revenue, its volume of trade, and its gold output, breaking all records of previous years, with its unmistakable evidence of a welcome interest in matters agricultural in Ashanti and the Colony, its improved health record for Europeans, and its freedom from serious disturbance, the year 1907 may fairly claim to be one of the most successful in the annals of the Colony.

A. Willoughby Osborne,

Acting Colonial Secretary.

3rd July, 1908.

APPENDIX.

Economic Investigations conducted at the Imperial Institute during the year 1907 for the Gold Coast Colony.

Reports from the Imperial Institute have been made to the Government of the Colony on the following subjects on the basis of investigations conducted in the Scientific and Technical Department, followed, when necessary, by technical trials by manufacturers and commercial experts. In many cases recommendations have been made as to the further action which is required in the Colony in order to develop the production of those materials for which it is probable that there would be a satisfactory commercial demand.

Rubber.—A series of samples of 21 samples of *Funtumia elastica* rubber prepared in "biscuit" form was forwarded from Ashanti. With two exceptions the specimens were of very promising quality and the valuations obtained showed that the rubber in this form will realise much higher prices than the ordinary native lump rubber.

Four other samples of Funtumia rubber, and one specimen of *Ficus Vogelii* rubber were also dealt with during the year. The Funtumia rubbers were prepared by different methods, including the use of an infusion of the leaves of *Bauhinia reticulata* for coagulating the latex. They were all of good quality, and very satisfactory valuations were obtained for them. The use of a hot infusion of the leaves of *Bauhinia reticulata* for coagulating *Funtumia latex* appears to give very good results, and entirely obviates the necessity of applying direct heat to the latex.

The *Ficus Vogelii* rubber contained 35·6 per cent. of resin, which is rather less than was found in the two previous specimens from the Colony. A small consignment of this rubber has been asked for so that technical trials can be made.

Kola nuts.—Specimens of several varieties of kola nuts from the Gold Coast have been examined and found to be of marketable quality.

Cotton.—Thirteen samples of unginned cotton, comprising American, native, and hybrid varieties, were received for examination. The cottons were of very good quality, certain samples being valued at 6½*d.* to 7½*d.* per lb., with "middling" American at 6·6*d.* per lb.

Fibres.—A specimen of *Triumfetta semitriloba* fibre was of excellent quality, and was valued at £35 per ton, with finest Bengal jute at £35 to £40 per ton.

Specimens of plantain and banana fibres were of good quality but rather weaker than Manila hemp; they were valued at £40 and £36 per ton respectively.

A sample of pine-apple fibre was also examined.

Oil seeds.—The seeds of *Carapa guineensis* have been examined and found to yield an oil which would be useful for soap-making. The oil would probably realise from £22 to £30 per ton.

Tanning materials.—Samples of mangrove barks were examined but did not contain sufficient tannin to be worth consideration for export, although they would probably be found of value locally for tanning or for the preparation of a tanning extract.

Cocoa.—During 1907 the Imperial Institute has again co-operated with the Government of the Gold Coast in the development of the cocoa industry in the Colony. In order to obtain trustworthy information regarding the market value of the better grades of Gold Coast cocoa two consignments of selected cocoa from a number of native planters were forwarded to this country for sale in consultation with the Imperial Institute, and unusually good prices, ranging from 65*s.* to 69*s.* per cwt. were realised. Gold Coast cocoa has not previously attracted much attention from manufacturers in

this country, but as the result of the action recorded above an English firm has sent out a representative to the Colony.

Miscellaneous vegetable products.—A collection of miscellaneous vegetable products was received for examination. A very fine specimen of white maize was valued at 5*s.* 1*d.* per 100 lb., and a sample of red maize at 3*s.* 11*d.* per 100 lb. For cassava starch a price of 9*s.* per cwt. was quoted at Liverpool, and 20*s.* per cwt. was offered in London for a sample of dried chillies. A sample of guinea grains was described as of good quality and worth at the moment 47*s.* 6*d.* per cwt. This high price was, however, due to a scarcity of the product. There is usually a limited demand for guinea grains at about 40*s.* per cwt, or less.

Oil and Bitumen.—A sample of liquid bitumen from Bonyere was examined and found to be of some commercial importance. If obtainable in large quantities it could be used for the production, by distillation, of burning oil, lubricating oil, and asphalt.

A sample of bituminous sand from French territory was of less intrinsic value than the Bonyere bitumen, and was mainly of interest as perhaps indicating the occurrence of petroleum below the surface.

A number of new exhibits, including a model of a gold dredger, were received during the year and have been added to the West African Court in the public galleries, with full descriptive labels. A number of photographs, a map of the Colony, and a statistical table of information have also been added. A selection from the Gold Coast exhibits at the Imperial Institute was lent to the Colonial Products Exhibition held at Liverpool in 1907. A descriptive catalogue of the exhibits has been prepared for publication in the "Bulletin of the Imperial Institute."

Mr. G. C. Dudgeon, the Superintendent of Agriculture for West Africa, has been in constant communication with the Imperial Institute on all matters connected with agricultural operations and development, and has transmitted numerous specimens of economic products for examination at the Imperial Institute.

Ordnance Survey

COLONIAL REPORTS.

The following recent reports relating to His Majesty's Colonial Possessions have been issued, and may be obtained from the sources indicated on the title page :—

Work conducted at the Imperial Institute during the year 1908 for the Gold Coast Colony 54

SKETCH MAP.

No. 613.

GOLD COAST.

(For Report for 1907, *see* No. 573.)

THE ACTING GOVERNOR TO THE SECRETARY OF STATE.

Government House,
Accra,
21st July, 1909.

MY LORD,

I HAVE the honour to transmit, herewith, a comprehensive report on the Blue Book for the year, 1908, which has been prepared by the Acting Colonial Secretary, Mr. C. Riby Williams, C.M.G.

The most serious event in the history of the Colony in recent years was the unfortunate epidemic of plague which broke out at Accra in January. This is the first recorded instance of the existence of plague in a British West African Colony, though an outbreak occurred at Grand Bassam, in the neighbouring French Colony of the Ivory Coast, in the year 1899.

The origin of the infection remains uncertain; many theories have been put forward to account for its conveyance to the Gold Coast, but none are supported by reliable evidence, and the question still affords matter for speculation.

The outbreak was not definitely diagnosed as plague until the 10th of January; but it is practically certain that deaths from plague had occurred before the disease began to develop the character of an epidemic. The fact that the medical authorities did not announce the existence of the disease at an earlier date has been made the subject of local criticism. But, as the Officer Administering the Government at the time, I have no hesitation in stating that the preliminary enquiries and investigations were most thoroughly and conscientiously made by the Deputy Principal Medical Officer and his assistants.

It must be borne in mind that these officials had no previous experience of the disease, nor were they familiar with the plague bacillus; under such circumstances, a degree of reticence was, in my opinion, not only reasonable but wise. An authoritative pronouncement that plague has appeared in the midst of a community where, hitherto, its existence is neither known nor suspected, argues that the Deputy Principal Medical Officer possesses courage and self-reliance of a high order, and these qualities

(14162—2.) Wt. 26122—322. 1125. 9/09. D & S.

were no less apparent subsequently in the suppression of the epidemic.

The measures immediately taken to deal with the outbreak were:—

(i.) Accra declared an infected port under the Quarantine Ordinance.

(ii.) The establishment of isolation camps for contact cases, and of special markets in their vicinity.

(iii.) The provision of a separate burial ground for infected corpses.

(iv.) The closing of all schools.

(v.) The appointment of a Health Committee with special powers under the Towns Ordinance.

(vi.) The extermination of rodents and the offer of rewards for their destruction.

(vii.) The closing or demolition of houses and huts certified by a medical officer to be infected.

These preliminary measures were attended with success and it was soon apparent that the outbreak was well in hand. The disease at Accra never assumed the alarming proportions which have been developed in other countries, though its sanitary conditions and certain thickly populated native areas were favourable to the growth of a virulent epidemic.

The Gold Coast Colony is not a party to the Paris Sanitary Convention of 1903; but, in accordance with the spirit of that Convention, all British and foreign Governments in West Africa were immediately informed of local conditions and the measures adopted to prevent the spread of contagion.

Though the steps taken by the Colonial Government were sufficient to keep the epidemic in check for the time being, the Secretary of State decided to send out a specialist to advise as to the measures necessary to stamp out contagion, and the Colony was fortunate to obtain for this purpose the services of Professor W. J. Simpson, whose experience in connection with outbreaks of plague in India and South Africa and his position in the domain of tropical hygiene rendered him eminently qualified for the task. Professor Simpson arrived at Accra on the 2nd of February. He was appointed President of the Committee of Public Health and immediately took charge of all arrangements for the suppression of the epidemic. Up to that date the total number of deaths from plague at Accra was 67; there were 11 cases in the Contagious Diseases Hospital, and 32 contact cases in the isolation camps.

As is usual, the outbreak was associated with an epizootic of plague amongst rodents. A special laboratory for the examination of rats was established at Accra, where Dr. Graham was on various occasions able to acquaint the Health Committee that areas were infected in which the epidemic had not yet appeared. The invaluable information thus received enabled the Committee to take preventive measures in such localities, with the result that human beings remained free from contagion. There is no indication that the epizootic of plague spread beyond the town of Accra.

On the advice of Professor Simpson the undermentioned further measures were taken to suppress the outbreak and to prevent the spread of the contagion:—

(i.) The establishment of four stations for inoculation by Haffkine's prophylactic.

(ii.) The supervision and inspection of all cargo shipped from Accra and the fumigation of sacks and coverings of such cargo.

(iii.) The inoculation of all deck passengers and other natives leaving Accra by sea at least a week prior to their departure and the fumigation of their clothing and effects.

(iv.) The fumigation of parcel post mails.

(v.) The establishment of a land cordon round Accra. No person who had slept within the municipal boundaries within the preceding 14 days was allowed through the cordon without a passport, bearing an impress of his or her thumbmark, and signed by a Government medical officer, stating that the bearer had been inoculated at least seven days prior to the date of the passport. 4,000 such passports were issued by medical officers.

One of the most satisfactory features of the preventive measures was the readiness with which the natives voluntarily presented themselves for inoculation by Haffkine's prophylactic. More than 2,000 natives were inoculated between the 7th and 12th of February; and some 35,000 in all. It is regrettable that in spite of the measures taken to prevent natives leaving Accra by sea and land, a few fishermen evaded the police by night and left for towns on the coast. In each case the panic-stricken men carried contagion, with the result that outbreaks of plague occurred at Temma to the eastward, and at Nianyano, Brewa, Anamabo to the westward. Prompt steps were taken to deal with these villages, and the progress of the epidemic was checked in each instance; but not before 64 deaths had occurred at Nianyano, 19 at Brewa, and 12 at Anamabo.

It became apparent about the middle of February, when the fear inspired by the first ravages of the disease had to some extent abated, that the statute law of the Colony was inadequate to provide for the necessary measures to prevent the spread of the epidemic, and I requested Lord Elgin's sanction to lay before the Legislature the Bill which was subsequently enacted, with a few modifications, as "The Infectious Diseases Ordinance, 1908," (No. 2 of 1908). The provisions of this measure are drastic, but not more so than was warranted by the gravity of the situation. Briefly, it empowers the Governor in Council to declare:—

(i.) Any infectious or contagious disease to be within the provisions of the Ordinance.

(ii.) Any place or town an infected area.

(iii.) Any infected area to be evacuated.

It empowers a medical officer to order:—

(i.) A post-mortem examination where an infectious disease is suspected.

(ii.) A mark of identification to be placed on infected buildings.
(iii.) The disinfection or destruction of the same.
(iv.) The destruction of animals suspected of transmitting an infectious disease.
(v.) The removal or isolation of infected persons or persons suspected to be infected.

The Ordinance further provides for the appointment of Compensation Boards for dealing with all claims which may arise under the Ordinance, and empowers the Governor in Council to make rules for the carrying into effect the provisions of the Ordinance.

By Section 15 it was enacted that no action, suit, or civil proceeding of any kind should be brought, without the consent of the Attorney-General, for damages or compensation in respect of any measures taken to prevent the spread of the outbreak of plague as well before as after the commencement of the Ordinance. The Enactment thus made legal what had previously been done by the Executive in demolishing houses and property, while providing for the payment of compensation to the owners thereof.

The appointment of Compensation Boards has proved most successful, and no complaints have been received in connection with their awards.

The total number of cases of plague in the Colony between the outbreak in January and the 16th of August, when Accra was finally declared to be free from infection, was 336; of which 288 terminated fatally.

157 deaths occurred in Accra and 25 in villages in its vicinity. It is gratifying to report that out of 92 cases treated in the Infectious Diseases Hospital 45, or 48·91 per cent., recovered.

106 deaths occurred in the Central Province.

The courage, determination, and devotion shown by Professor Simpson and the medical staff in preventing the spread of and stamping out the epidemic were worthy of the high traditions of the profession to which they belong, and their efforts were ably and energetically seconded, not only by officers of all departments resident in infected areas, but also by professional men and representatives of the mercantile community who served on the Committees of Public Health.

The admirable services rendered by these officials and non-officials have been rewarded by the successful result of their unselfish labours and the recognition by your Lordship of their good work.

I have, &c.,

H. Bryan,

Acting Governor.

The Right Honourable
The Earl of Crewe, K.G.,
&c., &c., &c.

REPORT ON THE BLUE BOOK OF THE GOLD COAST COLONY FOR THE YEAR 1908.

I.—FINANCIAL.

The revenue for the year 1908 was the highest yet recorded, and trade, notwithstanding depressed home markets and a local outbreak of plague, must be considered satisfactory. The revenue amounted to £752,141 11*s*. 4*d*., which exceeded the original estimate by £17,841 11*s*. 4*d*., and was £43,423 1*s*. 11*d*. in excess of that of the year 1907, although that year included a grant-in-aid of £5,000 from Imperial funds. Revenue exceeded expenditure by £64,849 7*s*. 8*d*. The latter included:—

(i.) £20,000 repaid to the Imperial Exchequer.

(ii.) £10,980 contributed to the Sinking Fund for liquidating the Railway Loan.

On the 31st December, 1907, assets exceeded liabilities by £477,871 16*s*. 4*d*., and on 31st December, 1908, by £542,721 4*s*.

The amounts collected under the several heads of revenue in the Colony, Ashanti, and the Northern Territories are shown in the following statements:—

Heads of Revenue.	Actual Revenue to 31st December, 1908.	Revenue for the same period of preceding year.	Increase.	Decrease.
	£ s. d.	£ s. d.	£ s. d.	£ s. d.

Rents from Government land.	1,295	0	9				
Sale of stamps, &c. ...	4,589	8	7				
Sale of unserviceable stores.	11	19	9				
Miscellaneous	350	9	9				
Total	27,908	17	6	Total	10,938	12	9

The following heads exhibit increases over the original estimates:—

	£	s.	d.
Customs	79,985	18	11
Light Dues	101	10	0
Licences, &c.	5,416	14	9
Post and Telegraphs	299	15	8
Rents of Government Land	256	3	7
	£86,060	2	11

The increase under the head Customs is due to a large excess under the sub-head "Specific," caused by an additional 6*d*. per gallon duty imposed on Spirits (Ordinance No. 6 of 1908), and to abnormal withdrawals of spirits from bond during the month of December.

The increase under Licences, &c., is due, to a large extent, to amounts received in respect of Firearms and Ammunition Licences, under Ordinance No. 3 of 1907, which came into force on the 1st of October, 1907, and additional Spirit Licences. Increases also occur under Ferry Tolls.

The heads which show decreases under the estimates are:—

	£	s.	d.
Fees of Court, &c.	6,190	19	11
Railway	24,495	3	6
Interest	12,507	14	1
Ashanti	12,091	2	6
Northern Territories	7,061	7	3
Miscellaneous	5,772	4	4
Land Sales	100	0	0
	£68,218	11	7

Fees of Court, &c.:—The decrease under this head is due principally to the revenue under the sub-head "Stamp Duties" failing to realize the amount anticipated, though there was an increase of £18,496 12*s.* 6*d.* on the amount received in the year 1907. There was also a falling off under the sub-heads "Survey Fees" and "Mines Police." On the other hand, the sub-head "Prison Labour" showed an increase of £601 17*s.*, and "Escort Police" of £223 16*s.* 9*d.*

The decrease under Railways is attributable to the inactivity in the mining industry with regard to upward freight, and to the decrease on the timber and rubber traffic in the down direction, owing to depression in the home markets. Various rates were also reduced from the 1st of August, but without a corresponding growth of tonnage.

The decrease under Interest is due to the proposed loan for Railways and Harbour works, authorized by Ordinance No. 12 of 1906 (re-enacted and extended by Ordinance No. 4 of 1908) not having been raised during the year. Thus it was not possible to release, for investment, the surplus funds of the Colony, which have been advanced to carry on loan works.

The decrease under Ashanti is mainly due to the abolition, with effect from the 1st of August, of the Caravan Tolls and to the failure of Mining Royalties to realize expectations. The following sub-heads also show decreases:—Ferry Tolls (£558 18*s.* 7*d.*) due to a considerable decrease in the quantity of rubber ferried; Court Fines and Fees (£472 17*s.* 9*d.*) which are subject to variation, and Rents from Government Lands (£404 19*s.* 3*d.*) due, to a certain extent, to arrears not brought to account before the end of the year.

The decrease under Northern Territories is almost entirely due to the abolition of the Caravan Tolls. There is also a decrease of £349 8*s.* 5*d.* under the sub-head "Sale of Provisions," owing to the system of purchase of Government provisions having been discontinued.

Under Miscellaneous, the receipts for Mining Royalties fell short of the Estimate by £6,203 14*s.*

The estimated expenditure for the year was £894,689, the actual expenditure being £687,292 3*s.* 8*d.*, or £207,396 16*s.* 4*d.* under the estimate and an increase of £70,167 15*s.* 2*d.* over that for the year 1907.

The savings on the estimates are mainly under the heads of:—

(i.) Railways, £15,555 19*s.* 11*d.*, due partly to lower working expenses corresponding to a greatly decreased tonnage, and partly to the cost of locomotives, on order, not having been met during the year.

(ii.) Public Debt Charges, £34,625 15*s.*, due to a saving in the amount of interest estimated to be paid to stockholders, namely £56,000, which, owing to the proposed Loan for Railway and Harbour Works not having been raised, was not required. As against this saving the interest paid on advances by the Crown Agents to carry on the loan works, namely £21,537 10*s.* 4*d.*, should be taken into consideration.

(iii.) Ashanti Disturbances. Owing to the loan not having been raised, surplus balances were not available for the payment of the sum of £34,380 due to the Imperial Exchequer in respect of troops lent during the Ashanti disturbances of 1900. For the same reason

(iv.) the sum of £100,000 provided under repayment of of Loans from Surplus Balances to the Imperial Exchequer has not yet been met.

(v.) Works Chargeable to Surplus Balances, £17,881 7*s.* 7*d.*, due to the works not having been proceeded with to the extent anticipated.

(vi.) Gold Coast Regiment, £3,499, due to savings under salaries, &c.

(vii.) Police, £5,583 11*s.* 4*d.*, due to eleven months' expenditure only having been brought to account during the year; and

(viii.) Public Works Extraordinary, £3,200 7*s.* 9*d.*, though this does not represent any saving as the amount will be fully required during the year 1909 for the completion of works.

The appended tables show the expenditure, in detail, as compared with the year 1907:—

Head of Expenditure.	Expenditure, 1907.	Expenditure, 1908.	Increase.	Decrease.

43. Ashanti Disturbances, from Surplus Balances.	4 14 9	—	—	4 14 9
Total	617,124 8 6	687,292 3 8	101,102 3 11	30,934 8 9

The following statements show the expenditure in 1908 charged against Ashanti and the Northern Territories:—

Ashanti.	£	s.	d.	Northern Territories.	£	s.	d.
Ashanti (Head XXX of Estimates).	27,791	6	10	Northern Territories (Head XXXI. of Estimates).	22,607	10	11
Treasury...	771	7	5	Treasury...	487	2	9
Customs (Preventive services).	1,848	0	0	Post and telegraphs ...	316	2	5
Post and telegraphs ...	1,546	3	3	Medical department ...	4,717	13	10
Transport department ...	589	6	1	Sanitation	12	0	0
Medical department ...	5,382	8	3	Agriculture	13	15	0
Agriculture	395	8	7	W.A.F.F. (proportionate cost).	5,604	0	0
W.A.F.F. (proportionate cost).	45,823	0	0	Northern Territories Constabulary.	10,321	5	0
Volunteers	475	11	2	Public works	396	0	5
Police	1,850	17	0	Public works extraordinary.	5,786	7	6
Prisons	923	12	8				
Public works	1,200	0	2				
Public works extraordinary.	7,432	11	7				
Post and telegraphs extraordinary.	2,550	13	1				
Total	98,580	6	1	Total	50,261	17	10

As compared with 1907 the principal increases in expenditure were:—

	£	s.	d.
(i.) Miscellaneous Services	22,151	9	7
(ii.) Public Works Extraordinary ...	43,887	11	2
(iii.) Repayment of Loans	5,000	0	0

and various sums under the heads:—Customs (£2,070 1*s.* 3*d.*), due to one month of 1907 expenditure having been paid in 1908; Transport and Travelling (£3,035 10*s.* 9*d.*), due mainly to the increased amount paid to the railway for conveyance of Government officials and goods; Medical (£4,624 10*s.* 3*d.*), due to increases under Personal Emoluments; Education (£1,403 16*s.* 8*d.*), increased grants-in-aid to assisted schools and equipment of the new Government training institution and technical school; Forestry (£1,665 5*s.* 2*d.*), cost of special officer to examine and report on the forests of the Colony and Ashanti; Prisons (£1,750 13*s.* 1*d.*), due to rations for and supervision over increased number of prisoners; Surveys (2,733 13*s.* 8*d.*), a new department formed to take the place of the previous Mines Surveys Department; Ashanti (£1,294 17*s.* 7*d.*), increased Public Works and Coomassie Agricultural Show; Northern Territories Constabulary (£1,158 3*s.* 2*d.*), due to increase for clothing and equipment, and arms and ammunition ; Public Works Department (£2,580 12*s.*), increased Personal Emoluments, following a larger programme of work; Public Works Recurrent (1,061 0*s.* 3*d.*), increase in the cost of maintaining trade roads; and Works Chargeable to Surplus Balances (£1,896 7*s.* 8*d.*), due to increased expenditure on these works.

The increase under (i), Miscellaneous Services, is entirely due to the outbreak of plague, for which a sum of £25,000 was voted by the Legislature; under (ii.), augmented programme of public works undertaken in 1908, and (iii.), due to three instalments only having been paid to the Imperial Government during the year 1907.

The principal decreases were:—

	£	s.	d.
(i.) Railways	14,842	5	1
(ii.) Gold Coast Regiment, 2nd Battalion	3,433	12	5
(iii.) Mines Surveys	4,517	0	6
(iv.) Northern Territories	1,696	14	2
(v.) Public Debt Charges	1,278	4	10
(vi.) Post and Telegraphs Extraordinary	2,850	14	8

These decreases were due under (i.) to lower working costs consequent on reduced traffic; under (ii.) to the disbandment, in 1906, of the 2nd Battalion, Gold Coast Regiment, West African Frontier Force; (iii.) a new department having taken its place; (iv.) vacancies in staff, &c., for portions of the year; (v.) less interest paid on advances by the Crown Agents, and (vi.) decreased expenditure on Telegraph Construction.

The following is a comparative statement of the total revenue and expenditure for the past five years :—

Revenue.						Expenditure.					
Year.	Amount.				Remarks.	Year.	Amount.				Remarks.
	£	s.	d.				£	s.	d.		
1904	682,193	0	0		Includes £31,800 4*s.* 4*d.* Grants-in-aid of Northern Territories.	1904	622,376	11	5		Includes £5,612 0*s.* 7*d.* on account of Ashanti disturbances.
1905	586,221	8	1		Includes £13,759 6*s.* 6*d.* Grants-in-aid of Northern Territories.	1905	616,118	11	2		Includes £4,106 15*s.* 2*d.* on account of Ashanti disturbances, and £20,000 repayment of loans.
1906	683,101	16	3		Includes £10,000 Grants-in-aid of Northern Territories.	1906	628,906	3	0		Includes £224 7*s.* 11*d.* on account of Ashanti disturbances and £26,598 18*s.* 11*d.* repayment of loans.
1907	708,718	9	6		Includes £5,000 Grants-in-aid of Northern Territories.	1907	617,124	8	6		Includes £15,000 on account of repayment of loans.
1908	752,141	11	4		Includes no Grants-in-aid.	1908	687,292	3	8		Includes £20,000 repayment of loans.

The only forms of direct taxation in the Colony proper are the licences on vehicles and the house rate levied under the Town Councils Ordinance. In the towns of Accra, Cape Coast, and Sekondi these items form part of the revenue of their respective municipalities.

The collection of caravan tolls was discontinued, both in Ashanti and in the Northern Territories from the 1st of September.

The following is a detailed statement of the Assets and Liabilities of the Colony on the 31st December, 1908 :—

1908. Liabilities.	£	s.	d.	£	s.	d.

				£613,458	8	5

The excess of assets over liabilities on the 1st of January, 1908, was £477,871 16*s*. 4*d*. At the close of the year the excess stood at £542,721 4*s*., an increase of £64,849 7*s*. 8*d*.

The excess is explained as follows:—

	£	s.	d.
Excess at 31st December, 1907	477,871	16	4
The revenue of 1908 was	752,141	11	4
	1,230,013	7	8
The Expenditure of 1908 amounted to ...	687,292	3	8
Leaving an excess at 31st December, 1908, of	£542,721	4	0

The surplus is accounted for as under:—

Assets.

	£	s.	d.
General Imprest Account (cash in hand) ...	82,497	9	4
General assets as shown in above table exclusive of advances made for Loan Works from Surplus Funds	88,085	5	5
Advances made for Loan Works from Surplus Funds pending the issue of a further loan	442,875	13	8
	£613,458	8	5

Liabilities.

	£	s.	d.			
Sundry items shown in above detailed statement	69,561	5	2			
Drafts and remittances ...	1,175	19	3			
				70,737	4	5
Surplus				£542,721	4	0

On the 31st December, 1907, the Public Debt of the Colony was £2,206,964 16*s*. 7*d*. On the 31st of December, 1908, it amounted to £2,207,163 13*s*. 3*d*., or an increase of £198 16*s*. 8*d*. This increase is accounted for as follows:—

	£	s.	d.
Additional advances by the Crown Agents ...	20,198	16	8
Less repayment to the Imperial Exchequer	20,000	0	0
	£198	16	8

The funded portion of the debt amounted to £1,098,000 5*s*. 9*d*., and the amount standing to the credit of the Sinking Fund for the extinction of the debt was £43,161 16*s*. 6*d*., as against £30,785 14*s*. 3*d*. at the close of the preceding year. £10,980 of this was contributed from general revenue, the balance accruing from interest realized on investments.

The following statement shows in detail the particulars of the Public Debt:—

	£	s.	d.	£	s.	d.
1. Imperial Exchequer—						
(i.) Ashanti Expedition, 1896 (due to the War Department)	98,798	3	6			
(ii.) West India Regiment, 1897-1898 (due to the War Department) ...	10,051	15	2			
(iii.) Telegraph lines to the Northern Territories, 1897-1898 (due to the Imperial Government)	29,441	10	8			
(iv.) Ashanti War, 1900 ...	469,425	5	11			
(v.) Government of Northern Nigeria (for troops lent during Ashanti disturbances, 1900)	34,380	5	10			
	642,097	1	1			
Less repayments	81,598	18	11			
				560,498	2	2
2. Railway Purposes and Harbour Works—						
(i.) 3 per cent. inscribed stock issued in March 1902	1,035,000	0	0			
(ii.) 3 per cent. inscribed stock issued against loan of £665,000	63,000	5	9			
(iii.) Advanced by Crown Agents pending issue of authorised Gold Coast loans	548,665	5	4			
				1,646,665	11	1
Total ...				£2,207,163	13	3

The currency and legal tender is British sterling, with the addition of the undermentioned French, Spanish, and American gold coins, the values of which are fixed by the Demonetisation Ordinance, No. 2 of 1880:—

—	Nominal Value.	Legal Value. £	s.	d.
French—				
Napoleon	20 francs.		15	10
Spanish—				
Doubloon	16 dollars.	3	4	0
Half Doubloon	8 „	1	12	0
American—				
Double Eagle	20 „	4	2	0
Eagle	10 „	2	1	0
Half Eagle	5 „	1	0	6
Quarter Eagle	2 „ 50 c.		10	3

British silver coins are legal tender to an unlimited amount; British bronze coins are legal tender up to an amount not exceeding one shilling. There is small circulation of the United States half-dollar, but the coin is not legal tender, and is not accepted by the Government; its current value is two shillings.

The use of bronze coinage has increased to a marked degree in the more civilised parts of the Colony and Ashanti. In the Accra markets copper coins have almost entirely superseded cowries, and in the larger Coast towns and in Coomassie and Obuasi they are now extensively circulated. In proof of this statement, it may be pointed out that whereas the importation of bronze in 1903 was only £25, in the year under review it exceeded £1,100. The objection to gold, which at one time was hardly ever in circulation amongst the natives, seems to have entirely disappeared.

The following statement shows the amount of gold, silver, and bronze coinage imported during the past two years:—

—	Gold.			Silver.			Bronze.			Total.		
	£	s.	d.	£	s.	d.	£	s.	d.	£	s.	d.
1907	29,256	0	0	406,636	4	0	1,100	0	2	436,992	4	2
1908	6,421	0	0	153,738	1	0	630	0	0	160,789	1	0

The Bank of British West Africa, Limited, is the only commercial bank established in the Colony and its dependencies, and has branches at Accra, Cape Coast, Sekondi, Axim, Coomassie, and Tarkwa.

Municipal Bodies.

Municipalities have been established in the towns of Accra, Cape Coast, and Sekondi, under the provisions of the Town Councils Ordinance of 1894. These bodies consist of eight members, of whom four are official, nominated by the Government, and four are representatives elected by the ratepayers. In the absence of any election, by failure of the voters to nominate, the Governor has power to name four members to represent the ratepayers.

The following statement shows the revenue and expenditure of the Town Councils for the past five years:—

—	Revenue.					Expenditure.				
	1904.	1905.	1906.	1907.	1908.	1904.	1905.	1906.	1907.	1908.
	£	£	£	£	£	£	£	£	£	£
Accra	5,339	5,151	5,075	5,589	5,740	5,751	4,852	4,819	4,647	5,966‡
Sekondi*	—	2,100	2,848	2,911	3,283	—	1,562	2,742	2,592	4,680
Cape Coast†	—	—	2,060	2,284	2,381	—	—	1,207	2,627	2,586

* Not established till 1905.
† Not established till 1906.
‡ £847 of this is special expenditure on account of plague which will be refunded by the Colonial Government.

There is no municipal debt.

II.—TRADE, AGRICULTURE, AND INDUSTRIES.

In the year under review the value of the total trade of the Colony was £4,554,617, as against £5,012,438 in 1907, or a decrease of £457,821. The head "Specie" accounts for nearly half of this decrease, viz.:—£211,432—being the difference between the totals of specie imported and exported combined, which were £564,637 and £353,205 for 1907 and 1908 respectively.

The following table gives the values of imports (exclusive of expenses on specie) exports, and total trade for the past five years:—

Year.	Imports.	Exports.	Total Trade.
	£	£	£
1904	2,001,857	1,340,026	3,341,883
1905	1,486,068	1,646,145	3,132,213
1906	2,058,939	1,996,412	4,055,351
1907	2,366,195	2,641,674	5,007,869
1908	2,029,447	2,525,170	4,554,617

Although there has been a decrease of £457,821 as compared with the record year, 1907, the value of the total trade is £499,266 in excess of that for 1906.

As will be seen from the above table the value of imports in 1908, inclusive of expenses on specie, was less by £334,094 than that in 1907.

	£
The value of imports paying specific duties was	430,645
The value of imports paying *ad valorem* duties was	1,041,650
The value of imports free of duty was	559,806
	£2,032,101

These values include freight and other charges.

(i.) The total quantity of spirits of all kinds imported during the year was	Gallons. 1,254,120
	£
(ii.) The total declared value was	138,571
(iii.) The amount of revenue derived from spirits was	332,043
(iv.) The duty chargeable on spirits was	West of the River Volta, January to July 5*s.* per gallon, August to December 5*s.* 6*d.* per gallon. East of the Volta 3*s.* 7½*d.* per gallon.

The following statement gives under each of the above heads the figures for the previous five years:—

WEST OF THE VOLTA.

Year.	Quantity.	Value.	Amount of Revenue derived from Spirits.	Rate per Gallon.
	Gallons.	£ s. d.	£ s. d.	s. d.

* Exclusive of expenses on specie.

The chief items showing an increase are:—

	£
Beads	9,808
Flour	8,814
Oil (kerosine)	5,458
Provisions	11,893
Rice	13,699
Spirits (rum)	8,916

The most marked decreases are:—

	£
Coopers' stores	10,515
Cotton goods	94,590
Lumber	13,671
Machinery	12,720
Silk goods	7,721
Coal	4,500
Perfumery	4,235
Spirits (gin)	4,051
Building materials	4,261

The import trade was seriously affected by the outbreak of plague at Accra and the imposition of quarantine measures consequent thereon. Cargoes were in some cases over carried, or landed at ports other than those to which consigned, involving costly delay and loss of markets. Ships omitted occasionally to call at some ports, notably Accra. Other causes which contributed to a diminished importation were the large stocks of cotton goods and lumber on hand from 1907 prices. The coal imported was also of lower value than in 1907, prices having fallen. Taken

altogether, however, the value of imports in 1908 compares very favourably with a prosperous year like 1907, when prices for produce were exceptionally good.

The total value of exports in 1908 was £2,525,170 10*s.* 11*d.*, a decrease of only £116,503 5*s.* compared with 1907, which is chiefly accounted for by the low prices obtaining in the European and local markets, a contributory cause being the quarantine restrictions.

The following table shows the quantities and values of the principal articles of export compared with those of 1907:—

Following the method adopted in previous report, the value of the exports of gold and specie will here be deducted from the total value of exports for the purpose of showing the value of the principal agricultural and economic products The comparative return below shows a decrease of £168,542, of which £64,771 is due to the larger export of specie in 1908:—

1907.	Amount.	1908.	Amount.
	£		£
Total Exports	2,641,674	Total Exports ...	2,525,171
£		£	
Gold ... 1,164,676		Gold ... 1,151,171	
Specie ... 127,645		Specie ... 192,416	
	1,292,321		1,344,360
Total other Exports ...	1,349,353	Total other Exports...	1,180,811

The increase in the exportation of 7,589,510 lbs. of cocoa valued at £25,732 is most satisfactory, taking into account the quarantine restrictions in the busiest season and the fall in the market prices.

It is satisfactory to note that, whereas in 1907 there was a decrease of £5,540 in the exportation of palm oil as compared with 1906, there was in 1908 an increase of £10,067 over that in the preceding year, notwithstanding the lower market price.

There was a decrease of £11,152 in the value of the native timber exported, although the quantity shows an increase of 481,615 feet. The price of mahogany fell during 1908.

Palm kernels showed a decrease of £24,001, and rubber of £164,976, attributable in each case to the very considerable fall in market price especially during the early part of the year. In addition, the diminished export of palm kernels is partly to be accounted for by the increased attention to, and extension of, the cultivation of cocoa.

The principal ports in the Colony are:—

Port.	Value of Imports, 1908.	Value of Exports, 1908.	Total Trade.
	£	£	£
Sekondi	740,007	1,381,413	2,121,420
Accra	459,853	415,308	875,161
Addah	199,165	217,204	416,369
Axim	182,167	184,995	367,162
Cape Coast	114,811	66,677	181,488
Kwitta...	87,805	45,863	133,668
Saltpond	57,854	65,527	123,381
Winneba	64,568	55,706	120,274

Sekondi owes its position as the most important port to the fact that it is the terminus of the Sekondi-Coomassie Railway, which connects the Coast both with the mining districts and with Ashanti. Accra, the second in importance, is the headquarters of the Government and the principal port of shipment for cocoa.

The amount of gold obtained during the year under review was 281,275·206 fine ounces of an estimated value of £1,194,743 2*s*. 7*d*.; being an increase of 7,359·028 fine ounces of an estimated value of £31,226 6*s*. 10*d*. over that of the preceding year.

Of this total output, the mines in the Colony contributed 218,767·570 fine ounces and those in Ashanti 62,489·636.

The appended table shows the value of gold exported by the various mining companies during the past five years:—

Name of Company.	1904.	1905.	1906.	1907.	1908.

The following table shows the total value of the yearly output of gold for the past five years:—

Year.	Value. £
1904	378,480
1905	653,820
1906	892,291
1907	1,163,516
1908	1,194,743

The gold obtained by dredging in the Gold Coast Colony and Ashanti amounted to 13,342·761 fine ounces, of an estimated value of £56,690 10*s*. 7*d*., as compared with 13,364·885 fine ounces, of an estimated value of £56,774 0*s*. 4*d*., in 1907.

The various companies working on the Tarkwa conglomerate reef crushed 239,982 short tons for a recovery of 125,328·336 fine ounces of gold, being an extraction of 10·44 dwts. per short ton.

The companies working on quartz reefs crushed 290,775 short tons with a recovery of 142,586·109 fine ounces, or an average of 9·78 dwts. per ton of 2,000 lbs.

In dredging operations 11 dredgers were employed in digging 2,275,343 cubic yards of alluvial, with a recovery of 13,342·761 fine ounces of gold, of an estimated value of £56,690 10*s*. 7*d*., equivalent to an extraction of 2·81 grains per cubic yard treated.

The Prestea, Block A, Limited, have nearly completed the erection of an additional 10 heads of stamps, and have put Wilfley tables in the present mill.

The Broomassie Mines, Limited, are erecting a Brückner roaster for treatment of concentrates, and also further tables for the concentration of slimes and tailings.

The Ashanti Goldfields Corporation, Limited, are making extensive additions to their present plant.

The following Companies have stopped work on their concessions:—

The Axim Mines, Limited.

The Attasi Mines (1905) and Railway Company, Limited.

The Imbatiem Goldfields, Limited.

Labour.—The average number of persons employed by the mining and dredging companies throughout the year was 15,796, as compared with 15,277 employed in 1907.

The labourers from the Northern Territories who arrived on the mines in 1907 were paid off in June. The experiment of introducing this labour was, for the most part, satisfactory, and the mining companies should be able to obtain a considerable amount of labour from this source.

Sanitation and Health.—The mining companies continue to improve their camps by clearing bush and planting grass, a policy which has resulted in a further improvement in the health of their employés.

Fourteen certificates of validity were granted by the Supreme Courts of the Colony during the year, and two by the Court of the Chief Commissioner of Ashanti. Four certificates of validity were cancelled.

In the sense in which the word is usually understood in European countries there can hardly be said to be any manufactures in the Gold Coast Colony or Ashanti. The only ones which approach this sense are a cement, brick, and tile factory, and an aerated water factory at Cape Coast. A certain amount of cotton cloth of good quality is woven by primitive methods in the Colony, Ashanti, and Northern Territories, and baskets, pots, fishing nets, canoes, and various household utensils are made by the natives for their own use.

The fisheries of the Coast employ a number of natives and over 5,000 canoes, but no means exist of ascertaining the quantity or value of the takes. Many excellent fish, such as the barracouta, the bonitta, grouper, mullet, shynose, snapper, turtle, crabs, crayfish, &c., are caught and form one of the principal articles of food in the Coast towns. There is also a considerable industry in dried fish, large quantities of which are taken into the interior. The Sekondi-Coomassie Railway has given a considerable stimulus to this trade. No fishing ever takes place on a Tuesday, however favourable the climatic conditions, the day being sacred to the fetish of the sea, and devoted to the overhauling and repairing of nets.

AGRICULTURE.

The Agricultural Department during the early part of the year was understaffed and, consequently, working under considerable difficulties. The appointment of the Director of Agriculture in the latter half of the year released other officers, and a fair amount

of ground was covered by the travelling instructors, both European and native, whose duty it is to teach the native producers the more scientific methods of cultivation and preparation of economic products.

Mr. H. N. Thompson, Conservator of Forests for Southern Nigeria, whose services were placed at the disposal of the Government of the Gold Coast, made an extended tour of the Colony and its dependencies, and provision for the establishment of a Forestry Department in 1909 has been made in the estimates.

The weight of cocoa exported rose from 20,956,400 lbs. in 1907 to 28,545,910 lbs.; but though this increase in quantity exceeds 36 per cent., the increase in value on last year's figures is only 5 per cent. This is due to the fact that the prices in the home market, owing to various causes, were abnormally high during the former year.

The production of cocoa is almost entirely in the hands of native farmers, and it is therefore impossible to frame an estimate of the area of land under cultivation. It is grown chiefly in the forest belt of the Eastern Province, but is spreading rapidly over the Central Province, as the increased exports from the port of Winneba prove, and, since the establishment of the Agricultural Station at Tarkwa, it has been introduced with some success into the Western Province. It is also grown in south-eastern Ashanti.

During the year 12,357 seedlings and a number of pods for seeding purposes were distributed from the various agricultural stations.

The quantity of rubber exported fell from 3,549,548 lbs. in 1907 to 1,773,248 lbs. Although the distribution of seeds and seedlings in recent years tends to show that the more systematic cultivation of this product is receiving attention by the natives, it must be borne in mind that the trees at present yielding are uncultivated and that the low prices ruling in England for the raw product, by prohibiting the possibility of profit to the casual collector, curtailed activity in the industry. There is no evidence to show that the decrease was due to any failure of the supply.

During the year 8,686 Para seedling and 228,020 Para seeds were distributed from the various centres in addition to 20,000 seedlings and 1,745,000 seeds of *Funtumia elastica*.

The quantity and value of kola, which grows most plentifully in the forests of Ashanti and Akim, have steadily increased in the last six years, and the output in 1908 surpassed all previous records. It is exported chiefly by Mohammedans to Southern Nigeria for conveyance to the upper reaches of the Niger. European planters have now commenced to cultivate it, and the Agricultural Department has established plantations at Aburi and Tarkwa.

Oil palm products, which were formerly the principal economic articles of export from the Colony, have had to yield place to cocoa, where the return is greater in proportion to the labour expended. The exports of palm oil show an increased value of £10,067 and of palm kernels a decrease of £24,001. Experiments are being made in order to determine the comparative utility of the several varieties of the oil-producing palm.

The Government of the Gold Coast participated in the Franco-British Exhibition held in London during the year, and a comprehensive collection of timbers and agricultural products was displayed. The Colony was also represented at the International Rubber and Allied Trades Exhibition in September. The fourth Agricultural Show held in the Colony took place at Coomassie in November. Special arrangements were made for the visit of chiefs from the Northern Territories, and it is hoped that the effects of the exhibition may be as far-reaching as its details were successful.

LANDS.

The bulk of land in the Colony belongs to the tribal "stools," and theoretically there is no land without an owner. The ascertainment of the exact boundaries of tribal lands is, however, often a matter of considerable difficulty, as towns and villages have sprung up with large tracts of intervening unoccupied land, sometimes dense forest, which is gradually brought under cultivation from either end. Now that the value of land is appreciated, boundary disputes frequently come before the Supreme Court, and in certain parts of the Colony, especially in the mining district of Wassaw, the limits of the lands adjoining tribal stools have been definitely prescribed.

The general principle laid down by judicial decisions is that all land within the recognised territory of a "stool" is the property of that stool. Thus, in the case of every headchief's division, where there are tribal and family stools in subordination to the headchief's stool, all lands within the recognised boundaries of the family or subordinate tribe are held to be attached to the family or tribal stool, but all other unoccupied lands are the property of the headchief's stool. An attempt was recently made in the courts to extend this principle so as to enable the headchief's stool to claim all cultivated land the original title to which, as is not uncommon in the case of lands under native tenure, is lost in obscurity; but, though no limit of prescription is laid down by native law, the local Court of Appeal held that in the case of long occupation and when there has been cultivation of permanent crops, such as sugar cane and cocoa, as opposed to the usual shifting cultivation of yams, plantains, and similar food products, the presumption is that the occupation was with the consent of the headchief's stool.

The Crown possesses no waste lands in the Colony, but certain lands have been acquired by the Government from time to time, mostly under the provisions of the Public Lands Ordinance, 1876, which legalises compulsory acquisition for the service of the Colony on payment of reasonable compensation.

Of recent years deeds have come into common use, especially in land transactions between natives and Europeans. Where these deeds relate to grants of rights of mining, felling timber, and collecting rubber and other products of the soil, they are called concessions, and their validity is inquired into by the Supreme Court, under the provisions of the Concessions Ordinance, 1900. The Court inquires whether the grantors are the

native owners of the land, whether the area falls within the prescribed limit of five square miles for a mining concession, and 20 square miles for other concessions, whether the prescribed term of 99 years is exceeded, whether the consideration is adequate, and whether the statutory rights reserved to the natives are included in the deed. A survey and demarcation of boundaries by the Mines Survey Department is ordered, and when this is completed a certificate of validity, giving the lessee an indefeasible title, subject to observance of his covenants, is issued by the Court, in which are contained such modifications of the deed as the Court may impose to bring it within statutory requirements, and to render it a transaction fair and equitable to both parties. The rent from certified concessions is paid to the native grantors through the Government. Concessions granted solely for purposes of plantation of rubber and other products may be exempted from the operation of the Ordinance; whilst concessions to acquire mineral oil are held subject to the Government right of preemption of the oil under Ordinance No. 15 of 1907.

SHIPPING.

The following are the comparative statements of the number and tonnage of vessels which entered and cleared at the ports of the Colony during the past five years:—

Mail steamers of the African Steamship Company and the British and African Steam Navigation Company, Limited, both of which are under the management of Messrs. Elder, Dempster and Company, leave Liverpool every Saturday for Axim,

Sekondi, Cape Coast, and Accra, the scheduled time of the voyage being 15 days.

The same lines provide three services of cargo boats from Liverpool, viz., the Brass and Benin Service which leaves every alternate Wednesday and calls at Axim, Sekondi, Cape Coast, Accra, Addah, and Saltpond, and at Adjuah, Saltpond, and Dixcove every alternate boat; the Opobo and New Calabar Service which leaves on the other alternate Wednesdays and calls at the same ports except Addah, and at Axim, Sekondi, Chama, and Elmina every alternate boat; and the Windward Service, which leaves Liverpool every third Thursday and calls at all Gold Coast ports. These boats take from 32 to 34 days to Accra. These lines also run these services from Hamburg and one from London every third Thursday.

An express to the South Coast runs every month from Liverpool (on Thursdays) direct to Loanda, only stopping at Accra on the Gold Coast.

Homewards the mail service leaves Accra every Monday, and is due to arrive at Plymouth in 16 days. The cargo services also touch on the homeward voyage at the outward ports of call.

The present rates of fares by these lines are £28 12*s*. first-class and £20 7*s*. for all ports as far as Winneba, and £29 14*s*. and £21 9*s*. respectively for Accra and ports to the eastward.

The Woermann Line runs a mail steamer monthly from Hamburg, which is scheduled to leave Dover on the 11th of every month with passengers and mails for Sekondi and Accra, the duration of the voyage being 15 days. These boats also call homewards at the same ports, and leave Accra on the 14th of every month for Southampton. The passenger fares are the same as the Elder, Dempster steamers. Cargo services of the Woermann Line, Hamburg-America Line, and Hamburg-Bremen-Africa Line leave Hamburg for Gold Coast on the 3rd, 16th, and 28th of the month. Steamers belonging to the Compagnie Belge Maritime du Congo are scheduled to leave Antwerp every third Thursday, calling the following day at Southampton for mails and passengers for Axim, Sekondi, Cape Coast, and Accra, at which last-named port they are due to arrive 13 days after leaving Southampton. They do not, however, call on the Coast on the homeward voyage.

III.—LEGISLATION.

Gold Coast Colony.

During the year under review nine Ordinances were passed by the Legislative Council.

The Infectious Diseases Ordinance, as amended by the Infectious Diseases (Amendment) Ordinance, was passed in conse-

quence of an outbreak of plague in 1908. It empowers the Governor in Council to declare

(1) any infectious or contagious disease to be within the provisions of the Ordinance;

(2) any place or town an infected area;

(3) any infected area to be evacuated.

It empowers a Medical Officer to order

(1) a post mortem examination where an infectious disease is expected.

(2) a mark of identification to be placed on infected buildings.

(3) the disinfection or destruction of the same.

(4) the destruction of animals suspected of transmitting an infectious disease.

(5) The removal or isolation of infected persons or persons suspected to be infected.

The Ordinance further provides for the appointment of Compensation Boards for dealing with all claims which may arise under the Ordinance and for the Governor in Council making rules for carrying into effect the provisions of the Ordinance.

Ashanti.

Four Ordinances were enacted by the Governor.

The Ashanti Native Customs Ordinance prohibits certain kinds of fetish worship and empowers the Chief Commissioner to make rules for suppressing or regulating certain native customs.

Northern Territories.

Five Ordinances were enacted by the Governor.

The Northern Territories Native Customs Ordinance prohibits certain kinds of fetish worship and empowers the Chief Commissioner to make rules for suppressing or regulating certain native customs.

IV.—EDUCATION.

There are seven Government primary schools in the Colony and 145 primary schools on the assisted list, which are conducted by the various missionary societies, and are eligible for grants-in-aid on condition that the school has assembled at least 300 times during the year, with an average daily attendance of not less than 20 pupils.

The following comparative table shows that the number of Government and assisted primary schools maintained in the

Colony during 1908 exceeds by four the number maintained during 1907:—

Denomination.	1907.	1908.	Increase or Decrease.
Basel Mission	61	60	−1
Wesleyan Mission	48	49	+1
Roman Catholic Mission	18	19	+1
Bremen Mission...	10	11	+1
Government	7	7	No change.
Muhammadan	1	1	No change.
African M.E. Zionist	1	1	No change.
Church of England S.P.G.	2	4	+2
Totals	148	152	+4

One hundred and forty-five of the 152 schools on the list for inspection succeeded in earning grants-in-aid.

The following table shows the total number of pupils on the rolls of primary and secondary schools under the Board of Education, the average attendance, and the amount of grants earned during the years 1907 and 1908:—

Year.	Number on Roll.	Average Attendance.	Grants Earned.
			£ s. d
1907	14,333	10,805	5,560 11 1
1908	14,889	11,020	5,920 16 0
Increase or decrease	+ 556	+ 215	+ 360 4 11

There has been an increase in the total number of pupils on the roll, and an improvement in the percentage of the average attendance.

In addition to the schools on the assisted list there are in the Colony and Ashanti 218 primary schools belonging to the following denominations:—

Basel Mission	109
Wesleyan Mission	90
Roman Catholic	3
Bremen Mission	7
Baptist	1
Church of England	2
African M.E. Zionist	3
Various	3

The number of pupils attending these schools in 1908 was 4,559, making, with the Government and assisted schools, a grand total of 19,448 pupils on the nominal rolls.

During the year there were two examinations of candidates for appointment to junior clerkships in the Government service.

The total income of the assisted schools amounted to £11,200 8*s.* 7*d.*, an increase of nearly £300 as compared with the income for 1907. The amount is chiefly made up of the following items:—

	£	*s.*	*d.*
Government grants	5,920	16	0
Voluntary contributions and grants from the various missions	3,605	2	4
School fees	1,042	15	3

The average annual payment for pupils in the primary schools amounted to 1*s.* 10¾*d.*, a decrease of 4¼*d.* in the previous year.

Reference was made in last year's report to the difficulty experienced by the Education Department on account of the lack of qualified teachers. It is hoped that this difficulty will be removed on the completion of the Training Institute for Teachers at Accra, which is now in course of construction.

No endeavours are spared to teach the rising generation their privileges and duties as citizens of the British Empire, and, in conformity with the movement started by the League of the Empire, lectures, accompanied by magic lantern slides, are given in all districts of the Colony. On Victoria Day, the 24th May, celebrations were held by the majority of the schools in the Colony, lectures on the Empire were given by the head teachers, patriotic songs were sung and the flag was saluted, whilst in many places the anniversary was commemorated by the planting of a tree. Every assisted school in the Colony has been provided with a Union Jack.

There are only five schools in the Colony which profess to give a higher education than that obtainable at the primary schools, viz., the Accra "Grammar School," the Accra "Collegiate School," the "Mfantsipim School," Cape Coast, the Cape Coast Wesleyan "Collegiate Girls' School," and the Accra Wesleyan Girls' School. The total nominal roll of the five schools is 477, the Accra Collegiate School heading the list with a total of 178 on the roll.

Twenty-three teachers and students completed two courses of agricultural instruction, and 16 were successful in obtaining certificates.

The Director of Education reports that these courses of agricultural instruction are now more successful than heretofore, and that the results are plainly visible in those school gardens to which teachers with agricultural certificates have been appointed. Unfortunately a fairly large proportion of the teachers who obtain these certificates are employed in schools in the coast towns where there is but little scope for their agricultural training to be put to any practical use.

At present certain schools are giving industrial instruction, some with considerable success. In addition to schools mentioned in previous reports as giving instruction in carpentry, printing, bookbinding, net weaving, &c., carpenters' shops have been established in the Wesleyan Schools at Tarkwa, Aburi, Accra, and in the Roman Catholic School at Axim, and fairly good work is

being done. The building of the Government technical and industrial school at Accra, referred to in last year's report, is approaching completion.

The report of the Committee appointed in 1907 to inquire into the desirability of adding some form of hand and eye training to the compulsory subjects was published. It strongly advocates this change, and the local Board of Education having adopted its principle has reserved further discussion on the detailed amendments suggested.

V.—GOVERNMENT INSTITUTIONS.

There is a well-equipped hospital in Accra with three European and four native wards, there being seven beds for Europeans and 25 for native patients. A European nursing sister is attached to this hospital, at which 614 cases of various kinds were treated during the year. There is also a contagious diseases hospital at headquarters. At Cape Coast the hospital is a spacious building, situated on Connor's Hill, overlooking the sea. The accommodation for Europeans consists of three first class wards containing in all six beds, and two second class wards containing together seven beds; that for natives, of four wards, with a total number of 19 beds, in addition to two wards for contagious diseases. The number of cases treated was 250.

Sekondi Hospital, situated on a hill near the town, contains three classes of accommodation for Europeans. There are in all six European wards, including two for convalescents, with a total of 16 beds. For native patients four wards are provided holding 22 beds. Nursing sisters are also attached to this hospital, where 452 cases were treated.

Smaller hospitals also exist at Elmina, Kwitta, Axim, and Addah, and dispensaries at certain other out-stations.

In Ashanti there is at Coomassie a commodious native hospital with three wards, a main ward containing 36 beds, a female ward with four beds, and another small ward with four beds. Five thousand three hundred and twenty-eight cases were treated in this hospital, where the existing accommodation is adequate only as far as male patients are concerned, and will shortly be increased by the addition of a larger female ward and an operating theatre. A new consulting room has been built. There is also a European hospital of four wards, each with two beds, to which a nursing sister was attached in the latter part of the year.

In the Northern Territories accommodation for the treatment of sick natives is being gradually provided, and with the development of the country, further improvements will be effected as requirements are recognised.

There is only one lunatic asylum in the Colony, situated at Accra. During the year under review 16 male and 9 female

inmates were admitted, as compared with 29 and 3 respectively in 1907, but the number of discharges, viz., 6 males and 1 female, compares very favourably with the figures for 1907, when only 1 male and 2 females were discharged. The daily average of inmates was 61, of whom about three-fifths are classified as maniacal and dangerous.

The building occupied as an asylum in 1907 is now converted to other uses, and a new and more commodious structure has been erected on one of the best sites near Accra. This consists of two large airing yards, one for males and the other for females, each of which is flanked by cells and dormitories, and contains a large open shed for shelter and recreation. There are also hospital accommodation, large tanks, and the usual accessories, besides quarters for the staff, all of which have been built in concrete. The buildings generally are cool and well ventilated, and the dormitories, each of which contains separate latrine accommodation, are spacious and lofty. It will be interesting to note whether the improvement in the surroundings will produce any marked effect in the recovery of the patients.

There are no poor-houses or reformatories. As has been stated in previous reports, pauperism, in the strict sense of the word, is, thanks to the obligations entailed by the family system, unknown in the Colony.

There is again a steady increase in the transactions of the Savings Bank, which is under the control of the Postmaster-General.

During 1908 the total deposits were 4,018, amounting to £16,607 10*s.* 2*d.*, as compared with £12,787 14*s.* 6*d.* the previous year, an increase of £3,819 15*s.* 8*d.*

There were 1,817 withdrawals during the year, amounting to £11,678 12*s.* 10*d.*, as against £10,618 17*s.* 8*d.* the previous year, an increase of £1,059 15*s.* 2*d.*

In the amount of £11,678 12*s.* 10*d.* withdrawn from the bank, is included the sum of £1,154 10*s.* 10*d.* transferred to the United Kingdom Savings Bank at the request of various depositors, and the sum of £7 7*s.* was transferred from the United Kingdom to this Colony.

On the 31st of December, 1908, the bank had to its credit the sum of £20,676 6*s.* 4*d.*, as compared with £15,341 7*s.* 8*d.* the previous year, an increase of over 34 per cent.

The total number of accounts remaining open on the 31st of December was 1,747, as against 1,279 the previous year, an increase of 36 per cent.

There is every indication that as the bank becomes more widely known among the natives they will make use of it to a much larger extent than they have in the past.

VI.—JUDICIAL STATISTICS.

The strength of the police of all ranks on the 31st of December was 699, or 25 below the authorised establishment. On the corresponding date in the previous year the deficiency was 37. From the 1st of January the authorised strength of the General Police was increased by 48 men of various ranks; the Railway Police and 10 constables; and the recruits were reduced from 40 to 25; the nett increase was therefore 43.

The distribution on the 31st of December was: General Police, 469; Escort Police, 149; Mines Police, 37; and Railway Police, 44; total, 699. All ranks are included in these figures.

The Mines Police has not as yet been recruited up to the sanctioned establishment, only such numbers being employed as the requirements of the mines demand.

During the year 298 recruits were enlisted as against 213 in the previous year. This is due to the increase of the establishment. The majority of these recruits were trained at Accra, and a small percentage at Sekondi and Cape Coast. In nearly every case, recruits for the General Police were selected from Coast tribes; for the Escort Police by selecting recruits of Hausa and Northern Territories tribes and ex-soldiers of good character. The percentage of educated recruits was small.

The strength of the detective branch, all ranks, on the 31st of December was 13. The superintendents and constables of this branch have continued to do good work, and in many cases have displayed a good deal of intelligence.

During the outbreak of plague the duties of the police were very onerous. They supplied the men for the land cordon round Accra, and performed many other duties, including a system of marking all canoes along the coast between Little Nungo and the Sekum River, with a view to preventing the plague being carried by sea to other villages. It is satisfactory to note that there was not a single case of plague among them. There is no doubt that there has been a still further improvement in the force, due, in a great measure, to the increase of European supervision.

Accra, Cape Coast, Elmina, and Sekondi are the central gaols of the Colony. There are other minor gaols where prisoners under sentence of six months or less are confined, viz., Axim, Sekondi (Fort Orange), Tarkwa, Saltpond, Winneba, Akuse, Addah, and Kwitta in the Colony, and Coomassie and Obuassi in Ashanti. At Coomassie prisoners undergoing sentences up to three years are kept. The number of prisoners committed during the year was 4,822, as compared with 5,055 in 1907, showing a decrease of 233. The total daily average of prisoners in the Colony and Ashanti was 885, being an increase of 94 over that of the previous year.

Still further progress has taken place under prison industries and labour. The earnings during the year show a total of

£2,693 11*s.* 4*d.*, as against £2,080 10*s.* 4*d.* the previous year, an increase of £613 1*s.*, which must in every way be considered most satisfactory. In 1904 the earnings were only £413. The gross estimated value of prison labour in the Colony and Ashanti was £8,060 18*s.* 2*d.*, as compared with £6,856 5*s.* in 1907, an increase of £1,204 13*s.* 2*d.* The principal prison industries consist of carpentry, boot and shoe-making, masonry, tailoring, smithy, coopering, basket and mat-making; all these industries have been carried out in a satisfactory manner.

The returns of crime in the Colony, Ashanti, and the Northern Territories show that 8,342, 2,080, and 410 cases respectively were dealt with, as against 8,382, 2,097, and 397 respectively in 1907, a decrease of 44. The number of convictions obtained was 6,258, 1,836, and 390 respectively, as against 6,325, 1,771, and 387 in 1907, or an increase of one.

In the Colony there has been a decrease in the total number of convictions of 67 as compared with 1907. The decrease in the "convictions for offences against the person" is 78. In Ashanti and the Northern Territories the figures show increases of 84 and 3 respectively. In taking the figures for Ashanti and the Northern Territories into consideration, it must be borne in mind that the increase of the administrative staff has greatly improved the facilities for bringing offenders to justice.

In the Colony, where serious offences are tried by a judge with a jury or assessors, the number of convictions and acquittals in the Superior Courts in 1907 and 1908 was as follows:—

	1907	1908
Convictions for offences against the person	45	40
Convictions for offences against property (other than prædial larceny)	28	39
Convictions for other offences	41	7
Acquittals	77	142
Totals	191	228

In the Inferior Courts, where the trial is summary, the comparative figures are:—

	1907	1908
Convictions for offences against the person	743	670
Convictions for slave-dealing	16	41
Convictions for offences against property (other than prædial larceny)	975	1,018
Convictions for other offences	4,477	4,443
Acquittals	1,980	1,942
Totals	8,191	8,114
Grand Total for the Colony	8,382	8,342

In Ashanti, where all trial is summary, the following are the returns:—

In the Superior Courts.

	1907.	1908.
Convictions for offences against the person	20	62
Convictions for offences against property (other than prædial larceny)	13	
Convictions for other offences	8	
Acquittals	10	19
Totals	51	81

In the Inferior Courts.

	1907.	1908.
Convictions for offences against the person	315	1,774
Convictions for slave-dealing	1	
Convictions for offences against property (other than prædial larceny)	226	
Convictions for other offences	1,188	
Acquittals	316	225
Totals	2,046	1,999
Grand Total for Ashanti	2,097	2,080

In the Northern Territories trial is also summary and the figures are as follows:—

In the Superior Courts.

	1907.	1908.
Convictions for offences against the person	9	4
Convictions for slave-dealing	4	—
Convictions for offencs against property (other than prædial larceny)	29	1
Convictions for other offences	52	1
Acquittals	5	—
Totals	99	6

In the Inferior Courts.

	1907.	1908.
Convictions for offences against the person	86	69
Convictions for slave-dealing	6	3
Convictions for offences against property (other than prædial larceny)	69	91
Convictions for other offences	132	221
Acquittals	5	20
Totals	298	404
Grand Total for the Northern Territories	397	410

VII.—VITAL STATISTICS.

There is no compulsory registration of births and deaths in the Colony and its dependencies, and the census return in 1901, which estimated the total population of the Gold Coast Colony, Ashanti, and the Northern Territories at 1,696,965, is probably at least a million under the mark. The collection of statistics of this nature is viewed with great suspicion by the uneducated native population, and the information given is, as a rule, wholly unreliable.

The European population is shown as 1,768, there being a decrease in number of 109 resident Europeans. The analysis of mortality and invaliding statistics shows an increase amongst Government officials and missionaries, and a decrease in the employees of mercantile and mining companies during the year under review. From the similar statistics for the seven preceding years it will be seen that whereas the numerical strength of Government officials shows a steady yearly increase and that of missionaries a more or less regular one, those of the mercantile and mining communities are liable to fluctuate. Prior to 1902 the figures are less reliable.

As before stated, in the 1907 Report, accurate statistics as regards the natives are not available.

The health of European residents was not as good as in the previous year, there being an increased death and invaliding rate with a decreased population. The highest death-rate was amongst the missionaries. For purposes of comparison, the mortality and invaliding statistics of 1908 have been added to those of the four preceding years.

There were no deaths from malaria amongst officials, but there was a slight increase in the invaliding from this reason in 1908. On the other hand, malaria accounted for a slight increase in the total number of deaths and caused nearly double the number of invalidings which occurred in 1907.

Statistics of mortality and invaliding among Europeans, 1908:—

How employed.	Number.	Deaths.	Invalided.	Death-rate per 1,000.	Invaliding rate per 1,000.
Officials	413	6	29	14·52	70·21

Missions	86	1	—	11·62	—
Total	1,877	25	95	13·31	50·61

The causes of invaliding in 1908 among officials were:—Malarial fevers, 7; anæmia, 5; blackwater fever, 4; dysentery, 2; various, 12. Among non-officials:—Malaria, 32; blackwater, 20; debility, 7; phthisis, 5; dysentery, 3; tuberculosis and neurasthenia, 2 each; various, 25.

The causes of death among officials were:—Blackwater, 3; various 3. Among non-officials:—Blackwater, 11; malaria, 7; various 6.

As stated above, accurate statistics as regards natives are not as yet available. It is therefore not possible to form other than a general idea based on the data obtainable, and as compared with 1907 these would indicate that the health of the native community had suffered considerably and that the death-rate was high.

Towards the end of the year small-pox broke out in Ashanti and from the various reports received the epidemic would appear to have been characterised by a high case mortality.

The plague epidemic which occurred early in the year at Accra, and which spread from there to other towns on or near the coast-line, accounted for a mortality of 288 of the total number of cases officially recorded, 336. In this connection there is a point of interest in the following mortality table. It will be seen that whereas the number of deaths, *vide* the hospital records, is very great, those obtained from the Registrar of *burial permits* for only *six towns in the Colony* is considerably less than in any preceding year since 1902, even with the addition of 157, the number of bodies buried under special plague precautions by the medical authorities. Deducting the plague figures the hospital records would show a general mortality of 212, just double that of 1907.

Native mortality as shown by—

	Hospital Records for Gold Coast, Ashanti and Northern Territories.	Burial Permit Records for Accra, Adda, Cape Coast, Elmina, Sekondi and Saltpond.
1902	156	1,781
1903	164	1,718
1904	135	1,405
1905	168	1,712
1906	126	1,361
1907	113	1,517
1908	554	1,159
Total ...	1,416	10,653

At Boso in the Volta River district an outbreak of pneumonia in epidemic form occurred and led to many deaths; the circumstances were so suspicuous that a Medical Officer was sent to investigate. Such outbreaks of pneumonia have been recorded previously.

It is probable that very varied and frequent infection with intestinal worms occurs. The occurrence of ankylostomiasis has been previously recorded. Dr. Fisch, a Medical Missionary at Aburi, records a very high percentage of *Ankylostome Necator Americanus* in his patients and a relatively high percentages of cases of uncinariasis. Ascaris infection, as in previous years, proved high in rate.

Guinea worm as usual proved a scourge, but it is hoped in the near future to reduce the incidence of the disease in many places.

Tuberclosis: this disease is more common than is suspected.

Cerebro-spinal meningitis was not prevalent in the Northern Territories as on previous years. Measures were taken in the North-Western Province to erect numerous isolated huts in villages through which caravans travelled in order to secure the segregation of any case of this disease occurring.

The sanitary condition of the Colony was the subject of much consideration. Professor Simpson gave this matter every attention during his stay on the coast. It has not yet been practicable

to pronounce as to the recommendations made nor to formulate measures to make them effective.

A scheme was submitted to improve the existing native sanitary staff, and every effort is being made to increase supervision over this branch and to secure more efficient work. Rules were drawn up to deal with villages under the Native Jurisdiction Ordinance.

A memorandum has been distributed giving the lines on which inspections at out-stations should be carried out by Medical Officers, and the co-operation of the District Commissioners has been enlisted to secure the full benefit of recommendations made in the interest of public health.

Special rules for building and town regulation were framed for Ashanti.

In the case of Accra, special measures were taken with regard to congested areas and insanitary buildings in which cases of plague occurred. The evacuated portion of the town was first dealt with. The work of the Public Health Committee was discontinued on the cessation of the plague, and the Accra Improvement Committee was appointed to complete the general scheme.

Coomassie.—The condition of this town remained satisfactory; it is quite an example to other towns.

Northern Territories.—As usual there was much good and useful work done in stations throughout this Protectorate.

Meteorological Observations, 1908.

Tamale	145·13	14·18	92·93	69·14	24·06	81·13	39·30	29·59

VIII.—POSTAL, TELEGRAPH, AND TELEPHONE SERVICES.

The revenue of the department for the year amounted to £27,457 17*s.* 1*d.* as against £27,032 10*s.* 9*d.* for the previous year. The department also collected £6,608 13*s.* 3*d.* on behalf of the African Direct Telegraph Company and foreign administrations on account of telegrams despatched from the various offices in the Colony, and £4,057 18*s.* 8*d.* in respect of Customs Duty on parcels.

The sale of stamps for 1907 and 1908, respectively, amounted to:—

	1907.			1908.		
	£	*s.*	*d.*	£	*s.*	*d.*
(*a*) Postage stamps for Postal, Revenue, and Judicial purposes ...	20,876	2	7	20,196	10	0
(*b*) Postage Stamps for Telegraphic purposes	12,697	7	11	12,875	7	2

The expenditure amounted to £24,489 16*s.* 9*d.* as against £27,970 2*s.* 5*d.* in 1907. In 1908, £1,669 12*s.* 4*d.* was expended on the construction of new telegraph lines, whereas in 1907 the expenditure on this service was £5,245 13*s.* 7*d.*

The total number of ordinary letters, postcards, newspapers, and book packets which passed through the post in 1908 is estimated to have been 3,983,802 as compared with 3,094,000 in the previous year.

The number of registered and insured articles despatched was 192,633 and the number received 113,757, the figures for 1907 being respectively 162,933 and 107,195.

The total number of United Kingdom, German, and Inter-Colonial parcels dealt with was 43,535—3,983 despatched and 39,552 received—the contents being of a declared value of over £46,576. The number dealt with in the previous year was 42,240.

The total value of money orders issued was £47,193 5*s.* 4*d.* as compared with £47,257 11*s.* 6*d.*, the previous year.

The total value of postal orders issued was £73,370 9*s.* 2*d.* as compared with £63,787 10*s.* 6*d.* in 1907, an increase of over 15 per cent. The number of postal orders issued during the year was 110,128 as compared with 95,677 the previous year.

At the end of 1908, 47 telegraph offices were open to the public in the Colony, Ashanti, and the Northern Territories, with a total length of 1,348 miles—68 miles more than the previous year.

The total number of telegrams dealt with was 272,694 as compared with 245,190 in 1907. 84,037 were official telegrams as against 66,030 in the previous year.

During the year the telegraph system was extended from N'Koranza to Sunyani, in Ashanti, a distance of about 68 miles, at an expenditure of £1,771 12*s.*

Local telephone services exist at Accra, Sekondi, Cape Coast, and Tarkwa, and are extensively used by the public, as is shown by the fact that out of 98 connections at the four exchanges, no less than 45 are those of unofficial subscribers.

Preventive Services.

The Eastern and Western Frontier Preventive Services, which are branches of the Customs Department, are stationed on the River Volta on the eastern frontier of the Colony, and on the River Tano on the western. Their duties are analogous to those of the coastguard of the United Kingdom.

The authorised establishment consists of three inspectors and six supervisors (who are seconded from the Customs Department), and 488 Preventive men and canoemen. The total cost of maintenance in 1908 was £16,564 2*s.* 1*d.*

IX.—ASHANTI.

The total revenue collected in Ashanti during 1908 was £27,908 17s. 6d., as against £37,248 18s. 4d. in 1907, a decrease of £9,340 0*s.* 10*d.* The two chief causes of this decrease are the abolition of caravan tolls (£4,681), and the fact that the receipts from mining royalties (£5,187) did not realise expectations.

The financial position of Ashanti is not altogether satisfactory, and the decline in its revenue and trade during the year under review is disappointing.

Further improvement is reported to have taken place in the social conditions of the Ashantis, and the gradual reformation of the Courts of the Native Chiefs is a matter for congratulation.

The most important event of the year was the successful Agricultural Show held in December at Coomassie, where a large concourse of people assembled with exhibits from the Colony, Ashanti, and the Northern Territories. This bringing together of various tribes, separated by considerable distances and by diversity of tongues, should disseminate a knowledge of the requirements of European markets, and exercise a civilising influence in the outlying portions of Ashanti and the Northern Territories.

The principal exports of Ashanti, exclusive of gold, are rubber, cocoa, kola nuts, and gum copal. Owing to poor prices, to an epidemic of small-pox, and, perhaps, to the exhaustion of a number of trees, the amount of rubber exported during the years showed a decrease of 586 tons, as compared with 1907. Seven hundred and fifty-one tons of cocoa were exported, as against 557 in 1907. The bulk of kola nuts are exported to the North-East and West by native traders, and it is therefore difficult to estimate the quantity exported by head loads. The railway carried 539 tons during the year. A total of 125 tons of gum copal was exported, as against 100 tons in 1907.

X.—NORTHERN TERRITORIES.

The good relations with neighbouring foreign dependencies have been maintained during the year under review, and in several instances fugitive offenders have been brought to justice by the mutual co-operation of the Administrations concerned.

The removal of the headquarters of the Protectorate from Gambaga to a more central situation at Tamale was successfully undertaken during the year. Telegraphic communication has been established between Accra and Tamale, and the line is now being extended to Gambaga.

The policy of governing the natives through their hereditary chiefs has been maintained and extended, and though many of these chiefs are weak and incapable of any sustained effort, the moral and executive support of the Government should gradually increase their influence and administrative ability.

The abolition of the caravan tolls in the month of September is mainly responsible for a decrease of £7,061 7*s.* 6*d.* in the revenue of the Protectorate during the year under review. In the current year the estimated revenue is only £1,400, as against an estimated expenditure of £72,423.

A Government Primary School was opened at Tamale early in 1909, when 42 pupils were enrolled. A number of intelligent boys selected from various tribes in the Protectorate have been sent to the Cape Coast Government School for preliminary instruction; they will be transferred to the new Technical School at Accra as soon as that institution is ready to receive them.

A main trunk road for vehicular traffic from Coomassie to Tamale is being constructed under the supervision of a field officer of the Royal Engineers and a staff of assistants.

XI.—RAILWAYS AND ROADS.

The total capital expenditure upon the Sekondi-Coomassie Railway to the 31st of December, 1908, stands at £1,836,915 9*s.* 7*d.*, which sum includes the cost of all permanent improvements, additional plant, machinery, and rolling stock provided from time to time since the opening of the line.

Loans of £1,035,000 and £63,000 towards the construction of this railway have been raised at 3 per cent., their extinction being provided for by a sinking fund of 1 per cent. chargeable to the general revenue of the Colony. £43,161 16*s.* 6*d.* stood to the credit of the fund on the 31st December, 1908. A further loan of £867,000 for the construction and equipment of the line was authorised by Ordinance No. 4 of 1908.

The gross revenue for the year amounted to £154,024 11*s.* 2*d.*, a decrease of £14,834 as compared with 1907. This decrease is attributable mainly to a falling off in the goods traffic. The

further reductions in the tariff, which came into force on the 1st August, 1908, have also contributed in no small degree to the disappointing results of the year's work.

The total receipts per mile open were £901, and per train mile £1 4*s.* 3*d.*; as against £990 and £1 3*s.* 3*d.* in 1907.

The nett revenue (total revenue less recurrent expenditure) earned during the year under review was £76,299, which is equal to 4·15 per cent. upon the total capital account as it stood on the 31st December, 1908.

The total recurrent expenditure was £75,124, as against £76,776 the previous year, and £9,902 less than the estimate. Compared with the actual recurrent expenditure in 1907 there was a nett saving of £1,652.

The total estimate of working charges in 1908 was £85,027, and the substantial reduction of £9,902 above referred to is distributed *pro rata* over every branch of the Department as follows:—

—	Estimate.	Actual Expenditure.	Saving.
	£	£	£
Maintenance of Way and Works... ...	33,252	29,381	3,871
Locomotive Expenses	28,670	25,430	3,240
Traffic Expenses	9,945	9,141	804
General Charges	13,160	11,171	1,989

The percentage of total recurrent expenditure to revenue was 49·61. Adding the extraordinary expenditure chargeable to capital, the grand total of expenditure for the year works out at £77,625, compared with £92,272 in 1907, or 51·26 per cent. of the total revenue brought to account.

The working expenditure per mile open was £447, and per train mile 11*s.* 1½*d.*

The general financial position of the railway and the working results to the 3st December, 1908, are as detailed below:—

Total capital Expenditure ...	£1,836,915 0*s.* 0*d.*
Total revenue earned in 1908 ...	154,024 0 0
Total working expenditure in 1908	75,124 0 0
Extraordinary expenditure chargeable to capital ...	2,501 0 0
Proportion of working expenditure to revenue	49·61 per cent.
Proportion of total expenditure (working and extraordinary) to revenue	51·26 ,,
Nett revenue earned	£76,299 0*s.* 0*d.*
Interest upon capital expenditure	4·15 per cent.
Revenue per mile open ...	£901 0*s.* 0*d.*

Expenditure per mile open ...	£447 0*s.* 0*d.*
Total train mileage, exclusive of banking and shunting ...	125,278 miles.
Earnings per train mile ...	£1 4*s.* 3*d.*
Expenditure per train mile ...	0 11 1½
Nett earnings per mile open ...	454 0 0
Nett earnings per train mile ...	0 12 2
Number of passengers carried (public traffic)	104,393
Number of passengers carried (Government)	5,248
Gross tonnage of goods and minerals	46,190 tons.
Average fare per passenger carried	£0 5*s.* 1½*d.*
Average earnings per goods ton mile (public traffic) ...	0 0 11¼
Average cost per goods ton mile (public traffic)	0 0 5½
Proportion of goods receipts total revenue	78·40 per cent.
Proportion of coaching receipts total revenue	21·43 ,,
Proportion of down to up traffic (goods) tonnage	34·90 ,,
Proportion of down to up traffic (goods) receipts	20·62 ,,

The total amount paid in claims, &c., for goods lost, delayed, and damaged amounted to the sum of £25 9*s.* 10*d.*, compared with £122 5*s.* 3*d.* during the previous year.

The total number of accidents of all kinds during the year under review was 292, as against 319 in 1907. They are classified as follows:—

	1907.	1908.
Engine failures	20	3
Derailments of all kinds	59	39
Fallen trees, &c.	195	230
Trolley accidents	10	4
Miscellaneous	23	11
Personal	12	5
	319	292

Of the five accidents of a personal character that occurred during the year, three were fatal, one victim being a man employed in the Maintenance Branch, while the other two were natives walking along the line. The verdict in each case acquitted the railway of any negligence. No accident of any description occurred to passengers.

A revised goods tariff and regulations were brought into operation on the 1st of August, 1908. Following upon the numerous

and substantial reductions sanctioned in 1906 and 1907, the undermentioned comprise the principal further concessions which have lately been given to the mines and general public:—

Cylinder and engine oil	From Class 2 to 3
Assay plant	,, ,, 2 to 3
Cordage and rope	,, ,, 2 to 3
Chains, bolts, and nuts	,, ,, 2 to 3
Sets and lining for shaft-sinking ...	,, ,, 3 to 4
Sulphuric acid	,, ,, 1 to 2
Beef, pork, and herrings	,, ,, 2 to 3
Hides and skins	,, ,, 3 to 4
Empty bags	,, ,, 3 to 5
Gum copal	,, ,, 4 to 5
Galvanized iron, soap, rice, corned beef, herrings, sardines, and salmon ...	Special rates to Dunkwa and Ashanti stations.

A variety of minor concessions and adjustments have also been made during the year. New passenger tariff and regulations are now under consideration.

The reductions which have been made in the tariff for the carriage of mining material and general merchandise during the past three years have so far proved disappointing, inasmuch as there has been a marked shrinkage in the tonnage handled, instead of that development usually looked for under the stimulus of more favourable rates.

Active work of a preliminary nature upon the construction of the Tarkwa-Prestea Branch (20 miles) was commenced in April. The advance survey party arrived in the Colony on the 11th of that month and immediately took the field. The Resident Engineer landed a few weeks later, and up to the close of the year rapid progress was made. All things being favourable, the line to Prestea should be opened to public traffic by March, 1910. A branch to Broomassie will be constructed concurrently with the rest of the railway.

The construction of the railway from Accra to Mangoase (about 40 miles) has been given out to a firm of contractors. The first sod of this important undertaking was cut by His Excellency Sir John Rodger, K.C.M.G., on the 7th January, 1909, with becoming ceremony. Some rapid work has already been done on this line and there is every probability of the provisional terminus (Mangoase) being reached in about 12 months.

The financial year 1908 has been distinctly unfavourable as affecting the working results of the railway. The mining industry has been especially quiescent; it is satisfactory to note, however, that quite recently a strong current of renewed activity and confidence has set in.

The general re-organization of the Department, which was commenced in 1906, has been actively pursued and results of a permanent and satisfactory character have been realized. Measures aiming at the gradual reduction of the European establishment and the wider employment and instruction of the natives of the Colony have been continued in the administrative scheme.

By the system in force, the construction and maintenance in the Gold Coast Colony of roads for vehicular traffic and cask-rolling devolves for the most part on the Public Works Department. The total length thus maintained is about 200 miles, and the roads are in a fair condition.

The principal of these roads are:—

(*a.*) The road from Accra to Dodowa, on which the traffic is very heavy in the cocoa season. The length of this is about 27 miles, and it is suitable for motor traffic, for vehicles with a gross weight not exceeding six tons.

(*b.*) The road from Accra to Aburi, about 25 miles in length, is identical with the Dodowa road for the first 13 miles. It is used by motor lorries as far as Ayimensa, at the foot of the range of the Akwapim hills.

(*c.*) The road from Accra to Kyebi viâ Inswam was constructed by the Gold Fields of Eastern Akim and finally taken over by the Government in the year 1904.

The first section of 23 miles to Inswam on the River Densu is in fair order and suitable for motor cars and light motor lorries. The remaining portion from Inswam to Kyebi is much overgrown.

(*d.*) The road from Winneba to Soadru, which is about 15 miles long, is of rising importance in connection with the steadily increasing cultivation and export of cocoa in the Winneba District.

The road is under process of construction for the accommodation of light motor lorries.

(*e.*) The Saltpond-Insuaim road, which is 58 miles in length, is under process of construction for the accommodation of light motor lorries from Saltpond to Anyanmem, a distance of 9½ miles. It is proposed to extend this road, which is an important trade route.

(*f.*) The road from Cape Coast to Prasu is the old trade and military road to Coomassie and the north. Its importance has greatly decreased since the construction of the Sekondi-Coomassie railroad.

The district through which this road runs is rich in palm trees and plantations of cocoa are increasing. The road from Cape Coast to Asebo, nearly 10 miles in length, is under process of construction for the accommodation of light motor lorries.

In addition to the roads constructed and maintained by the Public Works Department, some 1,800 miles of native paths and tracks are kept clear by the chiefs, under the provisions of the Roads Ordinance, 1894, in return for a quarterly payment per mile, which varies from 5*s.* to £1, according to the nature of the road and its state of repair.

XII.—MISCELLANEOUS.

Immigration and Emigration.

There is no means of keeping any particulars of the immigration of foreigners in general; but with regard to the immigration of natives of Sierra Leone and its hinterland to Sekondi, a record has been made by the Transport Department of 180 new arrivals during 1908. Allowing for those who landed, but, finding no work immediately by the Transport Department, went away on their own account, possibly a total of 240 new men arrived. It is estimated, however, that some 3,500 labourers enter the Colony annually for employment in the mines, or as carriers, labourers for public and private works, or scavengers.

Imported labourers, who come chiefly from the Kru Coast (Liberia), Sierra Leone, and Lagos, are usually engaged in gangs under a headman for six or twelve months under the "Master and Servant Ordinance, 1893," under a contract duly executed before a District Commissioner, which provides for the rate of pay and other conditions of service, and for repatriation at the expiration of the period of employment.

In the strict sense of the word there is little or no emigration, but a considerable number of the natives of the Colony obtain temporary employment further down the Coast as carpenters, coopers, masons, blacksmiths, washermen, and domestic servants, and in clerical positions, official and mercantile.

Public Works.

A large programme was undertaken by the Public Works Department and fair progress made with the majority of the items. The outbreak of plague in Accra early in the year necessitated the building of isolation camps and temporary shelters for the natives removed from the infected or evacuated areas. Insanitary houses in the congested areas were demolished and plans have been prepared by the Accra Improvement Committee for the construction of streets and open spaces in these areas and through the town generally.

A sanitary engineer with experience in the Isthmus of Panama has been specially engaged to undertake the works in connection with the improvement of Accra.

The following are the more important items carried out during the year:—

The drains in the native town at Tarkwa were extended. A bungalow has been erected to provide quarters for two officers.

The Court House and Judges' quarters at Sekondi, commenced in 1908, were nearly completed, and a Court House for the District Commissioner has been built.

A main concrete drain was constructed along the railway from Essikadoes village into No. 1 Lagoon, and many mosquito breeding pools removed in consequence.

Quarters for the District Commissioner have been erected at Dunkwa.

Considerable progress was made with the new scholastic buildings at Accra.

A Training College and Technical School have been commenced, and will be occupied before the close of the present year. Quarters for three officers in connection with these institutes were completed, and a bungalow for the schoolmistress was built.

The establishment of the headquarters at Akuse was continued, and a Court House, Police Barracks, and two bungalows were nearly completed.

Barracks to accommodate one superintendent and fifty constables have been completed at Coomassie.

The substitution of permanent buildings for temporary buildings in the lines of the Gold Coast Regiment was continued.

The construction of the headquarter buildings at Tamale was continued. The Chief Commissioner's bungalow was practically completed, and other buildings are in progress.

A Caillet's monorail was laid round the rapids at Krachi, and has been completed this year. It is proving a great benefit to the salt traders, who are now enabled to transport their salt without employing labour, as previously, from the adjoining Protectorate of Togo.

At Sekondi, borings were taken round the periphery of the reservoir site recommended by Messrs. Middleton, Hunter, and Duff, consulting engineers, to test the ground for water tightness. At Accra borings were taken to obtain data for the construction of the dam across the Densu, near Oblogo. The working drawings are being prepared by the consulting engineers.

Satisfactory progress continued to be made with Accra Harbour works during the year. Nine hundred and fifty blocks and 2,974 bags were set in the breakwater. The retaining wall and parapet were completed. A large quantity of stone was quarried and broken. In August, owing to heavy surf, the third portion of the Rockbreaker broke away when it was being towed ashore, and the boiler and five cases of fittings were washed off its deck and lost.

The breakwater has now been completed as originally designed, and the jetty is under construction.

In 1908 a Survey Department was formed to replace "Mines Surveys," the staff consisting of a Director, Chief Surveyor, one surveyor, and one native surveyor, two assistant native surveyors, a draughtsman, and a clerk.

The original programme for the year's work was completely upset by the outbreak of plague, and the main feature of the survey operations was a detailed survey of Accra on a scale of 1 : 1250, or 104·16 feet to an inch. Some idea of the magnitude of this task may be obtained when it is realised that some 5,000 buildings and huts were measured. A 1 : 5000 plan in two sheets, showing all the ground within the municipal boundaries, was also commenced, and is about half finished. The survey

of five concessions was undertaken and completed. A line was also cut across the Ebotokroo Concession, and the south-east boundary of the South-east Concession, which had become practically obliterated, was recut.

In the course of the year a new scale of charges for surveying concessions was drawn up, and came into operation in 1909. The main features are: the abolition of the tie-on fee, a graduated scale according to the distance of the concession from the nearest fixed point being instituted, and a general lowering of the charges for all kinds of work with the exceptions of those for river concessions, which remain unaltered.

The production of the 1 : 125,000 map of the Colony was completed in August.

Changes in Establishment.

During the absence on leave of the Governor, Sir John Rodger, Major Herbert Bryan, C.M.G., Colonial Secretary, administered the Government from the 1st January to the 27th March. Mr. Algernon Willoughby Osborne, Attorney-General, was appointed Chief Justice of Southern Nigeria on the 4th of July. Mr. Justice Arthur Reginald Pennington, Puisne Judge, was appointed Attorney-General of Southern Nigeria in October, and Mr. Arthur Hudson arrived in the Colony and assumed duty as Attorney-General on the 15th of October, *vice* Mr. Willoughby Osborne. Mr. Frederic Harrison Gough, Solicitor-General, was appointed a Puisne Judge of the Colony on the 7th of November, *vice* Mr. Justice Pennington.

Transport.

A total of 28,328 loads were handled by the Transport Department during the year, and 1,289 carriers were sent out on long engagements. This number included the carriers with officers travelling; in previous years the loads belonging to officers passing through, which were handled by the Department, were not reckoned. For comparing 1908 with 1907, therefore, the number is assumed to have been the same, and the figures for the two years are as follows:—

	1907.	1908.
Loads	24,978 ...	28,328
Long-service carriers engaged	741 ...	1,289

The mails from Coomassie to the north, numbering 335 bags, were carried by the Transport Department.

Transport beyond Coomassie is maintained by 14 gangs of carriers of 25 each, who are on a year's engagement.

In order to insure the safety of loads committed to their care, the permanent carriers of the department, whose wages are 25*s*. a month and threepence a day for subsistence, are only paid at the expiration of twelve months' service. They receive subsistence money during their period of service and advances of 10*s*.

or £1 at a time, amounting to about £3 in all. When a man has a sum of money to his credit he becomes trustworthy, and it is by the adoption of this principle that the number of loads lost has not averaged one a year.

A further insurance of loads and a guarantee for good behaviour is deposit in the savings bank. The books of 160 carriers, with average deposits of about £10 each, are kept in the Sekondi Office.

There was no difficulty in getting carriers during 1908.

The following tables give some idea of the work done by the Transport Department during the year:—

Sekondi Headquarters

Loads despatched by railway	7,181
Loads despatched by carriers	50
Loads despatched by sea	501
Loads delivered locally	85
Loads moved, belonging to officers passing through (estimated)	2,400
Carriers with officers travelling	1,261
Carriers engaged on contract for Government ...	888
Carriers engaged on contract for companies, &c. ...	334

Staff:

Transport Officer.
5 clerks.

Coomassie.

Loads despatched by railway	539
Loads despatched by carriers to the Northern Territories	3,549
Loads despatched by carriers to places in Ashanti ...	1,670
Loads distributed in Coomassie	4,391
Loads moved, belonging to officers passing through (estimated)	2,500
Bags of mails sent up country	335
Carriers with officers to the Northern Territories ...	1,058
Carriers with officers and troops in Ashanti ...	1,308
Carriers subsisted with Experimental Column, Gold Coast Regiment	1,500
Carriers engaged on contract for Government ...	17
Carriers engaged on contract for companies	50

Staff:

1 assistant transport officer.
2 clerks.

Enlisted carriers in charge of A.T.O. Coomassie.
- 1 overseer.
- 7 headmen and 168 carriers for Northern Territories transport.
- 7 headmen and 168 carriers for Ashanti transport.

Suitability of Climate for Europeans, and Opening for White Labour.

Europeans of temperate habits and sound constitution, who take suitable exercise, generally suffer little from climatic causes, provided that their residence in this portion of West Africa is not unduly prolonged.

As has been stated in previous reports, Europeans should on no account come to the Gold Coast for the purpose of seeking employment. Government subordinate officials and the employees of the mercantile firms and mining companies are engaged in England under agreement and opportunities of securing appointments locally are few and far between.

Generally the rates of wages are high, but the cost of living, both for Europeans and natives, has increased during recent years. This is specially the case in the Western Province, in which the principal gold mines are situated. In the hinterland food is plentiful and cheap.

The wages of domestic servants vary from £1 to £2 10*s*. and of cooks from £2 to £4 per month. Servants of the coolie class can be obtained at a wage of £1 to £1 10*s*. Carriers earn 1*s*. a day and are given 3*d*. a day to buy food. Contract labourers and carriers are paid 25*s*. a month; these also receive 3*d*. a day subsistence money.

Native carpenters, cabinet-makers, masons, and smiths command ready employment and earn good wages at rates from 1*s*. 6*d*. to 3*s*. a day.

Native Affairs.

During the year under review, a certain number of local disputes engaged the attention of the Executive, but none were of any importance. Three chiefs were destooled during the year.

A feature of the year was the introduction and suppression of a fetish custom known as "Aberewa." This cult spread with remarkable rapidity through those portions of Ashanti and the Colony where the Akan language is spoken and, in varying degrees, the whole of this area came under its influence. There was abundant proof that its observance tended towards the commission of crime and, accordingly, it was suppressed by Order in Council, dated the 17th July, 1908.

Various Observations.

The outbreak of plague in January was a grave event in the history of the Colony, and the drastic measures necessarily taken for the suppression of the disease re-acted unfavourably on commerce. Notwithstanding the disability and the low prices prevalent in European markets the trade statistics for the year are generally saisfactory. The demands from natives of all classes for information with regard to the cultivation and preparation of economic products afford welcome evidence that the indigenous population is alive to the fact that the continued prosperity of the Colony depends mainly on its great agricultural resources.

The able, comprehensive report furnished by Mr. H. M. Thompson at the conclusion of his prolonged tour of inspection, shows that the Gold Coast possesses most valuable assets in the forests of the Colony and Ashanti; measures to secure the preservation of these forests and their development on scientific lines are under consideration. The services of Mr. Thompson were kindly lent by the Government of Southern Nigeria.

The material progress of the Colony was marked by the advancement of the undermentioned Public Works:—

Accra Harbour Works.
Sekondi Harbour Works.
Tarkwa-Prestea-Broomassie Branch Railway.
Accra-Mangoase Railway.

The schemes for the Accra and Sekondi Waterworks have been sanctioned by the Secretary of State and the detailed plans for their construction are being prepared by the Consulting Engineers.

C. RIBY WILLIAMS,

Acting Colonial Secretary.

25th July, 1909.

APPENDIX.

WORK CONDUCTED AT THE IMPERIAL INSTITUTE DURING THE YEAR 1908 FOR THE GOLD COAST COLONY.

SCIENTIFIC AND TECHNICAL DEPARTMENT.

Reports from the Imperial Institute have been made to the Government of the Gold Coast on the following subjects:—

Rubber.—Several specimens of *Funtumia* and *Landolphia* rubbers were investigated during 1908. A sample of *Funtumia elastica* rubber from Ashanti which had been coagulated by an infusion of the leaves of *Bauhinia reticulata* was found to be of good quality, and was valued at 2*s.* 8*d.* to 2*s.* 10*d.* per lb., with fine hard Para at 3*s.* 5½*d.* per lb. Three other specimens of *Funtumia* rubber from Ashanti, prepared by "creaming" the latex, were found to be very satisfactory in composition, but the cakes were too thick and contained considerable moisture, so that the value of the rubber was reduced. They were considered to be worth 2*s.* 7*d.* to 2*s.* 10*d.* per lb., with fine hard Para at 4*s.* 6*d.* per lb. Another specimen of *Funtumia* rubber, also from Ashanti, prepared in biscuits by the spontaneous coagulation of the latex, was inferior in composition to the preceding specimens, but of much better appearance; it was valued at 3*s.* 6*d.* to 3*s.* 8*d.* per lb., with fine hard Para at 4*s.* 6*d.* per lb.

A specimen of "Pempeneh" rubber obtained from *Landolphia owariensis* in the Northern Territories, proved to be of excellent quality and was valued at 3*s.* to 3*s.* 3*d.* per lb., with fine hard Para at 3*s.* 5½*d.* per lb.

Two samples of *Ficus* rubber and several specimens of latex from the Axim district were examined. The *Ficus* rubber contained a high percentage (22 to 27) of resin, and would therefore be of low value. Samples of latex derived

Ordnance Survey Office, Southampton, 1909.

from *Funtumia africana*, *Landolphia* sp., *Tabernaemontana* sp., and *Anthnostema* sp., yielded products still more resinous and of no commercial value, but a *Landolphia* latex probably from *L. owariensis* gave a rubber of good quality.

Gums.—Specimens of gums derived from *Acacia sieberiana*, *Burkea africana*, and *Pseudocedrela Kotschyi* were found to be of marketable quality, the first-mentioned being the most promising. It was requested that if these gums are readily obtainable in large quantities further samples should be supplied so that their commercial value can be definitely ascertained. The gum of *Combretum undulatum* was dark-coloured and insoluble and would not be saleable.

Copal.—A sample of copal resin from Ashanti, obtained by the Inspector of Agriculture for West Africa, was examined and found to be similar to the Accra copal of commerce, the price of which ranges from 34*s.* 6*d.* to 72*s.* per cwt. The Ashanti resin would probably realise the highest price if it were cleaned and the dirty pieces picked out.

Two other samples of copal resin were submitted for examination. One specimen was of poor quality, whereas the other proved to be a very good copal which would meet with a ready sale.

Cotton.—Thirteen samples of unginned cotton comprising American, native, and hybrid varieties were examined and found to be of marketable quality. Certain of the samples were valued at 6*d.* to 7*d.* per lb., with "middling" American at 6·7*d.* per lb.

Tanning Materials.—A sample of divi-divi pods, though containing less tannin than the ordinary divi-divi of commerce, furnished a soft, pale-brown leather of good texture and appearance. The pods were valued at £5 per ton, with West Indian and South American divi-divi at £9 to £11 per ton.

Citronella oil.—A small sample of this oil was found to be of fair quality, and probably equal in value to ordinary citronella oil.

Beeswax.—A sample of beeswax proved to be of fair average quality and probably worth about £6 15*s.* per cwt., or rather more if carefully melted and strained. There is always a ready market for beeswax of good quality in the United Kingdom.

Exhibition Galleries.

A number of specimens were lent from the Gold Coast Court at the Imperial Institute for inclusion in the Colony's exhibit at the Franco-British Exhibition in London. At the close of the Exhibition the whole of the Gold Coast exhibits were transferred to the Imperial Institute for addition to the Court, which, when the necessary re-arrangements now in progress have been made, will be much more representative of the resources of the Colony. A new and improved statistical board giving particulars of the trade, &c., of the Gold Coast has been added.

COLONIAL REPORTS.

The following recent reports relating to His Majesty's Colonial Possessions have been issued, and may be obtained from the sources indicated on the title page :—

GOLD COAST.

(For Report for 1908, *see* No. 613.)

THE GOVERNOR TO THE SECRETARY OF STATE.

Government House,
Accra,
19th July, 1910.

MY LORD,

I HAVE the honour to transmit, herewith, two copies of the Annual Blue Book of this Colony for the year 1909, together with an able report thereon prepared by the Colonial Secretary.

I have, &c.,
JOHN RODGER,
Governor.

The Right Honourable
The Earl of Crewe, K.G.,
&c., &c., &c.

(17609—2.) Wt. 27349—387. 1125 & 85. 10/10. D & S. A 2

REPORT ON THE BLUE BOOK OF THE GOLD COAST COLONY FOR THE YEAR 1909.

I.—FINANCIAL.

The financial progress made by the Colony in recent years was well maintained in 1909. The estimated revenue was placed at £766,000, but the amount actually realized was £768,341, which, with the further sum of £10,211, being the value of Public Works Materials and Stores on the 1st January, 1909 (treated as Extraordinary Revenue) amounted to £778,552.

On the 31st December, 1908, assets exceeded liabilities by £542,721, and on the 31st December, 1909, by £586,906—an increase of £44,185.

The amounts collected under the several heads of revenue in the Colony, Ashanti and the Northern Territories are shown in the following statement:—

Heads of Revenue.	Actual Revenue to 31st December, 1909.			Revenue for the same period during preceding year.			Increase.			Decrease.		
	£	s.	d.	£	s.	d.	£	s.	d.	£	s.	d.
1. Customs	458,721	10	8	489,985	18	11	—			31,264	8	3
2. Light Dues... ...	2,373	8	0	2,301	10	0	71	18	0	—		
3. Licences, &c. ...	28,842	6	7	27,416	14	9	1,425	11	10	—		
4. Fees of Court, &c....	47,005	17	1	30,809	0	1	16,196	17	0	—		
5. Railways	181,905	11	2	150,504	16	6	31,400	14	8	—		
6. Post and Telegraphs	4,425	0	4	4,049	15	8	375	4	8	—		
7. Rent of Government Land.	1,400	9	1	1,506	3	7	—			105	14	6
8. Interest	1,946	5	10	492	5	11	1,453	19	11	—		
9. Ashanti	29,263	13	2	27,908	17	6	1,354	15	8	—		
10. Northern Territories	1,689	10	1	10,938	12	9	—			9,249	2	8
11. Miscellaneous ..	10,713	5	0	6,227	15	8	4,485	9	4	—		
Total	768,286	17	0	752,141	11	4	56,764	11	1	40,619	5	5
Land Sales ...	53	14	0	—			53	14	0	—		
Revenue Extraordinary.	10,211	8	10	—			10,211	8	10	—		
Grand Total ...	778,551	19	10	752,141	11	4	67,029	13	11	40,619	5	5

The principal increases over the revenue originally estimated were on the following heads:—

	£	s.	d.
Licences	4,012	6	7
Fees of Court or Office, &c.	15,415	17	1
Railways	11,905	11	2

The increase under "Licences" is due to Spirit Licences, the receipts from this source having steadily increased during recent years. In 1908 the amount collected came to £20,830, and in 1909 to £22,047.

The increase under the head "Fees of Court" is mainly attributable to Stamp Duties, the amount thus realised exceeding the

original estimate by £13,451. The sub-head "Survey Fees" may be credited with most of the balance, considerably more work having been undertaken.

The increase under "Railways" is mainly due to the heavy mines traffic, general imports, and to the conveyance of greater quantities of such native produce as cocoa, rubber, and kola.

The principal heads which show less receipts than were estimated are:—

	£	s.	d.
Customs	15,278	9	4
Interest	7,453	14	2
Ashanti	1,141	6	10
Miscellaneous	5,611	15	0

The decrease under "Customs" is attributable to a general clearance from bond, in December, 1908, of an abnormal quantity of spirits owing to an "intelligent anticipation" of an increase in the tariff. The receipts in 1908 from specific duties amounted to £402,859, and it is estimated that about £20,000 of this sum would, in the ordinary course, have been included in the receipts of 1909.

The decrease under "Interest" is accounted for by the fact that Surplus Funds were used to supplement Loan Funds and were, therefore, not available for investment. The loan floated in 1909 was for £1,030,000, instead of £1,610,000 as originally anticipated.

Under "Ashanti," a decrease occurs in "Spirit Licences" which, although producing a greater revenue (£4,705) than in 1908 (£4,460), failed to realise the estimate of £6,000.

The decrease under "Miscellaneous" may be put down to the failure to realize the estimate for Royalties in respect of some of the mines.

The appended table shows the expenditure, in detail, as compared with the year 1908.

Head of Expenditure.	Expenditure, 1908.			Expenditure, 1909.			Increase.			Decrease.

	Total	687,292 3 8	734,367 5 9	81,047 9 6	33,972 7 5

The estimated expenditure for the year under review was £982,202, the actual expenditure being £734,367, or £247,835 under the Estimates.

The excesses on the estimates are mainly under the heads of "Customs," £1,285, due principally to rebates of duty granted on goods conveyed across the river Volta; also to increased boat services and contracts rendered necessary by the activity of trade; "Transport and Travelling," £3,227, attributable to the increased number of passages provided for officers to and from the Colony and to payments to the Railway on account of fares and freight. The excess under "Miscellaneous," £4,432, is caused in part by the payment, in 1909, of outstanding claims in respect of the outbreak of bubonic plague; and in part by expenditure incurred in connection with preventive measures against sleeping-sickness. The sum of £1,559 was expended during the year in respect of the Accra-Akwapim Railway Extension Survey.

The following is a comparative statement of the total revenue and expenditure for the past five years :—

Revenue.			Expenditure.		
Year.	Amount.	Remarks.	Year.	Amount.	Remarks.
	£ s. d.			£ s. d.	
1905	586,221 8 1	Includes £13,759 Imperial Grant-in-aid of Northern Territories.	1905	616,118 11 2	Includes £4,106 on account of Ashanti disturbances, and £20,000 repayment of loans.
1906	683,101 16 3	Includes £10,000 Imperial Grant-in-aid of Northern Territories.	1906	628,906 3 0	Includes £224 on account of Ashanti disturbances and £26,599 repayment of loans.
1907	708,718 9 6	Includes £5,000 Imperial Grant-in-aid of Northern Territories.	1907	617,124 8 6	Includes £5 on account of Ashanti disturbances, and £15,000 repayment of loans.
1908	752,141 11 4	—	1908	687,292 3 8	Includes £20,000 repayment of loans.
1909	778,551 19 10	—	1909	734,367 5 9	Includes £25,000 repayment of loans.

The steady growth in the revenue has by no means been confined to one or two sources, but is generally distributed save under the heads "Ashanti" and "Northern Territories," where the abolition of caravan tolls reduced the local receipts.

The following is a detailed statement of the Assets and Liabilities of the Colony on the 31st December, 1909 :—

				£670,398	10	3

The excess of assets over liabilities on the 1st January, 1909, stood at £542,721. At the close of the year the excess amounted to £586,906, an increase during the year of £44,185.

The excess of assets is explained as follows:—

	£	s.	d.
Excess on 31st December, 1908	542,721	4	0
The Revenue of 1909 was	778,551	19	10
	1,321,273	3	10
The expenditure in 1909 amounted to ...	734,367	5	9
leaving an excess on 31st December, 1909, of	£586,905	18	1

The surplus is accounted for as under:—

Assets.

	£	s.	d.

Surplus				£586,905	18	1

Public Debt.

On the 31st December, 1908, the Public Debt of the Colony was £2,207,163 13*s.* 6*d.* On the 31st December, 1909, it amounted to £2,663,498 7*s.* 11*d.*, or an increase of £456,334 14*s.* 5*d.*

The amount standing to the credit of the Sinking Fund for the redemption of the Funded Debt, on the 31st December, 1909, stood at £56,492 7*s.* 7*d.* Of this sum, £13,330 was credited during the year as a contribution from General Revenue and in respect of interest accruing to investments.

The following statement shows, in detail, the particulars of the Public Debt:—

Funded Debt.

	£	s.	d.	£	s.	d.
(i.) 3 per cent. Inscribed Stock issued in March, 1902	1,035,000	0	0

Total Public Debt				£2,663,498	7	11

CURRENCY.

The currency and legal tender is British sterling, with the addition of the undermentioned French, Spanish, and American gold coins, the values of which are fixed by the Demonetization Ordinance, No. 2 of 1880:—

	Nominal Value.	Legal Value. £	s.	d.
French—				
Napoleon	20 francs ...		15	10
Spanish—				
Doubloon	16 dollars ...	3	4	0
Half Doubloon	8 ,, ...	1	12	0
American—				
Double Eagle	20 ,, ...	4	2	0
Eagle	10 ,, ...	2	1	0
Half Eagle	5 ,, ...	1	0	6
Quarter Eagle	2 ,, 50 c..		10	3

British silver coins are legal tender to an unlimited amount; British bronze coins to an amount not exceeding one shilling. There is a small circulation of the United States half-dollar, but the coin is not legal tender, and is not accepted by the Government; its current value is two shillings.

Copper coins are now generally used in the Colony and Ashanti and have, to a great extent, superseded cowries.

The following statement shows the amount of gold, silver, and bronze coinage imported during the past two years:—

Year.	Gold.			Silver.			Bronze.			Total.		
	£	s.	d.	£	s.	d.	£	s.	d.	£	s.	d.
1908	6,421	0	0	153,738	1	0	630	0	0	160,789	1	0
1909	28,869	0	0	359,537	15	9	810	9	3	389,217	5	0

Banks.

The Bank of British West Africa, Limited, is the only commercial bank established in the Colony and its dependencies, and has branches at Accra, Cape Coast, Seccondee, Axim, Coomassie, and Tarquah.

Municipal Bodies.

Municipalities have been established in the towns of Accra, Cape Coast, and Seccondee, under the provisions of the Town Councils Ordinance of 1894. These bodies consist of eight members, of whom four are official, nominated by the Governor, and four representatives, elected by the ratepayers. The Governor has power to nominate four members to represent the ratepayers if there is no election through the failure of voters to nominate.

The following statement shows revenue and expenditure of the town councils for the past five years:—

—	Revenue.					Expenditure.				
	1905.	1906.	1907.	1908.	1909.	1905.	1906.	1907.	1908.	1909.
	£	£	£	£	£	£	£	£	£	£
Accra ...	5,151	5,075	5,589	5,740	6,893	4,852	4,819	4,647	5,966	7,211
Seccondee ...	2,100	2,848	2,911	3,283	3,464	1,562	2,742	2,592	4,680	3,367
Cape Coast ...	—	2,060	2,284	2,381	2,411	—	1,207	2,627	2,586	2,236

Taxation.

Under this head only two forms of direct taxation exist in the Colony, namely, licences on vehicles and house-rate levied under the Town Councils Ordinance. The amounts thus collected at Accra, Cape Coast, and Seccondee, form part of the revenue of the respective municipalities.

II.—TRADE, AGRICULTURE, AND INDUSTRIES.

The total value of the sea-borne trade of the Colony for 1909 was £5,049,985 compared with £4,554,617 for 1908, an increase of £495,368. The head "Specie" accounts for £232,554 of this increase; the combined import and export figures for 1908 and 1909 being £585,759 and £353,205, respectively. The total value of commercial (*i.e.*, exclusive of specie and Government) imports and exports for 1909 was £4,282,334 compared with £4,120,226 in 1908, an increase of £162,108. This increase is chiefly due to the enhanced values of agricultural and forest products, which have more than compensated for the decreased output of gold.

The following table gives the value of imports (exclusive of expenses on specie), exports, and total trade for the past five years:—

Year.	Imports.	Exports.	Total Trade.
	£	£	£
1905 ... *	1,486,068	1,646,145	3,132,213
1906	2,058,939	1,996,412	4,055,351
1907	2,366,195	2,641,674	5,007,869
1908	2,029,447	2,525,170	4,554,617
1909	2,394,412	2,655,573	5,055,927

The appended statement shows the total value in sterling of imports and exports with the countries of origin and consignment, respectively, during the years 1908 and 1909:—

Countries.	Total Imports therefrom.		Total Exports thereto.

* Exclusive of Specie.

The gross value of all imports during 1909 was £2,394,412 (exclusive of expenses on specie), an increase of £364,965 com-

pared with 1908. In 1909 the value of commercial imports was £1,823,343 as against £1,787,472 in 1908, and the gross value of Government imports for 1909 was £181,852 as against £81,185 in the preceding year. This large increase was caused by plant and materials for important public works under construction.

The value of commercial imports paying specific duties was £430,420 in 1909 compared with £430,645 in 1908. The value of commercial imports paying *ad valorem* duty was £1,055,695 in 1909 compared with £1,041,650 in 1908. The value of commercial imports free of duty was £337,228 in 1909 compared with £315,177 in 1908.

The comparative return below for 1908-9 comprises the principal articles of import:—

* Exclusive of expenses on Specie.

The principal increases in values of imports in 1909 compared with 1908 are as follows:—

	£
Building materials	20,730
Provisions	19,141
Cottons (except yarns)	11,026
Tobacco—unmanufactured	10,472
Hardware	9,041
Machinery	6,195
Lumber	5,447
Coopers' stores	3,506
Salt	2,925
Carriages and carts	2,557
Railway plant and rolling-stock... ...	63,692
Specie	228,428

Larger quantities of "Building Materials" and "Lumber" were imported mainly for public works and additional accommodation at the mining centres; "Machinery" was imported for extensions of plant at the mines. "Carriages and Carts" are in greater demand as the roads are improved for vehicular traffic. The importation of "Provisions" continues to increase year by year, as the use of tinned and other preserved provisions extends among the people generally. The increase under "Hardware" and "Cottons" is generally attributable to better trade conditions. The importation of "Railway Plant" is due to the construction of the Accra-Akwapim and Tarkwa-Prestea railways. The increase under "Specie" is attributable to the increased production and exportation of the Colony's economic products.

The principal decreases are:—

	£
Silk goods	12,671
Beads	8,918
Spirits—rum	7,724
Cotton yarn and twist	7,196
Kerosine oil	4,796
Coal	3,913
Wearing apparel	3,711
Wines	3,508
Rice	3,370
Woollen goods	3,329

The principal decreases are explained as follows:—

"Kerosine Oil," due apparently to overstocking in the preceding year; "Silk Goods" and "Wearing Apparel" is partly attributed to the non-inclusion of the parcel post accounts for five months in the year, these goods being largely imported through the Post Office. The sale in "Beads" is chiefly in the hands of small traders and no reason for the decrease is ascertainable.

The total value of all exports from the Colony during 1909 was £2,655,573, an increase of £130,402 compared with 1908. This is due chiefly to the larger shipments of cocoa, rubber, and palm kernels.

The appended table is a comparative statement of the principal articles of export for the years 1908-9:—

Articles.	1908. Quantity.	1908. Value.	1909. Quantity.	1909. Value.	Increase.	Decrease.
		£		£	£	£

Specie ... ... —	—	192,416	—	196,542	4,126	—
Other Articles ... —	—	8,662	—	8,312	—	350
Totals	—	2,525,171	—	2,655,573	363,070	232,668
			Decrease		232,668	
			Net Increase		130,402	

The following are the chief articles showing increased values:—

	£
Cocoa	214,526
Rubber	95,550
Palm kernels	34,604
Kola nuts	9,488
Copra	3,961
Specie	4,126

The following are the principal decreases in the value of export:—

Gold and gold dust, £143,938; due to several mines temporarily suspending crushing operations for development work and increasing their reserves of ore.

Native timber, £75,369; mainly due to the low prices ruling in the European markets.

Palm oil, £8,557; partially explained by the gallonage being recorded in Imperial in place of old wine gallons for the first time.

Following the method adopted in previous reports, the value of the exports of gold and specie had been deducted in the appended statement from the total value of exports for the purpose of differentiation between the former and the principal forest and agricultural products. The comparative return below shows a decrease of £139,812 in the combined values of gold and specie:—

1908	Amount.	1909.	Amount.
	£		£
Total Exports ...	2,525,171	Total Exports	2,655,573
£		£	
Gold ... 1,151,944		Gold ... 1,008,006	
Specie ... 192,416		Specie ... 196,542	
	1,344,360		1,204,548
Total other Exports...	1,180,811	Total other Exports ...	1,451,025

The principal ports in the Colony are:—

Port.	Total Customs Duties.	Total Values.		Total Trade.
		Imports.	Exports.	
	£	£	£	£
1. Seccondee	123,236	1,009,849	1,341,249	2,351,098
2. Accra	102,670	623,563	578,071	1,201,634
3. Addah	52,631	183,786	241,195	424,981
4. Axim	20,280	131,816	101,338	233,154
5. Saltpond	31,464	74,605	112.530	187,135
6. Cape Coast ...	25,392	112,977	55,197	168,174
7. Winnebah	24,526	66,470	76,345	142,818
8. Quittah	29,822	78,158	52,034	130,192

The amount of gold produced during the year shows a decrease of 50,762·889 ounces as compared with the previous year. This decrease is due to the fact that certain mines which were producing in 1908 limited their output during the year under review in order to increase their ore reserves and to further develope their properties. On the quartz and conglomerate mines in the Colony and Ashanti, 404,853 tons were treated and produced 210,391·892 ounces, being an average extraction of 10·402 dwts. per ton of 2,000 lbs.

The following table shows the value of gold exported by the various mining companies during the past five years:—

Name of Company.	1905.	1906.	1907.	1908.	1909.

On the conglomerate mines in the Tarquah district 180,327 tons were crushed and produced 91,433·81 ounces, being an extraction of 10·14 dwts. per ton of 2,000 lbs. The Prestea "Block A" Mine stopped crushing in July for additions to and alterations in the plant. The ore reserves of this mine, at the end of the year, were estimated at about 500,000 tons.

On the other producing quartz mines, 224,526 tons were treated, yielding 118,958·082 ounces of gold, being an extraction of 10·6 dwts. per ton of 2,000 lbs.

The dredging companies were able to show an increased output of gold as compared with former years. Fifteen dredgers were at work and treated 2,927,393 cubic yards, producing 20,102·425 ounces of gold, being an extraction of 3·24 grains per cubic yard. The gold won by dredging companies in 1908 was 13,342·761 ounces.

Progress has been made on the oil concessions situated near Half Assinie. Boring operations were carried out during the year, and, in December, a flow of oil, estimated at seven barrels a day, was struck at a depth of 60 feet.

The Ashanti Gold Fields Corporation, Limited, has had a successful year's working; not only does the gold output show an increase of 16,296 ounces over the figures of the previous year, but development has created ore reserves of 500,000 tons. During the year, 92,880 tons were treated and produced 53,444 ounces. Considerable progress has been made with the new roasting plant which is expected to be completed in 1910. This

new plant consists of 9 Krupp ball-mills, 4 Edwards' roasting furnace, and 24 vats, and will be able to treat 7,500 tons a month.

The number of labourers employed shows a slight increase over that of the previous year. Several gangs of labourers from the Northern Territories were brought down to work on the mines. The result of the experiment of introducing labour from the Protectorate tends to show that the natives from the North-West Province make the best workmen for mining purposes.

The various companies continue to improve their mining camps by the clearance of the surrounding undergrowth, and, generally speaking, good sites have been selected for the erection of the employés' bungalows.

Three certificates of validity have been gazetted during the year under review in the Colony.

Fifty-three mining and ninety-four prospecting licences were granted during the year in the Colony and Ashanti.

As stated in previous reports, no manufactures in the technical sense of the term can be said to exist either in the Colony or its Dependencies. The native industries that might otherwise be included under this head are merely sufficient to supply the requirements of the community. It may, however, be noticed that, despite the increasing facilities for purchasing cotton goods of European manufacture, there is no lessened demand for locally-woven textile fabrics—as the latter, though more expensive, are also more durable.

No statistics can be given under the head of Fisheries as no means exist of computing the numbers of natives and canoes employed in the industry. It is known, however, that there is a considerable trade in dried fish carried far into the interior, and a large consumption in the coast towns of fresh fish, many varieties of which are excellent. In most of the coast districts the fishing is to some extent regulated by native custom, the use of certain types of net being prohibited and days (usually Sundays and Tuesdays) set apart on which the fishermen do not put out to sea.

Agriculture.

The Agricultural Department has done excellent work during the year and has endeavoured, through travelling instructors, both European and native, to disseminate more scientific methods of cultivating and preparing agricultural and economic products.

The quantity of cocoa exported from the Colony during the year amounted to 45,277,606 lbs., valued at £755,347, compared with 28,545,910 lbs., valued at £540,821, in the year 1908.

The cultivation of this product is rapidly extending in the Eastern and Central Provinces of the Colony and in Ashanti; but no means exist, at present, of accurately estimating the area under cultivation. With the very rapid growth of this industry which, owing to its being almost exclusively in the hands of native farmers, has developed on somewhat primitive lines, have come various insect and fungoid pests; but many of the farmers, thanks to the energy of the travelling instructors, are alive to

the danger and are taking steps to rectify matters. Printed instructions on the subject, issued in native languages, have been widely disseminated.

The following figures tend to show that improvement has been made in the quality of Gold Coast cocoa:—

Average price per Cwt.	1908.		1909.	
	s.	*d.*	*s.*	*d.*
Trinidad (Fine West Indian) ...	77	0	58	6
Accra (British West African) ...	60	0	50	0
Difference	17	0	8	6

The quantity of rubber exported during 1909 was 2,764,190 lbs. as compared with 1,773,248 lbs. in the previous year. The systematic cultivation of this product is now rapidly extending, but the whole of the output is still obtained from trees and vines (*Funtumia* and *Landolphia*) in the vast undeveloped forests of the interior.

The output of kola continues to show a steady increase, the export value for the year 1909 being £93,850, and that for the year 1908, £84,362.

Oil palm products were subjected to various experiments during the year and the results have been published in the "Kew Bulletin." The export value of palm kernels shows an increase of £34,604 on the preceding year, while that of palm oil shows a decrease of £8,557.

Forestry.

The nucleus of a Forestry Department was formed during the latter part of the year. The Conservator, Mr. McLeod, arrived in the Colony in September and was engaged for the remainder of the year in investigating the principal forest areas with a view to their conservation and the acquisition of reserves.

Imperial Institute.

Reports on the following subjects have been furnished to the Government of the Gold Coast from the Imperial Institute as the result of investigations conducted in the Scientific and Technical Department, supplemented when necessary by technical trials by manufacturers and commercial experts. In many cases recommendations have been made as to the further action which is required in the Colony to develop the production of materials, for which there would be a satisfactory commercial demand.

Rubber.—Samples of *Funtumia* rubber in the form of "crêpe" and "lump" were examined. The latex was stated to have been coagulated by the juice of the "Diecha" vine, which has since been identified at Kew as *Strophanthus Preussii*, Engl. et Pax. The action of this coagulant is under investigation at the Imperial Institute.

The crêpe rubber was of very fair quality, although the percentages of resin and insoluble matter were higher than in some

samples of *Funtumia* rubber from the Gold Coast previously examined. It was valued at 5*s*. per lb. with fine hard Para at 5*s*. 4*d*. per lb.

The lump rubber, as received, contained an excessive quantity of moisture amounting to nearly 50 per cent. by weight. The partially dried rubber was valued at only 2*s*. 3*d*. per lb., with fine hard Para at 5*s*. 4*d*. per lb. The commercial value of this rubber was therefore considerably enhanced by its conversion into crêpe.

Timbers.—A series of forty-eight of the principal timbers of Ashanti, collected by Captain C. H. Armitage, D.S.O., was examined. The majority of these timbers would be useful locally for constructional and other purposes, whilst certain of them resemble mahogany, cedar, and other well-known woods, and might be suitable for export. Of the latter group the following timbers were regarded as the most promising:—Odupon (*Khaya* sp.), Dubin or Odubin (*Khaya* sp.), Krubna or Okumankra (*Khaya* sp.), and Krubna or Akwabohori (*Khaya anthotica*). The report on these timbers will be published in due course in the Bulletin of the Imperial Institute.

Cotton.—Three native varieties of cotton from the Gold Coast, including "Volta River" and "native green-seed," were of good quality and worth 4½*d*. to 5½*d*. per lb. with "middling" American at 5·05*d*. per lb. Another sample, grown near Akim, and probably a native variety, was rough, somewhat stained, and worth about 6*d*. per lb. with "middling" American at 5·54*d*. per lb. A sample from the Ancobra River represented a good class of cotton, but was much depreciated in value by the large proportion of stains, which appeared to have been caused by insect pests in the crop. It was valued by brokers at about 6*d*. per lb. with "middling" American cotton at 5·54*d*. per lb.

Copal.—A botanical specimen of the ogea or gum copal tree was identified at Kew as *Cyanothyrsus Ogea*, Harms. It is believed that ogea gum is derived from two or three different, but allied, plants, and endeavours are being made to determine these.

Oilseeds.—The kernels of *Carapa* seeds were valued at £11 5*s*. per ton by a firm of oilseed crushers who offered to take a trial consignment of 50 tons of the kernels at this price.

LANDS.

The following paragraphs under this head from the report for 1908 are again published for general information, there having been no change or legislation in connection with land during the period under review:—

The bulk of land in the Colony belongs to the tribal "stools," and theoretically there is no land without an owner. The ascertainment of the exact boundaries of tribal lands is, however, often a matter of considerable difficulty, as towns and villages have sprung up with large tracts of intervening unoccupied land,

sometimes dense forest, which is gradually brought under cultivation from either end. Now the value of land is appreciated boundary disputes frequently come before the Supreme Court, and in certain parts of the Colony, especially in the mining district of Wassaw, the limits of the lands adjoining tribal stools have been definitely prescribed.

The general principle laid down by judicial decisions is that all land within the recognised territory of a "stool" is the property of that stool. Thus, in the case of every headchief's division, where there are tribal and family stools in subordination to the headchief's stool, all lands within the recognised boundaries of the family or subordinate tribe are held to be attached to the family or tribal stool, but all other unoccupied lands are the property of the headchief's stool. An attempt was recently made in the courts to extend this principle so as to enable the headchief's stool to claim all cultivated land the original title to which, as is not uncommon in the case of lands under native tenure, is lost in obscurity; but, though no limit of prescription is laid down by native law, the local Court of Appeal held that in the case of long occupation and when there has been cultivation of permanent crops, such as sugar-cane and cocoa, as opposed to the usual shifting cultivation of yams, plantains, and similar food products, the presumption is that the occupation was with the consent of the headchief's stool.

The Crown possesses no waste lands in the Colony, but certain lands have been acquired by the Government from time to time, mostly under the provisions of the Public Lands Ordinance, 1876, which legalises compulsory acquisition for the services of the Colony on payment of reasonable compensation.

Of recent years deeds have come into common use, especially in land transactions between natives and Europeans. Where these deeds relate to grants of rights of mining, felling timber, and collecting rubber, and other products of the soil, they are called concessions, and their validity is inquired into by the Supreme Court, under the provisions of the Concessions Ordinance, 1900. The Court inquires whether the grantors are the native owners of the land, whether the area falls within the prescribed limit of five square miles for a mining concession, and 20 square miles for other concessions, whether the prescribed term of 99 years is exceeded, whether the consideration is adequate, and whether the statutory rights reserved to the natives are included in the deed. A survey and demarcation of boundaries by the Mines Survey Department is ordered, and when this is completed a certificate of validity, giving the lessees an indefeasible title, subject to observance of his covenants, is issued by the Court, in which are contained such modifications of the deed as the Court may impose to bring it within statutory requirements, and to render it a transaction fair and equitable to both parties. The rent from certified concessions is paid to the native grantors through the Government. Concessions granted solely for purposes of plantation of rubber and other products may be exempted from the operation of the Ordinance;

whilst concessions to acquire mineral oil are held subject to the Government right of presumption of the oil under Ordinance, No. 15 of 1907.

SHIPPING.

Comparative statements of the number and tonnage of vessels which entered and cleared from Gold Coast ports are appended:—

Mail steamers of the African Steamship Company and the British and African Steam Navigation Company, Limited, both of which are under the management of Messrs. Elder, Dempster and Company, leave Liverpool every Wednesday for Axim, Seccondee, Cape Coast, and Accra, the scheduled time of the voyage being 15 days. Homewards the mail service leaves Accra every Wednesday, and is due to arrive at Plymouth in 17 days.

The same Companies provide two services of cargo boats from Liverpool, viz., the Brass and Benin Service, which leaves every alternate Saturday and calls at Axim, Seccondee, Cape Coast, Accra, and Saltpond; and Half Assinie, Atuabo, Dixcove,

Adjua, Pram Pram, and Quittah every alternate boat. The Opobo Service, which leaves on the other alternate Saturday, calls at Axim, Seccondee, Cape Coast, Accra, Winnebah, and Addah; and at Chama, Elmina, Anamabo, Mumford, Appam, and Berracoe every alternate boat. The cargo services also touch on the homeward voyage at the outward ports of call. These boats take from 32 to 34 days to Accra. The South Coast Service runs every month from Liverpool (on Thursdays) direct to Loanda, stopping at Accra homewards and outwards.

These lines also run two Hamburg Services, viz., the Lagos and Creek Service and Rivers Service; and one from London, four-weekly.

The Lagos and Creek Service leaves Hamburg fortnightly, calling outwards at Seccondee; and Saltpond and Appam every alternate boat. Homewards, calls at Saltpond, Seccondee, Axim; and Pram Pram, Winnebah, and Appam every alternate boat.

The Rivers Service leaves Hamburg every three weeks, calling outwards at Axim, Cape Coast, Accra, and Addah; homewards, Addah, Accra, and Saltpond.

The London boats call outwards at Axim, Seccondee, Accra, and, if inducement offers, at Cape Coast; homewards at Danoe, Quittah, and Accra.

The present rates of fares by these lines are £28 12*s*. first class and £20 7*s*. for all ports as far as Winnebah and £29 14*s*. and £21 9*s*. respectively, for Accra and ports to the eastward.

The Woermann Line runs a mail steamer monthly from Hamburg which is scheduled to leave Dover on the 11th of every month with passengers and mails for Seccondee and Accra, the duration of the voyage being 15 days. These boats also call homewards at the same ports and leave Accra on the 14th of every month for Southampton. The passenger fares are the same as the Elder-Dempster steamers. Cargo services of the Woermann Line, Hamburg America Line, and Hamburg Bremen Africa Line leave Hamburg for Gold Coast on the 4th, 14th, and 28th of the month.

The Chargeurs Réunis run a monthly cargo service to the Gold Coast, sailing from Dunkirk on 5th, Havre 8th, Bordeaux Pauillac 12th of each month. Their main ports of call on the Gold Coast are Accra and Addah. They are also comfortably fitted for a few cabin passengers.

III.—LEGISLATION.

During the year under review seventeen Ordinances were passed by the Legislative Council of the Gold Coast Colony, of which it is only necessary to refer to the following:—

Gold Mining Products Protection Ordinance (No. 1 of 1909).
Marriage (Amendment) Ordinance (No. 2 of 1909).

Concessions (Amendment) Ordinance (No. 3 of 1909).
Statute Law Revision Ordinance (No. 7 of 1909).
Companies (Amendment) Ordinance (No. 9 of 1909).
Immigrant Paupers Ordinance (No. 10 of 1909).
Criminal Code (Amendment) Ordinance (No. 12 of 1909).
Reprint of Statutes Ordinance (No. 16 of 1909).

No. 1 provides for the more effectual prevention of illicit dealings in the products of gold mines worked by European methods.

No. 2 carries out certain recommendations of a Commission which was appointed to report on the "Marriage Ordinance, 1884" (No. 14 of 1884); particularly with regard to the succession to intestate estates and the legitimation of children born before marriage under the Ordinance.

No. 3 prohibits the grant or assignment of concessions with respect to mineral oil except to British subjects or Companies.

No. 7 facilitates the preparation of the Revised Edition of the Ordinances by making amendments in certain enactments and by repealing others which are spent.

No. 9 prohibits the local registration of Companies with names including the words "Empire" or "Imperial" or otherwise calculated to convey an impression of Government support or connection.

No. 10 makes provision with regard to destitute persons landed or left behind in the Colony and enacts that a person, firm, company, or association may, by depositing in the Treasury as security a sum not exceeding £100, be released from any further liability in respect of each person on whose account such sum may have been deposited.

No. 12 is identical with sections 103 and 131 of 8 Edward 7, chapter 67, and provides for procedure with regard to sentences of death under the Criminal Code in the case of persons under age.

No. 16 provides for the publication of a new collected and revised edition of the Ordinances of the Colony in force on the 30th day of June, 1909, or such later date as the Governor may fix by notification in the Gazette; defines the power of the Commissioner appointed under the Ordinance, and empowers the Governor, by proclamation, to fix the date on which the revised edition shall come into force as the sole and proper Statute Book of the Colony up to the date of the latest of the Ordinances contained therein.

Three Ashanti Ordinances, and two Northern Territories Ordinances, were enacted by the Governor. Of these the only one to which reference need be made is the Northern Territories Spirituous Liquors Ordinance (No. 2 of 1909), which regulates the importation and sale of spirituous liquors, wine, and beer in the Northern Territories in pursuance of the Brussels General Act, 1890. The main provisions are that: "No spirituous liquors

or wine shall be imported except under certain restrictions; all liquors shall be sold in original bottles for consumption off the premises; no spirituous liquors or wines may be either given to, or possessed by, natives, except in cases of sickness. Beer is excluded from these restrictions, but must be sold under licence.

IV.—EDUCATION.

At the close of the year under review, 164 schools were on the inspection list, including nine Government schools. Out of 155 Mission Schools, 149 became eligible to receive grants-in-aid from public funds.

The following is a comparative table of the schools inspected during the years 1908 and 1909:—

Denomination.	1908.	1909.	Increase or Decrease in 1909.
African Methodist E. & Z. Mission	1	3	+2
Basel Mission	60	65	+5
Bremen Mission...	11	12	+1
Church of England (S.P.G.)	4	3	−1
Government Schools	7	9	+2
Mohammedan	1	—	−1
Roman Catholic Mission	19	21	+2
Wesleyan Mission	49	49	No change.
Accra "Collegiate" and Grammar Schools, Secondary and Elementary.*	2	2	No change.
Totals	154	164	+10

* Not included in Report of 1908.

The following table shows the total number of pupils enrolled in Government and Assisted Schools; the average attendance and the amount of grants earned during the years 1908 and 1909:—

Year.	Number on Roll.	Average Attendance.	Grants Earned.
			£ s. d
1908	14,889	11,020	5,920 16 0
1909	16,711	11,968	6,387 5 9
Increase	1,822	948	466 9 8

The grants awarded to schools increased by £466 9*s.* 8*d.*, due not only to the numerous admissions to the assisted list, but also to the improvement in the average attendance in the older schools.

The following is a comparative table of amounts collected in School Fees during the past two years:—

School.	Amount collected in 1908.			Amount collected in 1909.		
	£	*s.*	*d.*	£	*s.*	*d.*
African Methodist E. and Zionist Mission	11	7	9	26	3	5
Basel Mission	207	12	6	263	4	7
Bremen Mission	28	13	5	32	12	1
Church of England (S.P.G)	13	1	5	16	2	3
Government	159	12	11	285	17	9
Roman Catholic Mission ...	94	18	5	117	3	0
Wesleyan Mission	527	8	10	600	8	2
Collegiate, Secondary, and Elementary	—			68	2	8
Totals	£1,042	15	3	£1,409	13	11

The average payment per pupil in Government and Assisted Mission Schools (excluding the Accra "Collegiate" School) was 1*s.* 5*d.* for 1909, as against 1*s.* 10¾*d.* in 1908.

There are now 155 Schools, other than Government Institutions, on the Assisted List, an increase of 12 on the year 1908. The examination results at most of these were, on the whole, satisfactory. Not only is the number of schools greater, but a general expansion has taken place. The grants-in-aid awarded show a fairly proportionate increase. There is abundant evidence that the European Managers have taken great interest in the administration of their schools; but many of the native managers do not yet appear to have fully grasped their responsibilities.

Of the nine schools controlled and maintained by the Government, the examination results were more satisfactory than those of 1908, especially at Accra and Cape Coast. Two new schools have been opened at Coomassie (Ashanti) and Tamale (Northern Territories), respectively; and in the former an excellent beginning was made, 300 children having been enrolled by the end of the year.

At Tamale progress has been slower, but the general results are distinctly encouraging.

Two Civil Service examinations were held during the year, when 118 candidates out of 186 passed. Courses of instruction in agriculture for students and teachers were held at Aburi, Assuantsi, Coomassie, and Tarquah agricultural stations during the year under review, and 69 candidates obtained certificates.

Throughout the Colony the progress in agricultural and other forms of industrial work has been satisfactory. The total grant earned, namely, £749 2*s*., is £20 in excess of that awarded in 1908.

The principal event of the year was the adoption of the new Rules of the Board of Education, under which a system of combined literary and industrial education has been made obligatory in all primary Government and assisted schools. For the effectual working of the new system a Training Institution for Teachers and a Technical School have been established at Accra. The buildings, in addition to class-rooms, work-shops, &c., provide dormitories and dining-rooms for the students. These institutions were successfully inaugurated during the year, and it is confidently expected that their influence will have a marked effect on the general progress of the Colony.

V.—GOVERNMENT INSTITUTIONS.

The principal hospitals in the Colony are situated at Accra, Cape Coast, and Seccondee, and smaller hospitals are maintained at Elmina, Quittah, Axim, and Addah.

In Accra the hospital consists of three European and four native wards with seven and twenty-five beds respectively. A European nursing sister is attached to this institution, at which 591 cases were treated during the year. There is also an infectious diseases hospital. At Cape Coast, the hospital provides accommodation for thirteen Europeans in three first and two second class wards; there being also 19 beds for natives contained in two wards, and two additional wards for contagious cases. The total number of cases which received treatment was 184. The hospital at Seccondee has six European wards, two being for convalescents, containing in all 16 beds. Provision is made for three classes of accommodation for Europeans. Two nursing sisters are attached to this hospital. In addition, four wards, holding 22 beds, are provided for natives. During the year 453 cases were treated.

In Ashanti there is, at Coomassie, a European hospital to which is attached a nursing sister, containing four wards. There is also a large hospital for natives with a main ward holding 36 beds, another for females of four beds, and a third smaller ward containing four beds. The number of cases treated at this hospital during the year was 789.

In the Northern Territories there is, as yet, no regular hospital for Europeans; but accommodation for the treatment of natives is provided at Tamale and various out-stations.

The only lunatic asylum in the Colony is situated at Accra, and 23 male and 6 female inmates were admitted during the year, as against 16 and 9 respectively in 1908. The number discharged was 4 males and 2 females, as against 6 and 1 respectively in the previous year. Three-fifths of the inmates, the daily average of whom was 76, were classified as maniacal and dangerous.

The asylum consists of two large airing yards, one for males and the other for females, each flanked by cells and dormitories. There is also a large open shed for shelter and recreation. Hospital accommodation, quarters for the staff and other accessories are provided, and the buildings generally are well-ventilated and cool.

There are no poor-houses or reformatories, pauperism being practically unknown.

The total deposits in the Savings Bank during the year, including interest credited, amounted to £17,632 1*s*., as compared with £17,013 11*s*. 6*d*. for 1908, an increase of £618 9*s*. 6*d*.

The withdrawals during the year amounted to £13,599 7*s*. 8*d*. as against £11,678 12*s*. 10*d*. in the previous year, an increase of £1,920 14*s*. 10*d*.; leaving an excess of deposits over withdrawals of £3,516 4*s*. 10*d*. In the amount withdrawn from the bank is included the sum of £1,311 19*s*. 7*d*. transferred to the United Kingdom Savings Bank at the request of the depositors.

Arrangements have been made with the Governments of Sierra Leone and Southern Nigeria whereby the accounts of depositors may be transferred from one Colony to another when desired.

The credit of the Bank on the 31st December, 1909, was £24,715 3*s*. 5*d*., an increase of over 14 per cent. over the previous year, when the credit stood at £20,676 6*s*. 4*d*.

The interest credited to creditors from general revenue amounted to £516 8*s*. 6*d*., and the amount realized on investments made by the Crown Agents on behalf of the bank was £629 19*s*. 5*d*.; resulting in a profit of £113 10*s*. 11*d*. A sum of £4,006 14*s*. 4*d*. remained in the hands of the Treasurer on the 31st of December.

The total number of accounts remaining open at the end of the year was 2,165, an increase of 23 per cent. over the year 1908. The progress made by this institution continues to be satisfactory.

VI.—JUDICIAL STATISTICS.

The strength of the police on the 31st December, 1909, was 693 of all ranks, being 23 under the authorised strength. At the end of the previous year there was a deficiency of 25.

No increase was made in the establishment, the distribution of which was as follows:—

General Police (all ranks)	...	...	...	...	450
Escort Police	„	...	...	...	148
Mines Police	„	...	...	...	51
Railway Police	„	...	...	...	44
Total	...	...	...	...	693

One hundred and seventy-three recruits were enlisted during the year, being 125 less than in 1908, due to there being no increase in the establishment and to the fact that fewer recruits were rejected prior to the expiration of their probationary period. There were 4 desertions less than in the previous year, and only 10 men were discharged as medically unfit as against 24 in 1908.

The superintendents and constables of the detective branch have continued to do good work and have displayed considerable acumen and intelligence. The total strength is 13, as in 1908.

The work done by the police has, on the whole, been satisfactory; but, in the case of the general police, senior native officers of greater intelligence are needed in some of the larger towns. Large sums of specie and bullion (both Government and commercial) have been escorted by the force during the year, and in no case has a loss been reported. The receipts for the conveyance of specie, other than Government, amounted to £278 10*s*. 7*d*. More police were employed by the mines, and the receipts from this source realized £1,779 4*s*. 3*d*., as against £1,594 12*s*. 3*d*. in 1908.

Under "Prisons" there has been practically no change during the year under review. The Central Prisons of the Colony are at Accra, Seccondee, Cape Coast, and Elmina, in which are confined long-sentence prisoners. The minor gaols are at Seccondee (Fort Orange), Axim, Quittah, Tarquah (where a new building is under construction), Akuse, Addah, Saltpond, and Winnebah, in which prisoners with sentences under six months serve their time. In Ashanti, prisoners undergo sentences up to three years in the gaols at Coomassie and Obuasi. There are, in addition, four smaller gaols, at Dunkwa, Kintampo, Sunyani, and Krachi respectively, which are more in the nature of "lock-ups."

The total number of prisoners committed in the year 1909 was 4,911, as compared with 4,822 in the previous year, an increase of 89. The daily average in the prisons of the Colony and Ashanti was 945, as against 885 in 1908—an increase of 60.

Progress under "Prison Industries and Labour" has again been well maintained. The earnings for the year show a total of £2,757 11*s*. 3*d*., as against £2,693 11*s*. 4*d*. in 1908—being an increase of £63 19*s*. 11*d*. Carpentry, boot and shoe making, tailoring, smiths'-work, and cooperage are the industrial heads under which most of the earnings are realized.

The total expenditure during the year under review was £14,700 12*s.* 1*d.*, as against £13,469 17*s.* 5*d.* in 1908, the increase of £1,230 14*s.* 8*d.* being accounted for by the greater number of prisoners.

The general health of prisoners has been good.

The returns of crime in the Colony, Ashanti, and the Northern Territories show that, during the year under review, 9,193, 2,492, and 541 cases, respectively, were dealt with; as against 8,342, 2,080, and 410 cases, respectively, in 1908—an increase of 1,394.

The number of convictions obtained was 6,989 in the Colony, 2,014 in Ashanti, and 469 in the Northern Territories; as against 6,258, 1,836, and 390, respectively, in the preceding year—a total increase of 988.

The following table shows the comparative number of criminal cases in the Colony during the last two years:—

	1908.	1909.
Offences against persons	1,003	1,293
Offences against property	1,732	1,652
Slave Dealing	52	47
Other Offences	5,155	6,201
Total	7,942	9,193

For the criminal statistics of Ashanti and the Northern Territories reference should be made to the Annual Reports of the respective Chief Commissioners.*

VII.—VITAL STATISTICS.

As stated in previous reports, no accurate figures of the population of the Colony and its Dependencies can be given, as there is no compulsory registration of births and deaths; and any attempt to collect statistics in these respects is usually regarded by the native with suspicion. Roughly estimated there are probably nearly 3,000,000 inhabitants of the Gold Coast, including Ashanti and the Northern Territories.

The European population is shown as 1,715; being a decrease of 53 residents. The appended comparative analysis of the mortality and invaliding returns shows a decrease of 4·14 in the death-rate per thousand and of 32·22 in the invaliding rate per thousand. The highest death-rate was again amongst the missionaries.

One death from malaria occurred amongst officials, and two from hyperpyrexia; there was a decrease in the number of Europeans invalided from malaria in 1909, and a general decrease in the number of malaria cases amongst Europeans.

* Colonial Reports, Nos. 639 and 640.

Statistics of Mortality and Invaliding of Europeans for the years 1908 *and* 1909.

1908.	No. of Residents.	Deaths.	Invalided.	Death-rate per 1,000.	Invaliding rate per 1,000.
Officials	413	6	29	14·52	70·21

Missions	118	3	4	25·42	33·89
Total	1,715	22	66	12·82	38·48

Station.	Number.	Deaths.	Invalided.	Death rate per 1,000.	Invaliding rate per 1,000.
1908.					
Colony	1,415	28	119	19·78	84·09
Ashanti	287	2	4	6·96	13·93
Northern Territories ...	66	—	2	—	30·70
Total	1,768	30	125	16·96	70·70
1909.					
Colony	1,328	17	54	12·80	40·66
Ashanti	312	1	9	3·20	28·84
Northern Territories ...	75	4	3	53·33	40·00
Total	1,715	22	66	12·82	38·48

The causes of invaliding among officials were:—Phthisis 1; blackwater fever 2; anæmia 3; neurasthenia 2; asthma 1; gastritis 1; hæmorrhoids 1; malaria 3; cardiac disease 1; epilepsy 1; and hepatitis 1; a total of 17.

The causes of death among officials were:—malaria 1; heart failure 1; hyperpyrexia 2; and general paralysis 1.

The health of the natives, generally speaking, proved less satisfactory. In the Colony it was good, and no serious epidemic occurred; but in parts of Ashanti it was bad. The outbreak of small-pox mentioned in the previous year's report continued and, from the data available, it would appear that the mortality was great.

Sleeping sickness proved more prevalent in Ashanti than in the Colony or the Northern Territories and, in the cases of

Wenchi, Sunyani, and Cheremankoma, this disease almost assumed an epidemic form. Leprosy did not show any increase. Pulmonary affections, ulcers, yaws, guinea worm, skin diseases, malarial fever, dysentery, venereal diseases, rheumatism, conjunctivitis, diseases of the alimentary tract, abscesses, and parasitic diseases proved the most prevalent complaints. Many injuries were also treated. In the Colony and its Dependencies, 3,413 natives were treated as in-patients and 43,747 as out-patients. No accurate information as to the mortality rate amongst natives is at present available, but the following table shows the number of deaths registered in the hospital and public cemetery records:—

Year.	Hospital Records for Gold Coast, Ashanti, and Northern Territories.	Burial Permit Records for Accra, Addah, Cape Coast, Elmina, Seccondee, and Saltpond.
1905	168	1,712
1906	126	1,361
1907	113	1,517
1908	554	1,159
1909	232	1,611
Total	1,193	7,360

Increased attention has been paid to questions of sanitation during the past year, and the establishment of a Sanitary Branch of the Medical Department, working in conjunction with the general scheme of Public Works, should, if the present degree of energy be maintained, result in improvements on a scale unthought-of before the epidemic of plague in 1908.

In the larger towns of Accra, Cape Coast, Seccondee, Tarquah, Axim, and Coomassie, systems of surface drainage are being carried out or are under consideration; while at most of the smaller towns and at outstations considerable sanitary progress is being made by filling up water-holes, draining marshes, and providing wells.

The problem of ameliorating the present unsatisfactory sanitary conditions is full of difficulties, among which may be noted the following:—

The water supply of the native inhabitants is chiefly drawn from open ponds, wells, tanks, and wooden water-vats, or barrels.

In towns, water for domestic use is usually stored by the native in open vessels and kept in dark places, where sanitary inspectors have considerable difficulty in locating them. During the dry reason drinking-water is scarce and has a recognized market value per bucket.

Little or no pitch is given to the roofs of native houses and, where corrugated iron is used, kerosene tins filled with earth and stones are commonly utilised to prevent the sheets being blown away. A strong tornado not infrequently strips off roofs of corrugated iron and hurls them away to a considerable distance.

The erection of "swish" houses commonly leads to the formation of borrow-pits.

The older portions of the native towns, especially those on the coast, are often located on low ground, where the planning of an efficient drainage system is a matter of almost insuperable difficulty.

The more ignorant natives are apathetic and resentful of interference in the matter of drainage and domestic cleanliness. The work of sanitary inspectors is, in consequence, beset with difficulties.

Much has been done to improve existing conditions; but, before any radical changes can be effected, the sanitation staff must be augmented and the rate of expenditure accelerated.

During the year, £10,673, exclusive of supervision, was spent on sanitary improvements, including £4,536 at Accra, £1,820 at Winnebah, £1,399 at Seccondee, and £694 at Cape Coast.

Precautionary measures against the re-introduction of plague were continued at Accra; and many of the insanitary areas in this town have been demolished.

Meteorological Observations, 1909.

Station.	Temperature.						Rainfall.	
	Solar maximum.	Minimum on grass.	Shade maximum.	Shade minimum.	Range.	Mean.	Amount in inches.	Degree of humidity.

VIII.—POSTAL, TELEGRAPH, AND TELEPHONE SERVICES.

The increasing business of the Posts and Telegraph Department is apparent from the appended statistics:—

The expenditure amounted to £26,999 17*s*. 9*d*. as against £24,489 16*s*. 9*d*. in 1908. In 1909, £3,210 1*s*. 4*d*. was expended on the construction of new telegraph and telephone lines; in 1908 the expenditure on this service was £1,669 12*s*. 4*d*.

The total number of ordinary letters, postcards, newspapers, and book-packets which passed through the post in 1909 is estimated to have been 4,711,544, as compared with 3,983,802 in the previous year.

The number of registered and insured articles despatched was 189,608, as against 192,633; and the number received amounted to 159,038, as against 113,757 in 1908.

The total number of United Kingdom, Foreign, and Inter-Colonial parcels dealt with was 5,392 despatched and 54,656 received. The numbers dealt with in the previous year were 4,314 and 43,003, respectively.

Money Orders to the value of £49,159 2*s.* 7*d.* were issued, as against £47,193 5*s.* 4*d.* in the preceding year.

The total value of Postal Orders issued was £82,646 13*s.* 6*d.*, as compared with £73,370 9*s.* 2*d.* in 1908; an increase of over 11 per cent.—the number of orders issued during 1908 and 1909 being 110,128 and 123,282, respectively.

Fifty Telegraph Offices were open to the public in the Colony, Ashanti, and Northern Territories at the end of the year under review, with a total length of wire of 1,363 miles, or 15 miles more than in the previous year.

Telegrams to the number of 261,267 were dealt with, as against 272,694 in 1908, of which 85,220 were official.

During the year the telegraph system was extended from Aburi to Mangoase, a distance of about 15 miles, at an expenditure of £330 9*s.* 9*d.*

Local telephone services exist at Accra, Seccondee, Cape Coast, Tarquah, and Dodowa. These lines are extensively used; 63, out of a total of 139, connections being subscribed for by the public.

Preventive Service.

This service, which is a branch of the Customs Department, was efficiently maintained during the year under review.

The officers and men were distributed as follows:—

Volta River Preventive Service	281
Western Frontier Preventive Service ...	137
South-Eastern Frontier Preventive Service	64
Total	482

The cost of maintenance was £17,503 4*s.* 5*d.*

IX.—ASHANTI.

The total revenue collected in Ashanti during 1909 was £29,263 13*s.* 2*d.* as against £27,908 17*s.* 6*d.* in 1908, an increase of £1,354 15*s.* 8*d.*—the expenditure for the corresponding periods being £102,211 and £98,580.

The Dependency made considerable progress during the year under review. The marked development which took place in trade generally, and especially in agricultural and other economic

products, is a matter for congratulation. The chiefs and their people have taken full advantage of the object lessor afforded by the establishment of an agricultural station at Coomassie, and they appear to be alive to the value of the instructions given by officials of the Agricultural Department. The value of imports by the railway is estimated to have exceeded by £115,000 the figures for the previous year.

The principal exports of Ashanti are gold, rubber, cocoa, kola, and gum-copal. Notwithstanding the closing of the Akrokerri Mine, the output of gold increased by 8,425 ounces. The cocoa returns show an export of 11,790 tons as against 751 tons in 1908. The export of rubber amounted to 1,319 tons as compared with 536 tons in 1908. During the year the first Government school in Ashanti was opened at Coomassie. The registered attendance of nearly 300 boys at this institution is a satisfactory indication that the Ashantis are alive to the benefits of education. The curriculum includes both literary subjects and industrial training.

The general health of Europeans was good, but the natives suffered from outbreaks of small-pox in some localities. Investigations by medical officers in outlying districts led to the discovery that sleeping sickness was more common than had been supposed; and the view that this disease is endemic in the Gold Coast is now generally accepted. Fair progress was made in general sanitation at Coomassie and Obuassi. During the year the Ashanti prisoners apprehended in the 1900 disturbances were released from Elmina, most of them being permitted to return to their own villages. The relations between the administrative staff and the Ashantis continue to be friendly, in many instances even cordial; and the country generally has made social and material progress. Judicial, vital, and other statistics will be found in the Annual Report on Ashanti by the Chief Commissioner.*

X.—NORTHERN TERRITORIES.

The total revenue collected in the Northern Territories during 1909 amounted to £1,689 10*s.* 1*d.*, being a decrease of £9,249 2*s.* 8*d.* compared with the previous year. This decrease is entirely accounted for by the abolition of caravan tolls in September, 1908. The expenditure for 1909 was £67,169, showing an increase of £16,907 over 1908.

From all available information, both imports and exports appear to have increased; but, chiefly owing to the number of trade-routes, it is impracticable to furnish accurate statistics with respect either to quantity or value. The principal imports are cotton goods, kola nuts, salt, hardware, beads, and brass rods. The importation of spirits (except for the use of Europeans), arms of precision, and cartridges is prohibited. The main exports are cattle, sheep, and ponies, shea-butter, guinea-corn, and native produce generally. Attempts are being made to improve the local breeds of cattle by importing selected bulls. A Government agricultural station has been opened at Tamale, the capital of the Protectorate; and an experimental cotton farm

* Colonial Report [Annual], No. 640 [Cd. 4964-14].

will also be established there, under the supervision of an experienced Curator, as an object-lesson to native planters. A cotton gin and press were set up at Tamale during the year, and the demonstrations given with this machinery are said to have stimulated great interest and to have increased the local cultivation of cotton.

As in Ashanti, a Government school was successfully opened during the year and the attendance has been good. A number of intelligent youths, the sons of chiefs, from various parts of the Protectorate, have been entered as pupils in the recently established technical school at Accra.

The good relations between the European administrators and the chiefs have been maintained and strengthened and, with the exception of minor troubles with the somewhat intractable tribes which inhabit the Sapari Hills, there has been no disturbance of a political or other nature during the year under review. The general health of the European community was not good in the year 1909, and the end of the year was clouded by the death of the Chief Commissioner, Lieutenant-Colonel A. E. G. Watherston, C.M.G., R.E., whose administrative abilities and wide sympathies were fully appreciated throughout the Protectorate.

Further details with regard to the Northern Territories are given in the Annual Report of the Acting Chief Commissioner.*

XI.—RAILWAYS.

The total capital expenditure upon the Seccondee-Coomassie Railway stood on the 31st of December, 1909, at £1,846,305 16*s.* 3*d.*, including the cost of all permanent improvements, additional plant, machinery, and rolling stock.

The following amounts were charged against the capital account during the current year:—

	£	*s.*	*d.*
Two additional locomotives	6,347	1	3
Seccondee Harbour Works (lowering No. 1 Jetty)	2,514	5	5
Tarquah Post Office (adjustment with Public Works Department)	529	0	0
Total	£9,390	6	8

The loans for construction were raised at 3 per cent., their extinction being provided for by a sinking fund at 1 per cent., chargeable to the general revenue of the Colony.

The gross revenue for the year amounted to £185,409 15*s.*, this being an increase of £15,409 15*s.* upon the approved estimate, and £31,385 3*s.* 10*d.* in excess of the Revenue actually accruing in 1908. The greater part of this increase was derived from goods traffic. The coaching receipts also exceeded those of the previous year, despite the reduced tariff which came into operation during the year. The total receipts per mile open were £1,103 as compared with £901 in 1908, and per train mile £1 8*s.* 11½*d.* as against £1 4*s.* 3*d.*

* Colonial Report [Annual], No. 639 [Cd. 4964-13].

The total recurrent expenditure amounted to £73,914 1*s.* 5*d.*, being £11,470 less than the approved estimate, and £1,210 below the figures for the previous year.

The percentage of total recurrent expenditure to revenue was 39·86 compared with 49·61 in 1908. Adding the extraordinary expenditure chargeable to capital, which, for the year under review amounted to £9,390, the grand total of expenditure for the year works out at £83,304 compared with £77,625 in the previous year, or 44·92 per cent. of the total revenue brought to account.

The working expenditure per mile open was £439, and per train mile 11*s.* 6*d.*

The general financial position of the railway and the working results to the 31st December, 1909, are given below:—

Total capital expenditure ...	£1,846,305	0*s.*	0*d.*
Total revenue earned in 1908 ...	185,410	0	0
Total working expenditure in 1908	73,914	0	0
Extraordinary expenditure chargeable to capital ...	9,390	0	0
Proportion of working expenditure to revenue	39·86 per cent.		
Proportion of total expenditure (working and extraordinary) to revenue	44·92	,,	
Nett revenue earned	£111,496	0*s.*	0*d.*
Interest upon capital expenditure	6·03 per cent.		
Revenue per mile open ...	£1,103	0*s.*	0*d.*
Expenditure per mile open ...	439	0	0
Total train mileage, exclusive of banking and shunting ...	127,973		
Earnings per train mile ...	£1	8*s.*	11½*d.*
Expenditure per train mile ...	0	11	6
Nett earnings per mile open ...	663	0	0
Nett earnings per train mile ...	0	17	5
Total number of passengers carried	215,729		
Gross tonnage of goods and minerals	56,454		
Average fare per passenger carried	£0	2*s.*	1½*d.*
Average earnings per goods ton mile (public traffic)	0	1	4¼
Average cost per goods ton mile (public traffic)	0	0	5½
Proportion of goods receipts total revenue	79·18 per cent.		
Proportion of coaching receipts total revenue	19·35	,,	
Proportion of down to up traffic (goods) tonnage	38·53	,,	
Proportion of down to up traffic (goods) receipts	28·00	,,	

Of the 14 accidents of a personal character that occurred during the year, four were fatal. The verdict in each case acquitted the railway officials of negligence. No accidents occurred to the 215,729 passengers conveyed over the railway.

The summary of accidents is as follows:—

	1908.	1909.
Engine failures	3	1
Derailments of all kinds	39	24
Fallen trees, &c.	230	261
Trolley accidents	4	5
Miscellaneous	11	18
Personal	5	14

The larger number of trees that have fallen across the track is chiefly due to extensive felling, the expenditure on which was £1,936 18*s*.

The revised goods tariff, which was introduced in 1908, has continued in force with practically no amendment, and, generally speaking, with satisfactory results. In the coaching tariff, third-class passenger fares were reduced from 2*d*. to 1*d*. per mile, and first-class tickets from Seccondee to Dunkwa and stations beyond were issued at 3*d*. instead of 4*d*. per mile. Free luggage allowances of 112 lbs. first class, and 56 lbs. third class were also conceded.

The branch line from Tarquah to Prestea and Broomassie, the construction of which was commenced in 1908, has made satisfactory progress despite many engineering difficulties that have been encountered. Railhead reached the Ancobra River (18 miles) in December, 1909, and earthworks were then well advanced in the direction of Prestea and Broomassie.

The construction of the railway from Accra to Mangoase, which commenced early in the year, has proceeded without interruption, and, in December, railhead had reached the twenty-sixth mile. Earthworks up to the provisional terminus of Mangoase (40 miles) were well advanced and the station buildings at Accra were nearing completion. This railway is expected to be opened for public traffic about September, 1910.

A reconnaissance survey of a projected extension, from Mangoase to Coomassie, was carried out during the year under review.

The scheme of harbour extension at Seccondee, in connection with the railway, has undergone rapid development during the year and some thousands of tons of stone, obtained from the Tarquah District, have already been delivered by the railway. The village known as Low Town has now been razed and replaced by an extensive workyard.

The past year has been distinctly favourable to the working results of the railway. The marked activity awakened in the mining industry has contributed in no small degree to the general increase in the gross revenue, which is larger than that of any preceding year.

ROADS.

With the exception of the trunk road from Coomassie to Tamale, the construction and maintenance of the main roads are in the hands of the Public Works Department. Some 1,800 miles of minor roads and paths are kept up by the chiefs, for which service they receive a quarterly payment per mile under the provisions of the Roads Ordinance, 1894, at rates which vary from 5*s*. to £1 according to the state of the road and the nature and extent of the work done. These district roads are inspected quarterly by Commissioners or other officials detailed for this purpose.

The principal roads are:—

(*a*.) Accra-Dodowa road, about 27 miles in length. This is suitable for vehicles of a gross weight not exceeding 6 tons. During the cocoa season the motor traffic is very heavy and constant repairs are necessary.

(*b*.) Accra-Aburi road, about 25 miles in length. For 13 miles this road is identical with the first mentioned, and is used by motor-lorries, as far as Ayimensa, at the foot of the Akwapim Hills.

(*c*.) Accra-Korle Gono road is at present under construction and will be completed early in 1910.

(*d*.) Accra-Inswam-Kyebi road is about 60 miles in length and was originally constructed by the Goldfields of Eastern Akim, being taken over by the Government in 1904. Besides the usual traffic of the cocoa season, this road has been used by the railway-lorries and motor-cars as far as Inswam, 23 miles.

(*e*.) Winnebah-Soadru road, about 15 miles in length. This road, which is increasing in importance, is now being reconstructed and provided with permanent steel and concrete bridges.

(*f*.) Saltpond-Insuaim road, 58 miles in length. This road is now under reconstruction for motor-lorries and vehicular traffic generally.

(*g*.) Cape Coast-Prahsu road, which was formerly the military and trade route to Coomassie, is being repaired and permanently bridged. This road lost much of its importance with the opening of the Seccondee-Coomassie Railway.

(*h*.) Other roads in the Colony are being reconstructed and provided with steel and concrete bridges, among which may be mentioned the following:—

	Miles.
Somanya-Akuse	12
Asebo-Abakrampa	3
Kpong-Akuse	8

(*i*.) Coomassie-Tamale road, 260 miles in length. As stated above, the construction of this trunk road is under a special Department. Work commenced early in 1909 and 15 miles were completed up to formation level by the end of the year. In addition, 1½ miles were also completed between the Volta River and

Makongo in the Northern Territories. The road is being constructed with a ruling gradient of 1 in 15; but, so far, a grade of 1 in 20 has been exceeded only in two places. The normal cross-section shows a width of 29 feet between cutting edges of ditches. The average cost per mile has, so far, been £1,102, but it is hoped to reduce this rate of expenditure when the northern sections, clear of the Ashanti forests, are reached.

XII.—MISCELLANEOUS.

Immigration and Emigration.

Except for records kept by the Transport Department, in connection with native labourers, there is no registration of foreigners either entering or leaving the Colony. Immigrants to the number of 199, the majority of whom were natives of Sierra Leone, are reported to have arrived overland from Monrovia. Allowing for those who landed without being engaged through the Transport Department, the total number of immigrants was probably from 3,500 to 4,000. As in previous years, a number of Gold Coast natives left the Colony in order to earn higher wages as carpenters, coopers, masons, smiths, &c., in Southern Nigeria and neighbouring foreign possessions.

Public Works.

Fairly satisfactory progress was made with public works, but the supply of labour was inadequate and difficult to obtain at some of the principal stations, and many works remained uncompleted at the end of the year.

Sanitary improvements made good progress at Accra, where a number of new streets have been laid out and completed.

A suburban area, known as Riponsville, has been demarcated and laid out with roads, building sites being sold or leased to persons dispossessed of their house or land in connexion with the remodelling of the town.

A sanitary engineer and sanitary foreman have been appointed at Accra, to supervise sanitation works generally and especially to carry out the schemes of main and subsidiary drainage.

The more important works commenced, in progress, or completed were:—

At Accra, the training college and technical school were completed, and several new streets, with concrete side-channels, were constructed. The boys' school was commenced and will be completed in 1910.

At Axim, the extension of the main drain was commenced and almost completed.

At Tarquah, progress was made with additional European quarters and some sanitary improvements were carried out. The new post office, court house, gaol, and native hospital were nearing completion at the end of the year.

At Seccondee, the court house and judges' quarters were finished and opened officially. An operating room was built in

connection with the hospital, and progress was made with the post office and additional quarters for the Medical Department. An infectious diseases hospital will be completed early in 1910, and a large concrete drain has been constructed along the railway land.

At Coomassie, several additions and improvements have been carried out, including the new school, some additional European quarters, and armouries and new lines were provided for the Gold Coast Regiment.

At Tamale, the new headquarters are practically finished, and the primary school was completed.

During the year 1909 the harbour works breakwater at Accra, as originally designed, was practically completed. This work was 800 feet in length, but it was subsequently decided to extend it for another 250 feet, of which about 30 feet had been set by the end of the year. The jetty abutment was completed during the year and progress was made with the north and south wing walls. It has been decided to extend the length of this jetty from 270 to 420 feet.

At Seccondee, good progress was made with the harbour works. A railway loop line has been constructed to connect the works with the main system. All necessary land has been acquired, and buildings, workshops, and bungalows for the staff have been erected.

At the end of the year the detailed scheme for the Accra water supply was finally settled and preliminary works were in progress. It is expected that these works and the connected scheme for surface drainage will be completed in about three years.

The plans for the Seccondee water supply scheme were sanctioned and work commenced. The period for the completion of this work and the connected drainage scheme is put down at two years.

During the year 1909 there was a large increase in the number of orders received by the Survey Department for the demarkation of mining concessions, and it was found necessary to augment the strength of the Department.

The work done has been almost wholly cadastral; the topographical work in connection with the Ashanti map was carried out under the direction of the Intelligence Officer at Coomassie.

Town surveys have been commenced and are nearing completion at Accra, Seccondee, Coomassie, Tarquah, and Mangoase. The following concession surveys were completed during the year:—

Obuosu Concession,
Tarquah-Prestea Railway Timber Concession,
Prestea-Huni River Railway Timber Concession,
Quand Badoo Extension Concession,
Essikaman Extension Concession,
South Kawere Concession,
Cadbury's Mangoase Concession,

the survey fees for which amounted to £798 12*s*. 6*d*. £866 was also earned on account of concessions in hand and partially completed, bringing the total receipts to £1,664 12*s*. 6*d*.

Changes in Establishment.

During the absence on leave of the Governor, Sir John Rodger, K.C.M.G., Major Herbert Bryan, C.M.G., Colonial Secretary, administered the Government from the 28th March to the 28th August. Mr. Albert Earnshaw, formerly Stipendiary Magistrate in British Guiana, was appointed a Puisne Judge, vice Mr. Francis Smith who retired. Mr. Charles Riby Williams, C.M.G., Colonial Treasurer, who was appointed Treasurer in 1895, retired in August. By the death of Colonel Allen Edward Garrard Watherston, C.M.G., Chief Commissioner of the Northern Territories, in November, the Colonial Service sustained the loss of a most capable, popular, and energetic administrator.

Transport.

During the year 1909, a total of 30,515 loads has been handled, in this number being included carriers with officers travelling. In addition, 1,172 contract carriers or labourers have been sent on engagements of six or twelve months' duration. Compared with the previous year, the figures are as follows:—

	1908.	1909.
Loads	28,328	30,515
Long-service carriers engaged...	1,289	1,138

The Department has continued to transport mails from Coomassie to the northward, depositing bags at Yeji, Kintampo, and Sunyani. A total of 569 bags was carried during the year 1909, being an increase of 234 as compared with 1908. This increase is due partly to additional postal matter, and partly to the fact that the Northern Territories have not, as heretofore, assisted in the carriage of mails. The system has been carried out with regularity on the whole, but the heavy rains during the latter part of the year caused delays.

No change has been made in the system of identification and other precautionary measures for guaranteeing the safety of loads entrusted to carriers. No loads have been lost in transit.

Some difficulty was experienced in obtaining carriers, mainly owing to the demand for labour for public works. The number of labourers supplied to mining and other companies was smaller than in previous years.

The following tables show the work done by the Department during the year 1909:—

Seccondee Headquarters.

	Loads.
Despatched by railway	8,767
Despatched by carriers	6
Despatched by sea	369
Delivered locally	97
Officials in transit	4,062
Officials travelling	1,136
Total at Seccondee	14,437

Carriers engaged on contract for Government	885
Carriers engaged on contract for companies, &c.	243

Coomassie.

	Loads.
Despatched by railway	372
Despatched by carriers to the Northern Territories	2,075
Despatched by carriers to stations in Ashanti	928
Distributed in Coomassie	6,812
Officials in transit	2,701
Mail-bags	569
Officials proceeding to Northern Territories ...	993
Officers and troops in Ashanti	1,628
Total at Coomassie	16,078

Suitability of Climate for Europeans and Opening for White Labour.

As has been stated in previous reports, the climate of this portion of the West Coast is not specially dangerous for Europeans, provided that they are of sound constitution and temperate habits, that adequate precautions are taken against malarial fever, and that residence in the Colony is not unduly protracted. Suitable exercise is necessary for the retention of mental and physical vigour. The extreme humidity of the climate is generally found to be depressing.

There is, practically speaking, no local demand for white labour. All Government officials and the employés of mercantile firms and mining companies are engaged at home, and a European who comes to the Colony in search of employment will rarely find an opening.

Throughout the Gold Coast wages are high as compared with the Eastern Colonies. Domestic servants are paid at rates varying from £1 10*s*. to £3 a month; and a good native cook cannot be obtained under about £4 a month. Servants of the coolie class can be obtained at wages varying from £1 to £1 10*s*. a month.

The authorized Government wage to carriers is 1*s*. per diem and 3*d*. subsistence money. Contract labourers earn 25*s*. a month and also receive 3*d*. a day for rations.

Native artificers find ready employment at rates varying from 1*s*. to 3*s*. per diem, more especially carpenters, coopers, masons, and blacksmiths.

Speaking generally, the cost of living, except in the Northern Territories, is high. Frozen meat of fair quality can be purchased from the mail-steamers at the principal ports, and cold storage has been established at Seccondee and Tarquah, but elsewhere Europeans are dependent to a considerable extent on tinned provisions. Goat's flesh and fowls are obtainable in most

localities, but beef and mutton can usually only be purchased in towns where Mohammedan communities have established themselves. In the Northern Territories, meat and other food-stuffs are both abundant and inexpensive.

Native Affairs.

During the year under review the native affairs of the Colony present few outstanding features. There was no apparent unrest amongst the natives, either of a political or other significance, nor was it necessary to suppress any fetish customs. The divisions of 11 chiefs were brought under the operation of the Native Jurisdiction Ordinance, 1883.

Speaking generally, there have been signs of increased prosperity among the natives, owing principally to the development of agriculture and other economic products. A welcome change is taking place in the attitude of the people towards cultivators of the soil, and the close of the year sees many chiefs and educated natives engaged in agricultural pursuits. There has been no recrudescence of plague in the Colony, and its inhabitants have had every opportunity, of which they have taken advantage, to recover from the vicissitudes of the preceding year.

General Observations.

The year under review was remarkable, even in a decade of material progress and development.

The revenue exceeded expenditure by £44,185; sea-borne trade increased by £495,368; the unfunded debt was reduced by £20,000; while £13,330 was added to the sinking fund for extinguishing the railway loans.

A great impetus was given to the cultivation of agricultural, and the collection of forest, products by the higher prices prevailing in Europe, which enabled the Colony fully to recover from the effects of the epidemic of plague in 1908.

Substantial progress has been made with the construction of railways, which, in the Western Province, will facilitate transport to important mining centres, and in the Eastern Province will open up districts rich in agricultural resources. Work on the trunk road, destined to join the capitals of Ashanti and the Northern Territories, has been rapidly pushed forward; and this link between two such important administrative and commercial centres will greatly facilitate the future development of the interior.

The commercial development of the Colony will be much accelerated by the harbour works under construction at Accra and Seccondee, the former of which will shortly be completed. The sanitary conditions and general amenities of life at these ports should also be greatly improved by the waterworks schemes now in progress.

A loan of £1,000,000 was raised during the year. The issue took the form of 3½ per cent. bonds, and the price realised (£99 per cent.) is a satisfactory testimony to the Colony's financial stability.

The event of the year which, in the estimation of competent observers, is most likely favourably to influence the future of the Gold Coast and its inhabitants, was the decision to reform the system of education. Under the curriculum prescribed by the new rules of the Board of Education, a combined system of literary and technical instruction has been adopted in every Government and assisted primary school. To enable the necessary preliminary training to be obtained, a Government training institution for teachers and a technical school have been successfully opened at Accra, and the new system has been loyally supported by the various missionary societies, which have done so much for the cause of education in the Gold Coast.

A serious and comprehensive effort to improve the general health conditions is being made throughout the Colony and its Dependencies, and a properly-organized sanitary branch of the Medical Department has been established, whose sole duties consist in the improvement of sanitation. A proportion of the sanitary inspectors will, in the first instance, be drawn from the West Indies; but the majority of these inspectors will be locally trained.

These various schemes for the improvement of material, social and hygienic conditions necessarily involve heavy capital and recurrent expenditure; but the revenue continues to expand with, and respond to, the development of the country's rich natural resources, and the future is full of hope to those who have been privileged to participate in furthering the progress of the Gold Coast of to-day.

H. BRYAN,
Colonial Secretary.

5th July, 1910.

COLONIAL REPORTS, &c.

GOLD COAST.

(For Report for 1909, *see* No. 654.)

THE GOVERNOR to THE SECRETARY OF STATE.

Government House,
Accra,
14th July, 1911.

SIR,

I HAVE the honour to transmit, herewith, six copies of the Annual Blue Book of this Colony for the year 1910, with report prepared by the Colonial Secretary.

The statistics contained in the Blue Book indicate a prosperous year of growing revenue and material progress generally.

I have, &c.,

J. J. THORBURN,
Governor.

The Right Honourable
Lewis Harcourt, M.P.,
&c., &c., &c.

(21031—2.) Wt. 31959—459. 1125 & 85. 9/11. D & S. A 2

REPORT ON THE BLUE BOOK OF THE GOLD COAST COLONY FOR THE YEAR 1910.

I.—FINANCIAL.

The most satisfactory feature of the financial year of 1910, was the remarkable increase in the Revenue of the Colony, which surpassed that of all previous years, and, in spite of £134,380 repaid to the Imperial Exchequer and unforeseen expense involved by an outbreak of yellow fever, exceeded the expenditure by £81,771.

With the inclusion of the sum of £8,950, on account of Water Works (which amount was transferred in 1910 from General Expenditure (1907-1909) to Loan Funds), the Revenue amounted to £1,006,633—an increase of £216,863 over the original estimate.

The amounts collected under the several heads of revenue in the Colony, Ashanti, and Northern Territories are shown in the following statement:—

Heads of Revenue.	Actual Revenue to 31st December, 1910.	Revenue for the same period of the preceding year.	Increase.	Decrease.
	£	£	£	£
1. Customs	610,602	458,722	151,880	—
2. Light Dues	2,568	2,373	195	—
3. Licences, &c.	30,718	28,842	1,876	—
4. Fees of Court, &c. ...	50,273	47,006	3,267	—
5. Railways	248,981	181,906	67,075	—
6. Post and Telegraphs ...	6,429	4,425	2,004	—
7. Rents of Government Land.	1,161	1,400	—	239
8. Interest...	2,292	1,946	346	—
9. Ashanti...	37,621	29,264	8,357	—
10. Northern Territories ...	1,806	1,690	116	—
11. Miscellaneous	4,764	10,713	—	5,949
Total	997,215	768,287	235,116	6,188
12. Land Sales	468	54	414	—
Revenue Extraordinary	8,950	10,211	—	1,261
Grand Total ...	1,006,633	778,552	235,530	7,449

The following heads show the chief increases over the revenue originally estimated:—

	£
Customs	110,602
Licences	1,288
Fees of Court, &c.	14,423
Railways	73,981
Post and Telegraphs	1,969
Ashanti	10,911

The increase under "Customs" may be accounted for by the expansion of trade in the Colony; the largest excess is shown under the sub-head "Specific," and is mainly attributable to duty on Spirits.

The increase under "Licences" has been general.

The increase under the head "Fees of Court, &c.," is chiefly due to Stamp Duties and Survey Fees; there are also increased receipts under Customs Overtime Fees, Customs Warehouse Rents, and Mines Police.

Under the head "Railways" a considerable increase is shown in Goods Receipts.

The increase under "Post and Telegraphs" results mainly from larger Parcel Post business and increased Postal Order transactions.

The increase under "Ashanti" is principally due to an amount of £15,316 received in respect of mining royalties; and an increase also occurs under the sub-head "Firearm and Ammunition Licences."

The only heads which show less receipts than were estimated are:—

	£
Rents on Government Land	219
Miscellaneous	6,076

The decrease under "Rent of Government Land" has been caused, to a great extent, by the termination of several leases.

The chief decrease under the head "Miscellaneous" is in respect of royalties, the amount collected being £2,538.

The following table shows the expenditure, in detail, as compared with the year 1909:—

Head of Expenditure.	Expenditure, 1909.	Expenditure, 1910.	Increase	Decrease.
Establishments.	£	£	£	£
1. Governor and Legislature ...	5,439	4,707	—	732
2. Supreme Court	8,242	8,729	487	—
3. Law Officers	2,213	2,694	481	—
4. Secretariat	5,376	6,145	769	—
5. Printing Office	6,626	7,177	551	—
6. Native Affairs	2,137	2,009	—	128
7. Provincial and District Commissioners	19,903	21,421	1,518	—
8. Treasury	10,221	11,431	1,210	—
9. Customs	23,807	27,195	3,388	—
10. Customs, Preventive Services ...	17,503	15,699	—	1,804
11. Lighthouses and Signal Stations	1,347	1,258	—	89
11a. Marine	32	314	282	—
12. Railways	83,132	94,513	11,381	—
13. Post and Telegraphs	21,778	24,389	2,611	—
14. Transport Department	1,693	1,798	105	—
15. Transport and Travelling ...	26,457	8,581	—	17,876
16. Medical	38,591	44,981	6,390	—
17. Sanitation	4,677	7,950	3,273	—
18. Veterinary Surgeon	504	624	120	—

Head of Expenditure.	Expenditure, 1909.	Expenditure, 1910.	Increase.	Decrease.
Establishments—*cont.*	£	£	£	£
19. Education	13,445	17,380	3,935	—

32. Northern Territories	24,661	25,473	812	—
33. Northern Territories Constabulary	10,940	10,493	—	447
34. Ashanti and Northern Territories Roads Department	18,717	27,312	8,595	—
35. Miscellaneous Services	9,738	18,810	9,072	—
36. Pensions and Gratuities ...	12,350	14,796	2,446	—
37. Public Debt Charges	71,945	81,485	9,540	—
38. Public Works Department ...	18,476	23,064	4,588	—
39. Public Works Annually Recurrent	14,878	16,437	1,559	—
40. Public Works Extraordinary ...	78,401	73,628	—	4,773
41. Post and Telegraph Extraordinary	3,210	3,257	47	—
42. Repayment of Loans	25,000	149,380	124,380	—
Railway Survey	1,559	3,094	1,535	—
Total	734,367	924,862	217,147	26,652

The estimated expenditure for the year was £883,540; the actual expenditure amounted to £924,862, being £41,322 in excess of the Estimate.

The excess of actual over the estimated expenditure was due to the special payment to the Imperial Exchequer of £134,380, in addition to £20,000 provided for in the Estimates.

The most noticeable excesses are under the heads of:—

(*a.*) "Ashanti" £2,485, attributable to the increased expenditure on sanitation.

(*b.*) "Miscellaneous" £12,764, results mainly from the expenditure on account of the outbreak of yellow fever, and to a less extent to payments in respect of preventive measures against sleeping sickness.

The sum of £2,914 was expended on the Accra-Akwapim Railway Extension Survey.

The estimated expenditure under the head "Public Works Extraordinary" included an amount of £80,000 in respect of the Accra and Seccondee Water Supply. Provision was subsequently made for the construction of these works from Loan

Funds. Deducting this amount from the estimate, the actual expenditure shows an excess of £3,038, mainly to be accounted for by re-votes to complete unfinished works.

The following is a comparative statement of the total revenue and expenditure for the past five years:—

Revenue.			Expenditure.		
Year.	Amount.	Remarks.	Year.	Amount.	Remarks.
	£			£	
1906	683,102	Includes £10,000 Imperial Grant-in-Aid of Northern Territories.	1906	628,906	Includes £224 on account of Ashanti disturbances, and £26,599 repayment of loans.
1907	708,718	Includes £5,000 Imperial Grant-in-Aid of Northern Territories.	1907	617,124	Includes £5 on account of Ashanti disturbances, and £15,000 repayment of loans.
1908	752,142	——	1908	687,292	Includes £20,000 repayment of loans.
1909	778,552	Includes £10,211 value of Public Works Materials and Stores taken on charge.	1909	734,367	Includes £25,000 repayment of loans.
1910	1,006,633	Includes £8,950 in respect of expenditure on Water Works during 1907–1909.	1910	924,862	Includes £149,380 repayment of loans.

The prosperity of the Colony, as indicated in the above statement of Revenue, is due largely to agricultural development, and evidence of steady growth in trade is shown by the increased receipts under "Customs" and "Railways."

The excess of assets over liabilities on the 1st January, 1910, was £586,906. At the close of the year the excess amounted to £668,677, an increase of £81,771 during the year.

The following is a detailed statement of the assets and liabilities of the Colony on the 31st December, 1910:—

Liabilities.	£	£
Inter-Colonial Accounts (due by the Gold Coast) ...	1,638	
Prisoners' Property	100	
Transport Agency	1,317	
Police Reward Fund	950

Surplus		£668,677

Public Debt.

On the 31st December, 1909, the Public Debt of the Colony was £2,663,498. On the 31st December, 1910, it was reduced to £2,514,118, the difference of £149,380 being repaid to the Imperial Government during the year.

The amount standing to the credit of the Sinking Fund for the redemption of the Funded Debt, on the 31st December, 1910, was £69,866, as against £56,492 at the close of the preceding year. Of the increase of £13,374, the sum of £10,980 was contributed from General Revenue during the year, the balance being in respect of interest realized on investments.

The following statement shows, in detail, the particulars of the Public Debt:—

Funded Debt.

	£
Sinking Fund, £69,866—	
(i.) 3 per cent. Inscribed Stock issued in March, 1902	1,035,000
(ii.) 3 per cent. Inscribed Stock issued against authorised loan of £665,000	63,000
(iii.) 3½ per cent. Inscribed Stock issued against authorised loan of £1,610,000	1,030,000
	£2,128,000

Due to Imperial Government.

	£	£
(i.) Ashanti Expenditure, 1896 ...	98,798	
(ii.) West India Regiment, 1897-1898	10,052	
(iii.) Telegraph lines to the Northern Territories, 1897-1898 ...	29,442	
(iv.) Ashanti disturbances	469,425	
	607,717	
Less repayments	221,599	
		386,118
Total Public Debt		£2,514,118

Currency.

The currency and legal tender are British sterling, with the addition of the undermentioned French, Spanish, and American gold coins, the values of which are fixed by the Demonetization Ordinance, No. 2 of 1880:—

	Nominal Value.	Legal Value. £ s. d.
French—		
Napoleon	20 francs ...	15 10
Spanish—		
Doubloon	16 dollars ...	3 4 0
Half Doubloon	8 ,, ...	1 12 0
American—		
Double Eagle	20 ,, ...	4 2 0
Eagle	10 ,, ...	2 1 0
Half Eagle	5 ,, ...	1 0 6
Quarter Eagle	2 ,, 50 c. .	10 3

British silver coins are legal tender to an unlimited amount; British bronze coins to an amount not exceeding one shilling. The United States half-dollar is current to a small extent, but is not legal tender; its current value is two shillings. The following statement shows the amount of gold, silver, and bronze coinage imported during the past two years:—

Year.	Gold.	Silver.	Bronze.	Total.
	£	£	£	£
1909	28,869	359,538	810	389,217
1910	43,367	62,517	481	656,366

Banks.

The Bank of British West Africa, Limited, is the only commercial bank established in the Colony and its dependencies, and has branches at Accra, Cape Coast, Seccondee, Axim, Coomassie, and Tarquah.

Municipal Bodies.

Municipalities have been established in the towns of Accra, Cape Coast, and Seccondee, under the provisions of the Town Councils Ordinance of 1894. These bodies consist of eight members, of whom four are officials nominated by the Governor, and four representatives elected by the ratepayers. The Governor has power to nominate four members to represent the ratepayers, in the absence of any election, by the failure of voters to nominate.

The following table shows revenue and expenditure of the Town Councils for the past five years:—

—	Revenue.					Expenditure.				
	1906.	1907.	1908.	1909.	1910.	1906.	1907.	1908.	1909.	1910.
	£	£	£	£	£	£	£	£	£	£

II.—TRADE, AGRICULTURE, AND INDUSTRIES.

Imports and Exports.

The total value of the sea-borne trade of the Colony has grown from £5,041,897 in 1909 to £6,128,172 in 1910—an increase of £1,086,275. The value of Specie imported and exported combined was £740,153, as against £585,759 in the preceding year. The value of commercial (*i.e.*, exclusive of specie and Government) imports and exports for 1910, amounted to £5,223,532, being an increase of £949,285 on the previous year.

The gross value of imports (exclusive of expenses on specie), exports, and the total trade for the past five years is shown in the following table:—

Year.	Imports.	Exports.	Total Trade.
	£	£	£
1906	2,058,939	1,996,412	4,055,351
1907	2,366,195	2,641,674	5,007,869
1908	2,029,447	2,525,171	4,554,618
1909	2,394,412	2,655,573	5,049,985
1910	3,439,831	2,697,706	6,137,537

The following table gives the values of imports and exports of dutiable goods, to and from the countries therein classified, during the past two years:—

Countries.	Total imports therefrom.		Total exports thereto.	
	1909.	1910.	1909.	1910.
	£	£	£	£
United Kingdom	1,781,002	2,503,171	1,795,303	1,837,676

Grand total	2,394,412*	3,365,640*†	2,655,573	2,697,706

* Exclusive of specie.

† Not including £74,190 the value of post parcels imported May 1st to December 31st which are not classified as to countries.

Imports.

The total value of imports, as shown above, in the year under review was £3,439,831 (*i.e.*, exclusive of expenses on specie), as against £2,394,412 in 1909, an increase of £1,045,419.

The value of commercial imports in 1910 was £2,618,981, compared with £1,823,343 in 1909; an increase of £795,638, of which amount the following increases are shown as compared with the preceding year:—

	£
Imports paying ad valorem duty	435,143
Imports paying specific duty	137,821
Imports free of duty	148,534
The value of post parcels was	74,190

These values include freight and other charges.

The gross value of Government imports for 1910 was £164,484, compared with £181,852 in 1909—a decrease of £17,368.

The value of specie imported in 1910 was £656,365, as against £389,217 in 1910—an increase of £267,148.

The comparative quantities and values of the principal articles of imports during the last two years are shown in the appended table:—

Articles.		1909. Quantity.	1909. Value.	1910. Quantity.	1910. Value.	Increase.	Decrease.

* Exclusive of expenses on specie and value of Free goods imported across inland frontier, but including value of dutiable goods imported across inland frontiers, and from East to West of Volta.

The following items show a marked increase in 1910 compared with 1909:—

	£
Specie	267,098
Cottons	230,371
Machinery	87,321
Spirits (all kinds)	43,725

	£
Hardware	33,706
Provisions	33,433
Wearing apparel	29,951
Carts and carriages	27,022
Coal	16,096
Lumber	15,510
Perfumery	12,609
Tobacco manufactured	12,564
Rice	12,529
Sugar	11,933
Coopers' stores	11,729
Kerosene oil	11,461
Furniture	11,349

The principal increases may be accounted for as follows:—

"Specie," attributable to the increased purchases of economic products. "Wearing apparel" and "cottons," partly due to an improvement in the quality of imported clothes and fabrics, and to higher prices obtaining in European markets. "Machinery," principally due to the installation of new plants by the mining companies. "Hardware, Lumber and Furniture," mainly caused by the increased activity in house-building and agricultural development. "Carriages and Carts," due to more general use of motor vehicles for transport purposes, following improvement in roads.

The total quantity of spirits of all kinds imported during the year was 1,581,625 gallons, of a declared value of £176,365, as against 1,177,813 gallons of a declared value of £132,640 in 1909; the increase of 403,812 gallons, a value of £43,725, as shown above, is attributable to the increase in local consumption, which is due to general prosperity.

The total revenue derived from spirits in 1910 amounted to £384,538, compared with £298,883 in the previous year, an increase of £85,655.

The decreases in the value of imports as compared with 1909 are:—

"Railway and Rolling Stock," £42,309; due to the completion of the Accra-Akwapim and Tarquah-Prestea Railways.

"Unmanufactured Tobacco," £5,644; attributable to over-importation in 1909.

"Beef and Pork," £3,913; results partly from the increased importation of other classes of provisions, and partly from higher prices obtaining in European and American markets.

Exports.

The gross value of exports from the Colony in 1910 amounted to £2,697,706, as against £2,655,573 in 1909, an increase of £42,133, exclusive of specie. The increase is due to the expansion of the agricultural industry and the consequent larger shipments of economic products.

The comparative return below gives the principal articles of export for the past two years:—

Articles.	1909.		1910.		Increase in Value.	Decrease in Value.
	Quantity.	Value.	Quantity.	Value.		
		£		£	£	£

Totals	—	2,655,573	—	2,697,706	389,341	347,208
		Decrease			347,208	—
		Net Increase			42,133	—

The chief increases compared with 1910 are shown in the following:—

	£
Cocoa	111,224
Rubber	95,182
Palm kernels	72,633
Lumber	65,185
Palm oil	40,410

The high prices obtaining in the European markets have given a stimulus to the increase in these exports.

The principal decreases in the value of exports are as follows:—

	£
Gold, gold dust, and concentrates ...	217,677
Specie	112,755
Cola nuts	16,134

The decrease under the head "Gold" is accounted for by the fact that the attention of the mining companies has been largely devoted to development with a view to more extended and regular crushing operations.

In the appended statement the value of the exports of gold and specie and the value of the principal agricultural and economic products are given separately. The comparative return below shows a decrease of £330,432 in the value of gold and specie; the marked increase shown in the value of the other exports has already been explained:—

	1909.	1910.
	£	£
Value of exports of gold ...	1,008,006	790,329
Do. Do. specie ...	196,542	83,787
Total value of other exports ...	1,451,025	1,823,590
Total value of exports ...	£2,655,573	£2,697,706

Ports.

The principal ports in the Colony are:—

7. Winnebah	31,851	98,424	100,680	199,104
8. Cape Coast... ...	26,958	152,141	53,572	205,713

The principal port of the Colony is Seccondee, the terminus of the Seccondee-Coomassie Railway, which connects the coast both with the mining districts and with Ashanti. Accra, the second in importance, is the headquarters of the Government and the principal port for the shipment of cocoa. It is interesting to note that the total trade of Addah shows an increase of £249,195 during the past five years, while the total trade of Winnebah has grown from £84,454 in 1906 to £199,104 in 1910, an increase of £114,650. These increases are mainly due to the expansion of the cocoa industry.

Preventive Service.

The efficiency of this Service, which is a branch of the Customs Department, was well maintained during the year.

The officers and men, the duties of whom are analogous to those of the coastguard of the United Kingdom, were distributed as follows:—

Volta River Preventive Service	263
Western Frontier Preventive Service ...	150
South-Eastern Frontier Preventive Service	69

The total cost of maintenance in 1910 was £15,699.

Mining.

The value of gold produced in 1910 was £780,397, a decrease of nearly £198,677 as compared with the preceding year. The

decrease occurs in the Colony only, and, as stated above, is mainly due to the fact that production was suspended by certain mines during the year, in order to pay attention to development.

Of the total amount produced in the Colony and Ashanti, 168,511·023 ounces were yielded by mining and 15,180·356 ounces were obtained by dredging.

The appended table gives the value of gold exported by various mining companies during the past five years:—

Name of Company.	1906.	1907.	1908.	1909.	1910.
Gold Coast Colony.	£	£	£	£	£

On the Tarquah conglomerate mines, 115,794 tons were crushed and produced 62,349·905 ounces, being an extraction of 10·77 dwts. per ton of 2,000 lbs.; while from the quartz mines 188,366 tons were crushed and produced 106,161·118 ounces, being an extraction of 11·27 dwts. per ton.

The various dredging companies treated 2,902,863 yards of alluvium, with a production of 15,180·356 ounces of fine gold; an average of 2·51 grains per cubic yard treated.

The amount of footage completed during the year shows a very large increase over the work of mine development in 1909.

As a result of mining operations, the Ashanti Gold Fields Corporation paid dividends amounting to 75 per cent. during the year, and the Abosso Gold Mining Company paid dividends amounting to 15 per cent.

The average daily number of labourers employed by the mining companies throughout the year was 19,137, as compared with 15,895 employed in 1909.

The difficulty in obtaining labour did not appear to be accentuated on account of the increased demand; this may be due to the fact that a considerable number of labourers became available on the completion of the earthworks of the Tarquah-Prestea and the Accra-Mangoase Railways.

The general health and sanitation of the mining community continue to improve under the efforts of the mining companies.

Two hundred and six prospecting and sixty-three mining licences were granted during the year under review, in the Colony and Ashanti. Eleven certificates of validity were issued.

Manufactures.

There are no manufactures of any importance in the Colony or Ashanti. Many of the local requirements such as baskets, pots, fishing-nets, and canoes are supplied by native industries; there is still a considerable demand for "country cloths," which are woven in the Colony; some of these cloths are of handsome design, and as a general rule are more durable than those of European manufacture. The use of European thread in the manufacture of cloths has largely supplanted the locally manufactured threads.

Fisheries.

Although no means exist of obtaining statistics under the head of Fisheries, it is roughly estimated that over 5,000 canoes are employed in the industry. There is a considerable trade in dried fish, large quantities of which are carried far into the interior. The improvement in internal communications is reflected in this industry. In the coast towns there is a large consumption of fresh fish, many varieties of which are excellent. The custom of the natives prohibits fishing on a Tuesday, that day being sacred to the fetish of the sea.

Agriculture.

Good progress has been made in the agricultural development of the Colony, and the efforts of the Agricultural Department have resulted in greater interest being shown by the natives in cultivating and preparing agricultural and economic products.

The quantity of cocoa exported from the Colony during the year is estimated at 50,692,949 lbs. valued at £866,571, as against 42,277,606 lbs. valued at £755,347 in 1909.

The increase may be accounted for by the extended and improved cultivation of this product; it is grown chiefly in the Eastern and Central Provinces, and in Ashanti. The industry is almost entirely in the hands of native farmers, and no accurate estimate can therefore be given of the area of land under cultivation.

The total quantity of rubber exported was 3,223,265 lbs., value £358,876, as compared with 2,764,190 lbs., value £263,694, in the preceding year. The cultivation of the product continues to extend; during the year tappings were made of Para rubber trees, with satisfactory results.

An increase is shown in the export of palm oil, the export value for 1910 being £161,388, as compared with £102,978 in 1909.

The export of palm kernels shows an increased value of £72,633, while that of cola nuts shows a decrease of £16,134 on the preceding year.

During the year the distribution of plants from the Botanical Stations exceeded that of any previous year.

Experiments were made in the year under review, with satisfactory results, in the cultivation of camphor, cinnamon, allspice, and citronella grass.

LANDS.

The following paragraphs under this head from the report for 1909 are again published for general information, there having been no change or legislation in connection with land during the period under review:—

The bulk of land in the Colony belongs to the tribal "stools," and, theoretically, there is no land without an owner. The ascertainment of the exact boundaries of tribal lands is, however, often a matter of considerable difficulty, as towns and villages have sprung up with large tracts of intervening unoccupied land, sometimes dense forest, which is gradually brought under cultivation from either end. Now that the value of land is appreciated, boundary disputes frequently come before the Supreme Court, and in certain parts of the Colony, especially in the mining district of Wassaw, the limits of the lands adjoining tribal stools have been definitely prescribed.

The general principle laid down by judicial decisions is that all land within the recognised territory of a "stool" is the property of that stool. Thus, in the case of every headchief's division, where there are tribal and family stools in subordination to the headchief's stool, all lands within the recognised boundaries of the family or subordinate tribe are held to be attached to the family or tribal stool, but all other unoccupied lands are the property of the headchief's stool. An attempt was recently made in the courts to extend this principle so as to enable the headchief's stool to claim all cultivated land, the original title to which, as is not uncommon in the case of lands under native tenure, is lost in obscurity; but, though no limit of prescription is laid down by native law, the local Court of Appeal held that in the case of long occupation and when there has been cultivation of permanent crops, such as sugar-cane and cocoa, as opposed to the usual shifting cultivation of yams, plantains, and similar food products, the presumption is that the occupation was with the consent of the headchief's stool.

The Crown possesses no waste lands in the Colony, but certain lands have been acquired by the Government from time to time, mostly under the provisions of the Public Lands Ordinance, 1876, which legalises compulsory acquisition for the services of the Colony, on payment of reasonable compensation.

Of recent years deeds have come into common use, especially in land transactions between natives and Europeans. Where these deeds relate to grants of rights of mining, felling timber, and collecting rubber and other products of the soil, they are called concessions, and their validity is inquired into by the Supreme Court, under the provisions of the Concessions Ordinance, 1900. The Court inquires whether the grantors are the native owners of the land, whether the area falls within the prescribed limit of five square miles for a mining concession, and 20 square miles for other concessions, whether the prescribed term of 99 years is exceeded, whether the consideration is adequate, and whether the statutory rights reserved to the natives are included in the deed. A survey and demarcation of boundaries by the Survey Department is ordered, and when this is completed a certificate of validity, giving the lessees an indefeasible title, subject to observance of their covenants, is issued by the Court, in which are contained such modifications of the deed as the Court may impose to bring it within statutory requirements, and to render it a transaction fair and equitable to both parties. The rent from certified concessions is paid to the native grantors through the Government. Concessions granted solely for purposes of plantation of rubber and other products may be exempted from the operation of the Ordinance; whilst concessions to acquire mineral oil are held subject to the Government right of presumption of the oil under Ordinance, No. 15 of 1907.

Forestry.

The work of the Forestry Department, which was formed in 1909, was mainly confined to the inspection of forest areas, with a view to their conservation and the acquisition of reserves. Legislative and administrative proposals are now under consideration.

The quantity and value of timber exported during the past two years, are as follows:—

	Timber.	
	Quantity. lbs.	Value. £
1909	9,838,959	82,937
1910	14,938,749	148,122

Shipping.

The following statement gives the comparative number and tonnage of vessels which entered and cleared at the ports of the Colony during the past five years:—

Mail steamers of the African Steamship Company and the British and African Steam Navigation Company, Limited, both of which are under the management of Messrs. Elder, Dempster and Company, leave Liverpool every Wednesday for Axim, Seccondee, Cape Coast, and Accra, the scheduled time of the voyage being 15 days. Homewards, the mail service leaves Accra every Friday, and is due to arrive at Plymouth in 16 days.

The same companies provide two services of cargo boats from Liverpool, viz., the Brass and Benin Service, which leaves every alternate Saturday and calls at Axim, Seccondee, Cape Coast, Accra, and Saltpond; and Half Assinie, Atuabo, Dixcove, Adjua, Pram Pram, and Quittah every alternate boat. The Opobo Service, which leaves on the other alternate Saturday, calls at Axim, Seccondee, Cape Coast, Accra, Winnebah, and Addah; and at Chama, Elmina, Anamabo, Mumford, Appam, and Berracoe every alternate boat. The cargo services take from 32 to 34 days to Accra. These boats also touch on the homeward voyage at the outward ports of call. The South Coast Service runs every month from Liverpool (on Thursdays) calling outwards and homewards at Half Assinie, Dixcove, Adjuah, Chama, Elmina, Pram Pram, and Quittah, and at Accra homewards.

These lines also provide two services from Hamburg, viz., the Lagos and Creek Service, which leaves Hamburg fortnightly, calling outwards at Seccondee; and Saltpond and Appam every alternate boat. Homewards, calling at Saltpond, Seccondee, Axim; and Pram Pram, Winnebah, and Appam, every alternate boat. The Rivers Service leaves Hamburg every three weeks, and calls at Axim, Cape Coast, Accra, and Addah; homewards at Addah, Accra, and Saltpond. One service is run every month from London (on Thursdays), and calls at Axim, Seccondee, Accra, and occasionally at Cape Coast; homewards at Danoe, Quittah, and Accra.

The present rates of fares by these lines are £28 12*s*. first class, and £20 7*s*. second class, for all ports as far as Winnebah; and £29 14*s*. and £21 9*s*. respectively, for Accra and ports to the eastward.

The Woermann Line runs a mail steamer monthly from Hamburg, which is scheduled to leave Dover on the 11th of every month with passengers and mails for Seccondee and Accra, the duration of the voyage being 15 days. The boats also call homewards at the same ports and leave Accra on the 14th of every month for Southampton. The passenger fares are the same as on the Elder-Dempster steamers. Cargo services of the Woermann Line, Hamburg America Line, and Hamburg Bremen Africa Line leave Hamburg for Gold Coast on the 4th, 14th, 16th and 28th of the month.

The Chargeurs Réunis run a monthly cargo service to the Gold Coast, sailing from Dunkirk on the 5th, Havre 8th, Bordeaux Pauillac 12th of each month. Their main ports of call on the Gold Coast are Accra and Addah. There is also comfortable accommodation for a few cabin passengers on these boats; the voyage takes 14 days from Accra to Bordeaux.

III.—LEGISLATION.

During the year under review fourteen Ordinances were passed by the Legislative Council of the Gold Coast Colony, of which the most important were:—

The Gold Mining Products Protection (Amendment) Ordinance (No. 2 of 1909), which provides that a licence issued by the Commissioner of the District in which a hawker resides shall be valid throughout the Colony, instead of within a district only.

The Motor Traffic (Amendment) Ordinance (No. 4 of 1910), reduces the licence fees for motor-cars and motor-cycles.

The Native Jurisdiction (Amendment) Ordinance (No. 7 of 1910), the main objects of which are to bring all Native Tribunals throughout the Colony under the Native Jurisdiction Ordinance of 1883, so that native jurisdiction may become of a uniform character; to prevent extortion, by prescribing the fees and fines which may be charged or imposed; to provide machinery for the enforcement of decisions and execution of judgments; and generally to facilitate appeals.

The Criminal Code (Amendment) Bill (No. 8 of 1910), provides that sentence of death shall not be pronounced on, or recorded against, a juvenile offender; but that in lieu thereof the offender shall be sentenced to be detained during His Majesty's pleasure.

The Supreme Court (Amendment) Ordinance (No. 9 of 1910), was passed for the purpose of admitting and enrolling persons admitted as law agents in Scotland to practise as barristers and solicitors in the Supreme Court of the Colony.

The Concessions (Amendment) Ordinance (No. 13 of 1910), provides that all concession holders, whether liable to be charged Income Tax in the United Kingdom or otherwise, shall have their profits assessed for duty precisely as they would be assessed to Income Tax in the United Kingdom, and extends the time within which the certificate of assessment must be delivered and payment of duty on profits made to the Treasurer.

Two Ashanti Ordinances and two Northern Territories Ordinances were enacted by the Governor. The Ashanti Administration (Amendment) Ordinance (No. 1 of 1910): The object and effect of this Ordinance is to apply to Ashanti the Statute Law Revision Ordinance, 1909, and certain other Gold Coast Ordinances which amend Ordinances already applied to Ashanti. The Ashanti Administration (Further Amendment) Ordinance (No. 2 of 1910), adds in its proper chronological sequence to the Ordinances of the Gold Coast Colony applied to Ashanti, the Gold Mining Products Ordinance, 1909 (No. 1 of 1909), and any Ordinance amending the same. The Northern Territories Administration (Amendment) Ordinance (No. 1 of 1910), is similar to the Ashanti Administration (Amendment) Ordinance (No. 1 of 1910), mentioned above.

IV.—EDUCATION.

There are, in the Colony and its dependencies, 9 schools controlled and maintained directly by Government. Under the

various Missionary Societies there are 165 schools, which are under inspection by officers of the Education Department, and which receive grants from Government, based on attendance and results. Primary education only is given.

The number of schools inspected during the past two years is shown in the following comparative table:—

Denomination.	1910.	1909.	Increase or Decrease in 1910.
African Methodist E.Z. Mission	4	3	+ 1
Basel Mission	63	65	— 2
Bremen Mission	13	12	+ 1
Church of England (S.P.G.)	3	3	—
Government Schools	9	9	—
Roman Catholic Mission	23	21	+ 2
Wesleyan Mission	48	49	— 1
Accra "Collegiate" and Grammar Schools, Elementary and Secondary.	2	2	—
Totals	165	164	+ 1

Of the 156 Mission Schools inspected, 147 succeeded in obtaining grants-in-aid.

In the year under review, the total number of children on the rolls of all schools under the Board of Education was 17,570, and the average attendance was 12,996; as compared with 1909, these figures show an improvement of 859 and 1,028 respectively. Education is not compulsory.

The total amount given by the Government as grants-in-aid of schools in 1910, was £6,561, as against £6,387 in 1909—an increase of £174.

In addition to the schools shown on the assisted list, there are 227 primary schools, controlled by various religious bodies, with a total of 5,399 pupils on the registers.

The total income of the assisted schools amounted to £12,530, a decrease of £745, as compared with the previous year. Of this amount, the Government contributed a sum of £6,561, as shown above, for grants-in-aid, or over 50 per cent. of the total income; the school fees amounted to £1,434, and the balance is made up of voluntary subscriptions and grants from the mission societies.

The total expenditure by Government on education in the Colony, Ashanti, and Northern Territories, in 1910, amounted to £17,380—an increase of £3,935 over the previous year's expenditure.

The average of the fees paid per pupil in the assisted schools was 1*s.* 9*d.*, as against 1*s.* 5*d.* in the previous year.

A satisfactory report was received on the year's work of the male students who are in residence at the Government Training Institution for Teachers at Accra; specially recommended teachers received instruction in industrial and hand and eye training, with creditable results.

The results obtained from the 156 assisted schools and the nine Government schools have, on the whole, been encouraging; the

establishment of the Government Training Institution will greatly assist the missions in their present difficulty of obtaining the services of capable teachers.

The newly-established schools in Coomassie (Ashanti) and Tamale (Northern Territories) have made good progress; the average number of pupils on the rolls was 343 and 66, respectively.

The results of the instruction given in carpentry, joinery, &c., at the Government Technical School, Accra, have been satisfactory; in addition to the work done by this institution, instruction in agriculture or some other form of industrial work is now given in nearly every school. The total grant earned by the missions under this head shows an increase of £124 on the previous year.

Twenty-nine candidates were successful in obtaining certificates at the courses of instruction in agriculture for students and teachers, held at Aburi, Coomassie, and Tarquah agricultural stations.

Admission to clerkships in the Government service is by competitive examination held by the Education Department; at the annual Civil Service Examination held during the year, 175 candidates were examined, and 77 were successful.

V.—GOVERNMENT INSTITUTIONS.

The total number of cases treated in the hospitals and dispensaries in the Colony during the year was 900 Europeans and 26,291 natives, as compared with 1,019 and 28,827, respectively, in 1909. During the year new hospitals were completed at Tarquah, Akuse, and Winnebah; a special fly-proof hospital was built at Anum in the Volta District, for the treatment of sleeping sickness, and the isolation and observation of suspects.

The following table gives the hospitals in the Colony, and the number of patients treated during 1909-1910:—

Hospitals.	1909.		1910.	
	Number of in-patients.	Number of out-patients.	Number of in-patients.	Number of out-patients.
Accra	591	7,153	632	6,481
Seccondee	456	2,376	475	2,800
Cape Coast	196	4,556	258	4,982
Axim	143	4,956	92	2,458
Saltpond	—	1,423	—	1,095
Winnebah	—	2,122	12	2,366
Tarquah	—	1,105	43	984
Elmina	13	1,304	3	988
Quittah	53	1,298	55	1,541
Addah	29	1,135	25	1,096
Akuse	68	869	26	779
Totals	1,549	28,297	1,621	25,570

In Ashanti there is, at Coomassie, a European hospital with four wards; a nursing sister is attached to this institution, at which 75 patients were treated in 1910. There is also a well-equipped native hospital, containing three wards. Some 838 in-patients and 7,581 out-patients were treated during the year.

In the Northern Territories, at Tamale, a new hospital is in course of construction.

In Accra the hospital consists of three European and four native wards, containing seven and twenty-five beds respectively. A European nursing sister is attached to this hospital. At Cape Coast, the hospital contains accommodation for thirteen Europeans, in three first-class, and two second-class wards; four wards containing 19 beds are provided for native patients; there are, in addition, two wards for contagious diseases. The hospital at Seccondee contains six European wards, including two for convalescents, with a total of 16 beds. Four wards, holding 22 beds, are provided for native patients. Two nursing sisters are attached to this institution.

The total number of patients admitted to the Lunatic Asylum during the year, was 44 males and 6 females, as compared with 23 and 6 in the previous year. The number discharged was 10 males and 5 females, as against 4 and 2 in 1909. The daily average of inmates was 89, the majority of whom are classified as maniacal and dangerous. The patients were chiefly employed in gardening.

The asylum, which is situated at Accra, consists of two large airing yards, one for males and the other for females, each flanked by cells and domitories. There is also a large open shed for shelter and recreation. Hospital accommodation, quarters for the staff and other accessories are provided, and the buildings generally are well-ventilated and cool.

The Post Office Savings Bank continues to maintain its steady progress. The number of depositors' accounts opened in 1910 was 2,716, an increase of 551 over the number opened in the previous year. The value of deposits during the year, including interest credited, amounted to £20,772, and the withdrawals to £16,300, as against £17,632 and £13,600, respectively, in 1909. In the amount withdrawn from the bank is included the sum of £1,169, transferred to the United Kingdom Savings Bank at the request of depositors.

The credit of the Bank on the 31st December, 1910, was £29,187, as against £24,715 in the previous year.

The interest due to depositors during the same period amounted to £596, as against £516 in 1909.

The amount received from investments was £718, as compared with £630 in 1909.

VI.—JUDICIAL STATISTICS.

Police.

The total strength of the police, all ranks, on the 31st December, 1910, was 742, being 22 below the authorised strength; compared with £14,701 in 1909, a decrease of £6.

No change was made in the establishment of the force. The distribution on the 31st December was:—

General police	483
Escort police	148
Mines police	61
Railway police	50
Total	742

Two hundred and thirty-six recruits were enlisted during the year, as compared with 173 in 1909. The men who joined the general police were mostly of the illiterate peasant class; those for the escort police were recruited from the Northern Territories and Hausa tribes. Great difficulty has been experienced in obtaining literate recruits. There were 50 cases of dismissal for various offences as against 82 in 1909.

The advance of trade and consequent opening up of the country has created an increased demand for the services of the police for the escort of specie and bullion (Government and commercial); in no case has a loss been reported. The amount of £409 was realised for the conveyance of specie other than that belonging to the Government, as against £279 in 1909.

More police were employed by the mines, the receipts from this source were £2,219, as compared with £1,779 earned in the previous year.

During the outbreak of yellow fever at Seccondee, the work of the police was highly satisfactory in maintaining order and in assisting to carry out the provisions of the quarantine and land cordon regulations.

Prisons.

The central prisons of the Colony, in which long-sentence prisoners are confined, are at Accra, Cape Coast, Elmina, and Seccondee. The prisoners under sentences of six months serve their time in the minor gaols, viz., Axim, Quittah, Tarquah, Akuse, Addah, Saltpond, Winnebah, and Seccondee (Fort Orange), in the Colony; in Ashanti, at Obuasi and Coomassie, in which prisoners undergo sentences up to three years. In addition, there are four smaller gaols at Dunkwa, Kintampo, Sunyani, and Krachi.

In the year under review, the total number of prisoners admitted was 4,822, showing a decrease of 89 as compared with the previous year. The daily average of prisoners in the Colony and Ashanti was 913, as against 945 in 1909, a decrease of 32.

The returns of prison industries and labour show satisfactory progress. The total earnings for the year amounted to £2,482, as against £2,758 in the preceding year, being a decrease of £276, which may be accounted for by the decrease in the daily average of prisoners. The principal prison industries are carpentry, tailoring, boot and shoe making, and mat and basket making.

The total cost of the prisons during the year was £14,695, compared with £14,701 in 1909, a decrease of £6.

With the exception of a number of cases of chicken pox in the Accra prison, the general health of the prisoners throughout was good.

Criminal Statistics.

The total number of offences dealt with by the Courts of the Colony, Ashanti, and Northern Territories, was 12,116, 2,005, and 484, respectively, as compared with 10,253, 2,486, and 540, in 1909; a total increase of 1,326. The number of convictions obtained was 10,175, 1,739, and 425, respectively, as against 7,992, 2,063, and 467, in 1909; a total increase of 1,817. The increase may be accounted for by the large number of prosecutions made by the sanitary authorities. Twenty-six cases of murder were brought before the court, as compared with sixty-one in the preceding year.

In the Colony, the offences dealt with by the Superior Courts in 1909 and 1910, were as follows:—

	1909.	1910.
Offences against the person	42	61
Offences against property (other than prædial larceny)	53	19
Other offences	3	15
Acquittals	125	84
	223	179

The comparative figures of the summary convictions for the past two years are:—

	1909.	1910.
Convictions for offences against the person	1,354	1,122
Convictions for slave-dealing	6	28
Convictions for offences against property (other than prædial larceny)	1,175	1,062
Convictions for other offences	5,359	7,868
Acquittals	2,136	1,857
	10,030	11,937
Grand total for the Colony ...	10,253	12,116

In Ashanti all offences are dealt with summarily; the results for the past two years are as follows:—

In the Superior Courts.	1909.	1910.
Convictions for offences against the person	14	22
Convictions for slave-dealing	3	—
Convictions for offences against property (other than prædial larceny)	28	13
Convictions for other offences	8	4
Acquittals	7	3
	60	42

In the Inferior Courts.	1909.	1910.
Convictions for offences against the person	187	186
Convictions for slave-dealing	4	12
Convictions for offences against Health Acts	—	830
Convictions for offences against property (other than prædial larceny)	274	203
Convictions for other offences	1,545	469
Acquittals	416	263
	2,426	1,963
Grand total for Ashanti ...	2,486	2,005

In the Northern Territories, trial is also summary; the figures for 1909 and 1910 are as follows:—

In the Superior Courts.	1909.	1910.
Convictions for offences against the person	1	—
Convictions for offences against property (other than prædial larceny)	—	7
Convictions for other offences	10	13
Acquittals	2	2
	13	22

In the Inferior Courts.	1909.	1910.
Convictions for offences against the person	76	122
Convictions for offences against property (other than prædial larceny)	104	87
Convictions for other offences	276	196
Acquittals	71	57
	527	462
Grand total for Northern Territories	540	484

VII.—VITAL STATISTICS.

The census returns for 1901 show the population of the Colony and its Dependencies as 1,696,695, but, partly owing to reluctance on the part of the natives to be enumerated, and partly to defective organization, it was impracticable then to obtain accurate statistics. There is no compulsory registration of births and deaths, but burials are registered in the principal towns in accordance with the provisions of the Cemeteries Ordinance.

The European population is estimated at 1,830; an increase of 115 residents.

The analysis of mortality and invaliding statistics, as given below, shows an increase on the previous year of 14·36 in the death-rate per thousand, and an increase of 5·25 in the invaliding rate per thousand. The highest death-rate was amongst the mercantile community.

The invaliding and death-rate amongst the European officials were higher than in 1909; of the eight deaths, three were from malarial fevers, two from yellow fever, and three from other climatic causes.

The following table gives the statistics of mortality and invaliding of Europeans during 1909 and 1910:—

1909.	Number of Residents.	Deaths.	Invalided.	Death rate per 1,000.	Invaliding rate per 1,000.
Officials	438	5	17	11·41	38·81
Merchants	574	7	25	12·19	43·55
Mining companies ...	585	7	20	11·96	34·18
Missions	118	3	4	25·42	33·89
	1,715	22	66	12·82	38·48
1910.					
Officials	475	8	32	16·84	67·36
Merchants	422	16	7	37·91	16·58
Mining companies ...	660	18	33	27·27	50·00
Missions	135	4	2	29·62	14·81
	1,692	46	74	27·18	43·75

Station.	Number.	Deaths.	Invalided.	Death-rate per 1,000.	Invaliding rate per 1,000.
1909.					
Colony	1,328	17	54	12·80	40·66
Ashanti	312	1	9	3·20	28·84
Northern Territories	75	4	3	53·33	40·00
	1,715	22	66	12·82	38·48
1910.					
Colony	1,273	41	58	32·20	45·56
Ashanti	345	4	15	11·59	43·47
Northern Territories	74	1	1	13·51	13·51
	1,692	46	74	27·18	43·73

The causes of invaliding amongst officials were:—Malarial fever, 6; anæmia, 5; blackwater fever, 3; neurasthenia, 3;

gastritis, 2; heart disease, 2, various, 11. Among non-officials:—Malarial fever, 12; blackwater fever, 6; anæmia, 3; gastritis, 4; various, 17.

As stated in previous reports, no means exist of obtaining accurate statistics as regards the health of the natives; but from the data available it would appear that the sickness rate for the year under review was less satisfactory than that of the previous year.

In the early part of the year there were ten cases of yellow fever, nine of which were fatal, amongst Europeans in Seccondee. Three deaths were also known to have occurred amongst natives.

A sum of £9,305 was spent on preventive measures, and many of the sanitary improvements which were effected are now permanent.

During the year, 50 cases of sleeping sickness were treated in the different hospitals, and 11 deaths were recorded; the disease was more prevalent in Ashanti than in the Colony. Glossina palpalis is reported to be present in most districts, and the possibility of an outbreak of sleeping sickness in the Gold Coast is now recognised, and efforts are being made to cope with the situation.

In Ashanti there were several outbreaks of small-pox. The number of vaccinations performed throughout the Gold Coast was 25,590, of which 14,060 were successful.

During the year, 43,943 cases of diseases were treated, of which 271 proved fatal. The most prevalent maladies were: Dysentery, malarial fever, rheumatism, venereal diseases, diseases of the eye and respiratory system, abscesses, skin diseases, and parasitic diseases.

The following table shows the native mortality as registered in the hospital records, and the number of burials in the cemeteries of the principal towns:—

	Hospital Records.	Burial Permit Records.
1906	126	1,361
1907	113	1,517
1908	554	1,159
1909	232	1,611
1910	271	2,099

Sanitation.

The establishment of a sanitary branch of the Medical Department, mentioned in last year's report, and the vote of a sum of money for yellow fever precautions, resulted in a marked improvement in sanitary conditions. Reforms were effected in the methods of disposing of sewage and refuse. During the year, 8,608½ yards of masonry drains were constructed, and 6,041 yards of ditches were dug and graded.

At Seccondee and Accra, extensive drainage schemes are being undertaken. Good sanitary progress was made in exterminating larvæ, by rendering wells, tanks, and barrels mosquito-proof, filling up water-holes, and clearing undergrowth.

In 1910, 5,170 prosecutions were made by the Sanitation Branch, and 4,397 convictions were obtained in the Courts.

The most difficult problem in connection with improvement of sanitary conditions is the inadequate water supply.

Obuasi is at present the only town in the Gold Coast which has a pipe-borne supply, but water-works for Accra and Seccondee have now been inaugurated. The drinking supply in the towns is for the most part dependent either on rain storage or shallow wells; in the villages the supply is usually from adjacent streams or ponds; during a period of the dry season water is scarcely obtainable in many of the towns.

In August, a committee was appointed to consider draft rules for the laying-out and sanitation of villages in the Colony, and draft rules for mining towns and villages in Ashanti.

During the year, £19,862 was spent on sanitary improvements, including £5,898 at Seccondee, £8,831 at Accra, £1,542 at Cape Coast, and £1,025 at Winnebah. The sum of £7,950 was spent on sanitary supervision.

In addition to the above normal expenditure, the following sums were spent:—

	£
Sleeping Sickness measures (Colony) ...	999
Sleeping Sickness measures (Ashanti) ...	2,575
Yellow Fever outbreak	9,305

The appended table gives the results of the meteorological observations taken at the stations mentioned during the year:—

Station.	Temperature.						Rainfall.	
	Solar maximum.	Minimum on grass.	Shade maximum.	Shade minimum.	Range.	Mean.	Amount in inches.	Degree of humidity.
Accra	147·57	74·77	85·64	64·48	21·18	75·06	39·52	81·85
Aburi	146·14	66·31	84·47	68·18	16·29	76·52	42·67	87·36
Addah	150·21	70·54	83·84	75·69	8·14	79·77	52·32	93·84
Quittah	139·46	60·35	87·44	71·52	15·84	79·48	40·61	75·89
Cape Coast... ...	144·03	60·25	86·11	71·77	14·33	78·94	25·99	84·76
Seccondee	133·39	67·01	88·07	71·53	16·53	79·79	40·77	58·01
Axim	132·57	72·04	85·80	66·66	19·14	76·23	90·99	90·77
Tarquah	142·42	71·43	90·67	70·43	20·23	80·55	78·81	83·01
Coomassie	142·33	73·96	87·86	67·42	20·57	77·69	70·89	87·45

Sunyani	136·14	62·65	89·60	69·50	20·09	79·55	60·08	88·52
Gambaga	126·72	69·06	94·51	72·78	21·72	83·64	50·58	61·98
Tamale	145·63	58·33	95·46	59·66	35·80	77·56	46·21	55·28

VIII.—POSTAL, TELEGRAPH, AND TELEPHONE SERVICES.

The revenue of the department for the year under review amounted to £35,536, as against £32,534 in 1908. The department also collected £9,350 on behalf of the African Direct Telegraph Company and foreign administrations, on account of telegrams despatched from the various local offices; £10,019 was brought to account in respect of Customs Duty collected on parcels.

The expenditure (including telegraph construction) amounted to £27,644, as against £27,000 in 1909.

The growth of the business of the department during the year under review is indicated in the appended statement:—

	1909.	1910.
Sale of Stamps	£17,355	£18,645
Letters and post-cards received and despatched ...	4,711,544	5,175,464
Registered articles	348,646	403,044
Parcels	60,047	77,783
Money orders (value) ...	£49,159	£50,063
Postal do. do. ...	£82,647	£98,636
Do. do. (number) ...	123,282	151,720
Telegrams, public	163,168	170,950
Do. official	85,220	88,512

In the Colony, Ashanti, and the Northern Territories 50 telegraph offices are open to the public; the total length of aerial telegraph wires is 1,424 miles, as compared with 1,363 miles in 1909.

During the year the telegraph system was extended from Accra to Nswam, a distance of 27 miles, at an expenditure of £235, and from Fose to Nswam, a distance of 40 miles, the expenditure being £756.

There are telephone services at Accra, Cape Coast, Dodowa, Seccondee, and Tarquah; of the 147 connections at the five exchanges, 72 are subscribed for by the public.

IX.—ASHANTI.

The total revenue collected in Ashanti during 1910 was £37,621, as against £29,264 in the previous year, an increase of £8,357. The expenditure in 1910 was £117,398, compared with £102,211 in 1909, showing an increase of £15,187.

The general development of this Dependency has been well maintained during the year under review. The imports by railway show a gross value of £438,000, representing an increase of 3,094 tons over the previous year. All classes of imported goods share in this increase, which may be attributed to the general growth of trade, and to the successful working of the mines at Obuasi.

The principal exports of Ashanti are: Gold, rubber, cocoa, cola, corn, and maize. The total value of the output of gold was £403,006, as compared with £301,222 in 1909. The cocoa return shows an increase of 124 tons, the total for 1910 being 1,914 tons, as against 1,790 tons in the preceding year. There is a decrease of 62 tons, compared with 1909, in the quantity of rubber exported; but a large increase in value. The decrease is due to the fact that as low prices obtained towards the end of the year the farmers elected to hold over.

The Ashantis continue to take an intelligent interest in agriculture. During the year much attention was devoted to the cultivation of cocoa and rubber; practical instructions were given by officials of the Agricultural Department in cultivating these products, and in combating fungoid and insect pests. The agricultural station at Coomassie distributed 14,000 rubber seedlings and a large quantity of rubber seeds during the year.

In the year under review, good progress was made in education. The average number of children on the roll of the Government school at Coomassie increased to 344; in addition to this school, there are five assisted, and a number of unassisted, schools belonging to the various Missionary Societies. The average daily number of Europeans in Ashanti in 1909 was 268, and the general health was good. There were between 80 and 90 known cases of sleeping sickness amongst the natives; and small-pox was prevalent in some districts during the year. As in other parts of the Gold Coast, special attention was paid to sanitation.

The relations between the administrative staff and the chiefs continue to be excellent. There are evidences of increasing prosperity, and the outlook for trade is most encouraging.

The annual report* on Ashanti, by the Chief Commissioner, gives full details with regard to judicial, vital, and other statistics.

X.—NORTHERN TERRITORIES.

The total revenue collected in the Northern Territories during 1910 amounted to £1,806, as compared with £1,690 in 1909, an increase of £116. The expenditure debited against the Protectorate was £75,232, as against £67,169 in 1910—an increase of £8,063.

The principal increases of expenditure are shown under the following heads:—

Printing, £1,266, due to a proportionate amount being charged to this Administration for the first time this year.

Medical, £697.

Agriculture, £592.

Ashanti and Northern Territories Roads Department, £4,298.

No marked progress in general trade has been made; it is satisfactory, however, to note that there has been a considerable

---

* Colonial Report No. 680.

increase in the cola and cattle traffic. The natural inclination of the natives is towards agriculture and cattle-breeding; they are, at present, particularly apathetic as regards outside trade. The principal exports of the Protectorate, most of which is open country, are cattle, sheep, goats, and ponies.

The progress of the Government Primary School at Tamale continues to be satisfactory, and the number of pupils increased during the years. Excellent work has been done at the Agricultural Station at Tamale, and successful experiments have been made in the cultivation of different varieties of cotton; satisfactory experiments have also been made with fibres, maize, ground-nuts, and millets.

The relations with the neighbouring foreign Protectorates continue to be most cordial, and the political officials of these Administrations are mutually anxious to co-operate in preventing frontier thieves and other fugitive offenders from seeking refuge in their respective territories. The influence of the Government has been well maintained.

The health of the European officials shows a marked improvement on that of the previous year; there has been no serious epidemic among the natives generally. Good progress has been made in sanitation, especially as regards the provision of water supplies and the introduction of incinerators at all administrative centres. There are now gardens at all stations, where excellent vegetables are grown for the use of European officials.

Further detailed information as to the Protectorate will be found in the Annual Report* of the Acting-Chief Commissioner of the Northern Territories.

XI.—RAILWAYS AND ROADS.

On the 31st December, 1910, the total capital expenditure upon the Seccondee-Coomassie Railway stood at £1,857,238, which sum includes the cost of permanent improvements, additional plant, machinery, and rolling stock provided since the opening of the line.

During the current year the following amounts were charged against the capital account:—

	£
Lowering No. 1 Jetty	3,644
Additional Passenger Rolling Stock	7,288
Total	£10,932

The principal loans for construction were raised at 3 per cent.; their redemption being provided for by a Sinking Fund of 1 per cent., chargeable to the general revenue of the Colony.

The actual revenue for the year exceeded the estimated revenue by £78,329, and amounted to £253,329, as against £185,410 in 1910. The total receipts per mile open were £1,507, as compared with £1,103 in 1909, and per train mile £1 12*s.* 2*d.*, as

* Colonial Report No. 683.

against £1 8*s*. 11*d*. The net revenue earned during the year amounted to £168,529.

The total recurrent expenditure was £84,709, being £3,315 less than the original estimate, and £10,885 in excess of the actual expenditure in 1909. This increase occurs mainly with the maintenance, engineering, and locomotive departments.

The percentage of recurrent expenditure to revenue was 33·47 compared with 39·86 in 1909. Adding the extraordinary expenditure chargeable to capital, which, for the period under review was £10,932, the grand total of expenditure for the year amounted to £95,731, as against £83,304 in 1909; this being equal to 33·78 per cent. of the revenue brought to account.

The working expenditure per mile open was £504, compared with £440 in the previous year, and per train mile 10*s*. 9*d*. as against 11*s*. 6*d*. in 1909.

The general financial position of the Government railways and working results to the 31st December, 1910, are as follows:—

Total capital expenditure ...	£1,857,237 0*s*. 0*d*.
Total revenue earned 1910 ...	£253,328 0*s*. 0*d*.
Total working expenditure in 1910	£84,800 0*s*. 0*d*.
Extraordinary expenditure chargeable to capital ...	£10,932 0*s*. 0*d*.
Proportion of working expenditure to revenue	33·47 per cent.
Proportion of total expenditure (working and extraordinary) to revenue	33·78 per cent.
Net revenue earned	£168,229 0*s*. 0*d*.
Revenue per mile open (168 miles)	£1,507 0*s*. 0*d*.
Expenditure per mile open ...	£504 0*s*. 0*d*.
Total train mileage, exclusive of banking and shunting ...	157,467 miles.
Earnings per train mile ...	£1 12*s*. 2*d*.
Expenditure per train mile ...	£0 10*s*. 9*d*.
Nett earnings per mile open ...	£1,003 0*s*. 0*d*.
Nett earnings per train mile ...	£1 1*s*. 5*d*.
Total number of passengers carried	361,904
Gross tonnage of goods and minerals	83,202 tons.
Average fare per passenger carried	£0 2*s*. 3*d*.
Average earnings per goods ton mile (public and government traffic)	8·06 pence.
Average cost per goods ton mile	·05 ,,
Proportion of goods receipts to total revenue	80·64 per cent.
Proportion of coaching receipts to total revenue	17·83 ,,

Proportion of down to up traffic (goods) tonnage	28·41 per cent.
Proportion of down to up traffic (goods) receipts	17·00 ,,

The amount paid in claims, &c., for goods lost, delayed, and damaged, was £52.

The summary of accidents for the past two years is given below:—

	1909.	1910.
Engine failure	1	5
Derailments of all kinds	24	49
Fallen trees, &c.	261	112
Trolley accidents	5	4
Miscellaneous	18	36
Personal	14	15

Of the personal accidents, none occurred to passengers, of whom 361,904 were carried by the railway during the year. Four out of the 15 cases proved fatal, and the verdict in each case acquitted the railway officials of negligence.

No amendments were made to the revised goods tariff, which was introduced on the 1st August, 1909.

A number of special rates have, however, been given in the carriage of large quantities of provisions, and rebates have been allowed upon consignments of cocoa and rubber shipped from stations in Ashanti.

An amended coaching tariff with regulations was introduced on the 1st January, 1910; the first and third-class passenger fares were reduced from 4*d*. and 2*d*. per mile to 3*d*. and 1*d*. per mile, respectively. Free luggage allowances of 112 lbs. first-class, 84 lbs. second-class, and 56 lbs. third-class were also conceded.

The gross number of passengers carried during the year was nearly 68 per cent. in excess of 1909.

The branch line from Tarquah to Prestea and Broomassie, the construction of which was commenced in April, 1908, was almost completed at the end of the year and was opened for traffic in January, 1911.

The construction of the railway from Accra to Mangoase, which was commenced early in 1909, has been interrupted in consequence of flood damages, which, in places has caused it to be necessary to make important alterations in the original formation level, as well as additional openings, &c. At the end of the year the earthworks were completed, and rails set as far as 38 miles. Ballasting was finished up to the thirty-sixth mile; and, with the exception of the alterations mentioned above, bridges and culverts were completed throughout.

The working survey of the proposed extension of the Accra-Akwapim Railway from Mangoase to Komfrodua, 15 miles in length, has made good progress.

A reconnaissance survey from Komfrodua to Coomassie was completed, and reconnaissance surveys of alternative routes from Nswam to Coomassie were projected.

The first instalment of locomotives and rolling stock has been erected, and good progress has been made with the erection of machinery, shafting, &c., in the workshops.

The approved scheme of harbour extension in connection with the railway in Seccondee has made good progress during the year. The root of the structure and parapet-wall have been completed. The extension of the existing sea-wall in a north-easterly direction has been carried forward about 143 lineal feet, and rails have been laid on the reclaimed surface.

The financial year under review shows a large increase in the working results of the railway; the revenue for 1910 exceeded that of any previous year.

The general increase in the gross revenue is attributable to the marked activity in the mining industry, and to the industrial development of the Colony.

Roads.

With the exception of the trunk road from Coomassie to Tamale, the construction of which is under a special Department, the main roads are constructed and maintained by a branch of the Public Works Department. In addition to these, there are in the Colony 1,863 miles of native roads, which are kept clear of bush and made passable by the chiefs for traders and travellers. A chief receives every quarter, under the provisions of the Roads Ordinance, No. 13 of 1894, a payment proportionate to the length of road so kept in repair, calculated at a rate of 5*s*. to £1 per mile, in the discretion of the Commissioner.

The principal roads are:—

(*a*.) Accra-Dodowa Road, about 27 miles in length. This road is regularly used by motor-lorries and motor-cars.

(*b*.) Accra-Aburi Road, about 25 miles in length, of which the first 13 miles is identical with the road last-mentioned. It is used by motor-lorries as far as Ayimensa, at the foot of the Akwapim Hills. Motor-cars can ascend to Aburi.

(*c*.) Accra-Korle Gono Road, still in course of construction and now nearing completion.

(*d*.) Accra-Nswam-Kibbi Road, about 60 miles in length, was originally constructed by the Goldfields of Eastern Akim, and taken over by the Government in 1904. The traffic has greatly decreased on the Accra-Nswam portion of this road with the opening of the Accra-Nswam Railway. The road between Nswam and Kibbi is being reconstructed and provided with steel and concrete bridges.

(*e*.) Winnebah-Soadru Road, about 15 miles in length. During the year good progress has been made in the reconstruction of this road for motor-lorries and other vehicular traffic.

(*f*.) Saltpond-Insuaim Road, which is about 58 miles in length, is now under process of reconstruction for the motor traffic.

(*g.*) Cape Coast-Prashu Road, about 73 miles in length, the first 21 miles of which is now being reconstructed and provided with permanent bridges. This road was originally the trade and military route to Coomassie, but has lost much of its importance since the construction of the Seccondee-Coomassie Railway.

(*h.*) Among the less important roads in course of reconstruction in the Colony at the end of the year may be mentioned the following:

	Miles.
Adawso-Mangoase Road	5
Somanya-Akuse Road	10
Kpong-Akuse Road	6

(*i.*) Coomassie-Tamale Road, about 230 miles in length. A special Department, as mentioned above, was formed early in 1909 for the purpose of constructing this trunk road. Thirty-seven miles have been completed to formation level during the past two years. It has now been decided not to proceed at present with the construction of this road beyond Ejura, a distance of 62 miles from Coomassie.

XII.—MISCELLANEOUS.

Immigration and Emigration.

No accurate statistics are available under this head, as there is no registration of foreigners either entering or leaving the Colony. As stated in previous reports, it is estimated that some 3,500 labourers enter the Colony every year, in order to obtain employment in the Transport Department or the mines, or as general labourers for various works. The majority of these immigrants are natives from the Kru Coast (Liberia), Sierra Leone, and Lagos.

It is known that a large number of natives leave the Gold Coast every year for employment as carpenters, coopers, masons, smiths, &c., in the neighbouring Colonies.

Public Works.

The progress made with Public Works was fairly satisfactory, but the programme of work was impeded by the outbreak of yellow fever at Seccondee, and in some districts by an inadequate supply of labour, particularly for the construction of roads.

The policy of improving sanitation has been vigorously pursued throughout the Gold Coast, and good progress has been made.

In Accra and Seccondee two additional engineers and two foremen have been appointed to supervise the drainage and other works in these two important towns.

In Accra, the suburban areas of Riponsville, Adabraka, and Korle Gono were laid out in streets, and model houses for Government overseers were constructed; a system is now in force by which building materials can be obtained from Government, the cost being repaid by instalments.

The following are the more important works commenced, in progress, or completed, during the year:—

At Accra, the boys' school, workshops, store, and a double bungalow for the staff were built. The new Post Office in Seccondee was completed; the filling-in of No. 1 lagoon and the extension of the main drain were well in hand at the end of the year.

At Winnebah, the new Customs Warehouse was built.

At Akuse, the greater portion of the new headquarters buildings was completed, and offices are in course of construction.

At Coomassie, the lines for the Gold Coast Regiment were extended, and workshops for the Pioneer Company, a powder magazine, and a bungalow for the staff of the Government school were completed.

At Tamale, a further section of the headquarters was completed.

Water Supply, Accra.—The work in connection with the scheme for the Accra Water Supply was commenced, and a light railway was constructed to Weshiang (dam site), a distance of 13 miles. The late Governor, Sir John Rodger, inaugurated the work by laying the foundation stone of a drinking fountain in Accra.

Good progress was made with the survey and plans for the water-works at Seccondee.

Harbour Works.

During the year under review a length of 220 feet was set in the harbour works breakwater at Accra. Two hundred and sixty feet were built on the breakwater parapet and 255 feet of coping was set. The concrete roadway was completed for a length of 130 feet.

The north and south wing walls were almost completed, and good progress was made with the jetty.

At Seccondee, the work in connection with the rest-wall of the breakwater was completed during the year; the railway quay was extended for a length of 139 feet, and 185 feet of the west reclamation wall was built. The general progress of the work was somewhat delayed by the outbreak of yellow fever.

Survey.

The number of applications received by the Survey Department for the demarcation of mining, agricultural, and oil concessions continued to increase during the year under review; arrangements have been made for a special staff to deal with the surveys of a large number of concessions taken up on both sides of the Prah, north of the 6th parallel.

The work of the Department has been wholly cadastral. Some topographical work in connection with the map of Northern

Ashanti was carried out under the direction of the Intelligence Officer, at Coomassie.

During the year the town survey of Seccondee was completed; the detailed survey of Accra was almost completed, while good progress was made in that of Coomassie. The conduct of the surveys required in connection with the water supply and drainage schemes at Accra is also in the hands of this Department.

Nineteen concession surveys were completed in 1910; an increase of seven over the previous year. The total receipts of the Department amounted to £5,800.

Changes in Establishment.

The latter part of the year was clouded by the death, in England, of Sir John Rodger, K.C.M.G., who had been Governor of the Gold Coast for the past seven years. The measure of the devotion of the late Governor to the interests of the Colony is recorded in the marked progress made during his tenure of office. The news of his death was received everywhere in the Colony with profound grief. On the retirement of the late Sir John Rodger, Major Herbert Bryan, C.M.G., administered the Government from the 2nd September to the 21st November. Mr. James Jamieson Thorburn, C.M.G., Lieutenant-Governor of Southern Nigeria, was appointed Governor of the Gold Coast, and arrived in the Colony on the 21st November.

Transport.

During the year under review the total number of loads handled by the Transport Department was 33,311, which number included the carriers with officers travelling; in addition, 1,275 carriers were sent out on long engagements.

The figures for the previous year were 30,515 and 1,138, respectively.

The conveyance of mails to the Ashanti outstations beyond Coomassie, and to the Northern Territories, was carried out by the Department. During the year 847 bags were transported, as compared with 569 in 1909. The regularity of the system was well maintained—ninety per cent. of the mails being carried under the contract time.

Owing to the outbreak of yellow fever at Seccondee during the year, a special transport service was organized between the port of Chama and Ashieme, a station on the Seccondee-Coomassie Railway, about 7 miles distant from Seccondee, thus enabling communication to be established between Coomassie and the Coast without passing through Seccondee.

The system of ensuring the safety of loads committed to the care of permanent carriers of the Department continues to give satisfactory results; the savings bank deposits of 458 carriers now amount to £3,975.

The following tables show the results of the work done by the Department:—

Seccondee.—Headquarters.

	Loads.
Loads despatched by railway	7,710
Loads despatched by carriers	21
Loads despatched by sea	360
Loads delivered locally	144
Loads moved belonging to officers passing through	6,201
Carriers with officers travelling	1,270
Total at Seccondee	15,706
Carriers engaged on contract for Government	814
Carriers engaged on contract for companies, &c.	275

Coomassie.

	Loads.
Loads despatched by railway	555
Loads despatched by carriers to the Northern Territories	1,982
Loads despatched by carriers to places in Ashanti	905
Loads distributed in Coomassie	7,117
Loads moved belonging to officers passing through	3,209
Bags of mails sent up-country	847
Carriers with officers to the Northern Territories	962
Carriers with officers and troops in Ashanti ...	1,828
Total at Coomassie	17,405
Carriers engaged on contract for Government	106
Carriers engaged on contract for companies	—

Suitability of Climate for Europeans and Opening for White Labour.

The climate is damp, malarious, and unhealthy, especially during the rainy season.

All Government officials and employés of mercantile firms and mining companies are engaged in the United Kingdom; it is inadvisable for a European to come to the Colony for the purpose of seeking employment.

Compared with Eastern Colonies, the wages on the Gold Coast are high. The rates for domestic servants vary from £1 to £5 per month, and cooks are paid from £2 to £5 per month. Servants of the coolie class can be obtained at a rate of wage of £1 to £1 10*s*. per month.

The Government rate for carriers is 1*s*. per diem and 3*d*. subsistence money. Contract labourers and carriers under monthly contract are paid 25*s*. a month, and also receive 3*d*. a day or rations.

Native carpenters, masons, and smiths find ready employment at rates of wages varying from 1*s*. 6*d*. to 4*s*. 2*d*. a day.

Generally, the cost of living, except in the Northern Territories, is high. Frozen meat of fair quality can be purchased from the mail-steamers at the principal ports, and there are cold storages at Seccondee and Tarquah; but in many other places Europeans are dependent, to a great extent, on tinned provisions. Goat's flesh and fowls are obtainable in most localities, and beef and mutton can be purchased in towns where there are Mohammedan communities. In the Northern Territories, meat and other foodstuffs are both abundant and inexpensive.

Native Affairs.

The outstanding feature of the native affairs for the year under review, was the passage into law of an Ordinance amending the Native Jurisdiction Ordinance of 1883, with effect from the 2nd January, 1911. By this enactment the provisions of the earlier Ordinance are applied to all the Divisions of the Colony, and it is hoped that a greater degree of system in the conduct of the native tribunals will be ensured. Several draft by-laws, in respect of sanitation, the maintenance of roads, and the suppression of diseases affecting cocoa plantations, were made by many of the chiefs, and approved by the Governor in Council under the provisions of the Native Jurisdiction Ordinance.

During the year the fetish customs known as Agbe, Dahor, and Ablewa were suppressed by an Order in Council, dated the 30th of September. Three chiefs were destooled, and a like number were elected and installed during the year.

With the exception of a few minor disputes, the year has been one of unbroken peace. The infrequency of disturbances of a political or other nature, and the increasing quantity of economic products exported, are indications that the year has been one of marked prosperity among the natives generally.

General Observations.

The year 1910 was eventful in the history of the Colony. The chief feature was the remarkable financial progress made during the period under review. The revenue, the highest yet recorded, exceeded the expenditure, which included an extraordinary payment of £134,380 to the Imperial Exchequer, by £81,771; the sea-borne trade increased in value to the extent of £1,086,275; the Public Debt was reduced by £149,380, while £13,374 was contributed to the Sinking Fund for its redemption.

The year has been one of increased prosperity among the natives, chiefly owing to progress in agriculture; the development of plantations and the expansion of the area under cultivation are indicated in the larger shipments of economic products.

The pronounced activity in the mining industry gives grounds for confidence in the future of the mines of the Gold Coast and Ashanti.

Following a period of complete freedom of epidemics since the plague in the early part of 1908, an outbreak of yellow fever

occurred at Seccondee in April and May, 1910, but owing to the active measures adopted the disease did not spread. Ten cases occurred, of which nine were fatal; three deaths were also known to have occurred amongst natives. The first death occurred on the 12th of April, and the last death on the 22nd of May.

The principal measures taken for the suppression of the outbreak were (*a*) Seccondee was declared an infected port under the Quarantine Ordinance; (*b*) the usual measures for segregation and disinfection were adopted; (*c*) special steps were taken to destroy the Stegomyia mosquito; (*d*) powers were exercised by the sanitary authorities under the Infectious Diseases Ordinance; (*e*) a transport service was organized between the port of Chama, ten miles to the east of Seccondee, and Ashieme, the nearest railway station beyond Seccondee.

Great credit is due to the Sanitary Branch of the Medical Department, under the organisation of Dr. Rice, for the energy and ability displayed in dealing with the outbreak.

Precautionary measures were taken at all the principal towns in the Colony, and for this purpose a sum of £500 was voted to each of the ports of Axim, Cape Coast, Winnebah, and Saltpond.

Sanitary reform has made rapid progress, but it cannot be doubted that, with the conservative instincts of the natives and their present dislike to measures which modern science shows to be essential to health, it will take a number of years and involve considerable expenditure effectively to improve sanitary conditions.

H. Bryan,
Colonial Secretary.

Accra, 12th July, 1911.

GOLD COAST.

(For Report for 1910, *see* No. 688.)

THE ACTING GOVERNOR TO THE SECRETARY OF STATE.

Government House,
Accra,
10th July, 1912.

SIR,

I HAVE the honour to transmit herewith six copies of the Annual Blue Book of this Colony for the year 1911, together with a report thereon prepared by the Secretary for Native Affairs, Mr. F. G. Crowther, who was good enough to take the work in hand during my temporary absence from the Colony.

I have, &c.,

H. BRYAN,
Acting Governor.

The Right Honourable
Lewis Harcourt, M.P.,
&c., &., &c.

(25721—2.) Wt. 29478—571. 1125 & 90. 9/12. D. & S. A 2

REPORT ON THE BLUE BOOK OF THE GOLD COAST COLONY FOR THE YEAR 1911.

I.—FINANCIAL.

The revenue of the financial year 1911, which amounted to £1,111,632, an increase of £91,632 over the original estimate, surpassed that of all previous years, and exceeded the expenditure by £197,132.

The amounts collected under the several heads of revenue in the Colony, Ashanti, and the Northern Territories are shown in the following statement:—

Heads of Revenue.	Actual Revenue to 31st December, 1911.	Revenue for the same period of the preceding year.	Increase.	Decrease.
	£	£	£	£
1. Customs	663,071	610,602	52,469	—
2. Light Dues	2,646	2,568	78	—
3. Licences, &c.	39,302	30,718	8,584	—
4. Fees of Court, &c. ...	45,981	50,273	—	4,292
5. Railways	294,650	248,981	45,669	—
6. Post and Telegraphs ...	6,126	6,429	—	303
7. Rents of Government Land.	1,342	1,161	181	—
8. Interest	1,131	2,292	—	1,161
9. Ashanti	50,319	37,621	12,698	—
10. Northern Territories ...	2,426	1,806	620	—
11. Miscellaneous	4,586	4,764	—	178
Total	1,111,580	997,215	120,299	5,934
12. Land Sales	52	468	—	416
Revenue Extraordinary	—	8,950	—	8,950
Grand Total ...	1,111,632	1,006,633	120,299	15,300

The following heads show the chief increases over the revenue originally estimated:—

	£
Customs	63,071
Licences	6,852
Railways	19,650
Ashanti	7,669

The increase under Customs is attributable to the general expansion of trade; under Licences, to enhanced receipts for spirit licences and ferry tolls; under Railways, to more traffic, to the opening of the branch line from Tarquah to Prestea, and to the receipts from the Accra-Akwapim Railway; and under Ashanti, to the larger contribution from the Ashanti Goldfields Corporation

towards the sanitation of the Obuassi native township, and to increased royalties.

The principal heads showing less receipts than were estimated are:—

	£
Fees of Court or office, &c.	3,379
Miscellaneous	3,204

The decrease under Fees of Court is due to fewer concessions having been registered in 1911 and to smaller receipts from Stamp Duties; that under Miscellaneous to deferred payments of royalties in 1911.

The following table shows the expenditure, in detail, as compared with the year 1911.

Head of Expenditure.	Actual expenditure to 31st December, 1911.	Expenditure for the same period of the preceding year.	Increase.	Decrease.
Establishments.	£	£	£	£
1. Governor and Legislature ...	6,288	4,707	1,581	—
2. Supreme Court	8,703	8,729	—	26
3. Law Officers	2,491	2,694	—	203
4. Secretariat	6,368	6,145	223	—
5. Printing Office	7,898	7,177	721	—
6. Native Affairs	1,860	2,009	—	149
7. Provincial and District Commissioners.	25,133	21,421	3,712	—

28. Public Cemeteries	674	629	45	—
29. Audit Office	3,641	3,532	109	—
30. Surveys	10,024	7,213	2,811	—
31. Ashanti	34,410	30,814	3,596	—
32. Northern Territories	28,269	25,473	2,796	—
33. Northern Territories Constabulary.	11,096	10,493	603	—
34. Ashanti and Northern Territories Roads Department.	24,465	27,312	—	2,847

Head of Expenditure.	Actual expenditure to 31st December, 1911.	Expenditure for the same period of the preceding year.	Increase.	Decrease.
Establishments—*cont.*	£	£	£	£
35. Miscellaneous Services	11,989	18,810	—	6,821
36. Pensions and Gratuities ...	16,831	14,796	2,035	—
37. Public Debt Charges	80,677	81,485	—	808
38. Public Works Department ...	31,785	23,064	8,721	—
39. Public Works Annually Recurrent.	22,441	16,437	6,004	—
40. Public Works Extraordinary ...	108,268	73,628	34,640	—
41. Post and Telegraph Extraordinary.	1,232	3,257	—	2,025
42. Repayment of Loans	25,000	149,380	—	124,380
43. Railway Survey	4,677	3,094	1,583	—
Total	914,500	924,862	137,734	148,096

The estimated expenditure for the year was £989,390; the actual expenditure amounted to £914,500, being £74,890 under the estimate.

The most noticeable increases, as compared with the expenditure of previous years, occur under the head Public Works Extraordinary, £34,640, due to a larger programme of Public Works; under Railways, £33,396, due to an increased engine mileage and the consequent greater consumption of fuel and heavier station expenses; under Sanitation, £10,581, due to the provision of more labour and a more efficient service; under Public Works Department, £8,721, and Medical, £6,488, due to a larger establishment; and under Public Works Recurrent, £6,004, due to increased minor works and current repairs to Government buildings and to the maintenance of roads hitherto controlled by the town councils.

The decrease under Repayment of Loans is attributable to the special payment to the Imperial Government of £134,380 in 1910.

The following is a comparative statement of the total revenue and expenditure for the past five years.

Revenue.			Expenditure.		
Year.	Amount.	Remarks.	Year.	Amount.	Remarks.
	£			£	
1907	708,718	Includes £5,000 Imperial Grant-in-Aid of Northern Territories.	1907	617,124	Includes £5 on account of Ashanti disturbances, and £15,000 repayment of loans.

Revenue.			Expenditure.		
Year.	Amount.	Remarks.	Year.	Amount.	Remarks.
	£			£	
1908	752,142	—	1908	687,292	Includes £20,000 repayment of loans.
1909	778,552	Includes £10,211 value of public works materials and stores taken on charge.	1909	734,367	Includes £25,000 repayment of loans.
1910	1,006,633	Includes £8,950 in respect of expenditure on water works during 1907–1909.	1910	924,862	Includes £149,380 repayment of loans.
1911	1,111,632	—	1911	914,500	Includes £25,000 repayment of loans.

To agricultural development the prosperity of the Colony is in a large measure due; and the steady growth in trade is indicated by the enhanced receipts under Customs and Railways, the latter head showing the greater proportionate increase. The excess of assets over liabilities on the 1st of January, 1911, was £668,677; at the close of the year the excess amounted to £865,809, an increase of £197,132.

The following is a detailed statement of the assets and liabilities of the Colony on the 31st of December, 1911:—

LIABILITIES.	£	£
Inter-Colonial Accounts (due by the Gold Coast) ...	1,587

PUBLIC DEBT.

On the 31st of December, 1910, the Public Debt of the Colony was £2,514,118. On the 31st of December, 1911, it was reduced to £2,489,118, the difference of £25,000 being repaid to the Imperial Government during the year.

The amount standing to the credit of the Sinking Fund for the redemption of the Funded Debt on the 31st of December, 1911, was £84,023, as against £69,866 at the close of the preceding year. Of the increase of £14,157, the sum of £10,980 was contributed from General Revenue during the year, the balance being in respect of interest realized on investments.

The following statement shows, in detail, the particulars of the Public Debt:—

	£	£
Sinking Fund, £69,866—		
(i.) 3 per cent. Inscribed Stock issued in March, 1902 ...	1,035,000

Currency.

The currency and legal tender are British sterling, with the addition of the undermentioned French, Spanish, and American gold coins, the values of which are fixed by the Demonetization Ordinance, No. 2 of 1880:—

	Nominal Value.	Legal Value. £ s. d.
French—		
Napoleon	20 francs ...	15 10
Spanish—		
Doubloon	16 dollars ...	3 4 0
Half Doubloon	8 ,, ...	1 12 0
American—		
Double Eagle	20 ,, ...	4 2 0
Eagle	10 ,, ...	2 1 0
Half Eagle	5 ,, ...	1 0 6
Quarter Eagle	2 ,, 50 c.	10 3

British silver coins are legal tender to an unlimited amount; British bronze coins to an amount not exceeding one shilling. The United States half-dollar is current to a small extent, but is not legal tender; its current value is two shillings. The following statement shows the amount of gold, silver, and bronze coinage imported during the past two years:—

Year.	Gold.	Silver.	Bronze.	Total.
	£	£	£	£
1910	43,367	62,517	481	656,366
1911	80,275	800,115	702	881,092

Banks.

The Bank of British West Africa, Limited, is the only commercial bank established in the Colony and its dependencies, and has branches at Accra, Cape Coast, Seccondee, Axim, Coomassie, Tarquah, Saltpond, and Winneba.

MUNICIPAL BODIES.

Municipalities have been established in the towns of Accra, Cape Coast, and Seccondee, under the provisions of the Town Councils Ordinance of 1894. These bodies consist of eight members, of whom four are official, nominated by the Governor, and four representatives elected by the ratepayers. The Governor has power to nominate four members to represent the ratepayers if there is no election through the failure of voters to nominate.

The following statement shows revenue and expenditure of the town councils for the past five years:—

—	Revenue.					Expenditure.				
	1907.	1908.	1909.	1910.	1911.	1907.	1908.	1909.	1910.	1911.

II.—TRADE, AGRICULTURE, AND INDUSTRIES.

IMPORTS AND EXPORTS.

The total value of the seaborne trade of the Colony has grown from £6,128,172 in 1910 to £7,565,630 in 1911, an increase of £1,437,458. The combined value of specie imported and exported was £1,202,237 as against £740,153 in the preceding year. The value of commercial imports and exports for 1911, excluding specie and Government materials, amounted to £6,234,204, this sum showing an increase of £1,001,307 on that for the previous year.

The gross value of imports (exclusive of expenses on specie), exports, and the total trade for the past five years is shown in the following table:—

Year.	Imports.	Exports.	Total Trade.
	£	£	£
1907	2,366,195	2,641,674	5,007,869
1908	2,029,447	2,525,171	4,554,618
1909	2,394,412	2,655,573	5,049,985
1910	3,439,831	2,697,706	6,137,537
1911	3,784,260	3,792,454	7,576,714

The following table gives the values of imports and exports of dutiable goods to and from the countries therein classified during the past two years:—

Imports.

As shown above, the total value of imports for 1911 was £3,784,260, an increase of £344,429 on the figures for the preceding year.

The value of commercial imports in 1911 was £2,762,946, compared with £2,618,981, an increase of £143,914. The details of this increase are as follows:—

	£
Imports paying *ad valorem* duty ...	72,847
Imports paying specific duty	14,961
Imports free of duty	3,159
Post parcels	52,947

These values include freight and other charges.

The gross value of Government imports for 1911 was £140,222, showing a decrease on the figures for 1910 of £24,262.

The value of specie imported in 1911 was £881,092 against £656,365 in 1910, an increase of £224,727.

The comparative quantities and values of the principal articles of imports during the last two years are shown in the appended table:—

Total	—	3,439,831	—	3,784,260	456,819	112,390
			Decrease		112,390	—
			Net Increase... ...		344,429	—

The principal increases in the value of imports in 1911 compared with 1910 were as follows:—

	£
Coal	29,434
Hardware	16,762
Provisions	11,798
Lumber	10,833
Specie	224,727

The reasons assigned for the increase in the import of coal is the greater demand made by the mining companies, the Government railways, and water works; of hardware, to the general

expansion of trade; of provisions, to a like cause and a growing demand for imported foodstuffs; of lumber, to building improvements, dwelling houses and stores; and of specie, to commercial activity generated by the production of an abnormally large cocoa crop.

The increased value in the imports of such articles as beads, gin, soap, earthenware, and tobacco may be attributed to the improved purchasing power of the people due to agricultural prosperity.

The principal decreases in the value of imports in 1911 compared with 1910 were as follows:—

	£
Machinery	24,370
Coopers' stores	14,970
Wearing apparel	13,949
Kerosene oil	13,090
Railway plant and rolling stock ...	16,122

The decrease of the imports of machinery is attributed to the fact that the equipment of most of the mining companies is more complete than in former years; of coopers' stores, to the reduced export of palm products; of wearing apparel, to the non-classification of post parcel imports; of kerosene oil, to belated consignments; and of railway plant and rolling stock, to the completion of orders for the Accra-Akwapim railway.

Exports.

The total value of all seaborne exports from the Colony during 1911 amounted to £3,792,454, against £2,697,706 in 1910, an increase of £1,094,748 or 40·59 per cent. This was due chiefly to the larger shipments of cocoa, gold, and specie.

The appended table is a comparative statement of the principal articles of export for the years 1910 and 1911:—

Articles.	1910.		1911.		Increase in Value.	Decrease in Value.

Other Articles... ... —	—	10,281	—	12,962	2,681	—
Total	—	2,697,706	—	3,792,454	1,285,511	190,763
			Decrease		190,763	—
			Net Increase		1,094,748	—

The following are the chief articles showing increased values:—

	£
Cocoa	746,897
Gold	281,287
Specie	237,358
Cola	15,383

The increase in the value of cocoa exported equals 86·19 per cent. In two years the export has been almost doubled in quantity and more than doubled in value. The increase, which equals 35·59 per cent., in gold is attributed to the resumption of milling operations after a period of development, and of cola, to the greater use of the rail and sea route to Northern Nigeria.

The abnormal export of specie, which was chiefly sent to Southern Nigeria, is principally due to the superabundance of the import.

The most notable decreases in the value of exports are as follows:—

	£
Rubber	139,429
Palm oil	32,472

The value of the exports of the former product shows a decrease of 38·85 per cent., the quantity of 17·20 per cent. The cause of the decrease is assigned to the fall in prices in the European markets.

The fall in the value of palm oil, which is equal to 20·12 per cent., is explained by the attraction held out to farmers by the more easily won profits of the cocoa industry.

In the appended statement, the values of the exports, in respect of 1910 and 1911, of gold and of specie, and of the other articles of export added together, are given separately. The last item includes little that cannot be classified as an economic or agricultural product.

	1910	1911
	£	£
Value of export of gold ...	790,329	1,057,692
Value of export of specie ...	83,787	321,145
Total value of other exports..	1,823,590	2,413,617
Total value of exports...	£2,697,706	£3,792,454

PORTS.

The principal ports in the Colony are:—

Port.	Total Customs Duties.	Total Values.		Total Trade.
		Imports.	Exports.	
	£	£	£	£
1. Seccondee	178,882	1,575,773	1.596,410	3,172,183
2. Accra	143,444	1,049,844	1,085,205	2,135,040
3. Addah	94,525	309,750	331,096	640,846

Port.	Total Customs Duties.	Total Values.		Total Trade.
		Imports.	Exports.	
	£	£	£	£
4. Axim	19,258	80,857	108,868	189,725
5. Saltpond	37,071	110,567	171,659	282,226
6. Quittah	42,819	109,129	80,724	189,853
7. Winnebah	36,467	119,004	155,410	274,414
8. Cape Coast... ...	28,759	131,686	88,475	220,161

The figures indicative of the trade during 1911 of all these ports with the exception of Axim show an increase on those for 1910. Seccondee owes its position to the fact that it is the terminus of the Seccondee-Coomassie Railway, which connects the coast both with the mining district and with Ashanti. The trade of Accra has more than doubled during the last five years, and the ports of Winnebah and Addah show a satisfactory increase.

Preventive Service.

The efficiency of the Preventive Service, which is a branch of the Customs Department and operates on the frontiers of the adjoining Administrations, was well maintained.

The distribution was as follows:—

Volta River Preventive Service	255 men
Western Frontier Preventive Service ...	108 ,,
South Eastern Frontier Preventive Service	77 ,,
North Eastern Frontier Preventive Service	42 ,,

Mining.

The value of gold produced in 1911 was £1,079,024, an increase of £298,626 on the figures for the previous year.

Of the total amount produced, 238,571·650 oz. were obtained by mining and 15,405·554 oz. by dredging.

In the Colony the increase amounted to £171,045 and in Ashanti to £127,578.

The table below gives the value of gold exported by the various mining companies during the past five years:—

On the Tarquah conglomerate mines 91,802 tons were crushed and produced 44,232·846 ounces, this being an extraction of 9·64 dwts. per ton of 2,000 lbs.; from the quartz mines 359,990 tons crushed produced 194,289·404 oz. this being an extraction of 10·79 dwts. per ton, while 49·40 oz. were obtained by sluicing.

The various dredging companies treated 2,545,173 yards of alluvium with a production of 15,405·554 oz. of fine gold, an average of 2·90 grains per cubic yard treated.

The average daily number of labourers employed by the mining companies throughout the year was 19,153 as compared with 19,138 in 1910.

There was no apparent shortage of labour, but towards the end of the year several mining companies introduced labourers from other Colonies to meet the anticipated increased requirements for the year 1912.

Two hundred and forty-eight prospecting and seventy-one mining licences were granted in Ashanti and the Colony during the year under review. Twenty-one certificates of validity were issued.

Manufactures.

Native manufacturers are insignificant. Cloths are woven in many parts of the Colony, usually of yarn spun in Europe, but in the northern districts occasionally of thread manufactured from the indigenous cotton plant.

Many of the local requirements such as canoes, baskets, pots, and fishing nets are supplied by native industries. Salt is roughly prepared from the lagoons between Accra and Quittah and sent up country to the markets of the Northern Territories.

Fisheries.

A number of canoes, estimated at 5,000, are employed in the fishing industry. The trade in cured fish is considerable and appears to be on the increase. 1,400 tons of this commodity were carried on the Seccondee-Coomassie line in 1911 as against 755 tons in the preceding year.

Agriculture.

Agriculture is the staple industry of the interior. The chief food crops are yam, cassada, maize, amankani (a species of eddo), and plantain. The most important cultivated product grown for export is cocoa. The quantity shipped in 1911 amounted to 88,987,324 lbs., valued at £1,613,468, against 50,692,949 lbs., valued at £886,571, in the previous year. The industry is almost entirely in the hands of native farmers, and no accurate estimate of the area of land under cultivation can be given.

The quantity of cola exported was 5,791,931 lbs., an amount higher than that recorded for any previous year.

The returns for palm kernels (13,254 tons) show a slight decrease on the figures for the previous year, but the quantity is higher than that exported in any year of the last five with the exception of 1910.

A decrease is shown in the export of palm oil, the quantity shipped in 1911 being 1,610,209 gals. as against 2,044,868 gals. in 1910. Rubber also shows a decline, 2,668,667 lbs. being exported in 1911, compared with 3,223,265 lbs. in the previous year.

Agricultural stations in charge of European curators are established at Aburi, Tarquah, and Assuantsi in the Colony, at Coomassie in Ashanti, and at Tamale in the Northern Territories.

European and native instructors under the control of the Director of Agriculture are constantly travelling and advising the native farmers as to the cultivation and preparation of the various products of the soil.

An Agricultural Show was held at Kibbi in December, and the Government participated in the International and Allied Trades Rubber Exhibition held in London during the year.

Forestry.

The work of the Forestry Department was mainly confined to the inspection of forest areas.

The quantity and value of timber exported during the last two years were as follows:—

		1910	1911
Quantity	...	14,938,749 ft.	13,937,396 ft.
Value	...	£148,122	£138,821

Imperial Institute.

Reports on the following subjects were furnished by the Imperial Institute to the Government of the Gold Coast during 1911 as the result of investigations conducted in the Scientific and Technical Department, supplemented when necessary by reference

to manufacturers and commercial experts. In some cases recommendations have been made as to the further action which is required in the Colony to develop the production of materials for which there would be a satisfactory commercial demand.

A sample of Nyasaland Upland cotton grown at Labolabo was of good quality, although rather uneven in strength; it was valued at 9·87*d.* per lb., with "middling" American at 8·37*d.* per lb. Recommendations were made regarding the acclimatisation of this cotton in the Gold Coast.

A sample of native cotton from the Dagomba District of the Northern Territories was of excellent colour but somewhat harsh and rather short. It would probably be readily saleable though scarcely rough enough to compete with rough Peruvian cotton; it was valued at 8·67*d.* per lb. with "middling" American at 8·37*d.* per lb.

Three samples of imperfectly prepared Hibiscus fibre were received from Tamale. These fibres would be saleable as substitutes for jute, but they are inferior to the latter fibre on account of their interlacing character. The samples were valued in London at £17 to £21 per ton, with "first native marks" Calcutta jute at £22 per ton. Botanical specimens of the plants yielding these fibres were identified at Kew as *Hibiscus sabdariffa*, Linn., *H. cannabinus*, Linn., and *H. squamosus*, Hochr.

A sample of Funtumia biscuit rubber prepared with formaldehyde contained a little more resin and proteid than is desirable, but was otherwise of good quality, and was valued at 6*s.* 10*d.* to 7*s.* per lb. in London with fine hard Para at 6*s.* 11*d.* per lb. A small consignment of Funtumia biscuit rubber prepared by the natives was also received, but it arrived in bad condition as the rubber had been packed in a very moist state. It was sold at 3*s.* 6*d.* per lb. with fine hard Para at 4*s.* 9*d.* and Gold Coast lump at 1*s.* 8*d.* to 1*s.* 11*d.* per lb.

Samples of the roots and stems of three gutta-yielding plants were examined, but only one of them contained sufficient gutta to make extraction on a commercial scale worth consideration. The roots and stem of this plant contained respectively 11·35 and 2·10 per cent. of gutta, which might perhaps find a market at 1*s.* 6*d.* per lb. in London.

A further sample of "Diecha" juice, which is used as a coagulating agent for Funtumia latex, was examined but was found to have lost its coagulating action during transit. It appears probable that some alteration in composition occurs on keeping, and the composition of the active juice can thus apparently only be satisfactorily investigated locally in the Colony.

At the request of the Imperial Institute botanical specimens of certain Hevea trees (supposed to be *Hevea spruceana*) growing at Aburi were forwarded for determination, as it has been stated by M. Yves Henry that experiments with *Hevea spruceana* in the Gold Coast and Southern Nigeria had shown that this species was more suitable for cultivation in West Africa than *H. brasiliensis*. The specimens were however determined at Kew as *Hevea brasiliensis*, Mull. Arg., and it therefore appears that the supposed *Hevea spruceana* trees at Aburi, like those in Southern Nigeria,

are wrongly named. M. Henry's opinion regarding the relative value of the two species in West Africa was therefore based on erroneous determinations.

In continuation of the previous experiments on the preparation of cocoa, five samples which had been prepared by different methods in accordance with recommendations made by the Imperial Institute were received for valuation. The samples were submitted to brokers and manufacturers; the London brokers' valuations varied from 50*s*. to 55*s*. per cwt. whilst Liverpool brokers valued them at from 45*s*. to 51*s*. per cwt. The manufacturers' valuations ranged from 46*s*. to 53*s*. per cwt. Both brokers and manufacturers regarded the fermented cocoa as superior to the unfermented samples. Further recommendations have been made for additional experiments in connection with this question.

Samples of cola nuts derived from *Cola acuminata*, *C. Johnsonii*, and *C. verticillata* were found to contain respectively 2·1, 0·8, and 0·8 per cent. of total alkaloid, expressed on the dried nuts. The samples were all valued at 1½*d*. to 2*d*. per lb. in Liverpool (February, 1911). This sample of the nuts of *C. acuminata* is remarkable in containing a high percentage of caffeine.

Botanical specimens of the plant yielding "Baco" or "Abaku" nuts were received during the year and were identified at Kew as *Dumoria heckeli*, A. Chev.

An examination of three samples of petroleum from Bonyere showed that the oil contains no light petroleum and very little kerosene. The oil could however be used for the production, by distillation, of burning oil, lubricating oil, and "pitch." The "pitch" obtained under certain conditions of distillation was of an asphaltic nature and could be employed in conjunction with limestone for paving purposes.

Two samples of limestone from Bokakre and Beyin were found to be suitable for the production of mortar, or of lime for agricultural purposes, and also for cement-making in admixture with a suitable clay or shale.

Lands.

The following paragraphs under this head from the Report for 1910 are again published for general information, there having been no change or legislation in connection with land during the period under review:—

The bulk of land in the Colony belongs to the tribal "stools," and theoretically there is no land without an owner. The ascertainment of the exact boundaries of tribal lands is, however, often a matter of considerable difficulty, as towns and villages have sprung up with large tracts of intervening unoccupied land, sometimes dense forest, which is gradually brought under cultivation from either end. Now that the value of land is appreciated, boundary disputes frequently come before the Supreme Court, and in certain parts of the Colony, especially in the mining district of Wassaw, the limits of the lands adjoining tribal stools have been definitely prescribed.

The general principle laid down by judicial decisions is that all land within the recognised territory of a "stool" is the property of that stool. Thus, in the case of every head chief's division, where there are tribal and family stools in subordination to the head chief's stool, all lands within the recognised boundaries of the family or subordinate tribe are held to be attached to the family or tribal stool, but all other unoccupied lands are the property of the head chief's stool. An attempt was recently made in the courts to extend this principle so as to enable the head chief's stool to claim all cultivated land the original title to which, as is not uncommon in the case of lands under native tenure, is lost in obscurity; but, though no limit of prescription is laid down by native law, the local Court of Appeal held that in the case of long occupation and when there has been cultivation of permanent crops, such as sugar-cane and cocoa, as opposed to the usual shifting cultivation of yams, plantains, and similar food products, the presumption is that the occupation was with the consent of the headchief's stool.

The Crown possesses no waste lands in the Colony, but certain lands have been acquired by the Government from time to time, mostly under the provisions of the Public Lands Ordinance, 1876, which legalises compulsory acquisition for the services of the Colony on payment of reasonable compensation.

Of recent years deeds have come into common use, especially in land transactions between natives and Europeans. Where these deeds relate to grants of rights of mining, felling timber, and collecting rubber, and other products of the soil, they are called concessions, and their validity is inquired into by the Supreme Court, under the provisions of the Concessions Ordinance, 1900. The Court inquires whether the grantors are the native owners of the land, whether the area falls within the prescribed limit of five square miles for a mining concession and 20 square miles for other concessions, whether the prescribed term of 99 years is exceeded, whether the consideration is adequate, and whether the statutory rights reserved to the natives are included in the deed. A survey and demarcation of boundaries by the Survey Department is ordered, and when it is completed a certificate of validity, giving the lessee an indefeasible title, subject to observance of his covenants, is issued by the Court, in which are contained such modifications of the deed as the Court may impose to bring it within statutory requirements, and to render it a transaction fair and equitable to both parties. The rent from certified concessions is paid to the native grantors through the Government. Concessions granted solely for purposes of plantation of rubber and other products may be exempted from the operation of the Ordinance; whilst concessions to acquire mineral oil are held subject to the Government right of presumption of the oil under Ordinance No. 15 of 1907.

SHIPPING.

The following statement gives the comparative number and tonnage of vessels which entered and cleared at the ports of the Colony during the past five years:—

Sailing Vessels.

The mail steamers of the African Steamship Company and the British and African Steam Navigation Company, both of which are under the management of Messrs. Elder Dempster and Company, leave Liverpool every Wednesday for Seccondee, Cape Coast, and Accra, and on alternate Wednesdays for Axim, the scheduled time of the voyage being 15 days. Homewards, the mail service leaves Accra every Friday and is due to arrive at Plymouth in 16 days.

The same companies also provide three services of cargo boats from Liverpool; the Benin and Brass service, the Opobo service, and the South Coast service. The steamers of the first named service leave every alternate Saturday and call at Axim, Seccondee, Cape Coast, Saltpond, and Accra. Those of the Opobo service, which sail on the other alternate Saturday, call at Axim, Seccondee, Cape Coast, Winneba, Accra, and Addah and every alternate boat at Appam; the same ports of call are touched on the homeward voyage. Boats in the South Coast Service run every month from Liverpool on Thursdays, calling outwards and homewards at Half Assini, Dixcove, Ajua, Chama, Elmina, Pram Pram and Quittah, and at Accra homewards.

Two services from Hamburg, known as the Creeks Services No. 1 and No. 2, are provided by these lines. The ships of the No. 1 Service leave Hamburg on the 12th and of No. 2 Service on the 25th of each month; those of the former service call at Seccondee, Saltpond, and Addah outwards and at Addah, Accra, and Saltpond homewards; those of the latter at Axim, Seccondee, Cape Coast, Saltpond, Appam, Winneba, and Accra outwards, and Winneba, Appam, Saltpond, Seccondee, and Axim homewards.

A monthly service runs from London on Thursdays, calling at Axim, Seccondee, and Accra, and occasionally at Cape Coast outward; and at Danoe, Quittah, and Accra homewards.

The cargo service takes from 32 to 34 days to Accra.

The rates of fares from Liverpool by these lines are £28 12*s.* first class, and £20 7*s.* second class, for all ports as far as Winneba; and £29 14*s.* and £21 9*s.*, respectively, to Accra and eastward ports.

The Woermann Line runs two mail steamers monthly from Hamburg, calling at Dover on the 11th and 26th of each month, with passengers and mails for Seccondee and Accra. The boats also call homewards at the same ports on the 14th and 29th of each month, and disembark passengers at Southampton. The passenger fares are the same as on the Elder Dempster steamers, and the duration of the voyage is 15 days. Cargo services of the Woermann, Hamburg-Amerika, and Hamburg-Bremen-Afrika Lines leave Hamburg for the Gold Coast ports on the 12th, 16th, and 30th of each month.

The Chargeurs Réunis run a monthly service to the Gold Coast, sailing from Dunkirk on the 5th of each month. One passenger boat monthly calls at Accra on the homeward voyage.

III.—LEGISLATION.

Nineteen Ordinances were passed by the Legislative Council during the year under review, of which the most important are described below.

The Census Ordinance provides for the taking of a census of the Colony, the appointment of enumerators and other officers, and the punishment of persons refusing or giving wrong information.

The Spirit Licence Ordinance applies, generally, the provision of the Spirit Licence Ordinance, 1887, which it repeals, to places within fifty, instead of within three, miles of the sea shore, in respect of the higher duties payable for licences. It provides for the issue of hotel and restaurant licences, and makes further provisions for the maintenance of good order and the observance of regulations on licensed premises.

The Town Councils Amendment Ordinance provides for the levying of rates on all lands as well as on houses and buildings in municipal areas; it removes health officers from the category of persons who may be appointed by the President of a town council (these officers now being appointed by Government) to perform allotted duties and it empowers town councils to levy increased duties on licences for the sale of spirits to be consumed on the premises.

The Mosquito Ordinance provides for the destruction of mosquitoes and their larvæ.

The Forestry Bill makes provision for the establishment of forest reserves and their conservation and management. It enables the Colonial Secretary to grant concessions, leases, or licences on behalf of the owner or owners and to regulate the taking or collection of forest produce in a forest reserve, and the sale or export of such produce.

Four Ashanti Ordinances and four Northern Territories Ordinances were enacted by the Governor. Three of the Ashanti Ordinances were amendments of the Ashanti Administration Ordinance, 1902, and the fourth an amendment of the Ashanti Concessions Ordinance. Of the Northern Territories Ordinances three were an amendment of the Northern Territories Administration Ordinance, 1902, and one an amendment of the Northern Territories Constabulary Ordinance, 1906.

IV.—EDUCATION.

The schools under the management of Missionary Bodies which are subject to inspection by officers of the Education Department and receive grants-in-aid from public funds, numbered, at the close of the year, 153. There are nine schools under direct Government control.

The following is a comparative table showing the number of schools inspected during the last two years.

Denomination.	1910.	1911.	Increase or Decrease in 1911.
African Methodist E.Z. Mission	4	4	—
Basel Mission	63	62	— 1
Bremen Mission	13	15	+ 2
Church of England (S.P.G.)	3	3	—
Government Schools	9	9	—
Roman Catholic Mission	23	22	— 1
Wesleyan Mission	48	46	— 2
Secondary Schools...	1	1	—
Total	164	162	— 2

All the Mission Schools inspected succeeded in obtaining grants-in-aid.

The total number of children enrolled on the registers of schools supported by public funds during the year 1911 was 18,680, and the average daily attendance was 13,619. Compared with 1910, these returns show an improvement of 1,110 and 623 respectively.

The grants-in-aid earned by schools on the assisted list in 1911 amounted to £7,502, which shows an increase of £836 on the figures for the previous year.

The total income of these schools in 1911 was £14,165, of which sum the grants-in-aid represent rather more than half, the balance being composed of £1,520 in school fees, and £5,395 in voluntary subscriptions and grants from the Mission Societies. The average of the fees paid by pupils in the assisted primary schools was 1*s.* 7*d.*

The total expenditure by Government on education in the Colony and its Dependencies in 1911 amounted to £19,587, a total exceeding that of the previous year by £2,207.

There are in addition to the assisted schools over 200 primary schools supported by the various religious bodies. Education is not compulsory.

A fairly satisfactory report was received on the year's work of the students at the Government Training Institution for Teachers at Accra, and the results of the instruction given in metal work and wood work at the Government Technical School, Accra, were good.

Instruction in agriculture or some other form of industrial work is now given in nearly every assisted school. The total grant earned by the Missions in 1911 under this head shows an increase of £200 on the figures for 1910.

Forty-one candidates were successful in obtaining certificates at the courses of instruction in agriculture for students and teachers held at the Aburi, Assuantsi, Tarquah, and Coomassie agricultural stations.

Admission to clerkships in the Government Service is by competitive examination held by the Education Department; at the Civil Service examinations held during the year 115 candidates passed and obtained certificates.

V.—GOVERNMENT INSTITUTIONS.

During the year, 878 Europeans and 24,197 natives were treated in the hospitals and dispensaries of the Colony as compared with 900 and 26,908, respectively, in 1910.

The appended table shows the hospitals in the Colony and the number of patients treated during the years 1910 and 1911:—

Hospitals.	1910.		1911.	
	Number of in-patients.	Number of out-patients.	Number of in-patients.	Number of out-patients.
Accra	632	6,481	517	4,262
Seccondee	475	2,800	569	3,380
Cape Coast	258	4,982	198	3,996
Axim	92	2,458	103	3,666
Saltpond	—	1,095	—	867
Winnebah	12	2,366	35	1,326
Tarquah	43	984	89	1,062
Elmina	3	988	5	746
Quittah	55	1,541	48	1,902
Addah	25	1,096	38	1,128
Akuse	26	779	94	1,044
Total	1,621	25,570	1,696	23,379

The hospital at Accra consists of three European and four native wards containing seven and twenty-five beds respectively.

The hospital at Seccondee contains six European wards, including two for convalescents, with a total of sixteen beds. Four wards holding twenty beds are provided for native patients. At Cape Coast the hospital contains accommodation for thirteen Europeans, and the four wards for native patients have nineteen beds.

A new European hospital is in course of erection at Accra.

At Coomassie, in Ashanti, the European hospital contains four and the native hospital three wards. Fifty-seven European patients were treated in 1911. The number of natives treated at this station was, in-patients, 827, out-patients, 7,528.

A new hospital has been built at Tamale in the Northern Territories.

European nursing sisters are attached to the hospitals at Accra, Seccondee, and Coomassie.

There is a lunatic asylum at Accra, a laboratory at Accra, and a sleeping sickness hospital at Anum.

The total number of patients admitted to the lunatic asylum during the year was 31 males and 6 females, as compared with 44 and 6 in the previous year. The number discharged was 8 males and 2 females, as against 10 and 5 in 1910. The daily average of inmates was 85, the majority of whom are classified as maniacal and dangerous. Gardening is the chief employment of the patients.

The Post Office Savings Bank shows good progress. The number of depositors' accounts remaining open on the 31st of

December, 1911, was 3,137, an increase of 825 over the number open at the end of the previous year. The value of deposits during the year, including interest credited, amounted to £24,724 and the withdrawals to £19,130, as against £20,772 and £16,300, respectively, in 1910. In the amount withdrawn from the bank is included the sum of £2,166, transferred to the United Kingdom Savings Bank at the request of depositors.

The credit of the bank on the 31st of December, 1911, was £34,781 as against £29,187 in the previous year.

The interest due to depositors during the same period amounted to £729, as against £596 in 1910.

The amount received from investments was £845 as compared with £718 in 1910.

VI.—JUDICIAL STATISTICS.

Police.

On the 31st of December, 1911, the total strength of the police force of all ranks, comprising general police, escort police, mines police, and railway police was 770, being 41 below the authorized strength.

The establishment of the force was augmented by the addition of two West Indian superintendents and of three sergeants, five corporals, and ten second-class constables of the escort police. In October it became necessary further to increase this branch of the service by the addition of fifteen third-class constables.

The distribution on the 31st December was as follows:—

General Police	481
Escort Police	196
Mines Police	45
Railway Police	48
Total	770

The number of recruits enlisted was 262, as compared with 236 in the previous year.

The men who joined the general, mines, and railway police were generally illiterates and of the peasant class. The escort police, as formerly, were recruited from the Northern Territories tribes and Hausas, many being men who had previously served in the West African Frontier Force. There were 86 cases of dismissal for various offences, as against 50 in 1910.

Outbreaks of yellow fever at Accra and of small-pox in the Eastern Province of the Colony imposed upon the police the duties of assisting the medical authorities and enforcing the necessary regulations for isolation.

Prisons.

The central prisons of the Colony, in which long-sentence prisoners are confined, are at Accra, Cape Coast, Elmina, and Seccondee.

Prisoners under sentence of six months serve their time in the minor gaols at Axim, Seccondee (Fort Orange), Tarquah, Saltpond, Winnebah, Akuse, Addah, and Quittah in the Colony. At Obuasi and Coomassie, in Ashanti, prisoners undergo sentences up to three years, and there are smaller gaols at Dunkwa, Kintampo, Sunyani, and Krachi.

The total number of prisoners admitted in 1911 was 5,474, showing an increase of 592 compared with the figures for the previous year. The daily average of prisoners in the Colony and Ashanti was 978 as against 913 in 1910, an increase of 65.

The total earnings for prison industries and labour amounted to £2,278 as against £2,482 in the preceding year, a decrease of £204.

The total cost of prisons during the year was £15,389 as against £14,694 in 1910, an increase of £695.

The general health of prisoners was good.

Criminal Statistics.

The total number of persons apprehended by the police or summoned before the courts in the Colony and its dependencies was 12,411, a decrease of 2,194 as compared with 1910. Of these 2,034 were acquitted. The convictions obtained numbered 10,377 as against 12,339 in the previous year. The figures for Ashanti and the Northern Territories both show an increase, but this is largely due to the greater number of charges made for offences against public health.

The number of cases in the Supreme Courts of the Colony in 1910 and 1911 were as follows:—

	1910.	1911.
Convictions for offences against the person	61	71
Convictions for slave-dealing	—	2
Convictions for offences against property (other than prædial larceny)	19	26
Convictions for other offences	15	41
Acquittals	84	81
	179	221

The comparative figures in respect of the summary convictions for the past two years are appended:—

	1910.	1911.
Convictions for offences against the person	1,122	862
Convictions for slave-dealing	28	6
Convictions for offences against property (other than prædial larceny)	1,062	1,228
Convictions for other offences	7,868	5,545
Acquittals	1,857	1,417
	11,937	9,058
Grand total for the Colony ...	12,116	9,279

Summary jurisdiction only obtains in Ashanti; the figures in respect of 1910 and 1911 are as follows:—

In the Superior Courts.	1910.	1911.
Convictions for offences against the person	22	14
Convictions for slave-dealing	—	1
Convictions for offences against property (other than prædial larceny)	13	16
Convictions for other offences	4	9
Acquittals	3	16
	42	56

In the Inferior Courts.	1910.	1911.
Convictions for offences against the person	186	200
Convictions for slave-dealing	12	2
Convictions for offences against public health	830	897
Convictions for offences against property (other than prædial larceny)... ...	203	277
Convictions for other offences	469	545
Acquittals	263	355
	1,963	2,296
Grand total for Ashanti ...	2,005	2,332

In the Northern Territories trial is also summary, the figures for the past two years being as follows:—

In the Superior Courts	1910.	1911.
Convictions for offences against the person	—	7
Convictions for offences against property (other than prædial larceny)... ...	7	—
Convictions for other offences	13	—
Acquittals	2	4
	22	11

In the Inferior Courts.	1910.	1911.
Convictions for offences against the person	122	94
Convictions for offences against public health	—	183
Convictions for offences against property (other than prædial larceny)	87	109
Convictions for other offences	196	262
Acquittals	57	141
	462	789
Grand total for the Northern Territories	484	800

NATIVE TRIBUNALS.

Returns of cases heard before native tribunals are not sufficiently accurate for much reliance to be placed on the figures. Native customary law does not generally discriminate between civil and criminal actions, although in some divisions a distinction is drawn. The returns indicate that 1,445 cases were heard, of which 202 were shown as civil actions, and in these judgment was given in 41 instances for the defendant and in 161 for the plaintiff. The cases classified as criminal, which number 1,243, comprise many offences against marriage laws; assault is responsible for 366; offences against property for 130, and offences against public health for 55. Peremptory imprisonment was inflicted in 74 instances; imprisonment in lieu of fines in 15; fines in 1,148, and in 6 cases trivial punishments were imposed.

VII.—VITAL STATISTICS.

The Census returns for 1911 show the total population of the Gold Coast Colony and its Dependencies to be 1,503,386. There is no compulsory registration of births and deaths, but burials are registered in the principal towns in accordance with the provisions of the Cemeteries Ordinance.

The European population is given in the Census Report as 1,625, the number resident in the Colony during the year being 2,245.

With regard to the European population a decrease of 10·70 in the death rate per thousand and of 7·67 in the invaliding rate per thousand is shown in the appended analysis of mortality and invaliding statistics. In this it will be seen that the death rate was highest in the mercantile community.

1910.	Number of Residents.	Deaths.	Invalided.	Death rate per 1,000.	Invaliding rate per 1,000.
Officials	475	8	32	16·84	67·36
Merchants	422	16	7	37·91	16·58
Mining companies ...	660	18	33	27·27	50·00
Missions	135	4	2	29·62	14·81
	1,692	46	74	27·18	43·75
1911.					
Officials	566	4	27	7·06	47·70

Missions	152	3	3	19·73	19·73
	2,245	37	81	16·48	36·08

1910.	Number.	Deaths.	Invalided.	Death rate per 1,000.	Invaliding rate per 1,000.
Colony	1,273	41	58	32·20	45·56
Ashanti	345	4	15	11·59	43·47
Northern Territories	74	1	1	13·51	13·51
	1,692	46	74	27·18	43·73
1911.					
Colony	1,715	34	56	19·82	32·65
Ashanti	463	3	23	6·47	49·67
Northern Territories	67	—	2	—	29·85
	2,245	37	81	16·48	36·08

Death in the case of the four European officials was due in one case to accident, in one to yellow fever, and in two to other climatic causes.

There were six cases of yellow fever amongst Europeans in Accra and Axim, all of which proved fatal.

Twenty-seven officials were invalided for the following disorders:—Malarial fever, 3; anæmia, 4; blackwater fever, 2; neurasthenia, 3; enteric fever, 1; neuritis, 2; various, 12; fifty-four non-officials for the following:—Malarial fever, 21; blackwater fever, 6; anæmia, 1; gastritis, 2; various, 24.

The number of Europeans coming under treatment was 878, as against 900 in 1910.

No means exist whereby accurate statistics relating to the health of natives can be obtained. The returns show that the number of attendances for hospital and dispensary treatment was 24,197, or 2,711 less than in the previous year. Treatment was given for 2,307 cases of malaria, 1,184 of helminthic diseases, and 369 for dysentery.

In all, 42,389 cases of disease were treated, of which 184 proved fatal—the figures for 1910 being 43,943 and 271 respectively.

There were several outbreaks of small-pox in the Eastern Province of the Colony during the year and slight outbreaks occurred in the Central and Western Provinces. An epidemic of this disease which made its appearance in 1910 in Ashanti was stamped out during the year, and only ten cases were reported in the Northern Territories.

The number of vaccinations performed was 28,460, of which 18,895 proved successful.

Seventeen deaths from sleeping sickness were reported in Ashanti, and one in the Northern Territories. In all, 83 cases were known to exist, six being in the Colony and 77 in Ashanti and the Northern Territories.

There were three cases of yellow fever among natives in Accra all of whom recovered.

The following table shows the native mortality as registered in the hospital records and the cemeteries of the principal towns:—

	Hospital records.	Burial Permit records.
1907	113	1,517
1908	554	1,159
1909	232	1,611
1910	271	2,099
1911	184	1,932

The appended table gives the results of the meteorological observations taken at the stations mentioned during the year:—

Station.	Temperature.						Rainfall.	
	Solar maximum.	Minimum on grass.	Shade maximum.	Shade minimum.	Range.	Mean.	Amount in inches.	Degree of humidity.
Accra	143·57	75·49	84·48	71·69	12·77	78·08	40·09	77·76
Aburi	145·34	66·65	84·21	67·78	16·42	75·99	39·77	87·19
Addah	134·41	81·72	82·92	75·13	7·79	79·02	29·96	86·86
Quittah	139·01	73·12	85·50	75·00	10·49	80·33	17·76	79·44
Cape Coast ...	106·65	58·95	83·64	71·31	12·32	77·47	22·36	82·30
Seccondee	141·37	66·92	86·30	70·49	15·86	78·40	35·37	58·21

Gambaga	123·08	68·51	93·43	70·76	22·24	82·09	38·17	62·98
Tamale	148·08	20·28	94·33	59·28	35·03	77·22	44·62	53·60

SANITATION.

The sanitary conditions under the sanitary branch of the Medical Department show, generally, a marked improvement, but the inadequacy of water supplies remains a cardinal difficulty. There is a pipe-borne supply at Obuasi in Ashanti, and water works at Accra and Seccondee are in course of construction.

During the year £36,000 was spent by the Public Works Department on sanitary improvements, and, in addition to other works, 5,250 lineal yards of concrete drain were laid and 2,587 lineal yards repaired or reconstructed; 21,200 lineal yards of open cut drains were made and 752,704 lineal yards cleaned; 8,232,465 square yards of vegtation were cleared; 543 pools or excavations were filled; 90,822 square yards of marsh land were filled and drained; and 6,000 drains and 7,899 pools were treated with crude petroleum.

The sum of £18,531 was expended under the head of sanitation.

In addition to the normal expenditure the following sums were spent:—

	£
Sleeping Sickness preventive measures	1,807
Yellow Fever do. do.	2,886

In 1911 6,593 prosecutions were made, and 5,965 convictions were obtained in the courts for offences against sanitary laws and regulations.

VIII.—POSTAL, TELEGRAPH, AND TELEPHONE SERVICES.

The revenue of the Post and Telegraph Department for the year under review amounted to £31,511, as against £36,355 in 1910. This apparent decrease is due to the fact that an accurate return made in 1911 of the stamps used for judicial purposes shows that the estimate for previous years in respect of this service falls some £5,000 short of the actual sum.

The department also collected £6,374 on behalf of the African Direct Telegraph Company and foreign Administrations on account of telegrams despatched from various local offices; £11,482 was brought to account in respect of Customs Duty collected on parcels, and £14,649 on behalf of the Judicial Department.

The expenditure, including telegraph construction, amounted to £29,781, as against £27,644 in 1910.

The appended statement shows the volume of business of the department in 1911 as compared with 1910.

	1910.	1911.
Sale of stamps	£18,645	£10,376*
Letters and postcards received and despatched ...	5,175,464	5,009,407
Registered articles	403,044	414,271
Parcels	77,783	82,958
Money orders (value) ...	£50,063	£49,491
Postal do. do. ...	£98,636	£148,418
Do. do. (number) ...	151,720	214,954
Telegrams, public	170,950	191,062
Do. official	88,512	82,360

Forty-eight telegraph offices in the Colony, Ashanti, and the Northern Territories are open to the public; the total length of aerial telegraph wire is 1,492 miles, as compared with 1,424 miles in 1910.

There are telephone services at Accra, Cape Coast, Dodowa, Seccondee, and Tarquah; the public subscribe for 78 of the 153 connections at the five exchanges.

IX.—ASHANTI.

The total revenue collected in Ashanti during 1911 was £50,319, as against £37,621 in the previous year, an increase of £12,698.

The expenditure in 1911 was £146,317, compared with £117,398 in 1910, showing an increase of £28,919.

---

* Used for prepayment of postage.

The imports by railway, excluding firewood, amounted to 13,998 tons, an increase of 1,145 tons on the figures for the previous year. Cattle in great numbers are imported from the north.

The principal exports were gold, rubber, cocoa, and cola.

The amount of gold produced during the year was valued at £530,583, as against £403,006 in 1910.

The quantity of rubber exported from Ashanti is estimated at 2,390,440 lbs.; of cocoa at 9,340,800 lbs.; and of cola at 2,024,960 lbs. Rubber and cola show a decrease on last year's figures, cocoa a very marked increase.

The Ashantis are turning their attention to agricultural pursuits, and the officials of the Agricultural Department, as in the Colony, have given practical instructions on the cultivation and preparation of economic products.

Education continued to make good progress.

European hospitals are established at Coomassie and Obuasi, and native hospitals at Coomassie, Obuasi, Sunyani, and Kintampo.

The total population of Ashanti as given in the census return for 1911 was 287,814.

The relations between the administrative staff and the chiefs were good, and the expansion of the cocoa trade indicates a prosperous future.

The Annual Report on Ashanti* by the Chief Commissioner gives full details and statistics.

X.—NORTHERN TERRITORIES.

The total revenue collected in the Northern Territories during 1911 amounted to £2,426, as compared with £1,806 in 1910, an increase of £620.

The chief imports were cotton and woollen goods, silk handkerchiefs, cola nuts, salt, hardware, beads, brass rods, haberdashery, beer, tobacco, and provisions. The principal exports were live stock, shea butter, and dawa dawa.

The statistics which are kept at all administrative stations give only an approximate idea of the volume of trade, as there are a number of trade routes with respect to which it is impossible to gain accurate information. An increased activity is reported from the markets, but the caravan trade, especially in live stock, is said to have declined. This is attributed to an epidemic of cattle disease in a portion of the adjoining French Administration.

Unrest in the "Fra Fra" country necessitated minor military operations in the Tong hills early in the year. The development consequent upon the establishment of a station at Zouaragu in this neighbourhood, and the pacific conditions which ultimately prevailed, have given an impetus to trade in the North Eastern Province.

The establishment of a Preventive Service in the eastern frontier, which enables the enforcement of the duty on articles

* Colonial Report No. 719.

introduced from Togoland, has resulted in an increase in the importation of British goods.

Chiefs and people show a growing interest in the work of the agricultural station at Tamale. A large number of cotton seeds have been distributed, and small cotton farms have been started in eighteen villages. The British Cotton Growing Association have erected ginneries and presses at Tamale and Tamale-Port.

The general harvest throughout the Dependency is said to have been abundant.

Government schools have been opened at Tamale and Wa and good progress is reported.

The health of the Europeans, of whom the daily resident average was 27·75, was good. There were no deaths, and only one case of invaliding for climatic disease occurred. Very favourable reports have been received as to the cleanliness of the towns and villages, and great improvements in sanitation have been made in the last few years. Much useful work has been done upon the roads under the supervision of administrative officers.

Further detailed information as to the Protectorate will be found in the Annual Report* of the Chief Commissioner.

XI.—RAILWAYS AND ROADS.

The total capital liability in respect of the Seccondee-Coomassie Railway to the 31st December, 1911, stood at £2,044,840.

This sum includes the cost of all permanent improvements, additional plant, machinery, and rolling stock provided from time to time since the opening of the line, and also the cost of the Prestea-Broomassie branch.

During the year the following amounts were charged against the capital account:—

	£
Lowering No. 1 Jetty	102
Refrigerator cars	791
Bridge at 113 miles	524
Two additional locomotives	6,006
Twenty-five steel goods waggons...	7,831
Improved station arrangements at Abosso ...	1,010
Engine shed extension at Tarquah	1,257
Re-alignment of section of railway adjoining Seccondee	6,546
Additional gantry crane for No. 1 Jetty ...	1,195
Additional 3rd class carriage locally constructed	722
Cost of constructing the branch line from Tarquah to Prestea and Broomassie	161,709
	£187,693
Less sale of local skips and waggons credited to loan account in February, 1911	91
Total	£187,602

* Colonial Report No. 722.

The gross revenue for the year amounted to £285,917, as against £253,329 in 1910. The estimated revenue for 1911 was exceeded by £35,917, and the actual revenue for the previous year by £32,588.

The net earnings reached the sum of £183,798 in 1911, as against £168,529 in 1910. This sum is equal to 8·98 per cent. upon the total capital expenditure to the 31st of December, 1911. The earnings of the Prestea-Broomassie branch are included in the above figures and amount to £24,032.

The total receipts per mile open were £1,520 compared with £1,507 in 1910, and per train mile £1 4*s*. as against £1 12*s*. 2*d*. The increase over the figures for 1910 in the coaching traffic receipts was £16,690, and in the goods traffic £15,810.

The total recurrent expenditure was £102,490, being £1,453 over the original estimate and £17,438 in excess of the actual expenditure in 1910. This is attributed chiefly to the greater cost of the maintenance and locomotive departments contingent on the opening of the Tarquah-Prestea-Broomassie branch.

The percentage of recurrent expenditure to revenue was 35·71, against 33·47 in 1910. Adding the extraordinary expenditure chargeable to capital, which for the period under review was £25,418, the grand total expenditure for the year amounted to £127,908, against £95,732 in 1910; this being equal to 44·80 per cent. of the revenue brought to account.

The working expenditure per mile open was £543, compared with £504 in the previous year, and per train mile 8*s*. 7*d*., as against 10*s*. 9*d*. in 1910.

The general financial position of the Government Railways (Open Line) and results of working to the 31st of December, 1911, are as follows:—

Total capital expenditure ...	£2,044,840 0*s*. 0*d*.
Total revenue earned in 1911 ...	£285,753 0*s*. 0*d*.
Total working expenditure in 1911	£102,490 0*s*. 0*d*.
Extraordinary expenditure chargeable to capital ...	£25,418 0*s*. 0*d*.
Proportion of working expenditure to revenue	35·71 per cent.
Proportion of total expenditure (working and extraordinary) to revenue	44·80 per cent.
Net revenue earned	£183,798 0*s*. 0*d*.
Interest upon capital expenditure	8·98 per cent.
Revenue per mile open (188 miles)	£1,520 0*s*. 0*d*.
Expenditure per mile open ...	£543 0*s*. 0*d*.
Total train mileage, exclusive of banking and shunting ...	238,560 miles.
Earnings per train mile ...	£1 4*s*. 0*d*.
Expenditure per train mile ...	£0 8*s*. 7*d*.
Net earnings per mile open ...	£977 0*s*. 0*d*.
Net earnings per train mile ...	£0 15*s*. 5*d*.

Total number of passengers carried	536,300
Gross tonnage of goods and minerals	183,344 tons.
Average fare per passenger carried	£0 2*s.* 1*d.*
Average earnings per goods ton mile (public and Government traffic)	7·53 pence.
Proportion of goods receipts to total revenue	76·98 per cent.
Proportion of coaching receipts to total revenue	21·63 ,,
Proportion of down to up traffic (goods) tonnage	26·24 ,,
Proportion of down to up traffic (goods) receipts	26·64 ,,

The total number of passengers carried, excluding Government and construction officials, shows an increase of 173,819 compared with the figures for the previous year.

The total goods tonnage amounted to 183,344 tons as against 83,202 in 1910, an increase of 100,142. Of this, however, 81,364 tons represents the approximate tonnage of firewood and pit props hauled for the mines, not hitherto brought to account, and the figure of 18,778 tons more properly represents the increase.

The amount paid in claims, &c., for goods lost, delayed, and damaged was £191 6*s.*

The summary of accidents for the past two years is given below:—

	1910.	1911.
Engine failure	5	27
Derailments of all kinds ...	49	65
Fallen trees, &c.	112	56
Trolley accidents	4	3
Miscellaneous	36	46
Personal	15	18

Of the personal accidents none occurred to passengers, of whom 536,300 were carried by the railway during the year. Eleven out of the eighteen cases proved fatal and the verdict in each case acquitted the railway officials of negligence.

The revised goods tariff which was introduced on the 1st of August, 1908, with the amendments taking effect from January the 2nd, 1911, continued in force with practically no alteration during the year.

The amended coaching tariff and regulations introduced on the 1st of January, 1910, remained in force during 1911.

The branch line from Tarquah to Prestea and Broomassie was opened for traffic in January, 1911.

No advance was made in the construction of the Accra-Akwapim railway towards Mangoase.

An arrangement was made between the Government and the contractor under which the latter undertook the working of the line as from the 29th of August, 1911, from Accra to Pakro and credited the former with one half of the gross receipts. The amount contributed to revenue under this arrangement was £8,897. The quantity of cocoa conveyed to Accra on this line during the year was 328,617 bags or 20,648 tons.

Roads.

The main roads of the Colony are constructed and maintained by a branch of the Public Works Department. In addition to these, 1,983 miles of roads in the Colony have been placed under the Roads Ordinance (No. 13 of 1894) and are kept clear of bush and made passable by the native chiefs. A chief receives every quarter, under the provisions of this Ordinance, a payment proportionate to the length of road so kept in repair, calculated in the discretion of the District Commissioner, at a rate of 5*s*. to £1 per mile.

The principal roads under direct Government supervision are as follows:—

(*a*.) The Accra-Dodowa Road, about 27 miles in length. This road is used regularly for motor traffic.

(*b*.) The Accra-Aburi Road, about 25 miles in length of which the first 13 miles is the same as the Accra-Dodowa Road. It is used by motor lorries as far as Ayimensa at the foot of the Akwapim Hills and motor cars can ascend the hills to Aburi.

(*c*.) The Nsawam-Kibbi Road, about 36 miles in length, was originally constructed by a mining company from Accra to Kibbi, and its maintenance was taken in charge by the Government in 1904. Since the opening of the Accra-Akwapim Railway, however, traffic in the Accra-Nsawam section has declined and the northern portion only is being kept in repair. The road is being reconstructed and steel and concrete bridges are being built.

(*d*.) The Nsawam-Asamangkese Road, about 30 miles in length, is in course of construction.

(*e*.) The Winnebah-Nsaba Road, about 25 miles in length, is being constructed for the use of motor lorries and other vehicular traffic.

(*f*.) The Saltpond-Nsuaem Road, about 58 miles in length, is being re-formed for motor traffic, and steel and concrete bridges are replacing those of timber construction.

(*g*.) The Cape Coast-Prahsu Road, about 73 miles in length, the first 21 miles of which are under process of reconstruction, is being provided with bridges of permanent character.

(*h*.) Among the lesser roads maintained or in course of construction at the close of the year may be mentioned the following:—

	Miles.
The Adawso-Mangoase Road	5
The Somanya-Akuse Road	10
The Kpong-Akuse Road	6
The Danoe-Dsodje Road	16
The Cape Coast-Jukwa Road	15

(*i.*) The Coomassie-Ejura Road in Ashanti, about 62 miles in length, is being constructed by a special department.

XII.—MISCELLANEOUS.

Immigration and Emigration.

There is no registration of persons either entering or leaving the Colony and consequently no accurate statistics are available under this head. It is estimated that some 3,500 labourers, but few of whom become permanent residents, enter the Colony every year in order to obtain employment. Most of these immigrants are natives of the Kroo Coast (Liberia), Sierra Leone, and Lagos. A considerable number of natives of the artisan class leave the Gold Coast for varying periods spent in such neighbouring Administrations as offer employment for skilled labour; but owing to the growing local demand for services of this nature this number is believed to be decreasing.

Public Works.

The total expenditure on Public Works amounted to £162,494, as against £114,556 in 1910. Annually recurrent works show an increase of £6,004, works and buildings of £14,115, and roads and bridges of £20,696.

The following are the more important works commenced, in progress, or completed during the year:—

At Seccondee, a new boat shed was built. The main post office building, the infectious diseases hospital, and a bungalow for the resident engines of the harbour works were completed. A rest-house of six rooms and an extension of the post office building were commenced and were well in hand at the end of the year.

At Dixcove, the customs warehouse was finished and a market shed built. A rest-house was built at Ajua.

At Tarquah, the old court house was converted into two sets of quarters and a new bungalow was begun. Post offices were completed at Prestea and Broomassie.

The sea wall extension at Elmina was completed.

At Accra, a sea wall 80 feet long was built, and a dormitory for the technical school, quarters for two officers, and the new European hospital were begun. The post and telegraph office at Akuse was completed.

In Ashanti, works in connection with the erection of a police station and barracks at Obuasi were started, the improvements to the lines of the Gold Coast regiment at Coomassie were completed, and the structural alteration of the officers' quarters was

put in hand. A new powder magazine was built. At Kintampo, the prison was completed and the new quarters for the Provincial and District Commissioners, the native hospital and the post and telegraph office were begun.

At Tamale, in the Northern Territories, a further section of the new headquarters buildings was completed.

Considerable work was done under the head of sanitary improvements, the most important being the reclamation of the lagoon and the construction of the main drain at Seccondee. The reclamation involved the utilization of 74,241 cubic yards of filling, and the main drain, which was extended 1,400 feet, is capable of discharging 23,350 cubic feet of water per minute. Subsidiary drains of a length of 3,062 feet were constructed in this town. The lagoon in the vicinity of the Central Prison was partially reclaimed and, in connexion with this, a drainage scheme of 1,230 feet completed. The Essicados main drain was laid to a length of 1,200 feet. The levelling of roads involved the removal of 10,000 cubic yards of materials. New township sites have been surveyed and the levelling for two of these has necessitated the removal of 1,878 cubic yards. At the new Hausa zongo, a model compound and latrines were built.

Works in connection with, and in anticipation of, the proposed drainage scheme for Accra have been well advanced and 4,200 yards of concrete drain were laid during the year, the main drain being extended 432 feet. Considerable expenditure was incurred in the acquisition of land and houses for new streets.

Drainage schemes have also been put in hand at Axim, Tarquah, Elmina, Cape Coast, Saltpond, Winnebah, Nsawam, and Dodowah.

Works were also undertaken in various towns in connection with the construction and maintenance of town roads, general conservancy, and the improvement of wells and water supplies.

The expenditure by the Public Works Department on sanitary improvements in the Colony amounted to over £36,000.

Water-Works.

Satisfactory progress was made with the Accra Water-Works. The completion of the light railway between Accra and the dam site, a distance of 13 miles, was effected. The work yard has been enlarged and additional store accommodation provided; the power house, with three sets of suction gas plant and dynamo, was completed. Three steam cranes, a Tangye pump, and two pile engines were erected; two stone crushers and a concrete block-making machine have been placed in position.

The pumping and gravitation mains were started in July. The latter was laid for a distance of 942 yards in the direction of Accra and the trench for a further 1,000 yards in rocky ground was cut ahead of this. Operations in connection with the construction of the dam were also begun.

At Seccondee the work has been confined generally to the acquisition of land and surveys in connection with the railway route. A bungalow and offices were built.

Harbour Works.

No construction work was done on the Accra breakwater during the year.

A pumping plant for the removal of sand was erected and completed on the 31st of March. During the last quarter of the year an appreciable decrease in the amount of sand was observed from comparative soundings. The expenditure during the year was £19,618.

At Seccondee, a block-setting crane was erected and finished in July. Block-setting was begun in August and up to the end of the year 231 blocks were set, 630 cubic yards of mass concrete were deposited in foundations, &c., and 127 feet of the breakwater was completed up to the level of the underside of the coping.

Block-making was commenced in the work yard in May and at the close of the year 649 blocks had been made. A 15-ton stacking crane was erected. The reclamation of the low-lying land comprised in the design of the harbour works was continued and 17,752 cubic yards were deposited.

The foundations of the railway extension quay were put in for a length of 101 feet.

Considerable progress was made in the work in connection with jetty abutments, and the "stepped" retaining wall which it was decided to construct between the two railway jetties was completed and opened for traffic. The expenditure for the year was £26,858.

Survey.

In October the nucleus of a topographical branch was formed in connection with the proposed survey of the Northern Territories, and a general reconnaissance, including the erection of beacons in such parts of the Protectorate as are suitable for trigonometrical survey, was made.

The greater part of the work of the Department was cadastral. Including those in hand, both in the field and in the drafting office, 59 concessions were completed; at the end of the year 16 were in hand, the field work of 5 being completed. During the year, 11 applications were withdrawn and 3, owing to these being made in respect of land already leased, became non-existent. Of the 100 applications outstanding at the end of 1910, 89 were completed, otherwise determined, or in hand, leaving a balance of 11.

The number of applications received during 1911 was 53. The total receipts of the Department amounted to £3,348.

The special staff engaged on the boundaries of Eastern and Western Akim surveyed 24 concessions and executed certain necessary traverses in conjunction therewith.

The progress of town survey has been very satisfactory, and in the course of the year those at Tarquah, Dunkwa, Winnebah, Saltpond, and Kibbi were completed. Work of this nature was also done in Accra, Seccondee, and Coomassie.

The surveys in connection with the water supplies and drainage schemes at Accra and Seccondee were, so far as was compatible with the progress of the various works, brought to completion.

TRANSPORT.

The total number of loads handled by the Transport Department was 40,709, a number which includes the carriers accompanying officers travelling. In addition, 901 carriers were sent out on long engagements. The figures for the previous year were 33,311 and 1,275 respectively.

This Department conveyed the mails to the outstations in Ashanti beyond Coomassie and to the Northern Territories.

During the year 1,120 bags were transported as compared with 847 in 1910. Delivery has been punctual.

The system of ensuring the safety of loads committed to the care of permanent carriers continues to give satisfactory results; the savings bank deposits of 504 carriers now amount to about £4,000.

The following tables show the results of the work done by the Department:—

Seccondee—Headquarters.

	Loads.
Loads despatched by railway...	14,358
,, ,, by carriers...	30
,, ,, by sea	762
,, ,, locally	85
Loads moved belonging to officers passing through	8,321
Carriers with officers travelling	1,006
Total at Seccondee	24,562
Carriers engaged on contract for Government ...	815
,, ,, on contract for companies, &c....	86

Coomassie.

Loads moved belonging to officers passing through	4,280
Bags of mails sent up-country	1,120
Carriers with officers to the Northern Territories...	1,140
,, with officers and troops in Ashanti ...	1,527
Total at Coomassie	16,147

SUITABILITY OF CLIMATE FOR EUROPEANS AND OPENING FOR WHITE LABOUR.

The climate is damp, malarious, and unhealthy, especially during the rainy season.

All Government officials and employees of mercantile firms and mining companies are engaged in the United Kingdom; it is inadvisable for a European to come to the Colony for the purpose of seeking employment.

Compared with Eastern Colonies, the wages on the Gold Coast are high. The rates for domestic servants vary from £1 to £5 per month, £1 10*s*. to £2 being the average, and cooks are paid from £2 to £5 per month.

The Government rate for carriers is 1*s*. per diem and 3*d*. subsistence money. Contract labourers and carriers under monthly contract are usually paid 25*s*. a month and also receive 3*d*. a day or rations.

Native carpenters, masons, and smiths find ready employment at rates of wages varying from 1*s*. 6*d*. to 4*s*. 2*d*. a day.

Generally, the cost of living, except in the Northern Territories, is high. Frozen meat of fair quality can be purchased from the mail-steamers at the principal ports, and a cold storage plant is being erected at Tarquah; but in many other places Europeans are dependent, to a great extent, on tinned provisions. Goats' flesh and fowls are obtainable in most localities, and beef and mutton can be purchased in towns where there are Mohammedan communities. In the Northern Territories, meat and other foodstuffs are both abundant and inexpensive.

Native Affairs.

No events of any importance disturbed the progress of the year. The prosperity of the people in those districts where agricultural efforts have been successful is reflected in the improved type of dwelling house that is being erected in the villages. The relations between chiefs and natives generally and the administrative staff are of the best; but in certain coast towns, especially at Accra and Cape Coast, the energetic measures taken by the sanitary authorities have, unfortunately, resulted in some dislocation of the amicable relations which have hitherto existed between the executive and native communities.

Census.

A Census Ordinance was passed at the beginning of the year. The usual administrative divisions with sub-divisions according to tribes or natural boundaries were adopted for the purpose of enumeration. In the Colony, each Commissioner was appointed census officer for his district and was assisted by a local committee and a staff of enumerators. In Ashanti, 82 clerks were detailed for this duty, and in the Northern Territories an extra clerk was allocated to each province.

The number of towns and villages in the Colony of which a census was taken was 2,645. Of these towns one is shown as having a population of over 15,000, three between 10,000 and 15,000, ten between 5,000 and 10,000, and 140 between 1,000 and 5,000.

The grand total of the population of the Colony and its dependencies was found by enumeration to be 1,503,386—the number in the Colony being 853,766, in Ashanti 287,814, and in the Northern Territories 361,806. The average number of persons to the square mile was 18·7. It is considered, however, that the number of persons counted falls somewhat short of the actual population.

There was little or no opposition to the census and only one prosecution under the Ordinance was reported.

The total cost of the census was £518.

The Coronation.

The Coronation of Their Majesties King George V. and Queen Mary was celebrated at all administrative stations, in many of the smaller towns of the Colony, and at the provincial and district headquarters in Ashanti and the Northern Territories.

Special services were conducted in the churches of the various religious denominations, and reviews were held at all stations at which troops are quartered. Sports suitable to the various localities were organized, and in most towns there was a display of fireworks at night.

The celebrations were well attended by native chiefs and people, who displayed great loyalty and enthusiasm.

Changes in Establishment.

Major Herbert Bryan, C.M.G., Colonial Secretary, administered the Government during the absence on leave of the Governor, Mr. James Jamieson Thorburn, C.M.G., from the 3rd of February to the 16th of June. Sir Philip Crampton Smyly, Chief Justice of Sierra Leone, was appointed Chief Justice of the Gold Coast on the retirement of Sir William Brandford Griffith. Lieutenant-Colonel W. T. M. Reeve was restored to the establishment of his British Regiment on the 13th of August, and was succeeded in the command of the Gold Coast Regiment, West African Frontier Force, by Lieutenant-Colonel E. M. Panter-Downes.

General Observations.

The returns for the year 1911 are indicative of progress and development in every direction.

The revenue and the values of both exports and imports were greater than in any previous year. Revenue exceeded that of 1910 by £91,632 and showed a surplus of £197,132 over expenditure. The value of sea-borne trade of the Colony (excluding specie and Government materials) shows an increase of £1,001,307 on the returns for the previous year, and the value of the commercial exports alone reached a figure higher by £857,390 than that recorded for 1910.

The Tarquah-Prestea branch of the Seccondee-Coomassie Railway and the Accra-Akwapim Railway were both opened for regular traffic during the year. To the enhanced facilities for transport afforded by the latter line the great increase in the export of cocoa is largely due, and over one-fourth of the total revenue of the Colony was yielded by railway receipts.

The harbour works under course of construction at Accra and Seccondee will, when completed, facilitate commercial operations at those ports, and the waterworks schemes now in progress for the same towns should favourably affect sanitary conditions.

The material prosperity of the natives is reflected in the large shipments of economic products from the Colony and the increased imports of improved building materials. The criminal statistics show a decrease despite the great number of prosecutions for offences against sanitation. The absence of inter-tribal disputes or of internal political unrest in the various native divisions and the readiness with which such matters are brought to the Government for decision are a proof of trust in the Administration. When to this proof is added the visible progress of agriculture, the acceptance of the facilities offered by educational bodies, and the success with which outbreaks of disease have been eradicated, there can be little doubt that for the native and the mercantile community the year under review gives encouragement to effort and strengthens confidence in the future.

FRANCIS CROWTHER,
Secretary for Native Affairs.

Accra, 4th July, 1912.

GOLD COAST.

(For Report for 1911, *see* No. 725.)

THE GOVERNOR TO THE SECRETARY OF STATE.

Government House,
Accra,
21st August, 1913.

SIR,

I HAVE the honour to transmit herewith six copies of the Annual Blue Book of this Colony for the year 1912, together with a report thereon which has been prepared by Mr. W. C. F. Robertson, Acting Colonial Secretary.

I have, &c.,

HUGH CLIFFORD,
Governor.

The Right Honourable
Lewis Harcourt, M.P.,
&c., &c., &c.

(31672—2.) Wt 35104—688. 1125 & 90. 10/13. D & S. A 2

I.—FINANCIAL.

The financial year ending 31st December, 1912, recorded the largest revenue in the history of the Colony, despite the fact that there were no new sources of revenue nor additional taxation. It amounted to £1,230,851, an increase of £60,851 over the original estimate, and exceeded the expenditure by £73,759.

The following table shows the amounts collected under the several heads of revenue in the Colony, Ashanti, and the Northern Territories:—

Heads of Revenue.	Actual Revenue to 31st December, 1912.	Revenue for the same period of the preceding year.	Increase.	Decrease.
	£	£	£	£
1. Customs	735,470	663,071	172,399	—
2. Light Dues	2,737	2,646	91	—
3. Licences, &c.	45,725	39,302	6,423	—
4. Fees of Court, &c. ...	47,530	45,981	1,549	—
5. Railways	329,399	294,650	34,749	—
6. Post and Telegraphs ...	5,994	6,126	—	132
7. Rents of Government Land.	1,211	1,342	—	131
8. Interest	3,109	1,131	1,978	—
9. Ashanti	50,265	50,319	—	54
10. Northern Territories ...	2,994	2,426	568	—
11. Miscellaneous	5,494	4,586	908	—
Total	1,229,928	1,111,580	118,665	317
12. Land Sales	923	52	871	—
Revenue Extraordinary	—	—	—	—
Grand Total ...	1,230,851	1,111,632	119,523	317

The chief increases over the revenue originally estimated are under:—

	£
Customs	75,470
Licences	7,225
Interest	2,358
Ashanti	3,617

The increase under Customs may be attributed to the rapid development of the Colony and the general expansion of trade; under Licences, to augmented receipts for spirit licences and fines; under Interest, to investment of surplus funds; and under Ashanti, to the larger receipts from mining royalties. It is not improbable that the increase under Customs was, to some extent, abnormal. Strikes in Europe delayed importation towards the end of 1911, and a certain proportion of the imports in 1912 would, under ordinary conditions, have been credited to 1911.

The two principal heads which show a decrease are:—

	£
Fees of Court or office, &c....	2,870
Railways	25,600

The decrease under Fees of Court is due to smaller receipts from Stamp Duties; while the large decrease under Railways is

explained by the reduction of tariff charges on goods from the 1st July.

The following comparative table gives the expenditure, in detail, for 1911 and 1912:—

Head of Expenditure.	Actual expenditure to 31st December, 1912.	Expenditure for the same period of the preceding year.	Increase.	Decrease.
Establishments.	£	£	£	£
1. Governor and Legislature ...	7,607	6,288	1,319	—
2. Supreme Court	9,048	8,703	345	—
3. Law Officers	2,281	2,491	—	210
4. Secretariat	7,064	6,368	696	—
5. Printing Office	9,203	7,898	1,305	—
6. Native Affairs	1,956	1,860	96	—
7. Provincial and District Commissioners.	27,392	25,133	2,259	—
8. Treasury	11,750	11,481	269	—
9. Customs	33,790	30,427	3,363	—

42. Railway Survey	1,817	4,677	—	2,860
43. Expenditure on Loan Works ...	116,573	—	116,573	—
Total	1,157,092	914,500	257,865	15,273

The estimated expenditure for the year was £1,120,416; the actual expenditure was £1,157,092, or £36,676 over the estimate.

The most noticeable increase was an item of £116,573, defrayed from Revenue during the year, to meet the expenditure on loan works, the full amount of the loan authorised by Ordinance not yet having been issued. Increases also appear under Miscellaneous, £7,540, due to the Government's contribution to the King Edward Memorial Fund and the expenses connected with Mr. Belfield's enquiry; under Customs, £4,239, due to rebates on goods conveyed across the Volta, the result of increased trade; and under Pensions and Gratuities, £3,545.

Decreases occur under Public Works Extraordinary and Railways, with noteworthy savings under Medical, Sanitation and Education.

A comparative statement of the total revenue and expenditure for the past five years is appended:—

Revenue.			Expenditure.		
Year.	Amount.	Remarks.	Year.	Amount.	Remarks.
	£			£	
1908	752,142	—	1908	687,292	Includes £20,000 repayment of loans.
1909	778,552	Includes £10,211 value of public works, materials and stores taken on charge.	1909	734,367	Includes £25,000 repayment of loans.
1910	1,006,633	Includes £8,950 in respect of expenditure on water works during 1907–1909.	1910	924,862	Includes £149,380 repayment of loans.
1911	1,111,632	—	1911	914,500	Includes £25,000 repayment of loans.
1912	1,230,850	—	1912	1,157,091	Includes £116,573 payments on account of loan works in excess of amounts provided in loan Ordinances and £20,000 repayment of loans

The development of agriculture and the expansion of trade continued to make steady progress.

The excess of assets over liabilities on the 1st of January, 1912, was £865,809; at the close of the year the excess amounted to £939,568, an increase of £73,759.

The increase of assets is explained as follows:—

	£
Excess on 31st December, 1911	865,809
The revenue of 1912 was	1,230,850
	2,096,659
The expenditure in 1912 amounted to	1,157,091
Leaving an excess on 31st December, 1912, of	£939,568

PUBLIC DEBT.

On the 31st of December, 1911, the Public Debt of the Colony stood at £2,489,118. On the 31st December, 1912, it was reduced to £2,469,118, the difference of £20,000 being repaid to the Imperial Government during the year.

The amount standing to the credit of the Sinking Fund for the redemption of the Funded Debt on the 31st December, 1911, was £102,699, as against £84,023 at the close of the preceding year. Of the increase of £18,676, the sum of £15,570 was contributed from General Revenue during the year, the balance being in respect of interest realised on investments.

The following statement shows in detail the particulars of the Public Debt:—

Sinking Fund, £102,699—

	£	£
(i.) 3 per cent. Inscribed Stock issued in March, 1902 ...	1,035,000	
(ii.) 3 per cent. Inscribed Stock issued against authorised loan of £665,000	63,000	
(iii.) 3½ per cent. Inscribed Stock issued against authorised loan of £1,610,000	1,030,000	
		2,128,000

Due to Imperial Government.

(ii.) West India Regiment, 1897-1898	10,052	
(iii.) Telegraph lines to the Northern Territories, 1897-1898 ...	29,442	
(iv.) Ashanti disturbances	469,425	
	607,717	
Less repayments	266,599	
		341,118
		£2,469,118

CURRENCY.

The currency and legal tender are British sterling, with the addition of the undermentioned French, Spanish, and American gold coins, the value of which are fixed by the Demonetization Ordinance, No. 2 of 1880:—

	Nominal Value.	Legal Value. £ s. d.
French—		
Napoleon	20 francs ...	0 15 10
Spanish—		
Doubloon	16 dollars ...	3 4 0
Half Doubloon	8 ,, ...	1 12 0
American—		
Double Eagle	20 ,, ...	4 2 0
Eagle	10 ,, ...	2 1 0
Half Eagle	5 ,, ...	1 0 6
Quarter Eagle	2 ,, 50c...	0 10 3

British silver coins are legal tender to an unlimited amount; British bronze coins to an amount not exceeding one shilling. On the 1st of July a new subsidiary nickel currency was introduced into the West African Colonies, in coins of three denominations, viz., one penny, one half-penny, and one-tenth of a penny. These coins were well received by the native and are coming rapidly into general circulation. The United States half-dollar is current to a small extent, but is not legal tender; its current value is two shillings.

The following statement shows the amount of gold, silver and bronze coinage imported during the last two years:—

Year.	Gold.	Silver.	Bronze.	Total.
	£	£	£	£
1911	80,275	800,115	702	881,092
1912	121,200	599,078	700	720,978

Banks.

The Bank of British West Africa, Limited, is the only commercial bank established in the Colony and its dependencies, and has branches at Accra, Cape Coast, Seccondee, Axim, Coomassie, Tarquah, Saltpond, and Winnebah.

Municipal Bodies.

Municipalities have been established in the towns of Accra, Cape Coast, and Seccondee, under the provisions of the Town Councils Ordinance of 1894. These bodies consist of eight members, of whom four are official, nominated by the Governor, and four representatives elected by the ratepayers. The Governor has power to nominate four members to represent the ratepayers if there is no election through the failure of voters to nominate.

The following statement shows revenue and expenditure of the town councils for the past five years:—

—	Revenue.					Expenditure.				
	1908.	1909.	1910.	1911.	1912.	1908.	1909.	1910.	1911.	1912.

II.—TRADE, AGRICULTURE, AND INDUSTRIES.

Imports and Exports.

The gross value of the sea-borne trade of the Colony has grown from £7,565,630 in 1911 to £8,314,208 in 1912, an increase of £748,578. The combined value of specie imported and exported was £1,024,484, as against £1,202,237 in the preceding year. The value of commercial imports and exports for 1912, exclusive of specie and Government materials, amounted to £7,145,080, an increase of £910,876 over the figures for the previous year. The total value of imports (exclusive of specie) and exports, and the trade for the past five years is shown in the following table:—

Year.	Imports.	Exports.	Total Trade.
	£	£	£
1908	2,029,447	2,525,171	4,554,618
1909	2,394,412	2,655,573	5,049,985
1910	3,439,831	2,697,706	6,137,537
1911	3,784,260	3,792,454	7,576,714
1912	4,023,322	4,307,802	8,331,124

The following table gives the values of imports and exports of dutiable goods during the past two years to and from the countries classified:—

—	Total Imports therefrom.	Total Exports. thereto.	Total Imports therefrom.	Total Exports thereto.

* Exclusive of specie.

IMPORTS.

The total value of imports for 1912, as may be seen from the above table, was £4,023,322, this being an increase of £239,062 over the figures for 1911.

Commercial imports in 1912 amounted to £3,140,786, as compared with £2,762,946 in 1911, an increase of £377,840. The constituents of this increase are as follows:—

	£
Imports paying *ad valorem* duty ...	150,902
Imports paying specific duty... ...	144,851
Imports free of duty	84,691

which, with a decrease in Post Parcels of £2,604, make up the requisite total.

The gross value of Government imports for 1912 was £161,557, an increase on the 1911 figures of £21,335.

The value of specie imported during the year was £720,978, or a decrease of £160,114 on the figures for 1911; this decrease may be attributed to reserves held over from the preceding year.

A comparative table of the quantities and values of the principal articles of import during the last two years is appended:—

Post Parcels	—	—	127,137	—	124,534	—	2,603
Total		—	3,784,260	—	4,023,322	432,240	193,178
				Decrease		193,178	—
				Net Increase		239,062	—

The most noticeable increases in the value of imports in 1912 were as follows:—

	£
Rice	40,254
Provisions	32,541
Cotton goods (excluding Yarn and Twist)...	32,407
Machinery	27,657
Rum	26,537
Building Materials	23,073
Bread and Biscuits	22,496
Flour	20,446
Sugar	14,663
Wearing Apparel	12,097

The increases in rice and provisions generally may be attributed to the growing wealth of the native and his desire for imported delicacies; while the famine that occurred in the eastern districts of the Colony during the middle of the year was undoubtedly also a contributing factor.

The increase under Building Materials was due partly to the late arrival of 1911 consignments, but principally to the desire of the people for better housing accommodation.

Increases in the value of imports such as furniture, soap, perfumery and woollen goods may be attributed to the general expansion of trade and improvement in the conditions of native life consequent on increased wealth.

The outstanding decrease in the value of imports for 1912 was in specie, which shows a fall of £160,114 on the figures for 1911. This is due partly to reserves held over from 1911, and partly to the fact that the amount required was not put at so high a figure as in the previous year, and consequently less had to be re-shipped.

Decreases were also recorded in lumber, coal and hardware, which were due to overstocking in 1911.

EXPORTS.

The total value of all seaborne exports from the Colony during 1912 was £4,307,802, as against £3,792,454 in 1911, an increase of £515,348, or 11 per cent.

A comparative statement of the principal articles exported during the last two years is appended:—

Article.	1911.		1912.		Increase.	Decrease.
	Quantity.	Value.	Quantity.	Value.		
		£		£	£	£

Specie ... ... —	—	321,145	—	303,506	—	17,639
Other Articles ... ... —	—	12,962	—	23,577	10,615	—
Total	—	3,792,454	—	4,307,302	601,185	85,837
		Decrease			85,837	—
		Net Increase			515,348	—

The most notable increases were:—

	£
Gold (including auriferous by-products)...	399,044
Timber	89,924
Kola Nuts	41,132
Palm Kernels	29,474
Cocoa	29,265

The value of gold exported surpassed that of all previous years, and shows that, in spite of the temporary closing down of six of the mines, the development of this industry is proceeding with satisfactory results.

The values of timber, kola nuts and palm kernels also show record figures for the Colony, while the gratifying advance in the average value of cocoa is evidence of the greater care exercised by the cultivators of the crop.

The principal decreases were:—

	£
Rubber	50,718
Specie	17,639
Palm Oil	10,031

The decrease in the rubber exported is due to the low prices ruling in the European markets, which have practically ceased to deal in the lowest grade native rubber, and the diversion of labour to more profitable occupations.

The decrease under Specie may be attributed to a more correct estimate of the requirements for the cocoa season, and has no bearing on the trade of the Colony; while that under Palm Oil is due to the dryness of the season, which had a deteriorating effect on the yield of oil from the nuts.

PORTS.

The principal ports in the Colony are:—

Port.	Total Customs Dues.	Total Value.		Total Trade.
		Imports.	Exports.	
	£	£	£	£
1. Seccondee	184,890	1,441,643	2,034,189	3,475,832
2. Accra	174,654	1,238,502	1,081,592	2,320,094
3. Addah	115,221	359,617	343,968	703,585
4, Axim	20,950	95,736	190,531	286,267
5. Saltpond	39,555	147,293	197,905	345,198
6. Quittah	43,328	127,902	84,522	212,424
7. Winnebah	39,715	163,656	159,325	322,981
8. Cape Coast... ...	27,039	120,117	50,987	171,104

With the exception of Cape Coast, the total trade of all these ports shows an advance on the corresponding figures for 1911. The decline at Cape Coast is due to the fact that specie is now imported direct to Saltpond and Winnebah.

Axim, by increased activity in the timber trade, has nearly recovered from the diversion of trade from this port consequent on the opening of the Prestea branch of the Seccondee railway.

The above figures give evidence of a year of great prosperity, and it is satisfactory to note that, while material prosperity is indicated by the high values reached in the principal articles of export, signs are not lacking that increasing wealth is being followed by improved conditions of living.

PREVENTIVE SERVICE.

The efficiency of the Preventive Service, which is a branch of the Customs' Department and operates on the frontiers of the adjoining Administrations, was well maintained.

The distribution of men was as follows:—

Volta River Preventive Service ... ... 255 men
Western Frontier Preventive Service ... 108 ,,
South-Eastern Frontier Preventive Service 77 ,,
North-Eastern Frontier Preventive Service 42 ,,

MINING.

The value of gold produced in 1912 was £1,499,469, an increase of £420,445 on the figures for 1911, and surpassed that of all previous years.

Of the total amount produced, 340,479·34 ounces were obtained by mining and 12,478·14 ounces by dredging.

The increase in the Colony amounted to £433,135; Ashanti, however, shows a decrease of £12,690.

The value of gold produced by the various mining companies during the past five years is shown in the following table:—

On the Tarquah conglomerate mines 218,362 tons were crushed and produced 103,364·52 ounces, this being an extraction of 9·47 dwts. per ton of 2,000 lbs.; from the quartz mines the crushing of 458,186 tons produced 237,114·82 ounces, being an extraction of 10·35 dwts. per ton.

The various dredging companies treated 2,204,501 yards of alluvium, with a production of 12,478·14 ounces of fine gold, an average of 2·71 grains per cubic yard treated.

The average number of labourers employed daily by the mining and dredging companies throughout the year was 17,633, as against 19,153 in 1911. The decrease may be attributed to the closing of a certain number of mines and to the fact that less labour was employed on the surface works.

Seven prospecting and four mining licences were granted in Ashanti and the Colony during the year; and forty-nine certificates of validity for Mining Concessions were issued.

Nineteen persons were prosecuted for contravention of the Mining Rules, the fines inflicted by the Court amounting to £85 10*s*.

Manufactures.

Native manufactures are insignificant. Cloths are woven in many parts of the Colony, usually of yarn spun in Europe, but in the northern districts occasionally of thread manufactured from the indigenous cotton plant.

Many of the local requirements, such as canoes, baskets, pots, and fishing nets, are supplied by native industries.

Salt is roughly prepared from the lagoons between Accra and Quittah and sent up country to the markets of the Northern Territories.

Fisheries.

A number of canoes, estimated at 5,000, are employed in the fishing industry. The trade in cured fish is considerable and appears to be on the increase.

Agriculture.

Agriculture is the most prominent native industry throughout the Colony, the principal food crops being yam, maize, cassada, plantain, and amankani. The energy of the farmers is turned mainly to the cultivation of cocoa, of which 86,568,481 lbs., valued at £1,642,733, were exported in 1912, as against 88,987,324 lbs., valued at £1,613,468 in the previous year. This decrease may be attributed to the late ripening of the crop, and an increase is anticipated in this year's production. From the higher ratio of value in proportion to production it may be inferred that the instruction given by travelling officials of the Agricultural Department is beginning to have a good influence in the direction of scientific cultivation.

The quantity of kola nuts exported was the largest on record, amounting to 7,133,165 lbs., with a value of £134,231.

Palm kernels show an increase on the figures for 1911, 14,628 tons being exported, as against 13,254.

A decline in the export of palm oil is shown, 1,444,432 gallons being shipped, as against 1,610,209 in 1911: this is due to the increasing attention that is being given to cocoa, which yields a more immediate profit. Rubber also shows a decline, 1,990,699 lbs. being exported in 1912, compared with 2,668,667 lbs. in the previous year.

Agricultural stations in charge of European curators are established at Aburi, Tarquah, and Assuantsi in the Colony, at Coomassie in Ashanti, and at Tamale in the Northern Territories. In addition to these a small sub-station was opened at Kibbi in February and a large nursery established.

The European and native travelling instructors confined most of their attention to the cocoa crops, but instruction was also given in connection with the cultivation of other products of economic importance.

Following on the successful Agricultural Show held in 1911 a Volta River District Show was held at Odumase in November and was attended by a large number of chiefs.

Forestry.

The work of the Forestry Department was mainly confined to inspection and report on the forest areas. It is satisfactory to note that improved development of the timber industry is confidently expected.

The quantity and value of timber exported during the last two years is as follows:—

	1911.	1912.
Quantity	13,973,396 ft.	23,573,651 ft.
Value	£138,821	£228,745

Imperial Institute.

The following reports were furnished by the Imperial Institute to the Government of the Gold Coast during 1912 as the result of investigations conducted in the Scientific and Technical Department, supplemented when necessary by reference to manufacturers and commercial experts. In some cases recommendations were made in the reports with a view to developing a trade in products for which there would be a commercial demand.

The characters and quality of 13 samples of cotton grown at Labolabo, Assuantsi, Peki, and Tamale were determined, and valuations ranging from 5*d.* to 7*d.* per lb., with "middling" American at 5*d.* per lb., were obtained.

Three samples of Amelonado cocoa were forwarded for examination in continuation of the previous work on Gold Coast cocoa. One of the samples had been well fermented and was valued at 57*s.* to 58*s.* per cwt., *ex* quay, Liverpool. The other two samples were unfermented and these were valued at 53*s.* to 54*s.* per cwt. in Liverpool. A fourth sample, described as the produce of trees differing from the ordinary variety grown in the Gold Coast, and more nearly resembling the Cundeamor type of Ceylon, was valued at about 60*s.* per cwt. in Liverpool on the same date as the preceding samples, and was stated by brokers and manufacturers to represent a particularly promising variety which should repay extended cultivation.

A sample of arrowroot consisting of genuine Maranta starch was of good colour, and was valued at about 3*d.* per lb. in London, with St. Vincent arrowroot at 3½*d.* to 3¾*d.* per lb.

A sample of Cassava starch, of exceptionally good appearance and purity, was valued at £14 to £15 per ton, *ex* wharf, Liverpool. Commercial experts considered that it should be possible to sell a large quantity of this starch in the United Kingdom if it could compete with tapioca flour selling at £12 to £15 per ton. Further information was requested as to whether similar starch could be supplied in commercial quantities, and, if so, the price at which it could be offered. It was suggested that a trial consignment should be forwarded for sale.

The sample of guinea grain consisted of rather small grains, which were, however, satisfactorily pungent and aromatic. The market for this product is very limited, and there does not seem to be much likelihood of an increased demand.

A sample of capsicum fruits, probably derived from *Capsicum minimum*, contained a rather large proportion of green unripe fruits. The mixed fruits were valued by one firm of brokers at from 18*s*. to 20*s*. per cwt. in London (March, 1912), and by a second firm at not over 15*s*. per cwt. (May, 1912). The latter firm stated that if the unripe fruits had been absent the value would have been 25*s*. per cwt.

A sample of black pepper (*Piper nigrum*) was described by brokers in London and Liverpool as of fair quality and worth about 5*d*. to 5½*d*. per lb. (March, 1912).

Samples of palm fruits and fibre, stated to represent the fruits used and the residue obtained in experiments conducted with the Gwira palm-pulping machine, were examined. The result did not indicate that the machine is as efficient in extracting palm oil as the usual native method.

An investigation of samples of palm oil obtained (1) from fresh fruits, (2) from fruits fermented eight days, and (3) from fruits fermented six weeks showed conclusively that the effect of allowing palm fruits to ferment for a considerable period is to produce a "hard" oil of much lower commercial value than the "soft" oil prepared from the fresh fruits.

The kernels of "Kaku" seeds (*Lophira procera*) were found to yield 55·3 per cent. of a cream-coloured, solid fat, which was considered by commercial experts to be suitable for soap-making. The kernels were valued at about £12 per ton, delivered in Liverpool (January, 1912).

A sample of shea kernels yielding 51·2 per cent. of fat was valued at £10 10*s*. per ton (March, 1912). A sample of shea butter was submitted to commercial experts, who reported that it would sell readily at current rates, viz., £28 5*s*. per ton (March, 1912).

Lands.

The following paragraphs under this head from the Report for 1910 are again published for general information, there having been no change or legislation in connection with land during the period under review:—

The bulk of land in the Colony belongs to the tribal "stools" and theoretically there is no land without an owner. The ascertainment of the exact boundaries of tribal land is, however, often a matter of considerable difficulty, as towns and villages have sprung up with large tracts of intervening unoccupied land, sometimes dense forest, which is gradually brought under cultivation from either end. Now that the value of land is appreciated, boundary disputes frequently come before the Supreme Court, and in certain parts of the Colony, especially in the mining district of Wassaw, the limits of the lands adjoining tribal stools have been definitely prescribed.

The general principle laid down by judicial decisions is that all land within the recognised territory of a "stool" is the property of that stool. Thus, in the case of every head chief's division, where there are tribal and family stools in subordination to the head chief's stool, all lands within the recognised boundaries of the family or subordinate tribe are held to be attached to the family or tribal stool, but all other unoccupied lands are the property of the head chief's stool. An attempt was recently made in the courts to extend this principle so as to enable the head chief's stool to claim all cultivated land the original title to which, as is not uncommon in the case of lands under native tenure, is lost in obscurity; but, though no limit of prescription is laid down by native law, the local Court of Appeal held that in the case of long occupation and when there has been cultivation of permanent crops, such as sugar-cane and cocoa, as opposed to the usual shifting cultivation of yams, plantains, and similar food products, the presumption is that the occupation was with the consent of the head chief's stool.

The Crown possesses no waste lands in the Colony, but certain lands have been acquired by the Government from time to time, mostly under the provisions of the Public Lands Ordinance, 1876, which legalises compulsory acquisition for the services of the Colony on payment of reasonable compensation.

Of recent years deeds have come into common use, especially in land transactions between natives and Europeans. Where these deeds relate to grants of rights of mining, felling timber, and collecting rubber, and other products of the soil, they are called concessions, and their validity is inquired into by the Supreme Court, under the provisions of the Concessions Ordinance, 1900. The court inquires whether the grantors are the native owners of the land, whether the area falls within the prescribed limit of five square miles for a mining concession and 20 square miles for other concessions, whether the prescribed term of 99 years is exceeded, whether the consideration is adequate, and whether the statutory rights reserved to the natives are included in the deed. A survey and demarcation of boundaries by the Survey Department is ordered, and when it is completed a certificate of validity, giving the lessee an indefeasible title, subject to observance of his covenants, is issued by the court, in which are contained such modifications of the deed as the court may impose to bring it within statutory requirements, and to render it a transaction fair and equitable to both parties. The rent from certified concessions is paid to the native grantors through the Government. Concessions granted solely for purposes of plantation of rubber and other products may be exempted from the operation of the Ordinance; whilst concessions to acquire mineral oil are held subject to the Government right of pre-emption of the oil under Ordinance No. 15 of 1907.

Shipping.

The following statement gives the comparative number and tonnage of vessels which entered and cleared at the ports of the Colony during the past five years:—

The mail steamers of the African Steamship Company and the British and African Steam Navigation Company, both of which are under the management of Messrs. Elder, Dempster and Company, leave Liverpool every Wednesday for Seccondee, Cape Coast and Accra, and on alternate Wednesdays for Axim, the scheduled time of the voyage being 15 days. Homewards, the mail service leaves Accra every Friday and is due to arrive at Plymouth in 16 days. The same companies also provide three services of cargo boats from Liverpool—the Benin and Brass Service, the Opobo Service, and the South Coast Service.

The steamers of the first-named service leave every alternate Saturday and call at Axim, Seccondee, Cape Coast, Saltpond, and Accra. Those of the Opobo Service, which sail on the other alternate Saturday, call at Axim, Seccondee, Cape Coast, Winnebah, Accra, and Addah, and every alternate boat at Appam; the same ports of call are touched on the homeward voyage, with the exception of Accra, which is only touched in the cocoa season. Boats in the South Coast Service run every month from Liverpool on Thursdays, calling outwards and homewards at Half Assinie, Dixcove, Ajua, Chama, Elmina, Pram Pram, and Quittah, and at Accra homewards.

Two services from Hamburg, known as the Creeks Services No. 1 and No. 2, are provided by these lines. The ships of both services call at Axim, Seccondee, Cape Coast, Saltpond, Appam, Winnebah, Accra, and Addah both outward and homeward. A monthly service runs from London on Thursdays, calling at Axim, Seccondee, and Accra, and occasionally at Cape Coast outward, and at Danoe, Quittah, and Accra homewards.

The cargo service takes from 32 to 34 days to Accra.

The rates of fares from Liverpool by these lines are £28 12*s*. first class, and £20 7*s*. second class, for all ports as far as Winnebah; and £29 14*s*. and £21 9*s*., respectively, to Accra and eastward ports.

The Woermann Line runs two mail steamers monthly from Hamburg, calling at Dover on the 11th and 26th of each month, with passengers and mails for Seccondee and Accra. The boats also call homewards at the same ports on the 14th and 29th of each month and disembark passengers at Southampton. The

passenger fares are the same as on the Elder Dempster steamers, and the duration of the voyage is 15 days. Cargo services of the Woermann, Hamburg-Amerika, and Hamburg-Bremen-Afrika Lines leave Hamburg for the Gold Coast ports on the 12th, 16th and 30th of each month.

The Chargeurs Réunis run a monthly service to the Gold Coast, sailing from Dunkirk on the 5th of each month. One passenger boat monthly calls at Accra on the homeward voyage.

III.—LEGISLATION.

Twenty-two Ordinances were passed by the Legislative Council during the year under review, of which the following are the most important:—

No. 1 of 1912.—The Master and Servant (Amendment) Ordinance, providing new forms of contract (*a*) for servants engaged other than on mines or works, and (*b*) for servants engaged on mines or works, and giving power to make rules for the recruiting of servants, their registration, identification, and inspection, their examination by medical officers, the inspection of their houses and food, and generally for the care and treatment of themselves and their families.

No. 2 of 1912.—To prevent the introduction into the Colony of pests and insects destructive to trees, plants and crops.

No. 3 of 1912.—Making provision for the registration of births, deaths and burials.

No. 4 of 1912.—The Illiterates Protection Ordinance, providing for the licensing of letter writers and the fees to be paid to them.

No. 7 of 1912.—Providing for the registration of medical practitioners and dentists.

No. 15 of 1912.—Amending the Quittah Customs Tariff in so far as the duties on spirits are concerned.

No. 16 of 1912.—Imposing further conditions in connection with the obtaining of certificates of validity for concessions.

Six Ashanti and two Northern Territories Ordinances were enacted by the Governor. Of the Ashanti Ordinances, two were amendments of the Administration Ordinance, one an amendment of the Commissioners Ordinance, two amendments of the Concessions Ordinance, and one an amendment of the Firearms Ordinance. Of the Northern Territories Ordinances one was an amendment of the Administration Ordinance and one an amendment of the Constabulary Ordinance.

IV.—EDUCATION.

The schools under the management of Missionary Bodies which are subject to inspection by officers of the Education Department and receive grants-in-aid from public funds numbered, at the close of the year, 148. There are 11 schools under direct Government control.

The following is a comparative table showing the number of schools inspected during the last two years:—

Denomination.	1911.	1912.	Increase or Decrease in 1912.
African Methodist E.Z. Mission	4	5	+ 1
Basel Mission	62	69	+ 7
Bremen Mission	15	16	+ 1
Church of England	3	3	—
Government Schools	9	11	+ 2
Roman Catholic Mission	22	22	—
Wesleyan Mission	46	32	− 14
Secondary Schools	1	1	—
Total	162	159	− 3

One hundred and forty-two of the Mission Schools inspected obtained grants-in-aid.

The number of children enrolled on the registers of Government and assisted schools during 1912 was 18,524, a decrease of 156 as compared with that of the previous year. This is partly due to the withdrawal of the large number of Wesleyan Mission Schools from the assisted list. It is satisfactory to note, however, that the average daily attendance was 14,113, an increase of 494 as compared with 1911.

The grants-in-aid in 1912 amounted to nearly £8,853, an increase of £1,351 on the figures for 1911.

The total income of the assisted schools for the year was £15,874, of which sum the grants-in-aid represent rather more than half, the balance consisting of amounts collected in school fees, voluntary subscriptions and grants from the Mission Societies. The average of the fees paid by pupils in the assisted primary schools was 1*s*. 9*d*.

The total sum expended by Government on education in the Colony and its dependencies in 1912 amounted to £20,585, a total exceeding that of the previous year by £998.

In addition to the assisted schools there are 176 primary schools supported by the various religious bodies, with an enrolment of 4,895 children; education is not compulsory.

There is a Government Training Institution for teachers at Accra, and two Basel Mission Seminaries, situate at Akropong and Abetife, which receive grants from Government in aid of the secular work which they perform.

The increase in the staff of the Training Institution was of decided advantage to the work of the students: this was indicated by the successes gained in the examination of teachers and students for certificates. Physical drill was added to the curriculum. Satisfactory results were also obtained from the instruction in woodwork at the Government Technical School, Accra.

A feature of the year was the introduction of hand and eye work into the majority of the schools, and this innovation was attended by satisfactory results.

Increased attention was paid throughout the Colony to instruction in agricultural and industrial work, including carpentry, printing, weaving and book-binding.

Thirty-three candidates succeeded in obtaining certificates at the courses of instruction in agriculture for students and teachers held at the Aburi, Assuantsi, Tarquah and Coomassie stations.

At the competitive Civil Service examinations for 1912, which control admission to clerkships in the Government service, 52 candidates obtained passes.

V.—GOVERNMENT INSTITUTIONS.

In the course of the year 1,004 Europeans and 25,964 natives were treated in the hospitals and dispensaries of the Colony, as compared with 878 and 24,197, respectively, in the previous year.

The appended table gives the total number of patients treated in the various hospitals during the years 1911 and 1912:—

Hospital.	1911.		1912.	
	Number of in-patients.	Number of out-patients.	Number of in-patients.	Number of out-patients.
Accra	517	4,262	603	5,095
Seccondee	569	3,380	762	4,010
Cape Coast	198	3,996	250	3,354
Axim	103	3,666	133	2,702
Saltpond	—	867	—	996
Winnebah	35	1,326	70	1,118
Tarquah	89	1,062	98	1,470
Elmina	5	746	5	510
Quittah	48	1,902	85	2,253
Addah	38	1,128	56	1,855
Akuse	94	1,044	154	1,384
Total	1,696	23,379	2,216	24,747

The new European hospital at Accra has not yet been completed, but the existing one, which comprises 3 European and 4 native wards, containing 7 and 25 beds, respectively, was made mosquito proof.

The hospital at Seccondee consists of 6 European wards, including 2 for convalescents, with a total of 16 beds, while, for native patients, 4 wards with 20 beds are provided. At Cape Coast there is accommodation for 13 Europeans, while there are 4 wards containing 19 beds for native patients.

At Coomassie there is a European hospital with 4 wards, and a native hospital with 3 wards.

The returns of patients treated at this station during the year are as follows:—

Europeans	52
Natives in-patients	1,028
Out-patients	6,869

European nursing sisters are attached to the Accra, Seccondee and Coomassie Hospitals.

There are a lunatic asylum and a laboratory at Accra, and a special sleeping sickness hospital at Anum. The number of patients admitted to the lunatic asylum amounted to 36 males and 7 females, as against 31 and 6 in the previous year; the number discharged as cured was 4 males and 1 female, as against 8 and 2 in 1911. The daily average of inmates was 95, of whom the majority were classified as dangerous maniacs. Those who are fit to do any work are employed in the asylum garden.

The Post Office Savings Bank continued to show good progress. The number of depositors' accounts remaining open at the end of the year was 3,857, as compared with 3,137 on the 31st December, 1911.

The value of deposits during the year amounted to £25,447, an increase of £1,453 over the figures for 1911; and withdrawals were returned at £22,476, as against £19,130 for the previous year.

The credit of the bank on the 31st December, 1912, was £38,576, or an increase of £3,795.

The interest paid to depositors during the year amounted to £824, as compared with £729 in 1911; and the interest received from investments was £1,034, as against £845 in the preceding year.

VI.—JUDICIAL STATISTICS.

Police.

The total strength of the police force of all ranks on the 31st December, 1912, was 838, being one below the authorised strength, and was distributed as follows:—

General police	520
Escort police	206
Mines police	53
Railway police...	59
Total	838

The establishment of the force was augmented during the year by the following additions:—

General.

1 staff instructor.
2 senior superintendents.
2 superintendents.
7 police clerks and interpreters.
1 sergeant.
2 second-class constables.
3 third-class constables.

Escort.

1 sergeant.
2 corporals.
4 second-class constables.
8 third-class constables.

The number of recruits enlisted was 334, as compared with 262 in 1911.

The general level of physique and intelligence among those who were recruited to the general police was on a par with that of the previous year.

Excellent work was done by the escort police during the year, no losses occurring of consignments of specie entrusted to their charge; good reports were also returned with regard to the railway police.

There were 90 cases of dismissal for various offences, as against 86 in 1911.

The detection and prevention of crime compared very favourably with preceding years. A noticeable feature was the prevalence of the crime locally designated "money doubling," a method of extracting large sums from a credulous public by the assumption of magical powers of increasing any money deposited with the principals. It is satisfactory to note that by the strenuous efforts of the police this evil was considerably abated by the end of the year.

The health of the force was good throughout 1912, and the police gave active assistance to the medical authorities in dealing with outbreaks of yellow fever in Accra and small-pox in various parts of the Colony.

Prisons.

The four central prisons of the Colony, in which long-sentence prisoners are confined, are situate at Accra, Cape Coast, Elmina and Seccondee.

Prisoners whose sentences are less than six months serve their time in the minor gaols at Axim, Seccondee (Fort Orange), Tarquah, Saltpond, Winnebah, Akuse, Addah and Quittah. At Obuasi and Coomassie, in Ashanti, prisoners undergo sentences up to three years; minor gaols are at Dunkwa, Kintampo, Sunyani and Krachi.

No new prisons were declared during the year.

The number of prisoners admitted in 1912 was 6,064, an increase of 590 over the figures for the previous year. The daily average of prisoners in the Colony and Ashanti was 1,046, as compared with 978 in 1911, an increase of 68.

The reports on the various prisons show that the discipline maintained was generally satisfactory, and for the latter part of the year was good, though the first six months were characterised by outbreaks of insubordination.

The total earnings for prison industries and labour amounted to £2,528, as against £2,278 in the preceding year, an increase of £250.

The health of the prisoners generally was good.

Criminal Statistics.

The total number of persons apprehended by the police or summoned before the Courts in the Colony and its dependencies was 13,595, an increase of 1,184, as compared with 1911. Of these, 2,131 were acquitted. The convictions obtained numbered 11,460, as against 10,377 in the previous year.

The number of cases in the Supreme Courts of the Colony in 1911 and 1912 were as follows:—

	1911.	1912.
Convictions for offences against the person	71	46
Convictions for slave-dealing	2	—
Convictions for offences against property (other than prædial larceny) ...	26	16
Convictions for other offences	41	24
Acquittals	81	108
	221	194

The comparative figures in respect of the summary convictions for the past two years are appended:—

	1911.	1912.
Convictions for offences against the person	862	1,041
Convictions for slave dealing	6	7
Convictions for offences against property (other than prædial larceny)...	1,228	1,430
Convictions for other offences	5,545	6,011
Acquittals	1,417	1,494
	9,058	9,983
Grand total for the Colony ...	9,279	10,177

Summary jurisdiction alone obtains in Ashanti; the figures in respect of 1911 and 1912 are as follows:—

In the Superior Courts.	1911.	1912.
Convictions for offences against the person	14	25
Convictions for slave dealing	1	—
Convictions for offences against property (other than prædial larceny) ...	16	10
Convictions for other offences	9	11
Acquittals	16	18
	56	64

In the Inferior Courts.	1911.	1912.
Convictions for offences against the person	200	354
Convictions for slave dealing	2	3
Convictions for offences against public health	897	1,001
Convictions for offences against property (other than prædial larceny) ...	277	261
Convictions for other offences	545	680
Acquittals	355	409
	2,296	2,708
Grand total for Ashanti ...	2,332	2,772

In the Northern Territories trial is also summary, the figures for the past two years being as follows:—

In the Superior Courts.	1911.	1912.
Convictions for offences against the person	7	1
Convictions for offences against property (other than prædial larceny) ...	—	—
Convictions for other offences	—	6
Acquittals	4	7
	11	14

In the Inferior Courts.	1911.	1912.
Convictions for other offences against the person	94	108
Convictions for offences against public health	183	186
Convictions for offences against property (other than prædial larceny) ...	109	106
Convictions for other offences	262	137
Acquittals	141	95
	789	632
Grand total for the Northern Territories	800	646

Native Tribunals.

Returns of cases heard before native tribunals are not sufficiently accurate for much reliance to be placed on the figures. Native customary law does not generally discriminate between civil and criminal actions, although in some divisions a distinction is drawn. The returns indicate that 2,148 cases were heard, of which 108 were shown as civil actions; on these judgment was given in 27 instances for the defendant and in 81 for the plaintiff. The cases classified as criminal comprise offences connected with marriage laws, fetish practices and breach of oath; assault was responsible for 381; offences against property for 307; and offences against public health, 32. Peremptory imprisonment was inflicted in 123 instances; imprisonment in lieu of fine in 38; and fines in 1,875; while in 4 cases trivial punishments were imposed.

VII.—VITAL STATISTICS.

The total population of the Gold Coast Colony and its dependencies according to the most recent census—that of 1911—is 1,503,386.

No census was returned for 1912, but provision was made for the greater accuracy of future returns by the passing of Ordinances in connection with the compulsory registration of births and deaths, and of the arrivals and departures of Europeans and Asiatics. These Ordinances did not come into practical operation until the latter quarter of the year, and it is early to judge of their utility.

The number of Europeans resident in the Colony during the year is given as 2,367, as compared with 2,245 during 1911.

Decreases of 4·46 in the death rate and 4·4 in the invaliding rate per thousand are recorded, the mortality being highest among the officials. An analysis of the death and invaliding statistics is appended:—

1911.	Number of Residents.	Deaths.	Invalided.	Death rate per 1,000.	Invaliding rate per 1,000.
Officials	566	4	27	7·06	47·70
Merchants	605	14	20	23·14	33·05
Mining companies ...	922	16	31	17·35	33·62
Missions	152	3	3	19·73	19·73
	2,245	37	81	16·48	36·08
1912.					
Officials	586	8	13	13·65	22·18
Merchants	668	7	24	10·47	35·92
Mining companies ...	953	11	35	11·54	36·72
Missions	160	2	3	12·50	18·75
	2,367	28	75	11·82	31·68

1911.	Number.	Deaths.	Invalided.	Death rate per 1,000.	Invaliding rate per 1,000.
Colony	1,715	34	56	19·82	32·65
Ashanti	463	3	23	6·47	49·67
Northern Territories	67	—	2	—	29·85
	2,245	37	81	16·48	36·08
1912.					
Colony	1,811	24	61	13·25	33·68
Ashanti	470	3	13	6·38	27·70
Northern Territories	86	1	1	11·62	11·62
	2,367	28	75	12·25	31·68

Death in the case of the eight European officials was due in two cases to yellow fever, in two to blackwater fever, and in two to malaria, the remaining two being due to non-climatic causes.

There were four cases of yellow fever amongst Europeans, all of which proved fatal. Of officials, 13 were invalided owing to:—malaria, 3; blackwater fever, 2; neurasthenia, 2; adenitis, 1; neuritis, 1; various, 4; and of non-officials 62, due to:—malaria, 22; blackwater, 6; dysentery, 6; anæmia, 3; gastritis, 2; various, 23.

The number of Europeans coming under treatment was 1,004, as against 878 in 1911.

No means exist whereby accurate statistics relating to the health of natives can be obtained. The returns show that the number of attendances for hospital and dispensary treatment was 25,964, or 1,767 more than in the previous year. Treatment was given for 2,282 cases of malaria, 1,931 of helminthic diseases, and 549 for dysentery.

In all, 46,234 cases of disease were treated, of which 257 proved fatal—the figures for 1911 being 42,389 and 184, respectively.

There were several outbreaks of smallpox in the Eastern Province of the Colony during the year, and slight outbreaks occurred in the Central and Western Provinces. In Ashanti one case was recorded during the year, and no cases were reported in the Northern Territories.

The number of successful vaccinations performed was 23,232.

There were 104 cases of sleeping sickness reported during the year, and there were three deaths. The cases were distributed as follows: 4 in the Colony, 3 in the Northern Territories, the rest in Ashanti, chiefly in the Western Province.

There were three cases of yellow fever among natives in Accra, all of whom recovered.

The following table shows the native mortality as registered in the hospital records and the cemeteries of the principal towns:—

	Hospital records.	Burial Permit records.
1907	113	1,517
1908	554	1,159
1909	232	1,611
1910	271	2,099
1911	184	1,932
1912	—	2,166

The appended table gives the results of the meteorological observations taken at the stations mentioned during the year:—

Station.	Temperature.						Rainfall.	
	Solar maximum.	Minimum on grass.	Shade maximum.	Shade minimum.	Range.	Mean.	Amount in inches.	Degree of humidity.
Accra	143·71	74·15	85·59	72·60	12·98	79·09	20·53	79·08
Aburi	143·86	67·38	84·45	66·57	17·87	75·92	32·40	84·57
Addah	148·15	73·40	84·05	76·06	7·82	80·08	27·16	82·47
Quittah	138·55	66·18	87·16	74·43	12·75	80·79	17·49	76·72
Cape Coast ...	128·40	63·43	86·13	72·49	13·63	79·26	20·10	82·59
Seccondee	130·04	68·79	87·39	71·34	16·44	79·35	33·32	58·22
Axim	131·34	59·09	84·68	72·41	12·04	75·77	63·59	90·48
Tarquah	151·97	70·49	91·73	71·79	19·43	81·75	52·06	78·73
Coomassie	137·10	61·87	86·69	70·65	15·97	78·66	50·54	84·48
Kintampo	145·47	—	90·16	69·56	20·61	77·02	—	74·09
Sunyani	128·36	56·28	83·00	53·68	27·17	64·62	36·90	82·95
Gambaga	—	70·28	93·40	72·33	21·55	82·30	39·37	59·29
Tamale	151·10	52·98	95·78	66·89	28·80	77·95	27·20	57·24

Sanitation.

The sanitary conditions under the sanitary branch of the Medical Department show, generally, a marked improvement, but the inadequacy of water supplies remains a cardinal difficulty. There is a pipe-borne supply at Obuasi, in Ashanti, and waterworks at Accra and Seccondee are in course of construction.

During the year £42,053 was spent by the Public Works Department on sanitary improvements, and, in addition to other works, 17,612 lineal yards of concrete drain were laid and 3,141 lineal yards repaired or reconstructed; 22,190 lineal yards of open cut drains were made and 467,066 lineal yards cleaned; 15,458,005 square yards of vegetation were cleared; 594 pools or excavations were filled; 82,425 square yards of marsh land were filled and drained; and 6,352 drains and 3,693 pools were treated with crude petroleum.

The sum of £32,922 was expended under the head of sanitation.

In addition to the normal expenditure the following sums were spent:—

	£
Sleeping sickness preventive measures	1,807
Yellow fever do. do.	960

In 1912 5,677 prosecutions were made, and 5,590 convictions were obtained in the Courts for offences against sanitary laws and regulations.

VIII.—POSTAL, TELEGRAPH, AND TELEPHONE SERVICES.

The revenue of the post and telegraph department for 1912 amounted to £35,672, an increase of £4,161 over the figures for the previous year.

The department also collected £7,533 on behalf of the African Direct Telegraph Company and foreign administrations on account of telegrams forwarded; £14,018 on behalf of the Judicial Department, and £11,839 in respect of Customs duties levied on parcels; all of these sums showing increases over the corresponding figures for 1911.

The expenditure for the year amounted to £35,714, as against £29,781 in the preceding year.

The business dealt with by the department for the last two years is shown in the appended statement:—

	1911.	1912.
Sale of stamps for postal purposes	£10,376	£12,569
Letters and postcards received and despatched ...	5,009,407	5,061,059
Registered articles	414,271	473,758
Parcels	82,958	75,896
Money orders (value)	£49,491	£47,953
Postal do. do.	£148,418	£164,923
Do. do. (numbers) ...	214,954	232,934
Telegrams, public	191,062	190,235
Do. official	82,360	80,055

Two telegraph offices were closed during the year, the total number open to the public in the Colony, Ashanti, and the Northern Territories being forty-six, with a length of wire amounting to 1,492 miles.

A wireless telegraph station was erected at Accra.

Telephone exchanges are established at Accra, Seccondee, Tarquah and Dodowa, that at Cape Coast having been closed. The public subscribe for 76 of the 151 connections at the four exchanges.

IX.—ASHANTI.

The total revenue collected in Ashanti during 1912 was £50,265, as compared with £50,319 in the previous year, a decrease of £54.

The expenditure in 1912 was £148,685, as against £146,317 in 1911, showing an increase of £2,368.

The imports by railway amounted to 16,469 tons, as against 13,998 in the previous year, an increase of 2,471 tons. There was a marked increase in the number of cattle imported, the great majority coming in from the north.

The chief exports were rubber, cocoa, kola, cattle, sheep, and hides.

The quantity of rubber exported by rail is estimated at 952 tons, a decrease of 254 on the figures for 1911. This is due to the systematic over-tapping of the wild trees by the natives, a practice which some of the chiefs have had the foresight to check. Cocoa shows an increase of 26 per cent. on the previous year's figures, 6,337 tons being exported; and the demand for kola was steadily maintained, 3,000 tons being exported.

The amount of gold produced during the year was valued at £517,893, as against £530,583 in 1911.

The chief interests of the natives now lie in the direction of agriculture, with especial reference to the cultivation of cocoa, and travelling inspectors were constantly employed in giving instructions as to the proper care of plantations.

Education continued to make steady progress, the natives displaying great eagerness to obtain the advantages of secular education for their children.

European hospitals are established at Coomassie and Obuasi, and native hospitals at Coomassie, Obuasi, Sunyani, and Kintampo.

Satisfactory reports are returned with regard to the discipline and efficiency of the Police and Prisons Departments.

No census has been taken since 1911, when the total population was returned as 287,814.

A marked improvement in the general health of the community is recorded for 1912, and the sanitation was well maintained.

Relations between the administration and the natives continued to be excellent, and the prospects of Ashanti for the future, in the direction both of political amity and trading prosperity, are very promising.

Full details and statistics may be found in the Annual Report on Ashanti by the Chief Commissioner.

X.—NORTHERN TERRITORIES.

The total revenue collected in the Northern Territories during 1912 amounted to £2,994, as compared with £2,426 in 1911, an increase of £568.

The expenditure showed a net increase of £13,809.

A general increase is reported in the value of imports during the year, the principal articles being cotton and woollen goods, silk handkerchiefs, hardware, haberdashery, beads, brass rods, tobacco, tinned provisions, and kola nuts. There was a steady export of cattle, while shea-butter and dawa-dawa found a ready market in Ashanti and the Colony. The trade statistics which are kept at all administrative stations do not represent the volume of trade with any accuracy, as the registration of live stock and goods is voluntary and several of the trade routes do not pass through provincial or district stations.

In spite of an unusually small rainfall harvests were abundant throughout the dependency; and cassava, ginger, sweet potatoes, and rice were distributed by the agricultural station at Tamale to the local chiefs for planting on their farms.

The British Cotton Growing Association, which has established presses at Tamale and Tamale-Port, was successful in inducing the natives to take an increased interest in cotton growing.

The Government School at Tamale was very well attended during the year, the daily average being 74, as against 56 in 1911. A school was opened in April at Gambaga, and requests have been preferred for the establishment of new schools at Wa and Bole.

The general health of both Europeans and natives was good, although the return for European officials is slightly more unfavourable than that for the preceding year.

No epidemic occurred during the year, and the chiefs and people appear to have begun to realise the importance of maintaining their houses and villages in a sanitary condition.

A few minor disturbances alone interrupted the peaceful administration of the Northern Territories during the year; and it is satisfactory to record that the chiefs have assisted the Government officers in the suppression of crime and the detection of malefactors, with the result that there was a general decrease in crime throughout the dependency and more sympathetic relations between the chiefs and the administrative officers.

Detailed information as to the Protectorate will be found in the Annual Report of the Chief Commissioner.

XI.—RAILWAYS AND ROADS.

The total capital liability in respect of the Seccondee-Coomassie Railway to the 31st December, 1912, stood at £2,414,961.

This sum includes the cost of all permanent improvements, additional plant, machinery, and rolling stock provided from time to time since the opening of the line, and also the cost of the Prestea-Broomassie branch.

During the year the following amounts were charged against the capital account:—

	£
Lowering No. 1 jetty	80
Improved station arrangements at Abosso ...	204
Engine shed extension at Tarquah	1,286
One inspection car, 3 third-class and brake composite carriages	2,912
Additional iron shed and locomotive workshop fittings	2,066
Twenty-five steel low-sided waggons	9,080
Two additional locomotives of 151 class ...	6,212
Two additional barrack quarters for 2nd class officers	1,750
Additional expenditure in connection with the Tarquah-Prestea branch...	128
Construction of the Accra-Pakro branch up to 31st December, 1912	346,403

The gross revenue for the year amounted to £315,373, and exceeded that for 1911 by £29,456. The estimated revenue exceeded the actual revenue by £39,627. The reason for this difference is attributable to the reduction in the goods tariff introduced on July 1st, 1912, and to the fact that the Accra-Akwapim railway was worked for six instead of for nine months as anticipated, the line not having been handed over until July 10th.

The net revenue for the year was £194,405, or £10,607 more than in 1911, and represents 8·05 per cent. of the total capital expenditure at the 31st of December, 1912.

The appended table shows the sources from which these earnings were derived:—

—	Coaching.	Goods.	Sundry Earnings.	Total.
Tarquah-Prestea	10,696	12,939	122	23,757
Broomassie	481	316	1	798
Accra-Akwapim...	9,845	27,640	114	37,599
Seccondee-Coomassie Main Line	52,880	196,339	4,001	253,219
Total	73,902	237,234	4,238	315,373

These figures do not include the sum of £18,155 which was paid by the contractors to Government during the provisional working of the line from December, 1911, to June, 1912.

The average receipts per mile of open line amounted to £1,420, as against £1,520 in 1911. The decrease is accounted for by the reduction in tariff and the fact that receipts for six months only on the Accra-Akwapim line are taken into account.

The receipts per train mile are £1 1*s.* 9*d.*, as compared with £1 4*s.* in 1911. The increase over the figures for 1911 in the coaching traffic receipts was £12,031, and in the goods traffic £17,120.

The revenue from coaching and goods traffic was, respectively, £73,902 and £237,233, as compared with £61,871 and £220,113 in 1911.

The total tonnage hauled amounted to 197,421 tons. Of this total 2,167 tons represent Government stores and 380 tons construction materials. The increase for 1912 is 14,077 tons. There was also an increase of 102,065 in the number of passengers carried.

The percentage of the current expenditure to revenue was 38·35, as compared with 35·71 in 1911. The percentage of the total capital and recurrent expenditure to revenue amounts to 45·83; in 1911 the percentage was 44·8.

The expenditure of the combined railways for the year, exclusive of a sum of £23,590, which was charged against capital account (improvements), amounted to £120,967, being £18,848 in excess of the actual expenditure in 1911, and £3,475 over the original estimate.

The amount paid in claims, &c., for goods lost, delayed and damaged was £411 11*s.* 10*d.*

The general financial position of the Government railways (open line) and results of working to the 31st of December, 1912, are as follows:—

Total capital expenditure ...	£2,414,961 0*s.* 0*d.*
Total revenue earned	£315,373 0*s.* 0*d.*
Total working expenditure ...	£120,967 0*s.* 0*d.*
Extraordinary expenditure chargeable to capital ...	£23,590 0*s.* 0*d.*
Proportion of working expenditure to revenue	38·35 per cent.
Proportion of total expenditure (working and extraordinary) to revenue	45·83 per cent.
Net revenue earned	£194,405 0*s.* 0*d.*
Interest upon capital expenditure	8·05 per cent.
Revenue per mile open (222 miles)	£1,420 0*s.* 0*d.*
Expenditure per mile open ...	£544 0*s.* 0*d.*
Total train mileage, exclusive of banking and shunting ...	288,914 miles.
Earnings per train mile ...	£1 1*s.* 9*d.*
Expenditure per train mile ...	£0 8*s.* 4*d.*
Net earnings per mile open ...	£875 0*s.* 0*d.*
Net earnings per train mile ...	£0 13*s.* 5*d.*
Total number of passengers carried	638,365
Gross tonnage of goods and minerals	197,421 tons.
Average fare per passenger carried	£0 2*s.* 3*d.*

Average earnings per goods ton mile (public and Government traffic) Seccondee line ...	6·32 pence.
Average earnings per goods ton mile (public and Government traffic) Accra line	9·49 pence.
Proportion of goods receipts to total revenue	75·22 per cent.
Proportion of coaching receipts to total revenue	23·43 ,,
Proportion of down to up traffic (goods) tonnage	55·11 ,,
Proportion of down to up traffic (goods) receipts	39·2 ,,

Increases in the commodities carried appear under cotton goods, fish, native produce, flour and timber (exported); and decreases under building materials, coal, mining machinery, firewood and timber (imported).

A summary of the accidents which have occurred on the Seccondee-Coomassie line for the past two years is appended:—

	1911.	1912.
Engine failure	27	16
Derailments	65	61
Fallen trees, &c.	56	62
Trolley accidents	3	6
Washouts of line and slips ...	—	4
Personal, fatal	11	6
,, non-fatal	7	16
Miscellaneous	46	20
Total	215	191

On the Accra line the following accidents occurred:—

Engine failure	4
Derailments	17
Personal, fatal	1
,, non-fatal	1
Miscellaneous	4
Total	27

No blame attached to the railway in any of the cases which proved fatal.

On the Seccondee line 244 persons were charged with offences under the Railway Ordinance, 212 convictions being obtained.

On the Accra line 22 prosecutions resulted in 14 convictions being obtained.

The Accra-Akwapim railway was taken over from the contractors on July 1st and worked under the railway administration with satisfactory results. The line was opened as far as Mangoase, and a survey of the proposed extension to Komfrodua was carried out; construction work is now in hand.

The quantity of cocoa carried on this line was 14,159 tons, while 6,593 tons were conveyed on the Seccondee-Coomassie line.

An inspection of the Government railways was carried out by Major Waghorn, R.E., and a report was presented by him early in the year.

Roads.

The main roads of the Colony are constructed and maintained by a branch of the Public Works Department. In addition to these 2,096 miles of roads in the Colony have been placed under the Roads Ordinance (No. 13 of 1894) and are kept clear of bush and made passable by the native chiefs. A chief receives every quarter, under the provisions of this Ordinance, a payment proportionate to the length of road so kept in repair, calculated, in the discretion of the District Commissioner, at a rate of 5*s*. to £1 per mile.

The principal roads under direct Government supervision are as follows:—

(*a*) The Accra-Dodowa Road, about 27 miles in length. This road is used regularly for motor traffic.

(*b*) The Accra-Aburi Road, about 25 miles in length, of which the first 13 miles are the same as the Accra-Dodowa Road. It is used by motor lorries as far as Ayimensa, at the foot of the Akwapim Hills, and motor cars can ascend the hills to Aburi.

(*c*) The Nsawam-Kibbi Road, about 36 miles in length, was originally constructed by a mining company from Accra to Kibbi, and its maintenance was taken in charge by the Government in 1904. Since the opening of the Accra-Akwapim railway, however, traffic in the Accra-Nsawam section has declined and the northern portion only is being kept in repair. This portion of the road is being reconstructed and steel and concrete bridges are being built.

(*d*) The Nsawam-Asamangkese Road, about 30 miles in length, is in course of construction.

(*e*) The Winnebah-Nsaba Road, about 25 miles in length, has been constructed for the use of motor lorries and other vehicular traffic to Nsaba, and is being continued to Asantemang.

(*f*) The Saltpond-Nsuaem Road, about 58 miles in length, is being re-formed for motor traffic, and steel and concrete bridges are replacing those of timber construction.

(*g*) The Cape Coast-Prahsu Road, about 73 miles in length, the first 31 miles of which are under process of reconstruction, is being provided with bridges of permanent character.

(*h*) Among the lesser roads maintained or in course of construction at the close of the year may be mentioned the following:—

	Miles.
Prestea Railway Station Road	½
Axim-Ancobra Road	2¾
Akuse-Amedica Road	1½
Cape Coast-Elmina Road	8
Asebu-Abakrampa Road	3
Broomassie-Insu Road	20
Adawso-Mangoase Road	7¼
Somanya-Akuse Road	10
Kpong-Akuse Road	6
Danoe-Dsodje Road	16
Cape Coast-Jukwa Road	14¼

(*i*) The Coomassie-Ejura Road in Ashanti, about 62 miles in length, has been constructed by a special department.

XII.—MISCELLANEOUS.

Immigration and Emigration.

No accurate statistics can be compiled under this head as there is no general system of registration of persons either entering or leaving the Colony. It is estimated that some 3,500 labourers, few of whom become permanent residents, enter the Colony every year in search of employment. Most of these immigrants are natives of the Kroo coast (Liberia), Sierra Leone, and Lagos. A certain number of natives of the artisan class leave the Gold Coast for varying periods spent in such neighbouring administrations as offer employment for skilled labour; but during the year the local demand for services of this nature led to a considerable decline in the number of this class of emigrants. Under the provisions of the European and Asiatic Passengers Ordinance, which came into force on the 1st of July, masters of ships are now required to furnish returns of all European or Asiatic passengers arriving at or departing from any place in the Colony.

Public Works.

The total expenditure on Public Works amounted to £223,152, as compared with £162,494 in 1911. Annually recurrent works show an increase of £4,611, works and buildings of £42,054, and roads and bridges of £3,424.

The following are the more important works commenced, in progress, or completed during the year:—

At Accra, the quarters for the Municipal Inspector, the extension to the printing office, the mess room for native clerks, and the erection of the wireless station were completed. An addition was made to Government House and dormitories were built for the Technical Schools. The outer wall of the Boys' School, the Training Institution, and Technical School, a double bungalow, and two barrack quarters were completed; while repairs were carried out in connection with the sea wall, High Court, and Colonial

Hospital, the latter being enclosed with mosquito-proof gauze. Considerable progress was made with the erection of the new European hospital, the rest-house, harbour and water works, while sanitary improvements on an extensive scale were carried out.

At Seccondee a rest-house was built, and the Treasury and Town Council offices, second-class quarters, Public Works Department stores, and two types of bungalow were nearing completion by the end of the year.

At Dunkwa a post office and court house were built, while the construction of the police station and barracks was well advanced.

At Tarquah bungalows for the Sanitary Officer and Public Works Department officials were completed, together with an infectious diseases hospital.

Post offices were built at Nsawam, Adawso, Somanya, Akuse and Aburi.

At Nsawam the police station and barracks and the rest-house were completed. At Aburi the construction of a four-roomed bungalow and entomological laboratory was in progress.

In Ashanti bungalows for the nursing sisters, Conservator of Forests, and Veterinary Officer were built at Coomassie; and considerable progress was made with the erection of veterinary offices, dispensers' quarters, forestry offices, transport stores and new rest-house.

At Kintampo a native hospital and post office were built, and the new bungalows for the Provincial and District Commissioner were nearing completion. The new bungalows for the District Commissioner and Inspector of Mines, and the police station and barracks at Obuasi were well advanced.

At Tamale, in the Northern Territories, the Public Works Department stores, offices, and sheds, and the Treasury vault were in hand.

Extensive sanitary improvements were carried out at 'Axim, Dixcove, Dunkwa, Tarquah, and Chama in the Western Province; Nsawam, Aburi, Adawso, Akuse, and Addah in the Eastern Province; and Cape Coast in the Central Province. The sanitation of Coomassie and Kintampo also received attention.

At Accra progress was made with surface water drainage, and several swamps were reclaimed.

To provide suitable houses for persons dispossessed, owing to the necessity of clearing unsanitary and congested areas, model houses were erected by the Public Works Department and sold, the payments being spread over a period of years. Building was also encouraged by a system of advancing materials from store, repayment being arranged by easy instalments in each case.

Altogether 4,834 lineal yards of new roads were cleared, levelled, and kept in repair.

Acquisition and demolition of insanitary dwellings was carried out on a large scale, 60 properties in all being acquired.

The most important sanitary works at Seccondee were the construction of 5,428 lineal yards of concrete drains and the reclamation of the Sweet Water Lagoon.

The new Hausa Zongo was completed and extended and various new townships laid out; the road surface constructed amounted to 45,207 yards super.

The total sum expended on sanitation by the Public Works Department was £42,053.

Water Works.

The Accra water works made good progress during the year, in spite of the difficulty experienced in obtaining satisfactory labour.

The light railway between Accra and the dam was maintained in good order and sidings were added in two places.

Additions were also made to the work yard, including a cement testing room and a bridge to afford better access to the explosives magazine. One stone crusher was erected and put into operation, a water tank was erected near the site of the filters, and work on the foundation for the permanent filters was approaching completion at the end of the year.

Excellent progress was made with the 12-inch gravitation main, the work being within a mile of the transhipment station in December, in spite of a break of four months owing to the incidence of leave. In view of engineering difficulties and the expense involved, the scheme for the construction of a dam in the valley of the River Densu was abandoned in favour of a scheme of storage reservoirs, work on which was commenced.

A four-roomed bungalow was erected at Weshiang for the use of the staff, and the native village was completed, providing a total of 48 huts for the use of the labourers on the works.

An experiment as to the possibility of making bricks proved that this industry could be pursued to advantage if a properly equipped yard were provided.

At Seccondee no construction work was done, but the railway to the works was commenced, formation being completed by the end of the year. Preliminary investigation was carried out as to the depth of the rock at the proposed sites of the dam and overflow.

The village of Osofocrum, which was considered to be in too close proximity to the works, was removed to a new site laid out for the purpose; compensation was paid to the inhabitants.

Accra Harbour Works.

No constructional work was done on the breakwater, but its extension was under consideration.

A ramp was built at the shoreward end to facilitate the landing of cargo, and proved of great assistance.

Operations during the year were mainly confined to the removal of silt from the harbour. Nearly 180,000 tons of sand were

removed by the sand pump. A tunnel some 60 feet in length was constructed to protect the delivery pipes from the heavy surfs.

An examination of the sea bed in the harbour was made by means of probing, &c., with a view to finding suitable foundations for a new wharf.

Over 50,000 tons of cargo were dealt with in the sheltered area of the harbour, as much as 4,000 tons having been shipped or landed in one week.

The expenditure during the year was £12,583.

Seccondee.

Good progress was made with the construction of the breakwater in spite of the heavy surf, and a length of 227½ feet was completed, making a total length of 355 feet.

A sheltering concrete parapet 209 feet in length was built on the seaward side.

The two abutments were finished, in readiness for the erection of iron jetties, and the construction of the concrete slope was commenced.

The railway quay was extended by 99 feet for the purpose of affording more accommodation for the shipping of mahogany logs.

The expenditure during the year amounted to £24,537.

Survey.

The additional temporary staff provided in 1911 proved successful in bringing the work of this department up to date. During 1912 the staff was gradually reduced to more normal limits, while the department was in a position to cope with the applications which were received.

The greater part of the work was cadastral. Including those in hand, both in the field and in the drafting office, 36 concessions were completed; three being in hand at the end of the year.

The number of applications received during 1912 was 14. The total receipts of the department amounted to £3,708, as against £3,348 in 1911.

The topographical branch of the department was brought up to full strength in September with the object of compiling an accurate map of the Northern Territories and completing the map of Northern Ashanti.

The surveys in connection with the water supply schemes at Accra and Seccondee were brought to a satisfactory completion in October.

The special surveys undertaken for the Wallis Company were completed early in the year. Further progress was made with the survey of towns, those at Cape Coast and Akuse being completed in the course of the year, while work of this nature was also done at Accra.

TRANSPORT.

The total number of loads dealt with by the Transport Department in 1912 was 48,000, as compared with 40,709 in the previous year. In addition, 922 carriers were employed on long engagements, as against 901 in 1911.

The delivery of mails to the outstations beyond Coomassie, in Ashanti, and to the Northern Territories was carried out by this department: 1,156 bags were transported as against 1,126, being 36 more than in 1911.

Some difficulty was experienced in maintaining the supply of permanent carriers during the year, as labour was generally scarce, and opportunities of temporary employment on favourable terms by private firms were not infrequent. Arrangements were made for the introduction of a higher rate of pay and of a distinct uniform for the carriers in permanent employment, and seem to have been successful in restoring the popularity of this service.

The safety of the loads in charge of carriers is ensured by the system in force of savings bank deposits. These deposits amount to about £4,000 for 543 carriers.

The results of the work dealt with by the department during the year are tabulated below:—

Seccondee—Headquarters.

	Loads.
Loads despatched by railway...	16,000
,, ,, by carriers...	30
,, ,, by sea	800
,, ,, locally	200
Loads moved belonging to officers passing through	10,000
Carriers with officers travelling	1,000
Total at Seccondee	28,030
Carriers engaged on contract for Government ...	895
,, ,, ,, ,, ,, companies, &c...	27

Coomassie.

	Loads.
Loads despatched by railway...	500
,, ,, by carriers to the Northern Territories	2,705
,, ,, by carriers to stations in Ashanti	1,630
,, distributed in Coomassie	4,729
,, moved belonging to officers passing through	5,000
Bags of mails sent up-country	1,156
Carriers with officers to the Northern Territories ...	1,410
,, ,, ,, and troops in Ashanti ...	1,600
Total at Coomassie	18,730

Suitability of Climate for Europeans and Opening for White Labour.

The climate, though hot and damp, is cooler than that of most tropical countries situated in similar latitudes. It is not in itself unhealthy, but an evil reputation has been earned for it in the past by the prevalence of mosquito-borne diseases, against which all possible precautions have constantly to be taken. The rainy season is marked by a considerable fall in the temperature, which is found to be refreshing to many Europeans, but proves trying to some.

All Government officials and employees of mercantile firms and mining companies are engaged in the United Kingdom; it is inadvisable for a European to come to the Colony for the purpose of seeking employment.

Compared with Eastern colonies, the wages on the Gold Coast are high. The rates for domestic servants vary from £1 to £6 per month, £1 10*s*. to £2 being the average, and cooks are paid from £2 to £6 per month.

The Government rate for carriers is 1*s*. per diem and 3*d*. subsistence money. Contract labourers and carriers under contract for a period of months are now also paid 1*s*. a day and 3*d*. subsistence instead of 25*s*. a month and 3*d*. a day subsistence as formerly.

Native carpenters, masons, and smiths find ready employment at rates of wages varying from 1*s*. 6*d*. to 4*s*. 2*d*. a day.

Generally, the cost of living, except in the Northern Territories, is high. Frozen meat of fair quality can be purchased from the mail steamers at the principal ports, and there is a cold-storage plant at Tarquah; but in many other places Europeans are dependent, to a great extent, on tinned provisions. Goats' flesh and fowls are obtainable in most localities, and beef and mutton can be purchased in towns where there are Mohammedan communities. In the Northern Territories meat and other foodstuffs are both abundant and inexpensive.

Native Affairs.

Commissions of Inquiry determined the relative political positions of the chiefs in the Seccondee-Dixcove, the Quittah, Addah, and portions of the Axim and Volta River districts. Relations between the chiefs and people and the administration continued to be excellent. A scarcity of corn was felt on the eastern frontier as the result of a drought about the middle of the year, but this led to nothing more serious than the inconvenience of enhanced prices. The general prosperity in the agricultural districts of the Eastern and Central Provinces, though not always accompanied by moral benefits, tends to improve the standard of living and to awaken interest in education.

The Native Jurisdiction Ordinance, on the whole, has worked well, and, though experience shows that its details will require amendment in the future, it provides an easily accessible justice generally suited to the needs of the people.

Changes in Establishment.

The Governor, Mr. James Jamieson Thorburn, C.M.G., proceeded on leave on the 29th of June and retired on the 15th of September on the ground of ill-health. Major Herbert Bryan, C.M.G., Colonial Secretary, administered the Government from June 29th to December 25th.

Sir Hugh Clifford, K.C.M.G., Colonial Secretary of Ceylon, was appointed Governor on the 11th of November and arrived to assume the administration on the 26th of December.

Mr. W. R. Townsend, Circuit Judge of the Protectorate of Sierra Leone, was appointed Attorney-General on the 8th of December, 1912, on the retirement on pension of Mr. A. Hudson. He arrived and assumed duty in the Colony on the 13th of December.

Mr. P. L. H. Archer, Postmaster-General, Southern Nigeria, was appointed Comptroller of Customs on the retirement on pension of Mr. S. J. Hood.

Mr. A. E. Cruickshank, Traffic Manager, Uganda Railway, was appointed General Manager of the Government Railways on the 12th of June, on the retirement on pension of Mr. W. E. Smith.

General Observations.

The year 1912 has been one of remarkable progress and prosperity. The returns of revenue and value of imports and exports show a large excess on the records of any previous year. The exports of gold reached the high figure of £1,439,268, and indicate that the mining industry is placed on a satisfactory basis. The value of cocoa exported amounted to £1,642,733, and the Gold Coast must now be placed foremost among the cocoa-producing countries of the world. An important feature of this industry is that it has been developed by, and is entirely in the hands of, the native population of the country. The methods of cultivation employed are, to a great extent, primitive, and though the ignorance of the farmer is now counteracted by the natural richness of the soil, it is clear that much has to be done, both by example and instruction in better methods, if the industry is to be maintained or extended. The Agricultural Department is giving earnest attention to this problem. Every district is regularly visited by travelling instructors, while experimental plantations are being established at the centres of several of the principal divisions.

The question of transport presents great difficulty, and in some districts where the population is sparse and labour hard to obtain the farmer has resorted to the expedient of selling his crop as it stands to itinerant middlemen, to be picked, cured, and transported to the nearest port—a system which must result in injury to the trees and an indifferently prepared product.

Railway extensions and improved facilities of access to the railway are essential to the permanent establishment of this industry, and this policy is recognised and is being pursued.

In some of the districts where cocoa has been most successful there has been a general and even alarming rise in the price of food stuffs, due mainly to the abandonment of cultivation of such crops in favour of the more remunerative product.

This feature is, perhaps, incidental to the rapid growth of the cocoa trade, and conditions may be expected to become more normal as time goes on.

The general conditions of land tenure in the Colony and the operation of the Concessions Ordinance formed the subject of investigation by a special Commissioner, Mr. H. Conway Belfield, C.M.G., whose report was issued in June. Following on this report, a Committee was appointed by the Secretary of State to consider questions relating to land generally in West Africa. This Committee had not concluded its enquiry at the end of the year.

Reorganisation of the Post and Telegraph Department resulted in considerable improvement in that service. A wireless station was established at Accra, and experiments were made with a portable installation, communication being successfully effected with the Accra station from both Seccondee and Coomassie.

There have been no disturbances during the year to interrupt the peaceful administration of the country. Various questions affecting tribal organisation have formed the subject of careful investigation by the Secretary for Native Affairs, and the decision in each case has been accepted without demur. This result is satisfactory both as being a departure from the system of tedious and expensive litigation, which has been only too prevalent in the past, and also as illustrating the increasing confidence in Government administration.

The reform of the native tribunals effected by the amendment of the Native Jurisdiction Ordinance has been followed by improvement in tribal administration. In the majority of the divisions, bylaws dealing with sanitation and the cultivation of cocoa, palm trees, and other economic products have been issued and enforced. The interest of the people in the system of government by the native rulers is indicated by the fact that several chiefs have been deposed for misgovernment, incapacity, or drunkenness.

Signs are not wanting that the general increase of wealth is being followed, not merely by better living and better houses, but also by an increased intelligence and enlightenment as well as by an access of industry and thrift.

If this be so, there is no reason to doubt the permanence of the prosperity recorded in the year now passed.

W. C. F. Robertson,

Acting Colonial Secretary.

12th August, 1913.

Ordnance Survey Office, Southampton, 1913.

APPENDIX.

Statement showing the importation of spirits into the Gold Coast during the six years ended 31st December, 1912:—

GOLD COAST.

(For Report for 1912, see No. 770.)

THE ACTING GOVERNOR TO THE SECRETARY OF STATE.

Government House,
Accra,
20th July, 1914.

SIR,

I HAVE the honour to transmit herewith six copies of the Annual Blue Book of this Colony for the year 1913, together with a report thereon which has been prepared by Mr. C. H. Harper, Acting Colonial Secretary.

I have, &c.,

W. C. F. ROBERTSON,
Acting Governor.

The Right Honourable
Lewis Harcourt, M.P.,
&c., &c., &c.

(C63.) Wt.36076/850 1125 & 90. 9.14. B.&F.Ltd. Gp.11/2. B

I.—FINANCIAL.

The revenue for the year amounted to £1,301,566, being £70,716 more than the revenue in 1912. The actual revenue exceeded the estimated revenue by £1,566.

The following table is a comparative statement of the revenue for the years 1912 and 1913.

Heads of Revenue ..	Actual Revenue to 31st Dec., 1913.	Revenue for the same period of the preceding year.	Increase.	Decrease.
	£	£	£	£
1. Customs	779,593	735,470	44,123	—
2. Light Dues ..	2,956	2,737	219	—
3. Licences, &c. ..	43,354	45,725	—	2,371
4. Fees of Court, &c...	49,903	47,530	2,373	—
5. Railways	357,329	329,399	27,930	—
6. Posts and Telegraphs	6,596	5,994	602	—
7. Rents of Government Land	1,201	1,211	—	10
8. Interest	3,416	3,108	308	—
9. Ashanti	49,882	50,265	—	383
10. Northern Territories	3,708	2,994	714	—
11. Miscellaneous ..	3,548	5,494	—	1,946
Total	1,301,486	1,229,927	76,269	4,710
12. Land Sales, Revenue Extraordinary	80	923	—	843
Grand Total £	1,301,566	1,230,850	76,269	5,553

About £12,500 of the increase under the head "Customs" (£44,123) was derived from the imposition of an additional duty of 9*d.* a gallon on spirits, which took effect on the 30th August, 1913, and the bulk of the remainder from increased clearances of spirits from bond.

Owing to the fact that there was a surplus of spirits in stock at the end of 1912, and a shortage at the end of 1913, the difference between the receipts on account of duty on spirits for the two years is not so great as it would have been under normal conditions.

The increase under the head "Railways" would have been higher if the goods tariff which was in force in the first half of 1912 had remained unaltered; but it was found desirable to lower the tariff, with the result that, although there was a considerable increase of traffic on the Sekondi-Kumasi Railway, the earnings amounted to £271,969, as compared with £278,410 received in 1912.

The loss on the Sekondi-Kumasi Line was more than compensated for by the results obtained from the first completed year's working by the Government of the Accra-Akwapim Railway.

The decrease under "Ashanti" was due to smaller receipts under mining royalties, owing to a decrease in the gold output.

The revenue for the years 1909–1913 was as follows :—

Year.	Value.
	£
1909	778,552
1910	1,006,633
1911	1,111,632
1912	1,230,850
1913	1,301,566

Expenditure.

The expenditure for the year amounted to £1,353,291, being £196,200 over that for 1912; £90,041 in excess of the estimate; and £51,725 drawn from surplus balances in excess of the revenue.

The following table is a comparison in detail between the expenditure of 1912 and of 1913 :—

Heads of Expenditure.	Actual expenditure to 31st Dec., 1913	Expenditure for the same period of the preceding year	Increase	Decrease
Establishments.	£	£	£	£

Total .. £	1,353,291	1,157,091	235,090	38,890

Generally, the rise in expenditure is attributable to the rapid growth of business in the various Departments and to new administrative necessities which the prosperity and development of the Colony and its dependencies has called into existence. More particularly increases are due, under Governor and Legislature, to the increase in the rate of salary, and to the transport charges in connection with the extensive tours of inspection undertaken by the Governor; under Customs, to the need for additional staff, and to the refunds of duty arising from the expansion of the trade across the Volta River, the dividing line between the two tariff systems in existence within the Colony; under Railways, to provision for capital expenditure on the new workshops, rolling stock, and quarters, to addition to the staff. fuel, and stores; under Posts and Telegraphs, and Posts and Telegraphs Extraordinary, to the reorganization of the staff, to new construction, and to renewal of existing telegraph lines; under Public Debt Charges, mainly to contribution to the Sinking Fund, 1 per cent. on £1,030,000, in respect of which the half yearly contributions only became payable during the latter half of 1912.

The decreases are due, under Gold Coast Regiment, to the fact that two companies were on service for a part of the year in Sierra Leone and their expenses were defrayed by that Government, under Kumasi Ejura Road Department, to reduction in the establishment on the approaching completion of the work.

The expenditure for the five years 1909 to 1913 was as follows :—

	£
1909	734,367
1910	924,862
1911	914,500
1912	1,157,091
1913	1,353,291

Loan Expenditure.

The expenditure up to the 31st December, 1913, which has been charged to Loan account, is as follows :—

	£
Sekondi-Kumasi Railway	1,813,222
Tarquah-Prestea-Broomassie Railway ..	135,000
Accra-Akwapim Railway	300,000
Accra Harbour Works	158,000
Sekondi Harbour Works	135,210
Accra Water Works..	200,000
Sekondi Water Works	62,328
	£2,803,760

The expenditure for the year 1913 includes charges in respect of loan works which are being completed from current revenue and surplus balances as follows :—

	£
Accra Harbour Works	20,650
Accra Water Works..	18,819
Accra-Akwapim Railway	16,211
Komfrodua Railway Extension	40,072

Assets and Liabilities.

The excess of assets over liabilities on the 1st January, 1913, was £939,568. At the close of the year this excess had been reduced to £887,843, the difference, £51,725, representing the excess of the expenditure over the revenue for the year.

The value of the railway stores at the close of the year was £45,070. The value of the Public Works unallocated stores was £13,524 and the Posts and Telegraph unallocated stores £3,993.

Public Debt.

On the 1st January, 1913, the Public Debt of the Colony amounted to £2,469,118. At the end of the year it had been reduced to £2,449,118, the difference (£20,000) being repayments to the Imperial Government during the year.

The amount on the 31st December, 1913, standing to the credit of the Sinking Fund for the redemption of the funded portion of the Public Debt was £128,211, as against £102,699, at the end of 1912, £21,280 having been contributed from general revenue during the year, and £4,232 being the interest on investments

Currency.

British gold and silver coins, and British West African silver coins (which were introduced into West Africa in June, 1913), are legal tender to any amount, and British bronze coins and British West African nickel coins up to one shilling throughout the Colony and its Dependencies. There are, however, practically no gold coins in circulation, those that are introduced being hoarded and buried by the natives.

Certain French, Spanish and American gold coins are also legal tender; their value is fixed by the Demonetization Ordinance, No. 2 of 1880.

No form of bank note is in circulation. Cowries are current, but are gradually becoming extinct, owing to the introduction of the British West African tenth-of-a-penny nickel coins.

Municipal Bodies.

Town Councils have been established in the towns of Accra, Cape Coast, and Sekondi under the provisions of the Town Councils Ordinance of 1894.

The Council consists of eight members, of whom four are officials, nominated by the Governor, and four are elected by the ratepayers. The Governor has power to appoint four members to represent the ratepayers if there is no election through the failure of voters to nominate.

The following table shows the revenue and expenditure of the Town Councils for the past five years :—

Revenue.

	1909	1910	1911	1912	1913
Accra	6,893	6,227	7,446	8,630	9,537
Sekondi	3,464	2,830	4,538	4,511	4,734
Cape Coast ..	2,411	2,206	3,073	3,495	3,890

Expenditure.

	1909	1910	1911	1912	1913
Accra	7,211	7,702	7,457	8,022	10,637
Sekondi	3,367	2,907	3,906	4,769	5,172
Cape Coast ..	2,236	2,175	2,754	3,349	3,547

II.—TRADE, AGRICULTURE, AND INDUSTRIES.

Imports and Exports.

The value of imports during 1913 (exclusive of the value of free goods imported across the inland frontiers) amounted to £4,952,494—an increase of £929,172 or 23 per cent. over that for 1912. Of this total the value of specie amounted to £1,442,092—an increase of £721,114 or 100 per cent. over that for 1912; and the value of Government stores amounted to £259,729—an increase of £98,172 or 61 per cent. over that for 1912. The total value, therefore, of commercial imports (exclusive of specie and free goods imported across the inland frontiers) amounted to £3,250,673—an increase of £109,887 or 3 per cent. over that for 1912.

Of commercial imports the value of those on which specific duty was paid amounted to £784,068—an increase of £56,015 or about 8 per cent. as compared with that for 1912; the value of commercial imports on which *ad valorem* duties were paid amounted to £1,744,859—an increase of £30,272 or about 2 per cent. as compared with that for 1912; and the value of commercial goods imported free of duty amounted to £579,975—an increase of £6,363 or about 1 per cent. as compared with that for 1912.

The following is a comparative table of the quantities and values of the principal articles of import for the years 1912 and 1913 :—

Articles.		1912		1913		Increase.	Decrease.
		Quantity.	Value.	Quantity.	Value.		
			£		£	£	£
Ale and Porter	Galls.	122,087	20,742	148,553	21,991	1,249	—

Spirits, Other	Galls.	50,028	29,878	50,854	29,742	—	136
Sugar	Cwts.	38,227	45,460	58,987	56,614	11,154	—
Tobacco, Manufactured	Lbs.	147,452	42,423	170,810	49,134	6,711	—
Tobacco, Unmanufactured	Lbs.	1,528,611	48,106	1,369,119	45,205	—	2,901
Wines	Galls.	88,090	24,492	70,911	21,485	—	3,007
Woollen Goods (Including Yarn and Twist)		—	24,430	—	33,511	9,081	—

The increases are principally due, under beef and pork, flour, rice and provisions, to the higher standard of living and to the abandonment in certain districts of the cultivation of foodstuffs in favour of the cultivation of cocoa; under building materials, furniture, hardware and lumber, to increased importation for Government public works; under carriages and carts, which terms include motor vehicles, to the success of mechanical transport; under manufactured tobacco, to the growing popularity of cigarettes; under woollen and cotton goods, to the adoption of European dress and the higher purchasing power of the people.

The decreases are attributed, under wearing apparel, to importation by parcel posts, and to importation of piece goods which are made up locally; under silk goods, to importation by parcel post; under rum, to imports in 1912 remaining in bond over the end of the year.

The total value of the imports for the five years from 1909 to 1913 was as follows:—

	£
1909	2,394,412
1910	3,439,831
1911	3,784,260
1912	4,023,322
1913	4,952,494

General Features of Import Trade.

The United Kingdom contributed 70 per cent. of the total increase in imports (exclusive of specie). She contributed the whole, or practically the whole, of the increases in ale and porter, building materials, beef and pork, coal, furniture, hardware, provisions, soap, cigarettes and woollen goods; and a considerable share of the increases in carriages and carts, cotton goods, lumber, railway plant, sugar, and rice. Her position seems to have improved at the expense of her rivals in brassware and copperware, bread and biscuits, coopers' stores, gunpowder and guns and pistols. Her gain, however, is not so great as would appear from the statistics, for a considerable proportion of these imports are to be credited ultimately to American or other foreign origin. On the whole, however, it would appear that, if the position of the British manufacturer has not greatly improved, it has not seriously suffered.

Germany contributed over 3 per cent. of the total increase in imports during the year. Her most notable increases were in bread and biscuits, carriages and carts, cotton, hardware, provisions, rice and sugar, her decreases were in wearing apparel, beads, building materials, gunpowder, machinery, woollen goods and wines.

The United States of America contributed eleven per cent. of the total increase in imports. Her principal increases were in carriages and carts, flour, furniture, and unmanufactured tobacco, while her decreases were under rum, and kerosene oil. The position of the United States in the markets of the Colony is, however, much stronger than the statistics indicate. Not only does she contribute practically all the flour, rum, kerosene oil, and unmanufactured tobacco imported into the Colony, but also a considerable proportion of the motor lorries, hardware and lumber shown as imported from the United Kingdom and other countries.

Holland contributed 3 per cent. of the increases in imports. Her principal increases were in gin, machinery, railway plant, and cotton; her decreases were in hardware, brassware, copperware, and rice.

Exports.

The value of exports by sea during 1913 amounted to £5,427,106—an increase of £1,119,304, or 26 per cent., as compared with 1912. Deducting total value of specie (£403,458) and Government exports (£2), the value of commercial exports amounted to £5,023,646—an increase of £1,019,362, or 25 per cent., over the figures for 1912.

The following is a comparative table of the quantities and value of the principal articles of export for the years 1912 and 1913:—

Article.	1912.		1913.		Increase	Decrease.
	Quantity.	Value.	Quantity.	Value.		
		£		£	£	£
Cocoa .. .. lbs.	86,568,481	1,642,733	113,239,980	2,489,218	846,488	—
Kola Nuts	7,133,165	134,231	7,024,868	144,705	10,474	—
Copra .. ..tons	620	11,841	629	14,292	2,451	—
Gold and Gold Dust .. ..ozs.	377,659	1,439,268	422,602	1,626,003	186,735	—
Auriferous By-Products	160,024	31,392	148,935	30,107	—	1,285
Lumber sup. ft. (Native Timber)	23,573,651	228,745	37,391,848	366,094	137,349	—
Palm Kernels..tons	14,628	205,365	9,744	159,128	—	46,237
Palm Oil.. galls.	1,444,432	112,885	860,165	65,652	—	47,235
Rubber .. .. lbs.	1,990,699	168,729	1,317,369	87,915	—	80,814

The increase in cocoa was due to the fact that a greater number of farms had come into bearing, principally in Ashanti and in the Central Province of the Colony, and also to the fact that the season 1912-1913 being late, a large proportion of the crop was shipped in 1913.

There was a decrease in the quantity of kola, but an increase in the value. The decrease in considered to be without special significance. The higher value is accounted for by the imposition of an import duty in Nigeria towards the end of 1912.

The exports of gold and lumber are the highest yet recorded. With regard to the former, though fewer mines were working more stamps were running. The lumber industry was assisted by the heavy floods during July and August in the Ancobra and Tano Rivers.

The fall in the exports of rubber, palm oil, and kernels is due to the fact that at the present moment cocoa farming is far more profitable and far less laborious than the oil or rubber industries.

The total value of the exports for the five years, 1909–1913, is as follows:—

	£
1909	2,655,573
1910	2,697,706
1911	3,792,454
1912	4,307,802
1913	5,427,106

General Features of Export Trade.

The total value of all shipments (exclusive of specie) to the United Kingdom in 1913 amounted to £3,416,637—an increase of £739,062, or 27 per cent., as compared with 1912.

The value of goods shipped to Germany during the year amounted to £899,468—an increase of £168,346, or 23 per cent., over that for 1912. The principal increases were in cocoa and timber, and the decreases were in palm products.

The shipments to France were valued at £455,583—an increase of £71,364, or 18 per cent., over those for 1912. These shipments show increases in cocoa, copra, and palm kernels, and a decrease in palm oil.

The only important commodity shown as having been shipped to the United States is timber (mahogany). Most of the timber, however, and a large proportion of the cocoa finds its way eventually to the American markets.

Nigeria, as usual, took practically the whole of the kola nuts exported from this Colony.

Total Trade.

The total value of the sea-borne trade of the Colony in 1913 (including expenses on specie) was £10,370,103—an increase of £2,055,895, or 25 per cent., as compared with that for 1912. Adding the value of dutiable goods imported across the eastern frontier, the total trade of the Colony is increased to £10,392,219, or £2,054,977 in excess of the corresponding figure for 1912.

Deducting the value of the exports and imports of specie (£1,858,169) and of Government stores (£259,729) the value of the mercantile trade of the Colony was £8,252,206—an increase of £1,047,126, or 14 per cent., over that for 1912. In addition to this, a considerable trade in free goods, principally cattle, sheep, goats, dried fish and native foodstuffs, is carried on across the inland frontiers.

The principal ports in the Colony are :—

	1913.	
	Value of Imports.	*Value of Exports.*
	£	£
Sekondi	1,923,166 ..	2,342,192
Accra	1,598,178 ..	1,526,310
Addah	324,787 ..	347,285
Winnebah ..	234,864 ..	332,201
Saltpond ..	178,419 ..	233,679
Axim	119,382 ..	265,746
Cape Coast ..	134,999 ..	93,635
Appam	57,004 ..	88,062
Half Assinie ..	51,864 ..	56,840

Preventive Service.

The Preventive Service was maintained during the year on the Volta, south eastern frontier, north eastern frontier, and western frontier as far north as Debisu and was divided into seven sections, each in charge of a supervisor. In addition, two Inspectors were maintained on the Volta and western frontier. The native staff consisted of 482 officers and men of various grades. The expenditure on the Service during the year amounted to £21,884, and the revenue amounted to £6,280.

The influence of the officers and men of the Preventive Service is not, however, confined to the prevention of smuggling; they "show the flag" and maintain the peace of outlying and rarely visited portions of the Colony, and, noticeably along the Volta River, have improved the sanitation of the riverside villages.

Mining.

The value of the gold produced in 1913 amounted to £1,648,770, being an increase of £149,301 as compared with that for 1912.

Of the total amount produced, 378,819 ounces were obtained by mining, and 9,307 ounces by dredging.

The increase in the Colony amounted to £192,105, while Ashanti showed a decrease of £42,804.

The following statement shows the value of gold produced by the various mining companies during the year, as compared with the previous year :—

Name of Company.	1912	1913
Gold Coast Colony.	£	£
Abbontiakoon Mines, Ltd.	78,775	236,570
Abosso Gold Mining Co., Ltd.	188,155	169,835

Asiakwa Alluvial Syndicate, Ltd.	—	461
Akoko Gold Mines and Estates, Ltd. ..	3,773	3,801
Cinnamon Bippo Co., Ltd.	—	4,491
Bibiani	83,949	39,236
Broomassie Mines, Ltd.	131,400	133,483
Fura Dredging Co., Ltd.	5,270	580
Prestea Block A., Ltd.	297,128	387,605
Tarquah Mining and Exploration Co., Ltd.	168,769	170,464
Tarkwa Banket Mining Syndicate, Ltd. ..	1,294	—
Tarkwa Banket West, Ltd.	2,102	—
West African Trust, Ltd. (Sefwhi)	4,905	13,549
North-West African Mining Co., Ltd. ..	—	600
Total	£981,576	1,173,681
Ashanti.		
Ashanti Goldfields Corporation, Ltd. ..	486,211	449,599
Ashanti Rivers and Concessions, Ltd. ..	9,618	1,389
Ofin River Gold Estate, Ltd...	22,064	24,101
Total for Gold Coast and Ashanti..	£1,499,469	1,648,770

On the Tarquah conglomerate mines 268,127 tons were crushed, and produced 136,944·09 ounces, this being an extraction of 10·21 dwts. per ton of 2,000 lbs.; from the quartz mines the crushing of 445,511 tons produced 241,824·81 ounces, being an extraction of 10·86 dwts. per ton.

The various dredging companies treated 1,871,419 yards of alluvium, with a production of 9307·10 ounces of fine gold, an average of 2·39 grains per cubic yard treated.

The average number of labourers employed daily by the mining and dredging companies throughout the year was 15,658, as against 17,633 in 1912. The decrease may be attributed to the closing of a certain number of mines and to the fact that less labour was employed on the surface works.

Three prospecting licences were granted in Ashanti and the Colony during the year; and fifteen certificates of validity for mining concessions were issued.

There were eight prosecutions for contravention of the Mining Rules, the fines inflicted by the Court amounting to £16 10*s.* 0*d.*

Agriculture.

The fortunes of the majority of the inhabitants of the Colony proper and of a large number of those in Ashanti are bound up with the prosperity of the cocoa industry.

The Director of Agriculture is able to report that there has been a marked improvement in the quality of the cocoa during 1913, and that there is keen competition to obtain selected pods of the Cundeamor variety, which has proved so successful at the Botanical Gardens. The native farmer fully appreciates the difference between this variety and the ordinary bean.

On the other hand, fungoid and insect pests have made their appearance and there is considerable difficulty in organising an effective campaign against them. With abundant forest land and a sparse population the native farmer finds it less trouble and perhaps less expense to abandon his farm and make a fresh clearing than to endeavour to eradicate disease; moreover, the farmer often has a larger area under cultivation than he with his family can properly manage, and his farm falls an easy prey to the pests. The system of close planting, 500 to 800 trees to the acre, encourages disease, but it is not an easy matter to convince the farmer that as large a crop and healthier trees would result from more open planting.

The staff of the Agricultural Department has been engaged on instructional work at headquarters and on the farms. A scheme for training as local cocoa inspectors persons nominated by the chiefs has been started, but it is too early to say whether any practical improvement will result.

Attention has been given to the copra industry in some of the coast towns, and an extension of this industry may restore the importance of the coast towns, which have suffered from the development of the cocoa industry in the interior.

The palm oil and rubber industries, with the present prices ruling in Europe, cannot compete with the cocoa industry.

In the Northern Territories attention has been paid to improving the breed of cattle, and, with the co-operation of the Cotton Growing Association, to the development of a cotton-growing industry. About 17,000 lbs. of cotton seed were distributed during the year.

Forestry.

During the year a large proportion of the forests in the Colony and Ashanti were inspected by the officers of the Forestry Department, and a summary of the reports of such inspections was published in the GAZETTE.

There are three forest reserves in Ashanti, viz., the "Prah-Anum," the "Obogu" and the "Kumawu-Agogo." These were inspected during the year, and experimental nurseries of teak from Burmah were made in each of the three reserves, while nurseries of Dalborgia Sissco from India were made in the two former only. At the end of the year it was found that the germination of teak was, on the whole, poor; the Dalborgia Sissco had, however, done well.

Imperial Institute.

The following reports were furnished by the Imperial Institute to the Government of the Gold Coast as the result of investigations conducted in the Scientific and Technical Department, supplemented when necessary by reference to commercial experts.

Cotton. Nine samples of cotton grown at the Tamale Agricultural Station during the season 1912–13 showed considerable irregularity in the length and strength of the fibres; they were valued at prices ranging from 6¼*d.* to 7½*d.* per lb., with "middling" American cotton at 7*d.* per lb.

A specimen of indigenous cotton from the Gambaga District of the Northern Territories was rather coarse and harsh, but it was of promising quality and was valued at ½*d.* to 1*d.* in advance of "middling" American cotton, the current value of which was 6·67*d.* per lb.

Oilseeds. Three samples of the air-dried seeds of *Pentadesma butyracea*, containing from 11·3 to 13·8 per cent. of moisture, yielded only 7·0, 12·6 and 11·4 per cent. of fat respectively. Such seeds would be useless for export to Europe. It is possible, however, that seeds from fruits allowed to ripen thoroughly on the trees would contain a higher percentage of fat, as a sample of *P. butyracea* seeds from Southern Nigeria examined at the Imperial Institute yielded 40 per cent. of fat and was valued at from £8 to £10 per ton in the United Kingdom. It was suggested in the report that, if the seeds could be profitably shipped from the Gold Coast in commercial quantities at this price, a sample of carefully dried seeds obtained from ripe fruits should be forwarded to the Imperial Institute for further examination, with a view to ascertaining whether Pentadesma seeds rich enough in fat to be worth exporting are obtainable in the Gold Coast.

Tobacco. Samples of tobacco grown by the Chief of Obenemase and at the Kumasi Agricultural Station were of promising character, though not very suitable for sale in the United Kingdom. The tobacco burnt well, and could no doubt be improved by further cultivation. It was suggested that the experiments should be continued with a view to improving the quality of the tobacco, and that further specimens should be submitted for examination.

"*Kplen*" (*Salacia* sp.). A sample of the plant known as "Kplen," which yields a gutta-like product, was forwarded to the Imperial Institute in continuation of a previous enquiry, and was identified at the Royal Botanic Gardens, Kew, as probably *Salacia baumannii*, Loes.

Commercial Enquiries.

Information was furnished to enquirers in the United Kingdom regarding various Gold Coast products, including cotton, cocoa, *Monodora myristica* seed and *Pentadesma butyracea* kernels.

Bulletin of the Imperial Institute. During the year articles were published in the Bulletin of the Imperial Institute relating to the following Gold Coast products:—Cotton, divi-divi pods (*Cæsalpinia coriaria*), *Pentadesma butyracea* fruits and kernels, oil palm products, and funtumia and hevea rubbers.

Lands.

The bulk of land in the Colony belongs to the tribal "Stools," and, theoretically, there is no land without an owner. The general principle is that all the land within the recognised territory of a "Stool" is the property of that "Stool."

The Crown possesses no waste lands in the Colony, but certain lands have been acquired by the Government from time to time, mostly under the Public Lands Ordinance, 1876, and the Railway Ordinance, 1898, which legalise compulsory acquisition for the services of the Colony on payment of reasonable compensation.

The validity of concessions is enquired into by the Supreme Court under the provisions of the Concessions Ordinance, 1900. The Court enquires whether the grantors are the native owners of the land; whether the area falls within the prescribed limit of 5 square miles for a mining concession and 20 square miles for other concessions; whether the prescribed term of 99 years is exceeded; whether the consideration is adequate; and whether the statutory rights reserved to the natives are included in the deed. A survey and demarcation of boundaries by the Survey Department is then ordered, and when it is completed a certificate of validity giving the lessee an indefeasible title, subject to the observance of his covenants, is issued by the Court. In the certificate are contained such modifications of the deed as the Court may impose to bring it within statutory requirements and to render it a transaction fair and equitable to both parties. The rent from certified concessions is paid to the native grantors through the Government. Concessions granted solely for purposes of plantations of rubber and other products may be exempted from the operation of the Ordinance, whilst the concessions to acquire mineral oil are held subject to the Government right of pre-emption of the oil under Ordinance No. 15 of 1907.

Shipping.

The following table shows the number and tonnage of steam vessels (distinguishing their nationality) which entered the ports of the Colony during the years 1912 and 1913. Steamers entering the ports of the Colony stay for a day or two only, so that for all practical purposes the number of vessels entered may also be taken as the number cleared :—

Nationality.	1912. No.	1912. Tons.	1913. No.	1913. Tons.
British ..	398	827,390	403	907,065
German ..	223	500,998	229	499,672
French ..	64	118,951	55	99,084
Belgian ..	1	1,167	—	—
Norwegian ..	—	—	1	864
U. S. A. ..	—	—	1	2,288
Italian ..	—	—	2	3,776
Danish ..	—	—	1	2,448

The increases and decreases do not call for special comment.

One Norwegian sailing vessel of 851 tons entered during the year. as compared with one of 958 tons entered in 1912.

The following table shows the total shipping "inwards" for the five years 1909–1913. For the reason mentioned the shipping "outwards" is not given :—

Steam Vessels.

Year.	No.	Tons.
1909	647	1,260,417
1910	675	1,304,703
1911	665	1,348,401
1912	686	1,448,506
1913	692	1,515,197

Sailing Vessels.

Year.	No.	Tons.
1909	3	1,749
1910	4	3,240
1911	1	1,000
1912	1	958
1913	1	851

The mail steamers of the African Steam Ship Company and the British and African Steam Navigation Company, which are both under the management of Messrs. Elder Dempster & Company, leave Liverpool every Wednesday for Sekondi and Accra, the schedule time being fourteen days. Homewards, the mail steamers leave Accra every Thursday and are due to arrive at Plymouth in fourteen days.

The same Companies also provide four services of cargo boats from Liverpool to the Gold Coast, viz., River Service No. 1, River Service No. 2, Gold Coast Service and Windward Service.

The steamers of River Services Nos. 1 and 2 leave every alternate Saturday and call at Sekondi and Accra, the port of Axim being touched at, in addition, on the homeward journey.

The steamers of the Gold Coast Service leave on alternate Thursdays and call at Axim, Cape Coast, Saltpond, Winnebah, Appam and Addah, calling on the homeward journey at Addah, Pram Pram, Accra, Winnebah, Appam, Saltpond, Cape Coast, Sekondi, Axim.

The boats of the Windward Service leave on the other alternate Thursdays and call at Half Assinie and Elmina, calling on the homeward journey at Chama, Sekondi, Adjuah, Dixcove, Axim, Half Assinie.

Steamers also leave Liverpool every fourth week for the south west coast of Africa. These call at Accra only on the outward and homeward journeys.

Steamers—British and German alternately—leave New York at the end of every three months, beginning with April, for Sekondi, Accra, Addah and Quittah, and on the homeward journey they call at Axim, and then only if inducement offers.

Steamers—British and German alternately—also leave New York at the end of each three months, beginning with May, and call at Axim, Sekondi, Cape Coas tCastle, Saltpond, Winnebah and Accra on the outward journey, and at Sekondi and Axim only on the homeward journey.

Steamers of the "Creek Service" leave Hamburg every fortnight for Axim, Sekondi, Cape Coast, Saltpond, Appam, Winnebah, Accra and Addah, and call at those ports on the homeward journey.

Steamers leave London every third week for Axim, Sekondi and Accra, but will call both on the outward and homeward journeys at other ports as inducements offer.

The cargo service takes from thirty-two to thirty-four days to Accra.

The rates of fares from Liverpool by these lines are £28 12*s.* (first class) and £20 7*s.* (second class), £12 2*s.* (third class) for all ports as far as Winnebah, and £29 14*s.*, £21 9*s.* and £12 13*s.* respectively to Accra and eastward ports.

The Woermann Line runs two mail steamers monthly from Hamburg, calling at Dover on the 11th and 26th of each month, with passengers and mails for Sekondi and Accra. The boats call homewards at the same ports on the 14th and 29th of each month and disembark passengers at Southampton. The passenger fares are the same as on the Elder, Dempster steamers, and the duration of the voyage is fifteen days. Cargo services of the Woermann, Hamburg-Amerika, and Hamburg-Bremen-Afrika lines leave Hamburg for the Gold Coast ports on the 12th, 16th and 30th of each month.

The Chargeurs Reunis run a monthly service to the Gold Coast, sailing from Dunkirk on the 5th of each month. One passenger boat monthly calls at Accra on the voyage.

III.—LEGISLATION.

Nineteen Ordinances were passed by the Legislative Council during the year under review, of which the following are the most important :—

No. 5 of 1913.—To regulate the employment of labourers for service outside the Colony.

No. 10 of 1913.—Making provision as to the grant of exclusive rights for the extraction by machinery of oil from palm fruits.

Eight Ashanti and seven Northern Territories Ordinances were enacted by the Governor. Of the Ashanti Ordinances two were passed to regulate motor traffic in the dependency; there was one amendment of the Commissioners' Ordinance and five of the Administration Ordinance. Of the Northern Territories Ordinances, one was passed applying the Official Secrets Act, 1911, to the Protectorate and one to give validity to certain trials held by the Provincial Commissioner of the North Western Province; there was one amendment of the Commissioners' Ordinance and four of the Administration Ordinance.

IV.—EDUCATION.

The number of schools on the inspection list for 1913, excluding eleven Government Schools, was 145.

The following table shows the number of pupils on the roll and the average attendance during 1913 :—

	No. of Schools.	Number on Roll.	Average Attendance.
A.M.E.Z. Mission ..	4	498	343
Basel Mission	64	5,752	4,807
Bremen Mission ..	15	1,614	1,368
Church of England Mission	3	286	163
Government	11	2,098	1,513
Roman Catholic Mission	27	2,358	1,729
Wesleyan Mission ..	31	5,952	3,941
S.P.G. Grammar School, Cape Coast	1	51	30
	156	18,609	13,894

During the past few years the increase in the average attendance has not been in proportion to the increase in the number on the roll. This is principally due to the scarcity of labour throughout the Colony and the ease with which boys can obtain casual employment, and thus earn money while they are attending school. This is especially noticeable in the large coast towns.

In the cocoa districts the attendance suffers during the cocoa season and in some cases it has been found necessary to arrange the holidays to coincide with the busiest period of the season.

The following statement shows the number of pupils in each class in the Government and Assisted Schools :—

	Infants and Substandards.		
Boys	8,257		
Girls	2,549	—	10,806
	Standard I.		
Boys	1,705		
Girls	337	—	2,042
	Standard II.		
Boys	1,390		
Girls	217	—	1,607
	Standard III.		
Boys	1,254		
Girls	138	—	1,392
	Standard IV.		
Boys	1,007		
Girls	52	—	1,059
	Standard V.		
Boys	763		
Girls	28	—	791
	Standard VI.		
Boys	507		
Girls	9	—	516
	Standard VII.		
Boys	338		
Girls	7	—	345
Secondary Pupils		—	51
		Total	18,609

There is no objection to female education as such, but there are few opportunities of employment for educated women. As will be seen from the foregoing table very few of the girls remain long at school ; at an early age they attend markets and engage in household duties, while much of the unskilled labour, carrying, etc., is done by women and girls.

The assisted schools were awarded grants in aid amounting to £8,864, a decrease of £489 compared with 1912. The decrease is accounted for by the fact that there were fewer claims for grants in respect of buildings and furniture. The grants for proficiency show an increase. Of the 145 schools two failed to obtain grants.

The income of the assisted schools from grants, subscriptions and other sources amounted to £16,973, and the expenditure to £16,646. The amount of school fees was £1,825, as compared with £1,742 in 1912.

The available returns show that there are 229 non-assisted schools supported by the various Missions, with a total enrolment of 7,208.

There is a Government Training Institution at Accra, and two institutions at Abetifi and Akropong conducted by the Basel Mission. There is considerable difficulty in obtaining teachers, owing to the inducements offered by the Government clerical service and the mercantile firms. The number of pupils admitted to the Accra Technical and Industrial School during the year was 21; the number in residence at the end of the year was 45. The amount realised by the sale of articles made in the school was £115, as against £71 in 1912.

There is only one secondary school in receipt of a grant in aid, the S.P.G. Grammar School at Cape Coast. The Wesleyan Secondary School at Cape Coast and the Accra Grammar School are not on the assisted list.

Fifty-six candidates succeeded in obtaining certificates at the courses of instruction in agriculture for students and teachers held at the Aburi, Assuantsi, Tarquah, and Kumasi Agricultural Stations.

At the two competitive Civil Service examinations held in 1913, which control admissions to clerkships in the Government Service, 100 candidates obtained passes, being an increase of 48 on the previous year.

The total sum expended by the Government on education in 1913 amounted to £25,374, an increase of £4,789 over that for 1912. Education is not compulsory in the Gold Coast.

V.—GOVERNMENT INSTITUTIONS.

During the year 1,179 Europeans and 26,661 natives were treated in the hospitals and dispensaries of the Colony, as compared with 1,004 and 25,964, respectively, in the previous year.

The following table shows the total number of patients treated during 1913:—

	Number of in-patients.	Number of out-patients.
Accra	669	5,362
Sekondi ..	606	5,039
Cape Coast ..	178	3,573
Axim	133	2,122
Saltpond ..	—	1,031
Winnebah ..	80	1,133
Tarquah ..	97	1,654
Elmina ..	22	1,079
Quittah ..	66	2,033
Addah ..	38	1,781
Akuse.. ..	153	991
	2,042	25,791

A new hospital for Europeans is now under construction at Accra.

The present hospital at Accra contains three European and four native wards, with seven and twenty beds respectively.

The hospital at Sekondi contains six European wards, including two for convalescents, with a total of sixteen beds, while for native patients five wards with twenty-seven beds are provided.

At Kumasi there is a European hospital with four wards, and a native hospital with five wards. The number of patients treated at this hospital amounted in 1913 to 50 Europeans, 1,075 native in-patients and 6,974 native out-patients.

European nursing sisters are attached to the Accra, Sekondi and Kumasi hospitals.

There is a lunatic asylum and a laboratory at Accra, and a special sleeping sickness hospital at Anum.

The number of patients admitted into the lunatic asylum during the year amounted to thirty-six males and five females, as compared with thirty-six and seven, respectively, in 1912. The number discharged as cured was ten males and four females, as against four and one, respectively, in 1912.

The daily average of inmates was 95, the majority of whom are classified as dangerous.

Those who are able to work are employed in the asylum garden.

Savings Bank.

The Post Office Savings Bank continued to show good progress. The number of depositors' accounts remaining open at the end of the year was 4,334, as compared with 3,857 on the 31st December, 1912.

The value of deposits during the year amounted to £30,061, being an increase of £4,614 over that for 1912. The withdrawals amounted to £24,257, as compared with £22,476 for the previous year.

The amount to the credit of the bank on the 31st December, 1913, was £45,312, being an increase of £6,736 as compared with 1912.

VI.—JUDICIAL STATISTICS.

Police.

The total strength of the police force of all ranks on the 31st December, 1913, was 897, being eight below the authorised strength, made up as follows :—

General Police	532
Escort Police	237
Mines Police	48
Railway Police	80
	897

The European staff was augmented by one Assistant Commissioner of Police and one storekeeper and armourer.

The general police was increased by one sergeant, two corporals, two 2nd class constables and seven 3rd class constables; and the escort police was increased by two sergeants, five corporals, ten 2nd class constables and twenty-five 3rd class constables. The railway police was increased by the appointment of four corporals. The strength of the mines police remained unchanged.

The casualties during the year amounted to 289, as against 237 in 1912.

The efficient working of the general police was, as in previous years, seriously handicapped by the want of non-commissioned officers and constables who could read and write. There was no loss of specie or bullion under the charge of the escort police, who earned £748 for the conveyance of specie, as compared with £599 in 1912.

The police dealt with 9,179 cases of crime, a decrease of 1,743 as compared with the previous year. Of this number 211 were committed for trial, the remainder being dealt with summarily. 6,516 convictions were obtained. In 1,762 cases the accused were acquitted, 481 cases were withdrawn, and 209 were not proceeded with.

Prisons.

The four central prisons of the Colony, in which long sentence prisoners are confined, are at Accra, Sekondi, Cape Coast, and Elmina, the daily averages of which are 209, 241, 70, and 38 respectively.

Prisoners whose sentences are less than six months serve their time in the smaller gaols at Axim, Sekondi, Tarquah, Saltpond, Winnebah, Akuse, Addah, and Quittah. At Obuassi (daily average 48) and Kumasi, in Ashanti (daily average 98), prisoners undergo sentences up to three years. Smaller gaols in Ashanti are at Dunkwa, Kintampo, Sunyani, and Krachi.

The number of prisoners in 1913 amounted to 5,358, a decrease of 706 as compared with 1912. The daily average of prisoners in the Colony and Ashanti was 966, as compared with 1,046 in 1912, a decrease of 80.

The reports on the various prisons show that the discipline maintained was generally satisfactory. There were 84 escapes, as compared with 51 in 1912. Of the 84, 35 were recaptured.

Escapes are comparatively easy to effect, owing to the ease with which a prisoner can get out of sight in thick bush. The health of the prisoners generally was good.

The total earnings in respect of prison industries and labour amounted to £2,345, as compared with £2,528 in 1912, a decrease of £183, which is due to the decrease in the number of the prisoners as compared with 1912.

Criminal Statistics.

During the year 12,447 offences were reported to the police in the Colony, Ashanti and the Northern Territories, as compared with 13,968 in 1912.

12,546 persons were apprehended by the police or summoned before the Courts, as compared with 14,129 in 1912.

Of this number 9,466 were convicted, and 3,122 acquitted, as compared with 11,478 and 2,131, respectively, in 1912.

The number of convictions in the Supreme Courts of the Colony compared with the previous year was as follows :—

	1912.	1913.
Offences against the person	46	39
Offences against property (other than prædial larceny)	16	21
Other offences	24	50
	85	110

There were 161 acquittals, as compared with 108 in 1912.

The number of summary convictions was as follows :—

	1912.	1913.
Offences against the person	1,041	1,122
Slave dealing	7	1
Offences against property (other than prædial larceny)	1,430	1,475
Other offences	6,011	3,976
	8,489	6,574

There were 2,493 acquittals, as compared with 1,494 in 1912.

There were 59 convictions in the superior courts of Ashanti, as compared with 46 in 1912, and 11 acquittals in 1913, as compared with 18 in 1912.

In the inferior courts of Ashanti there were 2,202 convictions, as compared with 2,307 in 1912, and 342 acquittals, as compared with 409 in 1912.

In the superior courts of the Northern Territories there were 19 convictions and 6 acquittals, as compared with 7 and 7, respectively, in 1912.

In the inferior courts of the Northern Territories there were 501 convictions and 109 acquittals, as compared with 543 and 59, respectively, in 1912.

VII.—MEDICAL.

Vital Statistics.

The population of the Gold Coast Colony and its dependencies amounted in 1911, at the last census, to 1,503,386.

The number of Europeans resident in the Colony during the year is given as 2,590, as compared with 2,367 in 1912.

Among the European population a decrease per thousand of 3·33 in the death rate and an increase of 1·56 in the invaliding rate are recorded.

An analysis of the death and invaliding statistics is appended :—

1912.	Number of Residents	Deaths.	Invalided	Death rate per 1,000.	Invaliding rate per 1,000.
Officials	586	8	13	13·65	22·18
Merchants	668	7	24	10·47	35·92
Mining companies ..	953	11	35	11·54	36·72
Missions	160	2	3	12·50	18·75
Total ..	2,367	28	75	11.82	31·68
1913.					
Officials	740	6	30	8·10	40·54
Merchants	796	7	43	8·79	54·02
Mining companies ..	928	5	37	5·38	39·87
Missions	126	4	2	31·74	15·87
	2,590	22	112	8·49	43·24

1912.	Number of Residents	Deaths.	Invalided	Death rate per 1,000.	Invaliding rate per 1,000.
Colony	1,811	24	61	13·25	33·68
Ashanti	470	3	13	6·38	27·70
Northern Territories	86	1	1	11·62	11·62
Total ..	2,367	28	75	12·25	31·68
1913.					
Colony	2,037	16	95	7·85	46·63
Ashanti	433	5	13	11·54	30·02
Northern Territories	120	1	4	8·33	33·33
..	2,590	22	112	8·49	43·24

Death in the case of the six European officials was due in two cases to yellow fever, in two to blackwater fever, in one to hyperpyrexia, and in one to meningitis.

There were eleven cases of yellow fever amongst Europeans, six of which proved fatal. Of the thirty officials invalided, four were for malaria, one for blackwater fever, one for neurasthenia, two for yellow fever, four for dysentery, and eighteen for various other diseases.

Of the eighty-two non-officials invalided, nineteen were for malaria, thirteen for blackwater fever, seven for dysentery, five for anæmia, two for gastritis, and thirty-six for various other diseases.

The number of Europeans coming under treatment was 1,179, as compared with 1,004 in 1912.

No means exist whereby accurate statistics relating to the health of natives can be obtained. The returns show that the number of attendances for hospital and dispensary treatment was 26,661, or 697 more than in the previous year. Treatment was given for 2,565 cases of malaria, 2,552 of parasitic diseases, and 853 of dysentery.

In all 49,491 cases of disease were treated during 1913, of which 264 proved fatal, the figures for 1912 being 46,234 and 257 respectively.

With the exception of an outbreak of small-pox in the Eastern Province of the Colony, in which 108 cases were treated (eighteen terminating fatally), the Gold Coast and its dependencies were free from any serious outbreak of epidemic disease during the year.

The number of successful vaccinations performed during the year was 16,436, as compared with 23,232 in 1912. There is no record of the total number performed.

Sixty-one cases of sleeping sickness were reported during the year, fifteen of which terminated fatally.

Twenty cases of yellow fever were reported, eleven of which were Europeans. There were eight deaths—six among Europeans and two among natives.

The following is the rainfall registered at the principal stations during the year :—

	Inches.
Accra	29·18
Addah	35·37
Aburi	58·11
Quittah	23·64
Cape Coast	31·32
Sekondi	36·53
Axim	92·02
Tarquah	77·39
Kumasi	55·93
Kintampo	78·18
Sunyani	73·22
Tamale	48·01

Sanitation.

The sanitary conditions of the Colony, Ashanti and the Northern Territories show generally an improvement, especially in the more populous centres.

A sum of £27,807 was spent by the Public Works Department on sanitary improvements during the year. In addition to other sanitary works 12,861,215 square yards of vegetation were cleared; 607 pools or excavations were filled; 265,701 square yards of marsh land were filled and drained, and 4,771 drains and 16,289 pools were treated with crude petroleum.

The sum of £36,854 was expended under the head of sanitation.

£3,204 was spent during the year on sleeping sickness preventive measures, and £1,552 on yellow fever preventive measures.

During the year 5,754 persons were prosecuted for offences against the sanitary laws and regulations, and 5,536 convictions were obtained.

VIII.—POSTAL, TELEGRAPH AND TELEPHONE SERVICES.

The business dealt with by the Department during the year, as compared with the previous year, is as follows:—

	1912.	1913.
Sale of stamps for postal purposes	£12,569	£12,872
Letters and postcards received and despatched	5,061,059	5,080,314
Registered articles	473,758	452,207
Parcels	75,896	96,175
Money Orders (Value)	£47,953	£50,726
Postal Orders (Value)	£164,923	£190,510
Postal Orders (Number)	232,934	264,737
Telegrams, Private	190,235	212,287
Telegrams, Official	80,055	71,869

The Department collected £13,603 in respect of duties levied on parcels as compared with £11,839 in 1912.

The total number of telegraph offices open to the public in the Colony, Ashanti, and the Northern Territories is 43, with a length of wire of 1,501 miles. One office was closed during the year.

There is a wireless telegraph station at Accra.

There are telephone exchanges at Accra, Sekondi, Tarquah and Dodowah, that at Cape Coast having been closed. The public subscribe for 70 of the 159 telephones in connection at the four exchanges.

IX.—RAILWAYS AND ROADS.

The total capital account on the 31st December, 1913, stood at £2,550,008. Five large engines at a cost of £17,557, and a considerable amount of rolling stock at a cost of £40,408 were added during the year, and but for their timely arrival in the Colony the heavy traffic during the cocoa season, from October onwards, could not have been promptly handled.

Orders for a considerable quantity of additional rolling stock and engines were placed during the year, to be delivered in 1914.

The excavation and levelling of the site for the new locomotive shops and general stores at Sekondi was well advanced during the year.

Work on the extension on the Accra Railway from Mangoase to Komfrodua (13 miles) was vigorously carried on during the last seven months of the year. It is expected that the new line will be ready for public traffic early in 1915.

The gross revenue for the year amounted to £360,592, an increase of £45,219 over the previous year. The Accra Railway, the result of whose working for a complete year by the Government is shown for the first time, contributed £84,914 to the above figure.

The net revenue for the year was £210,637, as compared with £194,405 in 1912; the interest earned on the total combined capital of £2,550,008 being 8·26 per cent., as against 8·05 per cent. in the previous year, 8·98 per cent. in 1911, and 9·01 per cent. in 1910.

The following is a comparative statement of revenue earned by the railway in 1912 and 1913:—

	1912.	1913.
Coaching Traffic	73,902	90,445
Goods Traffic	237,233	263,874
Sundry Earnings	4,238	6,273
	£315,373	£360,592

On the Sekondi-Kumasi Railway the passengers carried, as compared with 1912, were as follows:—

	1912.	1913.
1st Class	13,966	10,315
2nd Class	11,353	13,548
3rd Class	512,723	476,031
	538,042	499,894

Although the total number carried in 1913 was 38,148 less than the number carried in 1912, the receipts were practically the same, viz., £56,234 in 1913, and £56,912 in 1912.

The decrease in the 1st Class (3,651) is not quite accounted for by the increase in the 2nd Class (2,195), and the decrease in the 3rd Class (36,692) is attributed to the closing down of some of the smaller mines. The fact that the earnings remained nearly stationary is due to the fact that longer distances were travelled by the passengers.

The 3rd Class passenger traffic on the Accra Railway was very heavy, and in proportion to the mileage shows far better results than the Sekondi Railway.

The figures for the year were as follows :—

	No.	£
1st Class	3,939	1,299
2nd Class	13,834	2,589
3rd Class	210,331	19,587
	228,104	£23,475

The total tonnage and earnings for the two railways were as follows :—

	Tons.	Earnings.
Sekondi Railway	184,200	£205,661
Accra Railway	46,837	58,213
	231,037	£263,874

On the Sekondi Railway the increase in tonnage hauled as compared with the previous year was 9,351 tons, but owing to the general reduction in the tariff which came into force on the 1st July, 1912, the revenue earned was £3,932 less.

There were increases in the carriage of the following articles :—

Imports.

Cotton Goods and Wearing Apparel (431 tons), Kerosene Oil (110 tons), Provisions (820 tons), and Rice (159 tons).

Exports.

Cocoa (2,630 tons), Hides (181 tons), Kola (318 tons) and Mahogany (5,819 tons).

Expenditure.

The following statement shows the expenditure on open lines as compared with the previous year :—

	1912.	1913.
Maintenance of Way and Works	£38,272	£50,374
Locomotive Expenses	53,249	63,213
Traffic ,, ...	14,771	19,589
General Charges	14,675	16,779
	£120,967	£149,955

The reasons for this considerable increase (£28,988) are as follows :—

(*a*) The figures for 1913 include the working expenses of the Accra Railway.

(*b*) A heavier mileage was run on the Sekondi Railway to meet the expansion of traffic.

(*c*) The heavy increase in the cost of imported coal.

(*d*) A considerable general increase in the cost of labour.

(*e*) An increase in the number of traffic employees in consequence of the increased traffic.

The percentage of total expenditure to gross earnings on the Sekondi line rose from 40·18 in 1912 to 45·47 in 1913, and on the Accra line from 24·88 to 28·94.

The percentage of departmental working expenditure for both lines for 1912 and 1913 was as follows :—

	1912		1913	
	Seccondee.	Accra.	Seccondee.	Accra.
Maintenance of Way and Works	31·16	37·26	33·48	34·11
Locomotive Expenses	44·74	35·32	42·93	38·15
Traffic ,,	11·75	17·59	11·95	18·72
General Charges ..	12·32	9·83	11·[illegible]	9·00
	99·97	100·00	99·97	99·98

On the Sekondi line £133, and on the Accra line £170, was paid in claims for lost and damaged goods.

Six fatal and nine non-fatal personal accidents occurred on the railways during 1913, as compared with seven and seventeen respectively in 1912.

Roads.

The main roads of the Colony are constructed and maintained by a branch of the Public Works Department. In addition to the main roads, 2,098 miles of secondary roads in the Colony have been placed under the Roads Ordinance (No. 13 of 1894) and are maintained by the native chiefs.

The chiefs are paid by the Government at rates varying from 5*s*. to £1 a mile for the maintenance of these roads.

The lengths of the principal main roads are as follows :—

Accra-Dodowa Road	27 miles.
Accra-Aburi Road	25 ,,
Nsawam-Kibbi Road	36 ,,
Nsawam-Asamangkese Road	30 ,,
Winnebah-Nsaba Road	25 ,,
Saltpond-Nsuaem Road	62 ,,
Cape Coast-Prahsu Road	73 ,,

The Kumasi-Ejura Road in Ashanti, about 62 miles in length, is being constructed by a special department.

X.—PUBLIC WORKS.

The total expenditure on Public Works amounted to £257,165, as compared with £223,152 in 1912. Annually recurrent works show an increase of £9,882 10*s*.2*d*. ; new works and buildings of £44,667, and roads and bridges of £5,305 11*s*. 9*d*.

A large portion of the expenditure on new works, exclusive of the railways, harbours and waterworks, was incurred in providing better accommodation for the various public offices, for the housing and segregation of the European staff and in sanitary improvements. The sum expended on sanitary works amounted to £23,338, and on roads to £47,676.

The works of more general interest included the erection of a workshop for the Technical Training Institution and a seismological station at Accra, new lighthouses at Sekondi and Axim, and the establishment of an entomological laboratory in connection with the Agricultural Station at Aburi.

The principal centres of activity were Accra, Sekondi, Tarquah and Kumasi.

Work was considerably impeded in many parts of the Colony owing to the difficulty experienced in obtaining an adequate supply of labour.

Seccondee Water Works.

During 1913 progress was not as rapid as was anticipated, owing to the fact that the railway to the works at Inchaban was not completed until the last quarter of the year.

The work of excavating for the sluices of the dam was practically finished, and several items of the plant arrived and were erected.

Accra Water Works.

Good progress was made on these works during 1913, and at the close of that year it was possible to give water to Accra, although several features of the scheme were still incomplete.

The pumping and gravitation mains were finished and the bulk of the subsidiary mains in Accra itself were laid.

The filters were only commenced in January, 1913, but at the close of the year were working and capable of giving 100,000 gallons of water.

The service reservoir (covered) was half completed, and 750,000 gallons of water can be stored there.

The pump house was commenced in January, the shell completed, and the machinery installed. The pumps were running at the end of the year.

Good progress was made on the southern storage reservoir, but much work has still to be done before it will be available for use.

New offices for the staff and for administrative purposes were erected.

Accra Harbour Works.

The extension of the breakwater and other harbour improvements, which include a new wharf under the lee of the breakwater, were taken in hand during the year.

The depth of the harbour was maintained by sand pumps, which removed 180,000 tons of sand during the year. About the same quantity was pumped out last year.

An examination of the harbour bed was made in order to locate the foundations for the new wharf.

About 26,000 tons of cargo were exported, and about 59,000 tons imported at Accra, making a total of 85,000 tons, as compared with 50,000 tons in 1912.

The largest quantity of cargo imported in one month was 5,735 tons in July—when the surf is worse than usual; and the largest quantity exported in one month was 5,689 tons, in December. This cargo was dealt with in the sheltered area under the lee of the breakwater, and this quantity could have not been handled had the breakwater not been in existence.

The expenditure during the year amounted to £18,812, as compared with £12,583 in 1912.

Sekondi Harbour Works.

Good progress was made with the breakwater although heavy surfs were experienced in the autumn. A length of 185 feet was added to the breakwater during 1913, making a total of 540 feet.

Work on the shipways, which are designed to deal with craft weighing up to 75 tons, was commenced. Thirty-six feet of the railway quay extension was built, the foundations being built 15 feet in advance of the completed part of the extension.

The expenditure during the year amounted to £26,011, as compared with £24,537 in 1912.

XI.—SURVEY DEPARTMENT.

At the close of 1913 there were only two surveys of concessions outstanding, and one of these merely required checking.

During the year the towns of Obuasi, Mangoase, Komfrodua, Asuya, Kokurantumi and Kwanyako were surveyed and the towns of Axim, Nsaba, Swedru, Nyakrom and the environs of Komfrodua were commenced, but not completed by the end of 1913.

The authorised staff of the topographical survey consisted of two officers and six men, but for various reasons the staff has never been at its full strength. By the end of the year 7,634 square miles of detail on the field sheets had been completed and the field work of a further 996 square miles had been carried out. Considerable difficulty was experienced in obtaining the correct nomenclature of villages. Not only have many places three names, frequently in three languages, but the names of minor villages depend largely on the name of the headman, on whose death the village may or may not change its name.

XII.—TRANSPORT.

The total number of loads dealt with by the Transport Department in 1913 was 52,906, at Sekondi 28,478 and at Kumasi 23,428, as compared with 48,000 in 1912.

The carriers (663 in number) attached to the Transport Department are all of the Mendi tribe from Sierra Leone, who serve in the Gold Coast under contract. The honesty of the carriers and the safety of the loads is guaranteed by the system under which a portion of their wages is paid into the Savings Bank. In 1913 the deposits amounted to £4,500.

MISCELLANEOUS.

Suitability of Climate for Europeans and Openings for White Labour.

The climate, though hot and damp, is cooler than that of most tropical countries situated in similar latitudes. The Gold Coast, owing to the prevalence in the past of mosquito-borne diseases, has gained for itself an evil reputation, but the steady progress being made in tropical medicine and hygiene and the great amount of useful work carried out on the spot by the medical and sanitary authorities is gradually redeeming its character.

All Government officials and employees of mercantile firms are engaged in the United Kingdom and it is inadvisable for a European to come to the Colony to seek employment.

NATIVE AFFAIRS.

The Governor's extensive tours through the Colony and part of Ashanti have been an outstanding feature in native affairs during the year. The personal interviews and discussions with chiefs in their own towns have impressed them with a sense of the share they take in the administration and have laid a foundation of confidence and goodwill between the local executive officers and the native authorities.

The working of the Native Jurisdiction Ordinance has been highly satisfactory, and the principle of it is rarely challenged. Certain amendments are found to be desirable and are now under consideration. One great asset in the working of this important Ordinance, and, indeed, in administration generally, is that the prestige of the chiefs has been enhanced, and the position is one which is attracting men of good standing and of education.

Commissions of Enquiry have been held into the affairs of the Ankokru, Wassaw and Winnebah Districts. These Commissions are of value for the reason that they afford the Executive the opportunity of obtaining under formal procedure reliable information concerning rival claims to stools or cases of disputed allegiance. Incidentally also the reports of the Commissions are interesting for the amount of tradition and historical matter that the disputes so often bring to light.

The Secretary for Native Affairs undertook a tour along the line of the projected railway extension, and discussed with the chiefs the question of the acquisition of land for railway purposes. The chiefs unanimously pledged themselves to make free gift of stool land for the use of the railway and are genuinely anxious for its extension.

The King's peace has lain for a decade over Ashanti and the Northern Territories and has begotten a new sense of security and confidence.

Natives from the Northern Territories in large and increasing numbers are entering Ashanti and the Colony, working on the cocoa farms, on road-making, or as carriers. The Ashanti, like the Akim, has his cocoa farm cleared and his crop picked by hired labour, and appears to prefer the role of a landlord to that of a peasant proprietor.

GENERAL OBSERVATIONS.

The past year has been a prosperous one for the native community, and the prosperity has not been confined to a few towns or to a single class, but is embracing a large part of the Colony and is extending to Ashanti. If optimism is permitted it may be said that this prosperity, rapid and comparatively widespread as it has been, is but now touching the fringe, and that in the near future, with that ordinary good fortune upon which communities as well as individuals may rely, great developments may confidently be expected. The material advancement which the people are now enjoying is due on the surface in great measure to the cocoa industry, but its foundation lies deeper in the innate capabilities of the native for agriculture. It is true that the native, ignorant of the experience of other countries, gives little heed to the pests which threaten his crop, but the qualities which produced the cocoa industry can be counted on to assist in its preservation.

On all sides it is reported that the demand for European provisions, European luxuries, and European apparel is large and greatly increasing. The large imports of tinned provisions, flour, etc., is in part due to the scarcity of native food stuffs in certain districts, but there is no doubt that the standard of living is changing and is rising.

There is a general desire not only in the Colony, but in Ashanti, for better roads, better houses, cleaner villages, and the desire has been prompted by the example of the great sanitary improvement in the larger towns.

It is difficult to discern in what manner the general increase of wealth has affected the character of the people. The first flush of prosperity rarely shows a community to advantage, and it may be too early at the present moment to take stock. It can be observed, however, that the people take a growing pride in the institutions and traditions of their country, that the chiefs are realising the duties and the influence of their position, and that public opinion, among the educated classes, at any rate, is beginning to recognise that some advance on the ideals and standards of the past must now be demanded.

ASHANTI and the NORTHERN TERRITORIES are dealt with fully in separate Reports.

C. H. HARPER,

July 18th, 1914 Acting Colonial Secretary.

GOLD COAST.

For Report for 1913 see No. 806

THE ACTING GOVERNOR TO THE SECRETARY OF STATE.

Government House,
Accra,
14th August, 1915.

SIR,

I have the honour to forward, herewith, six copies of the Gold Coast Blue Book for 1914, together with the usual report thereon.

The report has been compiled this year by Captain Cookson, Acting Assistant Colonial Secretary, and I have pleasure in inviting your attention to the care and ability with which he has performed his task.

The report itself does not need much comment from me. The Colony may congratulate itself on the facts, that, despite the war its revenue exceeded all previous records, and that as regards the important cocoa and mining industries the year was one of continued prosperity. The report contains no record of the most important event of the year, viz., the invasion and occupation of Togoland in August, but the history of that highly successful campaign has already been published both here and in England.

Since the close of the year the financial condition of the Colony has caused some misgivings owing to the decline in Customs and Railway revenue consequent on restricted shipping facilities, but signs are not wanting that the Colony will soon recover from this temporary set-back.

I have, &c.,
A. R. SLATER,
Acting Governor.

The Right Honourable
A. Bonar Law, M.P.,
&c., &c., &c.

(C196). Wt. 36076/850. 1125 & 90. 10.15. B.&F.Ltd. Gp. 11/2.

I.—FINANCIAL.

Revenue.

The revenue for the year amounted to £1,331,713, or £30,147 in excess of the revenue for 1913.

The increases and decreases under the several heads, as compared with the figures for the year 1913, are shown in the appended table :—

Heads of Revenue.	Actual Revenue to 31st Dec., 1914.	Revenue for the same period of the preceding year.	Increase.	Decrease.
	£	£	£	£
1. Customs	768,829	779,593	—	10,764
2. Light Dues ..	2,896	2,956	—	60
3. Licences, &c. ..	48,062	43,354	4,708	—
4. Fees of Court, &c...	53,561	49,903	3,658	—
5. Railways	380,716	357,329	23,387	—
6. Post and Telegraphs	6,371	6,596	—	225
7. Rents of Government Land	1,240	1,201	39	—
8. Interest	8,843	3,416	5,427	—
9. Ashanti	50,095	49,882	213	—
10. Northern Territories	3,696	3,709	—	13
11. Miscellaneous ..	7,343	3,548	3,795	—
12. Land Sales,	61	79	—	18
Total	1,331,713	1,301,566	41,227	11,080

The receipts under the head Customs during the period January to July showed an increase of no less than £125,365 over and above the Customs revenue for the corresponding seven months in 1913. A portion of this increase is attributable to the additional duty on spirits at 9d. per gallon (with decremental scale) imposed as from the 30th August, 1913. The prospect, however, of obtaining a record Customs revenue was not destined to be fulfilled. As a result of the war the remaining five months showed a decrease of no less than £136,129, making a net decrease of £10,764 for the whole year as compared with 1913.

It is substantially due to the increase under the head Railways (£23,387) that the total revenue for the year has overtopped that for 1913. This increase has been derived from a larger volume of produce carried by the Railway: the quantity of cocoa exported during the year was the largest so far recorded, and this in spite of the fact that

the Railway revenue, in common with the Customs, showed a marked decline during the last five months.

The increase under the head Interest is due to the investment of surplus balances, temporarily lent to carry on loan works, which have now been released by the raising of the loan of £1,035,000 during the year (Ordinance No. 6 of 1910).

The yearly revenues for the period 1910 to 1914 were as under :—

Year.	Value. £
1910	1,006,633
1911	1,111,632
1912	1,230,850
1913	1,301,566
1914	1,331,713

Expenditure.

The expenditure for the year amounted to £1,755,850, or £402,559 in excess of the expenditure in 1913.

The increases and decreases under the several heads, as compared with the figures for the year 1913 are shown in the appended table :—

Heads of Expenditure.	Actual expenditure to 31st Dec., 1914	Expenditure for the same period of the preceding year	Increase	Decrease
	£	£	£	£
1. Governor and Legislature..	8,404	10,199	—	1,795
2. Supreme Court	9,809	9,969	—	160
3. Law Officers	3,749	2,567	1,182	—
4. Secretariat	6,739	8,048	—	1,309
5. Printing Office	11,147	10,006	1,141	—

37. Public Works Department	75,055	57,169	17,886	—
38. Public Works Annually Recurrent	40,528	36,934	3,594	—
39. Public Works Extraordinary	272,906	196,892	76,014	—
40. Kumasi-Ejura Road Department	13,422	15,988	—	2,566
41. Posts and Telegraphs Extraordinary..	14,394	10,897	3,497	—
42. Repayments of Loans ..	20,000	20,000	—	—
43. Expenditure on Loan and Special Works	163,517	95,752	67,765	—
44. War Expenses	12,995	—	12,995	—
45. Expedition to Togoland ..	43,756	—	43,756	—
Total .. £	1,755,850	1,353,291	419,140	16,581

The rise in expenditure is mainly due to a larger programme of works for the general development of the Colony and its dependencies, framed on a steadily increasing revenue and available surplus balances. This is illustrated by the increases under Public Works Extraordinary, Expenditure on Loan Works (being completed from revenue), Railways, Railway Surveys, and Sanitation.

Under Railways the capital charges amounted to £137,113, as compared with £95,743 in 1913, the principal items being in respect of new workshops and rolling stock. The ordinary expenditure came to £169,948, as compared with £147,365 in 1913, the increase being due to larger outlay under Maintenance of Way and Works owing to the condition of the line and to necessary provision for increased traffic.

Other increases of note are due, under Customs, to rebates of Customs duties in respect of duty-paid goods transported from East to West of the river Volta ; under Police, to revision of scale of pay in certain ranks and increase in the establishment ; under Miscellaneous, to unforeseen expenditure of a non-recurrent nature ; under Public Debt Charges, to the first payment of half-yearly interest in respect of the loan of £1,035,000 raised during the year ; and under Public Works Department, to increases in the establishment and transport charges.

The expenditure under the head General Clerical Service is in respect of a revised scale of salaries paid to the Native Clerical Staff,

whose emoluments were formerly included under the several departments.

The expenditure under the head War Expenses, namely £12,995, represents the cost of placing the Colony in a state of defence consequent upon the outbreak of war.

The total outlay during the year in respect of the Gold Coast military expedition to Togoland figured at £43,756.

The decreases are due, under Treasury, to decreased remittances to England owing to the fall in revenue since the outbreak of war; and under Kumasi-Ejura Road Department, to the completion of the road. The other decreases are mainly due to the incorporation of the pay of the clerical staff under a separate head.

The yearly expenditures for the period 1910 to 1914 were as under:—

	£
1910	924,862
1911	914,500
1912	1,157,091
1913	1,353,291
1914	1,755,850

Loan Expenditure.

The following table shows the various items of expenditure up to 31st December 1914 which have been charged to Loan Account:—

	£
Sekondi-Kumasi Railway	1,812,988
Accra-Akwapim Railway	300,000
Tarkwa-Prestea-Broomassie Railway ..	135,000
Accra Harbour Works	158,000
Sekondi Harbour Works	164,883
Accra Water Works..	200,000
Sekondi Water Works	118,274
	£2,889,145

In addition to the above sums charged to loan account, expenditure has been defrayed from revenue in respect of special works as under:—

Accra Harbour Works	1912	£21,081	
Do.	1913	20,650	
Do.	1914	37,527	
			£79,258
Accra-Akwapim Railway ..	1912	£68,656	
Do. ..	1913	16,211	
Do. ..	1914	37	
			84,904
Tarkwa-Prestea-Broomassie Railway	1912	.. ..	26,837
Accra Water Works	1913	£18,819	
Do.	1914	49,413	
			68,232
			£259,231

Assets and Liabilities.

The excess of Assets over Liabilities on the 1st January 1914 was £887,843. At the close of the year this excess was reduced to £463,706, the decrease of £424,137 representing the excess of expenditure over revenue for the year.

At the end of the year the amount of the Colony's surplus funds advanced at call by the Crown Agents stood at £368,000.

The Occupation of Togoland Account, which is shown as a liability, is made up as follows :—

Captured Money	£14,946
Revenue Account	9,366
	£24,312
Expenditure Account	9,726
Balance	£14,586

The actual position at the close of the year cannot, however, be determined until the revenue and expenditure accounts from the French Government have been received.

The value of the railway stores at the close of the year was £77,729, of the Public Works Unallocated Stores £16,947, and of the Posts and Telegraphs Unallocated Stores £2,185.

Public Debt.

At the close of the year the Public Debt of the Colony amounted to £3,464,118, as compared with £2,449,118 on the 31st December 1913, the difference being due to the raising of the loan of £1,035,000 and the repayment of the sum of £20,000 to the Imperial Government during the year.

The new loan was based on the issue of £1,035,000 4 per cent. Inscribed Stock at £98 10*s.* 0*d.* per cent., and the amount realized during the year is calculated as under :—

Calls paid during the year	£1,019,300
Interest on over-due instalments	1,226
Refund of Stamp Duty	38
	£1,020,564
Less Expenses in connection with issue ..	26,754
Net amount realized	£993,810

At the close of the year there were outstanding calls amounting to £175.

The amount standing to the credit of the Sinking Fund for the redemption of the funded portion of the Public Debt on the 31st December 1914 was £154,581, as against £128,211 at the end of 1913, £21,280 having been contributed from general revenue during the year, and £5,090 being the interest on investments.

Currency.

British gold and silver coins, and British West African silver coins (introduced into West Africa in June 1913) are legal tender to any amount throughout the Colony and its Dependencies; also British bronze coins and British West African nickel coins up to one shilling.

Municipal Bodies.

Town Councils have been established in the towns of Accra, Cape Coast, and Sekondi under the provisions of the Town Councils Ordinance of 1894.

Each Council consists of eight members, of whom four are officials, nominated by the Governor, and four are elected by the ratepayers. The Governor has power to appoint four members to represent the ratepayers if there is no election through the failure of voters to nominate.

The following table shows the revenue and expenditure of the Town Councils for the past five years :—

Revenue.

	1910.	1911.	1912.	1913.	1914.
Accra	6,227	7,446	8,630	9,537	11,156
Sekondi	2,830	4,538	4,511	4,734	5,521
Cape Coast ..	2,206	3,073	3,495	3,890	5,288

Expenditure.

	1910.	1911.	1912.	1913.	1914.
Accra	7,702	7,457	8,022	10,637	11,340
Sekondi	2,907	3,906	4,769	5,172	5,551
Cape Coast ..	2,175	2,754	3,349	3,547	3,966

II.—TRADE, AGRICULTURE, AND INDUSTRIES.

Imports.

The total value of imports during 1914 (exclusive of expenses on specie and of the value of free goods imported across the inland frontiers) was £4,456,968, a decrease of £495,526 or 10 per cent. as compared with 1913, but an increase of £433,644 or nearly 10 per cent. over that for 1912. Of this total the value of specie amounted to £873,210, a decrease of £568,882 or nearly 40 per cent., and the value of Government stores amounted to £425,587, an increase of £165,858 or 38 per cent. over the figure for 1913.

The value, therefore, of commercial imports (exclusive of specie and free goods imported across the inland frontiers) amounted to £3,158,171. Compared with 1913 the figure represents a decrease of only £92,502 or less than 3 per cent., and it is a gratifying proof of the economic stability of the Colony that notwithstanding the world-wide collapse of markets in August the decline in its commercial imports was so comparatively trifling. The decrease is due (*a*) to the closing down of the several German and Austrian firms in the Colony, (*b*) to the temporary cancellation of orders for cotton and other goods by British merchants on war being declared, but chiefly (*c*) to the dearth of shipping after August 4th. After that date German steamers, which formerly carried a considerable proportion of the Colony's imports, entirely ceased, of course, to call, while French steamers were few and far between ; and from the outbreak of war right up to the end of the year the needs of the Imperial Government absorbed the services of a large number of British vessels that would otherwise have come to West Africa with merchandise.

Of commercial imports the value of those on which specific duty was paid amounted to £785,806, an increase of £1,738 or about one-fifth per cent. as compared with the figures for 1913 ; the value of commercial imports on which *ad-valorem* duties were paid amounted to £1,647,561, a decrease of £97,298 or less than 6 per cent. ; and commercial goods imported free of duty were valued at £586,771, an increase of £6,796 or about 1 per cent.

The value of goods imported by Parcel Post was £138,029, a decrease of £3,742 or about 3 per cent.

The following is a comparative table of the quantities and values of the principal articles of import for the years 1913 and 1914 :—

Articles.		1913		1914		Increase.	Decrease.

Woollen Goods (Including Yarn and Twist)	..	—	33,511	—	30,898	—	2,613

The principal increases are in *Coal*, due to the increase of stocks by the Mining Companies in the Western Province and the Railway Department at Sekondi; in *Carriages and Carts*, due to increased importation of motor vehicles consequent on the improvement of roads in the Central and Eastern Provinces; in *Beef and Pork*, due to the rapid growth in popularity of pigs' feet and pigs' cheeks as articles of food among the natives; in *Wearing Apparel*, due to the growing popularity of ready-made clothing among natives, of both sexes; in *Lumber*, due to increased building activity both by Government and the general public; in *Provisions*, due to the greater consumption by natives of imported luxuries and to some extent to increased prices in the European markets; in *Furniture*, due partly to importations by the Government and partly to imports by the natives whose standard of living is rapidly rising; in *Machinery*, due to Government importations for the Railway, Water Works, Harbour Works, and other public works; in *Kerosene Oil*, due to the larger use of this commodity by the natives; and in *Manufactured Tobacco*, due to the increased use of cigarettes among the natives.

The principal decreases are in *Cottons*, due to the difficulty of obtaining regular shipments from the United Kingdom after the outbreak of war and to the suspension of business by the numerous German and Austrian firms in the Colony; in *Bread and Biscuits*, which appear to be declining in popular favour; in *Rice and Flour*, which were difficult to obtain regularly after the outbreak of war; in *Beads*, due to the cessation of supplies from Austria after August; and in *Brass and Copperware*, due to slack markets in the later months of the year and to the cessation of imports from Germany.

The imports for the five years ending with 1914 were valued as follows:—

	£
1910	3,439,831
1911	3,784,260
1912	4,023,322
1913	4,952,494
1914	4,456,968

General Features of Import Trade.

The following table shows the value of imports (exclusive of specie) from the principal supplying countries in each year since 1910 and the percentages arrived at by comparing the several figures with the total imports for the year:—

1910.

United Kingdom	£2,037,412—75 %
Germany	324,660—12 %
France	16,900— 1 %
United States of America ..	20,141— 1 %
Holland	240,515— 9 %
Southern Nigeria	13,945— —
Other Foreign Countries ..	46,834— 2 %

1911.

United Kingdom	£2,088,764—72 %
Germany	305,303—10 %
France	27,471— 1 %
United States of America ..	174,173— 6 %
Holland	182,337— 6 %
Southern Nigeria	19,355— 1 %
Other Foreign Countries ..	87,576— 3 %

1912.

United Kingdom	£2,317,732—70 %
Germany	379,027—11 %
France	42,604— 1 %
United States of America ..	229,604— 7 %
Holland	182,965— 6 %
Southern Nigeria	18,314— 1 %
Other Foreign Countries ..	109,574— 3 %

1913.

United Kingdom	£2,468,604—70 %
Germany	386,670—11 %
France	44,299— 1 %
United States of America ..	251,742— 7 %
Holland	189,165— 5 %
Southern Nigeria	23,535— 1 %
Other Foreign Countries ..	124,964— 4 %

1914.

United Kingdom	£2,660,682—74 %
Germany	289,288— 8 %
France	32,979— 1 %
United States of America ..	270,176 8 %
Holland	170,810— 5 %
Southern Nigeria	24,312— 1 %
Other Foreign Countries ..	121,072— 3 %

It will be observed that during the year the United Kingdom secured a net increase in the import trade of the Colony, exclusive of specie, of £192,678, although the total increase in the value of imports from all countries amounted to only £73,354. She therefore not only secured the whole of the 1914 increase but in addition captured from other competing countries trade to the value of £119,324. She is shown in the statistics as having secured large increases in wearing apparel, beef and pork, building materials, carriages and carts, coal, furniture, hardware, lumber, machinery, railway plant, and cigarettes, but it must be noted that a considerable portion of the beef and pork, carriages and carts, and hardware were of American origin, while the

bulk of the lumber was probably of Scandinavian, Canadian, or American origin. The only serious losses the United Kingdom sustained were in rice, which is of East Indian origin, and cottons.

The value of articles imported from Germany during the seven months before war closed all trade with her was £289,288, which when compared with the figure £386,670 for the whole of 1913 would appear to show that peaceful competition was having rapid results.

The gain of the United States of America was principally in unmanufactured tobacco, provisions, machinery, and carriages and carts, whilst the gains and losses of the other countries were of no special significance.

Exports.

The total value of exports by sea during 1914 was £4,942,656, a decrease of £484,450 or about 9 per cent. as compared with 1913. Deducting the value of specie (£472,877) and of Government exports (£26), the value of commercial exports amounted to £4,469,753, a decrease of £553,889 or about 10 per cent.

The following is a comparative table of the quantities and values of the principal articles of commercial export for the years 1913 and 1914:—

Article.	1913.		1914.		Increase	Decrease.
	Quantity.	Value.	Quantity.	Value.		
		£		£	£	£
Cocoa .. ..tons	50,554	2,489,218	52,888	2,193,749	—	295,469
Kola Nuts .. lbs.	7,024,868	144,705	7,862,414	142,190	—	2,515
Copra .. ..tons	629	14,292	656	11,825	—	2,467
Gold and Gold Dust .. ..ozs.	422,602	1,626,003	428,880	1,659,435	33,432	—
Auriferous By-Products .. lbs.	148,935	30,107	67,729	28,210	—	1,897
Lumber sup. ft. (Native Timber)	37,391,848	366,094	24,587,217	240,878	—	125,216
Palm Kernels..tons	9,744	159,128	5,633	88,671	—	70,457
Palm Oil.. galls.	860,165	65,652	495,763	37,646	—	28,006
Rubber .. .. lbs.	1,317,369	87,915	654,133	21,631	—	66,284

Increases occurred only in the cases of specie (not appearing in the table) and gold, and are accounted for as follows:—

Specie. (£69,419 or 17 per cent.) due partly to the repatriation of Imperial silver coins, and to the transfers to England of surplus specie held by the Bank during the slack months of April to July.

Gold. (£33,432 or 2 per cent.) due to increased production at the mines, the output of which constitutes a new record for the exports of gold from the Colony.

The principal decreases were as follows:—

Cocoa. (£295,469 or 12 per cent.). Nevertheless the *quantity* exported (52,888 tons) again constituted a record: this was due principally to the extended area put under cultivation in Ashanti

and to the new farms beginning to bear. The decrease in value is due to the low prices that ruled locally during the earlier part of the 1914–1915 cocoa season. At the beginning of the season, owing to the war and the consequent uncertainty of the home markets, the price offered for cocoa was so low that in some districts it was left to rot on the trees, not being considered worth the trouble of picking. Prices rose later on, but even at the end of the year they were only about half the prices obtained in December 1913. This, and the scarcity of ships calling to load produce, caused an unusually large stock to be carried over to 1915, so that the increase in production for the season was really greater than appears from the Customs export statistics. It may be added that the fears entertained during the early part of the season were dissipated. Instead of declining, the price of Gold Coast cocoa in the home markets rose to an unprecedented height, as much as 72*s*. per cwt. being paid in England for Gold Coast cocoa, as against 56*s*. at the same time last year. The season therefore must have been a very profitable one for the merchants.

Timber. (Decrease in quantity 12,804,631 square feet or 34 per cent.; in value £125,216 or 34 per cent.). This decrease is due to abnormally heavy shipments in 1913 to meet the short-lived "boom" in the home markets which led to flooding, followed by a sharp drop in prices. Early in 1914 a considerable quantity was shipped, mostly on contract; hence the slight fall in the average price; but since the outbreak of war and the closing down to a large extent of the cabinet-making trade in Europe, local timber has become practically unsaleable, and very little of it has been shipped.

Palm Kernels. (Decrease in quantity 4.111 tons or 42 per cent.; in value £70,457 or 44 per cent.). About a third of this decrease occurred before the outbreak of war, and was due solely to the neglect of the product in favour of the more profitable and more easily handled cocoa. The decrease during the last five months of the year was largely due to the reluctance of merchants to offer good prices, consequent on the uncertainty of the markets in Europe. The average price for the year was about the same as in 1913. The war had a particularly depressing effect on this article of export, since Germany was the largest customer. A greater interest in the manufacture of the raw product, however, appears to have been aroused recently in the United Kingdom, and this opens a better prospect for the future.*

Palm Oil. (Decrease in quantity 364,392 gallons or 42 per cent.; in value £15,005 or 23 per cent.). This product suffered in the same way as palm kernels, except that the average price was higher than in 1913.

Rubber. (Decrease in quantity 663,236 lb. or 50 per cent.: in value £66.282 or 75 per cent.). In the Gold Coast the export has hitherto been practically confined to wild rubber and has been declining since the fall in prices in 1913. The natives will not gather the rubber at the prices now obtainable, and many of them have taken up cocoa growing instead. It will be noted that the average price fell still further in 1914.

---

* See also remarks under Economic Investigations, on page 24.

Kola. (Increase in quantity 837,546 lb. or 12 per cent.: decrease in value £2,515 or 2 per cent.). In this case the decrease in value is probably fictitious: the whole trade in this product is in the hands of Hausas from whom it is difficult to obtain reliable information. It may be assumed that the 1914 trade differs little in any material respect from that of 1913.

The value of exports for the 5 years ending with 1914 is detailed as follows:—

	£
1910	2,697,706
1911	3,792,454
1912	4,307,802
1913	5,427,106
1914	4,942,656

General Features of Export Trade.

The following table shews the value of goods (exclusive of specie) shipped to each principal consuming country since 1910, and the proportion that each figure bears to the total for the year:—

1910.		
United Kingdom	£1,837,676	or 70 %
Germany	460,284	„ 18 %
France	196,331	„ 8 %
United States of America ..	40,272	„ 1 %
Southern Nigeria	78,292	„ 3 %
1911.		
United Kingdom	£2,384,829	or 69 %
Germany	552,170	„ 18 %
France	397,093	„ 11 %
United States of America ..	42,647	„ 1 %
Southern Nigeria	93,078	„ 3 %
1912.		
United Kingdom	£2,677,575	or 67 %
Germany	731,122	„ 18 %
France	384,219	„ 10 %
United States of America ..	72,135	„ 2 %
Southern Nigeria	133,977	„ 3 %
1913.		
United Kingdom	£3,416,637	or 68 %
Germany	899,468	„ 17 %
France	455,585	„ 9 %
United States of America ..	101,055	„ 2 %
Southern Nigeria	145,023	„ 3 %

	1914.	
United Kingdom	£3,028,997	or 68 %
Germany	554,632	„ 12 %
France	528,780	„ 12 %
United States of America ..	93,383	„ 2 %
Southern Nigeria	141,968	„ 3 %
Holland	116,948	„ 3 %

The decrease in the value of exports to the United Kingdom was general, except in the case of gold, but was not sufficiently serious to affect her position in the market. A large part of it is due to the drop in the local price of cocoa, but timber, palm products, and rubber also show decreases.

France shows a gain which is due entirely to increased shipments of cocoa.

The whole gain attributed to Holland occurs in cocoa, which for the first time appears in the Colony's statistics as having been exported direct to that country. All shipments, however, occurred before the outbreak of war.

Principal Ports.

The following table gives the principal ports of the Colony, showing the value of imports and exports for 1914 in each case :—

	Value of Imports. £	*Value of Exports.* £
Sekondi	1,765,382 ..	2,447,362
Accra	1,378,274 ..	1,327,375
Addah	218,982 ..	236,029
Winnebah ..	204,285 ..	262,983
Saltpond ..	155,874 ..	189,787
Axim	70,865 ..	169,234
Cape Coast ..	239,210 ..	94,368
Appam	53,521 ..	63,093
Half Assinie ..	40,120 ..	45,778

Total Trade.

The total value of the sea-borne trade of the Colony during the year, including expenses on specie, was £9,377,938—a decrease of £992,165 or 9 per cent. as compared with 1913. If we add the value of dutiable imports across the inland frontiers and the Volta, we find that the total value of the trade of the Colony was £9,407,769—a decrease of £987,450 or 9 per cent. Again, by deducting the value of specie imported and exported, including expenses, (£1,351,910) and the value of exports and imports on behalf of Government, (£423,837) we get

the total mercantile trade of the Colony during the year as valued at £7,625,593—a decrease of only £626,613 or 7 per cent. Considering the general paralysis of the world's trade during the last part of the year, the slight decline may well be viewed with complacency.

Up to the end of July the Trade and Customs revenue showed increases beyond the most sanguine expectations—increases which would have marked an era in the commercial history of the Colony had they continued, as there was every prospect of their doing, till the end of the year. It would be wholly misleading, therefore, to make any pessimistic deductions from the slight decreases which the war eventually caused. The Colony's gold and cocoa production again exceeded all past records, and had the local prices of cocoa been at all commensurate with those ruling in Europe at the close of the season, the Gold Coast would have added the profits of another very prosperous year to the already ample accumulation of wealth which she has derived from the harvests of the past.

Hints to Manufacturers.

Packing.

The British manufacturer must remember, in sending goods to this Colony, that the conditions attending unshipment and transport to the interior render good and substantial packing imperative. All goods damageable by sea water or damp should be packed in tin lined cases or waterproof canvas; and all heavy goods should be packed in specially substantial crates, barrels, or boxes. Again, it is very necessary that goods intended for transport by porters to the interior should be packed in packages of not more than 60 lb. in weight.

Samples.

It is worthy of mention that all the merchants here are unanimous in contrasting the British manufacturer unfavourably with his German rival in the matter of sending out samples. They say that the German samples were always put up in such a manner that all their merits, with prices and conditions of purchase, were set forth so clearly that they could be grasped without effort. The much greater readiness of the German manufacturer to carry out the wishes of the prospective purchaser in the matter of making slight alterations in his wares to meet local requirements is also a subject of frequent remark and is said to have helped the development of German trade in this Colony very considerably. These, of course, are small matters, but the British manufacturer should not ignore them. They represent very often the difference between success and failure when one has to compete with a capable and painstaking rival.

Cheapness of goods.

Another point that the British manufacturer should bear well in mind is that, while there are many wealthy people in this Colony who can, and do, buy goods of superior quality and finish, the great

bulk of the population are poor and can only afford to purchase low-priced articles. The great bulk of these people, too, have not had sufficient experience of European goods to know that it pays in the long run to purchase a good but expensive article in preference to one that is cheap and inferior. Gloss and glitter also count for much, and attractive make-up greatly enhances the selling qualities of an article. It was by close attention to these details that the German manufacturer obtained such a hold on this market, and the British manufacturer would be well advised to follow his example.

Preventive Service.

The Preventive Service was maintained during the year on the Volta, South-Eastern frontier, North-Eastern frontier, and Western frontier as far as Debisu and was divided into eight sections, each in charge of a Supervisor. In addition, two Inspectors were maintained on the Volta and Western frontier. The native staff consisted of 482 officers and men of various grades. The expenditure on the Service during the year amounted to £23,779, and the revenue amounted to £5,520, or £760 less than in 1913. This is accounted for by a decrease in the number of fines and seizures due to the absence of a part of the Preventive Service Staff with the Togoland Field Force in August and September.

The increased rates of pay which came into force at the beginning of the year have tended generally to improve the efficiency of this branch of the Customs Department.

The influence of the officers and men of the Preventive Service is not, however, confined to the prevention of smuggling; they "show the flag," maintain the peace in certain outlying portions of the Colony, and, noticeably along the Volta River, have improved the sanitation of the riverside villages.

As already mentioned the Inspector, Supervisors, Officers, and men of the Preventive Service on the Volta River and South-Eastern frontiers were attached to the Togoland Expeditionary Force on the outbreak of war, and performed useful work. Four of the men were killed in action near the Tchra River in Togoland.

Mining.

The value of the gold produced in 1914 amounted to £1,744,498, being an increase of £95,729 as compared with the value in 1913. The production was the largest on record.

Of the total amount produced, 402,231 ounces were obtained by mining, and 8,423 ounces by dredging and hydraulic operations.

The increase in value occurred almost entirely in the Colony, which accounted for £89,548 thereof; while the increase in Ashanti was £6,181.

The following statement shows the value of gold produced by the various mining companies during the year, as compared with the previous year :—

Name of Company.	1913	1914
Gold Coast Colony.	£	£
Abbontiakoon Mines, Ltd.	236,570	254,364
Abosso Gold Mining Co., Ltd.	169,835	166,474
Affoh Gold Mining Syndicate Ltd.	—	70
Akoko Gold Mines and Estates, Ltd. ..	3,801	6,370
Ankobra Exploration and Dredging Co., Ltd	13,006	1,181
Asiakwa Alluvial Syndicate, Ltd.	461	353
Bibiani, Ltd.	39,236	—
Broomassie Mines, Ltd.	133,483	146,872
Cinnamon Bippo Co., Ltd.	4,491	56,510
Fura Gold Dredging Co., Ltd.	580	—
North-West African Mining Co., Ltd. ..	600	7,777
Prestea Block A., Ltd.	387,605	426,875
Tarkwa Banket Mining Syndicate, Ltd. ..	—	—
Tarkwa Banket West, Ltd.	—	—
Tarquah Mining and Exploration Co., Ltd.	170,464	196,382
West African Trust, Ltd. (Sefwhi)	13,549	—
Total	1,173,681	1,263,228
Ashanti.		
Ashanti Goldfields Corporation, Ltd. ..	449,599	447,092
Ashanti Quartzites Gold Mining Co., Ltd. ..	—	—
Ashanti Rivers and Concessions, Ltd. ..	1,389	841
Ofin River Gold Estates, Ltd.	24,101	33,337
Total for Gold Coast and Ashanti..	1,648,770	1,744,498

On the Tarquah conglomerate mines 325,883 tons were crushed, and produced 160,432·36 ounces, this being an extraction of 9·84 *dwts.* per ton ; the crushing of 444,584 tons from the quartz mines produced 241,799·09 ounces, representing an extraction of 10·88 *dwts.* per ton.

The various dredging companies treated 1,267,735 cubic yards of alluvium, resulting in a production of 8,423.59 ounces of fine gold, *i.e.* an average of 3·19 grains per cubic yard treated.

The average number of labourers employed daily by the mining and dredging companies throughout the year was 15,741, as against 15,658 in 1913.

Only one prospecting licence was granted in the Colony during the year. Fifteen certificates of validity for mining concessions were issued in the Colony and three in Ashanti.

Agriculture.

The fortunes of the majority of the inhabitants of the Colony proper and of a large and increasing number of those in Ashanti are bound up

with the prosperity of the cocoa industry. In spite of the apprehended ill-effects of the war there was a record trade in cocoa during 1914, 52,888 tons being exported, or 2,335 tons more than in 1913. The growth of the industry is mainly due to increased production in Ashanti. The Chambers of Commerce report that the quality of the cocoa is about the same as in 1913.

The fungoid and insect pests that have attacked the cocoa farms do not appear to be on the increase and are reported to have been no more prevalent in 1914 than in past years. Special attention is being paid to the matter by the Entomologist and other officers of the Agricultural Department. It has now been definitely ascertained that the silk cotton tree is the chief and probably the only indigenous "host" plant of the pest "Sankonuabe." This explains the widespread nature of this serious pest and will, it is hoped, lead to important developments in the means of combating it. The disease which is at present causing most apprehension is the black or brown cocoa pod disease *Phytophthora faber* which is undoubtedly on the increase.

The staff of the Department has as usual been engaged in instructional work both at their headquarters and during their tours through the principal agricultural districts. The scheme introduced in 1913 in the Eastern Province under which natives nominated by the Chiefs are trained as local cocoa instructors, was in 1914 extended to Ashanti. While some progress has been made it will be some time before it can be said whether the scheme has fulfilled its intentions.

More attention is being paid to the copra industry, and the export in 1914 was larger than in the two preceding years. The Director of Agriculture reports that the planting of coconut palms has made remarkable progress in the past few years, and the appearance of the littoral in the Quittah district begins to resemble the great coconut districts on the north-west and eastern shores of Ceylon. Systematic efforts are being made to encourage the cultivation of this product by the distribution of seed nuts and there is good reason to believe that a valuable "stand by" to cocoa can be secured.

There is still some cause for hope that the efforts to improve the breed of cattle by the establishment of a stock-farm in connection with the Agricultural Station at Tamale in the Northern Territories will meet with a measure of success, in spite of the difficulties attending the scheme, chief of which is the prevalence of tsetse fly even in parts of the Northern Territories themselves.

In the Northern Territories also attention has been paid, with the co-operation of the Cotton Growing Association, to the development of a cotton-growing industry. About 17,800 lb. of cotton seed were distributed in 1914, some 800 lb. more than in the previous year. At Tamale a block of about 17 acres has been planted with "Kapok" (*Eriodendron anfractuosum*) and it is possible there may be a future for this product in the Northern Territories.

Experiments have also been made on the Agricultural Stations, which appear to show that *ginger* can be successfully grown in the Colony, while the development of an industry in *piassava* appears

possible. The price of the latter product has risen to a figure that would make it very profitable to extract, and there are considerable quantities of the palms to be found in several parts of the Colony, especially in the Western Province.

Native cultivation of the oil palms is being neglected in favour of cocoa, but European enterprise is introducing central factories for the scientific and economical manipulation of the produce. There is good reason to suppose that this will speedily prove beneficial to the companies and natives alike.

Forestry.

During the first seven months of the year officers of the Forestry Department did useful work in submitting reports, as in previous years, on parts of the Colony and Ashanti which lie off the beaten track. One such report speaks of tobacco being grown at Avereboo in northern Ashanti, and commanding a price "almost equal to the best Sumatra leaf," while another mentions a Para rubber plantation as "producing an average of 400 lbs. of rubber per week under easy tapping conditions" with "many trees just reaching tapping age." The cultivation of tobacco has up to the present been on too small a scale to admit of any useful forecast of its ultimate success or otherwise. The same applies in less degree to exotic rubber; but it is to be hoped that in course of time rubber plantations under efficient management will arrest the astonishing decline in rubber exports of the last five years (from 3,223,266 lb. in 1910 to 654,133 lb. in 1914), due to the inferior methods of preparation of indigenous rubber adopted by natives and the consequent low prices offered.

The planting of teak and sissoo in the Ashanti reserves continued during the year, and the former has done better than was expected last year, both now giving considerable promise. It appears that the sites for these plantations were not very happily chosen, being light forest instead of areas already largely denuded of timber; but in the light of experience future plantations will be made only in the vicinity of towns where timber and fuel are scarce.

Economic Investigations.

The following reports were furnished by the Imperial Institute to the Government of the Gold Coast as the result of investigations conducted in the Scientific and Technical Research Department, supplemented when necessary by reference to commercial experts.

Copal.—Two samples of copal from the Dunkwa district consisted of large pieces of clean, hard, transparent resin, one specimen being of a pale yellow tint and the other slightly darker. They produced excellent varnishes, and were similar in properties to samples of Gold Coast copal previously examined at the Imperial Institute.

A firm of brokers reported that the copal would probably realise 90*s*. to 100*s*. per cwt. in the United Kingdom, if it could be supplied in large clean pieces like the samples. If, however, it is received in the condition of ordinary Gold Coast copal, *i.e.*, consisting of small frag-

ments, dust, and dirt, it would only realise the ordinary price of that material, viz., 47*s*. to 51*s*. per cwt. for fairly clean shipments in good condition, and some 35*s*. per cwt. for inferior grades (March, 1914).

Rubber.—A sample of smoked Para rubber prepared from trees 13 years old at Aburi consisted of thin brown biscuits which were clean and well prepared. The dry rubber contained 94·1 per cent. of caoutchouc, and its physical properties were very satisfactory. It compared favourably in composition and quality with the best plantation Para rubber from the East, and was valued at 2*s*. 1*d*. per lb. in London (July, 1914).

A sample of smoked Funtumia rubber, prepared from trees about 9 years old at Aburi, consisted of thin brown biscuits, some of which were rather rough in appearance. The percentage of caoutchouc in the dry material was only 81·7, but the physical properties of the rubber were very good, and it was valued at 1*s*. 10*d*. or 1*s*. 11*d*. per lb. in London (July, 1914).

Beans.—Two samples of beans, derived from different species of *Canavalia*, were received at the Imperial Institute from the Gold Coast during the year.

The first sample, which was obtained from the Northern Territories, was identified at the Royal Botanic Gardens, Kew, as *Canavalia obtusifolia*. The beans were red externally but cream-coloured within, and had a fairly agreeable taste.

The second sample was derived from plants growing on the sand along the sea coast, and the beans were identified at Kew as *Canavalia ensiformis*. They were a mottled greenish-brown externally but cream-coloured within and had a pleasant taste.

Analysis showed that both these varieties of Canavalia beans have a fairly high food value, and that they contain no alkaloids or cyanogenetic glucosides. It would not, however, be possible to utilise either variety for human food in the United Kingdom though the beans might prove to be of value as a feeding-stuff for cattle. Preliminary feeding trials would be necessary before the beans could be recommended for the latter purpose.

Oilseeds.—A sample of "Abeko" kernels from Ashanti was found to be identical with the "Baco" or "Abaku" nuts from the Gold Coast previously examined at the Imperial Institute, which were identified as *Dumoria Heckeli*, A. Chev. The kernels contained 53·6 per cent. of a solid creamy-white fat which would be suitable for soap-making. "Abeko" kernels in good condition should realise about the same price as shea kernels, viz. £11 to £13 10s. per ton in Liverpool (October, 1914).

Specimens of the leaves and seeds of the "Owere" tree were identified at the Royal Botanic Gardens, Kew, as *Monodora Myristica*, Dun. The seeds were found to contain 5·9 per cent of volatile oil, and about 36 per cent. of fixed oil which was slightly viscous and of reddish-brown colour. A request was made for a larger quantity of these seeds to be sent for the purpose of further investigation.

Miscellaneous.—During 1914 a special Technical Information Bureau was formed at the Imperial Institute for the purpose of dealing with the various technical and commercial enquiries which have been received in recent years from manufacturers, merchants, and others in the United Kingdom and the Colonies. On the outbreak of the war the number of such enquiries was largely increased and the work of the Bureau in finding markets for Colonial products assumed very considerable importance. A number of products from British Colonies had been almost exclusively utilised in Germany, and on the suspension of trade with that country it was necessary in the interests of the Colonies concerned to find fresh markets for the materials. A case in point was that of palm kernels, which are an important article of commerce in the Gold Coast. These kernels have been chiefly exported from British West Africa to Germany, there to be worked up into oil and feeding-cake, and large quantities of the oil were subsequently shipped to England. There was, however, no reason why this industry should not be transferred to such great oil-seed crushing centres as Hull and Liverpool, and the question was brought to the notice of British firms by the publication of full information on the subject in the "Bulletin of the Imperial Institute" (Nos. 3 and 4 of 1914), and by the issue of a circular to oil-seed crushers. As a result the kernels are now being treated on a large scale by oil-seed crushers in the United Kingdom, and a future market for them, independent of Germany, appears to be assured.

Similar action has been taken with respect to copra, a product in which the Gold Coast is also interested, though to a smaller extent.

In addition the Bureau has furnished information to specific enquirers regarding various other Gold Coast products, including cocoa, palm oil, coconuts, rubber, and fibres.

Bulletin of the Imperial Institute.—The following articles relating to Gold Coast products were published in the "Bulletin of the Imperial Institute" in 1914 (Vol. XII):—

Para Rubber from the Gold Coast.

Funtumia Rubber from the Gold Coast.

Sword Beans (*Canavalia ensiformis*) from the Gold Coast.

Canavalia obtusifolia beans from the Gold Coast.

Copals from British West Africa.

The Trade in Palm Kernels.

Palm Kernel Cake and Meal.

Gold Coast Court.—The Gold Coast is represented in the Public Exhibition Galleries of the Imperial Institute by a Court containing exhibits illustrating the resources, products, and industries of the country.

No new exhibits have been received during the past year, and work

in the Court has been concerned with an improvement in the arrangement of the present exhibits, so far as the showcases will permit.

The statistical statements of trade, and the model representing the gold output of the Colony, have been brought up to date, and detail work of labelling has been carried out.

A number of verbal enquiries concerning the climate, resources, and planting industries of the Colony have been dealt with.

An official lecturer has recently been appointed to deliver short lectures on the countries of the Empire and their resources, the lectures being followed by visits to the courts in the galleries.

Lands.

The bulk of land in the Colony belongs to the tribal "Stools," and, theoretically, there is no land without an owner. The general principle is that all the land within the recognised territory of a "Stool" is the property of that "Stool."

The Crown possesses no waste lands in the Colony, but certain lands have been acquired by the Government from time to time, mostly under the Public Lands Ordinance, 1876, and the Railway Ordinance, 1898, which legalise compulsory acquisition for the services of the Colony on payment of reasonable compensation.

The validity of concessions is enquired into by the Supreme Court under the provisions of the Concessions Ordinance, 1900. The Court enquires whether the grantors are the native owners of the land; whether the area falls within the prescribed limit of 5 square miles for a mining concession and 20 square miles for other concessions; whether the prescribed term of 99 years is exceeded; whether the consideration is adequate; whether the natural produce other than timber is to be collected to the exclusion of the natives; whether natives are to be removed from their habitations within the area of the concession; and whether the statutory rights reserved to the natives are included in the deed. A survey and demarcation of boundaries by the Survey Department is then ordered, and when it is completed a certificate of validity giving the lessee an indefeasible title, subject to the observance of his covenants, is issued by the Court. In the certificate are contained such modifications of the deed as the Court may impose to bring it within statutory requirements and to render it a transaction fair and equitable to both parties. The rent from certified concessions is paid to the native grantors through the Government. Concessions granted solely for purposes of plantations of rubber and other products may be exempted from the operation of the Ordinance, whilst the concessions to acquire mineral oil are held subject to the Government right of pre-emption of the oil under Ordinance No. 15 of 1907.

Shipping.

The following table shows the number and tonnage of steam vessels (distinguishing their nationality) which entered the ports of the Colony during the years 1913 and 1914. Steamers entering the ports of the Colony stay for a day or two only, so that for all practical purposes

the number of vessels entered may also be taken as the number cleared :—

Nationality.	1913. No.	1913. Tons.	1914. No.	1914. Tons.
British ..	403	907,065	419	946,093
German ..	229	499,672	161	362,292
French ..	55	99,084	54	102,357
Belgian ..	—	—	—	—
Norwegian ..	1	864	2	2,223
U. S. A. ..	1	2,288	—	—
Italian ..	2	3,776	—	—
Danish ..	1	2,448	—	—
Portuguese ..	—	—	1	44

The decrease in German steamers is, of course, due to the war and the complete cessation of calls by steamers of that nationality at ports in this Colony.

The following table shows the total shipping "inwards" for the five years 1910–1914. For the reason mentioned the shipping "outwards" is not given :—

Steam Vessels.

Year.	No.	Tons.
1910	675	1,304,703
1911	665	1,348,401
1912	686	1,448,506
1913	692	1,515,197
1914	637	1,413,009

Sailing Vessels.

Year.	No.	Tons.
1910	4	3,240
1911	1	1,000
1912	1	958
1913	1	851
1914	1	751

In normal times the mail steamers of the African Steam Ship Company and the British and African Steam Navigation Company, which are both under the management of Messrs. Elder Dempster & Company, leave Liverpool every Wednesday for Sekondi and Accra, the schedule time being fourteen days. Homewards, the mail steamers leave Accra every Thursday and are due to arrive at Plymouth in fourteen days.

The same Companies also provide four services of cargo boats from Liverpool to the Gold Coast, viz., River Service No. 1, River Service No. 2, Gold Coast Service, and Windward Service.

The steamers of River Services Nos. 1 and 2 leave every alternate Saturday and call at Sekondi and Accra, touching also at the port of Axim on the homeward journey.

The steamers of the Gold Coast Service leave on alternate Thursdays, calling at Axim, Cape Coast, Saltpond, Winnebah, Appam, and Addah, and on the homeward journey at Addah, Prampram, Accra, Winnebah, Appam, Saltpond, Cape Coast, Sekondi, Axim.

The boats of the Windward Service leave on the other alternate Thursdays calling at Half Assinie and Elmina, and on the homeward journey at Chama, Sekondi, Adjuah, Dixcove, Axim, Half Assinie.

Steamers leave New York at the end of every month, visiting Axim, Sekondi, Cape Coast, Saltpond, Winnebah, and Accra on the outward journey, and Sekondi and Axim only on the homeward journey.

Steamers of the "Creek Service" leave Rotterdam every month for Axim, Sekondi, Cape Coast, Saltpond, Appam, Winnebah, Accra, and Addah, and call at those ports on the homeward journey.

Steamers leave London every month for Axim, Sekondi, and Accra, and will call both on the outward and homeward journeys at other ports as inducements offer.

The cargo service takes from thirty-two to thirty-four days to Accra.

The normal fares from Liverpool by these lines are £28 12*s*. (first class), £20 7*s*. (second class) and £12 2*s*. (third class) for all ports as far as Winnebah, and £29 14*s*., £21 9*s*., and £12 13*s*. respectively to Accra and eastward ports.

All of the above services have been interrupted on account of the war and the dates given are not rigidly adhered to.

III.—LEGISLATION.

Twenty-three Ordinances were passed by the Legislative Council during the year under review, of which the following are the most important :—

No. 4 of 1914.—The Regulation of Immigrants Ordinance, 1914, and the Amending Ordinance No. 7, enable the Governor to control immigration by requiring, in such cases as he thinks desirable, immigrants, other than those born in any part of West Africa, to deposit a sum of £25 with the Government. This sum may be used by the Government to meet costs incurred by the Government on the person's behalf in the Colony and incurred in repatriating him. The deposit shall be returned to the person after one year or on his leaving the Colony if he does so within the year without having become destitute.

No. 5 of 1914.—The Trade Marks Ordinance makes the registration of Trade Marks uniform with that of other Colonies on the West Coast of Africa, and similar, so far as circumstances allow, to the practice obtaining in England.

No. 10 of 1914.—Makes provision for Bank Holidays and contains sections similar to those of the Imperial Bank Holidays Act, 1871, as to notice, presentation, acceptance, and payment of bills of exchange and promissory notes.

No. 11 of 1914.—The Trading with Enemy Ordinance, 1914; contains provisions similar to those of the Imperial Trading with the Enemy Act, 1914. It imposes penalties on persons trading with the enemy in contravention of any Proclamation by the Governor, or of a Statute, or of the Common Law. It provides for the inspection of books and documents in case an offence is suspected, and provides for the appointment of a comptroller of a business in case an offence is suspected or in case a business has been affected by the state of war and it is in the public interest that the business should be carried on.

No. 16 of 1914.—The Rivers (Amendment) Ordinance, 1914; provides more ample control by the Government over the pumping or diversion of water from rivers for commercial purposes.

No. 21 of 1914.—The Defence of the Colony Ordinance; enables the Governor during war to impose restrictions on aliens, detain suspected persons, and make such regulations as may be necessary to secure the public safety and defence of the Colony.

No. 22 of 1914.—The Enemy Property Control and Disposal Ordinance, 1914; makes provision for taking possession of enemy property and the collection of debts by a comptrolling officer; the comptrolling officer may pay certain debts and deposit the surplus in the Treasury to await the Governor's directions.

IV.—EDUCATION.

The schools under the management of Missionary Bodies which are subject to inspection by officers of the Education Department and receive grants-in-aid from public funds numbered, at the close of the year, 148. There are twelve schools under direct Government control. In addition to the assisted schools there are 252 primary schools supported by the various religious bodies. Figures in respect of these are not available. Education is not compulsory.

The following is a comparative table showing the number of schools inspected during the last two years.

Denomination.	1913.	1914.	Increase in 1914.
African Methodist E. Z. Mission	3	3	—
Basel Mission	64	67	3
Bremen Mission	15	15	—
Church of England (S. P. G.) ..	3	3	—
Government Schools	11	12	1
Roman Catholic Mission ..	26	28	2
Wesleyan Mission	31	31	—
Secondary Schools	1	1	—
Total	154	160	6

All the Mission Schools inspected, with the exception of two, succeeded in obtaining grants-in-aid.

The total number of children enrolled on the registers of schools supported by contributions from the public funds during the year 1914 was 20,246, the average daily attendance being 15,152. Compared with 1913 these returns show increases of 1,637 and 1,258 respectively.

The grants-in-aid earned by schools on the assisted list in 1914 amounted to £9,312, which shows an increase of £948 on the figures for the previous year.

The total income of these schools in 1914 was £18,048, of which sum the grants-in-aid represent rather more than half, the balance comprising school fees, to the amount of £2,280, voluntary subscriptions, and grants from the Mission Societies.

The total estimated expenditure by Government on education in the Colony and its dependencies in 1914 amounted to £29,903, a total exceeding that of the previous year by £1,596.

The number of certificated teachers in the Colony and its dependencies is three hundred and forty-six. Two hundred and twenty-two certificates were granted in 1914.

A very satisfactory report was received on the work of the students at the Government Institution for Teachers at Accra, and the results of the instruction given in metal and wood work at the Government Technical School, Accra, were also good. The work of both these institutions, however, was seriously handicapped by the fact that the buildings which they occupy were, on the outbreak of war, required for military purposes.

Instruction in agriculture or some other form of industrial work is now given in nearly every assisted school.

Forty-eight candidates were successful in obtaining certificates at the courses of instruction in agriculture for students and teachers held at the Aburi, Assuantsi, Tarkwa, and Kumasi agricultural stations.

At the competitive Civil Service examinations for 1914 which control admission to clerkships in the Government Service 143 candidates obtained passes.

V.—GOVERNMENT INSTITUTIONS.

Hospitals and Asylum.

During the year 1,607 Europeans and 29,392, natives were treated in the hospitals and dispensaries of the Colony, as compared with 1,179 and 26,661, respectively, in the previous year.

The following table shows the total number of patients treated during 1914 :—

	Number of in-patients.	Number of out-patients.
Accra ..	769	6,892
Sekondi	544	6,190
Cape Coast	188	3,454
Axim ..	122	2,002
Saltpond	—	1,197
Winnebah	133	266
Tarkwa	88	1,685
Elmina	6	995
Quittah	80	2,366
Addah	21	1,826
Akuse..	98	1,226
Kibbi	—	320
Dunkwa	—	531
	2,049	28,950

A new hospital for Europeans has been built at Accra.

The present hospital at Accra contains three European and four native wards, with seven and twenty beds respectively.

The hospital at Sekondi contains six European wards, including two for convalescents, with a total of sixteen beds, while for native patients five wards with twenty-seven beds are provided.

At Kumasi there is a European hospital with four wards, and a native hospital with five wards. The number of patients treated at this hospital amounted in 1914 to 58 Europeans, 926 native in-patients, and 6,865 native out-patients.

European nursing sisters are attached to the Accra, Sekondi, and Kumasi hospitals.

There is a lunatic asylum and a laboratory at Accra, and a special sleeping sickness hospital at Anum.

The number of patients admitted into the lunatic asylum during the year amounted to fifty males and three females, as compared with thirty-six and five, respectively, in 1913. The number discharged as cured was thirteen males and one female, as against twelve and four, respectively, in 1913.

The daily average of inmates was 105, the majority of whom are classified as dangerous. Those who are able to work are employed in the asylum garden.

Savings Bank.

There was a large increase in the transactions of this Branch during the year. Deposits amounted to £33,212, an increase of £3,151, and withdrawals to £27,732, an increase of £3,475 over last year. The amount standing to the credit of the 5,593 depositors on 31st December was £51,898, an increase of 1,259 accounts and £6,586 in deposits.

VI.—JUDICIAL STATISTICS.

Police.

The total strength of the police force of all ranks on the 31st December, 1914, was 1,041, being five below the authorised strength, made up as follows :—

General Police	462
Escort Police	456
Mines Police	46
Railway Police	77
	1,041

This force is distributed in the Colony and Ashanti, (separate provision being made for the policing of the Northern Territories by means of the Northern Territories Constabulary, as to which information is contained in the annual report on the Northern Territories).

The European staff was augmented by two Assistant Commissioners of Police.

The general police was reduced by 19 corporals and 149 3rd Class Constables, but increased by 36 2nd Class Constables ; and the escort

police was increased by fifteen sergeants, thirty corporals, fifty-nine 2nd Class Constables and one hundred and twenty-one 3rd Class Constables. The Railway police was increased by the appointment of four corporals and twelve constables. The strength of the mines police remained unchanged.

The casualties during the year amounted to 381 as against 289 in 1913.

The efficient working of the general police was, as in previous years, seriously handicapped by the want of non-commissioned officers and constables who could read and write. There was no loss of specie or bullion under the charge of the escort police, who earned £579 9*s*. 11*d*. for the conveyance of specie, as compared with £748 in 1913.

The police dealt with 10,939 cases of crime, an increase of 1,760 as compared with the previous year. Of this number 203 were committed for trial, the remainder being dealt with summarily. 8,105 convictions were obtained. In 1,843 cases the accused were acquitted, 483 cases were withdrawn, and 305 were not proceeded with.

Prisons.

The four central prisons of the Colony, in which long sentence prisoners are confined, are at Accra, Sekondi, Cape Coast, and Elmina, the daily averages of which are 225, 153, 70, and 34 respectively.

Prisoners whose sentences are for less than six months serve their time in the smaller gaols at Axim, Sekondi, Tarkwa, Saltpond, Winnebah, Akuse, Addah, Quittah, and Dunkwa. At Obuasi (daily average 60) and Kumasi, in Ashanti (daily average 112), prisoners undergo sentences up to three years. Smaller gaols in Ashanti are at Kintampo, Sunyani, Krachi. Goaso, and Wenchi.

The number of prisoners in 1914 amounted to 5,697, an increase of 339 as compared with 1913. The daily average of prisoners in the Colony and Ashanti was 1,033, as compared with 966 in 1913, an increase of 67.

The reports on the various prisons show that the discipline maintained was generally satisfactory. 56 prisoners escaped, as compared with 84 in 1913. Of the 56, 32 were recaptured.

Escapes are comparatively easy to effect, owing to the ease with which a prisoner can get out of sight in thick bush. The health of the prisoners generally was good.

The total earnings in respect of prison industries and labour amounted to £4,639, as compared with £2,345 in 1913, an increase of £1,294, which is due to the increase in the number of the prisoners as compared with 1913, and also due to the introduction of a scheme whereby prison labour engaged by other departments is credited to Prison Earnings.

Criminal Statistics.

The numbers of convictions in the Supreme Courts of the Colony for the last two years have been as follows :—

	1913.	1914.
Offences against the person	39	43
Offences against property (other than praedial larceny)	21	22
Other offences	50	83
	110	148

There were 93 acquittals, in 1914 as compared with 161 in 1913.

The numbers of summary convictions appear as follows :—

	1913.	1914.
Offences against the person	1,122	1,373
Slave dealing	1	5
Offences against property (other than praedial larceny)	1,475	1,769
Other offences	3,976	5,539
	6,574	8,685

There were 2,547 acquittals, as compared with 2,493 in 1913.

These criminal statistics include cases not handled by the police, such as those instituted by the Sanitary Department, and, as regards Supreme Court cases, those instituted on the initiative of District Commissioners in certain outlying districts where illiterate police are directly under their command.

VII.—MEDICAL.

Vital Statistics.

The population of the Gold Coast Colony and its dependencies amounted in 1911, at the last census, to 1,503,386.

The number of Europeans resident in the Colony during the year is given as 2,645, as compared with 2,590, in 1913.

Among the European population an increase per thousand of 3·98 in the death rate and a decrease of 7·71 in the invaliding rate are recorded.

An analysis of the death and invaliding statistics is appended :—

1913.	Number of Residents	Deaths.	Invalided	Death rate per 1,000.	Invaliding rate per 1,000.
Officials	740	6	30	8·10	40·54
Merchants	796	7	43	8·79	54·02
Mining companies ..	928	5	37	5·38	39·87
Missions	126	4	2	31·74	15·87
Total or average..	2,590	22	112	8·49	43·24
1914.					
Officials	768	11	24	14·32	31·25
Merchants	733	9	24	12·27	32·74
Mining companies ..	1,820	13	44	12·74	43·13
Missions	124	—	2	—	16·12
Total or average..	2,645	33	94	12·47	35·53

1913.	Number of Residents	Deaths.	Invalided	Death rate per 1,000.	Invaliding rate per 1,000.
Colony	2,037	16	95	7·85	46·63
Ashanti	433	5	13	11·54	30·02
Northern Territories	120	1	4	8·33	33·33
Total or average..	2,590	22	112	8·49	43·24
1914.					
Colony	2,083	25	72	12·00	34·56
Ashanti	440	8	19	18·18	43·18
Northern Territories	122	0	3	—	24·59
Total or average..	2,645	33	94	12·47	35·53

As regards the eleven cases of death amongst European officials, one was due to yellow fever, one to blackwater fever, two to subtertian malaria, two to heart failure, one to septicaemia, one to aneurism, one to appendicitis, one to accidental drowning, one to suicide.

There were eleven cases of yellow fever amongst Europeans, six of which proved fatal. Of the twenty-four officials invalided, two were

for malaria, three for blackwater fever, one for neurasthenia, and eighteen for various other diseases.

Of the seventy non-officials invalided, two were for enteric-fever, five for malaria, two for yellow fever, four for blackwater fever, one for dysentery, six for anæmia, four for gastritis, and forty-six for various other diseases.

The number of Europeans coming under treatment was 1,607, as compared with 1,179 in 1913.

No means exist whereby accurate statistics relating to the health of natives can be obtained. The returns show that the number of attendances for hospital and dispensary treatment was 29,392, or 2,731 more than in the previous year. Treatment was given for 2,712 cases of malaria, 2,930 of parasitic diseases, and 787 of dysentery.

In all 51,903 cases of disease were treated during 1914, of which 239 proved fatal, the figures for 1913 being 49,491 and 264 respectively.

The Gold Coast and its dependencies were free from any serious outbreak of epidemic disease during the year.

The number of successful vaccinations performed during the year was 5,147 as compared with 16,436 in 1913. There is no record of the total number performed.

Thirteen cases of sleeping sickness were reported during the year, five of which terminated fatally.

Nineteen cases of yellow fever were reported, nine of which were Europeans. There were nine deaths—four among Europeans and five among natives.

The following is the rainfall registered at the principal stations during the year :—

	Inches.
Accra	24·58
Addah	41·62
Aburi	37·52
Quittah	30·11
Cape Coast	27·08
Sekondi	46·32
Axim	116·98
Tarkwa	41·97
Kumasi	44·52
Kintampo	55·00
Sunyani	43·50
Tamale	34·30
Gambaga	30·65

Sanitation.

The sanitary conditions of the Colony, Ashanti, and the Northern Territories show generally an improvement, especially in the more populous centres.

A sum of £29,798 11s. 4d. was spent by the Public Works Department on sanitary improvements during the year. In addition

to other sanitary works 23,367,142 square yards of vegetation were cleared; 1,031 pools or excavations were filled; 7,798 square yards of marsh land were filled and drained, and 8,978 drains and 29,157 pools were treated with crude petroleum.

The sum of £47,834 was expended under the head of sanitation. £1,714 was spent during the year on sleeping sickness preventive measures.

During the year 7,083 persons were prosecuted for offences against the sanitary laws and regulations, and 6,991 convictions were obtained.

VIII.—POSTAL, TELEGRAPH, AND TELEPHONE SERVICES.

The business dealt with by the Department during the year, as compared with the previous year, is as follows:—

	1913.	1914.
Sale of stamps for postal purposes	£12,872	£11,964
Letters and postcards received and despatched	5,080,314	5,723,772
Registered articles	452,207	517,792
Parcels	96,175	95,671
Money Orders (Value)	£50,726	£57,352
Postal Orders (Value)	£190,510	£186,510
Postal Orders (Number)	264,737	255,659
Telegrams, Private	212,287	210,093
Telegrams, Official	71,869	83,844

The Department collected £13,193 in respect of duties levied on parcels, as compared with £13,603 in 1913.

The total number of telegraph offices open to the public in the Colony, Ashanti, and the Northern Territories is 50, with a length of wire of 1,613 miles. One office was closed during the year.

There is a wireless telegraph station at Accra.

There are telephone exchanges at Accra, Sekondi, Tarkwa, and Dodowa. The public subscribe for 77 of the 169 telephones in connection at the four exchanges.

IX.—RAILWAYS AND ROADS.

Railways.

The total capital account on the 31st December 1914 stood at £2,850,713.

The gross revenue for the year amounted to £383,008, an increase of £22,416 over the previous year. The Accra Railway, the result of whose working for a complete year by the Government is shown for the first time, contributed £96,465 to the above figure.

The net revenue for the year was £208,915, as compared with £210,637 in 1913, the interest earned on the total combined capital of £2,850,713 being 7·32 per cent. as against 8·05 per cent. in the previous year, 8·98 per cent. in 1911, and 9·01 per cent. in 1910.

The following is a comparative statement of revenue earned by the railway in 1913 and 1914 :—

	1913.	1914.
	£	£
Coaching Traffic	90,445	92,274
Goods Traffic	263,874	281,781
Sundry Earnings	6,273	8,953
	£360,592	£383,008

On the Sekondi and Accra Railways the numbers of passengers carried in 1913 and 1914 were as follows :—

	1913.	1914.
1st Class	15,297	14,537
2nd Class	28,347	26,030
3rd Class	697,980	734,137
	741,624	774,704

The figures for the Accra Railway alone, as regards passenger traffic in 1914, were as follows :—

	No.	Earnings.
		£
1st Class	3,998	1,342
2nd Class	9,825	1,918
3rd Class	233,880	22,360
	247,703	£25,620

The total tonnage and earnings for the two railways were as follows :—

	Tons.	Earnings.
Sekondi Railway	184,200	£215,111
Accra Railway	46,830	66,670
	231,030	£281,781

On the Sekondi Railway the increase in tonnage hauled, as compared with the previous year, was 18,919 tons, and the revenue earned was £9,450 more.

There were increases in the carriage of the following articles :—

Imports.—Kerosene Oil (131 tons), and Rice (498 tons).

Exports.—Cocoa (3,695 tons), Hides (105 tons), and Kola (730 tons)

Railway Expenditure.

The following statement shows the expenditure on open lines as compared with the previous year :—

	1913.	1914.
Maintenance of Way and Works	£50,374	£54,018
Locomotive Expenses	63,213	78,627
Traffic „	19,589	22,138
General Charges	16,779	19,309
	£149,955	£174,092

The percentage of total expenditure to gross earnings on the Sekondi line rose from 45·48 in 1913 to 50·67 in 1914, and on the Accra line from 28·95 to 29·93.

The percentages of various items to total expenditure in each case for 1913 and 1914 work out as follows :—

	1913		1914	
	Sekondi.	Accra.	Sekondi.	Accra.
Maintenance of Way and Works	33·48	34·11	31·19	30·21
Locomotive Expenses	42·93	38·15	48·33	44·34
Traffic „	11·95	18·72	11·76	17·52
General Charges ..	11·61	9·00	11·72	7·93
	99·97	99·98	100·00	100·00

On the Sekondi line £278, and on the Accra line £47, was paid in claims for lost and damaged goods.

Fourteen fatal and four non-fatal personal accidents occurred on the railways during 1914, as compared with six and nine respectively in 1913.

Roads.

In the Colony the main roads are constructed and maintained by a branch of the Public Works Department. In addition to the main roads, 2,098 miles of secondary roads (suitable for hammocks and other head-loads) in the Colony have been placed under the Roads Ordinance (No. 13 of 1894), and are maintained by the native chiefs. The chiefs are paid by the Government at rates varying from 5*s*. to £1 a mile for the maintenance of these roads.

The lengths of the principal main roads are as follows :—

Accra—Dodowa Road	25 miles.
Accra—Aburi Road	23 „
Nsawam—Kibbi Road	60 „
Nsawam—Asamankese Road	30 „
Winnebah—Asanteman Road	42½ „
Saltpond—Nsuaem Road	62 „
Cape Coast—Prahsu Road	73 „
Ashiaem—Chama Road	8½ „

In Ashanti the roads (outside the towns), with one exception, are maintained by the native chiefs under much the same conditions as for the secondary roads in the Colony. A motor service now runs between the railway terminus at Kumasi and Ejura along the road recently constructed by a special department to facilitate communication with the Northern Territories. This metalled road is about 61 miles in length, and, though covering only about two-fifths of the distance, it traverses the tangle of hills and forest just beyond Kumasi which forms the most difficult portion.

In the Northern Territories there is an excellent system of roads, the generally open, flat country offering no impediment to construction, which is undertaken by the natives under supervision of Political Officers and native chiefs.

X.—PUBLIC WORKS.

Public Works Department.

The total expenditure on Public Works amounted to £391,783, as compared with £290,093 in 1913. Annually recurrent works show an increase of £4,262 ; new works and buildings of £74,941 ; and roads and bridges of £2,542.

A considerable portion of the expenditure on new works and buildings was incurred in providing increased accommodation for European officials, extending various public offices, and on sanitary improvements.

The amount expended on sanitary works was £40,123, and on roads and bridges £50,217.

The more important works of general interest which were undertaken included a new General Post Office, and a new European Hospital at Accra, an extension of the Post Office at Sekondi, an extension of the Native Hospital at Kumasi, and new Contagious Diseases Hospitals in several Stations.

A commencement was made in July with the preliminary investigations in connection with a sewerage scheme for Accra, but on the outbreak of war work was suspended and postponed indefinitely.

The principal centres of activity were Accra, Sekondi, and Kumasi.

Accra Water Works.

During the year most of the individual works at Weshiang (filters, service reservoir, pump house, and mains) were completed, and though the storage reservoirs still remain to be finished they were available for storing water to the extent of one third their full capacity at the end of the year.

The new offices in Accra were completed and the distribution mains also laid.

Stand pipe services were laid on to nearly all the Government bungalows, offices, and works, and also to many traders' quarters and works.

His Excellency the Governor inaugurated a general water supply to the town on the 10th January, since when a continuous and adequate supply for domestic use and, where required, for building and other purposes has been maintained.

12,464 passengers and 994 tons of merchandise were transported by the Works Railway in addition to departmental stores and material.

Sekondi Water Works.

The works-yard at Inchaban, with sheds, stores, and all the necessary machinery for construction purposes, was completely installed.

Good progress was made with the excavations for the dam and a sound foundation reached in the rock for about two thirds the length of the dam.

Concrete work was commenced and brought up to the top level of the apron at the sluices.

The excavations for the filter beds and clear water tank were nearly completed and some concreting done at both places.

The walls of the pump house and the foundations for machinery therein were also nearly completed.

The retaining wall along the river Anankwan and the bridge over it were completed with the exception of the parapets.

The laying of the 12 inch C. I. pipe main from the works to the service reservoir was well advanced.

Mosquito-proof huts were erected in the camp for the use of the European officers.

Kumasi Water Supply.

Investigations for a supply of water to Kumasi were begun and the Adra fixed on as the source of the supply.

Accra Harbour Works.

Breakwater.—Good progress was made with the extension of the breakwater, and a length of 210 feet was completed during the year.

Over 600 large concrete bags and blocks were deposited in the foundations and over 500 in the superstructure. The extension of the breakwater has proved of great benefit, the shelter in the harbour being much improved thereby. The West African Lighterage Company have increased the number of their lighters at Accra, having found that they can now work more of them than heretofore with safety and advantage.

About 27,000 tons of cargo were exported and nearly 70,000 tons imported in 1914, the record tonnage of imports being over 8,000 tons in one month (June) and of exports over 6,000 tons in December. A record shipment of 10,740 bags of cocoa in one day was made per steamship "Chama" on 16th December. All landing and shipping took place under the lee of the breakwater in the sheltered area, and there is little doubt that without such shelter nothing approaching this amount of cargo could have been handled.

Sand Pumping Operations.—The sand pumps were kept at work during the whole of the year except when stoppages were necessary for repairs to the machinery, etc., and when there was a shortage of coal during part of August and September, the supply having been interfered with by the war.

During the year over 150,000 tons of sand were pumped out of the harbour and the depth near the jetty was well maintained, allowing barges to load and discharge cargo at both sides of the jetty.

Preparations were being made to receive the new 8 inch and 12 inch pumping plant already ordered from England. This new plant will be erected on the new wharf, and when a commencement has been made with the working of it there is practically no doubt that the present depth of water in the harbour will be much increased.

These new pumps will deliver the sand pumped from the harbour into the Lagoon, and in all probability valuable land will thus be reclaimed.

New Wharf.—A new wharf is being erected on the harbour side of the breakwater for increasing the facilities for dealing with cargo. It will be 435 feet long, and will have an area of about two acres.

Warehouse accommodation 360 feet by 60 feet will be provided and cranes will be erected on the wharf.

Jetty.—The jetty, 420 feet long and 52 feet wide, has been used for receiving and shipping cargo throughout the year.

Cranes.—At present there are three 3-ton steam travelling cranes on the jetty and one 15-ton steam travelling crane on the breakwater, so that very heavy lifts can be dealt with. In addition to these cranes it is proposed to provide four more, three 3-ton cranes on the new wharf, and a 10-ton fixed crane on the present jetty.

Railway Approach.—The railway approach to the breakwater, jetty, and new wharf has been much improved during the year, and is now probably all that will be required for some years to come.

Sekondi Harbour Works.

Breakwater.—This structure was completed during 1914, a length of 130 feet having been built in that year. The shelter afforded by the breakwater is ample, and enables the trade of the port to be carried on conveniently and expeditiously.

Slipways.—Two slipways are being built and when completed they will be capable of dealing with craft up to 75 tons in weight.

Railway Quay Extension.—This was practically completed and will give increased facilities for the shipment of mahogany, &c.

Lighter Berth.—A commencement was made with the construction of a berth to accommodate lighters alongside the breakwater. The 15-ton crane will then be available for dealing with heavy lifts.

Rockbreaking.—The rockbreaker was kept at work whenever possible and a large amount of rock was broken up and removed from the bed of the harbour.

Pitched Slopes.—The concrete slopes between the jetty abutments and the breakwater were all completed.

Jetties.—Most of the material for the jetties arrived in the Colony, and the pile-driving machine was erected ready to commence work.

XI.—SURVEYS.

At the outbreak of war, survey work was stopped owing to officers and men being detailed for military duties in either Togoland or the Cameroons.

The authorised cadastral staff consisted of the Director of Surveys, four European surveyors, one European draughtsman, native clerk, five native surveyors and one native draughtsman.

During the year eighteen concessions, some started in 1913, were completed, representing an area of 57,600 acres; only two remained uncompleted, and these merely require to be tied in.

The town surveys of Axim, Koforidua, Saltpond, and Obuasi were completed and drafted, but the surveys of Nsaba, Swedru, and Nyakrom, commenced in 1913, and Bromase, commenced in 1914, were not completed.

The topographical staff consisted of the Deputy Director of Surveys, two Assistants, and seven men, but two of the men went home on leave for a portion of the year.

By the end of July approximately 3,586 square miles of detail on the field sheets had been completed and approximately 760 square miles of field work had been carried out.

Considerable difficulties with carriers had to be overcome, surveyors on several occasions being deserted by their carriers, and the parties being scattered over large areas, so that rapid communication became impossible.

XII.—TRANSPORT.

The Transport Department dealt with the following number of loads at the various stations—Sekondi 32,269; Kumasi, 32,173 and 564 passengers by motor; Ejura, 6,169 and 111 passengers by motor; Yeji, 5,949 and 33 boats for passengers; Yapei, 2,667 and 36 passengers down river.

Both the new motor service between Kumasi and Ejura, a distance of 61 miles, and the boat service from Yeji to Yapei, 88 miles, were in full working order during the year.

The usual establishment of carriers was maintained for the permanent work of the Department during the year, viz—about 500. This number, however, was exceeded for about three months after the outbreak of war, and in addition about 1,600 were taken on and sent to Togoland. After the operations had come to an end 500 of the carriers were transferred to Cameroons. Their nationalities were Mendi, Krepi, Hausa, Moshi, and Wangara.

The European staff of the Department was expanded to 27 in all for the period of military operations.

The carriers' savings bank accounts numbered 711 at the end of 1914, representing between five thousand and six thousand pounds.

XIII.—MISCELLANEOUS.

Suitability of Climate for Europeans and Openings for White Labour.

The Gold Coast is peculiarly free from many of the discomforts associated with tropical countries: hot nights and intense heat by day are the exception rather than the rule, while insects are comparatively unobtrusive. There is, however, an insidious quality in the climate, lowering the vitality of Europeans and rendering them an easier prey to mosquito-borne diseases than in many tropical countries where the discomforts of the climate are more obvious. The efforts of the sanitary and medical authorities in promoting hygiene and treatment of disease continue to exercise a beneficial effect on the general health of Europeans.

Native aspirants to various kinds of employment, skilled and unskilled, being plentiful, it is not the policy of Government to encourage European immigration; and, living being expensive, it is highly inadvisable for Europeans in search of employment to come to the Colony without previous engagement by Government or representatives of mercantile firms in Europe.

XIV.—GENERAL OBSERVATIONS.

The progress forecasted in the optimistic report of last year was rudely arrested by the War, but until that catastrophe the highest hopes were fulfilled and the returns for the month of July were indicative of the greatest prosperity that the Colony and its dependencies have ever known. The check which has been received is due to no internal cause. The capture and occupation of Togoland were achieved with such rapidity that only for a brief while can the operations have affected industrial and commercial activities, and even such disruption as took place was only of a local character. The output of gold in the year under review, constituting as it does a record for the Colony, rather points to an access of mining enterprise; nor have commercial energies been reduced save in those parts of the Colony where enemy firms were most active, and it is to the want of shipping facilities consequent upon the war that we must turn to account for the decline

of trade. Even with the decreased number of ships the quantity of cocoa exported exceeds that of any previous year, while the spending power of the people, after a short period of depression accentuated by poor prices paid for cocoa at the beginning of the season, has been scarcely affected, the general prosperity being reflected in the continued demand for goods of European make. That the standard of living is rising amongst natives is shown by the better type of house now erected and the demand for increased facilities for communication. Sanitation and education are an earnest that the desire for improvement is not inspired alone by a love of luxury. The loyalty of the people to the Administration was clearly demonstrated at the outbreak of war, and though all local fears had vanished within three weeks thereof the continued contributions to the War Fund leave it plain that that loyalty has not abated.

Separate Reports are presented with regard to Ashanti and the Northern Territories.

C. E. COOKSON, CAPT.,
Acting Assistant Colonial Secretary.

13th August, 1915.

APPENDIX.

Statement showing the importation of spirits into the Gold Coast during the six years ended 31st December, 1914 :—

Year.	Total Quantity in Gallons Imported.	Total Quantity in Gallons entered for Home Consumption.	Gallonage at 100° converted from liquid gallons varying in strength.	Declared Value.	Revenue derived from Duties.	Duty Chargeable.

No. 894.

GOLD COAST.

(For Report for 1914 see No. 859.)

THE GOVERNOR TO THE SECRETARY OF STATE.

Government House,
Accra,
17th June, 1916.

SIR,

I have the honour to forward, herewith, six copies of the Report on the Blue Book for 1915.

I have, &c.,
HUGH CLIFFORD,
Governor.

The Right Honourable
A. Bonar Law, M.P.,
&c., &c., &c.

C292) Wt.45316/1003. 1,000 & 90. 9.16. B.&F.,Ltd. Gp.11/2.

I.—FINANCIAL.

Revenue.

The revenue for the year amounted to £1,456,130, or £124,417 in excess of the revenue for 1914, and, despite the disorganisation of trade conditions occasioned by the war, is easily the largest on record.

The increase of £59,000 under Customs is due to the operation of the Customs Tariff Amendment Ordinance No. 7 of 16th March and No. 19 of 25th October, 1915, under which the increased rates of duty were imposed.

Under Railways the increase of £65,000 is due to the Order-in-Council passed on 3rd May, 1915, under which the charges payable for the carriage by rail of animals, produce, and other goods were increased by 15 *per centum* and the charges payable by persons travelling on the railway were similarly increased.

The increase of £8,618 under Posts and Telegraphs arises from the fact that stamps used on inland telegrams, which were previously credited under the head Fees of Court or Office, etc., are now credited to Post Office.

Under Ashanti the increase of £22,500 is accounted for by the larger sale of stamps, etc. The receipts under this sub-head amounted in 1914 to £7,172, as against £9,121 in 1915.

The payment in 1915 of arrears of royalties due in respect of the previous year by the Brumasi Mines accounts for the increase of £1,900 under Miscellaneous.

As was to be expected, the revenue under the head Light Dues fell in consequence of the smaller number of ships that visited the ports.

The decrease under Licences, etc., is due to the abolition from the 1st January, 1915, of the system of licensing boats and canoes on the Volta river.

The yearly revenues for the period 1911 to 1915 were as under :—

Year.	Value. £
1911	1,111,632
1912	1,230,850
1913	1,301,566
1914	1,331,713
1915	1,456,130

Expenditure.

The expenditure for the year amounted to £1,627,015, or £128,835 less than the expenditure in 1914.

Under Railways the capital charges amounted to £156,027, as compared with £137,113 in 1914. The large excess is due to payment eing made in 1915 for indents forwarded in 1914, but not executed

before the end of that year. These indents were for rolling stock, plant for the electrical scheme and plant and materials for the new workshop. The ordinary expenditure came to £186,425 as compared with £169,948 in 1914, the increase being due to larger outlay under maintenance of way and works and locomotive expenses and to the opening of the Koforidua extension early in 1915.

Other increases of note are due to the salaries of native staff, which in the year 1914 were charged to the head general clerical services, now being charged to their respective departments.

The yearly expenditures for the period 1911 to 1915 were as under :—

Year	£
1911	914,500
1912	1,157,091
1913	1,353,291
1914	1,755,850
1915	1,627,015

Loan Expenditure.

The following table shows the various items of expenditure up to 31st December, 1915, which have been charged to Loan Account :—

	£
Sekondi-Kumasi Railway	1,812,556
Accra-Akwapim Railway	300,000
Tarkwa-Prestea-Broomassie Railway ..	135,000
Accra Harbour Works	158,000
Sekondi Harbour Works	168,312
Accra Water Works..	200,000
Sekondi Water Works	131,275
	£2,905,143

In addition to the above sums charged to loan account, expenditure has been defrayed from revenue in respect of special works as under :—

Accra Harbour Works	1912	£21,081	
Do.	1913	20,650	
Do.	1914	37,527	
Do.	1915	28,952	
			£108,210
Sekondi Harbour Works	1915		21,133
Accra-Akwapim Railway	1912	£68,656	
Do.	1913	16,211	
Do.	1914	37	
			84,904
Tarkwa-Prestea-Broomassie Railway	1912	.. ..	26,837
Accra Water Works	1913	£18,819	
Do.	1914	49,413	
Do.	1915	11,034	
			79,266
			£320,350

Assets and Liabilities.

The excess of assets over liabilities on the 1st January, 1915, was £463,707. At the close of the year this excess was reduced to £292,822, the decrease of £170,885 representing the excess of expenditure over revenue for the year.

At the end of the year the amount of the Colony's surplus funds advanced at call by the Crown Agents stood at £145,000.

The value of the railway stores at the close of the year was £57,374, of the Public Works unallocated stores £20,273, and of the Posts and Telegraphs unallocated stores £2,575.

Public Debt.

At the close of the year the Public Debt of the Colony amounted to £3,444,118, as compared with £3,464,118 on the 31st December 1914, the difference being due to the repayment of the sum of £20,000 to the to the Imperial Government during the year.

The amount standing to the credit of the sinking fund for the redemption of the funded portion of the public debt on the 31st December, 1915, was £182,055, as against £154,581 at the end of 1914, £21,280 having been contributed from general revenue during the year, and £6,194 being the interest on investments.

Currency.

British gold and silver coins and British West African silver coins (introduced into West Africa in June 1913) are legal tender to any amount throughout the Colony and its dependencies; also British bronze coins and British West African nickel coins up to one shilling.

During the year coin of the face value of £549,675 was received. There was no stock balance on the 31st December in the custody of the Currency Officer.

Imported in	1912	£1,500
	1913	1,500
	1914	2,000
	1915	1,362
		£6,362

These coins are of the following denominations :—One penny, halfpenny, and one-tenth of a penny. Generally speaking, they have been well received, although in the Colony and Ashanti little use is made of the "tenths." In the Northern Territories, however, there is a fair demand for the denomination.

The control and supply of this subsidary coinage is now vested with the Currency Board.

Owing to the shortage of silver coin towards the end of the year, it was decided to issue, as a temporary measure, Imperial Treasury Notes of 20*s*. and 10*s*. Theses notes were made legal tender by Ordinance No. 27 of 15th December, 1915. The amount of notes issued to the public from that date up to the 31st December, 1915, aggregated £175,000.

Municipal Bodies.

Town Councils have been established in the towns of Accra, Cape Coast, and Sekondi, under the provisions of the Town Councils Ordinance of 1894.

Each Council consists of eight members, of whom four are officials, nominated by the Governor, and four are elected by the ratepayers. The Governor has power to appoint four members to represent the ratepayers if there is no election through the failure of voters to nominate.

II.—TRADE, AGRICULTURE, AND INDUSTRIES.

Imports.

The total value of imports during 1915 (exclusive of expenses on specie and of the value of free goods imported across the land frontiers) was £4,509,538, an increase of £52,570, or over 1 per cent., as compared with 1914. Of this total the value of specie amounted to £1,037,744, an increase of £164,534, or 18 per cent., and the value of Government stores amounted to £355,108, a decrease of £70,479, or 16 per cent.

The value, therefore, of commercial imports (including post parcels, but exclusive of specie and free goods imported across the land frontiers) amounted to £3,116,686, a decrease of £41,485, or 1 per cent., as compared with 1914, and of £133,987, or 4 per cent., as compared with the record figures of 1913. The decline in the volume in imports is due to the shortage of shipping and to the difficulty, often amounting to impossibility, of getting goods manufactured at any price. The purchasing power of the Colony, however, has remained unimpaired, owing to the fact that the wealth of the population is based almost entirely on the production of cocoa, a commodity that is in increasing demand at increasing prices, while, under the sure shield of the Navy, the sea-borne trade of the Colony has suffered little at the hands of the enemy. It must be remarked, however, that the falling off in the volume of commercial imports was much greater than is indicated by the comparison of values given above. The average prices of imported goods in 1915 were probably from 11 per cent. to 25 per cent. greater than they were in 1914.

Specific duty was paid on imports which were valued at £909,777, an increase of £123,971, or over 16 per cent., as compared with 1914; *ad valorem* rates were paid on imports valued at £1,143,578, a decrease of £203,561, or 13 per cent.; and imports free of duty were estimated at £579,183, a decrease of £7,588, or 1 per cent.

The value of goods imported by Parcel Post was £184,182, an increase of £46,153, or 33 per cent.

The principal increases in Imports are in *Cotton goods* (£136,868), due mainly to increased prices; in *Unmanufactured Tobacco* (£31,481), due to large stocks imported direct from America under the inducement of high prices obtained in the local market at the beginning of of the year; in *Carriages and Carts* (£15,928), due to increased imports of private motor cars and light motor waggons for transporting goods and passengers; in *Soap* (£14,275), due entirely to volume of imports, not to increased prices, and attributable to the continued rise in the standard of living; and in goods imported by *Parcels Post* (£46,153), due to increased use of the Parcels Post service, by merchants as well as by private individuals, for the importation of silk and wearing apparel and similar light valuable goods on account of the quicker despatch and greater safety afforded.

The principal decreases are in *Provisions* (£66,687), due to difficulty in obtaining supplies from the home markets on account of shortage of shipping facilities; in *Coal* (£56,035), due to the large stocks held at the end of 1914, since largely drawn upon, but not replenished; in *Railway Plant and Rolling Stock*, only by comparison with 1914, in which year there was a large increase owing to imports for the Mangoase-Koforidua Railway extension; in *Hardware* (£33,039), due principally to the cessation of the German supply and the failure so far of other countries to provide acceptable substitutes in sufficient quantities; in *Beads* (£30,619), due to the fact that prior to the war the bulk of this commodity came from Austria and that so far no acceptable substitutes have been placed on the market; in *Wearing Apparel* (£22,406), amounting to little more than the increase that occurred in 1914 and due chiefly to the cessation of German and Austrian supplies and, to a small extent, to larger importation by parcels post; in *Woollen Goods* (£22,642), due to inability on the part of manufacturers to supply woollen goods for shipment abroad owing to the heavy demands at home in connection with the war; in *Machinery* (£23,588), due probably to the difficulty in obtaining machinery from home manufacturers already fully employed on war work; in *Building Materials* (£20,487), due to curtailment of Government building activity, to the failure of the supply of Belgian composition slates, and to diminished cement supplies owing to shortage of steamers direct from London; in *Cigarettes*, due to manufacturing and shipping difficulties; in *Kerosene Oil* (£14,526), due to irregularity of supplies owing to the lack of shipping facilities; in *Lumber* (£14,113), due to lack of ships; in *Beef and Pork* (£10,622), due mainly to shortage of shipping, but partly to lessened demand on account of higher prices; in *Silk* (£9 015), due to larger importation by parcels post, an item shown separately, and to difficulty in obtaining supplies; in *Furniture* (£6,253), due principally to the

fact that no substitute in sufficient quantities was forthcoming to replace the bentwood furniture formerly supplied by Germany and Austria; and in *Still Wines*, due partly to the extinction of the German source of supply.

The imports for the five years ending with 1915 were valued as follows:—

	£
1911	3,784,260
1912	4,023,322
1913	4,952,494
1914	4,456,968
1915	4,509,538

Imports from the United Kingdom increased both absolutely and relatively during 1915. Government imports accounted for £424,530 in 1914 and £355,815 in 1915 of the value of the total British imports, and by deducting those amounts we find that, while the commercial imports of the Colony from all sources declined £41,485, or 1 per cent., as compared with 1914, and £133,987, or 4 per cent., as compared with 1913, the proportion of those from the United Kingdom increased £143,024, or 6 per cent., as compared with 1914, and £170,221, or 8 per cent., as compared with 1913. Such comparisons are somewhat illusory, as higher home market prices account for the whole increase, and the improvement in the position of British manufactures in the markets of the Colony is, no doubt, to some extent, due to arbitrary conditions incidental to the war. The fact of the advantage, however, remains, and there is an opportunity for British enterprise to retain or even increase it. The principal increases in imports from the United Kingdom occurred under the heads Cottons, Rice, Soap, Perfumery, Carriages and Carts, and Ale and Porter, and the principal decreases occurred under Coal, Railway Plant, Provisions, Machinery, Building Materials, Beef and Pork, Hardware, Lumber, and Wearing Apparel. It is difficult at the present time to assign the true reasons for these increases and decreases and still more difficult to draw correct conclusions as to their significance.

The United States of America gained chiefly in unmanufactured tobacco, lumber, sugar, and flour, due not so much to increased trade as to the fact that such goods were brought to the Colony direct in chartered vessels instead of through the British markets, as would have been largely the case in normal times.

Holland secured increases in cotton and sugar, due probably to direct shipments from Rotterdam of Dutch goods, which in normal times would have been exported through Hamburg, or London, or Liverpool.

Exports.

The total value of exports by sea during 1915 was £5,943,631, an increase of £1,000,975, or 20 per cent. over 1914. Deducting the value of specie (£128,811) and of Government exports (£9), the value

of commercial exports amounted to £5,814,810, an increase over 1914 of £1,345,057, or 30 per cent., while the increase over the corresponding figures for 1913, hitherto the best on record, was £791,168, or 15 per cent.

The following is a comparative table of the quantities and values of the principal articles of commercial export for the years 1914 and 1915:—

Article.	1914.		1915.		Increase.	Decrease.
	Quantity.	Value.	Quantity.	Value.		
		£		£	£	£
Cocoa .. ..tons	52,888	2,193,749	77,278	3,651,341	1,457,592	—
Kola Nuts .. lbs.	7,862,414	142,190	8,267,100	139,163	—	3,027
Copra .. ..tons	656	11,825	770	12,821	996	—
Gold and Gold Dust .. ..ozs.	428,880	1,659,435	462,062	1,755,552	96,117	—
Auriferous By-Products .. lbs.	67,729	28,210	125,009	26,960	—	1,250
Lumber, sup. ft. (Native Timber)	24,587,217	240,878	9,217,622	90,661	—	150,217
Palm Kernels..tons	5,633	88,671	4,064	50,512	—	38,159
Palm Oil.. galls.	495,763	37,646	330,990	25,769	—	11,877
Rubber .. .. lbs.	654,133	21,631	647,982	25,167	3,536	—

The principal increases were in cocoa and gold.

Cocoa. (24,390 tons, or 46 per cent. in quantity, and £1,457,592, or 66 per cent. in value.) The increase in quantity is due in the main to new areas coming into bearing during the year. No part of it can be said to be due to the large proportion of the 1914–15 crop exported in 1915, as an equally large part of the 1915–16 crop will be exported in 1916. At the beginning of the year it was feared that the shortage of tonnage calling at the ports of the Colony would have a very bad effect on the local cocoa market, but such arrangements were made as to enable the whole cocoa yield to be safely shipped. Local prices showed an upward tendency, ranging from 11*s.* per load of 60 lbs. at the beginning of January to 30*s.*–33*s.* at the end of April, and only falling slightly to 25*s.*–30*s.* from November to the end of the year. The average f.o.b. value of the cocoa exported in 1915 was £47·25 per ton, as compared with £41·48 per ton in 1914. It is to be feared that this improvement is due solely to the market fluctuations and in no way to better quality. At the end of 1915 the price of Gold Coast cocoa in the home market was 67*s.* 6*d.* to 83*s.* per cwt. as compared with a maximum of 72*s.* per cwt. in 1914, but the rise was general and the relative value of Gold Coast cocoa remained low. Of the increase in cocoa the United Kingdom took £1,332,680 worth, while France and the United States of America took £440,092 and £283,468 respectively.

Gold. (£96,117 or 6 per cent.) Notwithstanding the fact that this constitutes a record for the gold exports of the Colony, the actual gold production was less than in 1914.

The principal decreases were as follows :—

Lumber. (15,369,595 square feet, or 63 per cent. in quantity and £150,217, or 62 per cent. in value.) This is due chiefly to the fact that the cabinet-making trade in Europe continues to be practically at a standstill, at least as far as mahogany work is concerned, and to some extent to the fact that very few vessels were obtainable to take logs to the United States of America. In fact it is very difficult to get ships to carry logs at all. Shipments to Germany have, of course, ceased, and the decreases in the values of shipments to the United Kingdom and the United States of America were £79,408 and £47,360, respectively.

Palm Kernels. (1,569 tons, or 28 per cent. in quantity, and £38,159, or 43 per cent. in value.) This is due to the cessation of shipments to Germany, which was the principal market for this product. A small increase occurred in the shipments to the United Kingdom. The low prices that ruled from April to September inclusive account for the greater proportional decrease in value. The shipments this year were the lowest on record.

Palm Oil. (164,773 gallons, or 33 per cent. in quantity, and £11,877, or 32 per cent. in value.) This decrease is due to the neglect of the whole palm product industry for the more profitable cocoa, and, considering the steady decline of the former industry since 1910, it is to be feared that it is doomed to extinction, except in certain districts that are unsuited for cocoa-growing. The exports in 1915 are the lowest recorded, not being quite one-sixth of what they were in 1910. Prices during the middle of the year were very low, but improved considerably in November and December.

The value of exports for the five years ending with 1915 is detailed as follows :—

	£
1911	3,792,454
1912	4,307,802
1913	5,427,106
1914	4,942,656
1915	5,943,631

Shipments to Germany and Holland ceased altogether. France took considerably increased quantities of cocoa, but decreased shipments of palm oil and kernels. The United States of America took increased quantities of cocoa, but this is due entirely to the fact that the cocoa was shipped direct instead of through the British or foreign markets, as would have happened in normal times. Timber shipments to the United States of America show a considerable decrease.

Total Trade.

The total value of the sea-borne trade of the Colony during the year, including expenses on specie, was £10,446,983, an increase of £1,069,045 or 11 per cent. as compared with 1914. If we add the value of dutiable imports across the inland frontiers and the Volta, we find that the total value of the trade of the Colony was £10,461,034, an increase of

£1,056,265, or 11 per cent. Again, by deducting the value of specie imported and exported, including expenses (£1,174,420), and the value of exports and imports on behalf of Government (£355,117), we get the total mercantile trade of the Colony during the year as valued at £8,931,497, an increase of £1,305,904, or 17 per cent.

As shown already, the whole of this increase occurred in exports, there having been a slight decrease in imports. These figures do not include the very considerable trade in free goods passing across the inland frontiers, complete and trustworthy statistics of which cannot be obtained.

The Colony may congratulate itself upon the fact that, notwithstanding a 46 per cent. decrease on normal times in the tonnage of shipping available, its commercial exports (other than specie) increased in value by 15 per cent. on 1913, and by 30 per cent. on 1914. And at the same time, while shortage of supplies was experienced in addition to shortage of shipping, the value of the commercial imports of the Colony decreased only 1 per cent. as compared with 1914, and 4 per cent. as compared with the record year 1913. No doubt, increased prices of commodities have had much to do with this, but on the whole these were certainly not to the disadvantage of the Colony. On cocoa exports alone there was a gain of £445,916 on what would have been received, had the average price been the same as in 1914. And as regards imports the grievance was not that more had to be paid for them, but that the demands could not be supplied at any price. Meanwhile there should be a respectable accumulation of unexpended wealth to spend on the advancement of industries and civilisation, when the world of trade and the arts of peace resume their normal conditions.

Preventive Service.

The Preventive Service was maintained during the year on the Western Frontier from Half Assinie to Debisu, and on the Eastern Frontier from Dakar Mouth along the Volta to Wupe, and thence along the South Eastern Frontier to Aflao. The service from Dakar Mouth north to Buaku was abolished in October, and that from Wupe south to Addah in March, on the assimilation of the tariffs east and west of the Volta. The estimated expenditure on the Service during the year amounted to £21,378, and the revenue to £2,629, as against £5,519 in 1914. This decrease was due to the curtailment of the service, the transfer of the South Volta ferries to the Political Department, and the abolition of Canoe licences on the Volta River.

It must be remembered that the influence of the officers and men of the Preventive Service is not confined to the prevention of smuggling; they "show the flag," maintain the peace in certain outlying portions of the Colony, and, noticeably along the Volta River, have improved the sanitation of the riverside villages.

The Eastern Frontier Preventive Service performed Customs preventive work on behalf of Togoland as well as on behalf of the Gold Coast during the year.

Mining.

The value of the gold produced in 1915 amounted to £1,719,638, being a decrease of £24,860 as compared with the value in 1914.

Of the total amount produced, 399,138 ounces were obtained by mining, and 5,642 ounces by dredging operations.

The decrease in value in the Colony was £17,831, while the decrease in Ashanti was £7,029.

On the Tarquah conglomerate mines 353,751 tons were crushed, and produced 171,754·68 ounces, this being an extraction of 9·71 *dwts.* per ton; the crushing of 468,264 tons from the quartz mines produced 227,383·85 ounces, representing an extraction of 11·10 *dwts.* per ton.

The various dredging companies treated 1,256,310 cubic yards of alluvium, resulting in a production of 5,642·08 ounces of fine gold, *i.e.*, an average of 2·16 grains per cubic yard treated.

The average number of labourers employed daily by the mining and dredging companies throughout the year was 15,300, as against 15,741 in 1914.

One certificate of validity for a mining concession was issued in the Colony and three in Ashanti. Two prospecting licences were granted in the Colony during the year.

Agriculture.

The fortunes of the majority of the inhabitants of the Colony proper and of a large and increasing number of those in Ashanti are bound up with the prosperity of the cocoa industry. Were this more fully realised more interest would be taken by the producer in the cleanliness and cultivation of his farm, and much anxiety as to the future of the industry would be spared to the Government of the Colony and its agricultural advisers. Both entomologist and mycologist are emphatic as to the wide-spread destruction wrought by insect and fungoid parasites due to neglect of the simplest sanitation and cultural work, and advocate the adoption of coercive measures such as are in vogue in towns for the regulation of building and the preservation of health. Generally speaking, the only work done in the cocoa gardens of the Gold Coast is that of cleaning the bush in order to harvest the crop. Advice falls upon deaf ears so long as diseased farms can be freely abandoned and new ones planted. The carelessness of the native farmer is encouraged by the want of discrimination shown by the local buyer, who still makes little or no difference in the price he pays for cocoa, whatever the quality.

The production of cocoa has continued to increase, exports amounting to 77,278 tons, more by 24,390 tons, or 46 per cent., than in 1914. The declared value per cwt. has also steadily recovered from an average of 34*s.* at the beginning of the year to 60·49*s.* at its close. The great increase in production is again due to the large number of farms coming into bearing for the first time. The quality is badly reported on, inattention to trees and neglectful preparation being responsible.

The staff of the Agricultural Department, in addition to the supervision of work on their stations, have undertaken short tours of instruction in the neighbourhood. The scheme of native local cocoa instructors has continued in operation, but so far little attention is paid to them by farmers, and, except in Ashanti, it has been impossible to supervise their work sufficiently.

Classes in agriculture have been held at various centres, and 44 students gained certificates during the year. School gardens have been visited by travelling officers of the department and advice given to the teacher in charge. Eighteen learners were under training in the Colony and Ashanti, and four in the Northern Territories.

Interest in the production of copra has been maintained, and the amount exported was more by 114 tons, or 17 per cent., than in 1914. The increased total value of the export was £996, in spite of the fact that the average declared value per ton was £1 4*s.* 0*d.* less than that for 1914. Much the greater portion of the produce was grown in and exported from the Quittah district. Seed has been distributed free to head chiefs, and nurseries were established under departmental supervision.

Some years must elapse before the experimental work in cattle breeding at Tamale in the Northern Territories yields results worthy of record.

The attempt made by the British Cotton Growing Association to establish the cultivation of cotton on a commercial scale did not meet with success and has had to be abandoned.

The operations of the European companies engaged in the development of oil-palm products can hardly be said to have passed the experimental stage, but there is a probability of success rewarding such efforts in this Colony.

The production of rubber, as shown by the export returns, has decreased in amount and has increased in value, the differences being 6·151 lbs. in amount and £3,536, an average of 1·38*d.* per lb., in value. The latter difference is probably due not only to the rise in prices in the home markets, but also to the larger proportion of plantation rubber exported.

Forestry.

At the beginning of the year the Conservator of Forests visited Togoland to inspect the plantations of teak and other species, both indigenous and exotic, which the Germans had made at nearly all the headquarters stations of their districts, and to submit proposals for their protection and for the establishment of similar plantations in this Colony.

Other tours were made by officers of the Forestry Department, and the store of detailed information in the possession of the Government with regard to the forests of the Colony was increased by their reports.

The planting of cocoa is reported to be now making headway amid the dense forests of the Western Province of Ashanti, though a comparatively small number of trees are as yet in bearing. In this part of Ashanti kola is also largely planted.

The teak and sissoo planted in the Ashanti reserves are now left to look after themselves. The former average 20 feet in height, while the latter are practically a failure, having developed a scrubby habit.

It was intended to improve the composition of the forest crop in these reserves by annual sowings of seeds of mahogany and other good timber trees, and arrangements were made to collect such seeds, but this work will probably now be in abeyance till after the war.

The very large falling off in the export of timber this year had its bright side for those who are interested in the permanent welfare of the forests, which are spared, at any rate for a time, the enormous and increasing tax of pre-war days on their resources.

The consumption of wood fuel by the mines was considerably larger than heretofore owing to shortage of coal, and the problem of supplying wood to the mines to the fullest extent for an indefinite period, and without permanent damage to the country, is one which demands the careful consideration of the Forestry Department.

The Conservator of Forests draws attention to the dangers that attend the indiscriminate extension of cocoa cultivation due to the easy and quick profits made by the native farmer from this crop. Forests are being cut down to an alarming extent to make room for cocoa, and if this is allowed to continue much longer a largely increasing prosperity will be purchased at a very serious cost to the eventual welfare of the country. The conservation of protective forest belts is advocated, both to perpetuate the conditions under which cocoa thrives and to prevent the spread of those insect and fungoid pests which are already so prevalent in the older farms.

Economic Investigations.

The following reports were furnished by the Imperial Institute to the Government of the Gold Coast as the result of investigations conducted in the Scientific and Technical Research Department, supplemented, when necessary, by reference to commercial experts.

Oil-seeds.—A sample of "owere" seed (*Monodora myristica*) was found on steam distillation to yield 2·2 per cent. of a pale yellow volatile oil, whilst the residue left after steam distillation yielded a quantity of a dark reddish-brown fixed oil amounting to about 35 per cent. of the original weight of the seed.

The residual meal left after the extraction of both oils from the seeds did not contain any alkaloids or cyanogenetic glucosides, but it appeared unlikely to be suitable for use as a feeding stuff and could probably only be used as a manure.

The volatile oil and fixed oil were submitted to firms of essential oil distillers and soap manufacturers respectively. From their reports it appeared unlikely that it would be possible to utilize "owere" seed commercially, so long as other and better oil-seeds are available at cheap rates. The essential oil is not likely to realise more than 1*s.* 6*d.* to 2*s.* per lb., and the fixed oil would probably only compete with cheap low-grade oils used for the manufacture of soft soap.

Foodstuffs.—A sample of ginger grown at the Kibbi agricultural sub-station consisted of irregular unpeeled pieces, somewhat shrivelled, but of good aroma and pungency. The sample was inferior to China ginger, but was of fairly good quality, and would find a ready market in London at about 18*s.* per cwt. (October 1915). It was suggested that a trial consignment of 50 bags should be forwarded to the Imperial Institute for sale in London.

Drugs.—A sample of bark was identified as probably that of *Zanthoxylum senegalense*, D.C. The bark, which has stimulant properties and is employed locally in rheumatic affections, intestinal troubles and other diseases, has been previously examined by various investigators and found to contain a fixed oil, a neutral body, and two alkaloids, one of which (artarine) was found to be present to the extent of 0·4 per cent.

This drug is described as producing muscular irritation and physiological disturbances similar to those induced by veratrine. The root bark of *Zanthoxylum senegalense* also yields a fixed oil, which (probably on account of the artarine dissolved in it) tends to produce paralysis of the nervous system.

Although there is not any regular demand for this bark in Europe, it is possible that if the alkaloid artarine could be shown to be clearly analogous to veratrine in physiological activity it might replace the latter in medicine. It was, therefore, suggested that a quantity of the bark should be sent to the Imperial Institute for investigation.

Minerals.—During the year three reports were furnished to the Colonial Office on the investigation at the Imperial Institute of 43 mineral specimens and 96 concentrates collected by the Gold Coast Geological Survey.

Economic Enquiries.—The work of the Technical Information Bureau of the Imperial Institute has been continued on the lines indicated last year, and the following summary of its activities during 1915 with regard to Gold Coast products may be given.

A large number of enquiries on the subject of palm kernels and their products have been dealt with during the year, and action has been taken with a view to popularising the use of palm kernel cake as a feeding stuff by British farmers. The crushing of palm kernels is now being carried out in the United Kingdom, and the imports of the kernels to Liverpool and Hull during 1915, amounting to over

202,000 tons, were only slightly below the total exports from the British West African Colonies in 1913, when practically the whole of the kernels were crushed in Germany.

In addition to the enquiries relating to the oil seeds mentioned above, the Bureau supplied information on a number of Gold Coast products, including cocoa; kola nuts; fibres; gums and resins; plants yielding essential oils; timbers; and on the general agricultural products of the Colony.

Publications.—The following articles relating to products from the Gold Coast or of special interest in the Colony were published in the "Bulletin of the Imperial Institute" for 1915 (Vol. XIII):—

Oleo-resin of *Daniella thurifera.*

The Possibilities of Sericiculture in British Colonies and Dependencies.

"Owere" seeds (*Monodora myristica*).

The War and the World's Cotton Crops.

The Feeding Value of Palm Kernel Cake.

Piassava Industry of British West Africa.

Cassava; its Cultivation and Utilisation.

Economic Resources of Togoland.

During the year a monograph on "Oil Seeds and Feeding Cakes" was issued by the Imperial Institute and published by Mr. John Murray. This book deals fully with palm kernels, copra, and other oil seeds, and was issued with a view to extending the utilisation in the United Kingdom of these seeds as sources of oil and feeding cake. The book has already had a large circulation.

Gold Coast Court.—The Gold Coast is represented in the Public Exhibition Galleries of the Imperial Institute by a Court containing exhibits illustrating the resources and industries of the country.

New samples of cotton, beans, and white kola nuts were placed on exhibition during the year, and considerable rearrangement and improvement of the exhibits has been effected, notably as regards minerals, rubber, fibres, and timbers.

The statistical statements of trade and models representing the gold output of the Colony have been brought up to date.

Lands.

The bulk of land in the Colony belongs to the tribal "Stools," and, theoretically, there is no land without an owner. The general principle is that all the land within the recognised territory of a "Stool" is the property of that "Stool."

The Crown possesses no waste lands in the Colony, but certain lands have been acquired by the Government from time to time,

mostly under the Public Lands Ordinance, 1876, and the Railway Ordinance, 1898, which legalise compulsory acquisition for the services of the Colony on payment of reasonable compensation.

The validity of concessions is enquired into by the Supreme Court under the provisions of the Concessions Ordinance, 1900. The Court enquires whether the grantors are the native owners of the land; whether the area falls within the prescribed limit of five square miles for a mining concession and 20 square miles for other concessions; whether the prescribed term of 99 years is exceeded; whether the consideration is adequate; whether the natural produce other than timber is to be collected to the exclusion of the natives; whether natives are to be removed from their habitations within the area of the concession; and whether the statutory rights reserved to the natives are included in the deed. A survey and demarcation of boundaries by the Survey Department is then ordered, and when it is completed a certificate of validity giving the lessee an indefeasible title, subject to the observance of his covenants, is issued by the Court. In the certificate are contained such modifications of the deed as the Court may impose to bring it within statutory requirements and to render it a transaction fair and equitable to both parties. The rent from certified concessions is paid to the native grantors through the Government. Concessions granted solely for purposes of plantations of rubber and other products may be exempted from the operation of the Ordinance, whilst the concessions to acquire mineral oil are held subject to the Government right of pre-emption of the oil under Ordinance No. 15 of 1907.

Shipping.

The following table shows the number and tonnage of steam vessels (distinguishing their nationality) which entered the ports of the Colony during the years 1914 and 1915. Steamers entering the ports of the Colony stay for a day or two only, so that for all practical purposes the number of vessels entered may also be taken as the number cleared :—

	1914.		1915.	
Nationality.	No.	Tons.	No.	Tons.
British ..	419	946,093	289	687,167
German ..	161	362,292	—	—
French ..	54	102,357	60	118,156
Belgian ..	—	—	2	9,582
Norwegian ..	2	2,223	—	—
U. S. A. ..	—	—	1	1,036
Italian ..	—	—	—	—
Danish ..	—	—	—	—
Portuguese ..	1	44	—	—
Spanish ..	—	—	1	832
Barbados ..	—	—	1	1,583

The following table shows the total shipping "inwards" for the five years 1911–1915. For the reason mentioned the shipping "outwards" is not given :—

Steam Vessels.

Year.	No.	Tons.
1911	665	1,348,401
1912	686	1,448,506
1913	692	1,515,197
1914	637	1,413,009
1915	354	818,356

Sailing Vessels.

Year.	No.	Tons.
1911	1	1,000
1912	1	958
1913	1	851
1914	1	751
1915	8	7,259

In normal times the mail steamers of the African Steam Ship Company and the British and African Steam Navigation Company, which are both under the management of Messrs. Elder Dempster & Company, leave Liverpool every Wednesday for Sekondi and Accra, the schedule time being fourteen days. Homewards, the mail steamers leave Accra every Thursday and are due to arrive at Plymouth in fourteen days.

III.—LEGISLATION.

Twenty-nine Ordinances were passed by the Legislative Council during the year under review.

IV.—EDUCATION.

The schools under the management of Missionary Bodies which are subject to inspection by officers of the Education Department and receive grants-in-aid from public funds numbered, at the close of the year, 154. There are fourteen schools under direct Government control. In addition to the assisted schools there are 276 primary schools supported by the various religious bodies, being an increase of 24 schools on the numbers during the previous year. Education is not compulsory.

The following is a comparative table showing the number of schools inspected during the last two years :—

Denomination.	1914.	1915.	Increase or Decrease in 1915.
African Methodist E. Z. Mission	3	4	plus 1
Basel Mission	67	67	—
Bremen Mission	15	15	—
Church of England (S. P. G.) ..	3	4	plus 1
Government Schools	12	13	plus 1
Roman Catholic Mission ..	28	29	plus 1
Wesleyan Mission	31	34	plus 3
Secondary Schools	1	1	—
Total	160	167	plus 7

All the Mission schools inspected, with the exception of one, succeeded in obtaining grants-in-aid.

The total number of children enrolled on the registers of schools supported by contributions from the public funds during the year 1915 was 20,681, the average daily attendance being 15,918. Compared with 1914 these returns show increases of 435 and 766, respectively.

The grants-in-aid earned by schools on the assisted list in 1915 amounted to £9,280, which shows a decrease of £32 on the figures for the previous year, due to fewer claims submitted for school buildings.

The total income of these schools in 1915 was £18,013, of which sum the grants-in-aid represent rather more than half, the balance comprising school fees, to the amount of £2,911, voluntary subscriptions, and grants from the Missionary Societies.

The total estimated expenditure by Government on education in the Colony and its dependencies in 1915 amounted to £32,414, a total exceeding that of the previous year by £2,511.

At the Government Training Institution for Teachers at Accra there were 73 students in residence—an increase of 17 students on the numbers during the previous year.

At the Government Technical School at Accra there were 43 pupils in residence—a decrease of five pupils on the numbers of the previous year, consequent upon the temporary closing down of the school in 1914 owing to the war.

Instruction in agriculture or some other form of industrial work is now given in nearly every assisted school.

Forty-four candidates were successful in obtaining certificates at the courses of instruction in agriculture for students and teachers held at the Aburi, Assuantsi, Tarkwa, and Kumasi agricultural stations.

At the competitive examinations for 1915 which control admission to clerkships in the Government Service, 145 candidates obtained passes.

V.—GOVERNMENT INSTITUTIONS.

Hospitals and Asylum.

During the year 1,146 Europeans and 30,512 natives were treated in the hospitals and dispensaries of the Colony, as compared with 1,607 and 29,392, respectively, in the previous year.

A new hospital for Europeans has been built at Accra, but is not yet in use.

The temporary European hospital at Accra contains five wards with twelve beds. The native hospital contains six wards with a total of 46 beds.

The hospital at Sekondi contains six European wards, including two for convalescents, with a total of sixteen beds, while for native patients five wards with twenty-seven beds are provided.

At Kumasi there is a European hospital with four wards, and a native hospital with 76 beds. The number of patients treated in Ashanti amounted in 1915 to 33 European in-patients, 119 European out-patients, 1,097 native in-patients, and 10,425 native out-patients.

European nursing sisters are attached to the Accra, Sekondi, and Kumasi hospitals.

There is a lunatic asylum and a laboratory at Accra.

The number of patients admitted into the lunatic asylum during the year amounted to 27 males and 6 females, as compared with 50 and 3, respectively, in 1914. The number discharged as cured was 21 males and 3 females, as against 13 and 1, respectively, in 1914.

The daily average of inmates was 100. Those able to work are employed in the asylum garden.

The criminal lunatics have separate accommodation.

Savings Bank.

There was a large increase in the transactions of this branch during the year. Deposits amounted to £37,297, an increase of £4,085, and withdrawals to £34,802, an increase of £7,070 over last year.

The amount standing to the credit of the 5,107 depositors on 31st December was £55,613, an increase of £3,715 in deposits, although the depositors were 486 fewer than at the same date in 1914.

VI.—JUDICIAL STATISTICS.

Police.

The total strength of the police force of all ranks on the 31st December, 1915, was 1,117, being one below the authorised strength, made up as follows :—

General Police	462
Escort Police	518
Mines Police	49
Railway Police	88
	1,117

This force is distributed in the Colony and Ashanti, (separate provision being made for the policing of the Northern Territories by means of the Northern Territories Constabulary, as to which information is contained in the annual report on the Northern Territories).

The titles of Commissioners of Police and Deputy Commissioners of Police were changed to Inspector General of Police and Deputy Inspector General of Police and legalised by Ordinance No. 4 of 1915, and four new appointments of Commissioner of Police were created.

The European staff was augmented by two Assistant Commissioners of Police.

The general police was increased by two clerk interpreters ; and the escort police was increased by three sergeants, six corporals, sixteen 2nd class constables, and thirty-two 3rd class constables. The railway police was increased by the appointment of one sergeant, two corporals, and eight constables. The strength of the mines police remained unchanged.

The casualties during the year amounted to 350 as against 381 in 1914.

Shortage in the European staff was a natural consequence of the war, and the efficient working of the general police was, as in previous years, seriously handicapped by the want of non-commissioned officers and constables who could read and write. There was no loss of specie or bullion under the charge of the escort police, who earned £478 1*s.* 0*d.* for the conveyance of specie, as compared with £579 9*s.* 11*d.* in 1914.

The police dealt with 12,985 cases of crime, an increase of 2,046 as compared with the previous year. Of this number 289 were committed for trial, the remainder were dealt with summarily and in these summary cases 9,761 convictions were obtained.

In 1,952 summary cases the accused were acquitted, 551 were withdrawn, and 432 were not proceeded with.

PRISONS.

Criminal Statistics.

The four central prisons of the Colony, in which long sentence prisoners are confined, are at Accra, Sekondi, Cape Coast, and Elmina, the daily averages of which are 262, 194, 90, and 42, respectively.

Prisoners whose sentences are for less than six months serve their time in the smaller gaols at Axim, Sekondi, Tarkwa, Saltpond, Winnebah, Akuse, Addah, Quittah, and Dunkwa. At Obuasi (daily average 68) and Kumasi, in Ashanti (daily average 129), prisoners undergo sentences up to three years. Smaller gaols in Ashanti are at Kintampo, Sunyani, Krachi. Goaso, Wenchi, and Juaso.

The number of prisoners in 1915 amounted to 6,480, an increase of 783 as compared with 1914. The daily average of prisoners in the Colony and Ashanti was 1,201, as compared with 1,033 in 1914, an increase of 168.

The reports on the various prisons show that the discipline maintained was generally satisfactory. 56 prisoners escaped, the same number as in the previous year. Of the 56, 30 were recaptured and one prisoner was shot at Wenchi when escaping.

Escapes are comparatively easy to effect, owing to the ease with which a prisoner can get out of sight in thick bush. The health of the prisoners generally was good.

The total earnings in respect of prison industries and labour amounted to £3,928, as compared with £4,639 in 1914, a decrease of £711, which is due to the fact that to Government Departments prison labour is now free.

The numbers of convictions in the Superior Courts of the Colony, Ashanti and the Northern Territories for the last two years have been as follows :—

	1914.	1915.
Offences against the person	95	104
Slave dealing	31	—
Offences against property (other than praedial larceny)	44	81
Other offences	100	106
	270	291

There were 139 acquittals in 1915 as compared with 111 in 1914.

The number of summary convictions has been as follows :—

	1914.	1915.
Offences against the person	1,797	1,892
Slave dealing	8	19
Offences against property (other than praedial larceny)	2,151	2,743
Other offences	5,826	7,045
	9,782	11,699

There were 3,380 acquittals in 1915, as compared with 3,054 in 1914.

These criminal statistics include cases not handled by the police, and, as regards Superior Court cases, those instituted on the initiative of District Commissioners in certain outlying districts where illiterate police are directly under their command.

VII.—MEDICAL.

Vital Statistics.

The population of the Gold Coast Colony and its dependencies amounted in 1911, at the last census, to 1,503,386.

The number of Europeans resident in the Colony during the year is given as 2,206, as compared with 2,645 in 1914.

Among the European population a decrease per thousand of 3·41 in the death rate, and a decrease of 6·98 in the invaliding rate, are recorded.

An analysis of the death and invaliding statistics is appended :—

1914.	Number of Residents.	Deaths.	Invalided	Death rate per 1,000.	Invaliding rate per 1,000.
Officials	768	11	24	14·32	31·25
Merchants	733	9	24	12·27	32·74
Mining companies ..	1,020	13	44	12·74	43·13
Missions	124	—	2	—	16·12
Total or average..	2,645	33	94	12·47	35·53
1915.					
Officials	700	7	21	10·00	30·00
Merchants	677	10	28	14·77	41·35
Mining companies ..	481	2	14	4·15	29·10
Missions	148	1	—	6·75	—
Total or average..	2,206	20	63	9·06	28·55

As regards the seven cases of death amongst European officials, one was due to meningitis, one to blackwater fever, two to subtertian malaria, one to bronchitis, one to locomotor ataxia, one to nephritis.

There was one case of yellow fever amongst Europeans; this proved fatal. Of the twenty-one officials invalided, three were for blackwater fever, two for neurasthenia, and sixteen for various other diseases.

Of the forty-two non-officials invalided, eight were for nervous diseases, seven for malaria, three for blackwater fever, two for debility, four for gastritis, and eighteen for various other diseases.

No means exist whereby accurate statistics relating to the health of natives can be obtained. Treatment was given for 2,745 cases of malaria, 2,284 of parasitic diseases, and 622 of dysentery.

In all 48,592 cases of disease were treated during 1915, of which 219 proved fatal, the figures for 1914 being 51,903 and 239, respectively.

The Gold Coast and its dependencies were free from any serious outbreak of epidemic disease during the year.

Sanitation.

Generally speaking, the health conditions of the Colony, Ashanti, and the Northern Territories, especially in the larger towns, show some improvement.

In the larger towns of Accra, Cape Coast, Sekondi, and Kumasi 7,231,613 square yards of vegetation were cleared, 59 pools or excavations were filled, 1,600 square yards of marsh land were filled and drained, and 13,095 drains and 5,506 pools were treated with crude petroleum.

A sum of £24,118 16*s.* 5*d.* was spent by the Public Works Department on sanitary improvements during the year.

Under the head of Sanitation the sum of £53,117 2*s.* 5*d.* was spent, and £1,570 4*s.* 9*d.* in addition was spent on sleeping sickness preventive measures.

During the year 7,750 persons were prosecuted for offences against the sanitary laws and regulations, and 7,482 convictions were obtained, the fines inflicted amounting to £3,245 2*s.* 6*d.*

VIII.—POSTAL, TELEGRAPH, AND TELEPHONE SERVICES.

The Post Office dealt with 4,293,828 letters and postcards in the year, as compared with 5,723,772 in 1914. The other business, parcels, postal orders, etc., showed increases in 1915.

The Department collected £19,877 in respect of duties levied on parcels, as compared with £13,193 in 1914.

The total number of telegraph offices open to the public in the Colony, Ashanti, and the Northern Territories is 52, with a length of wire of 1,319 miles.

There is a wireless telegraph station at Accra.

There are telephone exchanges at Accra, Sekondi, Tarkwa, and Dodowa.

The public subscribe for 60 of the 166 telephones in connection at the four exchanges.

IX.—RAILWAYS AND ROADS.

Railways.

The total capital account on the 31st December, 1915, stood at £3,049,246. The gross revenue for the year amounted to £447,470, an increase of £64,462 over the previous year. The Accra Railway contributed to the above figure £146,009, as compared with £96,465 in 1914.

The net revenue for the year was £272,397, as compared with £208,915 in 1914, the interest earned on the total combined capital of £3,049,246 being 8·93 per cent. as against 7·32 per cent. in the previous year, 8·26 per cent. in 1913, and 8·05 per cent. in 1912, and 8·98 per cent. in 1911.

Roads.

In the Colony the main roads are constructed and maintained by the Public Works Department. In addition to the main roads, 1,998 miles of secondary roads in the Colony have been placed under the Roads Ordinance (No. 13 of 1894), and are maintained by the native chiefs. The chiefs are paid by the Government at rates varying from 5*s*. to £1 a mile for the maintenance of these roads.

In Ashanti the roads (outside the towns), with one exception, are maintained by the native chiefs under much the same conditions as for the secondary roads in the Colony. A motor service now runs between the railway terminus at Kumasi and Ejura along the road recently constructed by a special department to facilitate communication with the Northern Territories. This metalled road is about 61 miles in length, and, though covering only about two-fifths of the interval, it traverses the tangle of hills and forest just beyond Kumasi which forms the most difficult portion.

In the Northern Territories there is an excellent system of roads, the generally open, flat country offering no impediment to construction, which is undertaken by the natives under supervision of Political Officers and native chiefs.

X.—PUBLIC WORKS.

Public Works Department.

The total expenditure on public works amounted to £289,037, as compared with £388,488 in 1914. Annually recurrent works show a decrease of £1,902; new works and buildings of £105,622; and roads and bridges of £26,683.

The amount expended on sanitary works was £20,979, and on roads and bridges £23,534.

The more important works of general interest which were undertaken included the reconstruction and extension of Government offices and the erection of additional quarters at Accra, new Government offices at Koforidua and Mampong, and the lay-out of the new township at Koforidua. Additional quarters have also been erected at Sekondi, Cape Coast, and Tarkwa.

Accra Water Works.

The nett expenditure during the year on construction and maintenance amounted to £16,252 2*s*. 9*d*. Both storage reservoirs have been completed and brought into use to their full capacity.

A continuous supply of water for domestic and industrial purposes has been maintained, the total consumption being 66,452,400 gallons, an average of 182,061 gallons per day.

The tank at the Cantonments was completed and brought into use.

A service of two trains daily on the waterworks railway was maintained between Accra and Weshiang, 18,019 passengers, and 1,370 tons of public merchandise being carried in addition to departmental traffic.

The traffic receipts for the year amounted to £2,184 3*s*. 8*d*.

Sekondi Water Works.

The expenditure on these works during the year amounted to £34,079 15*s*. 0*d*., bringing the total expenditure up to £150,455 7*s*. 9*d*. From these amounts must be deducted the sum of £18,330 0*s*. 7*d*., the cost of the waterworks branch line from Inchaban Junction to Inchaban, for which credit has been given by the Railway Department, thereby reducing the total expenditure to the end of 1915 to £132,125 7*s*. 2*d*.

The excavation in rock in sinking for the foundation of the dam had to be carried deeper than anticipated, but has been completed satisfactorily. Concreting in the foundation has been continued, and good progress made with the main structure. The pump house is built, and the engine pumps erected ready for trial. Some further progress has been made with the filters. The clear water tank is nearly completed, and the 12-inch pumping main is laid near to the service reservoir.

Accra Harbour Works.

Breakwater. About 50 feet of the breakwater was built and this work is nearing completion so far as actual blocksetting is concerned.

Sand Pumping Operations. The sand pumps were kept at work during the greater part of the year, but there were delays for want of coal.

The 8-inch wharf construction pump was installed and worked.

The wharf portion of the 12-inch pumping plant was erected and started to work pending the erection of the inshore plant, when the discharge will be taken to the lagoon.

During the year 1915 about 250,000 tons of sand were pumped out of the harbour, and the depth maintained was sufficient to allow lighters to load and discharge at both sides of the jetty.

New Wharf. The erection of the new wharf, under the lee of the breakwater, was carried on, a length of about 150 feet having been partly completed.

General. Owing to the economy which had to be observed a full programme of work could not be carried out.

Sekondi Harbour Works.

Breakwater. The breakwater was practically completed during 1915, and for present purposes now gives all the shelter required in the harbour.

Slipways. The cradle for the eastern slipway was erected, and the engines for the hauling machinery were completed ready for use.

Railway Quay Extension. This was practically completed and was in use for storing coal, etc.

Lighter Berth. This berth, built for bringing lighters with heavy loads along the breakwater, was nearly finished.

Jetty No. 3. The site for this jetty has been partially drilled and blasted ready for dredging.

Jetty No. 4. This was more than half completed.

Beach Stepped Retaining Wall. This was commenced, and a small portion of the wall built between the slipways and railway jetty No. 1.

General. Owing to the stringent economy necessitated by the war only a very restricted programme of construction was adopted.

XI.—SURVEYS.

The Survey Department is in abeyance for the time being, owing to the European officers of the Department having re-joined the colours.

The native staff, under the directions of officers of the Public Works Department, have been employed in town surveys. The segregation area Sekondi, Nyakrom, and Berracoe are amongst those carried out.

XII.—MISCELLANEOUS.

Suitability of Climate for Europeans and Openings for White Labour.

The Gold Coast is peculiarly free from many of the discomforts associated with tropical countries: hot nights and intense heat by day are the exception rather than the rule, while insects are comparatively unobtrusive. The poor quality of the food ordinarily obtainable by Europeans is in many cases accountable for their lowered vitality and renders them an easy prey to mosquito and water-borne diseases. The efforts of the sanitary and medical authorities in promoting hygiene and treatment of disease continue to exercise a beneficial effect on the general health of Europeans.

Native aspirants to various kinds of employment, skilled and unskilled, being plentiful, it is not the policy of Government to encourage European immigration; and, living being expensive, it is highly inadvisable for Europeans in search of employment to come to the Colony without previous engagement by Government or representatives of mercantile firms in Europe.

XIII.—GENERAL OBSERVATIONS.

From the financial point of view the year under review has been more satisfactory than in its early months the most optimistic had the temerity to anticipate. The favourable turn to the Colony's finances was occasioned by the abundant cocoa crop and the facilities for shipping it. These two facts also have had their effect outside the

region of statistics. The high prices which regular shipping has enabled the merchants to pay for cocoa have added materially to the private hoards and purchasing power of the population, and, as remarked in previous reports, it is again to be discerned that the general tendency is to devote a considerable proportion of this unaccustomed wealth to uses which show a desire for the improvement of the standard of general welfare.

It is no exaggeration to say that, on the whole, the twelve months have been a period of prosperity for the native community; and, for the fact that this Colony can record a year of prosperity during the great war, the credit is given intelligently and gratefully where it is due—to the Navy. It is generally realised that the existence of the Colony as it is to-day depends upon its communications by sea, and this fact, perhaps more than any other, has brought home to the community their dependence on the Crown and their immediate concern in the fortunes of the war. It may be too early now to attempt any summary of the effect the war has had or will have on the course of affairs in this Colony. One effect, however, is obvious: it has compelled the native to take stock of things as they are and of things as they might be, and the result appears to have been to confirm and to evoke expression of his loyalty. Generous subscriptions from all parts of the Colony to the War Fund, to the Red Cross, to the Belgian Relief Fund, gifts of aeroplanes, the subscription from a chief in the interior to the Edith Cavell Fund, the enlisting of a native barrister and of clerks in the ranks of the Gold Coast Regiment for active service in the Cameroons, these and other instances, all of which in due time will have their record, are the endeavour of the native community to express articulately that it is heart and soul with the Empire and that any other connection is unthinkable.

Separate reports are presented with regard to Ashanti and the Northern Territories.

C. W. WELMAN,

Assistant Colonial Secretary.

May, 1916.

APPENDIX.

Statement showing the importation of spirits into the Gold Coast during the six years ended 31st December, 1915 :—

I.—GENERAL.

Administration.

The Colony was administered by Sir Hugh Clifford, K.C.M.G., Governor and Commander-in-Chief, until the 17th of November, when he proceeded to England on leave of absence. Mr. A. R. Slater, C.M.G., Colonial Secretary, administered the Government for the remainder of the year.

Retirements.

Dr. F. G. Hopkins, Principal Medical Officer, Mr. F. H. Waller, General Manager of the Railways, and Mr. C. S. Craven, Resident Engineer of the Water Works, retired from the Public Service during the year.

Honours.

Companionship of the Most Distinguished Order of Saint Michael and Saint George was conferred upon Mr. A. R. Slater, Colonial Secretary; Lieutenant-Colonel R. A. de B. Rose, Worcestershire Regiment (Gold Coast Regiment, West African Frontier Force) and Captain J. F. P. Butler, V.C., King's Royal Rifle Corps (Gold Coast Regiment, West African Frontier Force), were made Companions of the Distinguished Service Order; Lieutenant-Colonel F. C. Bryant, C.M.G., R.A., and Dr. G. de P. D'Amico received the Cross of an Officer of the Legion of Honour and the Palms of an Officer of the Academy respectively from the Government of the French Republic, while Temporary Lieutenant Bussel and Lieutenant Earle, both killed in action in the Cameroons, were awarded the Croix de Guerre by the same government.

Obituary.

The deaths of the following are recorded with regret:—Dr. F. G. Hopkins, Principal Medical Officer, less than a month after his retirement; Major J. Marlow, Commandant of the Northern Territories Constabulary; Captain J. F. P. Butler, V.C., D.S.O., of wounds received in action while serving with the Gold Coast Regiment in East Africa; Captain H. T. C. Wheeler, Travelling Commissioner, Northern Territories; Captain C. J. Pye and Lieutenant G. G. Duncan, both killed in action while serving with the Gold Coast Regiment in East Africa.

Establishment.

Dr. T. E. Rice was appointed Principal Medical Officer on the retirement of Dr. F. G. Hopkins; Mr. F. H. Waller was appointed General Manager of the Railways in succession to the late Mr. A. E. Cruickshank, but retired on the ground of ill-health later in the year; Captain H. W. Dale-Glossop was promoted to be Commandant, Northern Territories Constabulary, in the vacancy caused by the death of Major Marlow.

The effects of the war were felt in the work of Government, which had to be carried on with staffs depleted of their personnel for military service and for the administration of the British Sphere of Occupation in Togoland.

Principal Events.

February saw the completion of the conquest of the Cameroons, with regard to which the General Officer Commanding (Major-General C. M. Dobell, C.M.G., D.S.O., A.D.C.) reported that the Gold Coast Regiment, commanded by Lieutenant-Colonel Rose, particularly distinguished itself throughout the whole of the operations.

The Gold Coast Regiment, after having taken the leading part in the conquest of Togoland and a prominent share in the Cameroons Campaign, was now the first West African regiment to go to East Africa whither it sailed in July 1916.

In addition to the Expeditionary Force of the Gold Coast Regiment a Volunteer Contingent proceeded to East Africa in November 1916.

By Royal Instructions under Letters Patent, passed under the great seal of the United Kingdom, constituting the office of Governor and Commander-in-Chief of the Gold Coast Colony and providing for the Government thereof, dated the 20th of September, 1916, the constitution of the Executive Council was altered by the addition to it of the Secretary for Native Affairs, and the Legislative Council, formerly composed of the Governor, four official and four unofficial members, was enlarged by the addition of seven official and four unofficial members. This change had the effect of making the Legislative Council more truly representative of the various interests of the Colony and the different sections of the community, and the most important internal event of the year may be said to have taken place on the 25th of September, when the newly constituted Legislative Council met for the first time.

With a view to the continuance as far as possible of a policy of development by local resources—recourse to the English Loan Market being out of the question—a scheme of increased taxation was adopted. the chief feature of which was an Export duty of £2 6s. 8d. a ton on cocoa. The measure was passed by the new Legislative Council on the 26th of September, to come into effect from the 1st of October.

Social condition of the people.

A social revolution is taking place among the peoples of the Gold Coast. It is the policy of the Government to support the age-old native system of tribal administration and to abide by native custom and procedure, tempered by English ideas of essential justice and clemency, in the internal politics of the various tribes. These native institutions are strikingly democratic and the spread of intellectual enlightenment and wealth among the lower orders of the population has a tendency to render them increasingly democratic in practice as well as in theory. Simultaneously the material conditions of life of large numbers of the indigenous population are undergoing a great change owing to the sudden acquisition of wealth by the inhabitants of the cocoa-producing districts, which now cover a large area in the Colony and in Ashanti. Both the native system of tribal government and the character of the people are thus being submitted to a searching test and it is satisfactory that it is possible to record that, in the view of those best qualified to judge, the people of the Gold Coast are undergoing the ordeal with credit. Given the guidance of a wise and sympathetic central Govern-

ment, the force of their racial character and the soundness and shrewdness of their political instincts qualify them to work out their own socia and political salvation.

General condition of the Colony.

The most outstanding feature of the period under review has been the unbroken peace and prosperity that the Gold Coast has enjoyed at a time when the British Empire is convulsed by a war unprecedented in its magnitude and in the world-wide disturbance of normal conditions which it has occasioned. This we owe entirely to the power of the Mother Country. By the protection of the Navy the security of our trade and of our communication with Europe and America has been maintained. This comparative immunity provides the Colony with the opportunity of rendering loyal and efficient service to the Empire. The sacrifices and sufferings entailed upon the people of this country by the war have not been of a severe character. The principal adverse result of the war has been the sudden check to the development of the Colony caused by the disappearance of facilities for borrowing money at reasonable rates to finance its more ambitious projects of railway extension and other remunerative enterprise. The Colony has, however, as already stated, endeavoured to supply to some extent by increased taxation what it cannot borrow.

The cocoa industry, to which the present prosperity of the Colony is mainly due (though it is by no means the only string to our bow), is a purely native enterprise and, as it is almost entirely in the hands of peasant proprietors who can accomplish a great deal before they have to resort to any further labour than that of themselves and their families, the cost of production is very small. The quality of the cocoa is of a low grade, owing to the way in which it is treated locally almost as a wild fruit when once it has been planted. This manner of treatment is encouraged by the hardiness of the forest variety of cocoa which thrives best in the Gold Coast. The demand for the product has, however, ordinarily been in advance of the supply and the cheapness with which it can be put upon the market would ensure an adequate margin of profit even when low prices and high freights had driven from the field the cocoa produced by other lands.

There has continued to be a generous response from all sections of the community to the various appeals in connection with the war. A sum of £29,600 has been subscribed since November, 1914, by all classes and tribes in the Colony to the Prince of Wales' National Relief Fund. The Legislative Council unanimously voted a contribution to the Imperial Government of £200,000. This is being paid in annual instalments of £20,000 and is being spent, during the war, on the purchase of fighting aeroplanes. Ten scouting aeroplanes (including two from Ashanti) have been presented by private communities, chiefs and tribes, while large sums have been subscribed by all races to the Red Cross and other funds.

Practically the whole of the Civil Service, and a large number of members of the trading community. have continuously importuned Government to be allowed to join the Forces. A large number of officials have been econded for various war services and the administrative staff of the Government has practically reached the irreducible minimum.

European Immigration.

Native aspirants to various kinds of employment, skilled and unskilled, being plentiful, it is not the policy of Government to encourage European immigration and, living being expensive, it is highly inadvisable for Europeans in search of employment to come to the Colony without previous engagement by Government or by mining, mercantile and other companies in Europe.

II.—FINANCIAL.

Revenue.

The Revenue for the year amounted to £1,835,989, or £379,859 in excess of the Revenue for 1915, and is the largest on record.

The increases and decreases under the several heads as compared with the figures for the year 1915 are shewn in the appended table :—

Heads of Revenue.	1916.	1915.	Increase.	Decrease.
	£	£	£	£
1. Customs	1,132,000	828,015	303,985	—
2. Light Dues	1,656	1,682	—	26
3. Licences	53,964	45,436	8,528	—
4. Fees of Court, &c. ..	48,127	44,487	3,640	—
5. Railways	505,665	445,898	59,767	—
6. Posts and Telegraphs	18,248	14,989	3,259	—
7. Rents of Govt. Land	1,419	1,345	74	—
8. Interest	16,165	8,672	7,493	—
9. Ashanti	44,824	52,644	—	7,820
10. Northern Territories	3,502	3,616	—	114
11. Miscellaneous ..	10,105	9,271	834	—
12. Land Sales	314	75	239	—
Total ..	£1,835,989	£1,456,130	£387,819	£7,960

The substantial increase under Customs is due to unusually heavy importations of all classes of goods during the last six months of the year, to the operation throughout the year of increased duties which were imposed in March and October 1915, and to the export duty on cocoa imposed under Ordinance No. 16 of 1916, which came into force as from the 1st of October.

Under Licences the increase is mainly due to receipts under the sub-heads Firearms and Ammunition, Motor Licences and Spirit Licences. A much larger number of renewals of gun licences accounts for £2,000, the increased number of motor vehicles for £1,300, and spirit licences, always a variable source of revenue, for £3,000 of the increase.

The increase recorded under Fees of Court, &c., is due to larger receipts in respect of customs warehouse rents and water rates.

The large increase under Railways is due to advanced freight charges on cocoa from Coomassie to Seccondee and increased passenger traffic on the Accra Railway. The receipts from the Accra Water Works Railway, now taken over by the Railway Department and worked as part of the general system, account for over £4,000 of the excess.

Under Posts and Telegraphs the sum collected in respect of "Postage on United Kingdom and Inter-Colonial Parcels" was £1,100 more than in 1915 and the revenue from Inland Telegrams was £1,700 more, though the latter sub-head produced £2,678 less than had been estimated.

The increase under the head Interest is due to the fact that larger sums were available for temporary investment by the Crown Agents.

A falling off of £11,000 in the collections under Mining Royalties accounts for the decrease shown against Ashanti. This was due to the fact that the Ashanti Goldfields Corporation did not pay their royalty of £12,166 in respect of the half year ending with the 30th of June, 1916, until January, 1917.

The yearly revenue for the period 1912 to 1916 was as under :—

1912	£1,230,850
1913	1,301,566
1914	1,331,713
1915	1,456,130
1916	1,835,989

EXPENDITURE.

The expenditure for the year amounted to £1,465,946 or £161,069 less than the expenditure in 1915.

The increases and decreases under the several heads, as compared with the figures for the year 1915, are shewn in the appended table :—

Heads of Expenditure.	1916.	1915.	Increase.	Decrease.
	£	£	£	£
1. Governor & Legislature	8,125	7,206	919	—
2. Supreme Court ..	11,599	12,042	—	443

44. War Expenses ..	37,273	22,364	14,909	—
45. Expedition to Togoland	1,694	14,491	—	12,797
Total ..	£1,465,946	£1,627,015	£124,317	£285,386

The increase under Accra Harbour Maintenance is due to the increased cost of the coal required for the sand-pumping operations.

Under Railways the increase is due partly to the charging to that head of the sum of £15,000 as the cost of the Accra Water Works Railway, taken over by the Railway Department from the 1st of March, 1916, and partly to the increased cost of materials, ocean passages, &c.

Under Gold Coast Regiment the increase is chiefly under Personal Emoluments and is due to the pay of troops, &c., who served in the Cameroons in 1914-15 being charged in the accounts for 1916.

The increase under War Contribution is due to the Legislative Council of the Colony having voted an increase of the Colony's contribution to the Imperial Government from £100,000 payable in ten annual instalments of £10,000 to £200,000 payable in ten annual instalments of £20,000 as from the 1st of January, 1915.

A curtailed programme accounts for the decreases under Railway Capital Improvements, Posts and Telegraphs Extraordinary, Public Works Department, Public Works Extraordinary and Special Works.

The yearly expenditure for the period 1912 to 1916 was as under :—

Year	£
1912	1,157,091
1913	1,353,291
1914	1,755,850
1915	1,627,015
1916	1,465,946

Loan Expenditure.

The following table shows the various items of expenditure up to 31st December, 1916, which have been charged to Loan Account :—

Seccondee-Coomassie Railway	£1,812,556
Accra-Akwapim Railway	300,000
Tarquah-Prestea-Broomassie Railway	135,000
Accra Harbour Works	158,000
Seccondee Harbour Works	168,312
Accra Water Works	200,000
Seccondee Water Works	156,817
	£2,930,685

In addition to the above sums charged to loan account, expenditure has been defrayed from revenue during the years 1912 to 1916 in respect of special works as under :—

Accra Harbour Works	£116,916
Seccondee Harbour Works	39,875
Accra-Akwapim Railway	84,904
Tarquah-Prestea-Broomassie Railway	26,837
Accra Water Works	60,257
Seccondee Water Works	12,411
	£341,200

ASSETS AND LIABILITIES.

The excess of assets over liabilities on the 1st January, 1916, was £292,822. At the close of the year this excess had risen to £662,865, the increase of £370,043 representing the excess of revenue over expenditure for the year.

At the end of the year the amount of the Colony's surplus funds advanced at call by the Crown Agents stood at £468,288.

Public Debt.

At the close of the year the public debt of the Colony amounted to £3,424,118, as compared with £3,444,118 on the 31st December, 1915, the difference being due to the repayment of the sum of £20,000 to the Imperial Government during the year.

The amount standing to the credit of the sinking fund for the amortisation of the funded portion of the public debt on the 31st December, 1916, was £210,777 as against £182,055 at the end of 1915, £21,280 having been contributed from general revenue during the year, and £7,442 being the interest on investments.

Currency.

British gold and silver coins and British West African silver coins (introduced into West Africa in June, 1913), are legal tender to any amount throughout the Colony and its Dependencies; also British bronze coins and British West African nickel coins up to one shilling.

During the year coin of the face value of £526,000 was received from the Currency Board and the balance on the 31st December in the custody of the Currency Officer was £348,000.

The total face value of nickel coins which have been imported into this Colony amounted at the close of the year to £8,867, viz:—

Imported in	1912	£1,500
	1913	1,500
	1914	2,000
	1915	1,362
	1916	2,505
		£8,867

These coins are of the following denominations:—one penny, halfpenny and one-tenth of a penny. Generally speaking, they have been well received, although in the Colony and Ashanti little use is made of the "tenths." In the Northern Territories, however, there is a fair demand for this denomination.

The sum of £38,000 10s. in Imperial Treasury Notes was held by the Bank of British West Africa, Limited, on the 31st of December, 1916, to the order of the Currency Board.

West Africa (Nigeria) currency notes were introduced experimentally during the year and £30,000 in 20s. notes, £30,000 in 10s. notes and £5,000 in 2s. notes were received from the Currency Board. The amount of these notes actually in circulation during the year was £11,000, in 20s. and £3,750 in 10s. notes.

Municipal Bodies.

There are town councils in the towns of Accra, Cape Coast and Seccondee.

Each council consists of eight members, of whom four are officials,

nominated by the Governor, and four are elected by the ratepayers. The Governor has power to appoint four members to represent the ratepayers, if there is no election through the failure of voters to nominate.

The following table shows the revenue and expenditure of the town councils for the past five years :—

Revenue.

	1912	1913	1914	1915	1916
	£	£	£	£	£
Accra ..	8,630	9,537	11,156	13,108	13,848
Seccondee	4,511	4,734	5,521	5,247	5,690
Cape Coast	3,495	3,890	5,288	3,335	4,521

Expenditure.

	1912	1913	1914	1915	1916
	£	£	£	£	£
Accra ..	8,022	10,637	11,340	11,516	13,403
Seccondee	4,769	5,172	5,551	5,223	5,324
Cape Coast	3,349	3,547	3,966	5,161	4,223

III.—TRADE, AGRICULTURE AND INDUSTRIES.

Imports.

The total value of imports during 1916 (exclusive of expenses on specie and of the value of free goods imported across the land frontiers) was £5,999,746, an increase of £1,490,211 or 33 per cent. as compared with 1915. Of this total the value of specie amounted to £902,982, a decrease of £134,762 or 13 per cent., and the value of Government stores amounted to £214,844, a decrease of £140,310 or nearly 40 per cent.

The value, therefore, of commercial imports (including post parcels, but exclusive of specie and free goods imported across the land frontiers) amounted to £4,881,920, an increase of £1,765,234 or 56 per cent. as compared with 1915. This remarkable increase is partly due to the increased prices of commodities, but at the same time it must be observed that, with the important exceptions of cotton goods, soap and gin, every important increase in value is accompanied by an increase in quantity (where quantity is shown), albeit nearly always smaller in proportion. The purchasing power of the inhabitants of the Colony has again proved extraordinarily stable. During the first six months of the year the local stocks of goods were greatly below the demand for them, price being only a secondary consideration.

Specific duty was paid on imports which were valued at £1,272,954, an increase of £363,177 or 40 per cent. as compared with 1915; *ad valorem* rates were paid on imports valued at £2,438,007, an increase of £994,639 or nearly 69 per cent.; and imports free of duty were estimated at £900,994, an increase of £321,602 or 55 per cent.

The value of goods imported by parcels post was £269, 964, an increase of £85,782 or 46 per cent.

THE FOLLOWING IS A COMPARATIVE TABLE OF THE QUANTITIES AND VALUES OF THE PRINCIPAL ARTICLES OF IMPORT FOR THE YEARS 1915 AND 1916.

Wines		38,414	14,300	58,998	33,046	18,746	—

The principal increases are in *Cotton Goods*, due to increased prices; in *Provisions*, probably due in the main to increased prices; in *Carriages and Carts*, due mainly to increased importations of light motor lorries and cheap touring cars of American origin; in *Hardware*, due largely to increased prices but also to long overdue fulfilment of orders; in *Cigarettes*, due to the necessity for replenishing stocks, which were very low at the beginning of the year; in *Wearing Apparel*, due to increased prices; in *Perfumery*, due to the supply this year by British manufacturers of substitutes for the goods supplied before the war by Germany; in *Rum*, about two-thirds due to increased price and one-third to heavy importations to replenish short stocks; in *Gin*, due entirely to increased price; in *Spirits, other Kinds*, more than a quarter due to increased prices, the remainder to increased importation, partly to satisfy a growing preference on the part of well-to-do natives for whisky instead of gin and rum and partly in anticipation of difficulty in obtaining supplies later; in *Beads*, due to the supply of substitutes of Italian manufacture for the beads supplied before the war by Austria; in *Railway Plant and Rolling Stock*, due to the arrival in 1916 of materials that had been long on order; in *Sugar*, more than three-fifths due to increased prices, the remainder to replenishment of short stocks and natural trade development; in *Building Materials*, due largely to increased prices, but also to the development of the Colony; in *Cordage*, about half due to increased prices and half to a return to normal supplies; and in *Earthenware*, due to increased prices and to the need of a substitute for German enamelware.

The principal decreases are in *Machinery*, due to the difficulty of obtaining it from the United Kingdom and in *Rice*, owing to the shipping difficulties in the way of getting it from the Far East to England and thence to this Colony.

The Commercial imports for the five years ending with 1916 were valued as follows:

	£
1912	3,140,786
1913	3,250,673
1914	3,158,171
1915	3,116,686
1916	4,881,920

Chief Sources of Supply.

The following table shows the value of imports (exclusive of specie) from the principal supplying countries each year from 1912 onwards and the percentages arrived at by comparing the several figures with the total imports for the year:

1912.

United Kingdom	£2,317,732—70%
Germany	379,027—11%
France	42,604— 1%
United States of America	229,604— 7%
Holland	182,965— 6%
Southern Nigeria	18,314— 1%
Other Foreign Countries	109,574— 3%

1913.

United Kingdom	£2,468,604—70%
Germany	386,670—11%
France	44,299— 1%
United States of America	251,742— 7%
Holland..	189,165— 5%
Southern Nigeria	23,535— 1%
Other Foreign Countries	124,964— 4%

1914.

United Kingdom	£2,660,682—74%
Germany	289,288— 8%
France	32,979— 1%
United States of America	270,176— 8%
Holland	170,810— 5%
Nigeria..	24,312— 1%
Other Foreign Countries	121,072— 3%

1915.

United Kingdom	£2,734,991—79%
Germany	9,839—
France	37,285— 1%
United States of America	349,106—10%
Holland..	199,644— 6%
Nigeria	36,351— 1%
Other Foreign Countries	95,588— 3%

1916.

United Kingdom	£3,860,765—75%
Germany	128—
France	77,089— 2%
United States of America	751,225—15%
Holland	217,976— 4%
Nigeria	75,902— 2%
Other Foreign Countries	81,759— 2%

The principal increases in imports from the United Kingdom occurred in Cottons, Hardware, Provisions, Wearing Apparel, Perfumery, Cordage, Beads, Spirits (Other Kinds), Cigarettes, Carriages and Carts, Building Materials, Earthenware and Furniture but it must be noted that the goods contributing to these increases are not all of British origin, although they come to the Gold Coast from the United Kingdom. Decreases in imports from the United Kingdom are shown against Machinery, Lumber. Rice, Beef and Pork and Sugar. Of these only machinery can be counted as a British product and it is natural that its production should decline under war conditions. The other commodities are to a great extent still being conveyed to the Gold Coast, but direct from their countries of origin instead of through the United Kingdom.

Imports from the United States of America show numerous important increases and no important decreases. Increases in such typical American products as beef and pork, cabin bread, carriages, flour, hardware, petroleum and rum call for no special comment, but the remarkable gains of the United States of America in building materials (especially cement), perfumery, provisions, railway plant and sugar can only be attributed to war conditions in Europe.

France has scored increases in beads, building materials, perfumery, silk and wines.

Holland has lost in cottons and sugar, but has gained in gin.

EXPORTS.

The total value of all exports from the Colony during 1916 was £5,816,527, a decrease of £127,104 or about per 2 cent., as compared with 1915. Deducting the value of specie (£239,772) and of Government exports (£621), the value of commercial exports amounted to £5,576,134, a decrease of £238,676 or 4 per cent. as compared with 1915. Considering the large increase recorded in 1915 and the difficulty of the circumstances this slight set-back does not papear to be of much significance.

The following is a comparative table of the quantities and values of the principal articles of Commercial Export for the years 1915 and 1916:—

PRINCIPAL ARTICLES OF COMMERCIAL EXPORT FOR THE YEARS 1915 AND 1916.

Articles.		1915.		1916.		Increase.	Decrease.
		Quantity.	Value.	Quantity.	Value.		
			£		£	£	£
Cocoa	tons.	77,278	3,651,341	72,161	3,847,720	196,379	—
Kola Nuts	lbs.	8,677,100	39,163	6,760,898	130,566	—	8,597
Copra	tons.	770	12,821	633	14,384	1,563	—
Gold and Gold Dust	ozs.	462,062	1,755,552	315,871	1,200,868	—	554,684
Auriferous By-Products	lbs.	125,009	26,960	101,377	41,262	14,302	—
Lumber (Native Timber)	sup. ft.	9,217,622	90,661	10,334,793	93,980	3,319	—
Palm Kernels	tons.	4,064	50,512	5,857	85,899	35,387	—
Palm Oil	galls.	330,990	25,769	450,360	38,299	12,530	—
Rubber	lbs.	647,982	25,167	2,215,973	78,865	53,698	—

The principal increases were as follows:

Cocoa. (Increase of £196,379 or 5 per cent. in value: decrease of 5,117 tons or 6 per cent. in quantity). The decrease in quantity was due to the shortage of ships and to the depressed state of the European cocoa market during the three last months of the year. The crop itself was much heavier than in 1915, but the great bulk of it remained in the Colony at the end of the year, because tonnage was not available to take it away. The increase in value is to be attributed to the fact that very large quantities of cocoa purchased at high prices during the latter part of 1915 were actually exported in 1916. There was a steady decline in the local market prices during the year from 18/- to 29/- per load of 60 lbs. in January to 7/- to 20/- in December. This decline was due solely to the unsettled conditions existing in the European and American markets and in no way to deterioration in quality. That the quality however has not improved relatively to cocoa from other countries is apparent from the fact that on January 13th last, while Trinidad stood in London at 76/- to 78/-; Grenada at 64/- to 69/-; Saint Lucia at 68/- to 69/-; Jamaica at 69/-; Saint Thomas at 66/-; Guayagil at 82/- to 84/- and Ceylon at 66/- to 90/-: Gold Coast cocoa stood at only 53/- to 58/- per cwt. As regards destination, the United Kingdom took in value £433,362 or 17 per cent. less than in 1915, while France took £401,733 or 43 per cent. more in value and the United States of America £226,379 or 80 per cent. more in value, increases which are probably accounted for by a greater number of shipments to these countries direct instead of through the British markets.

Rubber. (1,567,991 lbs. or 242 per cent. in quantity and £53,698 or 213 per cent. in value). This is due to a revival of the industry under the influence of the greater demand for rubber in England, but the lowering of the local average price indicates that the increased exports occurred in the lower class or paste varieties, which in normal times would probably be unsaleable.

Palm Kernels. (1,793 tons or 44 per cent. in quantity and £35,387 or 70 per cent. in value). This corresponds approximately to the decrease that occurred in 1915 and is due solely to the stimulus given by the increased price and demand in Europe.

Palm Oil. (119,370 gallons or 36 per cent. in quantity and £12,530 or 49 per cent. in value). The cause of this increase is the same as in the case of palm kernels and it is similarly about equivalent to the decline in 1915.

Timber. The small increase is far from compensating for the falling off that occurred in 1915. The demand for mahogany remains small and the facilities for its shipment inadequate.

The decreases were in gold and kola nuts.

Gold. (£554,684 or 32 per cent.). This is not due to any decline of the mining industry, but to the retention of stocks in the Colony.

Kola Nuts. (1,916,202 lbs. or 22 per cent. in quantity and £8,597 or 6 per cent. in value.) This is probably due solely to the difficulty of getting the product shipped to its principal market, Nigeria.

The value of commercial exports for the five years ending with 1916 has been as follows:

		£
1912	..	4,004,294
1913	..	5,023,646
1914	..	4,469,753
1915	..	5,814,810
1916	..	5,576,134

Chief Customers for Gold Coast Exports.

The following table shows the value of goods (exclusive of specie) shipped to each principal consuming country since 1912 and the proportion that each figure bears to the total for the year:

1912.			
United Kingdom	..	.. £2,677,575	or 67%
Germany..	..	.. 731,122	„ 18%
France ..	..	.. 384,219	„ 10%
United States of America	..	72,135	„ 2%
Southern Nigeria	..	.. 133,977	„ 3%
1913.			
United Kingdom	..	.. £3,416,637	or 68%
Germany..	..	.. 899,468	„ 17%
France ..	..	.. 455,585	„ 9%
United States of America	..	101,055	„ 2%
Southern Nigeria	..	.. 145,023	„ 3%
1914.			
United Kingdom	..	.. £3,028,997	or 68%
Germany..	..	.. 554,632	„ 12%
France ..	..	.. 528,780	„ 12%
United States of America	..	93,383	„ 2%

1915.			
United Kingdom	—	.. 4,370,377	or 75%
France ..	..	— 963,634	„ 16%
United States of America	..	329,466	„ 6%
Nigeria ..	..	.. 139,247	„ 2%
1916.			
United Kingdom	..	.. £3,453,888	or 62%
France ..	..	.. 1,374,815	„ 24%
United States of America	..	603,772	„ 12%
Nigeria —	—	— 130,913	„ 2%

The large decrease in shipments to the United Kingdom in 1916 is due to *Cocoa* (£433,362), which in this year to a larger extent than formerly was shipped direct to the United States of America and France instead of *via* the British markets, and to *Gold* (£554,684), the shipment of which to the United Kingdom has been postponed. The bulk of our increased exports of palm oil and palm kernels went to the United Kingdom.

The increased shipments to France were made up of cocoa, palm kernels, copra and rubber.

The gain of the United States of America consists of cocoa and timber shipped direct instead of through British ports.

Principal Ports.

The following table gives the principal ports of the Colony, showing the value of imports and exports for 1916 in each case :—

	Value of Imports.	*Value of Exports.*
	£	£
Accra	2,406,467	2,260,653
Seccondee	1,819,181	2,267,535
Winnebah	348,453	409,546
Addah	365,259	249,221
Saltpond	263,333	231,039
Cape Coast ..	180,444	109,148
Quittah	100,098	55,266
Axim	44,046	106,262
Appam	86,584	62,940
Half Assinie ..	30,469	20,579

Total Trade.
